Joe Pye Weed. See *Eupatorium purpureum.*

Johnson's Picro-saccharimeter. See *Picro-saccharimeter.*

Joint [ME., *joynt*, a joint]. See *Articulation.* **J.-disease,** any morbid affection involving the joints and their surrounding tissues. **J., Charcot's,** a disease of the joints accompanying tabes dorsalis. It is characterized by a swelling, due to effusion of fluid into the articular cavity and about the surrounding tissues, followed by a lax condition, and ending in distortion or deformity of the joint, sometimes with diminished range of motion, and at other times with excessive range of motion. **J.-felon.** See *J.-ill.* **J.-ill,** a term applied to two very different forms of disease in cattle: 1. To *septic arthritis,* resulting from septic inflammation of the navel; 2. To an acute exudative arthritis, in which large quantities of plastic lymph are thrown into the cavity of the joint, leading to permanent stiffening and deformity. **J.-less,** without joints. **J.-mice.** See *Corpora libera articulorum.* **J.-oil,** the synovia.

Jones's (Bence) Albumin. See *Albumin.*

Jorissenne's Sign. See *Signs and Symptoms, Table of.*

Joule (*jool*) [after J. P. *Joule*, an English physicist]. A heat-unit, equal to one calorie divided by 4200. See *Electric Units.* **J.'s Law.** See *Law.*

Jowl (*jōl* or *joul*) [ME., *jolle*, jaw]. The cheek.

Judas Tree (*ju'-das tre*). Red-bud. The bark of *Cercis canadensis,* an astringent, much used in diarrhea, and as an injection in leukorrhea. Dose of the fld. ext., ♏xv–℥j. Unof.

Jugal (*ju'-gal*) [*jugum*, a yoke]. Connecting or uniting, as by a yoke. **J. Bone,** the malar bone. **J. Points.** See *Craniometric Points.* **J. Process.** See *Zygoma.*

Juglandin (*jūg-lan'-din*) [*juglans*, a walnut]. A precipitate from a tincture of the root-bark of Butternut, *Juglans cinerea;* it is alterative, tonic, laxative, detergent, etc. Dose 2 to 5 grains. Unof.

Juglans (*jūg'-lanz*) [L., "walnut"]. A genus of trees, including the true walnut. **J. regia,** the European walnut, has stimulant and alterative leaves, which have been found useful in expelling tapeworm. The black walnut, **J. nigra,** has the same properties. Butternut, the inner bark (collected in autumn) of the roots of **J. cinerea,** is a mild cathartic, very popular in dysentery and chronic constipation. Dose of the ext., gr. v x.

Juglone (*jūg'-lōn*) [*juglans*, walnut], $C_{10}H_5(O_2).OH$. An active principle existing in the bark of the European walnut; it is also obtained by oxidizing hydrojuglone with ferric chlorid. It is almost insoluble in water, consists of yellow needles, and melts with decomposition at about 150–155° C. It has the smell of fresh walnuts, and is a powerful sternutatory. Unof.

Jugo-maxillary (*ju'-go-maks'-il-a-re*) [*jugum*, a yoke; *maxilla*, a jaw]. Relating to the jugular vein and the maxilla.

Jug-sound. A term for amphoric resonance.

Jugular (*ju'-gu-lar*) [*jugularis; jugulum*, throat]. Pertaining to the throat. **J. Fossa.** See *Fossa.* **J. Ganglion.** See *Ganglia, Table.* **J. Veins.** See *Vein.*

Jugulation (*jug-u-la'-shun*) [*jugulatio*, a killing]. The swift and sudden shortening of an attack of disease by therapeutic measures; also, the arrest of an epidemic by prompt and effective measures.

Jugulocephalic (*ju-gu-lo-sef-al'-ik*) [*jugulum*, the throat; κεφαλή, head]. Pertaining to the throat and the head.

Jugulum (*jūg'-u-lum*) [L.: *pl.*, *Jugula*]. The collar-bone; also, the throat.

Jugum (*ju'-gum*) [L.: *pl.*, *Juga*]. A yoke. In biology, a pair of leaflets in a compound leaf. **J. penis,** a cushioned forceps or compressor applied to the penis to prevent incontinence of urine. **J. sphenoidale,** the line of fusion of the orbito-sphenoid bones.

Juice (*jūs*) [*jus*, broth]. The fluid or liquid contained in the tissue of an animal or plant. Various secretions of the body are known as juices, *e.g.*, the gastric, intestinal, and pancreatic juices. **J.-canals,** spaces within the connective tissue, constituting the origin of the lymphatic vessels. **J., Gastric.** See *Gastric.* **J., Intestinal,** the intestinal secretion, *succus entericus,* the secretion of the follicles of Lieberkühn mainly, but in the duodenum including that of Brunner's glands. **J., Pancreatic.** See *Pancreatic.*

Jujube (*ju'-jūb*) [*jujuba*, fruit]. The fruit of the jujube tree, *Zizyphus jujuba.* **J.-paste,** a confection, originally containing the pulp of jujubes, but now made of gum-arabic, or of gelatin, variously flavored.

Julaceous (*ju-la'-she-us*) [*iulus*, catkin]. In biology, resembling a catkin.

Julep (*ju'-lep*) [Pers., *jūlāb*, a sweet drink]. A sweetened and aromatized alcoholic or medicated drink.

Jumbai-bean (*jum'-hi-hēn*) [Negro dial., *Jumbai*, an evil spirit]. The *Leucæna glauca* Benth, a leguminous tree resembling the locust, found in the West Indies. The eating of the fruit or the foliage by horses and cattle results in the loss of hoofs, horns, and hair of tail and mane.

Jumpers (*jum'-perz*) [ME., *jumpen*, to jump]. A name applied to those afflicted with a neurosis characterized by motor incoördination and convulsive movements of any part of the body, but especially of the lower extremities, so that springing movements or jumping movements follow efforts to walk, etc. The name has also been given to hysteric fanatics whose devotional frenzy is accompanied by acts of leaping and distortion; and also to certain persons whose powers of will and control over their movements are in part abolished. See *Latah, Myriachit, Palmus,* and *Saltatoric Spasm.*

Jumping (*jump'-ing*). See *Palmus.*

Junctura (*junk-tu'-rah*) [L.]. A suture, as of bones.

June (*jūn*) [*Junius*, a Roman name, meaning young]. The sixth month of the year. **J.-cold.** Synonym of *Hay-fever.* **J. Lobster.** See *Buckle-shell.*

Jungle Fever. See *Fever.*

Juniper (*ju'-nip-er*). See *Juniperus.*

Juniperin (*ju-nip'-er-in*) [*juniperus*, the juniper-tree]. A yellow, resin-like powder found in juniper-berries.

Juniperus (*ju-nip'-er-us*) [L., *gen.*, *Juniperi*]. 1. A genus of berry-bearing coniferous trees. Besides the official species (see *Juniperus,* 2), there are several other medicinal species. 2. Juniper, the fruit of *J. communis;* its properties are mainly due to a volatile oil, and it is a stomachic tonic, diuretic, and aphrodisiac. The oil is eliminated by the kidneys. It is valuable in chronic pyelitis and cystitis. **J., Infusum,** unof., consists of juniper-berries ℥j, boiling water Oj. **J., Ol.,** the volatile oil. Dose ♏v–xx. **J., Spt.,** 5 parts of the oil in 95 of alcohol. Dose ℥j–℥j. **J., Spt.,**

Comp., the gin of commerce; oil of juniper 8, oil of caraway 1, oil of fennel 1, alcohol 1400, water q. s. ad 5000 parts. Dose ℥ss–j. **J. oxycedrus** affords oil of cade, *q. v.* See also *Sabina*. **Oil of Cade,** a tar obtained by the distillation of juniper-wood; it is sometimes used externally in eczema and psoriasis. Unof.

Junk [Port., *junco*, a rush]. In surgery, a quilted cushion forming a sling in which to suspend a fractured limb. It was formerly made of rushes or reeds.

Junker's Inhaler. See *Anesthetic*.

Junket (*junk'-et*) [ME., *junket*, a rush]. Curds and whey; a delicacy for invalids, prepared by taking ½ pint of fresh milk heated to an agreeable temperature, adding 1 teaspoonful of rennet or essence of pepsin, and stirring well. Let the mixture stand till curdled, and serve with sugar and nutmeg.

Junod's Boot. A boot-shaped case, usually of stiff leather, made to enclose the leg so that, the air being exhausted, the blood-vessels and tissues of the limb are dilated by the excess of blood. It has been employed to relieve inflammation and congestion of the viscera.

Jurema (*ju-re'-mah*) [Braz.]. A leguminous Brazilian tree, *Stryphnodendron jurema*. Its bark is astringent, and is said to be narcotic. Unof.

Juriballi (*ju-rib-al'-e*) [W. Ind.]. A name for several meliaceous trees and their astringent and antipyretic bark, among which are *Trichilia moschata*, *Soymida febrifuga*, and *Khaya senegalensis*.

Jurisprudence (*ju-ris-pru'-dens*) [*jus*, law; *prudentia*, skill]. The science of the interpretation and application of the law. **J., Medical,** the application of medical knowledge to the principles of common law.

Jurubeba (*ju-ru-be'-bah*) [Braz.]. The leaves and juice of a shrub, *Solanum insidiosum*, indigenous to Brazil. It is an alterative, tonic, diuretic, and drastic cathartic. Dose of the fluid extract gtt. j–v. Unof.

Jury (*ju'-re*) [*jurare*, to swear]. A body of men legally appointed to determine the guilt or innocence of a prisoner, or to determine the facts in judicial inquiries. **J.-leg,** a wooden leg. **J. of Matrons,** a body of twelve matrons, formerly empaneled in England to determine if a murderess, for whom such plea was made, were pregnant. **J.-mast,** a steel shaft with curved iron rods attached, sometimes employed to support the head in disease of the upper vertebræ; it is mainly used in connection with Sayre's treatment of spondylitis. See annexed illustration.

Jus (*jūs*) [L.]. See *Juice*, and *Jusculum*.

Jusculum (*jus'-ku-lum*) [L., a decoction]. A soup or broth; gruel or porridge.

Jusetmond's Arsenical Powder. A preparation of arsenic used in various skin-affections. It consists of sulphuretted antimony, 16 parts; arsenious acid, one part. These are melted in a crucible, and, when cold, the mass is reduced to a powder, and five parts of extract of opium are added.

Justicia (*jus-tis'-e-ah*) [named from a Mr. *Justice*, a botanist]. A genus of acanthaceous herbs and shrubs. **J. adhatoda** is antispasmodic and febrifuge. **J. ecbolium** is anti-icteric, diuretic, and deobstruent. **J. echioides,** diuretic. **J. gendarussa,** diaphoretic. **J. pectoralis** is bechic and stomachic. Unof.

Justo-major Pelvis (*jus'-to-ma'-jor*). See *Pelvis, Female, Deformities of*.

Justo-minor Pelvis. See *Pelvis, Female, Deformities of*.

Jute (*jūt*) [Beng., *jūt*, matted hair]. The bast fiber of two species of the genus *Corchorus*, grown chiefly in India and Ceylon. The fibers have a length of 2.5 meters, or even more, are of a yellowish-white color, and have a fine luster. Jute contains no free cellulose, but consists of bastose. When treated with iodin and sulphuric acid, it yields a deep-brown color.

Juvantia (*ju-van'-she-ah*) [L., "aiding"]. Adjuvant remedies or medicines. See *Adjuvant*.

JURY-MAST. (*Sayre.*)

Juventus (*ju-ven'-tus*) [*juvenis*, young]. A term formerly applied to that period of life between the ages of twenty-five and thirty-five years.

Juxtaposition (*juks-tah-po-zish'-un*) [*juxta*, near; *positio*, position]. Situation adjacent to another; the act of placing near; apposition.

K

K. The symbol of *Kalium*, or its more commonly used equivalent, *Potassium.*

K., or Ka. In electrotherapeutics, the abbreviation of *Kathode*, or of *Kathodic.*

Kaateer's Method. A method of staining tubercle-bacilli. See *Stains, Table of.*

Kabbalistic, Cabalistic (*kab-al-is'-tik*) [Heb., *gabbālāh*, reception]. Pertaining to the Kabbala, which included a system of the treatment of diseases by supernatural agencies.

Kaif (*kīf*) [Arab.]. Languor; dreamy enjoyment; sensuous tranquillity, such as follows the use of certain drugs (like opium, or hashish).

Kairin (*ki'-rin*) [*καιρός*, the right time], $C_{10}H_{13}NO.HCl.H_2O$. An artificial alkaloid prepared from chinolin. It is valuable as a powerful antipyretic; it also produces diaphoresis and emesis; its use is sometimes followed by collapse. Its general properties are similar to those of antipyrin, *q. v.* Dose gr. iij–xxx. Unof.

Kairocoll (*ki'-ro-kol*) [*καιρός*, the right time; *κόλλα*, glue], $C_{11}H_{11}NO_2$. An artificial alkaloid prepared from chinolin.

Kairolin, or Kairolina (*ki'-ro-lin*, or *ki-ro-li'-nah*) [*καιρός*, the right time], $C_{10}H_{15}N$. Methylquinolin hydrid. An antipyretic resembling kairin, but less efficient. Unof.

Kakké (*kak'-ka*) [Chinese for "leg-disease"]. Epidemic and endemic multiple neuritis, or beriberi, as seen in Eastern and Southern Asia.

Kako- (*kak'-o-*). See *Caco-.*

Kakodyl (*kak'-o-dil*). See *Cacodyl.*

Kakosmia (*kak-oz'-me-ah*). See *Cacosmia.*

Kakotrophia (*kak-ot-ro'-fe-ah*). See *Cacotrophy.*

Kaladana (*kal-ad-a'-nah*) [origin unknown]. An East Indian convolvulaceous plant, *Ipomœa* (*Pharbitis*) *nil.* Its seeds are a safe and good cathartic. Dose of the powdered drug, ʒss–ℨij; of the resin, gr. iv–viij. Unof.

Kalanchoe (*kal-an-ko'-e*) [Chinese]. An East Indian crassulaceous plant. Its leaves are used in the form of poultices for bites and boils, the juice as an antipyretic. Unof.

Kali (*kal'-e*, or *ka'-li*) [Ar., *qalī*, potash]. Potassium, *q. v.* **K.-blue.** Same as *Berlin-blue.*

Kalidium (*kal-id'-e-um*) [*καλίδιον*, dim. of *καλιά*, cot, granary: *pl.*, *Kalidia*]. In biology, the spore-capsule of certain algæ.

Kaligenous (*kal-ij'-en-us*) [Ar., *qalī*, potash; *γεννᾶν*, to beget]. Pertaining to the production of potassium.

Kaligraph (*kal'-ig-raf*) [*καλός*, beautiful, *γράφειν*, to write]. An instrument for the use of those afflicted with writers' cramp. It is essentially a pantograph, so arranged that by making the letters very large at one point, they are reproduced of a natural size at another.

Kalimeter (*kal-im'-et-er*). See *Alkalimeter.*

Kalimetry (*kal-im'-et-re*). See *Alkalimetry.*

Kaline (*ka'-lin* or *kal'-in*). See *Alkaline.*

Kalisaya (*kal-is-a'-yah*). See *Calisaya.*

Kalium (*ka'-le-um*). A synonym of *Potassium, q. v.*

Kalmia (*kal'-me-ah*) [after Peter *Kalm*, an explorer]. Laurel, Mountain-laurel, Sheep-laurel, Broad-leaved laurel, Calico Bush. The leaves of *K. latifolia*, a well-known evergreen common in the United States, having alterative, cardiac, sedative, and astringent properties. It is a popular cure-all, and has proved valuable in diarrhea and in syphilitic affections. Dose gr. xx–xxx; of the fld. ext. ♏xx–ʒss. Unof. **K. angustifolia**, like the foregoing, is poisonous. Its decoction is a popular remedy for sores and ulcers, to which it is applied hot. Unof.

Kalmuck Type. See *Idiocy, Ethnic.*

Kamala (*kam-a'-lah*) [Hind., *kamīla*]. Rottlera. The glands and hairs from the capsules of *Mallotus philippinensis* (*Rottlera tinctoria*), native to Southern Asia and Abyssinia. It is a purgative and anthelmintic, much used for the expulsion of lumbricoid and other parasitic worms. Dose ʒj–ʒj of an ʒvj to ʒxvj alcoholic tincture.

Kambi (*kam'-be*) [E. Ind.]. An aromatic gum, like elemi, from *Gardenia lucida*, a plant of India. Unof.

Kamela (*kam-e'-lah*) or **Kamila** (*kam-e'-lah*). See *Kamala.*

Kammerer and Giacomi's Apparatus. An apparatus for air-analysis.

Kanarin (*kan'-ar-in*), $C_3N_3HS_2$. A substance obtained from KCNS by electrolysis; it is probably identical with pseudo-cyanogen sulphid, and is employed as a yellow or orange dye for wool, not requiring a mordant.

Kandahar Sore (*kan'-da-har*). See *Furunculus orientalis.*

Kandelia (*kan-de'-le-ah*) [E. Ind., *kandel*]. A rhizophoreaceous plant found in the Malay Islands. **K. rheedii**, a small tree found in India, where its bark, mixed with dried ginger, or pepper and rose-water, is used in diabetes. Unof.

Kandol (*kan'-dol*). A volatile constituent of coal-tar, proposed as a local anesthetic. Its rapid evaporation freezes the superficial tissues. It is possibly identical with rhigolene, *q. v.* Unof.

Kangaroo Method (*kang-gar-oo'*). H. C. Wood's term for the method of treating disease by giving, at short intervals, powerful remedies whose influence is short-lived. **K. Tendon**, a material derived from the tail of *Macropus giganteus*, the great kangaroo. It is used in surgery for ligatures. See *Ligature.*

Kanten (*kan'-ten*) [Jap.]. A variety of agar-agar, or Japanese sea-weed isinglass, used in the arts, and as a food.

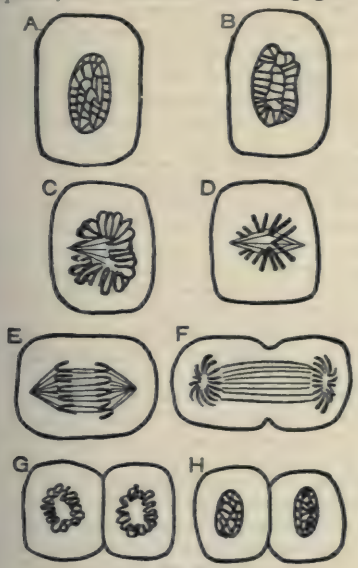
Kaolin (*ka'-o-lin*) [Chin., *kaoling*, "high ridge"]. White clay, China clay. The silicate of aluminum, obtained from the decomposition of felspar. It is sometimes used as a protective application in eczema. **K., Ung.**, 1 in 3, allays irritation if applied to abraded skin. Unof.

Kaposi's Disease. See *Atrophoderma pigmentosum*, and *Xeroderma pigmentosum*; also, *Diseases, Table of.* **K.'s Ointment**, an ointment used in the treatment of scabies. It consists of naphthol, 40 grains; green-soap, 2½ drams; prepared chalk, ½ dram; lard, ½ ounce. It is also called the compound naphthol-ointment.

Kappeler's Method. See *Anesthetic.*

Karabic Acid (*kar'-ab-ic*). See *Acid, Succinic.*

Karakin (*kar'-ak-in*) [N. Zeal., *karaka*]. A white crystalline body, apparently a glucosid, obtained from the nuts of the karaka (*Corynocarpus lævigata*). It is an intensely bitter, crystalline body, soluble in water, alcohol, and alkalies, insoluble in ether and chloroform, and melts at 100° C.



Kardio- (*kar'-de-o-*). See *Cardio-.*

Karlinski, Bacillus of. See *Bacteria, Synonymatic Table of.* **K., Proteus of.** See *Bacteria, Synonymatic Table of.*

Kartulis, Bacillus of. See *Bacteria, Synonymatic Table of.*

Karyogamic (*kar-e-o-gam'-ik*) [*κάρυον*, nucleus; *γάμος*, marriage]. Pertaining to the blending of nuclei, as in reproduction.

Karyokinesis (*kar-e-o-kin-e'-sis*) [*κάρυον*, a nut (nucleus); *κίνησις*, movement, change]. A complicated series of changes accompanying the maturation of the ovum and the extrusion of the polar globule; indirect or nuclear cell-division, characterized by a radiate arrangement of the protoplasm immediately about the "centrosome" and the "sphere of attraction" at one pole, but outside of the nucleus, and following the division of the "sphere of attraction" into two halves of clear protoplasm; also, by changes in the nucleoplasm, the chromatin becoming granular and

KARYOKINESIS.

A. Nuclear reticulum, resting stage. B. Preparing for division. C. Wreath stage. D. Monaster with achromatic spindle. E. Barrel or pithode stage, or metakinesis, *i. e.*, chromatin-fibrils traveling along the achromatic spindle toward the poles. F. Diaster. G. Daughter-wreath stage. H. Daughter-cells passing to resting-stage.

arranged as a transverse band or disc, while the achromatin is transformed into threads (*karyomita*), forming a spindle-shaped structure (*nuclear, spindle, barrel-form, pithos*), stretching between the two astral systems, or suns. The entire arrangement, central disc, spindle, and the two suns, constitutes the so-called amphiaster, or diaster, and, in connection with the production of the polar globules, the archiamphiaster. The groups of the V-shaped chromatin-grains, produced by the division of the central disc, are then translated to the ends of the spindles, and form two polar crowns (*Carnoy's couronne polaire, the wreaths, rosets, spirems*); the spindle-threads break and are drawn toward the polar crowns, and two daughter-nuclei result.

Karyokinetic (*kar-e-o-kin-et'-ik*) [*κάρυον*, nucleus; *κίνησις*, motion]. In biology, applied to the active stages of nuclei.

Karyolysis (*kar-e-ol'-is-is*) [*κάρυον*, nucleus; *λύειν*, to loose]. The segmentation of the nucleus of the cell.

Karyolytic (*kar-e-o-lit'-ik*) [*κάρυον*, nucleus; *λύειν*, to loose]. Relating to karyolysis.

Karyomita (*kar-e-o'-mit-ah*) [*κάρυον*, nucleus; *μίτος*, a thread]. In biology, the achromatin-threads forming the nuclear spindle in a dividing or active nucleus.

Karyomitoic (*kar-e-o-mit-o'-ik*) [*κάρυον*, nucleus; *μίτος*, a thread]. Relating to karyomitosis.

Karyomitoma (*kar-e-o-mit-o'-mah*). See *Cell-body.*

Karyomiton (*kar-e-om'-it-on*). See *Chromatin.*

Karyomitosis (*kar-e-o-mit-o'-sis*) [*κάρυον*, nucleus; *μίτος*, a thread]. The division or splitting of the nuclear mass of chromatin-fibers.

Karyomitotic (*kar-e-o-mit-ot'-ik*) [*κάρυον*, nucleus; *μίτος*, a thread]. Relating to karyomitosis.

Karyoplasm (*kar'-e-o-plazm*) [*κάρυον*, a nut, kernel; *πλάσμα*, anything formed]. In biology, the nuclear substance of a cell. See *Chromatin.*

Karyoplasma (*kar-e-o-plaz'-mah*). Same as *Karyoplasm.*

Karyosoma (*kar-e-o-so'-mah*) [*κάρυον*, nucleus; *σῶμα*, a body, *pl.*, *Karyosomata*]. A nuclear microsoma; a round body resembling a nucleolus, contained in the segmentation-nucleus of the ovum.

Karyostasis (*kar-e-os'-ta-sis*) [*κάρυον*, nucleus; *στάσις*, a stoppage]. The resting-stage of nuclei of cells. It is opposed to karyokinesis.

Karyostatic (*kar-e-o-stat'-ik*) [*κάρυον*, nucleus; *στάσις*, a stoppage]. Pertaining to karyostasis.

Karyostenosis (*kar-e-o-ste-no'-sis*) [*κάρυον*, a nucleus; *στενός*, narrow; *στενόειν*, to make narrow]. The simple division of the nucleus of a cell. This process is called also *akinetic*, or *direct division.*

Kassu (*kas'-oo*) [E. Ind.]. A black astringent substance obtained from areca nuts, and used for the same purpose as true catechu.

Kata- (*kat'-ah-*). For words thus beginning, and not found under K., see *Cata-.*

Katabolergy (*kat-ab-ol'-er-je*). See *Catabolergy.*

Katabolic (*kat-ab-ol'-ik*). See *Catabolic.* **K. Nerves,** thermo-excitory, as distinguished from *anabolic*, or thermo-inhibitory, nerves.

Katabolism (*kat-ab'-o-lizm*). See *Catabolism.*

Katacrotic (*kat-ak-rot'-ik*). Same as *Catadicrotic.*

Katadicrotic (*kat-ah-di-krot'-ik*). See *Catadicrotic.*

Katadicrotism (*kat-ad-ik'-rot-izm*). See *Catadicrotism.*

Katadidymus (*kat-ad-id'-im-us*). See *Catadidymus.*

Katalepsy (*kat'-al-ep-se*). See *Catalepsy.*

Katalysis (*kat-al'-is-is*). See *Catalysis.*

Katantostomus (*kat-an-to-sto'-mus*). See *Catantostomus.*

Katanturaniscus (*kat-an-tūr-an-is'-kus*). See *Catanturaniscus.*

Katanturanus (*kat-an-tūr'-an-us*). See *Catanturanus.*

Kataplasm (*kat'-ap-lazm*). See *Poultice.*

Katastate (*kat'-as-tāt*). See *Catastate.*

Katatonia (*kat-at-o'-ne-ah*). See *Catatonia.*

Katelectrotonic (*kat-el-ek-tro-ton'-ik*). See *Catelectrotonic.* **K. Zone.** See *Zone.*

Katelectrotonus (*kat-el-ek-trot'-o-nus*). See *Catelectrotonus.*

Katharophore (*kath-ar'-o-fōr*) [*καθαρός*, clean; *φορέειν*, to carry]. An instrument for cleansing the urethra.

Katharsis (*kath-ar'-sis*). See *Catharsis.*

Kathetometer (*kath-et-om'-et-er*) [*κατά*, against; *μέτρον*, measure]. An instrument for ascertaining the level of fluids.

Kathion (*kath'-e-on*). See *Cation.*

Kathode (*kath'-ōd*) [*κατά*, down; *ὁδός*, path]. The negative pole of a galvanic battery.

Kathodic (*kath-od'-ik*) [*κατά*, down; *ὁδός*, path]. Pertaining to the kathode or negative pole of a galvanic battery. In biology, turned in the opposite direction to that of the genetic spiral. **K. Closure-contraction,** the muscular contraction occurring when the circuit is closed with the rheophore on a motor point. **K. Opening-contraction,** the muscular contraction that occurs when the circuit is opened.

Katin (*kat'-in*) [Ar., *kat*, *khat*, khat]. An alkaloid found in *Catha edulis*, with properties somewhat like those of caffein.

Kation (*kat'-e-on*). See *Cation* and *Electrolysis.*

Katostomus (*kat-os'-to-mus*). See *Catostomus.*

Katouraniscus (*kat-o-u'-ran-is'-kus*). See *Catouraniscus.*

Katouranus (*kat-o-u'-ran-us*). See *Catouranus.*

Kauri (*kow'-re*). Same as *Cowdie.* **K. Gum.** See *Cowdie-gum.*

Kava, or **Kava-kava** (*kah'-vah*) [Hawaiian]. Ava-kava. The root and also the resin of *Piper methysticum*, a shrub native to South America and the South Sea Islands. It is a diuretic and motor depressant, producing intoxication when taken in large doses. In small and moderate doses it resembles coca in its action in allaying fatigue. Dose of the fluid extract ʒ ss–j. Unof.

Kavain (*kah'-va-in*) [Hawaiian, *kava*]. A neutral substance obtained from the roots of kava-kava.

Kavia, Kaviac, or **Kaviar** (*kav'-e-ah*, *kav'-e-ak*, *kav'-e-ār*). See *Caviar.*

Keasbey and Mattison's Food. A variety of Liebig's food for infants. Its composition is: Water 27.95; fat, none; grape-sugar, 36.75; cane-sugar, 7.58; no starch; soluble carbohydrates 71.50; no albuminoids; ash, 0.93.

Keber's Corpuscles. Oval or lens-shaped bodies present in the ova of fresh-water mussels.

Keel (*kēl*) [AS., *ceól*, a ship]. In biology, a projecting ridge on a surface, as the two anterior petals of a papilionaceous corolla, or the crest of the breast-bone.

Keen's Sign. See *Signs and Symptoms, Table of.*

Keeper (*ke'-per*). See *Armature.*

Keere nugra. Synonym of *Madura Foot.*

Kefir (*ka'-fēr*). See *Kefyr.*

Kefyr (*ka'-fēr*) [Caucasian]. A nutritious substance obtained by a peculiar fermentation of cows' milk produced by certain fungi. **K.-seed,** a substance containing the ferment (*Bacillus caucasicus*) of kefyr. It is used in preparing the genuine kefyr. See *Bacteria, Synonymatic Table of.*

Kehrer's Operation. See *Cesarean Operation,* in *Operations, Table of.*

Keimplasm, Keimplasma (*kīm'-plazm*, *kīm'-plaz-mah*) [Ger., *Keim*, germ, bud; πλάσμα, plasm]. Weissmann's term for the hereditary transmission of a nuclear matter or germ-plasm that he believes to be passed on from generation to generation without alteration. See *Germ-plasm.*

Kelectome (*ke'-lek-tōm*) [κήλη, a tumor; ἐκ, out; τέμνειν, to cut]. A cutting instrument introduced into a tumor, by means of a cannula, in order to obtain a part of the substance for examination.

Kelis (*ke'-lis*) [κηλίς, spot: *pl.*, *Kelides*]. 1. The same as morphea or scleroderma. 2. See *Keloid.*

Kellgrenism (*kel'-gren-izm*) [after J. H. *Kellgren*, 1889]. A system of charlatanry that professes to cure disease by manipulation, which leads to the discharge of a "broach" of gaseous matter passing from the patient through the operator.

Kellin (*kel'-in*). A glucosid from the fruit of *Ammi visnaga.* It is said to affect the respiration and the pulse, and to have a paralyzant effect upon the lower extremities.

Kellner's Ocular, or **Eye-piece.** See *Ocular.*

Keloid (*ke'-loid*) [χηλή, a claw; εἶδος, likeness]. Cheloid; Alibert's Keloid; Kelis. A term applied to an overgrowth of scar-tissue, and also to fibrous outgrowths of the skin of a similar character, apparently spontaneous in origin, though many of them are traceable to comparatively trifling lesions of the skin. This is a rather rare disease, and affects the colored races more than the white. It is commonest in middle age; its favorite sites are the sternum, shoulders, and neck. The lesion is crab-like in appearance, hence its name. **K. of Addison,** forms contractions of the skin and fasciæ, giving a hide-bound look to the part. It arises spontaneously at the sites of cicatrices and other injuries to the skin. See *Diseases, Table of.*

Kelology (*ke-lol'-o-je*) [κήλη, hernia; λόγος, science]. The science of hernias.

Kelotomy (*ke-lot'-o-me*). See *Celotomy* and *Herniotomy.*

Kelp [origin obscure]. 1. Burnt sea-weed, from which iodin is obtained. 2. The *Fucaceæ laminariæ* and other large sea-weeds.

Kelvin (*kel'-vin*) [in honor of Lord *Kelvin*]. A commercial unit of electricity; one thousand watt-hours.

Kemperdick's Apparatus. An apparatus for reducing the temperature in fever. It consists of a rubber bag to be introduced into the rectum having an entrance-tube and an exit-tube, thus permitting a continuous flow of water.

Kempherid (*kem'-fer-id*) [after *Kæmpfer*, a German traveler], $C_{16}H_{12}O_6$. A yellow, crystalline body obtained from the resin of *Kæmpferia galanga.*

Kenogenesis (*ken-o-jen'-es-is*) [κενός, empty; γένεσις, genesis]. Evolution of forms not true to the parental type, but variously adapted or modified. A vitiated individual development in which the phylogenetic evolution is not truly epitomized.

Kenogenetic (*ken-o-jen-et'-ik*) [κενός, empty; γένεσις, generation]. In biology, having a vitiated germ-history.

Kenogeny (*ken-oj'-en-e*). See *Kenogenesis.*

Kenophobia (*ken-o-fo'-be-ah*) [κενός, empty; φόβος, fear]. The morbid fear of open spaces or places. Same as *Agoraphobia.*

Kenosis (*ken-o'-sis*). See *Cenosis.*

Kenospudia (*ken-o-spu'-de-ah*). See *Cenospudia.*

Kentish Ointment. The compound resin-ointment made by adding one dram of turpentine to each ounce of the ordinary resin-ointment. It is a useful stimulating application to severe burns.

Kentrokinesis (*ken-tro-kin-e'-sis*) [κέντρον, center, spur; κίνησις, motion]. The influence of any motor nerve-center; excito-motor action.

Kentucky Coffee-bean. See *Chicot.*

Kephalic (*kef-al'-ik*) [κεφαλή, head]. See *Cephalic.* **K. Acid.** An acid described by Thudichum as existing in brain-tissue.

Kephalin (*kef'-al-in*). See *Cephalin.*

Kephalograph (*kef'-al-o-graf*). See *Cephalograph.*

Kephalometer (*kef-al-om'-et-er*). See *Cephalometer.*

Kephalo-phosphoric Acid (*kef'-al-o-fos-for'-ik*). See *Acid.*

Kephalyl (*kef'-al-il*) [κεφαλή, head; ὕλη, matter, principle]. The radicle of kephalic acid.

Kephyr (*ka'-fēr*). See *Kefyr.*

Keracele (*ker'-as-ēl*) [κέρας, horn; κήλη, tumor]. A horny tumor on the hoof of horses.

Keraphyllocele (*ker-af-il'-o-sēl*) [κέρας, horn; φύλλον, leaf; κήλη, tumor]. A horny growth between the covering of the horse's hoof and the deeper tissues.

Keraphyllous (*ker-af-il'-us*) [κέρας, horn; φύλλον, leaf]. Composed of horny layers.

Kerasene, or **Kerasin** (*ker'-as-ēn* or *ker'-as-in*) [κέρας, horn], $C_{46}H_{91}NO_8$. A nitrogenous substance; one of the cerebrins obtained from brain-substance.

Keratalgia (*ker-at-al'-je-ah*) [κέρας, cornea; ἄλγος, pain]. Pain in the cornea.

Keratectasia (*ker-at-ek-ta'-se-ah*) [κέρας, horn, cornea; ἔκτασις, extension]. The forward protrusion or bulging of the cornea. A bulging forward of the deeper layers

of the cornea, after loss of the superficial lamina. It differs from staphyloma in the absence of perforation, and in the non-involvement of the iris.

Keratectomy (*ker-at-ek'-to-me*) [κέρας, horn, cornea; ἐκτομή, a cutting out]. Surgical excision of a part of the cornea.

Keratiasis (*ker-at-i'-as-is*) [κέρας, horn]. A morbid condition characterized by the growth of horny excrescences.

Keratic (*ker-at'-ik*) [κέρας, horn]. Horny.

Keratin (*ker'-at-in*) [κέρας, horn]. The basis of horny tissues, hair, nails, feathers, etc. It is a mixture of various complex substances. Decomposed, it yields leucin and tyrosin. It is used in pharmacy.

Keratinian (*ker-at-in'-e-an*) [κέρας, horn]. Relating to keratin or to the cornea.

Keratinization (*ker-at-in-iz-a'-shun*) [κέρας, horn]. 1. The development of a horny quality in a tissue. 2. The coating of pills with keratin.

Keratitis (*ker-at-i'-tis*) [κέρας, cornea; ιτις, inflammation]. Inflammation of the cornea. **K., Asthenic.** See *K., Phlyctenular.* **K., Astigmatic,** a form of keratitis said to be due to uncorrected astigmatism. **K. bullosa,** the formation of large or small blebs upon the cornea of an eye, the seat of iridocyclitis, interstitial keratitis, or glaucoma. **K., Circumscribed,** limited to a part of the cornea. **K. contagiosa,** a contagious, suppurative variety occurring in cattle. **K., Cretaceous,** a calcareous infiltration of the corneal epithelium. **K., Deep.** See *K. profunda.* **K., Diffuse.** See *K., Interstitial.* **K., Dotted.** See *K. punctata.* **K., Fascicular,** a form of phlyctenular keratitis in which one of the ulcers, originally formed at the margin of the cornea, creeps across its surface, followed by a leash of distended blood-vessels. **K., Granular,** due to conjunctival granulations; pannus. **K., Herpetic,** characterized by the formation of small vesicles on the cornea, which ulcerate and then heal. Relapses are common. **K., Hypopyon,** an ulcerative form accompanied by the formation of pus in the anterior chamber. **K., Inherited.** See *K., Interstitial.* **K., Interstitial,** a form of keratitis in which the entire cornea is invested with a diffuse haziness, almost completely hiding the iris. The surface of the cornea presents a ground-glass appearance. Later, from ciliary injection, blood-vessels form in the superficial layers of the cornea, and produce a dull-red color, the "*salmon patch*" of Hutchinson. The entire cornea may become cherry-red. The disease is most frequent between the ages of five and fifteen, and occurs in syphilitic individuals. **K. maculosa.** See *K. superficialis punctata.* **K., Marginal,** a form of phlyctenular keratitis in which the phlyctenules are arranged around the margin of the cornea. **K. marginalis,** a rare form of keratitis that must not be confounded with the marginal form of phlyctenular keratitis. It occurs in elderly people, and consists of a yellowish-gray zone of opacity immediately joining the sclera, which pushes into the clear cornea and occupies about one-half the circumference. **K. neuroparalytica,** keratitis following paralysis of the fifth nerve. It does not usually occur in partial paralysis of the nerve. Its cause is loss of trophic influence, aided by mechanical irritation and drying of the cornea. **K. of Reapers,** a traumatic form due to irritation of the corneæ of reapers by beards of grain. **K. pannosa,** a superficial form in which blood-vessels develop beneath and in the epithelium. The latter undergoes hyperplasia and becomes in part opaque. **K., Parenchymatous.** See *K., Interstitial.* **K., Phlegmonous.** See *K. purulenta.* **K., Phlyctenular,** a disease of the eye characterized by the formation upon some portion of the cornea of small papules or pustules, often associated with the formation of a similar lesion upon the conjunctiva. It is marked by much local congestion, lacrymation, and intense photophobia. The papules may develop into ulcers. **K. profunda,** an unusual form of keratitis characterized by the formation of a gray opacity in the center of the cornea, covered by superficial and stippled corneal layers. **K. punctata.** 1. A secondary affection of the cornea in association with affections of the iris, choroid, and vitreous. It is characterized by the formation of opaque dots, generally arranged in a triangular manner upon the posterior elastic lamina of the cornea. It is sometimes designated as *Descemetitis.* 2. Also a term given to an inflammatory affection of the cornea in which isolated white spots appear in Descemet's membrane, surrounded by cloudy areas. It occurs in children before puberty, and is probably syphilitic. **K. purulenta,** accompanied by the formation of pus. **K., Pustular.** See *K., Phlyctenular.* **K., Rheumatic,** occurring in a rheumatic subject. **K., Ribbon-like,** a name applied to the formation of a transverse calcareous film on the cornea, especially in elderly people. It is usually symmetric, and occurs chiefly in men of the gouty diathesis. **K. scrofulosa.** See *K., Interstitial.* **K., Secondary,** due to disease of other parts. **K., Specific.** See *K., Interstitial.* **K., Strumous.** See *K., Phlyctenular,* and *K., Interstitial.* **K. subepithelialis centralis.** See *K. superficialis punctata.* **K. superficialis punctata,** a disease of the cornea associated with severe conjunctivitis and with catarrh of the respiratory tract. In two or three days punctiform or linear spots appear immediately beneath the epithelium, the overlying conjunctiva being slightly hazy. It is also called *K. subepithelialis centralis,* and *K. maculosa.* **K. suppurativa.** See *K. purulenta.* **K., Sympathetic,** that following inflammation of the other eye. **K., Syphilitic.** See *K., Interstitial.* **K. tænulosa.** See *K., Phlyctenular.* **K., Trachomatous.** See *Pannus.* **K., Traumatic,** that consequent upon wounds or other injury of the cornea. **K. ulcerosa,** a form in which one or more ulcers involving part of the cornea are present. **K. variolosa,** that occurring in smallpox. It is purulent and often arises from a corneal pustule. **K., Vascular,** a superficial vascularity of the cornea occurring in pannus, etc. **K., Vesicular.** See *K., Phlyctenular.*

Keratocele (*ker'-at-o-sēl*) [κέρας, cornea; κήλη, tumor]. A hernia of Descemet's membrane through the cornea.

Keratochromatosis (*ker-at-o-kro-mat-o'-sis*) [κέρας, horn; χρῶμα, color]. Discoloration of the cornea.

Kerato-conjunctivitis (*ker'-at-o-kon-junk-tiv-i'-tis*) [κέρας, horn, cornea; *conjunctivus,* connecting; ιτις, inflammation]. Simultaneous inflammation of the cornea and the conjunctiva.

Kerato-conometer (*ker-at-o-ko-nom'-et-er*) [κέρας, cornea; κῶνος, cone; μέτρον, measure]. An instrument for estimating astigmatism by the images reflected from the cornea.

Keratoconus (*ker-at-o-ko'-nus*). See *Keratoglobus.*

Keratode (*ker'-at-ōd*) [κέρας, horn; εἶδος, like]. The horny substance composing the skeleton of certain sponges.

Keratodeocele (*ker-at-od'-e-o-sēl*). See *Keratocele.*

Keratodeonyxis (*ker-at-od-e-o-niks'-is*). See *Keratonyxis.*

Keratoderma (*ker-at-o-der'-mah*) [κέρας, horn; δέρμα, skin]. 1. The cornea. 2. A horny condition of the skin.

Keratodermatitis (*ker-at-o-der-mat-i'-tis*) [κέρας, horn; δέρμα, skin; ιτις, inflammation]. Inflammation of the keratoderma; keratitis.

Keratodermatocele (*ker'-at-o-der-mat'-o-sēl*) [κέρας, horn; δέρμα, skin; κήλη, tumor]. See *Keratocele.*

Keratodermatomalacia (*ker'-at-o-der-mat-o-mal-a'-se-ah*) [κέρας, horn; δέρμα, skin; μαλακία, softness]. Softening of the cornea.

Keratodermatosis (*ker-at-o-der-mat-o'-sis*) [κέρας, horn; δέρμα, skin; νόσος, disease]. A skin-affection characterized by alteration in the horny elements of the skin.

Keratodermia (*ker-at-o-der'-me-ah*) [κερας, horn; δέρμα, skin]. See *Keratoderma.* **K. erythematosa symmetrica,** tylosis of the soles and palms, in which the horny patches show a broken-up surface.

Keratodermites (*ker-at-o-der-mi'-tēz*) [κέρας, horn; δέρμα, skin; ιτις, inflammation]. A group of inflammatory scaly skin-affections.

Keratogenous (*ker-at-oj'-en-us*) [κέρας, horn; γεννᾶν, to beget]. Pertaining to the formation of horny growths. **K. Membrane,** that part of the skin or layer of corium that develops into nails, claws, and hoofs.

Keratoglobus (*ker-at-o-glo'-bus*) [κέρας, cornea; *globus*, a ball]. Distention and protrusion of the cornea. The sclerotic may also become distended in severe cases. When so extensive as to prevent closure of the lids, it has been called buphthalmos. When the distention is transparent, regular, and cone-shaped, the apex of the cone being the center of the cornea, it is called keratoconus, or conical cornea. When the protrusion is opaque, or connected with synechia of the iris, it is called staphyloma of the cornea, or anterior staphyloma. When due to increase in the fluids of the eye, with increased tension and uniform ectasia, it is called hydrophthalmos. Enlargement of the cornea is also called megalo-cornea.

Keratoglossus (*ker'-at-o-glos'-us*) [κέρας, horn; γλῶσσα, tongue]. See *Muscles, Table of.*

Keratohyalin (*ker'-at-o-hi'-al-in*) [κέρας, horn; ὑαλος, glass]. A peculiar substance occurring in granules in the deeper layers of the skin. These granules are insoluble in ether, alcohol, and water, and are present in the process of cornification of the rete cells. See also *Eleidia.*

Keratoid (*ker'-at-oid*) [κέρας, horn; εἶδος, like]. Hornlike.

Kerato-iritis (*ker'-at-o-i-ri'-tis*) [κέρας, cornea; ἶρις, iris; ιτις, inflammation]. Combined inflammation of the cornea and the iris.

Keratoleukoma (*ker-at-o-lu-ko'-mah*) [κέρας, horn; λευκός, white: *pl.*, *Keratoleukomata*]. A leukoma or whitish opacity of the cornea.

Keratolysis (*ker-at-ol'-is-is*) [κέρας, horn; λύσις, solution]. Deciduous skin; a curious and rare condition of the skin in which the latter, like the serpent's, is cast off periodically, that of the limbs coming off like a glove or a stocking.

Keratolytic (*ker-at-o-lit'-ik*) [κέρας, horn; λύσις, solution]. Pertaining to keratolysis.

Keratoma (*ker-at-o'-mah*) [κέρας, horn; ὄμα, tumor: *pl.*, *Keratomata*]. 1. See *Callositas.* 2. Congenital ichthyosis; the presence, dating from fetal life, of horny plates upon the integument.

Keratomalacia (*ker-at-o-mal-a'-se-ah*) [κέρας, cornea; μαλακία, softness]. A softening of the corneal tissue.

Keratome (*ker'-at-ōm*) [κέρας, cornea; τομή, a cutting]. A knife with a peculiar trowel-like blade, used for making the incision into the cornea in the operation of iridectomy.

Keratometer (*ker-at-om'-et-er*) [κέρας, cornea; μέτρον, measure]. An instrument for measuring the curves of the cornea.

Keratomycosis (*ker-at-o-mi-ko'-sis*) [κέρας, cornea; μύκης, fungus]. A fungoid growth of the cornea, or the diseased condition therewith associated. **K. aspergillina,** a form characterized by the presence of *Aspergillus glaucus.*

Keratoncus (*ker-at-ong'-kus*) [κέρας, horn; ὄγκος, a tumor]. Any horny tumor.

Keratonosis (*ker-at-on'-o-sis*). See *Keratosis.*

Keratonyxis (*ker-at-o-niks'-is*) [κέρας, cornea; νύξις, needling]. The needling of a soft cataract by puncture through the cornea; also, the old operation of couching a cataract with the needle.

Keratoplasia (*ker-at-o-pla'-ze-ah*) [κέρας, horn; πλάσσειν, to form]. The reparative renewal of the horny layer of the skin.

Keratoplastic (*ker-at-o-plas'-tik*) [κέρας, horn; πλαστικός, formed]. Pertaining to keratoplasty.

Keratoplasty (*ker'-at-o-plas-te*) [κέρας, cornea; πλάσσειν, to form]. Plastic operation upon the cornea, especially the transplantation of a button or excised portion of cornea from the eye of a lower animal to that of man. This is effected by means of a peculiar trephine, with which the tissue to be transplanted is removed from the animal's eye and the place for its reception is made in the human eye. The operation is sometimes called trephining the cornea.

Keratorrhexis (*ker-at-or-eks'-is*) [κέρας, horn; ῥῆξις, rupture]. Rupture of the cornea, due to ulceration or traumatism.

Keratoscleritis (*ker-at-o-skle-ri'-tis*) [κέρας, cornea; σκληρός, hard; ιτις, inflammation]. Inflammation of the cornea and the sclera.

Keratoscope (*ker'-at-o-skōp*) [κέρας, cornea; σκοπεῖν, to observe]. An instrument for examining the cornea, and testing the symmetry of its meridians of curvature.

Keratoscopy (*ker-at-os'-ko-pe*) [κέρας, cornea; σκοπεῖν, to observe]. Examination of the cornea. See *Retinoscopy.*

Keratose (*ker'-at-ōs*) [κέρας, horn]. Horny.

Keratosis (*ker-at-o'-sis*) [κέρας, horn; νόσος, disease]. Any one of a class of skin-diseases characterized by thickened epidermis, and the presence of such callosities as horns, warts, etc. See *Callosity.* **K. follicularis.** See *Darier's Disease.* **K. obturans,** a condition of the external auditory meatus due to desquamation of the epithelium, the mass being colored by cerumen and containing cholesterin-crystals. **K. pilaris,** Lichen pilaris; Lichen spinulosus; Pityriasis pilaris; a chronic affection of the skin marked by a pin-head-sized conical elevation investing the hair-follicle, and somewhat resembling gooseflesh and ichthyosis. The skin becomes dry and hard, and feels like a nutmeg-grater. The disease appears in workingmen who are uncleanly, and in scrofulous children, and it occurs chiefly on the thighs, arms, and forearms. **K. senilis,** a cornification of the skin of old people, general or partial, circumscribed or diffuse, and often limited to certain definite regions, as the face and dorsal surfaces of the hands and feet. The lesions consist of light or dark yellowish, brownish, or blackish points, dry, scaling, and horny, or scaling and greasy. These may become the seat of an epitheliomatous process.

Keratotome (*ker'-at-o-tōm*). See *Keratome.*

Keratotomy (*ker-at-ot'-o-me*) [κέρας, cornea; τέμνειν, to cut]. Surgical incision of the cornea.

Keraunographic (*ker-aw-no-graf'-ik*) [κεραυνός, lightning; γράφειν, to write]. Pertaining to the pictorial impressions of near objects sometimes seen upon the body of a person who has been struck by lightning.

Keraunoneurosis (*ker-aw-no-nu-ro'-sis*) [κεραυνός, lightning; νεῦρον, nerve; νόσος, disease]. Nervous disease due to lightning-stroke.

Keraunophobia (*ker-aw-no-fo'-be-ah*) [κεραυνός, lightning; φόβος, dread]. Morbid dread of lightning; astrapaphobia.

Kerectasia (*ker-ek-ta'-se-ah*). See *Keratectasia.*

Kerectomy (*ker-ek'-to-me*). See *Keratectomy.*

Kerion, or Kerium (*ke'-re-on* or *ke'-re-um*) [κηρίον, honey-comb favus]. Same as *Favus.*

Kerkring, Valves of. See *Valve.*

Kermes (*ker'-mēz*) [Pers., *qirmiz*, crimson]. A red dye-stuff, made up of the dried females of *Coccus ilicis*, an insect not unlike cochineal, found on oak-trees in the Orient. **K. Mineral,** a mixture of the teroxid and tersulphid of antimony, formerly much used in medicine. It is also called *red antimony.*

Kermesine (*ker'-mēz-in*) [Pers., *qirmiz*, crimson]. Pertaining to kermes.

Kermesite (*ker'-mēz-īt*) [Pers., *qirmiz*, crimson]. The native oxysulphid of antimony.

Kermisin (*ker'-miz-in*) [Pers., *qirmiz*, crimson]. Carmin-red.

Kernel (*ker'-nel*) [ME., *kirnel*, a little corn or grain]. 1. The popular name for the pancreas or sweetbread of animals. 2. The bundle of fat on the fore-shoulder; any swelling or mass of flesh. 3. A nucleus. 4. In the plural, a popular term for enlarged lymphatic glands. 5. In biology, the edible portion of a drupe or an entire seed.

Keroid (*ker'-oid*) [κέρας, horn; εἶδος, like]. Horny.

Kerosene (*ker'-o-sēn*). See *Burning oil.*

Kerosolene (*ker'-o-so-lēn*) [κηρός, wax; *oleum*, oil]. A colorless, volatile liquid distilled from coal-oil. It boils at 58° C. and has been used as a local anesthetic. Unof.

Kessel's Operation. See *Operations, Table of.*

Ketin (*ket'-in*), $C_6H_8N_2$. 1. An oily substance, boiling between 170° and 180° C. 2. A member of a homologous series, $CnH_{2n} - {}_4N_2$, produced by the action of sodium (or tin) and hydrochloric acid on nitrosoacetone and its homologues. **Diethylketin,** $C_{10}H_{16}N_2$, is an oily substance, boiling at from 215° to 217° C.; it is formed by the reduction of nitrosoethylacetone. **Dimethylketin** is a crystalline solid, soluble in ether, fusing at 87° C., and produced by the reduction of nitrosomethylacetone. **Dipropylketin,** $C_{12}H_{20}N_2$, is an oily substance, boiling between 235° and 240° C., and formed in the reduction of nitrosopropylacetone.

Ketols (*ke'-tolz*). In chemistry, ketone-alcohols, containing both the ketone and alcohol groups.

Ketone (*ke'-tōn*) [an arbitrary variation of *acetone*]. In chemistry, an organic compound consisting of the unsaturated radicle =C=O united to two alcohol radicles. It may be considered as a derivative of secondary alcohols, bearing the same relation to them as the aldehyds bear to the primary alcohols. The ketones are compounds in which two hydrogen atoms of an intermediate carbon atom are replaced by one atom of oxygen. They are generally volatile liquids, of ethereal odor, insoluble in water. They are the products of the oxidation of the secondary alcohols, or of the union of carboxyl, CO, with two alkyl atoms.

Ketonic (*ke-ton'-ik*) [*ketone*]. Pertaining to ketone.

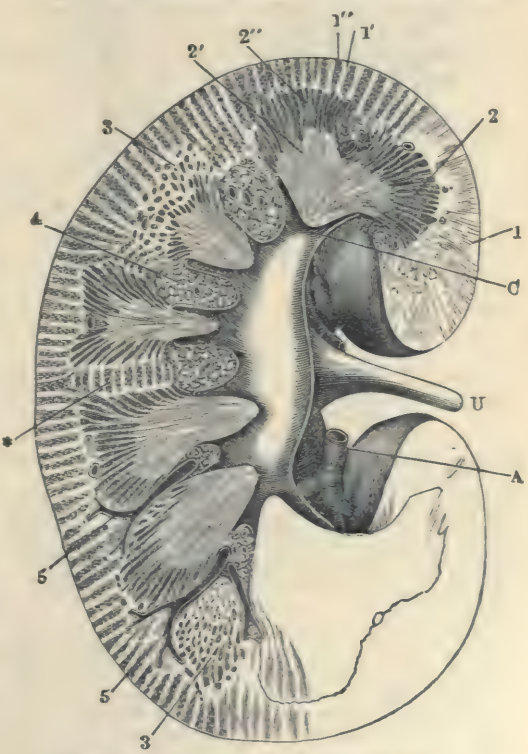
Ketoses (*ke-to'-ses*). In chemistry, a generic name applied to the ketone alcohols, $CO.CH_2.OH$.

Ketoxims (*ke-toks'-ims*). Same as *Acetoxims.*

Kettle (*ket'-l*) [ME., *ketel*, a kettle]. A vessel made of metal, used for heating liquids. **K., Bronchitis.** See *K., Croup.* **K., Croup,** a contrivance for the inhalation of heated moist air, which may be medicated. Shaw's croup-kettle consists of an alcohol-lamp and a vessel fitted with a long tube, by means of which the steam is directed downward when the mouth-piece is introduced far back into the mouth.

Key (*ke*) [ME., *keye*, key]. An instrument for opening or fastening a lock. **K.-forceps, Elliot's;** two instruments are so called, the one having beaks of forceps and the handle of a key, for the extraction of teeth; the other is designed for the extraction of roots of teeth that present but one side above the alveolus. They are now but little used. **K. of Garengeot,** an instrument for the extraction of teeth, composed of a shank with a movable clasp and a cross-bar. The clasp is applied to the inner surface of the tooth, and the extraction is accomplished by turning the handle. **K., Tooth.** See *K. of Garengeot.*

Key and Retzius, Foramina of. Two foramina at the extremities of the lateral recesses of the fourth ventricle behind the upper roots of the glosso-pharyngeal nerves. They connect the cisterna magna with the fourth ventricle.



Kiafer (*ki'-af-er*). See *Kefir.*

Kibbie's Method. See *Treatment, Methods of.*

Kibe (*kib*). See *Chilblain.*

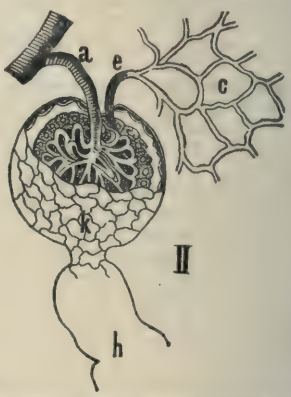
Kidinga pepo (*kid-in'-gah pe'-po*) [African]. A name applied in Zanzibar to a disease resembling dengue.

Kidney (*kid'-ne*) [ME., *kid*, the belly; *nere*, kidney]. One of the two large glandular organs situated in the upper and posterior portion of the abdominal cavity,

LONGITUDINAL SECTION THROUGH THE KIDNEY.
(*Tyson, after Henle.*)

2''. Boundary layer of medulla. 2'. Papillary portion of medulla. 3, 3. Transverse section of tubules in boundary layer. 4. Fat of renal sinus. *. Transversely coursing medullary rays. 5, 5. Artery. 1''. Labyrinth. 1'. Medullary rays. 2. Medulla. 1. Cortex. C. Renal calyx. U. Ureter. A. Branch of renal artery.

and especially concerned in the elimination or excretion of water and nitrogenous matter. It consists



of an outer cortical substance, and an inner medullary substance. In biology, the term is applied to the "contractile vacuole" of a protozoan, the "segmental organ" or "nephridium" of an annelid, the "glandular organ" of a nematode worm, the "Malpighian tubules" and "shell-gland" of an arthropod, and the "organ of Bojanus" of a mollusc. **K., Aching,** a mild subacute nephritis characterized by pain, anemia, albuminuria, and irritability of the bladder, with exacerbations at menstrual periods. **K., Amyloid,** that of amyloid degeneration. **K., Arterio-sclerotic,** the small, sometimes granular organ characterized by arterio-sclerosis. **K., Branny,** applied to the bran-like appearance of the kidney seen in the early stages of chronic parenchymatous nephritis, due to fatty degeneration occurring in spots. **K., Bright's Disease of.** See *Bright's Disease.* **K., Calices of,** six to twelve membranous canals surrounding the papillæ of the kidney, and opening into the three infundibulæ. **K., Cicatricial,** the final result of the so-called "surgical kidney." It is produced by the absorption of the ab-

DIAGRAM SHOWING THE RELATION BORNE BY THE BLOOD-VESSELS TO THE TUBULES OF THE KIDNEY.

The upper half corresponds to the cortical, the lower half to the medullary part of the organ. The plain tubes are shown separately on the right, and the vessels on the left. The darkly shaded arteries send off straight branches to the pyramids and larger interlobular branches to the glomeruli, the efferent vessels of which form the plexus around the convoluted tubes.

scesses and the formation of cicatrices, and by the still further contraction of the increased interstitial tissue. The kidney is small, irregular, and fibrous. **K., Cirrhotic.** Same as *K., Arterio-sclerotic, q. v.* **K., Contracted.** Same as *K., Arterio-sclerotic, q. v.* **K., Embolic Contracted,** one the seat of a scar the result of an infarct. **K., Fatty,** one the seat of extensive fatty degeneration. **K., Floating,** one susceptible of displacement over a considerable extent of the abdomen. This condition is more frequent in females, and in the majority of cases is situated on the right side. It has been suggested that the term "floating kidney" be reserved for those cases in which a distinct mesonephron is present, and that all other cases be designated by the term "movable kidney." **K., Gouty.** Same as *K., Arterio-sclerotic, q. v.* **K., Granular.** Same as *K., Arterio-sclerotic, q. v.* **K., Head,** the pronephron. **K., Hilum of.** See *Hilum.* **K., Hobnail.** Same as *K., Arterio-sclerotic, q. v.* **K., Horseshoe,** a congenital deformity in which the two kidneys are joined together, generally at the lower, but occasionally at the upper end, by a connecting band, composed either of true renal substance or of firm fibrous tissue. **K., Lardaceous.** Same as *K., Amyloid, q. v.* **K., Large Mottled,** that of parenchymatous nephritis, mottled with gray patches. **K., Large Red,** the kidney of Bright's Disease extravasated with blood. **K., Large White,** one affected with lardaceous degeneration; also, that of the advanced stage of chronic parenchymatous nephritis. **K., Microcystic,** one containing many small cysts. **K., Movable.** See *K., Floating.* **K. of Pregnancy,** is described as an anemic kidney with fatty infiltration of the epithelial cells, but without any acute or chronic inflammation, occurring in pregnant women. It is possibly due to a diminution of the blood-supply from tonic contraction of the renal arteries, produced by the presence of effete matter in the blood. Albumin is found in the urine. **K., Palpable.** See *K., Floating.* **K., Pelvis of,** the funnel-shaped expansion or dilated portion of the ureter formed by the junction of the infundibula. **K., Pigback,** a name proposed for the large congested kidney found in alcoholics. **K.-plant,** the *Baccharis pilularis.* **K., Primordial,** the meso-

BOWMAN'S CAPSULE AND GLOMERULUS.

a. Vas afferens. *e* Vas efferens. *c* Capillary network of the cortex. *k.* Endothelium of the capsule. *h.* Origin of a convoluted tubule. (*Landois.*)

nephron. **K., Red Contracted.** Same as *K., Arterio-sclerotic, q. v.* **K.-root,** the root and lower part of the stem of *Baccharis pilularis;* used in cystitis. Unof. **K., Scrofulous,** one affected with tuberculous disease, in which the kidney-substance is largely destroyed, nothing being left but a sac with thickened fibrous walls, filled with a yellow creamy or putty-like material containing fatty masses, cholesterin, tuberculous débris, and occasionally calcareous matter. **K., Sigmoid,** a congenital anomaly intermediate between the horseshoe form and complete fusion. **K., Small Red Granular.** Same as *K., Arterio-sclerotic, q. v.* **K., Small White,** the final stage of the large white kidney after loss of its substance from atrophy or degeneration. **K., Spotted.** Same as *K., Large Mottled.* **K., Surgical,** a name sometimes given to pyelonephritis, or distention of the kidney attended with inflammation, abscesses of the cortex, and retention of urine mixed with fetid pus. **K., Syphilitic,** one presenting either gummata or resulting scars.

K., Unsymmetric, a term given by Rokitansky to a kidney that is normal in position and conformation, though occasionally rather enlarged, its fellow being deficient. **K., Wandering.** See *K., Floating.* **K., Waxy.** Same as *K., Amyloid.* **K.-worm.** See *Thread-worms* and *Parasites* (*Animal*), *Table of.*

Kiestine (*ki-es'-tin*). See *Gravidin.* **K. Test.** See *Gravidin Test.*

Kif [African]. An Algerian mixture, the principal ingredient of which is *Cannabis indica.* Also, the dreamy state induced by the use of hashish.

Kilian's Line. See *Lines, Table of.* **K.'s Pelvis,** a halisteretic pelvis; a pelvis the seat of osteomalacia.

Killosis (*kil-o'-sis*). Synonym of *Strabismus.*

Kilogram (*kil'-o-gram*) [χίλιοι, one thousand; γράμμα, a gram]. One thousand grams, or 2.2 pounds avoirdupois.

Kilogrammeter (*kil'-o-gram-et'-er*) [χίλιοι, one thousand; γράμμα, gram; μέτρον, a measure]. A term denoting the energy required to raise one kilogram one meter in height; equivalent to 7.233 foot-pounds.

Kiloliter (*kil'-o-le-ter*) [χίλιοι, thousand; λίτρα, a liter]. One thousand liters, or 35.31 cubic feet.

Kilometer (*kil'-o-me-ter*) [χίλιοι, thousand; μέτρον, measure]. One thousand meters, or 1093.6 yards.

Kilostere (*kil'-o-stēr*) [χίλιοι, thousand; στερεός, solid]. One thousand cubic meters.

Kilowatt (*kil'-o-wot*) [χίλιοι, thousand; *watt*]. One thousand watts of electricity; same as the *kelvin.*

Kin [ME., *kin*, kin]. Race; family; breed; kind; relationship.

Kina, or **Kino-kina** (*ki'-nah* or *ki'-no-ki'-nah*). Cinchona bark, *q. v.*

Kinæsthesia (*kin-es-the'-ze-ah*). See *Kinesthesia.*

Kincough, or **Kinkcough** (*kin'-kof* or *king'-kof*). Synonym of *Whooping-cough.*

Kinematic (*kin-em-at'-ik*) [κίνημα, a motion]. Pertaining to *Kinematics.*

Kinematics (*kin-em-at'-iks*) [κίνημα, a motion]. The science of motion without reference to its origin or effects.

Kinepock (*kin'-pok*). Synonym of *Vaccinia, q. v.*

Kinesalgia (*kin-es-al'-je-ah*) [κίνησις, movement; ἄλγος, pain]. Local pain following upon muscular contraction.

Kinesia (*kin-e'-ze-ah*) [κίνησις, movement]. Movement-cure; systematic use of motion for therapeutic or hygienic purposes.

Kinesiatric (*kin-es-e-at'-rik*) [κίνησις, movement; ἰατρικός, therapeutic]. Relating to kinesitherapy.

Kinesiatrics (*kin-es-e-at'-riks*). Same as *Kinesitherapy.*

Kinesic (*kin-es'-ik*). See *Kinetic.*

Kinesiesthesiometer (*kin-ez-e-es-the-ze-om'-et-er*) [κίνησις, movement; αἴσθησις, perception; μέτρον, measure]. An instrument devised by Hitzig for testing the muscular-sense. It consists of seventeen wooden balls of the same diameter, but of different weights.

Kinesiology (*kin-es-e-ol'-o-je*) [κίνησις, motion; λόγος, discourse]. The science of movements, considered especially as therapeutic or hygienic agencies.

Kinesiometer (*kin-es-e-om'-et-er*) [κίνησις, motion; μέτρον, measure]. An instrument for determining quantitatively the motion of a part.

Kinesioneurosis (*kin-es-e-o-nu-ro'-sis*) [κίνησις, movement; νεῦρον, a nerve; νόσος, disease]. Functional abnormalism of the motor centers or nerves.

Kinesionosos (*kin-es-e-on'-o-sos*) [κίνησις, movement; νόσος, disease]. Any disease marked by impairment of the power of motion.

Kinesiotherapy (*kin-es-e-o-ther'-ap-e*) [κίνησις, movement; θεραπεία, therapy]. The treatment of disease by systematic active or passive movements.

Kinesipathic (*kin-es-ip-ath'-ik*) [κίνησις, motion; πάθος, disease]. Pertaining to kinesipathy.

Kinesipathist (*kin-es-ip'-ath-ist*) [κίνησις, motion; πάθος, disease]. One who practises the gymnastic treatment of disease.

Kinesipathy (*kin-es-ip'-ath-e*) [κίνησις, motion; πάθος, disease]. 1. Kinesionosos. 2. (Incorrectly) kinesitherapy.

Kinesis (*kin-e'-sis*) [κίνησις, motion]. The general term for all the physical forms of energy, as opposed to *Metakinesis,* a term intended to express the psychologic exhibition of coördinates or correlates of kinesis. According to a monistic conception of the universe, both are the double aspects of one underlying reality.

Kinesitherapy (*kin-es-e-ther'-ap-e*) [κίνησις, motion; θεραπεία, care, cure]. See *Swedish Movements.*

Kinesodic (*kin-es-od'-ik*) [κίνησις, motion; ὁδός, way]. Pertaining to those nerve-fibers conveying motor influences. Also, the motor tracts of the nerve-system.

Kinesotherapy (*kin-es-o-ther'-ap-e*). Same as *Kinesitherapy.*

Kinesthesia *kin-es-the'-ze-ah*). Same as *Kinesthesis.*

Kinesthesis (*kin-es-the'-sis*) [κινέειν, to move; αἴσθησις, sensation]. That quality of sensations whereby one is aware of one's positions and movements, especially those of the automatic type; it is distinct from the muscular sense.

Kinesthetic (*kin-es-thet'-ik*) [κινέειν, to move; αἴσθησις, sensation.] Relating to kinesthesia.

Kinetia (*kin-e'-she-ah*) [κίνησις, motion]. A term applied to all forms of motion-sickness. It includes such disorders as sea-sickness and car-sickness.

Kinetic (*kin-et'-ik*) [κινητικός, producing motion]. That which produces motion. Pertaining to those forces that produce motion.

Kinetics (*kin-et'-iks*) [κινητικός, producing motion]. The science of force as developing motion.

Kinetogenesis (*kin-et-o-jen'-es-is*) [κινεῖν, to move; γένεσις, origin]. In biology, the origin of animal structures, either directly or indirectly through movements.

Kinetogenetic (*kin-et-o-jen-et'-ik*) [κίνησις, motion; γένεσις, genesis]. Of the nature of or pertaining to kinetogenesis.

Kinetogenetically (*kin-et-o-jen-et'-ik-al-e*) [κινεῖν, to move; γένεσις, production]. In biology, originating through movement.

Kinetogeny (*kin-et-oj'-en-e*) [κινητός, verbal adj. of κινεῖν, to move; γενής, producing]. In biology, applied to the agency of that energy developed in the motions of organisms and their parts, in the modification of the forms and proportions of their hard parts.

King's Blue. Same as *Smalts.* **K.'s Evil,** a name formerly popularly applied to scrofula, on account of a belief that it could be cured by the touch of the king. **K.'s Yellow.** See *Orpiment,* and *Pigments, Conspectus of.*

Kinic Acid (*kin'-ik*). See *Acid, Quinic.*

Kink (*kingk*) [D., *kinken*, cough]. 1. The whoop in whooping-cough. 2. A synonym of whooping-cough. 3. A flexion or a twist. **K.-cough,** a synonym of whooping-cough. **K.-host,** a synonym of whooping-cough. See *Pertussis.*

Kino (*ki'-no*) [E. Ind.]. The inspissated juice of *Pterocarpus marsupium,* found in India, and similar in action to tannic acid; it is used mainly as a constituent of gargles and diarrhea-mixtures. **K., Tinct.,** 10 per cent. of the drug. Dose ♏x–ʒij. **K., Pulv., Comp.** (B.P.), kino 15, opium 1, cinnamon 4. Dose gr. v–xx. Various similar substances are called by this name. **K., Jamaica,** is produced by the tree *Coccoloba unifera.* See *Coccoloba.* **K., Australian,** is

obtained from various species of *Eucalyptus*. **K., Butea,** from *Butea frondosa*. **K.-red.** See *Kinoic Acid*.

K.-tannic Acid, a variety of tannic acid found in kino.

Kinoic Acid (*kin-o'-ik*), [E. Ind., *kino*], $C_{28}H_{22}O_{11}$. A red, amorphous substance, a derivative of kinoïn.

Kinoïn (*ki-no'-in*) [E. Ind., *kino*], $C_{14}H_{12}O_6$. A material derived from *kino*, slightly soluble in water and in alcohol.

Kinometer (*kin-om'-et-er*) [κινέειν, to put in motion; μέτρον, measure]. An instrument to measure the amount of displacement of the uterus in case of tumor or cellular inflammation of the pelvis.

Kinone (*kin'-ōn*). See *Quinone*.

Kinovin (*kin'-o-vin*). See *Quinovin*.

Kionitis (*ki-on-i'-tis*). Same as *Staphylitis*.

Kionorrhaphy (*ki-on-or'-af-e*). Same as *Staphylorrhaphy*.

Kiotome (*ki'-o-tōm*) [κίων, the uvula; τομός, cutting]. An instrument for amputating the uvula, or for dividing strictures of the bladder or rectum.

Kipp's Apparatus. An apparatus for generating sulphuretted hydrogen by acting upon sulphid of iron with H_2SO_4.

Kips (*kips*). See *Hides*.

Kirchhoff's Laws. See *Law*. **K.'s Lines.** See *Lines, Table of*.

Kirchner's Experiment. See *Experimentum mirabile*. **K., Micrococcus of.** See *Bacteria, Synonymatic Table of*.

Kirkland's Cerate. A cerate composed of lead-plaster, 16 parts; olive-oil, chalk, and vinegar, each 8 parts; Goulard's extract, 1 part. It is used in the same conditions as is Goulard's cerate.

Kirschley Green. Same as *Schweinfurth Green*.

Kirschwasser (*kirsh'-vos-er*) [Ger.]. A spiritous liquor obtained in Germany and Switzerland by the distillation of cherries. It is colorless, of agreeable odor and flavor, which improves by keeping, and is equal in strength to the strongest spirit; it is called, also, *Spiritus cerasorum*.

Kisch's Method. See *Treatment, Methods of*.

Kissing Muscle. See *Muscles, Table of*.

Kissingen Salts (*kis'-ing-en*) [Ger.]. Effervescing salts from the mineral springs of Kissingen. **K. Water,** a laxative tonic mineral-water of Bavaria.

Kistotome (*kis'-to-tōm*). See *Cystotome*.

Kite-tail Plug. A tampon used in controlling uterine hemorrhage. It is made by tying rolls of cotton to a string at intervals, the whole resembling a kite-tail.

Kitsune-tsuki (*kit'-sūn-tsu'-ki*) [Jap.]. A Japanese form of zoanthropy, or neuropathic delirium, in which the patient (usually a woman or child) believes herself inhabited by a living fox, cat, or badger.

Kiwisch's Method. A method of inducing premature labor by injections of hot water into the vagina.

Kjeldahl's Method. See *Nitrogen*.

Klærophthalmus (*klār-off-thal'-mus*). See *Embryotoxon*.

Klang [Ger.]. See *Timbre*.

Klaprothium (*klap-ro'-the-um*). Same as *Cadmium, q. v.*

Klastoplast (*klas'-to-plast*) [κλαστός, broken; πλάσσειν, to form]. A cell formed by the partial segmentation of the ovum of *Cephalopoda*.

Klatsch-preparation (*klotch-prep-ar-a'-shun*) [Ger., *Klatschpräparat*]. A cover-glass preparation made by pressing the cover-glass lightly on a bacterial colony in plate-culture.

Kleidarthrocace (*klīd-ar-throk'-as-e*) [κλείς, clavicle; ἄρθρον, joint; κάκη, evil]. Spontaneous luxation of the clavicle.

Klein's Fluid. See *Stains, Table of*.

Kleinenberg's Fibers. The primary form of nerve, of solely internuncial function. **K.'s Hematoxylin Solutions.** See *Stains, Table of*.

Kleinhovia (*klīn-ho'-ve-ah*) [after *Kleinhof*, director of the Botanic Gardens at Batavia, Java]. A genus of sterculiaceous trees. **K. hospita,** a plant belonging to the Helictereæ, found in the islands of the Indian Ocean. The leaves have been used to darken the cornea; their juice causes itching. Unof.

Kleistian Jar (*klīs'-te-an*). Same as *Leyden Jar*.

Klemperer's Method. A method of ascertaining the condition of gastric peristalsis. It consists in the introduction, by the tube, into the empty stomach of 100 grams of olive-oil, and removing by aspirating with water what remains after two hours. As oil is not absorbed from the stomach, the difference between the amount introduced and that withdrawn indicates the activity of gastric peristalsis. The oil is taken up from the water with ether, and the ethereal solution placed in a bulb, the weight of which is known. The weight of the oil is calculated after evaporation of the ether.

Kleptomania (*klep-to-ma'-ne-ah*) [κλέπτειν, to steal; μανία, madness]. A form of emotional insanity manifested by a morbid desire to commit theft. It is sometimes accompanied by impaired intellect, and is often hereditary.

Kleptophobia (*klep-to-fo'-be-ah*) [κλέπτειν, to steal; φόβος, fear]. A morbid dread of thieves.

Klopemania (*klop-e-ma'-ne-ah*) [κλοπή, theft; μανία, madness]. Same as *Kleptomania*.

Klopsophobia (*klop-so-fo'-be-ah*) [κλώψ, thief; φόβος, fear]. Insane dread of thieves. Same as *Kleptophobia*.

Klumene (*klu'-mēn*). Same as *Acetylene*.

Knapp's Reagent. A reagent for the detection of sugar in the urine. It consists of cyanid of mercury and an alkali.

Knapweed (*nap'-wēd*). See *Centaurea*.

Kneading (*ne'-ding*) [ME., *kneden*, to knead]. The same as *Pétrissage, q. v.* See also *Malaxation*.

Knee (*ne*) [ME., *kne*, knee]. The articulation between the femur and the tibia. See also *Genu*. **K.-aching Disorder.** Synonym of *Dengue*. **K.-cap,** the patella. **K.-chest Position.** See *Postures, Table of*. **K. of Corpus Callosum,** the anterior extremity of the corpus callosum. See *Genu*. **K.-elbow Position.** See *Postures, Table of*. **K. of Facial Nerve,** the point at which the nucleus of its origin winds around that of the abducens nerve. **K., Housemaid's.** See *Abscess, Bursal*. **K., Hysteric,** a painful functional affection of the knee-joint in hysteria. **K., In.** See *Genu valgum*. **K. of Internal Capsule,** the angle of junction of the anterior and posterior limbs of the internal capsule. **K.-jerk, Patellar Tendon-reflex, K.-reflex,** or **K.-phenomenon,** a retraction of the quadriceps extensor femoris muscle as a result of a light blow on the patellar tendon. See also *Reflexes, Table of*. **K.-joint,** a hinge-joint consisting of the articulation of the condyles of the femur with the upper extremity of the tibia and the posterior surface of the patella. **K.-joint Disease.** See *White Swelling*. **K., Knock.** See *Genu*. **K., Lawn-tennis,** an affection occurring in tennis-players, probably due to a contusion or laceration of the internal semilunar cartilage. **K., Out.** See *Genu varum*. **K.-pan,** the patella.

Kneel (*nēl*) [ME., *knelen*, to kneel]. To rest upon the knees.

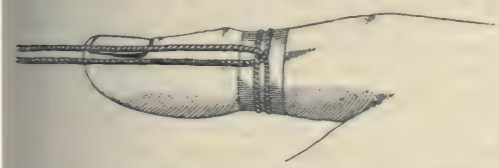
Kneeling (*nēl'-ing*) [ME., *knelen*, to kneel]. Resting upon the knees. **K.-squatting Position.** See *Postures, Table of*.

Knies and Weber's Theory. A theory as to the origin of glaucoma. It claims that glaucoma is due to

retention of an excess of fluid in the eye, from closure of the canal leading through the pectinate ligament into Schlemm's canal.

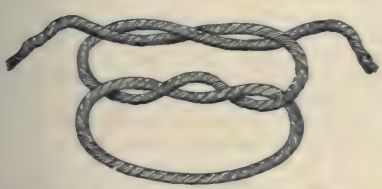
Knife (*nif*) [ME., *knif*, knife]. An instrument for cutting. In surgery, knives are of various shapes and sizes, according to their use. **K.-needle,** a needle with a cutting edge, used in the discission of cataracts.

Knitter's Cramp (*nit'-ers kramp*). See *Cramp.*



Knitting (*nit'-ing*) [ME., *knitten*, to knit]. The union and becoming rigid of a fracture.

Knob (*nob*) [ME., *knobbe*, a knob]. A protuberance. **K.-root.** See *Collinsonia canadensis.*



Knock-knee (*nok'-ne*). See *Genu valgum.*

Knoppern (*knop'-ern*) [Ger.]. Galls from immature acorns of several species of oak, largely used in Austria for tanning. They contain from twenty-eight to thirty-five per cent. of tannin.

Knot (*not*) [ME., *knotte*, a knot]. An interlacement of ends or parts of one or more cords or threads so that they cannot be readily separated. **K., Clove-hitch,** a knot consisting of two single, contiguous loops, the

Clove-hitch Knot.

Combined Surgeon's and Reef Knot.

Granny Knot.

Reef, or Sailor's Knot.

free ends toward each other. It is used for making extension in the reduction of dislocations. **K., Double.** Same as *K., Friction.* **K., False.** Same as *K., Granny.* **K., Friction,** one in which the ends are wound twice around each other before they are tied. **K., Gerdy's Extension,** resembles the clove-hitch; it is employed in making extension of the leg at the ankle. **K., Granny,** a tie of a cord in which in the second loop the end of one cord is over, and the other under its fellow, so that the two loops do not lie in the same line. This knot may easily be converted into a slip-knot. **K.-grass:** 1. Arrhenatherum odoratum; 2. Avena elatior; 3. Hippuris vulgaris; 4. Illecebrum; 5. Polygonum; 6. Triticum repens. **K., Hensen's,** a fixed point in the mammalian blastodermic vesicle at which the formation of the primitive axis and notochordal canal begins. It marks the anterior extremity of the primitive streak. **K., Reef,** a knot so formed that the ends come out alongside of the standing parts and the knot does not jam. It is also called *Square Knot.* **K., Sailor's.** Same as *K., Reef.* **K., Square.** Same as *K., Reef.* **K., Staffordshire,** a knot used in ligating the pedicle in ovariotomy. The ligature is passed through the pedicle, and withdrawn so as to leave a loop, which is passed over the tumor, and one of the free ends is then drawn through the loop; both ends are then passed through the pedicle, tightened, and tied. It is also called *Tait's Knot.* **K., Stay,** a term applied by Ballance and Edmunds, to a knot formed by two or more ligatures in the following way: On each ligature separately is made the first hitch of a reef-knot, which is tightened so that the loop lies in contact with the vessel, without constricting it; then taking the two ends on one side together in one hand, and the two ends on the other side in the other hand, the vessel is constricted sufficiently to occlude it, after which the reef-knot is completed. The simplest method of completing the knot is to treat the two ends in each hand as a single thread, and to tie them as if

Staffordshire Knot.

Surgeon's Knot.

completing a single reef-knot. **K., Surgical,** a double knot made by passing the thread twice through the same loop. **K., Tait's.** See *K., Staffordshire.* **K.-weed,** Centaurea nigra. See also *Collinsonia canadensis.*

Knuckle (*nuk'-l*) [ME., *knokel*, a knuckle or joint]. Any one of the joints of the phalanges with the metacarpal bones or with each other; also a loop of intestine.

Knuckling (*nuk'-ling*) [ME., *knokel*, a knuckle or joint]. In farriery, a partial dislocation of the fetlock-joint, in which the relative position of the pastern-bone to the cannon and coronet bone is changed, the pastern becoming more nearly perpendicular, with the lower end of the cannon-bone resting behind the center line of the suffraginis, while the lower end of this bone rests behind the center line of the coronet. It is also called *Cocked Ankles.*

Kobelt's Tubes. Blind tubes of the parovarium.

Koch's Apparatus. An apparatus for air-analysis. **K., Bacillus of.** See *Bacteria, Synonymatic Table of.*

K., Comma-bacillus of. See *Bacteria, Synonymatic Table of.* **K.'s Dampfapparat.** See *K.'s Steam Apparatus.* **K.'s Eruption,** an eruption simulating that of measles or, more rarely, that of scarlet fever, and which occurs at times after the injection of tuberculin. **K.'s Lymph.** See *Tuberculin.* **K.'s Method,** or **Koch-Ehrlich Method,** for isolated staining of bacteria. See *Stains, Table of.* **K.'s Method of Sterilization,** a method of interrupted heating. The culture-media are heated for a short time daily for from three to five successive days. By means of a graduated water-bath temperatures suitable to the various media are maintained. The method is eminently sure, and has not the injurious effects on the media that follow one prolonged heating. **K.'s Plates,** the casting and solidifying of liquefied inoculated culture-media in plates for the purpose of isolating colonies of micro-organisms. **K.'s Rules** rules formulated by Koch which must be complied with before a given micro-organism can be accepted as the cause of an infectious disease. 1. The microörganism must be present in every case of the disease, and not in cases of other diseases. 2. It must be isolated and grown on artificial media. 3. Its cultures when injected into an animal body must produce the disease in question. 4. The microörganism must again be found in the body in which the disease was thus produced. **K.'s Specific.** See *Tuberculin.* **K.'s Steam Apparatus,** an apparatus for sterilization by steam. **K.'s Treatment.** See *Treatment, Methods of.*

Kochin. Synonym of *Tuberculin, q. v.*

Kœberle's Nœud. A *serre-nœud* used in the performance of abdominal hysterectomy.

König's Cylinders. An apparatus for testing the perception of high tones by the ear. **K.'s Manometric Flames,** toothed or zigzag flame-pictures seen in a revolving mirror, and produced by the vibrations of the voice against a thin membrane that separates the gas-chamber supplying a small burner from the air-chamber into which one speaks. The form of the flame-picture is characteristic for each vowel, and varies with the pitch. **K.'s Rods,** steel rods for producing notes of very high pitch. Same as *K.'s Cylinders.*

Kofacker-Sadler's Law. See *Law.*

Kohlrausch's Fold. See *Third Sphincter.*

Koino-miasm (*koi'-no-mi'-azm*) [κοινός, common; μίασμα, miasm]. A miasm emanating from the soil.

Kola-nut (*ko'-lah*) [African]. The seed of *Cola acuminata*, used in parts of Central Africa as a substitute for tea and coffee. It contains an alkaloid similar to caffein, and is a cerebral stimulant and cardiac tonic. Dose of a twenty per cent. tincture, ʒj; of the fluid extract, gtt. xx–xxx. Unof.

Kolla (*kol'-ah*) [native name]. An Abyssinian disease resembling malaria.

Kollerism (*kol'-er-izm*). See *Cocainization.*

Kölliker's Columns. See *Muscle-columns.* **K., Glands of.** See *Gland.* **K., Lamina or Membrane of.** See *Membrane, Reticular.*

Kollonema (*kol-on-e'-mah*) [κόλλα, glue; νῆμα, tissue]. Same as *Myxoma, q. v.*

Kolossow's Fixing-solution. See *Stains, Table of.*

Kolotyphus (*ko-lo-ti'-fus*) [κῶλον, colon; τῦφος, stupor]. Typhoid fever.

Kolpo- (*kol'-po-*). See *Colpo-.*

Kolpocystotomy (*kol-po-sis-tot'-o-me*). See *Colpocystotomy.*

Kolpodesmorrhaphy (*kol-po-dez-mor'-a-fe*) [κόλπος, vagina; δεσμός, bond; ῥαφή, seam]. Same as *Colporrhaphy, q. v.*

Kolpokleisis (*kol-po-klis'-is*). See *Colpokleisis.*

Kombé (*kom'-bah*) [African]. An African arrow-poison (kombé inée) extracted from *Strophanthus kombé.*

Komeceras, Komoceras (*ko-mes'-er-as, ko-mos'-er-as*) [κομή, the hair; κέρας, horn]. In biology, applied to such a horn as that of the American prong-horn, formed of matted hair.

Kommabacillus (*kom-ah-bas-il'-us*). See *Bacteria, Synonymatic Table of.*

Koniantron (*ko-ne-an'-tron*) [κόνις, dust; ἀντρον, *antrum*]. An instrument for spraying fluid into the tympanic cavity.

Koosso, or Koosoo (*koo'-soo*). See *Brayera.*

Kopf-tetanus (*kōpf'-tet-an-us*) [Ger.]. Cephalic tetanus, due to wounds of the head, chiefly in the region of the fifth nerve. Initial trismus is associated with paralysis of the face on the side of the injury. In some cases there is also pharyngeal spasm, so that the name **Hydrophobic Tetanus** has also been given to this form of tetanus.

Kopiopia (*kop-e-o'-pe-ah*). See *Copiopia.*

Kopp's Asthma. See *Asthma.*

Koprikin (*kop'-rik-in*) [κόπρος, dung]. A term applied by Hünefeld to undigested animal matter in the feces.

Kore- (*kor'-e-*). See *Core-.*

Koronion (*ko-ro'-ne-on*). See *Craniometric Points.*

Koroscopy (*ko-ros'-ko-pe*). See *Retinoscopy.*

Kosin (*ko'-sin*) [Abyssinian, *cusso*], $C_{31}H_{38}O_{10}$. Same as *Koussin.* See *Brayera.*

Koso (*ko'-so*). Same as *Brayera, q. v.*

Kossein (*kos'-e-in*) [Abyssinian, *cusso*]. A crystalline body contained in koosso. It is soluble in ether, in alcohol, and in acids. It is slightly styptic.

Koubasoff, Bacillus of. See *Bacteria, Synonymatic Table of.*

Koumiss (*koo'-mis*) [Tartar, *kumiz*, fermented mare's milk]. An alcoholic drink made by the fermentation of milk. As made by the fermentation of mare's milk, it has long been a favorite beverage with the Tartars and other Asiatic tribes. Cow's milk has been used chiefly in making it, both in Europe and America. Mare's milk is the more suitable for fermentation because of the larger percentage of milk-sugar that it contains. The composition of the koumiss as prepared from both mare's milk and cow's milk is shown in the accompanying analyses from various sources:—

ANALYSIS OF KOUMISS.

	Water.	Milk-sugar.	Lactic Acid.	Albuminoids.	Fat.	Alcohol.	Carbon Dioxid.	Ash.
Koumiss from mare's milk (Fleischmann), .	91.53	1.25	1.01	1.91	1.27	1.85	0.88	0.29
Koumiss from cow's milk (Fleischmann), .	88.93	3.11	0.79	2.03	0.85	2.65	1.03	0.44
Koumiss from mare's milk (König), ...	92.47	1.24	0.91	1.97	1.26	1.84	0.05	
Koumiss from mare's milk (London, 1884), .	91.87	0.79	1.04	1.91	1.19	2.86		
Koumiss from cow's milk (Wiley), ...	89.32	4.38	0.47	2.56	2.08	0.76	0.83	

K.-cure, a method of treating pulmonary tuberculosis. Large quantities of koumiss can be easily digested, and its use is frequently attended by a gain in weight.

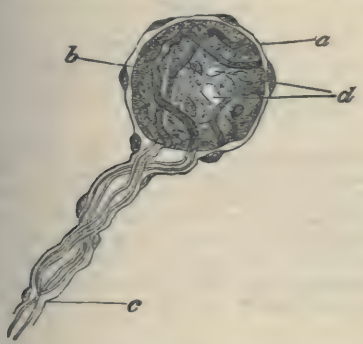
The patients rise early and take a glass of koumiss every half hour, except during the two hours preceding dinner and supper. Meat and fats form the chief part of the ordinary food; sweets, fruit and salads are avoided, as well as ices, coffee, and spirits. If the koumiss causes diarrhea, lime-water is used to arrest this. At first a few glasses only are taken daily to gradually accustom the patient to the cure.

Koussin (*koos'-in*). See *Brayera.*

Kousso (*koos'-o*). See *Brayera.*

Kowalevsky, Canal of. See *Canal.*

Krameria (*kra-me'-re-ah*) [after J. G. H. *Kramer*, an Austrian physician]. A genus of polypelatous herbs. Rhatany, the root of *K. triandra* and *K. tomentosa*, shrubs native to South America, possesses the same astringent qualities as tannic acid. It is a popular remedy for fissure of the anus, spongy gums, etc. **K., Ext.,** in water. Dose gr. v–x. **K., Ext., Fld.** Dose ♏v–℥ss. **K., Infus.** (B. P.) Dose ℥j–ij. **K., Syr.,** contains of the fluid extract 45, syrup 55. Dose ℥ss–℈ss. **K., Trochisci,** contain each gr. j of the extract. **K., Tinct.,** 20 per cent. Dose ♏v–℥j.



Krameric Acid (*kra-me'-rik*)[after J. G. H. *Kramer*, an Austrian physician]. An acid contained in *Krameria.*

Krampton's Muscle. The muscle of the so-called ciliary ligament in the avian eye.

Krarkoff's Method. A method of extracting soluble animal ferments; it consists in precipitating these and the albuminoids by means of ammonium sulphate; subsequent treatment with acids renders the albuminoids insoluble, and the ferments are readily extracted with water.

Kraurosis (*kraw-ro'-sis*) [κραῦρος, dry]. Shriveling and dryness of a part, especially of the vulva.

Krause's Corpuscles. Terminal nerve-corpuscles described by W. Krause (1860) as existing in the conjunctiva, the genitals, and other parts of the human body, and differing from the Pacinian corpuscles only

KRAUSE'S END-BULB.

a. Nucleated capsule. *b.* Core. *c.* Fiber entering and branching, terminating in core at *d.*

in the absence of a thick laminated investment. **K.'s Embryo,** an embryo of the fourth week, in which there is an absence of the allantoic stalk, the allantois hanging from the posterior extremity of the embryo. **K.'s End-bulbs,** terminal bodies of sensory nerves in the skin and membranes of all mammals. They are elongated, oval, or round bodies, 0.075 to 0.14 mm. long. **K., Glands of.** See *Gland.* **K.'s Membrane,** a structure that extends from the sarcolemma through the fiber of a muscle, making a complete partition. **K.'s Method,** a method of inducing premature labor. It consists in passing a flexible bougie into the uterine cavity. **K.'s Muscle,** the coraco-cervicalis muscle. See *Muscles, Table of.* **K.'s Nerve,** a branch of the musculo-spiral nerve which accompanies the ulnar and terminates in the inner head of the triceps. **K.'s Process,** a process for the separation of the two coloring-matters of chlorophyl. 1. Prepare a solution by allowing fresh bruised leaves to be acted upon for a few hours in the dark by warm 65 per cent. alcohol; decant. 2. Shake one volume of this solution with two volumes of benzol; after a time the turbid liquid separates into a benzol layer above having a bluish-green color, and an alcohol layer below tinged yellow. The yellowish pigment is called by Krause *xanthophyl*, the bluish-green, *kyanophyl.* According to Wiesner, kyanophyl is nearly pure chlorophyl freed from its associated yellow pigment xanthophyl. It is believed by many that the yellow pigment separated by this process is identical with that found in plants blanched (etiolated) in darkness, and which has been called etiolin (Goodale).

Kreatin (*kre'-at-in*). See *Creatin.*

Kreatinin (*kre-at'-in-in*). See *Creatinin.*

Kremnitz White, Krems White. Same as *White Lead.*

Kreolin (*kre'-o-lin*). See *Creolin.*

Kresol (*kre'-sol*). See *Cresol.*

Krinosin (*krin'-o-sin*). See *Crinosin.*

Kristeller's Method. A method of hastening tedious labor by fetal expression by means of rhythmic pressure on the fundus uteri. Pressure is made on the fetus while the entire child is still in the genital canal.

Krohn's Glands. A pair of glands in the cephalothorax of certain of the *Arachnoidea* (*Phalangidæ, Cyphophthalamidæ*).

Kronecker's Center. The inhibitory center of the heart. It may be injured in cardiocentesis.

Krönlein's Hernia. See *Hernia, Inguino-properitoneal,* and *Diseases, Table of.*

Krull's Treatment. See *Treatment, Methods of.*

Krypto- (*krip'-to-*). See *Crypto-.*

Kühne's Method. A method of staining bacilli, and *K.'s Modification of Gram's Method.* See *Stains, Table of.* **K.'s Carbol. Methylene-blue,** methylene-blue 1.5, absolute alcohol 10. Rub up and gradually add 100 parts of a five per cent. solution of carbolic acid. **K.'s Motorial End-plates,** a peculiar form of nerve-ending. The same as the *Hillocks of Doyère.* **K.'s Pancreas-powder,** an extract prepared by the prolonged extraction of fresh pancreas of ox with alcohol and then with ether.

Kuhnt, Cylinder-cone of. See *Cylinder.*

Kujawah (*ku'-jah-wawv*) [E. Ind.]. An apparatus used in India, by means of which wounded persons may be carried on camels.

Kumbecephalic (*kum-be-sef-al'-ik*) or **Kumbokephalic** (*kum-bo-kef-al'-ik*). See *Cymbocephalic.*

Kumiss (*koo'-mis*) or **Kumyss** (*koo'-mis*). See *Koumiss.*

Kümmel (*kim'-el*) [Ger., "*cumin.*"] A liqueur, or cordial, originating in Germany and Russia, and flavored with fennel, caraway, cumin, or coriander.

Kummerfeld's Lotion. A cosmetic used in dermatology. It consists of spirit of camphor and spirit of lavender, each ½ dram; precipitated sulphur 15 grains; cologne-water one dram, distilled water 2 ounces.

Kumysgen (*koo-mis'-jen*) [Tartar, *kumiz*, fermented mare's milk; γεννᾶν, to beget]. A preparation used for the production of koumiss.

Kupffer's Cells. Liver-cells which, according to Asp and Kupffer, present exceedingly minute intracellular passages that pass from the bile capillaries into the interior of the cells, where they communicate with

certain small cavities or vacuoles. **K.'s Method.** See *Stains, Table of.* **K.'s Vesicle,** a small globular cavity seen near the posterior extremity of the embryo in teleostean fishes.

Kurung Oil (*ku'-rung*). See *Pongamia.*

Küssmaul's Coma. A manifestation of diabetes usually associated with the presence of acetone in the urine, and the patient is comatose. See *Diseases, Table of.* **K.'s Disease,** acute atrophic spinal paralysis. See *Diseases, Table of.*

Kusso (*koos'-o*). See *Brayera.*

Küster's Sign. See *Signs and Symptoms, Table of.*

Kutubuth (*koo-too-booth'*) [Arab.]. Melancholia errabunda.

Kvas, or Kwas (*kvas* or *kwas*) [Russ.]. A kind of beer made in Russia of rye-flour, oatmeal, or baked bread, sometimes with the addition of various sweet fruits.

Kyanizing (*ki'-an-īz-ing*) [after *Kyan,* the inventor]. A wood-preserving process having for its object the coagulation of the protein matters in wood-cells, thus retarding putrefaction by impregnating the wood with a solution of mercuric chlorid. Impregnation with a 50 per cent. solution of zinc chlorid is called *Burnettizing.* See *Burnett's Disinfecting-fluid.*

Kyanophyl (*ki'-an-o-fil*) [κύανος, dark-blue; φύλλον, a leaf]. The bluish-green pigment of chlorophyl. Same as *Cyanophyl.*

Kyesteïn (*ki-es'-te-in*) [κύησις, conception; ἐσθής, covering]. A filmy deposit upon decomposing urine, at one time thought to be diagnostic of pregnancy.

Kyllopodia (*kil-o-po'-de-ah*) [κυλλός, twisted; πούς, foot]. See *Club-foot.*

Kyllosis (*kil-o'-sis*) [κυλλός, twisted]. Same as *Club-foot.*

Kymograph (*ki'-mo-graf*), **Kymographion** (*ki-mo-graf'-e-on*) [κῦμα, wave; γράφειν, to write]. An instrument for reproducing graphically the variations in the pressure of the blood.

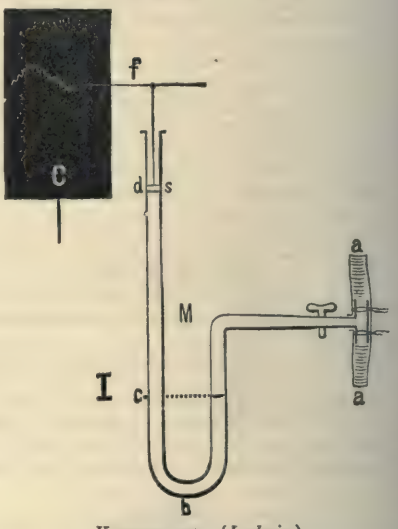
Kymoscope (*ki'-mo-skōp*) [κῦμα, wave; σκοπεῖν, to inspect]. A device used in the observation and study of the blood-current.

Kynurin (*ki-nu'-rin*) [κύων, a dog; οὖρον, urine], $C_{18}H_{14}N_2O_2$. A crystalline substance obtained from cynurenic acid. It may also be made by oxidizing cinchonin and cinchoninic acid with chromic acid. It crystallizes in needles containing $3H_2O$.

Kyphoscoliorachitic (*ki-fo-sko-le-o-rak-it'-ik*) [κύφωσις, hump-back; σκολιός, oblique; ῥάχις, spine]. Kyphoscoliotic.

Kyphoscoliosis (*ki-fo-sko-le-o'-sis*) [κύφωσις, hump-backed; σκολίωσις, a bending]. Kyphosis combined with scoliosis.

Kyphoscoliotic (*ki-fo-sko-le-ot'-ik*) [κύφωσις, hump-back; σκολιός, oblique]. Characterized by or pertaining to kyphoscoliosis.



Kyphosis (*ki-fo'-sis*) [κύφωσις, hump-back]. Hump-back. Angular curvature of the spine, with the prominence or convexity turned dorsad. **K. bicyclistarum,** a curvature of the spine, due to error in posture in bicycle-riding.

Kyphotic (*ki-fot'-ik*) [κύφωσις, hump-back]. Relating to, of the nature of, or affected with, kyphosis.

Kysthoproptosis (*kis-tho-prop-to'-sis*) [κύσθος, a hollow; πρόπτωσις, a falling forward]. Prolapse of the vagina.

Kysto- (*kis'-to-*). See *Cysto-.*

Kystoma (*kis-to'-mah*). See *Cystoma.*

KYMOGRAPH. (*Ludwig.*)

a, a. Artery. C. Revolving-cylinder. c. Height of mercury in tube; the difference between this point and d indicates the pressure within the vessel. d, s. Float on mercury in tube. f. Writing-style.

Kytharrhagia (*kith-ar-a'-je-ah*). See *Cytharrhagia.*

Kythemolytic (*ki-them-o-lit'-ik*) [κύτος, cell; αἷμα, blood; λύσις, solution]. Pertaining to, characterized by, or causing, the destruction of blood-cells.

Kytomitom (*ki-tom'-it-om*) [κύτος, cell; μίτος, thread]. The network in the body of the nucleus of the cell.

Kytoplasm (*ki'-to-plazm*) [κύτος, cell; πλάσμα, plasm]. The protoplasm of the cell.

L

L. The abbreviation of *Left*, of *Lumbar*, of *Lithium*, and of *Libra*, a pound.

λ denotes wave-length. For instance λ 506, means a wave-length equal to 506 millionths of a millimeter. Sometimes the letters W. L. are used instead of λ.

Lb. Contraction of *liber* = pound.

Lab, or Lab-ferment. The ferment of rennet producing coagulation of milk. It is separated from the proenzyme, *labzymogen*, by means of the acids of the gastric juice, and especially by HCl. Labzymogen resists the action of alkalies, which, even in very small amounts, destroys the lab. A temperature of 35° to 40° C. is most favorable to the action of lab. At 70° C. the lab is destroyed, but not the labzymogen.

Labarraque's Liquor. See *Liquor*. **L.'s Solution.** See *Chlorin*.

Labbé, Vein of. See *Vein*.

Labdacism (*lab'-das-izm*). Same as *Lambdacism*.

Labdanum (*lab'-dan-um*). See *Ladanum*.

Labellum (*la-bel'-um*) [dim. of *labium*, a lip: *pl.*, *Labella*]. In biology: (*a*) One of the petals of an orchid, which, properly the upper one, is made the lower by a semi-twist of the ovary. It is larger than the other petals and offers a landing-place for insects; it is carried backward in the form of a spur, and then assumes the functions of a nectary and so attracts visitors (Cheshire); (*b*) One of the mouth-parts of an insect.

Labes (*la'-bēz*) [L.]. An old name for the plague; also, for any depravation or lowering of the standard of health.

Labial (*la'-be-al*) [*labium*, a lip]. Pertaining to the lips. **L. Bone.** See *Intermaxillary*. **L. Frenum**, frenum of the lips.

Labialism (*la'-be-al-izm*) [*labium*, a lip]. The tendency to pronounce any articulate sounds as if they were labials; the addition of a labial or labio-dental quality to an articulate sound.

Labials (*la'-be-alz*) [*labium*, a lip]. The consonant-sounds; they are formed mainly by the lips. See *Consonants*.

Labiate (*la'-be-āt*) [*labium*, a lip]. In biology, lipped. Shaped like, or functioning as, a lip. **L. Plants**, the *Labiatæ*, or mintworts; an order of square-stemmed plants, mostly herbs, with aromatic properties, many of the species being highly charged with volatile oils.

Labiatiform (*la-be-at'-if-orm*). See *Labiate*.

Labidometer (*lab-id-om'-et-er*) [λαβίς, forceps; μέτρον, a measure]. A forceps used in measuring the dimensions of the head of a fetus in the pelvis.

Labidophorous (*lab-id-off'-or-us*) [λαβίς, forceps; φορός, bearing]. Applied to insects having organs resembling pinchers.

Labidoprion (*lab-id-o'-pre-on*) [λαβίς, forceps; πρίων, saw]. A forceps-saw.

Labiella (*la-be-el'-ah*) [*labium*, a lip]. In biology, a minute, rounded, median portion of the deutomala in myriapods; it corresponds in a degree to the lingua of hexapods (Packard).

Labile (*lab'-il*) [*labilis*; *labi*, to glide]. 1. In electrotherapeutics a labile application is the passing of the electrode—usually the negative—along and touching the skin over the track of a nerve. 2. Deciduous.

Labimeter (*lab-im'-et-er*). Same as *Labidometer*.

Labio-alveolar (*la'-be-o-al-ve'-o-lar*) [*labium*, lip; *alveolus*, a small hollow]. Pertaining to the lip and to one or more dental alveoli.

Labio-chorea (*la'-be-o-ko-re'-ah*) [*labium*, lip; χορεία, dancing]. A choreic affection of the lips, and the stammering that results from it.

Labio-choreic (*la'-be-o-ko-re'-ik*) [*labium*, lip; χορεία, dancing]. Relating to lip-stammering.

Labio-dental (*la'-be-o-den'-tal*) [*labium*, lip; *dens*, a tooth]. Pertaining to the lips and the teeth.

Labio-glosso-laryngeal (*la'-be-o-glos'-o-lar-in'-je-al*) [*labium*, lip; γλῶσσα, tongue; λάρυγξ, larynx]. Pertaining conjointly to lips, tongue, and larynx. **L. Paralysis.** See *Bulbar Paralysis*.

Labio-glosso-pharyngeal (*la'-be-o-glos'-o-far-in'-je-al*) [*labium*, lip; γλῶσσα, tongue; φάρυγξ, pharynx]. Pertaining conjointly to lips, tongue, and pharynx.

Labiomancy (*la'-be-o-man-se*) [*labium*, lip; μαντεία, divination]. The power of understanding what is said by observing the motions of the lips in speech.

Labio-mental (*la'-be-o-men'-tal*) [*labium*, lip; *mentum*, chin]. Relating to lip and chin.

Labio-nasal (*la'-be-o-na'-sal*) [*labium*, lip; *nasus*, nose]. Labial and nasal; pertaining to lip and nose.

Labio-palatine (*la'-be-o-pal'-at-in*) [*labium*, lip; *palatum*, palate]. Relating to lip and palate in common.

Labioplastic (*la-be-o-plas'-tik*) [*labium*, lip; πλάσσειν, to form]. Pertaining to an operation for restoring the lip, after injury or partial destruction of the same; chiloplastic.

Labiose (*la'-be-ōs*) [*labium*, lip]. In biology, resembling a true labiate flower.

Labiotenaculum (*la-be-o-ten-ak'-u-lum*) [*labium*, lip; *tenaculum*, a holder]. An instrument for holding the lips in a position required for examination or operation.

Labipalp (*la'-be-palp*) [*labium*, a lip; *palpare*, to stroke, to feel]. In biology, a labial palp or feeler.

Labitome (*lab'-it-ōm*) [λαβίς, forceps; τομή, cutting]. Cutting-forceps.

Labium (*la'-be-um*) [L.: *pl.*, *Labia*]. A lip. Also, any structure consisting of a strip or flap of elastic tissue that closes upon an orifice. In biology, applied to various lip-like structures in animals and plants, usually the lower when two are present, the upper being called the *labrum*. **L. austriacum**, Austrian lip; the thick, pendent upper lip of the Austrian reigning family. **L. cerebri**, the margins of the cerebral hemispheres that overlap the corpus callosum. **L. duplex**, a congenital longitudinal duplication of the mucosa of the upper, and rarely of the lower lip. **L. externus pudendi.** See *L. majus*. **L. internus pudendi.** See *L. minus*. **L. leopoldinum**, a thick, pendent lower lip; named after Emperor *Leopold*. **L. leporinum.** See *Hare-lip*. **L. majus**, or **L. pudendi majus**, one of two folds of skin of the female external genital organs, arising just below the mons veneris, surrounding the vulval entrance, and meeting at the anterior part of the perineum. **L. minus, L. pudendi minus**, or **nympha**, one of two folds of mucous membrane at the inner surfaces of the labia majora. **L. tympanicum**, the portion of the lamina spiralis forming the lower border of the sulcus spiralis. **L. urethrae**, the lateral margins of the external urinary meatus. **L. vestibulare**, the overhanging extremity of the lamina spiralis that forms the upper part of the sulcus spiralis.

Labor (*la'-bor*) [L.]. Work. Parturition; bringing forth young. That natural process by which a pregnant woman expels the product of conception at the expiration of the period of pregnancy, normally,

280 days after conception. **L., Abnormal,** departing from the normal course. **L., Artificial,** when effected or aided by other means than the forces of the maternal organism. **L., Atonic,** labor protracted or rendered incapable of spontaneous termination by atony of the uterus. **L., Conduct of,** management, hygienic, medical, or surgical, of the parturient woman. **L., Difficult.** See *Dystocia*. **L., Dry,** when there is a deficiency of the liquor amnii, or when there has been a premature rupture of the bag of waters. **L., False,** or **False Pains.** See *Pains*. **L., Induced,** labor brought on by artificial means. **L., Insanity of.** See *Insanity*. **L., Instrumental,** one requiring manual or instrumental means to extract the child. **L., Metastatic,** labor in which the true pains cease suddenly, and are succeeded by muscular contractions of neighboring organs, bladder, rectum, or of the muscles of the trunk and limbs. **L., Missed,** retention of the dead fetus *in utero* beyond the period of normal gestation. **L., Natural, Normal,** or **Physiologic,** when effected by the sole power of the maternal organism. **L., Obstructed.** See *L. Pathologic*. **L., Pathologic,** when deviating from the normal type by reason of weakness of the maternal forces, anomalies of the pelvis, or of the fetus, or of complications, all being causes of **Obstructed L.** **L., Postponed,** delayed beyond nine months. **L., Premature,** taking place before the normal period of gestation, but when the fetus is viable. **L., Stages of,** arbitrary divisions of the period of labor,—the first begins with dilatation of the os, and ends with complete dilatation, so that the head can pass; the second ends with the expulsion of the child; the third (*placental*) consists in the expulsion of the placenta. **L., Mechanism of,** the mechanism by which a fetus and its appendages traverse the birth-canal and are expelled. **L.-pains,** the pains of, or the contraction of the uterus during, labor. **L., Perverse,** labor in which there is an abnormal position of the child. **L., Precipitate,** labor in which the expulsion of the fetus and its appendages takes place with undue celerity. **L., Protracted,** labor prolonged beyond the usual limit (10–20 hours in primiparæ, 2–6 hours in multiparæ). **L., Spontaneous,** labor accomplished without artificial aid.

Laboratory (*lab'-or-at-o-re*) [*laboratorium*, from *laborare*, to work]. A room or place designed for experimental work in chemistry, physiology, biology, etc.

Laborde's Method. See *Treatment, Methods of*. **L.'s Sign.** See *Death*.

Labrador Tea (*lab'-ra-dor*). The leaves of *Ledum latifolium*, demulcent, expectorant, and tonic. Dose of the fld. ext., ʒ j–ij. Unof.

Labrose (*la'-brōs*, or *la-brōs'*) [*labrosus*, lipped]. Supplied with lips. Large-lipped.

Labrum (*la'-brum*) [L., a lip-edge, margin: *pl.*, *Labra*]. In biology, a lip-like structure, usually the upper, when two are present, the lower being the *labium*.

Laburnin (*lab-er'-nin*) [*laburnum*, laburnum]. Also called *Cytisin*. An alkaloid found in *Cytisus laburnum*.

Laburnum (*lab-er'-num*) [L.]. The leaves of *Cytisus laburnum*, the properties of which are due to an alkaloid, *cytisin*. In small doses it is diuretic and resolvent; in larger doses poisonous, irritating the alimentary tract, and inducing purging, vomiting, and exhaustion. Unof.

Labyrinth (*lab'-ir-inth*) [λαβύρινθος, a maze]. A name given to the series of cavities of the internal ear comprising the vestibule, cochlea, and the semicircular canals. **L., Bony.** See *L., Osseous*. **L., Cortical,** the intricately arranged collection of uriniferous tubules and blood-vessels filling the intervals in the cortical substance of the kidney. See *Kidney*. **L., Membranous,** the membranous cavity within the osseous labyrinth, from which it is partly separated by the perilymph. It comprises two sacs contained within the vestibule, the semicircular canals and the canal of

LABYRINTH OF THE EAR LAID OPEN.

a. Fovea elliptica. *b*. Fovea hemispherica. *c*. Common entrance of the posterior and superior semicircular canals. *d*. Opening of the aqueduct of the vestibule. *e*. Superior semicircular canal. *f*. Posterior. *g*. Inferior semicircular canal. *h*. Spiral canal of cochlea. *i*. Opening of the aqueduct of the cochlea. *j*. Lamina spiralis.

the cochlea. **L. of the Kidney.** See *Labyrinth, Cortical*. **L., Osseous,** the bony capsule of the internal ear, communicating in front with the cochlea and behind with the semicircular canals. **L. Pit.** See *Ear*.

Labyrinthal (*lab-ir-in'-thal*), **Labyrinthic** (*lab-ir-in'-thik*). See *Labyrinthine*.

Labyrinthine (*lab-ir-in'-thin*) [λαβύρινθος, a maze]. Pertaining to a labyrinth. **L. Vertigo.** See *Ménière's Disease*.

Labyrinthus (*lab-ir-in'-thus*) [L.: *pl.*, *Labyrinthi*]. A labyrinth.

Lac (*lak*) [Pers., *lak*, lac]. A resinous incrustation produced on the bark of the twigs and branches of various tropical trees (*Urostigma religiosa*, *Mimosa cinerea*, *Butea frondosa*, *Schleichera trijuga*, of Ceylon, India, and Burmah, *Croton lacciferum*, of Ceylon, *Croton draco*, *Acacia greggii*, *Larrea mexicana*, of Mexico), by the puncture of the female lac-insect *Carteria* (*Coccus*) *lacca*. This crude exudation constitutes the *stick-lac* of commerce. *Shellac* is prepared by spreading the resin into thin plates after being melted and strained. In the preparation of the shellac, the resin is freed from the coloring-matter, which is formed into cakes, and is known as *lac-dye*. See *Pigments, Conspectus of*. *Button-lac* differs from shellac only in form, appearing in cakes about three inches in diameter and one-sixth of an inch thick. *Bleached lac* is prepared by dissolving lac in a boiling lye of pearlash or potassic hydrate, filtering and passing chlorin through the solution until all the lac is precipitated. *Seed-lac* is the residue obtained after dissolving out most of the coloring-matter contained in the resin. The common shellac is used in varnishes, lacquers, and sealing-wax; the bleached lac in pale varnishes and light-colored sealing-wax. **L.-beet,** a fruit used in Siam for diarrhea and dyspepsia. **L., Stick,** lac as taken from the twigs on which it is formed. **L. sulphuris,** milk of sulphur; sulphur præcipitatum (U. S. P.) **L., White.** See *Bleached lac*.

Lacca (*lak'-ah*). See *Lac*.

Laccate (*lak'-āt*) [Pers., *lak*, lac, or sealing-wax]. In biology, appearing as if varnished or lacquered.

Laccin (*lak'-in*) [Pers., *lak*, lac]. A substance resembling wax, extracted from lac. It is insoluble in water, soluble in alcohol, in ether, in hydrochloric acid, and in potassic hydrate.

Lacerate (*las'-er-āt*) [*λακερός*, torn]. In biology, with a margin appearing as if torn. **L. Foramen.** See *Foramina, Table of.*

Laceration (*las-er-a'-shun*) [*laceratio; lacerare*, to tear]. Mechanical rupture by a tearing action, whether accidental or surgical. See *Dilaceration.* **L. of the Infratrochlear Nerve.** See *Badal's Operation* in *Operations, Table of.* **L. of Perineum,** a tearing through the wall separating the lower extremity of the vagina and rectum, which occurs occasionally to women in childbirth.

Lacerator (*las'-er-a-tor*) [*lacerare*, to tear]. An instrument used in effecting surgical laceration.

Lacertiform (*las-er'-tif-orm*) [*lacerta*, lizard; *forma*, form]. Lizard-shaped.

Lacertoid (*las-er'-toid*) [*lacerta*, lizard; *εἶδος*, like]. Resembling a lizard.

Lachesis (*lak'-e-sis*) [*λάχεσις*, destiny, fate]. 1. A genus of venomous South American reptiles. 2. The venom of *L. mutus* (the bushmaster snake), and also a homeopathic preparation of the poison.

Lachnanthes (*lak-nan'-thēz*) [*λάχνη*, soft, woolly hair; *ἄνθος*, a flower]. A genus of North American bloodworts. **L. tinctoria,** red-root, is a plant popular in parts of the United States as an expectorant and alterative in pulmonary tuberculosis. Dose of a 10 per cent. tincture, ♏x. Unof.

Lachrymal (*lak'-rim-al*). See *Lacrymal.*

Lacinia (*las-in'-e-ah*) [L., a lappet, flap, as of a garment: *pl.*, *Laciniæ*]. In biology, one of the fimbriæ at the ovarian extremity of the oviduct; a narrow lobe, as in an incised leaf; or, specifically, the slender apex of the maxilla of a beetle. Cf. *Galea.*

Laciniate (*las-in'-e-āt*) [*lacinia*, a flap]. In biology, fringed; cut into narrow flaps.

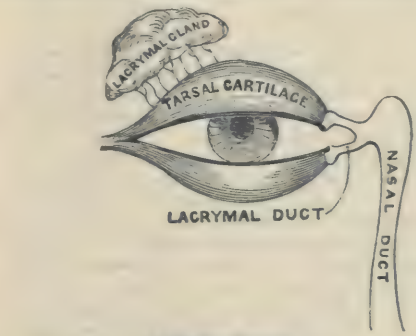
Laciniform (*las-in'-if-orm*) [*lacinia*, a flap; *forma*, form]. In biology, fringe-like.

Laciniola (*las-in-i'-o-lah*) [dim. of *Lacinia: pl.*, *Laciniolæ*]. In biology, a small lacinia.

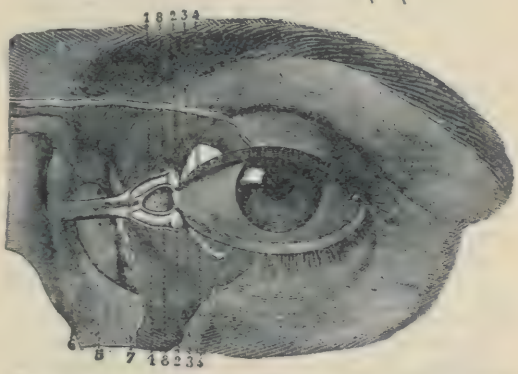
Lacinula (*las-in'-u-lah*) [dim. of *Lacinia*, a flap: *pl.*, *Lacinulæ*]. In biology, a small lacinia.

Lacmoid (*lak'-moid*). Same as *Resorcin-blue.*

Lacmus (*lak'-mus*). See *Litmus.*



Lacquer (*lak'-er*) [Pg., *lacre*, sealing-wax]. An opaque varnish containing lac. **L., Burmese,** a natural varnish consisting of a thick, grayish terebinthinous liquid, collected from the *Melanorrhœa usitatissima* of Burmah. It dissolves in alcohol, turpentine-oil, and benzene, assuming greater fluidity. Locally, it is used in lacquering furniture, temples, idols, and varnishing vessels.



Lacrima (*lak'-rim-ah*). See *Lacryma.*

Lacrimal (*lak'-rim-al*). See *Lacrymal.*

Lacryma (*lak'-rim-ah*) [L.: *pl.*, *Lacrymæ*]. A tear.

Lacrymal (*lak'-rim-al*) [*lacryma*, a tear]. Having reference to the organs of the secretion, transfer, or excretion of tears. **L. Apparatus,** the lacrymal gland, ducts, canal, sac, and nasal duct. See *Eye.* **L. Artery,** the first branch of the ophthalmic artery, supplying the gland. See *Arteries, Table of.* **L. Bone,** a bone upon the nasal side of the orbit, articulating with the frontal, the ethmoid, and superior maxillary bones, in which begin the lacrymal groove and nasal duct. See *Bones, Table of.* **L. Canals,** or **Canaliculi,** *superior* and *inferior*, extend from the lacrymal puncta to the sac, and serve to convey the excess of tears from the eye to the nose. See *Canal.* **L. Caruncula.** See *Caruncle.* **L. Crest.** See *Crest.* **L. Ducts,** seven to fourteen in number, extending obliquely from the gland to the fornix conjunctivæ, carrying the tears to the conjunctival surface of the globe. See *Duct.* **L. Gland,** the gland secreting the tears, situated in a depression of the frontal bone, the *L. fossa*, at the upper and outer angle of the orbit. See *Gland.* **L. Lake,** the inward prolongation of the palpebral fissure of the eyelids. **L. Papilla.** See *Papilla.* **L. Probe,** a probe for exploring or dilating the canaliculi and nasal duct. **L. Puncta,** the minute orifices of the canaliculi, upon the eyelids near the inner canthus. **L. Sac,** a sacciform enlargement of the upper part of the nasal duct, into which the canaliculi empty. **L. Style,** a probe used in stricture of the nasal duct. **L. Tubercle.** See *Tubercle.*

RELATIONS OF THE EYE AND THE LACRYMAL EXCRETORY APPARATUS.

1, 1. Canaliculi. 2, 2. Puncta lacrymalia. 3, 3. Inner extremity of tarsal cartilage. 4, 4. Free borders of lids. 5. Lacrymal sac. 6. Attachment to maxillary bone of superior tendon. 7. Bifurcation of lacrymal sac. 8, 8. Two branches.

Lacrymation (*lak-rim-a'-shun*) [*lacryma*, a tear]. An excessive secretion, or an overflow, of tears, from any cause.

Lacrymatome (*lak-rim'-at-ōm*) [*lacryma*, tear; *τομή*, cutting]. A cutting-instrument used in dilating the nasal duct or the canaliculi; a syringotome.

Lacrymiform (*lak-rim'-if-orm*) [*lacryma*, a tear; *forma*, form]. In biology, tear-shaped; guttiform.

Lacrymin (*lak'-rim-in*). See *Dacryolin.*

Lacrymotomy (*lak rim-ot'-o-me*) [*lacryma*, tear; *τομή*, cutting]. The division of strictures of the lacrymal passages.

Lactagogue (*lak'-tag-og*). See *Galactagogue.*

Lactalbumin (*lakt-al'-bu-min*) [*lac*, milk; *albumin*]. A proteid contained in milk in small quantities—½ of 1 per cent. It resembles serum-albumin very closely, differing in specific rotatory power, in its coagulability by heat, and in its precipitation of neutral salts.

Lactamic Acid (*lak-tam'-ik*). See *Alanin.*

Lactamid (*lak'-tam-id*) [*lac*, milk; *amid*], $C_3H_7NO_2$. A substance formed by the union of lactid and ammonia. It forms crystals readily soluble in water and in alcohol, and melts at 74° C.

Lactamin (*lak'-tam-in*). See *Alanin.*

Lactant (*lak'-tant*) [*lactare*, to suckle]. Suckling.

Lactate (*lak'-tāt*) [*lactare*, to suckle]. Any salt of lactic acid.

Lactated Food. A Liebig's food for infants. Its composition is: Water 7.76; fat 1.64; starch 36.43; soluble carbohydrates 39.0; albuminoids 11.85; ash 2.61; milk-sugar 29.65.

Lactatic (*lak-tat'-ik*). See *Galactagogue.*

Lactation (*lak-ta'-shun*) [*lactatio; lactare*, to suckle]. Suckling; the period during which the child suckles.

Lacteal (*lak'-te-al*) [*lac*, milk]. 1. Pertaining to milk. 2. Any one of the lymphatics of the small intestine that take up the chyle.

Lactean (*lak'-te-an*) [*lac*, milk]. See *Lacteal.*

Lacteïn (*lak'-te-in*) [*lac*, milk]. Same as *Lactolin.*

Lacteous (*lak'-te-us*). See *Lacteal.*

Lactescence (*lak-tes'-ens*) [*lactescere*, to turn to milk]. Milkiness (often applied to the chyle).

Lactescent (*lak-tes'-ent*) [*lactescere*, to turn to milk]. Milky, or secreting a milky sap or fluid.

Lactic (*lak'-tik*) [*lac*, milk]. Pertaining to milk or its derivatives. **L. Acid.** See *Acid, Lactic,* and *Stains, Table of.* **L. Ether,** $(C_4H_5O.C_6H_5O_5)C_{10}H_{10}O_6$. A colorless substance resulting from the distillation of equal parts of calcium lactate, absolute alcohol, and sulphuric acid. It is soluble in water, in alcohol, and in ether, and boils at 77° C. **L. Fermentation.** See *Fermentation.*

Lactica (*lak'-tik-ah*) [*lac*, milk]. An old name for typhoid fever.

Lactid (*lak'-tia*) [*lac*, milk], $C_6H_8O_4$. A volatile substance, one of the anhydrids of lactic acid produced by dry distillation of that acid. It crystallizes from alcohol in rhombic plates that melt at 124.5° C., and boil at 255° C.; it dissolves slowly in water, with the gradual formation of lactic acid.

Lactiferous (*lak-tif'-er-us*) [*lac*, milk; *ferre*, to carry]. A term applied to vessels that convey milk. **L. Ducts,** the ducts of the mammary gland. **L. Glands,** the mammary glands. **L. Swelling,** a distention of the breast arising from obstruction of a lactiferous duct.

Lactific (*lak-tif'-ik*) [*lac*, milk; *facere*, to make]. Producing milk.

Lactiflorous (*lak-tif-lo'-rus*) [*lac*, milk; *flos*, flower]. In biology, having milk-white flowers.

Lactiform (*lak'-tif-orm*) [*lac*, milk; *forma*, form]. Resembling milk.

Lactifuge (*lak'-tif-ūj*) [*lac*, milk; *fugare*, to drive away]. A drug or agent that causes a lessening in the secretion of milk.

Lactigenous (*lak-tij'-en-us*) [*lac*, milk; *γεννᾶν*, to produce]. Milk-producing.

Lactimid (*lak'-tim-id*) [*lac*, milk; *imid*], C_3H_5NO. A substance produced by heating alanin in a current of HCl to 180–200° C. It consists of colorless leaflets or needles that melt at 275° C., and dissolve readily in alcohol and in water.

Lactin (*lak'-tin*) [*lac*, milk]. Sugar of milk; lactose.

Lactinated (*lak'-tin-a-ted*) [*lac*, milk]. Containing sugar of milk.

Lactiphagous (*lak-tif'-ag-us*) [*lac*, milk; *φαγεῖν*, to eat]. Consuming milk.

Lactipotous (*lak-tip'-o-tus*) [*lac*, milk; *potare*, to drink]. Milk-drinking.

Lactis (*lak'-tis*) [gen. of *lac*, milk]. Pertaining to milk. **L. redundantia,** an excessive flow of milk. **L. retentio,** suppression of the flow of milk.

Lactisma (*lak-tiz'-mah*) [*λάκτισμα*; *λακτίζειν*, to kick: *pl.*, *Lactismata*]. The kicking or motion of the fetus in utero.

Lactivorous (*lak-tiv'-or-us*) [*lac*, milk; *vorare*, to devour]. Subsisting on milk.

Lacto- (*lak'-to-*) [*lac*, milk]. A Latin prefix denoting connection with or relation to milk. **L.-pepsin,** a preparation of pepsin. According to Heger, its composition is: Pure pepsin 10 parts, pancreatin 7.6 parts, sugar of milk 50 parts, extract of malt 5 parts, lactic acid 2.6 parts, hydrochloric acid (25 per cent.) 10 parts, glycerin 20 parts. To this is added enough powdered tragacanth to make a pill-mass. The adult dose is about 15 grains. **L.-peptine,** a proprietary mixture claimed to contain pepsin, diastase, and pancreatin, acidulated with lactic and hydrochloric acids. One dram should peptonize ℥ viij of albumin, casein or fibrin, or emulsionize ℥ xvj of cod-liver oil. Dose, gr. v–xv. See *Pepsin.* Unof. **L.-peptone,** same as *L.-peptine.* **L.-phosphate,** any phosphate combined with lactic acid. **L.-proteid,** any proteid of milk, as caseinogen or lactalbumin. **L.-proteïn,** a derivative of milk.

Lactobiose (*lak-to'-be-ōs*). See *Galactose.*

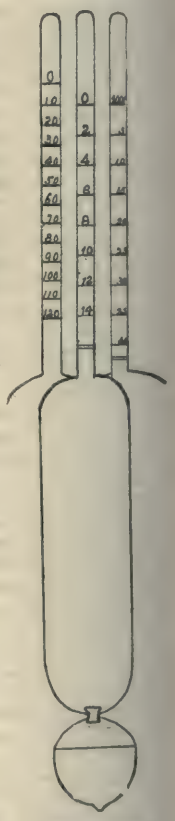
Lactobutyrometer (*lak-to-bu-tir-om'-et-er*) [*lac*, milk; *βούτυρον*, butter; *μέτρον*, measure]. An instrument used in estimating the proportion of butter in milk.

Lactocele (*lak'-to-sēl*) [*lac*, milk; *κήλη*, tumor]. A cyst containing a milky fluid. Same as *Galactocele.*

Lactocrit (*lak'-to-krit*) [*lac*, milk; *κριτής*, a judge]. An apparatus for testing the quantity of fatty substance in a sample of milk.

Lactodensimeter (*lak-to-den-sim'-et-er*) [*lac*, milk; *densus*, dense; *μέτρον*, measure]. A variety of lactometer.

Lacto-globulin (*lak-to-glob'-u-lin*) [*lac*, milk; *globus*, a ball]. One of the native proteids of milk; lactalbumin.



Lactoglucose (*lak-to-glu'-kōs*) [*lac*, milk; *γλυκύς*, sweet]. A saccharine substance, produced in the fermentation-fluid along with galactose. It is probably the same as glucose.

Lactokrit (*lak'-to-krit*). See *Lactocrit.*

Lactolin (*lak'-to-lin*) [*lac*, milk; *oleum*, oil]. Condensed milk.

Lactometer (*lak-tom'-et-er*). An instrument for determining the specific gravity of milk.

Lactone (*lak'-tōn*) [*lac*, milk], $C_{10}H_8O_4$. An aromatic, colorless, inflammable fluid, derived from the dry distillation of lactic acid. The *lactones* are generally liquids, readily soluble in water, of neutral reaction, possessing a faintly aromatic odor, and can be distilled without decomposition.

LACTOMETER.

Stem on the right graduated as used in Boston. Stem on the left shows graduation adopted in New York. Central stem graduated to show percentage of solids.

Lactonic Acid (*lac-ton'-ik*). See *Acid.*

Lactoscope (*lak'-to-skōp*) [*lac*, milk; *σκοπεῖν*, to examine]. An instrument for estimating the proportions of water and fat-globules of milk.

Lactose (*lak'-tōs*) [*lac*, milk], $C_{12}H_{22}O_{11} + H_2O$. Milk-sugar; it occurs in the milk of mammals, in the

amniotic liquor of cows, and in certain pathologic secretions. It crystallizes in white, hard, rhombic prisms, containing one molecule of water. It is soluble in water, has a faint sweet taste, and is insoluble in alcohol. Its aqueous solution is dextro-rotatory. It melts at 205° C. It is much used in pharmacy for making triturations, and is the vehicle of most homeopathic preparations. See *Carbohydrates, Table of.*

Lactoserum (*lak-to-se'-rum*) [*lac*, milk; *serum*, whey]. The serum or whey of milk.

Lactosuria (*lak-to-su'-re-ah*) [*lac*, milk; *οὖρον*, urine]. The presence of lactose in the urine; a condition occasionally seen in pregnancy.

Lactotoxin (*lak-to-toks'-in*) [*lac*, milk; *τοξικόν*, poison]. A poisonous substance found in milk.

Lactous (*lak'-tus*) [*lactosus*, milky]. Milky.

Lactuca (*lak-tu'-kah*) [L., "lettuce"]. A genus of composite-flowered herbs; the lettuces. **L. altissima, L. elongata, L. montana, L. sativa** (common garden lettuce), and **L. virosa**, afford lactucarium; but the **L. virosa** is the source recognized in the U. S. Pharmacopeia. Lactuca (B. P.) is also a synonym of *Lactucarium, q. v.*

Lactucarium (*lak-tu-ka'-re-um*) [L.: *gen.*, *Lactucarii*]. Lettuce. The milky juice of *Lactuca virosa*, a biennial plant. It contains a crystalline substance, *lactucerin*, to which its properties are thought to be due. It is a mild hypnotic, with sedative and diuretic properties, somewhat similar to opium, but without depressant after-effects. It is frequently an ingredient of patented cough-mixtures; varieties of commercial lactucarium are produced by other species of *Lactuca, q. v.* **L., Ext.** (B. P.) Dose gr. v–xv. **L., Ext., Fld.** Dose ♏x–℥j. **L., Syr.**, contains 5 per cent. of the drug. Dose ℥j–℥j. **L., Tinct.**, dose ʒss–℥ij.

Lactucerin (*lak-tu'-ser-in*) [*lactuca*, lettuce; *cera*, wax]. A crystalline substance existing in lactucarium, *q. v.*

Lactucerol (*lak-tu'-ser-ōl*) [*lactuca*, lettuce; *oleum*, oil], $C_{35}H_{60}O_3$. A crystalline substance existing in lactucerin; it occurs in two isomeric forms.

Lactucic Acid (*lak-tu'-sik*) [*lactuca*, lettuce], $C_{30}H_{64}O_6$. A yellow, amorphous body found in lactucarium. It is insoluble in chloroform, ether, benzin, and carbon bisulphid. In some respects it resembles oxalic acid. See *Acid.*

Lactucin (*lak-tu'-sin*) [*lactuca*, lettuce]. A crystalline extractive of lettuce and of lactucarium.

Lactucol (*lak'-tu-kol*) [*lactuca*, lettuce], $C_{13}H_{20}O$. A substance crystallizing in needles, formed when lactucerin and potassium hydrate are melted together.

Lactucon (*lak-tu'-kon*). Same as *Lactucin.*

Lactucopicric Acid, Lactucopicrin (*lak-tu-ko-pik'-rik, lak-tu-ko-pik'-rin*) [*lactuca*, lettuce; *πικρός*, bitter], $C_{44}H_{32}O_{21}$. An amorphous, bitter principle contained in lactucarium.

Lactumen (*lak-tu'-men*) [*lac*, milk: *pl.*, *Lactumina*]. A synonym of *Porrigo larvalis.* Also, applied to that form of aphthæ in which the spots have a fanciful resemblance to clots of curd.

Lactupicrin (*lak-tu-pik'-rin*). See *Lactucopicric Acid.*

Lacuna (*la-ku'-nah*) [*lacus*, a lake: *pl.*, *Lacunæ*]. A little hollow space. A mucous or lymphatic follicle. **L., Absorption.** See *Howship's Lacunæ.* **L. amatorum**, the vertical groove in the center of the upper lip. **L. Bone.** See *Bone.* **L. of Cementum**, spaces in the cement of the teeth analogous to those in bone. **L. cerebri**, the infundibulum of the brain. **L. of Cornea**, spaces between the laminæ of the cornea. **L. graafianæ**, Graafian follicles. **L., Haversian.** See *Bone.* **L., Howship's.** 1. Depressions on the surface of bone beneath the periosteum. 2. Carious excavations in bone filled with granulation-tissue. **L., Intervillous** (*of placenta*), the spaces in the maternal portion of the placenta filled with blood, and in which the fetal villi hang. **L. labii superioris.** See *L. amatorum.* **L. lateralis sinus superioris**, depressions along the groove of the superior longitudinal sinus. **L. magna**, the largest of the orifices of the glands of Littré, situated on the upper surface of the fossa navicularis. **L. morgagni**, the orifices of the glands of Littré, or the glands themselves. **L. pharyngis**, a depression at the opening of the Eustachian tube into the pharynx. **L. of Tongue**, the foramen cecum. See *Foramina, Table of.* **L. of Urethra**, follicular depressions in the mucous membrane of the urethra, most abundant along the floor, especially in the region of the bulb. Their mouths are directed forward.

Lacunal (*la-ku'-nal*), or **Lacunar** (*la-ku'-nar*) [*lacus*, lake]. Pertaining to the lacunæ. **L. Spaces**, the irregular fissures between the fasciculi of connective tissue, forming the beginnings of the lymphatic vessels.

Lacunose (*la-ku'-nōs*) [*lacuna*, a pit, a hollow]. In biology, having pits, depressions, or spaces.

Lacunosorugose (*la-ku'-no-so-ru'-gōs*) [*lacuna*, pit, hollow; *ruga*, a wrinkle]. In biology, deeply pitted or wrinkled, as the stone of a peach.

Lacunula (*lak-u'-nu-lah*) [dim. of *lacuna*, a lake: *pl.*, *Lacunulæ*]. A small or minute lacuna; an air-space, such as is seen in a gray hair when magnified.

Lacus (*la'-kus*) [L.]. A small hollow or cavity in a tissue. **L. derivationis**, one of the venous spaces in the tentorium cerebelli communicating with the superior longitudinal and lateral sinuses. **L. lacrymalis**, the space at the inner canthus of the eye, near the punctum, in which the tears collect. **L. sanguineus**, the utero-placental sinus.

Lacustrine (*la-kus'-trin*) [*lacus*, a lake]. In biology, inhabiting lakes or ponds.

La Dando (*lah dan'-do*). Synonym of *Influenza.*

Ladanum (*lad'-an-um*) [L.; Gr., *λήδανον*]. The concrete gummy and resinous juice of various species of *Cistus*, growing in the Mediterranean region; as *C. ladaniferus, C. creticus, C. salvifolius, C. cyprius, C. ledon*, and *C. villosus.* It is a greenish-gray solid, of bitter taste, formerly in high esteem. It is now chiefly used in making pastils for fumigation.

Ladendo (*lad-en'-do*). Synonym of *Influenza.*

Ladrerie (*lah-dra-re'*) [Fr.]. See *Measles.*

Ladric (*lah'-drik*). Pertaining to measles.

Lady Crespigny's Pill. A pill of aloes and cinchona; aloes socotr. ʒj, ext. cinchona ʒiij, cinnam. ʒj, syr. absinth. q. s. It is a stomachic and laxative. Dose gr. x–xx.

Lady Hesketh's Pill. A pill similar to *Lady Crespigny's Pill, q.v.*

Lady Webster Pill. See *Aloe.*

Lady's Bed-straw. Cheese-rennet. The herb *Galium verum*, a refrigerant and diuretic. Dose, fld. ext. ʒss–j. Unof. **L.'s Slipper.** See *Cypripedium.*

Læmoparalysis (*le-mo-par-al'-is-is*). See *Lemoparalysis.*

Laennec's Cirrhosis. Atrophic cirrhosis of the liver; a form of chronic interstitial hepatitis of the liver in which the organ is greatly reduced in size and may be deformed. The weight may be reduced to a pound or a pound and a half; the surface of the organ is granular; and its substance is composed of greenish-yellow islands surrounded by grayish-white connective tissue. **L.'s Perles** and **L.'s Râle.** See *Signs and Symptoms, Table of.* **L. tubercles**, the miliary granulations of tuberculosis.

Læsis (*le'-sis*). See *Lesion.*

Lætificant (*le-tif′-ik-ant*). See *Letificant.*

Lævo- (*le′-vo-*). For words so commencing, see *Levo-.*

Lævorotatory (*le-vo-ro′-ta-tor-e*). See *Levorotatory.*

Lævulin (*lev′-u-lin*). See *Levulin.*

Lævulose (*lev′-u-lōs*). See *Levulose.*

Lafayette Mixture. A mixture employed in gonorrhea. It contains copaiba, cubebs, liquor potassæ, sweet spirit of niter, and is known also as the *compound copaiba mixture.* See *Copaiba.*

Lag Tooth. A delayed tooth. A name for the molar or wisdom tooth.

Lagam-balsam (*lag′-am-bal′-sam*). A variety of gurjun-balsam brought from Sumatra.

Lagarous (*lag′-ar-us*) [λαγαρός, lax]. Lax, loose, or soft.

Lagena (*laj-e′-nah*) [λάγυνος a flask, bottle: *pl.*, *Lagenæ*]. In biology, the flask-like extremity of the cochlea in certain vertebrates.

Lageniform (*laj-en′-if-orm*) [*lagena*, a flask; *forma*, form]. Flask-shaped.

Lagentomum (*laj-en′-to-mum*) [λαγώς, hare; ἐν, in; τομή, a cutting]. Hare-lip. Cf. *Lagochilus.*

Lagnea, or Lagneia (*lag-ne′-ah*, or *lag-ni′-ah*) [λαγνεία, coition, lust]. Same as *Satyriasis.* Also, coition. Also, the semen.

Lagnesis (*lag-ne′-sis*) [λάγνης, lewd]. Same as *Satyriasis.* **L. furor,** unconquerable lust. **L. valacitas,** lust capable of control.

Lagnosis (*lag-no′-sis*). Same as *Lagnesis.*

Lagochilus (*lag-o-ki′-lus*), **or Lagochilos** (*lag-o-ki′-los*) [λαγώς, hare; χεῖλος, lip]. Hare-lip. Cf. *Lagentomum.*

Lagophthalmia (*lag-off-thal′-me-ah*). Same as *Lagophthalmos.*

Lagophthalmic (*lag-off-thal′-mik*) [λαγώς, hare; ὀφθαλμός, eye]. Pertaining to or affected with lagophthalmos.

Lagophthalmos (*lag-off-thal′-mos*) [λαγώς, hare; ὀφθαλμός, eye; from the popular notion that a hare sleeps with open eyes]. Inability to close the eyes.

Lagopodous (*lag-op′-o-dus*) [λαγώπους, hare-footed]. In biology, hare-footed; densely clothed with long and soft entangled hairs.

Lagostoma (*lag-os′-to-mah*) [λαγώς, hare; στόμα, mouth]. See *Hare-lip.* Cf. *Lagochilus* and *Lagentomum.*

Lagrange's Exterminator. An apparatus for destroying the ectoparasites of poultry. It is a wooden box into which the bird is introduced with its feet tied, its head being kept outside by a special opening. In the box a brimstone match is burned; a few minutes of exposure to this vapor suffice to kill the parasites.

La Grippe (*lah grip*) [Fr.]. Synonym of *Influenza.*

Laisne's Method. A method of abdominal massage. The masseur lays his hands on either side of the abdomen, and executes a firm but not violent double rubbing movement, one hand ascending as the other descends, the principal pressure being made by the thenar and hypothenar prominences; the movements do not extend higher than the transverse colon, or lower than the ileum.

Laity (*la′-it-e*) [λαός, the people]. The non-professional public.

Lake (*lāk*). See *Pigments, Colors, and Dye-stuffs,* and also *Lacus.* **L.-burn.** See *Fardel-bound.* **L.-colored,** applied to blood in which the hemoglobin, having separated from the stroma, is dissolved in the serum.

Lakmoid, Lacmoid (*lak′-moid*) [*lac*, milk; εἶδος, like]. A delicate reagent in alkalimetry, made by acting on resorcin with sodium nitrate.

Lakmus (*lak′-mus*). See *Lacmus.*

Laky (*la′-ke*). See *Lake-colored.*

Lalia (*la′-le-ah*) [λαλιά, talking]. Speech.

Lallation (*lal-a′-shun*) [*lallatio; lallare*, to babble]. Any unintelligible stammering of speech, such as the prattling of a babe. Also, the defect or peculiarity of speech, usually racial, in which *l* is substituted for *r.*

Lalling (*lal′-ing*) [*lallare*, to babble]. Lallation; prattle; baby-talk.

Laloneurosis (*lal-o-nu-ro′-sis*) [λάλος, prattle; νεῦρον, nerve: *pl.*, *Laloneuroses*]. An impairment of speech arising from spasmodic action of the muscles. It includes stammering and aphthongia.

Lalopathy (*lal-op′-ath-e*) [λάλος, speech; πάθος, disease]. Any disorder of speech.

Lalophobia (*lal-o-fo′-be-ah*) [λάλος, prattle; φόβος, fear]. Stutter-spasm, leading to, or complicated with, a dislike of speaking.

Laloplegia (*lal-o-ple′-je-ah*) [λάλος, talking; πλῆξή, a stroke.] Paralysis of speech, not due, however, to paralysis of the tongue.

Lamarckism or the Lamarckian Theory. The doctrine based upon the teachings of the French naturalist, J. B. P. A. de Monet de *Lamarck* (1744-1829), who attempted to explain the progressive evolution of nature by virtue of an inherent tendency to development through the appetency and habits of living organisms, the efforts excited by change of conditions reacting upon the structure. It is based on the theory that matter acted upon by heat, light, and electricity may spontaneously generate life of low, homogeneous organisms, and that such organisms would develop qualities of heterogeneity and organs as governed by their surroundings, and especially by their wants or desires. To this preponderating influence of new wants Lamarck ascribes the chief rôle in evolution, while Darwin emphasizes the advantage of accidental variations in the struggle for existence. See *Neo-lamarckism.*

Lambda (*lam′-dah*) [λάμβδα, the Greek letter λ]. The junction of the sagittal and lambdoid sutures at the apex of the latter. See *Craniometric Points.*

Lambdacism (*lam′-das-izm*) [λαμδακισμός, lambdacism]. 1. Difficulty in uttering the sound of the letter *l.* 2. Too frequent use of the *l* sound, or its substitution for the *r* sound; lallation.

Lambdoid, or Lambdoidal (*lam′-doid* or *lam-doi′-dal*) [λάμβδα, the letter λ; εἶδος, resemblance]. Resembling the Greek letter Λ. **L. Suture,** the suture between the occipital and the two parietal bones.

Lambert's Method. A method of mixing colors by colored wafers and a slip of glass. By means of reflections from the surface of the latter one color may be in part reflected and superimposed on another color.

Lame (*lām*) [ME., *lame*, lame]. Crippled; halting; limping.

Lamel (*lam-el′*) [*lamella*, dim. of *lamina*, a plate]. A medicated disc, made with some soluble basis; it is used in the dosimetric application of drugs to the eye, etc.

Lamella (*lam-el′-ah*) [dim. of *lamina*, a plate: *pl.*, *Lamellæ*]. A descriptive term applied to any foliation or scale-like appearance; a thin lamina, scale, or plate. **L. of Bone,** the concentric rings surrounding the Haversian canals. **L., Bronchial,** one of the folds of the mucosa of the gills of fishes and certain molluscs. **L. carnosa,** that part of the parietal mesoblast from which the muscles of the trunk are developed. **L. ceratina,** the epiblastic layer giving origin to the skin and its appendages. **L. cerebellare,**

one of the laminæ of the cerebellum. **L., Concentric,** one of the plates of bone surrounding the Haversian canals. **L. coriaria,** the part of the somatopleure from which the corium and possibly the cutaneous muscles are developed. **L., Cribriform.** See *Lamina cribrosa.* **L., Fundamental or General,** a general term applied to all varieties of osseous lamellæ. **L., Haversian.** See *L., Concentric.* **L., Homogeneous,** the clear, apparently structureless layer of an osseous lamella. **L., Intermediate,** one of the plates filling the spaces between the concentric layers of bone. **L., Interstitial.** See *L., Intermediate.* **L., Investing.** See *L., Concentric.* **L. medullaris,** the epiblastic layer forming the central nervous system and organs of special sense. **L., Medullary,** the internal lamellæ forming the wall of the medullary cavity of hollow bones. **L. mesenterica,** that portion of the splanchnopleure from which the mesentery, and the muscular and fibrous parts of the intestines are derived. **L. mucosa,** that part of the hypoblast from which the epithelia of the gastrointestinal tract and its glands are developed. **L. of Nail,** an elevation on the corium, dove-tailing into a furrow on the under surface of the nail. **L., Perineural,** the perineurium. **L., Periosteal or Peripheral,** a superficial lamella of bone lying under the periosteum. **L. renalis,** that portion of the mesoblast from which the kidneys and generative organs are developed. **L., Special.** See *L., Concentric.* **L., Striped,** the dark portion of a bone-lamella which has a striped appearance. **L., Triangular,** a fibrous layer connecting the choroid plexuses of the third ventricle of the brain. **L., Vascular.** See *Endochorion.*

Lamellar (*lam-el'-ar*) **Lamellate** (*lam-el'-āt*) [*lamella,* a thin plate]. Having the nature of, or resembling any thin, osseous or membranous tissue; composed of lamellæ or thin plates. **L. Cataract.** See *Cataract.*

Lamelliferous (*lam-el-if'-er-us*) [*lamella,* a thin plate; *ferre,* to bear]. Composed of lamellæ.

Lamelliform (*lam-el'-if-orm*) [*lamella,* a small plate; *forma,* form]. Having the shape of a lamella.

Lamelligerous (*lam-el-ij'-er-us*). See *Lamelliferous.*

Lamelliped (*lam-el'-ip-ed*) [*lamella,* a small plate; *pes,* foot]. Having a flat or lamelliform foot.

Lamellose (*lam'-el-ōs*). See *Lamellar.*

Lamellule (*lam-el'-ūl*) [*lamellula,* dim. of *lamella,* a plate]. A very small plate.

Lameness (*lām'-nes*) [ME., *lame,* lame]. The state of being lame. **L., Cross,** a peculiar gait of horses in which the lameness seems to be in the leg on the opposite side of the one diseased. **L., Kennel,** a rheumatic affection of dogs. **L., Uterine,** weakness of the uterus due to disease.

Lamin (*la'-min*) [*laminum,* the dead-nettle]. An alkaloid said to exist in *Lamium album, q. v.*

Lamina (*lam'-in-ah*) [L., a plate or scale: *pl.,* *Laminæ*]. A descriptive term used to designate foliated structure. Also, any thin layer of bone, membrane, or other tissue. **L., Arcuate** (*of the cerebellum*), a bundle of fibers uniting the contiguous convolutions of the cerebellum. **L., Arcuate** (*of the cerebrum*), a band of fibers uniting adjacent convolutions of the cerebrum. **L. ascendens** (*of the palate bone*), the vertical plate of the palate. **L. axilis,** the primitive streak of the blastoderm. **L., Basal** (*of the placenta*), the decidua serotina. **L., Bowman's,** the structureless membrane between the anterior layers of epithelium and the fibrous tissue of the cornea of the eye. **L. cacuminis,** a narrow band connecting the posterior superior lobes of the cerebellum. **L. of Cerebellum,** the layers of white matter, covered externally with gray substance, that arise from the central white axis of the cerebellum. **L. chrotalis,** the dermal plate or covering. **L. cinerea,** the connecting layer of gray matter between the corpus callosum and the optic chiasma; the terma. **L. cinerea convoluta,** the tuber cinereum. **L. conarii,** the lower lamella of the recess of the pineal gland. **L. concharum,** the inner surface of the lateral masses of the ethmoid bone. **L. connectens,** the posterior cerebral commissure. **L. connectiva,** the *colloderma, q. v.* **L. cortis,** the *membrana tectoria* of the internal ear. **L. cornea,** a thickened band of the ependyma of the lateral ventricle covering the tænia semicircularis. **L., Cribriform,** the cribriform plate of the ethmoid. See also *L. cribrosa of the Temporal Bone.* **L. cribrosa** (*of the choroid*), in lower animals that portion of the choroid which is perforated for the passage of the optic nerve. **L. cribrosa** (*of the fascia lata*), the cribriform fascia covering the saphenous opening. **L. cribrosa anterior,** the anterior perforated space. **L. cribrosa anterior inferior,** the anterior part of the inferior fossula, through which branches of the cochlear nerve pass. **L. cribrosa media,** the middle part of the inferior fossula transmitting the branches of the auditory nerve going to the saccule. **L. cribrosa posterior,** the posterior perforated space. **L. cribrosa of the Sclerotic,** the perforated lamina through which the optic nerve enters the globe of the eye. **L. cribrosa of the Temporal Bone,** a small laminated bone forming the boundary of the internal auditory meatus. **L. of the Cricoid Cartilage,** the flat posterior plate of the cricoid cartilage. **L., Crystalline,** the anterior part of the capsule of the crystalline lens. **L. dentata,** the dentate fascia. **L. denticulata,** the covering of the outer fifth of the vestibular surface of the bony cochlea, from which delicate teeth-like elevations project into the scala vestibuli. **L. dorsalis,** one of the two ridges bordering the medullary groove, that unite to form a canal which finally develops into the cerebro-spinal canal. See *Plates, Medullary.* **L., External Medullary,** the outer of the two white layers of the lenticular nucleus. **L., Fibrocutaneous,** the parietal mesoblast. **L., Fibrointestinal,** the visceral mesoblast. **L. fusca,** the pigmentary tissue of the sclera forming the ectal layer of the perichoroidal sinus. **L. gastralis,** the gastroderma, *q. v.* **L., Gray.** See *L. cinerea.* **L. grisea,** the gray matter of the spinal cord. **L., Internal Medullary,** the inner of the two white layers of the lenticular nucleus. **L., Lateral** (*of the sphenoid bone*), the external pterygoid plate. **L. lentis,** one of the layers of the crystalline lens. **L. mastoidea,** the basal plate of the mastoid process of the temporal bone. **L., Median** (*of the sphenoid bone*), the internal pterygoid plate. **L. medullaris media cerebelli,** the valve of Vieussens. **L. medullaris thalami,** a layer of white matter between the optic thalamus and the internal nucleus of the striate body. **L. medullaris transversa,** a delicate layer of gray matter covering the aqueduct of Sylvius. **L. medullaris triangularis,** the lyra of the fornix. **L. modioli,** the bony lamina spiralis of the cochlea. **L. muscularis,** the myoderma, *q. v.* **L. nervea involvens,** a delicate layer of nerve-matter covering the ventricular surface of the ependyma. **L. neurodermalis,** the epiblast. **L., Nuclear,** the nuclear layer. **L. palatina,** the horizontal plate of the palate bone. **L. papyracea,** the os planum of the ethmoid bone. **L. pedunculorum,** one of the layers of which the crura cerebri are composed. **L. perforata,** either perforated space. **L. pigmenti,** a delicate layer of

pigment-cells between the retina and the choroid. **L., Posterior Elastic,** the posterior layer of the cornea; the membrane of Descemet. **L. prima cutis,** the epidermis. **L. propria** (*of the tympanic membrane*), the middle or fibrous layer of the tympanic membrane. **L., Protovertebral,** that portion of the mesoblast lying to the side of the chorda dorsalis in which the protovertebræ subsequently form. **L. quadrigemina,** a layer of gray matter, forming the roof of the aqueduct of Sylvius. **L. Quadrilateralis,** a term for the *Clivus of Blumenbach*, *q. v.* **L., Reticular,** the hyaline membrane of the inner ear, extending between the conjoined head of Corti's rods and Hensen's supporting cells. **L. secundaria,** one of the secondary germ-layers, *q. v.* **L. semicircularis.** See *Tænia semicircularis.* **L. sphenopetrosa,** a small plate of bone near the spinous foramen of the greater wing of the sphenoid bone. **L. spiralis,** a thin plate in the ear, osseous in the inner part and membranous in the outer, which divides the spiral tube of the cochlea into the *scala tympani* and the *scala vestibuli.* **L. spiralis ossea,** a thin plate of bone that winds spirally around the modiolus of the cochlea. **L. supercho-roidea,** the delicate membrane of the outer surface of the choroid tunic of the eye. **L. tectoria.** See *Lemniscus, Inferior.* **L., Terminal.** 1. See *L. cinerea.* 2. The anterior terminal plate of the anterior brain-vesicle. **L. terminalis.** See *Terma.* **L. triangularis** (*of the sphenoid bone*), the posterior triangular part of the great wing of the sphenoid bone. **L. transversa,** one of the transverse laminæ of the cerebellum. **L., Tympanic,** the tympanic plate of the petrous portion of the temporal bone. **L., Vascular,** the endochorion. **L. of Vertebra.** See *Vertebra.* **L. ventralis,** one of the lateral mesoblastic plates. **L. vitra,** the inner or vitreous table of the skull. **L. visceralis,** one of the thickened layers of mesoblastic tissue on each side of the notochord, which by proliferation and splitting form the splanchnopleure and somatopleure. **L., Vitreous** (*of the choroid*), a homogeneous membrane covering the inner surface of the choroid; it is also called the membrane of Bruch.

Laminæ (*lam′-in-e*) [*lamina*, a thin plate]. The sensitive plates of soft tissue, covering the entire anterior surface of the coffin-bone in the horse. See also *Lamina.*

Laminage (*lahm-in-ahzh′*) [Fr.]. Flattening; the compression or flatwise crushing of the fetal head to facilitate delivery.

Laminal, Laminar (*lam′-in-al, lam′-in-ar*) [*lamina*, a layer]. Composed of laminæ; having the form of a lamina. **L. Tissue,** a synonym of *Connective Tissue.*

Laminaria (*lam-in-a′-re-ah*) [*lamina*, a thin plate]. 1. A genus of algæ, or seaweeds. Several species are rich in iodin. 2. The cured lower part of the stem of *L. cloustoni*, or *L. digitata.* **L. Bougie,** a bougie made of the stalk; it is used for urethral dilatation. **L. cornica, L. digitata,** devil's-apron, tangle; sea-tangle, sea-girdles, or sea-wand; cairn-tangle, dead-man's-toe, oarweed. A species found in Scotland, very rich in iodin; the stem is used for the manufacture of tents and bougies. **L. esculenta,** an edible species said to have anti-scorbutic properties. **L. Probe,** a probe made of the stalk, used to dilate the canaliculi and nasal duct. **L. saccharina,** ribbon-weed; sea-belt, sweet-tangle, is rich in iodin and potash; it is used as food, and is also purgative. **L. Tent,** a tent made of the stem of the plant, for dilatation of the *cervix uteri.*

Laminate, Laminated (*lam′-in-āt, lam′-in-āt-ed*). See *Laminar.*

Lamination (*lam-in-a′-shun*) [*lamina*, a layer]. Arrangement in plates or layers. An operation in embryotomy, consisting in cutting the skull in slices.

Laminectomy (*lam-in-ek′-to-me*) [*lamina*, a layer; ἐκτομή, excision]. The operation of removing the posterior vertebral arches.

Lamineur (*lam-in-ār′*) [*lamina*, a layer]. An instrument for performing laminage, *q. v.*

Laminitis (*lam-in-ī′-tis*) [*lamina*, plate; ιτις, inflammation]. Inflammation of the laminæ of a horse's hoof; founder.

Laminose (*lam′-in-ōs*) [*lamina*, a thin plate]. Thin, membranous, or plate-like.

Lamium (*la′-me-um*) [L., the dead-nettle]. A genus of labiate plants. **L. album,** the leaves and stems of the plant *L. album*, with properties due to an alkaloid, *Lamin.* It is useful in menorrhagia. Dose of the tincture ʒss–ij. Unof.

Lamnar (*lam′-nar*) [*lamna*, a thin plate]. A term applied to nails that are flat, short and broad.

Lamnectomy (*lam-nek′-to-me*). Same as *Laminectomy.*

Lamp [λαμπάς, a lamp]. A vessel containing a liquid capable of burning, and a wick. It is used to give light. **L., Aphlogistic,** a lamp devised by Davy in which glowing platinum furnishes the light. **L.-black,** a fine black substance, almost pure carbon, made by burning coal-oils in an atmosphere deficient in oxygen, or by allowing a gas-flame to impinge on a cold surface. See *Pigments, Conspectus of.* **L., Laryngoscopic,** a small incandescent lamp used in laryngoscopy. One form is provided with reflectors and lenses by means of which light can be projected into the mouth, pharynx, and larynx. **L., Lee's,** a lamp used in mercurial fumigation. **L., Mercurial,** a lamp consisting of two cups, an upper for holding the mercury, a lower for holding water. The latter is heated by means of a Bunsen burner, the water and mercury being both vaporized. **L., Spirit,** one in which alcohol is used to produce heat rather than light. **L., Van Buren's,** a device for mercurial fumigation.

Lampas (*lam′-pas*) [Fr., *lampas*, lampas]. A congestive swelling of the fleshy lining of the roof of the mouth, in the horse.

Lampers (*lam′-perz*). See *Lampas.*

Lamprophony (*lam-proff′-o-ne*) [λαμπρός sounding; φωνή, voice]. A sonorous, ringing quality of the voice.

Lampsana (*lamp-sa′-nah*). See *Lapsana.*

Lampsis (*lamp′-sis*) [λάμψις, a shining]. Splendor, brilliancy.

Lana (*la′-nah*) [L.]. Wool.

Lanate (*lan′-āt*) [λῆνος, wool]. Woolly; lanuginous; lanigerous; lanose.

Lancaster Black-drop. Acetum opii; vinegar of opium.

Lance (*lans*) [*lancea*, a lance or spear]. 1. A lancet. 2. To open, as with a lancet or bistoury. **L., Mauriceau's,** a lance-shaped knife for opening the fetal head in embryotomy.

Lanceate (*lan′-se-āt*) [*lancea*, a lance]. See *Lanceolate.*

Lanceolar (*lan′-se-o-lar*). See *Lanceolate.*

Lanceolate (*lan′-se-o-lāt*) [*lanceola*, a little lance]. In biology, shaped like a lance-head; thin and tapering towards each end.

Lancet (*lan′-set*) [dim. of *lancea*, a lance]. A two-edged surgical instrument for incising tumors, etc. **L., Gum,** a small instrument in which the cutting portion has a convex edge and is at right-angles to the shaft. **L., Spring,** one in which the blade is thrust out by means of a spring, which is controlled by a trigger. **L., Thumb,** one with a double-edged, broad blade.

Lanciform (*lan'-sif-orm*) [*lancea*, lance; *forma*, form]. Lance-shaped.

Lancinate (*lan'-sin-āt*) [*lancinare*, to tear]. To lacerate, to pierce, or tear.

Lancinating (*lan'-sin-a-ting*) [*lancinare*, to tear]. Tearing; shooting. **L. Pains,** rending, tearing, or sharply-cutting pains, common in posterior spinal sclerosis.

Lancing (*lan'-sing*). See *Lance.*

Lancisi, Nerves of. The *striæ longitudinales.* The slight ridges of the callosum of the brain bounding the raphé. See *Nerves, Table of.*

Landmarks (*land'-marks*) [ME., *landmark*, the boundary of a country]. Superficial marks (such as eminences, lines, and depressions) that serve as guides to, or indications of, deeper-seated parts. The knowledge of landmarks is of the utmost importance, both to the surgeon and the physician.

Landolphi's or **Landolfi's Paste.** A caustic application composed of the chlorids of zinc, antimony, bromin, and gold, which is used pure, or weakened by mixing with basilicon ointment in varying proportions. It should be spread on the surface with a spatula, or applied on charpie, and allowed to remain for 24 or 48 hours.

Landolphia (*lan-dol'-fe-ah*) [after Capt. *Landolph*, an explorer]. A genus of tropical climbing shrubs, including the African rubber-tree, a source of caoutchouc.

Landolt's Method. A method of determining insufficiency of the internal recti muscles. A small lamp or candle is surrounded by a blackened chimney, a vertical slit in which serves as an object of fixation. The light is then approximated to the eyes, and when the internal recti are no longer able to maintain the necessary convergence, two images of the slit are seen.

Landouzy-Dejerine Type. A type of muscular atrophy. See *Diseases, Table of.*

Landry's Disease or **Paralysis.** Acute ascending paralysis; a form of atonic paralysis described by Landry, characterized by loss of motor power in the lower extremities, gradually extending to the upper extremities, and to the centers of circulation and respiration, without characteristic sensory manifestations, trophic changes, or variations in electric reaction. See *Diseases, Table of.*

Land-scurvy. See *Purpura hæmorrhagica.*

Landzert, Angle of. See *Angle.*

Lanesin, or **Lanessin** (*lan'-es-in*) [*lana*, wool]. A proprietary preparation of wool-fat similar to lanolin.

Lanfranc's Collyrium. A stimulant application to ulcers, containing aloes and myrrh, each 5 parts; acetate of copper, 10 parts; trisulphid of arsenic, 15 parts; rose-water, 380 parts, and white wine, 1000 parts.

Lang's Oil. See *Gray Oil.*

Lange's Method. A method of testing for CO_2 in the air. It consists in shaking in a bottle full of the air to be tested, a half ounce of clear fresh lime-water. If the air contains 7 parts per 1000 of CO_2, a turbidity of the fluid will occur.

Langenbeck's Operation. See *Operations, Table of.*

Langerhans' Cells. Certain modified epithelial cells forming the simplest nerve-endings. **L.'s Granular Layer,** the stratum granulosum of the epidermis.

Langier's Apparatus. A form of immovable splint for a limb. It is composed of strips of brown paper impregnated with starch-paste. **L.'s Bandage.** See *Bandage.*

Langley, Oxyntic Cells of. See *Delomorphous.* **L.'s Test.** See *Tests, Table of.*

Language (*lang'-gwāj*) [*lingua*, the tongue]. The articulate sounds, signs, or symbols whereby thought is communicated. **L., Center for.** See *Aphasia.*

Languor (*lang'-gwor*) [L., faintness]. Lassitude. Disinclination to take bodily exercise, or to exert oneself.

Laniaries or **Laniary Teeth** (*la'-ne-ar-e-ēz*) [*Dentes laniarii; laniare*, to rend]. The cuspid teeth; applied more particularly to those of carnivorous animals.

Laniariform (*la-ne-ar'-if-orm*) [*laniare*, to rend; *forma*, shape]. Shaped like the canine teeth of carnivora.

Laniary (*la'-ne-a-re*) [*laniare*, to tear, rend]. In biology, applied to well-developed canine or lacerating teeth.

Lanigerous (*lan-ij'-er-us*) [*lana*, wool; *gerere*, to bear]. In biology, producing, or covered with wool or a woolly growth; lanate; lanose; lanuginous.

Lank [ME., *lank*, lank]. Lean, thin, attenuated.

Lanoleum (*lan-o'-le-um*). See *Lanolin.*

Lanolin (*lan'-o-lin*) [*lana*, wool; *oleum*, oil]. A cholesterin-fat obtained from sheep's wool, introduced as a basis for ointments. It does not saponify or become rancid, and is characterized by remarkable penetrative powers.

Lanose (*la'-nōs*) [*lana*, wool]. In biology, woolly; wool-like; lanate.

Lantana (*lan-ta'-nah*) [L.]. A genus of verbenaceous shrubs and herbs, principally natives of tropical America. A few grow native in the U. S. **L. aculeata** is an aromatic stomachic. **L. brasiliensis** and **L. camara** are among the antipyretic species. Unof.

Lantanin (*lan'-tan-in*) [*lantana*]. An alkaloid extractive of *Lantana brasiliensis*, called *Yerba sagrada.* It is asserted to have antiperiodic and antipyretic properties, and has been successfully used in intermittent fevers. Dose, gr. xv–xxx. Unof.

Lantermann's Notches or Segments. Conico-cylindric segments in the medullary sheath of a nerve-fiber; they are marked off from one another by the incisures of Schmidt.

Lantern of Aristotle, or **Aristotle's Lantern.** In biology, the oral skeleton of a sea-urchin. **L.-jaws,** a colloquialism for a long, thin visage.

Lanthanum (*lan'-than-um*), or **Lanthanium** (*lan-tha'-ne-um*) [λανθάνειν, to conceal; lanthanum was a substance concealed from the knowledge of chemists]. A rare metallic element; symbol La., atomic weight, 138. Little is known of its medicinal properties. See *Elements, Table of.*

Lanthopin (*lan'-tho-pin*) [λανθάνειν, to conceal], $C_{23}H_{25}NO_4$. A finely crystalline alkaloid of opium. It occurs in white crystals fusible at 200° C.

Lanuginose, Lanuginous (*lan-u'-jin-ōs, lan-u'-jin-us*) [*lanuginosus*, wooly]. In biology, woolly, downy, lanate, lanose, lanigerous.

Lanugo (*lan-u'-go*) [*lana*, wool]. The down-like hair that appears upon the fetus at about the fifth month of gestation; the downy growth often seen upon the face of women and girls. **L. prima,** the first growth of beard. **L. pudendorium,** pubic hair.

Lap [ME., *lappen;* Gr., λάπτειν, to lap with the tongue]. 1. To lick up. 2. A lick. 3. That part of the body formed by the anterior aspect of the thighs.

Lapactic (*lap-ak'-tik*) [λαπάσσειν, to empty]. 1. Emptying; evacuant. 2. Any purgative substance.

Lapara (*lap'-ar-ah*) [λαπαρός, loose]. 1. The loins; loosely applied to the abdomen. 2. Diarrhea.

Laparacele (*lap'-ar-as-ēl'*). See *Laparocele.*

Laparectomy (*lap-ar-ek'-to-me*). See *Enterectomy.*

Laparelytrotomy (*lap-ar-el-it-rot'-o-me*). Same as *Laparo-elytrotomy.*

Laparocele (*lap'-ar-o-sēl*) [λαπάρα, loin; κήλη, tumor]. Lumbar or abdominal hernia.

Laparocholecystotomy (*lap-ar-o-ko-les-is-tot'-o-me*) [λαπαρα, loin; χολή, bile; κύστις, bladder; τομή, cutting]. Laparotomy conjoined with cholecystotomy.

Laparoclysis (*lap-ar-ok'-lis-is*) [λαπάρα, loin; κλύσις, a drenching]. An injection into the peritoneal cavity.

Laparocolectomy (*lap-ar-o-ko-lek'-to-me*). Same as *Colectomy*.

Laparocolotomy (*lap-ar-o-ko-lot'-o-me*) [λαπάρα, loin; κῶλον, colon; τομή, a cutting]. Inguinal or abdominal colotomy.

Laparocolpotomy (*lap-ar-o-kol-pot'-o-me*). See *Laparo-elytrotomy*.

Laparocystectomy (*lap-ar-o-sis-tek'-to-me*) [λαπάρα, loin; κύστις, cyst, bladder; ἔκτομη, excision]. An operation performed in advanced extrauterine pregnancy for removal of the fetus and the entire sac. It is performed like an abdominal section for any cystic tumor in the abdominal cavity with dense adhesions. The sac is to be evacuated, or not, as indicated, and adhesions separated, if necessary, after ligation.

Laparocystotomy (*lap-ar-o-sis-tot'-o-me*) [λαπάρα, loin; κύστις, cyst, bladder; τομή, a cutting]. 1. Suprapubic cystotomy. 2. An operation in advanced extrauterine pregnancy for the removal of the fetus, the sac being allowed to remain.

Laparo-elytrotomy (*lap-ar-o-el-it-rot' o-me*) [λαπάρα, loin; ἔλυτρον, sheath; τομή, a cutting]. An operation devised by Jörg as a substitute for the Cesarean operation. It consists in an incision over Poupart's ligament, dissecting up the peritoneum until the vagina is reached, when the latter is incised transversely, the cervix dilated, and the child thus extracted above the inlet. Its mortality is about 50 per cent.

Laparo-enterotomy (*lap-ar-o-en-ter-ot'-o-me*) [λαπάρα, loin; ἔντερον, intestine; τομή, a cutting]. An opening of the intestine through an abdominal incision.

Laparogastrotomy (*lap-ar-o-gas-trot'-o-me*) [λαπάρα, loin; γαστήρ, stomach; τομή, a cutting]. The opening of the stomach through an abdominal incision.

Laparohysterectomy (*lap-ar-o-his-ter-ek'-to-me*) [λαπάρα, loin; ὑστέρα, womb; τομή, a cutting]. The removal of the womb through an incision in the abdominal walls.

Laparo-hystero-oöphorectomy (*lap'-ar-o-his'-ter-o-o-off-or-ek'-to-me*) [λαπάρα, loin; ὑστέρα, womb; ᾠοφόρος, ovary; ἐκτομή, a cutting out]. Removal of the womb and ovaries through an incision in the abdominal wall.

Laparohysterotomy (*lap-ar-o-his-ter-ot'-o-me*). See *Gastro-enterotomy*.

Laparo-ileotomy (*lap-ar-o-il-e-ot'-o-me*) [λαπάρα, loin; εἴλειν, to roll; τομή, a cutting]. The formation of an artificial anus in the groin.

Laparokelyphotomy (*lap-ar-o-kel-if-ot'-o-me*) [λαπάρα, loin; κέλυφος, egg-shell; τομή, a cutting]. Same as *Laparocystotomy*.

Laparokolpotomy (*lap-ar-o-kol-pot'-o-me*). See *Laparo-elytrotomy*.

Laparomyitis (*lap-ar-o-mi-i'-tis*) [λαπάρα, loin; μῦς, muscle; ιτις, inflammation]. Inflammation of the muscular portion of the abdominal wall.

Laparomyomectomy (*lap-ar-o-mi-o-mek'-to-me*) [λαπάρα, loin; μῦς, muscle; ἐκτομή, a cutting out]. Removal of a myoma through an abdominal incision.

Laparomyotomy (*lap-ar-o-mi-ot'-o-me*). See *Laparomyomectomy*.

Laparonephrectomy (*lap-ar-o-nef-rek'-to-me*) [λαπάρα, loin; νεφρός, kidney; ἐκτομή, a cutting out]. Nephrectomy by an abdominal incision.

Laparonephrotomy (*lap-ar-o-nef-rot'-o-me*) [λαπάρα, loin; νεφρός, kidney; τομή, a cutting]. Nephrotomy through an abdominal incision.

Laparosalpingectomy (*lap-ar-o-sal-pin-jek'-to-me*) [λαπάρα, loin; σάλπιγξ, tube; τομή, a cutting]. Removal of a Fallopian tube through an abdominal incision.

Laparosalpingotomy (*lap-ar-o-sal-pin-got'-o-me*) [λαπάρα, loin; σάλπιγξ, tube; τομή, a cutting]. 1. Cutting into an oviduct through an abdominal incision. 2. Laparosalpingectomy.

Laparoscope (*lap'-ar-o-skōp*) [λαπάρα, loin; σκοπεῖν, to examine]. An instrument for examining the abdomen.

Laparoscopy (*lap-ar-os'-ko-pe*) [λαπάρα, loin; σκοπεῖν, to examine]. The examination of the abdomen by the stethoscope, plessimeter, or by other instrumental means.

Laparosplenectomy (*lap-ar-o-splen-ek'-to-me*) [λαπάρα, loin; σπλήν, spleen; ἐκτομή, a cutting out]. Removal of the spleen through an abdominal incision.

Laparosplenotomy (*lap-ar-o-splen-ot'-o-me*) [λαπάρα, loin; σπλήν, spleen; τομή, a cutting]. The surgical incision or entrance upon the spleen through the abdominal walls.

Laparotome (*lap'-ar-o-tōm*) [λαπάρα, loin; τομή, a cutting]. A cutting-instrument used in laparotomy.

Laparotomist (*lap-ar-ot'-o-mist*) [λαπάρα, loin; τομή, a cutting]. A surgeon who performs laparotomy.

Laparotomy (*lap-ar-ot'-o-me*) [λαπάρα, loin; τομή, a cutting]. 1. Surgical incision through the abdominal wall; celiotomy. 2. Surgical entrance into the abdominal cavity through the loin or flank. (The definition first given is that offered by most lexicographers, and is in accord with common usage; but objection has been made to this use of the word. The second definition is believed to represent the etymologically more correct use of the term.) **L., Conservative,** abdominal section, with a view either to aspiration of the distended Fallopian tubes, or to breaking down adhesions and freeing the diseased uterine appendages.

Laparotyphlotomy (*lap-ar-o-tif-lot'-o-me*). Synonym of *Typhlotomy*.

Laparovaginal (*lap-ar-o-vaj'-in-al*) [λαπάρα, loin; *vagina*, sheath]. Pertaining to the abdomen and the vagina.

Laparysterotomy (*lap-ar-is-ter-ot'-o-me*). Same as *Laparohysterotomy*.

Lapaxis (*lap-aks'-is*) [λάπαξις, evacuation]. Evacuation.

La Perlèche. See *Perlèche*.

Lapides cancrorum (*lap'-id-ēz kang-kro'-rum*) [L.]. See *Crab's-eyes*.

Lapidillum (*lap-id-il'-um*) [dim. of *lapis*, stone]. A scoop for removing stones from the bladder.

Lapidose (*lap'-id-ōs*) [*lapis*, a stone]. In biology, inhabiting stony places.

Lapillation (*lap-il-a'-shun*) [*lapillus*, a small stone]. The formation of stones; lithogenesis, *q. v.*

Lapis (*la'-pis*) [L., a rock]. An alchemic term applied to any non-volatile substance. **L. dentium,** tartar of the teeth; salivary calculus. **L. divinus,** aluminated copper; a preparation used in ophthalmology. It is made by fusing together 32 parts each of cupric sulphate, potassium nitrate, and alum, and adding a mixture of 2 parts each of camphor and alum. **L. imperialis,** silver nitrate. **L. lazuli,** a beautiful blue stone of complex composition, formerly employed as a purgative and emetic, and in epilepsy. **L. lunaris,** silver nitrate. **L. mitigatus.** See *Argentum*. **L. mutabilis.** See *Tabasheer*. **L. nauticus,** a lode-stone.

Laplace's Formulæ. 1. For preparing acid sublimate solution, 1 to 1000: Take of bichlorid of mercury, 1 gram; nitric acid, 5 grams; water 1000 grams. 2. For preparing acid sublimate tablets: Take of bichlorid of mercury, 1 gram; tartaric acid, 5 grams. Make into one tablet. This is to be dissolved in one liter (1000 grams) of water. 3. Acid sublimate gauze is prepared by dipping the gauze in the foregoing solution, wringing it out, and allowing it to dry in a clean atmosphere.

Lappa (*lap'-ah*) [L.: *gen.*, *Lappæ*]. Burdock. The root of the common burdock, *Arctium lappa*, contains a bitter principle, a resin, and tannin. It is aperient and diuretic and has some reputation as an alterative in constitutional blood-diseases. A tincture of the seed has been recommended in skin-diseases. The dose of the root is ʒj–ij, in infusion or tincture; of the fluid extract, ♏x–ʒj.

Lappaceous (*lap-a'-she-us*) [*lappa*, a bur]. In biology, bur-like.

Lappet (*lap'-et*) [ME., *lappet*, lappet]. In biology, the wattle of a bird.

Lapsana (*lap'-san-ah*) [λαψάνη, an eatable herb]. A genus of composite plants. **L. communis**, was formerly used as a laxative and in skin-diseases.

Lapsus (*lap'-sus*) [*labi*, to fall]. A fall; ptosis. **L. palpebræ superioris**, ptosis of the eyelid. **L. pilorum**, alopecia. **L. unguium**, falling of the nails.

Larch [ME., *larche*, larch]. See *Larix* and *Tamarac*.

Larcher's Sign. See *Death*.

Lard and Lard-oil [ME., *larden*, lard]. Adeps. The fat of the pig melted by gentle heat and strained. Crude lard is white, granular, and of the consistency of a salve, of faint odor and sweet, fatty taste. Its specific gravity is .938 to .940 at 15° C. Exposed to the air it becomes yellowish and rancid. When compressed at 32° F., it yields 62 parts of colorless lard-oil and 38 parts of compact lard. Lard is used in cooking; lard-oil for greasing wool, as a lubricant, and an illuminant.

Lardaceïn (*lar-da'-se-in*) [ME., *larden*, lard]. An animal proteid, an indigestible amyloid substance, chiefly occurring as a pathologic infiltration into various organs, as the liver, or spleen.

Lardaceous (*lar-da'-she-us*) [ME., *larden*, lard]. See *Amyloid*. **L. Kidney.** See *Bright's Disease*.

Larinoid (*lar'-in-oid*) [λαρινός, fat; εἶδος, like]. Lardaceous; as larinoid carcinoma.

Larix (*la'-riks*) [L., *gen. Laricis*]. Larch. The dried bark of *Larix europæa*, the European larch, similar in action to balsamic and terebinthinate remedies. It is expectorant, stimulant, and astringent. **L., Tinct.** (B.P.) Dose ♏xx–xxx. See, also, *Tamarac*.

Larkspur (*lark'-spur*). The seed of *Delphinium consolida*, a diuretic and emmenagogue. Dose of the fld. ext., ♏j–x. Unof.

Larnaude's Disinfecting-fluid. A solution of zinc sulphate containing a little copper sulphate.

Larrey's Amputation. See *Operations, Table of*. **L.'s Apparatus**, a form of immovable dressing made by saturating the bandages in a mixture of camphorated spirit, lead-water, and white of egg. **L.'s Bandage.** See *Bandage*.

Lartigue's Pills. Pills used in the treatment of gout, containing compound extract of colchicum 20 parts, and extract of digitalis, one part.

Larva (*lar'-vah*) [*larva*, a ghost: pl. *Larvæ*]. The young stage of such animals as undergo transformation. The form that insects take in emerging from the egg, commonly known as the caterpillar or "grub" stage. Also, applied to the immature form distinguishing many of the lower vertebrates before maturity. **L., Lovèn's,** the young of the marine worm *polygordius*. **L., Müller's,** the free-swimming young of the polyclad platodes, *Thysanozoön* and *Yungia*.

Larvaceous (*lar-va'-she-us*), **Larval** (*lar'-val*) [*larva*, a mask]. Covering the face like a mask.

Larval [*larva*, a ghost]. 1. Pertaining to or existing in the condition of a larva. 2. Same as *Larvaceous*. **L. Paludism.** See *Dumb Ague*. **L. Pneumonia.** See *Pneumonia*. **L. Scarlatina**, a mild case of scarlet fever in which the rash is absent.

Larvate (*lar'-vāt*) [*larvatus*, masked]. Concealed; masked; applied to diseases and conditions that are hidden by more obvious conditions, or by some peculiarity of their symptoms.

Larviform (*lar'-vif-orm*) [*larva*, a larva; *forma*, shape]. Resembling or being a larva.

Larvigerous (*lar-vij'-er-us*) [*larva*, ghost, mask; *gerere*, to carry]. In biology, bearing the larval skin.

Larviparous (*lar-vip'-ar-us*) [*larva*, larva; *parere*, to bring forth]. In biology, bringing forth young that have reached the larval state.

Larvivorous (*lar-viv'-or-us*) [*larva*, larva; *vorare*, to devour]. In biology, feeding on larvæ.

Laryngalgia (*lar-in-gal'-je-ah*) [λάρυγξ, larynx; ἄλγος, pain]. Pain or neuralgia of the larynx.

Laryngeal (*lar-in'-je-al*) [λάρυγξ, larynx]. Pertaining to the larynx. **L. Artery.** See *Arteries, Table of*. **L. Cough**, an hysteric manifestation in young women. It is a paroxysmal cough, with a peculiar hoarse and muffled sound, like the barking of a dog. **L. Crisis**, an acute laryngeal spasm, occurring in the course of tabes dorsalis. **L. Dilator**, an instrument designed to dilate the larynx, when the latter has become constricted by cicatricial tissues, or from other causes. **L. Edema**, infiltration of a fluid or semi-fluid into the submucous connective tissue of the larynx. It is usually associated with some disease or injury of the larynx, and occurs mainly between the eighteenth and thirty-fifth years. It is characterized by dyspnea and dysphagia. **L. Epilepsy**, a peculiar neurosis of the larynx characterized by a sense of suffocation during sleep. There is no discoverable lesion. **L. Mirror**, a small circular, silvered-glass mirror used in laryngoscopy. **L. Nerve.** See *Nerves, Table of*. **L. Paralysis**, a loss of power of some or of all of the muscles of the larynx. **L. Pouch.** See *Pouch*. **L. Reflex.** See *Reflexes, Table of*. **L. Spaces**, the upper, middle, and lower parts into which the larynx may be conveniently divided. **L. Vertigo.** See *Vertigo* and *L. Epilepsy*.

Laryngectomy (*lar-in-jek'-to-me*) [λάρυγξ, larynx; ἐκτομή, a cutting out]. An operation for the extirpation of the larynx.

Laryngemphraxis (*lar-in-jem-fraks'-is*) [λάρυγξ, larynx; ἔμφραξις, stoppage]. Closure or obstruction of the larynx.

Laryngismal (*lar-in-jiz'-mal*) [λαρυγγίζειν, to vociferate]. Relating to laryngismus.

Laryngismus (*lar-in-jiz'-mus*) [λαρυγγίζειν, to vociferate]. A term loosely applied to various spasmodic affections of the larynx, such as epileptic spasm. See *Laryngeal Epilepsy*. **L. paralyticus**, a paralysis of the recurrent laryngeal nerve in horses, producing the affection called "roaring." **L. stridulus**, laryngospasm; spasmodic croup; spasm of the glottis. A spasmodic affection of the larynx, mainly confined to the early period of childhood. There is a sudden arrest of respiration, with increasing cyanosis, followed by long, loud crowing inspirations. This affection occurs in rachitic children and especially in such as are of the neurotic tendency. The attack may be severe enough to terminate life.

Laryngitis (*lar-in-ji'-tis*) [λάρυγξ, larynx; ιτις, inflammation]. A catarrhal inflammation of the larynx accompanied by sore-throat, hoarseness, and, usually, painful deglutition and cough. In severe cases there may be edema, dyspnea, and suffocation. In infants it is much the same disease as catarrhal croup. It also accompanies malignant affections of the throat and trachea, such as diphtheria, carcinoma, etc. **L., Atrophic,** a chronic form with atrophy of the mucous membrane. **L. catarrhalis,** catarrhal inflammation of the larynx. **L., Croupous.** See *Croup.* **L., Diphtheric.** See *Croup.* **L., Dry,** a chronic form in which the secretion is small or dries into crusts. **L., Edematous.** See *Laryngeal Edema.* **L., Fetid,** a form with a sticky exudate that decomposes. **L., Follicular,** a form in which the mucous glands are involved. **L., Glandular.** See *L., Follicular.* **L., Granular.** See *L., Follicular.* **L., Hypertrophic,** a chronic form with hypertrophy of the tissues. **L., Membranous.** See *Diphtheria.* **L., Parenchymatous.** See *L., Phlegmonous.* **L., Phlegmonous.** See *Laryngeal Edema.* **L., Polypous,** a form characterized by the presence of polyps. **L., Pseudo-membranous,** an inflammation of the laryngeal mucous membrane characterized by the presence of a pseudo-membrane of a whitish-gray color, of varying consistency, and different degrees of attachment. It is usually met with between the second and seventh years. There is a paroxysmal cough, with hoarseness and increasing dyspnea, with occasional attacks of suffocation. Death frequently results. **L., Serous.** See *Laryngeal Edema.* **L., Simple,** a subacute catarrhal laryngitis. **L., Spasmodic,** a form in which there is spasm of the glottis. **L., Stridulous,** laryngitis with stridor. **L., Submucous.** See *L., Phlegmonous* and *Laryngeal Edema.* **L., Suffocative,** diphtheria. **L., Tuberculous,** laryngeal tuberculosis. A chronic, usually painful, inflammation of the larynx due to the development of "tubercles." There may be infiltration, ulceration, and destruction of the cartilages. **L., Ulcerative,** characterized by the presence of ulcers.

Laryngocace (*lar-in-gok'-as-e*) [λάρυγξ, larynx; κακός, bad]. See *Croup.*

Laryngocentesis (*lar-in-go-sen-te'-sis*) [λάρυγξ, larynx; κέντησις, puncture]. Surgical puncture or incision of the larynx.

Laryngo-fissure (*lar-in'-go-fish'-ūr*) [λάρυγξ, larynx; *fissura*, from *findere*, to cleave]. Division of the larynx for the removal of tumors or foreign bodies.

Laryngography (*lar-in-gog'-ra-fe*) [λάρυγξ, larynx; γράφειν, to write]. A description of the larynx.

Laryngologic, Laryngological (*lar-in-go-loj'-ik, lar-in-go-loj'-ik-al*) [λάρυγξ, larynx; λόγος, science]. Pertaining to laryngology.

Laryngology (*lar-in-gol'-o-je*) [λάρυγξ, larynx; λόγος, science]. The anatomy, physiology, and pathology of the larynx.

Laryngometry (*lar-in-gom'-et-re*) [λάρυγξ, larynx; μέτρον, measure]. The systematic measurement of the larynx.

Laryngonecrosis (*lar-in'-go-ne-kro'-sis*) [λάρυγξ, larynx; νέκρωσις, death]. Necrosis of any portion of the larynx.

Laryngoparalysis (*lar-in'-go-par-al'-is-is*) [λάρυγξ, larynx; παράλνσις, palsy]. Loss of the voice or paralysis of the vocal bands from nervous affections, and not from local disease.

Laryngopathy (*lar-in-gop'-ath-e*) [λάρυγξ, larynx; πάθος, a suffering]. Any disease of the larynx.

Laryngophantom (*lar-in-go-fan'-tum*) [λάρυγξ, larynx; φαντός, visible]. An artificial larynx designed for illustrative purposes.

Laryngo-pharyngeal (*lar-in'-go-far-in'-je-al*) [λάρυγξ, larynx; φάρυγξ, pharynx]. Pertaining conjointly to larynx and pharynx.

Laryngo-pharynx (*lar-in'-go-far'-inks*) [λάρυγξ, larynx; φάρυγξ, pharynx]. The inferior portion of the pharynx. It extends from the greater cornua of the hyoid bone to the inferior border of the cricoid cartilage.

Laryngophony (*lar-in-goff'-o-ne*) [λάρυγξ, larynx; φωνή, voice]. The sound of the voice observed in auscultation of the larynx with the stethoscope; also, the sound of the voice observed in auscultation of a large cavity in the lung.

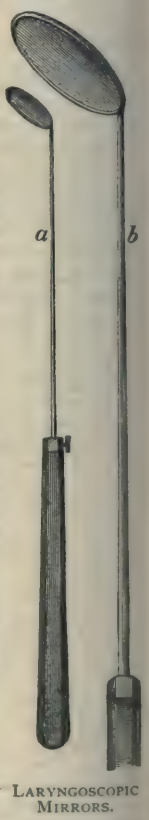
Laryngophthisis (*lar-in-goff'-this-is*) [λάρυγξ, larynx; φθίσις, wasting]. Laryngeal tuberculosis.

Laryngoplasty (*lar-in'-go-plas-te*) [λάρυγξ, larynx; πλάσσειν, to shape]. Plastic surgery or operation upon the larynx.

Laryngoplegia (*lar-in-go-ple'-je-ah*) [λάρυγξ, larynx; πληγή, stroke]. Paralysis of one or more muscles of the larynx.

Laryngorrhagia (*lar-in-gor-a'-je-ah*) [λάρυγξ, larynx; ῥηγνύναι, to burst forth]. Hemorrhage from the larynx.

Laryngorrhea (*lar-in-gor-e'-ah*) [λάρυγξ, larynx; ῥοία, a flow]. Excessive secretion of the laryngeal mucosa, especially on attempting to use the organ.



Laryngoscope (*lar-in'-go-skōp*) [λάρυγξ, larynx; σκοπεῖν, to examine]. An instrument for examination of the interior of the larynx.

Laryngoscopist (*lar-in-gos'-ko-pist*) [λάρυγξ, larynx; σκοπεῖν, to examine]. An expert in laryngoscopy.

Laryngoscopy (*lar-in-gos'-ko-pe*) [λάρυγξ, larynx; σκοπεῖν, to examine]. Examination of the interior of the larynx by means of the laryngoscope.

Laryngospasm (*lar-in'-go-spazm*) [λάρυγξ, larynx; σπασμός, spasm]. Spasmodic contraction or closure of the glottis; spasmodic croup, as distinguished from inflammatory croup.

Laryngospasmopsellismus (*lar-in-go-spaz-mop-sel-iz'-mus*) [λάρυγξ, larynx; σπασμός, spasm; ψελλισμός, stammering]. Spasmodic stammering of laryngeal origin, without the utterance of words.

LARYNGOSCOPIC MIRRORS.
a Small. *b*. Large.

Laryngostasis (*lar-in-go-stas'-is*) [λάρυγξ, larynx; στάσις, stagnation]. Synonym of *Croup.*

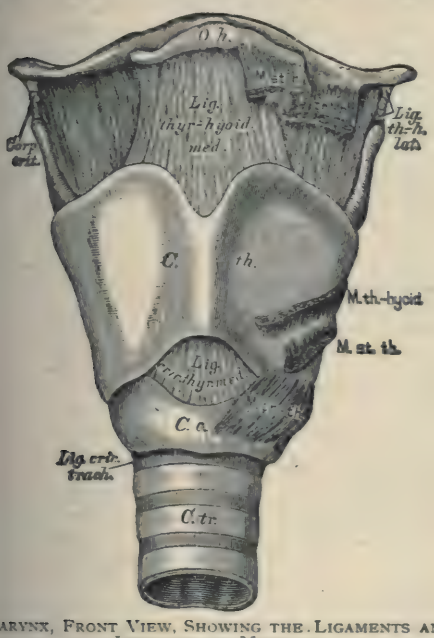
Laryngo-stenosis (*lar-in'-go-ste-no'-sis*) [λάρυγξ, larynx; στένωσις, contraction]. Contraction in size or in caliber of the larynx.

Laryngosyrinx (*lar-in-go-si'-ringks*) [λάρυγξ, larynx; σῦριγξ, pipe: *pl., Laryngosyringes*]. A laryngeal tube.

Laryngotome (*lar-in'-go-tōm*) [λάρυγξ, larynx; τομή, a cutting]. A cutting-instrument used in laryngotomy.

Laryngotomy (*lar-in-got'-o-me*) [λάρυγξ, larynx; τεμνειν, to cut]. The operation of incision of the larynx. **L., Complete,** incision of the larynx through its whole length. **L., Median,** incision into the larynx through the thyroid cartilage. **L., Subhyoid,** incision into the larynx through the thyro-hyoid membrane. **L., Superior,** and **L., Thyro-hyoid,** incision into the larynx through the thyro-hyoid membrane.

Laryngo-tracheal (*lar-in'-go-tra'-ke-al*) [*λάρυγξ*, larynx; *τραχεῖα*, the windpipe]. Pertaining conjointly to the larynx and the trachea.



Laryngotracheitis (*lar-in-go-tra-ke-i'-tis*) [*λάρυγξ*, larynx; *τραχεῖν*, windpipe; *ιτις*, inflammation]. Inflammation of the larynx and the trachea.

Laryngotracheopyra (*lar-in-go-tra-ke-op'-ir-ah*). Synonym of *Croup*.

Laryngotracheotomy (*lar-in-go-tra-ke-ot'-o-me*) [*λάρυγξ*, larynx; *τραχεῖα*, windpipe; *τομή*, cutting]. That form of the operation of tracheotomy in which the cricoid cartilage, and one or more of the upper rings of the trachea are divided.

Laryngo-typhoid (*lar-in'-go-ti'-foid*), **Laryngotyphus** (*lar-in'-go-ti'-fus*) [*λάρυγξ*, larynx; *τῦφος*, smoke]. Typhoid fever associated with marked laryngeal complications.

Larynx (*lar'-inks*) [*λάρυγξ*, larynx]. The upper part of the air-passage between the trachea and the base of the tongue. It comprises three single cartilages, the

LARYNX, FRONT VIEW, SHOWING THE LIGAMENTS AND INSERTION OF MUSCLES.

O. h. Os hyoides. *C. th.* Thyroid cartilage. *Corp. trit.* Corpus triticeum, or lesser cornu of the hyoid bone. *C. c.* Cricoid cartilage. *C. tr.* Tracheal cartilage. *Lig. thyr.-hyoid med.* Middle thyro-hyoid ligament. *Lig. th.-h. lat.* Lateral thyro-hyoid ligament. *Lig. cric.-thyr. med.* Middle crico-thyroid ligament. *Lig. cric.-trach.* Crico-tracheal ligament. *M. st.-h.* Sterno-hyoid muscle. *M. th.-hyoid.* Thyro-hyoid muscle. *M. st.-th.* Sterno-thyroid muscle. *M. cr.-th.* Crico-thyroid muscle.

thyroid, the cricoid; and the epiglottis, and three pairs of cartilages, the arytenoids and those of Santorini and Wrisberg. It is lined by an extremely sensitive mucosa, which is thrown into two transverse, lipped folds that constitute the vocal bands.

Lascivious (*las-iv'-e-us*) [*lascivia*, wantonness]. Libidinous. Wanton: Having an unlawful desire.

Laser (*la'-ser*) [L.]. 1. A gum-resin highly prized by the ancients; probably the same as *Asadulcis*, *q. v.* 2. The resin of *Laserpitium latifolium*. Unof.

Laser, Bacillus of. See *Bacteria*, *Synonymatic Table of*.

Laserpitium (*las-er-pish'-e-um*) [L.]. A genus of resinous and umbelliferous old-world herbs, various species of which have been employed in medicine. **L. latifolium**, or laserwort, is tonic and stimulant; its root abounds in a cathartic gum-resin. Unof.

Lash [ME., *lashe*, the flexible end of a whip]. An eye-lash.

Lassaigne's Test. See *Semen* and *Tests*, *Table of*.

Lassar's Paste. A paste used in the treatment of erythema intertrigo. It consists of salicylic acid 30 grains, oxid of zinc and powdered starch each 6 drams, vaselin 2 ounces. This is spread over the involved area. It is curative and affords protection from discharges.

Lassitude (*las'-it-ūd*) [*lassitudo*; *lassus*, tired]. A state of exhaustion or weakness, arising from causes other than fatigue.

Lasso-cell. One of the peculiar filiferous cell-like structures of celenterates, having the power of throwing out with great rapidity the contained thread, which produces a stinging sensation when brought in contact with the skin; a nettling-cell; an urticating organ.

Lata, or Latah (*la'-tah*) [Jav.]. An hysteric neurosis locally prevalent in Java, nearly identical with the disorder of the jumpers in Maine and Canada, and with the myriachit of Siberia. The will and the motor centers appear to lack coördination, and the patient becomes to some extent obedient to the will of others, in spite of his own volitions. See *Palmus* and *Chorea*, *Automatic*.

Latebra (*lat'-eb-rah*) [*latebra*, a hiding-place: *pl.*, *Latebræ*]. In biology, the central space of the food-yolk of a meroblastic ovum.

Latebricole (*lat-eb'-rik-ol*) [*latebra*, a hiding-place; *colere*, to dwell]. In biology, inhabiting a hiding-place, as certain spiders, crabs, etc.

Latency (*la'-ten-se*) [*latere*, to be hid]. The condition of being latent or concealed.

Latent (*la'-tent*) [*latere*, to be hid]. Concealed. Not manifest. In physics, applied to heat that apparently disappears when a liquid is vaporized or a solid melted. **L. Period**, the time required for the incubation of a disease. **L. Squint.** See *Insufficiency*.

Laterad (*lat'-er-ad*) [*latus*, the side; *ad*, to]. Toward the lateral aspect.

Lateral (*lat'-er-al*) [*lateralis*, belonging to the side]. At, belonging to, or pertaining to the side. Situated on either side of the median vertical plane. See *Position and Direction*, *Table of*. **L. Column**, that column of the spinal cord between the ventral and dorso-lateral fissures. **L. Ginglymus**, an articulation in which a pivot turns within a ring or a ring around a pivot. **L. Laparo-nephrectomy**, Langenbuch's operation. See *Operations*, *Table of*. **L. Line**, in biology, a very delicate organ of sense, usually tubular, that runs along each side of almost all fishes. According to M. de Sède, it is sensitive to the faintest movements of the water, giving the fish continual information as to the state of the medium in which it lives. **L. Operation**, that form of operation in lithotomy in which the opening is made on the right or left side of the perineum. **L. Organs.** See *Organs*. **L. Plates**, the part of the mesoblast lying external to the protovertebræ. **L. Sclerosis, Amyotrophic**, a disease of the lateral columns and anterior gray matter of the cord. It is characterized by motor weakness and a spastic condition of the limbs, associated with atrophy of the muscles and final involvement of the nuclei in the medulla oblongata. The cause is unknown, and death may result in from two to three years. **L. Sclerosis, Primary**, *Spasmodic Tabes dorsalis*; *Spasmodic Spinal Paralysis*; *Spastic Paraplegia*; a sclerotic disease of the crossed pyramidal tracts of the cord characterized by paralysis of the limbs, with rigidity, increased

tendon-reflexes, and absence of sensory and nutritive disorders. A peculiar characteristic jerking gait is produced, and clonus of the limb may be readily excited. Males are most frequently affected, and the disease occurs usually between the ages of twenty and fifty. Syphilis, exposure, and traumatism are mentioned as causes. The duration is long. **L. Sclerosis, Secondary,** the descending degeneration that takes place in the lateral columns of the spinal cord after and below lesions of the cerebro-spinal axis. **L. Sinuses,** the two veins of the dura mater situated in the attached margin of the tentorium cerebelli. **L. Ventricles.** See *Ventricle*.

Laterality (*lat-er-al'-it-e*) [*lateralis*, belonging to the side]. Excessive development on one side.

Lateralization (*lat-er-al-iz-a'-shun*) [*lateralis*, lateral]. The localization of a disease upon one or the other side of the body.

Lateralized (*lat'-er-al-īzd*) [*lateralis*, lateral]. Localized on one side; directed to one side.

Lateren (*lat'-er-en*) [*latus*, side]. Belonging to the lateral aspect in itself.

Latericious, Lateritious (*lat-er-ish'-us*) [*lateritius; later*, brick]. Pertaining to an urinary sediment resembling brick-dust.

Latericorn (*lat'-er-ik-orn*) [*latus*, side; *cornu*, horn]. In biology, one of the lateral pieces of the bill-sheath of certain birds.

Latericumbent (*lat-er-ik-um'-bent*) [*latus*, side; *cumbere*, to lie]. Lying on the side.

Lateriflection, Lateriflexion (*lat-er-if-lek'-shun*). See *Lateroflection*.

Laterifolius (*lat-er-if-o'-le-us*) [*latus*, side; *folium*, a leaf]. In biology, growing alongside of a leaf.

Laterigrade (*lat'-er-ig-rād*) [*latus*, side; *gradus*, step]. Progressing sideways.

Laterinerved (*lat'-er-in-ervd*) [*latus*, side; *nervus*, nerve]. In biology, applied to such leaves as have lateral nerves.

Laterirectus (*lat-er-ir-ek'-tus*) [*latus*, side; *rectus*, straight]. The rectus capitis lateralis muscle. See *Muscles, Table of.*

Lateriversion (*lat-er-iv-er'-shun*). See *Lateroversion.*

Latero-abdominal (*lat-er-o-ab-dom'-in-al*) [*latus*, side; *abdominalis*, pertaining to the abdomen]. Pertaining both to the side and the abdomen. **L. Posture,** Sims' posture. See *Postures, Table of.*

Laterocaudal (*lat-er-o-kaw'-dal*) [*latus*, side; *cauda*, tail]. In biology, situated laterally and posteriorly.

Latero-cervical (*lat-er-o-ser'-vik-al*) [*lateralis*, lateral; *cervix*, the neck]. At or about the side of the neck.

Laterodorsal (*lat-er-o-dor'-sal*) [*latus*, side; *dorsum*, back]. In biology, placed at one side of the upper surface.

Lateroflection, or **Lateroflexion** (*lat-er-o-flek'-shun*) [*lateralis*, lateral; *flectere*, to bend]. Flexion or bending to one side.

Lateromarginal (*lat-er-o-mar'-jin-al*) [*latus*, side; *margo*, edge]. Placed on the lateral edge.

Lateronuchal (*lat-er-o-nu'-kal*) [*latus*, side; *nucha*, nape]. Situated at the side of the nape of the neck.

Lateropulsion (*lat-er-o-pul'-shun*) [*lateralis*, lateral; *pellere*, to drive]. An involuntary motion or bearing to one side; a symptom in certain central neuroses.

Lateroretroversion (*lat-er-o-re-tro-ver'-shun*) [*lateralis*, lateral; *retro*, backward; *vertere*, to turn]. Retroversion (of the uterus), with deviation to one side.

Laterostigmatal (*lat-er-o-stig'-mat-al*) [*latus*, side; *stigma*, a mark]. In entomology, located on the side of the body above the stigmata.

Lateroversion (*lat-er-o-ver'-shun*) [*latus*, side; *vertere*, to turn]. A term applied to the deviation of the uterus from the central position. It may be quite consistent with health and require no treatment

Latex (*la'-teks*) [L., liquid: *pl.*, *Latices*]. The sap or the juice of the tubes or vessels of plants. **L.-cells,** cells giving rise to latex or milky juice.

Latham's Theory. A theory as to the constitution of the proteid molecule; it claims that the living proteid is composed of a chain of cyanalcohols, or cyanhydrins, as they are sometimes termed, united to a benzene nucleus.

Lathyrin (*lath'-ir-in*) [λάθυρις, pulse]. A bitter extractive of lathyrus.

Lathyrism (*lath'-ir-izm*) [λάθυρις, pulse]. Lupinosis; an affection, observed only in males, produced by the use of meal from varieties of vetches, chiefly the *Lathyrus sativus* and *L. cicera*. The grain is popularly known as the chick-pea. It gives rise to a form of spastic paraplegia, with tremor, involving chiefly the legs, and this may proceed to complete paraplegia. There is exaggeration of the knee-jerk and ankle-clonus. The arms are rarely, if ever, affected. It appears to be a slow sclerosis induced by this toxic agent.

Lathyrus (*lath'-ir-us*) [λάθυρις, pulse]. A genus of leguminous plants. **L. cicera,** a species of vetch, commonly known as "chick-pea." **L. sativus.** See *Lathyrism.*

Latibulum (*la-tib'-u-lum*) [L., *latere*, to lie hid]. A lurking-place for disease, infection, or poison.

Laticiferous (*lat-is-if'-er-us*) [*latex*, liquid; *ferre*, to bear]. In biology, producing or containing latex, or milky juice.

Laticostate (*lat-ik-os'-tāt*) [*latus*, broad; *costa*, rib]. Having broad ribs.

Latifia (*la-tif-e'-ah*) [Cf. *Ratafia*]. An alcoholic liqueur, or aromatic cordial, with tonic drugs, as gentian, cherry-bark, quassia, and rhubarb; it is called also Dutch bitters.

Latifoliate (*lat-if-o'-le-āt*) [*latus*, broad; *folium*, a leaf]. Broad-leaved.

Latipennate (*lat-ip-en'-āt*) [*latus*, broad; *pennatus*, winged]. In biology, broad-winged.

Latipennine (*lat-ip-en'-in*). Same as *Latipennate.*

Latissimus (*lat-is'-im-us*) [superl. of *latus*, wide]. An adjective signifying widest. It is used as descriptive of certain muscles. **L. colli.** See *Muscles (Platysma myoides), Table of.* **L. dorsi.** See *Muscles, Table of.*

Latrine (*la-trēn'*) [Fr.]. A water-closet or privy, especially one in a public place or institution.

Lattice-work of the Thalamus. The formatio reticularis, *q. v.*

Latus (*la'-tus*) [L.]. Broad. **L. ani,** synonym of *Levator ani.* See *Muscles, Table of.*

Laudable (*law'-da-bl*) [*laudabilis*, or *laudandum*, praiseworthy]. Formerly, indicative of a healthy or improving condition; characterizing an active inflammation, as *laudable* pus. (Obs.).

Laudanin (*law'-dan-in*) [λάδανον, a gum], $C_{20}H_{25}NO_4$. One of the alkaloids of opium. It is soluble in chloroform and in alkaline solutions.

Laudanosin (*law-dan'-o-sin*) [λάδανον, a gum], $C_{21}H_{27}NO_4$. A crystallizable alkaloid of opium.

Laudanum (*lod'-an-um*) [derivation undetermined: by some derived from *laudatum medicamentum*, the praiseworthy drug; by others from *laude dignum*, worthy of praise; by others, again, from *Ladanum*]. Tinctura opii. See *Opium.* **L., Liquid.** Synonym of *Vinum opii.* See *Opium.* **L., Rousseau's,** a preparation used in Belgium, France, and Mexico, consisting of opium, honey, beer-yeast, water, and alcohol. **L.**

Sydenham's. Synonym of *Vinum opii.* **L., Warner's,** an ammoniated tincture of opium. Unof.

Laugh (*lahf*) [ME., *laughen*, to laugh]. 1. To make an audible expression of mirth. 2. The audible expression of mirth. **L., Canine, L., Sardonic.** Synonyms of *Risus sardonicus, q.v.*

Laughing, or **Laughter** (*lahf'-ing, lahf'-ter*) [ME., *laughen*, to laugh]. A succession of rhythmic, spasmodic expirations with open glottis and vibration of the vocal bands. **L. Gas,** nitrous oxid, or protoxid of nitrogen. See *Nitrous Oxid* and *Anesthetics.* **L. Muscle,** the risorius. See *Muscles, Table of.*

Laugier's Hernia. See *Hernia* and *Diseases, Table of.*

Laumonier's Ganglion. The superior carotid ganglion.

Laurel (*law'-rel, lor'-el*) [*laurus*]. See *Cherry-laurel, California Laurel, Great Laurel, Kalmia, Laurus.* **L.-water,** aqua laurocerasi. See *Cherry-laurel.*

Laurer, Canal of. See *Canal.*

Laurin (*law'-rin*) [*laurus*, laurel], $C_{22}H_{30}O_3$. A fatty, crystallizable substance obtainable from the berries of the European laurel, *Laurus nobilis.*

Lauro-cerasus (*law-ro-ser'-as-us*) [*laurus*, laurel; *cerasus*, cherry-tree]. See *Cherry-laurel.* **Laurocerasi folia,** the leaves of the European cherry-laurel.

Laurus (*law'-rus*) [L.]. A genus of old-world trees and shrubs; the true laurels. Formerly the plants that produce benzoin, camphor, cassia, cinnamon, etc., were assigned to this genus, but at present it is much restricted by botanists. **L. nobilis,** the noble laurel, is indigenous in the south of Europe. Its fragrant oils (one essential, from the leaves, and the other fixed, from the berries) are chiefly used in liniments. Unof.

Lauryl (*law'-ril*) [*laurus*, laurel], $C_{12}H_{25}$. A univalent radicle, the hydrid of which is dodecane.

Laurylene (*law'-ril-ēn*) [*laurus*, laurel], $C_{12}H_{24}$. A liquid with a high boiling-point, found in certain mineral oils.

Lauth's Ligament. See *Ligament.* **L.'s Violet.** See *Pigments, Conspectus of.*

Lava (*lah'-vah*) [L., a flood or torrent]. The molten ejecta of a volcano.

Lavage (*lav-ahzh'*) [Fr.]. Irrigation or washing out of an organ, such as the stomach, the bowel, etc.

Lavamentum (*lav-am-en'-tum*) [*lavare*, to wash]. An injection.

Lavandula (*lav-an'-du-lah*). See *Lavender.*

Lavater, Angle of. See *Angle.*

Lavatera (*lav-at-ē'-rah*) [after the two *Lavaters*, physicians of Zurich]. A genus of malvaceous trees, shrubs, and herbs, natives of the old world. **L. thuringiaca, L. triloba,** and others abound in mucilage, and are used as demulcent remedies. Unof.

Lavation (*lav-a'-shun*) [*lavatio*, from *lavere*, to wash]. Lavage. **L. of the Blood,** intravenous injection of water.

Lavatory (*lav'-at-or-e*) [*lavatorium*, a place for bathing]. A wash or lotion for a diseased part.

Lave (*lāv*) [*lavare*, to wash]. To wash; bathe.

Lavel (*la'-vel*) [Prov. Eng.]. A local name for the epiglottis.

Lavement (*lāv'-ment*) [*lavare*, to wash]. 1. A wash; the act of washing. 2. A clyster or enema.

Lavender (*lav'-en-der*) [*lavare*, to wash]. The flowers of *Lavandula vera*, having properties due to a volatile oil. It is aromatic, stimulant, and carminative, but is used mainly as a flavor and as an adjuvant to other medicines. **Lavandulæ, Ol.,** the volatile oil distilled from the whole herb. Dose ♏j–v. **L., Ol., Florum,** the oil distilled from the fresh flowers; preferable to the preceding. Dose ♏j–v. A constituent of *Spt. odoratus.* **L., Spirit of,** 5 parts of the oil in 95 of alcohol; a perfume. Dose ʒss–j. **L., Tinct., Comp.,** oil of lavender 8, oil of rosemary 2, cinnamon 18, cloves 4, nutmeg 10, red saunders 8, alcohol 680, water 270, dilute alcohol to make 1000. Dose ʒss–ij. A constituent of Fowler's solution. To the labiate genus *Lavandula* also belong *L. spica,* or broad lavender (which furnishes the *oil of spike*), and other medicinal species.

Laveran's Corpuscles, or **Plasmodia.** The *Plasmodia malariæ,* first described by Laveran as *Oscillaria malariæ.* See *Parasites* (*Animal*), *Table of,* and *Plasmodium.*

Laville's Liquid Mixture, or **Antigout Remedy.** A mixture used in acute rheumatism. It is said to be a tincture of quinin and colocynthin, but very probably the active principle in it is colocynthin. See *Colocynthis.*

Lavipedium (*lav-ip-ē'-de-um*) [*lavare*, to wash; *pes*, foot]. A foot-bath; a pediluvium.

Law (*law*) [ME., *lawe*, a law]. A generalized and epitomized statement of facts. A general rule, or constant mode of action of forces, or phenomena. A rule of action prescribed by authority. See *Jurisprudence.* **L. of Abridged Transmission,** the forms assumed by an individual in its ontogeny differ somewhat from the accepted ancestral type. **L. of Adaptation,** the law that a living organism, under whatsoever conditions, will mould itself into harmony with those conditions, and thus continue its existence, whether in a more perfect or less perfect form. **L., Angström's, of Absorption-spectra,** the "rays that a substance absorbs are precisely those that it emits when made self-luminous." **L., Ampère's.** See *Ampère.* **L. of Avogadro,** equal volumes of all gases and vapors, at like temperature and like pressure, contain an equal number of molecules. **L., Baer's,** the principle that the evolution of any animal form is determined, *first,* by increasing histologic and morphologic differentiation, and *secondly,* by transition from a more general to a more specific type. **L., Bell's,** the law that the ventral roots of the spinal nerves are motor, and the dorsal sensory. See also *Wallerian Degeneration.* **L., Berthollet's,** when two salts in solution can by double decomposition produce a salt less soluble than either, this salt will be produced. **L., Boudin's,** that antagonism exists between tuberculosis and malaria. **L., Boyle's,** at any given temperature the volume of a given mass of gas varies inversely to the pressure that it bears. This is also called *Mariotte's Law.* **L., Brewster's,** the angle of polarization of a body is equal to that angle of incidence at which the reflected rays are at right angles to those refracted. **L., Charles's,** equal increments of temperature add equal amounts to the product of the volume and pressure of a given mass of gas. The increase is $\frac{1}{273}$ of its volume measured at —273° C., which is the zero of absolute temperature. **L., Colles',** a child born of a mother who is without obvious venereal symptoms, and which, without being exposed to any infection subsequent to its birth, presents symptoms of syphilis when a few weeks old, can infect the most healthy nurse, whether she suckle it or merely handle and dress it, while it will not infect its own mother, even though she suckle it while it has venereal ulcers of the lips and tongue. **L. of Contemporaneous Transmission,** changes in an individual appear at the same time as they appeared in its ancestor. **L., Coulomb's,** the force of attraction or repulsion between two charges of electricity is proportional to the quantity of electricity acting, and inversely proportional to the square of the distance between them. **L., Dalton's,** or **L., Dalton-Henry's,** although the volume of a gas

absorbed by a liquid remains constant, the weight (volume multiplied by the density) of the absorbed gas rises and falls in proportion to its pressure. **L. of Definite Proportions,** when two or more chemic substances unite to form a compound, they do so in a fixed and constant proportion. **L., Delbœuf's,** a congenital variation of a number of individuals in a species, if not advantageous or injurious, and if not balanced by reversion, will produce a variety, the proportion of which to the whole species tends to reach equality. **L. of Diffusion of Gases through Membranes.** See *L., Graham's.* **L. Donders'.** See *L., Listing's.* **L., Dulong and Petit's,** the products of the specific heat of elements in the solid state multiplied by their atomic weights are (approximately) the same; *i. e.,* the atomic heat of elements is (nearly) a constant. **L. of Electrotonus,** in anelectrotonus the excitability and rate of nervous conduction are diminished, while the electromotive power is increased; whereas in kathelectrotonus, the excitability and rate of nervous conduction are increased, while the electromotive power is diminished. (Rutherford.) **L. of Eccentric Sensations,** that wherever excitation occurs, whether in the nerve-cells themselves or anywhere in the course of the nerves leading to the cells, consciousness always refers the sensation to the presence of some external cause of excitement, *i. e.,* the power of conception always projects every sensation that reaches the consciousness outward, that is, to where the cause of the excitement is normal. (Rosenthal.) **L., Faraday's:** 1. The quantity of an electrolyte decomposed in a given time is proportional to the strength of the current acting upon it. 2. The quantities of the substances decomposed are proportional to their chemic equivalents. 3. The electrolyte must be a conductor. 4. The strength of the electrolytic force is the same in all parts of the electrolyte. **L., Fechner's,** the more expanded and accurate statement of *Weber's Law* as to the relation between the intensity of stimuli and the changes in the resulting sensations, a constant ratio existing between the strength of the stimulus and the intensity of the sensation. With increase of the stimulus the sensation increases only as the logarithm of the stimulus. As there is a lower limit (*threshold*) or liminal intensity of excitation, so there is an upper or maximal height of sensibility. Between the two is the *Range of Sensibility.* **L., Fleischl's, of Contraction,** that the excitability of a nerve varies at different points in its course. **L. of Functional Substitution.** See *L., Vulpian's.* **L., Gay-Lussac's.** See *L., Charles's.* **L., Goodell's,** *Rule of Ready Practice:* "when the cervix uteri is as hard as one's nose, pregnancy does not exist; when it is as soft as one's lips, pregnancy is probable." **L., Graham's,** the rate of diffusion of gases through porous membranes is in inverse ratio to the square-root of their density. **L., Gudden's,** lesions of the cortex do not give rise to lesions of the nerves of the periphery. **L., Hæckel's Fundamental Biologic,** the principle that every organism, in its ontogeny, goes through a series of stages, each of which represents a stage in the evolution of that class of organisms to which it belongs; heredity influencing or securing its palingeny, and the environment causing its kenogeny; in other words, "that the ontogeny is a short repetition of the phylogeny." **L., Henry's.** See *L., Dalton's.* **L., Hilton's,** that a nerve-trunk supplying a given joint also supplies the muscles moving that joint and the skin over the insertion of those muscles. **L. of Homotopic Transmission,** variations or acquired characters appear in the parts of an individual as in those of its progenitor. **L., Hook and Gravesande's, of Elasticity,** that the tension is directly proportionate to the length of the body extended, and to the amount of the extending weights, and that it is also inversely proportionate to the diameter of the extended body. **L., Huxley's,** the physical differences between man and the higher apes are less marked than those between the higher and the lower apes. **L., Joule's,** the heating-power of a current is proportional to the product of the resistance, the square of the current-strength, and the time the current flows. **L., Kirchhoff's,** in electricity: 1. The sum of all the positive currents is equal to the sum of all the negative currents, and, hence, if we add these, the result is zero. 2. The sum of all the electromotive forces in any circuit is equal to the sum of all the products obtained by multiplying the separate currents by the resistances through which they are flowing. 3. In optics, the law that a transparent body absorbs from a beam of light passing through it those rays which it emits in the incandescent state. See *L., Angström's.* **L., Kofacker-Sadler's,** a law as to the cause of the difference of sex. From a study of 80,000 cases these observers conclude that if the husband is younger than the wife there are as many boys as girls; if both are of the same age there are 1029 boys to 1000 girls; if the husband is older, 1057 boys to 1000 girls. **L., Kopp's** (*of boiling-points*), the addition of CH_2 to members of certain homologous series of chemic compounds raises the boiling-point about 19.5° C. **L., Lenz's,** the law in electro-magnetic induction that the direction of induced currents is such that their reaction arrests the motion that produces them. **L., Levert's,** that in placenta prævia there is a marginal insertion of the cord. **L., Listing's,** pertains to the movements of the eye-ball: when moved from the position of rest, the angle of rotation in the second position is the same as if the eye were turned about a fixed axis perpendicular to the first and second positions of the visual line. **L., Louis',** in adults the lungs usually contain tubercle when it is present elsewhere in the body. **L., Magnus's,** in thermo-electricity, the law that "in circuits of the same metal throughout, no electromotive force is produced by variation in temperature or of section of the conductor at different parts of the circuit." **L., Malaguti's,** when two salts are mixed in solution double decomposition occurs and four salts are formed (metathesis), the proportions of each depending on the strength of union of the respective basic and acid radicles. **L., Mariotte's,** the law of physics that the volume of a gas varies inversely as the pressure to which it is subjected. See *L., Boyle's.* **L. of Molecular Weights,** the molecular weight of an element is twice its atomic weight (with the exception of Hg and Cd); the molecular weight of a compound is equal to half the sum of the atomic weights of its elements. **L. of Multiple Proportions,** that two substances uniting to form a series of chemic compounds, do so in proportions that are simple multiples of one another or of one common proportion. **L., Newton's,** the unit force is that force which, acting for unit time on the unit mass, produces unit velocity. **L., Ohm's,** the law that the current-strength varies directly as the electromotive force, and inversely as the resistance. It is usually expressed by the formula $C = \frac{E}{R + \gamma}$, in which C is the current in ampères; E, the electromotive force in volts; R, the resistance of the external, and γ, that of the internal part of the circuit, in ohms. **L. of Organic Balance,** excessive development of one part of an organism is counterbalanced by deficient growth of another part. **L., Pflüger's,** "a given tract of nerve is stimulated by

the appearance of kathelectrotonus and the disappearance of anelectrotonus—not, however, by the disappearance of kathelectrotonus, or by the appearance of anelectrotonus." **L. of Progress,** the law of progressive increase in the perfection of organisms in the successive periods of the earth's history. **L., Psycho-physical.** See *L., Fechner's.* **L. of Reciprocal Proportions,** two elements combining with a third do so in proportions that are simple multiples or simple fractions of those in which they combine with each other. **L. of Refraction,** that rays of light entering a denser medium are deflected toward a perpendicular drawn through the point of incidence, and those entering a rarer medium are deflected away from the same perpendicular. **L., Ritter's or Ritter-Valli's,** if a nerve be separated from its center, or if the center die, the excitability of the nerve is *increased;* the increase of excitability begins at the central end, and travels towards the periphery; the excitability then *falls* until it disappears entirely. **L. of Sexual Transmission,** a parent transmits characteristics to children of his or her sex not transmitted to the opposite sex. **L., Stokes':** 1. See *L., Angström's.* 2. Every muscle in relationship with an inflamed mucous or serous surface becomes paralyzed. **L., Tait's,** in every disease of the abdomen or pelvis in which the health is destroyed or life is threatened, and in which the condition is evidently not due to malignant disease, an exploration of the cavity by celiotomy should be made. **L., Toynbee's,** a law concerning intra-cranial disease secondary to otitis. It is that the cerebellum and lateral sinus suffer from disease of the mastoid, while the cerebrum is endangered by caries of the tympanic roof. **L., Valli-Ritter's.** See *L., Ritter-Valli's.* **L., Van der Kolk's,** the sensory fibers of a mixed nerve are distributed to parts that are moved by muscles that receive the motor fibers of the same nerve. Thus, in nerve-lesions the chief sensory symptoms are always peripheral or distal from the chief motor symptoms. **L., Volta's, of Tension,** the contact of two different substances produces an electromotive force equal to the algebraic difference of their electric condition, which difference is constant for the same substances. **L., Vulpian's,** the functions of a destroyed portion of an animal's brain are assumed by the remaining portion. **L., Wallerian, of Degeneration;** from experiments Waller showed that the trophic centers of the ventral roots of spinal nerves lie in the multipolar nerve-cells of the ventral horns of gray matter, while those of the dorsal roots lie in the ganglia placed upon them. Generalized, the law predicates that the course of the impulses in a nerve may be ascertained by tracing the course of the subsequent degeneration. **L., Weber's,** the principle that that variation of stimulus that causes the smallest appreciable variation in sensation maintains, approximately, a fixed ratio to the total stimulus. See also *L., Fechner's.*

Lawn-tennis Arm. Displacement of the tendon, or body (or both) of the pronator radii teres. Common in lawn-tennis players. **L.-t. Knee.** See *Knee.* **L.-t. Leg,** tendinous, fascial, or muscular rupture in the calf or sura.

Lawsonia (*law-so'-ne-ah*). See *Henna.*

Lax (*laks*) [*laxus*, loose]. Loose; not tense.

Laxarthrus (*laks-ar'-thrus*) [*laxus*, loose; *ἄρθρον*, joint]. Luxation of a joint.

Laxative (*laks'-at-iv*) [*laxativus; laxare*, to loosen]. 1. Aperient; mildly cathartic. 2. An agent that loosens the bowels; a mild purgative.

Laxator (*laks-a'-tor*) [*laxare*, to loosen]. That which loosens or relaxes. A name applied to various muscles. **L. tympani.** See *Muscles, Table of.*

Laxitas (*laks'-it-as*) [L.]. Looseness. **L. alvi,** diarrhea. **L. gingivarum,** spongy gums. **L. intestinorum,** diarrhea. **L. ventriculi,** atony of the stomach.

Laxity (*laks'-it-e*) [*laxitas*, looseness]. Lack or loss of tone or tension; a relaxed, loose, or spongy state of a tissue.

Layer (*la'-er*) [ME., *leyer*, a layer]. A mass of uniform, or nearly uniform, thickness, spread over or covering a considerable area. **L., Bacillar** (*of the retina*), the layer of rods and cones of the retina. **L., Basement,** basement membrane, *q. v.* **L., Bowman's.** See *Lamina, Bowman's.* **L., Fibrous** (*of the pericardium*), the outer layer of the pericardium, continuous above with the deep cervical fascia. **L., Fundamental,** one of the three layers of the blastoderm, *q. v.* **L., Ganglionic,** a layer of angular cells of the cerebral cortex, best developed in the motor area. **L., Germinal.** See *L., Fundamental.* **L., Henle's,** the outer layer of the inner root-sheath of the hair. **L., Huxley's,** the inner layer of the inner root-sheath of the hair. **L., Horny** (*of the epiderm*), the superficial layer of the skin. **L., Inner Molecular,** one of the layers of the retina. **L., Latticed,** the formatio reticularis, *q. v.* **L., Malpighian,** the rete mucosum of the skin. **L., Ollier's.** See *L., Osteogenetic.* **L., Osteogenetic,** the lower layer of periosteum, connected with the formation of bone. **L., Papillary** (*of the skin*), the upper layer of the true skin, having papillary projections fitting into the epidermis. **L., Pigmentary** (*of the retina*), the innermost layer of cells of the retina extending also to the choroid, ciliary body, and iris. **L., Primitive,** or **Primordial,** the layers of the blastoderm; by some applied to epiblast, hypoblast, and mesoblast; by others to the first two only. **L. of Rods and Cones.** See *L., Bacillar,* and *Retina.* **L., Serous,** the ental layer of serous membranes, consisting of endothelium.

Layering (*la'-er-ing*) [ME., *leyer*, a layer]. The propagation of plants by layers.

Layette (*lay-et'*) [Fr.]. The full outfit of garments, bedding, etc., for a new-born child.

Layman (*la'-man*) [D., *leeman*, a layman]. A member of the laity.

Lazar (*la'-zar*) [from *Lazarus*, a Biblical name]. An old name for a leper, or for any person having a repulsive disease.

Lazaret Fever. A synonym of *Typhus Fever, q. v.*

Lazaretto (*laz-ar-et'-o*) [Ital., a pest-house]. A quarantine establishment. Also, a place for fumigation and disinfection.

Lazari malum (*laz'-ar-i ma'-lum*) [L., "Lazarus' ill"]. Synonym of *Leprosy.*

Lazulite (*laz'-u-līt*) [S., *azul*, blue]. A mineral of a light-blue color, composed of the hydrous phosphate of aluminum, magnesium, and iron.

Leaching (*lech'-ing*) [ME., *leechen*, to wet]. In chemistry, removing by percolation.

Lead (*led*) [ME., *leed*, lead]. See *Plumbum.* **L., Black.** See *Graphite.* **L.-colic.** See *Colic.* **L.-encephalopathy,** a morbid condition of the brain due to chronic lead-poisoning. **L.-line,** blue line; the line of discoloration on the gums in cases of chronic lead-poisoning. **L.-pipe Contraction,** Weir Mitchell's term for the marked resistance encountered in attempting to flex the legs in cases of spastic paraplegia of infants, the resistance gradually yielding as the effort to flex is maintained; also the condition of the limbs in the cataleptic state in which they maintain any position that is given them. **L.-pipe Paralysis.** Same as

L.-pipe Contraction. **L.-poisoning,** plumbism; saturnism; painters' colic; lead-palsy; systemic poisoning. It is due to the introduction of lead into the system. The symptoms are disturbed nutrition, anemia, the gingival line, lead-colic, constipation, pains in the limbs, local muscular paralysis (wrist-drop) and wasting, saturnine encephalopathy, etc. The treatment consists in stopping ingress of lead to the system, its elimination by iodid of potassium, aperients, particularly the sulphates, etc. **L., Sugar of.** See *Plumbi acetas.* **L., Vinegar of,** liquor plumbi subacetatis, *q.v.* Also applied to alkaline solutions of basic lead salts. **L., White,** basic lead carbonate $(PbCO_3)_2.Pb(OH)_2$. **L., Pattison's White,** the oxychlorid of lead; it is used as a paint.

Leader (*le'-der*) [ME., *leder*, a leader]. A sinew or tendon; a main artery; a terminal shoot.

Leaf (*lēf*) [ME., *leef*, leaf; λέπος, a scale]. In botany, an expanded plant-organ, produced laterally from the stem or branch, and, regarding only the way in which it originates, applied arbitrarily to the carpels, stamens, floral envelops, cotyledons, and ordinary leaves. See *Folia.* **L.-cup.** See *Bearsfoot.* **L.-green.** See *Chlorophyl.*

Leaflet (*lēf'-let*) [ME., *leef*, a leaf]. A small leaf, or leaf-like organ or appendage.

Lean (*lēn*) [ME., *lene*, lean]. Scant of flesh; thin; spare. Free from fat. **L.-faced,** having a thin face.

Leanness (*lēn'-nes*) [ME., *lene*, lean]. A condition of having less than the usual amount of fat or flesh. It may be natural, or the result of disease.

Leap (*lēp*) [ME., *lepen*, to spring]. To bound; to spring up.

Leaping (*lēp'-ing*) [ME., *lepen*, to spring]. Springing; jumping. **L. Ague,** a synonym of *Dancing Mania.*

Leash (*lēsh*) [ME., *leesshe*, a leash]. The network of branches into which a nerve-trunk or a vessel may be divided.

Leather (*leth'-er*) [ME., *lether*, leather]. A material manufactured from hides or skins by the process of tanning, which may be done by a number of methods. The following are the main varieties of leathers so produced: *Sole-leather;* this is the heaviest and firmest variety of leather produced. It is made from the heaviest and thickest hides, and is valued for its fine grain and toughness. It retains the whole thickness of the hide. *Upper and Harness Leathers;* these are made from lighter hides, and are tanned for strength and flexibility rather than for weight. The black color and finish are put on upper leather by coating it with a mixture of lamp-black, linseed oil, and fish-oil, to which tallow and wax and a little soap have been added. *Morocco Leather;* the true morocco leathers are manufactured from goat-skins. A cheaper grade, known as French morocco, is produced from sheep-skins. *Enamelled or Patent Leathers;* these are leathers finished with a water-proof and brightly varnished surface, similar to lacquered wood-work. Thin and split hide is used for these. *Russia Leather* is peculiar in its characteristic odor and its ability to withstand dampness, without any tendency to mold, both of which qualities it owes to the currying with the empyreumatic oil of birch-bark. *Chamois Leather* is a soft felt-like leather, originally prepared from the skin of the chamois-goat, but now made from other goat-skins and from the "flesh splits" of sheep-skins. *Crown Leather* is a variety intermediate between oil-tanned and tawed leather, being stronger than the first and more water-resistant than the latter. The leather readily becomes moldy, but seems to be strong and specially adapted for belting. *White-tanned or "Tawed" Leather;* skins to be tanned with the hair on, as sheep-skin rugs, etc., as well as light calf-kid and glove-leather, are always alum-tanned. The glove-leather thus obtained has softness and considerable strength, but is not thoroughly water-resistant. *Parchment and Vellum;* the first of these is prepared from the skins of sheep and goats, and the second from the skins of calves. The skins are washed, limed, unhaired, and fleshed, and then stretched thoroughly. They are then again well-scraped and rubbed with pumice-stone, and allowed to dry on a frame in the shade, care being taken to avoid sunshine or frost. Very fine vellums are prepared with the finest pumice-stone. *Dègras,* a valuable side-product of the leather industry. It is essentially an emulsion of oxidized fish-oil, produced by soluble albuminoids. It is used largely for currying purposes. **L.-brown.** Same as *Phenylene-brown.* **L.-wood.** See *Dirca palustris.*

Leathery (*leth'-er-e*) [ME., *lether*, leather]. Resembling leather; applied to thickened arteries, to various tough tissues in the body, and to the liver, spleen, or lungs.

Leaven (*lev'-n*) [*levare*, to raise]. A name given to several species of ferments belonging to the class of *Saccharomyces*, of which the culture known as "sour dough" is a common example.

Leban, Leben (*leb'-an, leb'-en*) [Ar., *leban*]. A variety of fermented milk of the Arabs. It is made by adding some of the fermented milk of the previous day to the fresh milk as soon as it is brought in from the milking. It is a slightly acid fluid of the consistence of cream, with small, flaky curds, and with the taste of buttermilk. It is easily digested, and hence is suitable for invalids. It corresponds to the "*Matzoon*" of the Turks.

Leber's Disease. Congenital malformation of the optic nerve, with atrophy. Hereditary optic atrophy. See *Diseases, Table of.*

Lecat's Gulf. The dilated bulbous portion of the urethra.

Lecheguana (*la-cha-gwan'-ah*) [Port.]. A kind of poisonous honey collected in S. America from flowers of the genera *Paullinia* and *Serjania.* It produces hilarity, followed by heavy narcotic slumber, and later by melancholic depression. Unof.

Lechopyra (*lek-op'-ir-ah*) [λεχώ, a lying-in woman; πῦρ, fire, fever]. Puerperal fever.

Lecithigenous (*les-ith-ij'-en-us*) [λέκιθος, yolk; γεννᾶν, to beget]. Producing lecithin.

Lecithin (*les'-ith-in*) [λέκιθος, yolk of egg], $C_{44}H_{90}NPO_9$. A complex nitrogenous fatty substance occurring widely spread throughout the animal body. It is found in the blood, bile, and serous fluids, as well as in the brain, nerves, yolk of egg, semen, pus, and white blood-corpuscles. It is a colorless, slightly crystalline substance, readily soluble in cold, and very much so in hot alcohol. It swells up in water, and throws out curling filamentous processes at the same time. It is easily decomposed. The *lecithins,* as a class, form a group of substances the type of which is normal lecithin.

Lecithoid (*les'-ith-oid*) [λέκιθος, yolk; εἶδος, like]. Resembling lecithin.

Lecithophore (*les'-ith-o-fōr*) [λέκιθος, yolk; φορεῖν, to bear]. A layer of cells in the ovum, constituting the floor of the segmentation-cavity.

Lecithus (*les'-ith-us*) [λέκιθος, yolk]. The egg-yolk.

Lecithymen (*les-ith-i'-men*) [λέκιθος, yolk; ὑμήν, membrane]. The vitelline membrane.

Leclanché Cell. See *Cell.*

Leco (*le'-ko*) [λῆκώ, penis]. The penis.

Lectual (*lek'-tu-al*) [L., *lectus*, a bed]. Pertaining to a bed or couch. **L. Disease,** a disease that confines one to bed.

Lectulus (*lek'-tu-lus*) [dim. of *lectus*, bed]. An old name for various forms of splints, cushions, and pads used in surgery; also, a bed or couch; a couch or mattress containing medicinal substances. **L. medicatus**, a dry fomentation.

Ledon (*le'-don*) [λήδων, cistus]. See *Ladanum*.

Ledoyen's Disinfecting-fluid. A solution of lead nitrate.

Ledran's Suture. See *Suture*.

Ledum (*le'-dum*) [λήδων, a species of cistus]. A genus of ericaceous shrubs. **L. palustre**, marsh-tea, the leaves of which have been used as a febrifuge and sedative, and in skin-diseases. Unof.

Ledyson, Powder of. A powder containing Armenian bole, with powdered charcoal, slaked lime, sal ammoniac, and powdered cinnamon.

Leech (*lēch*) [AS., *læce*, physician]. 1. *Hirudo medicinalis*, or other worm-shaped aquatic and blood-sucking animals employed in surgery. 2. Formerly a medical practitioner; a physician. 3. To extract blood by leeching. See *Hirudo*. **L., Artificial**, an apparatus for cupping. See *Heurteloup*. **L.-craft**, an archaic name for the art of healing. **L., Horse.** See *Horse-leech*. **L.-tube**, a glass tube in which a leech is placed so that its mouth will come in contact with the skin of the part over which the tube is placed.

Leecher (*lēch'-er*) [ME., *leeche*, a physician]. A person who applies leeches.

Lees (*lēz*) [AS., *læs*, dregs]. The dregs or solid matter held in suspension by a liquid, that finally settles at the bottom of the vessel. Especially the sediment of vinous liquors. Also, a valuable side-product in the manufacture of wine. It is the deposit formed on the bottom of the casks, and consists of from 30 to 40 per cent. of vegetable matter, the remainder being tartrates, sulphates (in plastered wines), alumina, phosphoric acid, etc.

Leeting (*lēt'-ing*). The exudation on the surface of the skin in eczema.

Le Fort's Operation. See *Operations, Table of*.

Left [ME., *left*, left]. Sinistral; opposite of right. The left-hand side. In man and other mammals, the side containing the larger part of the heart. **L.-brained**, having the speech-center in its normal situation, in the left third frontal, or subfrontal convolution. **L.-handed**, having more power and dexterity in the left than in the right hand. **L. Lateral Recumbent Position.** See *Postures, Table of*.

Leg [ME., *leg*, leg]. The lower extremity of man, especially that part from the knee to the ankle. An organ of locomotion in man and other animals. **L., Bandy**, bow-leg. **L., Barbadoes**, elephantiasis of the leg. **L., Black, of Canada**, a condition of purpura affecting the legs of Canadian lumbermen. **L., Cochin.** See *L., Barbadoes*. **L., Crossed**, a crossing of the axes of the legs. **L., Dentist's**, a painful cramp in the leg-muscles of dentists. **L., Dover's**, a term for hypochondriasis. **L.-ill.** See *Black Leg*. **L., Lawn-tennis.** See *Lawn-tennis Leg*. **L., Milk**, phlegmasia alba dolens. **L., Scissors.** See *L., Crossed*. **L., Weeping**, a leg the seat of eczema madidans. **L., White.** See *L., Milk*.

Legal (*lē'-gal*) [*lex, legis*, law]. Pertaining to law. **L. Medicine**, medical jurisprudence.

Legal's Disease. Headache due to meningo-tympanic disease. See *Diseases, Table of*.

Legitimacy (*le-jit'-im-as-e*) [*legitimare*, to make lawful]. The condition of being within the bounds of the law. Also, the statutory recognition of a child born within wedlock, or within a period of time necessary to gestation, which may elapse after the death of the father.

Legume (*leg'-ūm* or *leg-ūm'*) [*legere*, to gather (so-called because it may be gathered by the hand)]. In biology, the fruit of plants of the pea or pulse family, a pod splitting along both sutures, and formed from a simple pistil.

Legumin (*leg-u'-min*) [*legumen*, pulse]. A proteid compound in the seeds of many plants belonging to the natural order of leguminosæ. Vegetable casein. See *Casein*.

Leguminosæ (*leg-u-min-o'-se*) [*legumen*, pulse]. The pulse family; an important family of plants comprising the bean, the clover, the lentil, the pea. Licorice, indigo, gum arabic, senna, are also obtained from species of this family.

Leguminous (*leg-u'-min-us*) [*legumen*, pulse]. Pertaining to or resembling the *Leguminosæ*.

Leicester System. A system of combating smallpox that consists in isolation, quarantine, and disinfection, without vaccination.

Leiocephalous (*li-o-sef'-al-us*) [λεῖος, smooth; κεφαλή, head]. Having a smooth head.

Leiodermia (*li-o-der'-me-ah*) [λεῖος, smooth; δέρμα, skin]. A disease of the skin marked by abnormal glossiness, and by atrophy.

Leiodermatous (*li-o-der'-mat-us*) [λεῖος, smooth; δέρμα, skin]. Smooth-skinned.

Leiomyoma (*li-o-mi-o'-mah*) [λεῖος, smooth; μῦς, muscle; ὄμα, a tumor: *pl., Leiomyomata*]. A tumor consisting largely of unstriped muscle-fibers.

Leiopilous (*li-op'-il-us*) [λεῖος, smooth; πῖλος, wool]. Same as *Leiocephalous*.

Leiopus (*li'-o-pus*) [λεῖος, smooth; πούς, foot]. Synonym of *Talipes planum*, or flat-foot.

Leiotrichous, Liotrichous (*li-ot'-rik-us*) [λεῖος, smooth; θρίξ, hair]. Having smooth or straight hair. See *Lissotrichous*.

Leiphemia (*li-fe'-me-ah*) [λείπειν, to fail; αἷμα, blood]. Failure, poverty, or a depraved state of the blood.

Leipodermia (*li-po-der'-me-ah*) [λείπειν, to leave; δέρμα, skin]. A deficiency of the skin, especially of the prepuce.

Leipomeria (*li-po-me'-re-ah*) [λείπειν, to leave; μέρος, part]. A monstrosity with absence of one or more limbs.

Leipopsychia (*li-pop-si'-ke-ah*) [λείπειν, to fail; ψυχή, spirit]. Fainting; weakness; asphyxia.

Leipothymia (*li-po-thi'-me-ah*) [λείπειν, to fail; θυμός, mind]. A fainting or syncope.

Leipothymic (*li-po-thi'-mik*) [λείπειν, to fail; θυμός, mind]. Faint; affected with or pertaining to leipothymia.

Leipsic Green. Same as *Schweinfurth Green*. **L. Yellow.** Same as *Chrome-yellow*.

Leipyria (*li-pir'-e-ah*) [λείπειν, to fail; πῦρ, fire]. Coldness, as of the extremities, during a high fever.

Leitch's Blue. See *Pigments, Conspectus of*.

Leiter's Apparatus, Coil, or Tubes. Tubes of soft, flexible metal designed for application about any part of the body. Cold water is passed through the tubes, thereby reducing the temperature of the parts encased.

Leithner's Blue. Same as *Cobalt-blue*.

Lekene (*le'-kēn*). The principal constituent of Caucasian ozokerite; it melts at 79° C., and has the composition C_nH_{2n+2} or C_nH_{2n}.

Lema (*le'-mah*) [λῆμη, rheum]. The collection of dried matter sometimes seen at the canthus of the eye.

Lembert's Suture. See *Suture*.

Lémery's Powder. A stimulant and digestive powder containing cinnamon, ginger, nutmeg, cloves, mace, musk, and raisins. **L.'s Salt**, magnesium sulphate.

Lemithochorton (*lem-ith-o-kor'-ton*). Same as *Helminthochorton*.

Lemma (*lem'-ah*) [λέμμα, peel: *pl.*, *Lemmata*]. A general name for a limiting or ensheathing membrane; *e. g.*, neurilemma, sarcolemma, etc. It is mostly used in composition. In embryology, the outer layer of the germinal vesicle.

Lemnian Earth (*lem'-ne-an*) [λήμνιος, Lemnian]. A variety of reddish kaolin, originally found in the Isle of Lemnos; a kind of bole (*q. v.*) used as an astringent; also, as a detergent, like fuller's earth; Lemnian bole. See, also, *Ocher*.

Lemniscus (*lem-nis'-kus*) [λημνίσκος, fillet]. 1. A ribbon-like appendage. 2. Fillet; a triangular area on the lateral slope of the mesencephal, in which the fibers run approximately cephalo-dorsad. It is dorso-cephalad of the demarcation-line of the pons, and constitutes the most ventral part of the tegmentum. Several divisions are made; *e. g.*, inferior, lateral, and median or superior lemniscus. 3. In biology, the name given by Rudolphi to a glandular, filiform organ, pendent, on either side of the proboscis-sheath, in the anterior body-cavity of *Echinorhynchus*. Dujardin considers it to be of the nature of a salivary gland.

Lemon (*lem'-on*). See *Limon*.

Lemonade (*lem-on-ād'*) [*limon*, lemon]. An acidulous, refrigerant drink made from the juice of lemon. **L., Sulphuric Acid,** a solution of sugar in water containing sulphuric acid. It is used in lead manufactories to prevent lead-poisoning.

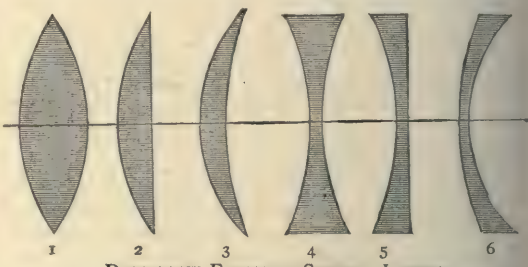
Lemoparalysis (*le-mo-par-al'-is-is*) [λαιμός, gullet; παράλυσις, palsy]. Paralysis of the esophagus.

Lemostenosis (*le-mo-ste-no'-sis*) [λαιμός, gullet; στένωσις, stricture]. Constriction of the pharynx or esophagus.

Lendigerous (*len-dij'-er-us*) [*lens*, a louse's egg; *gerere*, to bear]. Bearing or having vesicles.

Lenhossek, Bundle of. The ascending root of the vagus and glosso-pharyngeal nerves.

Leniceps (*lēn'-is-eps*) [*lenis*, mild; *capere*, to seize]. A form of obstetric forceps, with short handles; it is so called because it was designed to be safer in use than the ordinary forms.



Lenient (*le'-ne-ent*) [*leniens*, softening]. 1. Lenitive; emollient. 2. An emollient medicine or application.

Leniment (*len'-im-ent*) [*lenire*, to soothe]. A liniment or soothing application.

Lenitis (*len-i'-tis*). A term for phlegmonous gastritis, or suppurative inflammation of the areolar tissue of the stomach.

Lenitive (*len'-it-iv*) [*lenitivus*, soothing]. Emollient or demulcent; laxative or aperient. 2. An emollient remedy or application; an aperient or mildly cathartic agent. **L. Electuary,** confectio sennæ.

Lens (*lenz*) [L., a lentil]. A regularly-shaped piece of glass or crystal for the refraction of rays of light. The crystalline lens of the eye. **L., Achromatic.** See *Achromatic*. **L., Apochromatic.** See *Apochromatic*. **L., Astigmatic.** See *L., Cylindric*. **L., Astigmatic, of Stokes,** an apparatus consisting of two plano-cylindric lenses, one concave, the other convex, the two of equal focal distance; it is used in the diagnosis of astigmatism. **L., Biconcave** (negative or minus (—) lens), a thick-edged lens having concave spheric surfaces upon its opposite sides; it is used in spectacles to correct myopia. **L., Biconvex** (*positive* or *plus* (+) lens), a thin-edged lens; it has two convex surfaces, and is used to correct hyperopia. **L., Bifocal.** See *Bifocal*. **L., Cicatricular,** a lenticular body in the ovum formed by the junction of the germinal vesicle and the non-germinal layer of the ovum. **L., Convergent or Converging,** a double convex or plano-convex lens that focuses rays of light. **L., Crystalline,** the lens of the eye, situated immediately behind the pupil. **L., Cylindric** (either *minus* or *plus*), one ground upon a cylindric tool, *i. e.*, one with a plane surface in one axis and a concave or convex surface in the axis at right angles to the first. **L., Decentered,** one in which the optic center is not opposite the pupil of the eye. **L., Dispersing,** a name for a concave lens. **L.-paper,** a soft absorbent paper much used for cleaning lenses; it is also known as Japanese filter-paper. **L., Periscopic,** one with concavo-convex or convexo-concave surfaces, the opposite sides being of different curvatures; it is used to avoid spheric aberration, and to gain a greater field of clear vision; such lenses are called *meniscus lenses*. **L., Plano-concave, Plano-convex, Plano-cylindric,** have a plane surface upon one side and a curved surface upon the reverse side. **L., Prismatic,** a triangular bar of glass. **L., Spheric,** one whose curved surface, either concave or convex, is a segment of a sphere, in contradistinction to a cylindric lens. **L., Sphero-cylindric,** one with a spheric surface upon one side, and a cylindric surface upon the reverse, used for the correction of either myopia or hyperopia, associated with astigmatism. See *Spectacle-lenses*. **L.-star,** the stellate figure seen on the posterior surface of the crystalline lens. **L., Test or Trial,** one of a set of lenses employed in determining refractive errors.

DIFFERENT FORMS OF SPHERIC LENSES.
1. Biconvex lens. 2. Plano-convex. 3. Concavo-convex, or convergent meniscus. 4. Biconcave 5. Plano-concave. 6. Convexo-concave, or divergent meniscus.

Lenticel (*len'-tis-el*) [*lenticella;* dim. of *lens*, lentil]. Any one of the little mucous follicles or crypts at the base of the tongue; any lenticular gland. In biology, a lens-shaped collection of cells; applied to the dots on new bark and to certain glands.

Lenticellate (*len-tis-el'-āt*) [*lenticella;* dim. of *lens*, lentil]. Having lenticels.

Lenticonus (*len-tik-o'-nus*) [*lens*, a lens; *conus*, a cone]. A rare, usually congenital, anomaly of the lens in which there is a conical prominence upon its anterior, or more rarely upon its posterior, surface.

Lenticula (*len-tik'-u-lah*), **Lenticule** (*len'-tik-ūl*) [L.; dim. of *lens*, lentil: *pl.*, *Lenticulæ*]. 1. Same as *Lentigo*. 2. A mass of gray matter in the brain situated in the hemicerebral wall, between the caudatum and the cortex. It consists of three zones known as *articuli*, all more or less striated, the ental the smallest, and the ectal, also called *putamen*, the largest. The latter is of a deeper reddish-gray color than the two mesal divisions, which together are termed *globus pallidus*. 3. In biology: (*a*) a spore-case; (*b*) a freckle.

Lenticular (*len-tik'-u-lar*) [*lenticularis; lens*, a lentil]. Pertaining to, or resembling, a lens; also a descriptive term applied to an instrument with a curved cutting-edge for removing the rough edges of bone made by the trephine. **L. Ganglion.** See *Ganglia, Table of*. **L. Nucleus,** the lenticula, *q. v.*

Lentiform (*len'-tif-orm*). See *Lenticular*.

Lentigines (*len-tij'-in-ēz*) [*lens*, a lentil]. See *Lentigo*. **L. leprosæ**, the pigmented spots of macular leprosy.

Lentiginose, Lentiginous (*len-tij'-in-ōs, len-tij'-in-us*) [*lentiginosus*, freckled]. Affected with lentigo. Speckled or freckled.

Lentigo (*len-ti'-go*) [*lens*, a lentil; *pl.*, *Lentigines*]. A freckle; ephelid. A circumscribed spot or patch of pigment, small in size, and occurring mainly on the face and hands. Freckles rarely occur before the age of eight years, and are not common in aged persons. They are most frequent among people of light complexion. Those occurring upon parts of the body not exposed to the sun's rays are called "*cold freckles*." **L. æstiva**, summer freckles. **L. congenita**, pigmented nevus.

Lentil (*len'-til*) [*lenticula*, a lentil]. The plant *Lens esculenta*; also its flat lenticular seed, a kind of pulse, valued as an article of food.

Lentitis (*len-ti'-tis*). See *Phakitis*.

Lentoid (*len'-toid*) [*lens*, lentil; εἶδος, like]. Lens-shaped, or lenticular.

Lentor (*len'-tor*) [*lentor*; *lentus*, adhesive]. Viscidity of a liquid; slowness of any function, or process. **L. cordis**, sluggishness of the heart.

Lentous (*len'-tus*) [*lentus*, thick]. Thick, tenacious, or viscid.

Lenus (*le'-nus*) [ληνός, a depression]. A depression; the torcular herophili, *q. v.*

Lenz's Law. See *Law*.

Leonard's Tint. A name for methyl-violet, pentamethyltriamido-triphenylcarbinol, used for staining microscopic sections and bacteria.

Leonine (*le'-o-nīn*) [*leoninus*, belonging to a lion]. Lion-like; resembling a lion.

Leontiasis (*le-on-ti'-as-is*) [*leo*, a lion]. A variety of elephantiasis in which the patient's face is said to resemble that of a lion. See *Elephantiasis* and *Leprosy*. **L. ossea, L. ossium**, a form of sclerosis of bone, following osteitis, in which nodular deposits are seen upon the diseased bone. **L. vitulina**, a congenital disease characterized by a painless enlargement of the face, giving it some resemblance to that of a calf.

Leontodin (*le-on'-to-din*) [λέων, a lion; ὀδούς, a tooth]. The precipitate from a tincture of the root of dandelion, *Leontodon taraxacum*; it is a tonic, diuretic, aperient, and hepatic excitant. Dose two to four grains. Unof.

Leontodon (*le-on'-to-don*). See *Taraxacum*.

Leonurus (*le-on-u'-rus*). See *Motherwort*.

Leopard's Bane (*lep'-ardz bān*). See *Arnica*.

Lepal (*le'-pal*) [λεπίς, a scale]. In biology, a barren stamen; a stamenode.

Leper (*lep'-er*) [λεπρός, scaly]. One affected with leprosy.

Lepidin (*lep'-id-in*) [λεπίς, scale], $C_9H_6(CH_3)N$. 1. Methyl-quinolin, a substance that occurs with quinolin and quinaldin in coal-tar, and is obtained on distilling cinchonin with potassic hydrate. It possesses an odor like that of quinolin, and boils at 257° C. 2. A bitter principle from *Lepidium iberis*; it is reputed to be antipyretic. Unof.

Lepidium (*lep-id'-e-um*) [λεπίδιον; λεπίς, scale]. A genus of cruciferous herbs; cress, or peppergrass. **L. iberis, L. latifolium, L. ruderale, L. sativum**, and **L. virginicum**, have been used in medicine. They are antiscorbutic, and stimulant, and are reputed to be antipyretic. Unof.

Lepido- (*lep'-id-o-*) [λεπίς, scale]. A prefix signifying a scale, or scaly.

Lepidoid (*lep'-id-oid*) [λεπίς, scale]. Having the appearance of a scale.

Lepidoplastic (*lep-id-o-plas'-tik*) [λεπίς, scale; πλάσσειν, to form]. Forming scales.

Lepidoptera (*lep-id-op'-ter-ah*) [λεπίς, scale; πτερόν, a wing]. An order of insects distinguished by feather-like scales and a spirally-coiled suctorial apparatus. The order includes butterflies and moths.

Lepidosarcoma (*lep-id-o-sar-ko'-mah*) [λεπίς, scale; σάρκωμα, sarcoma]. A sarcoma covered with scales, occurring in the mouth.

Lepidosin (*lep-id'-o-sin*) [λεπίς, scale]. A substance in the scales of fishes analogous to dentine.

Lepidosis (*lep-id-o'-sis*) [λεπίς, scale]. Same as *Ichthyosis*. Also, a synonym of *Lepra* and of *Pityriasis*.

Lepidote (*lep'-id-ōt*) [λεπίς, a scale]. In biology, scurfy or covered with small scales.

Le Pita. Synonym of *Tinea imbricata*.

Lepocyta (*lep-os'-it-ah*) [λέπος, a scale, a husk; κύτος, a hollow, a cavity]. In biology, a unicellular organism furnished with a limiting membrane. Cf. *Gymnocyta*.

Lepocyte (*lep'-o-sīt*) [λέπος, a scale, a husk; κύτος, a hollow]. In biology, a nucleated cell possessing a cell-wall. Cf. *Gymnocyte*.

Leposteophyton, or Leposteophytum (*lep-os-te-o-fi'-ton, lep-os-te-o-fi'-tum*) [λέπος, scale; ὀστέον, bone; φυτόν, plant]. A new growth of bone, scaly in character.

Lepothrix (*lep'-o-thriks*) [λέπος, scale; θρίξ, the hair]. A condition in which the hairs of the axillæ or scrotum are fringed with feather-like masses along the shaft, or become encased in a sheath of hardened sebaceous matter.

Lepra (*lep'-rah*) [λέπρα, leprosy]. 1. Leprosy. An endemic, chronic, and highly malignant disease, somewhat analogous to syphilis in pathologic character. It is prevalent in Europe and Asia, especially along the Mediterranean shores, but is rare in North America. It is a constitutional disease preceded by malaise, debility, and languor, followed by characteristic bullous, macular, or tubercular lesions of the skin. Its cause is the *Bacillus lepræ* discovered by Hansen. See *Leprosy*, and *Bacteria*, *Synonymatic Table of*, and also *Psoriasis*. 2. A so called "false leprosy," apparently a form of psoriasis. **L. alba** or **albida**, white leprosy. **L. alphos.** See *Psoriasis*. **L. anæsthetica.** See *Leprosy*. **L. antanea.** Same as *Leprosy*, *Tuberculated*. **L. asturiensis.** Synonym of *Pellagra*, *q. v.* **L. fungifera.** Synonym of *Frambesia*. **L. ichthyosis.** Ichthyosis, *q. v.* **L. italica**, or **mediolanensis**, pellagra, *q. v.* **L. maculosa**, the stage of true leprosy, characterized by the presence of pigment-spots. **L. mediolanensis.** See *L. italica*. **L. melas**, black leprosy. **L. mutilans**, the final stage of true leprosy, in which there is a loss of members. **L. nervorum.** See *Leprosy*, *Nerve*. **L. nervosa.** Same as *Leprosy*, *Anesthetic*, *q. v.* **L. nodosa**, or **L., Nodular.** See *Leprosy*. **L., Non-tuberculated.** See *Leprosy*. **L. of Willan**, psoriasis. **L. tuberosa.** See *Leprosy*, *Tuberculated*. **L. umbrosa.** See *Leprosy*, *Black*. **L. vera.** See *Leprosy*. **L. vulgaris**, a synonym of psoriasis.

Leprelcosis (*lep-rel-ko'-sis*) [λέπρα, lepra; ἕλκωσις, ulceration]. Leprous ulceration.

Lepriasis (*lep-ri'-as-is*) [λέπρα, leprosy]. A synonym of leprosy and of psoriasis; an obsolescent term vaguely used to designate various scaly diseases of the skin.

Lepric (*lep'-rik*) [λεπρικός, leprous]. Pertaining to lepra.

Leprologist (*lep-rol'-o-jist*) [λέπρα, leprosy; λόγος, science]. An expert or specialist in leprology.

Leprology (*lep-rol'-o-je*) [λέπρα, leprosy; λόγος, science]. The science of leprosy.

Lepromorphe (*lep-ro-mor'-fe*) [λέπρα, leprosy; μορφή, form]. An advanced stage in leprosy in which the bones are affected.

Leprophobia (*lep-ro-fo'-be-ah*) [λέπρα, leprosy; φόβος, fear]. Morbid or insane dread of leprosy.

Leprophthalmia (*lep-roff-thal'-me-ah*) [λέπρα, leprosy; ὀφθαλμός, the eye]. Ophthalmia of a leprous character.

Leprosarium (*lep-ro-sa'-re-um*) [L.]. A leper-house; leprosery.

Leprosery (*lep'-ro-ser-e*) [Fr., *lèproserie*]. Same as *Leprosarium*.

Leprosity (*lep-ros'-it-e*) [*leprositas*, from λέπρα, leprosy]. Leprousness; the state of being leprous.

Leprosy (*lep'-ro-se*) [λέπρα, leprosy]. *Lepra vera; Elephantiasis græcorum; Black Leprosy; Leontiasis;* an endemic, chronic, constitutional disease analogous to syphilis, and varying in its morbid manifestations according as the brunt of the disease falls on the skin, the nerves, or other tissues. It occurs in three forms, the tuberculated, non-tuberculated or anesthetic, and the mixed tuberculated. The *tuberculated* or *nodular leprosy* is attended at the onset with debility, depression, dyspepsia, diarrhea, drowsiness, chilliness and profuse perspiration, marked vertigo, recurrent epistaxis, fever up to 104° F.; after a variable period of days or even months, coming first with edema of the eyelids, the leprous spots appear on the face and ears, and then on the anterior and external surfaces of the limbs. The exanthem is an erythema, varying from a bright-red to a purplish-red or mahogany-red tint, associated with the leprous deposit of well-defined, shiny, slightly raised patches of from one to several inches in diameter. Papules then form in crops, gradually reaching the size of a hen's egg and of a yellowish to a dark-brown color. Tuberculation does not develop until from three to six months after the commencement of the disease. Nodules are most common on the face, limbs, breast, scrotum, and penis. There is also an involvement of the mucous membranes. When the disease is fully developed, the face assumes the characteristic leonine appearance, from thickening of the skin. Ulceration eventually sets in, and the patient dies of exhaustion or complications. *Non-tuberculated leprosy* is the most common tropical form. The prodromal symptoms are marked, and are associated at first with hyperesthesia of the skin. At the end of a year the special eruption breaks out, usually on the back, shoulders, posterior aspect of the arms, nails, thighs, and sometimes in the course of nerves. The spots are one or two inches in diameter, well-defined, not raised, and of a pale-yellow color. They spread peripherally, clearing in the center, which becomes dry, scaly, and anesthetic. Paralysis is usually a late symptom, and ulceration is common. Death results from ulceration, gangrene, marasmus, or general debility. *Mixed tuberculated leprosy* is the least common form, and its symptoms are a combination of those of the other two varieties. Destruction of the cartilages of the nose and of the soft palate is common. Leprosy is due to the action of a special bacillus, and the disease is almost invariably fatal. **L., Anesthetic.** See *Leprosy, Nerve.* **L., Articular.** Synonym of *Lepra mutilans, q. v.* **L., Black,** a form in which the eruption or the crusts are pigmented. **L., Cutaneous.** See *Leprosy.* **L., Italian.** Pellagra, *q. v.* **L., Lombardian.** See *Pellagra.* **L., Macular,** a form of anesthetic leprosy characterized by the presence of pigmented or white spots. **L. of Malabar,** elephantiasis arabum. **L., Mixed Tuberculated.** See *Leprosy.* **L., Nerve,** a form of leprosy characterized by the progressive formation of the leprous neoplasm in the peripheral sensory nerves, and to some extent in the motor branches also. The condition is marked by pain along the course of the involved nerves, followed by an eruption of maculæ which as they enlarge become anesthetic. **L., Nodular.** See *L., Tubercular,* under *Leprosy.* **L., Smooth,** anesthetic leprosy. **L., Tubercular,** and **L., Tuberculated.** See *Leprosy.* **L., White.** See *Vitiligo.*

Leprotic (*lep-rot'-ik*), **Leprous** (*lep'-rus*) [λέπρα, leprosy]. Affected with, or relating to, leprosy.

Leprousness (*lep'-rus-nes*) [*leprosus*, leprous]. The state of being leprous.

Leptandra (*lep-tan'-drah*) [λεπτός, thin; ἀνήρ, male]. Culver's Root. The rhizome and rootlets of *L. virginica*, now called *Veronica virginica*. Its properties are thought to be due to a glucosid, *leptandrin*. It is a tonic, laxative, and cholagogue, and is indicated in indigestion and chronic constipation. Dose of the ext. gr. j–iij; of the fld. ext. ♏xx–ʒj.

Leptandrin (*lep-tan'-drin*) [λεπτός, thin; ἀνήρ, male]. The precipitate from a tincture of the root of *Leptandra* (*Veronica*) *virginica;* alterative, deobstruent, laxative, cholagogue, and tonic. Dose from 2 to 4 grains. Unof.

Lepthymenia (*lep-thi-me'-ne-ah*) [λεπτός, thin; ὑμήν, membrane]. Delicacy or thinness of membrane.

Lepthymenic (*lep-thi-men'-ik*) [λεπτός, thin; ὑμήν, membrane]. Relating to lepthymenia.

Lepto- (*lep'-to-*) [λεπτός, thin, small, slender]. A prefix signifying small or slender.

Leptocardia (*lep-to-kar'-de-ah*) [λεπτός, thin; καρδία, heart]. A group of fishes of which the lancelets are the only representatives.

Leptocephalia (*lep-to-sef-a'-le-ah*) [λεπτός, thin, small; κεφαλή, head]. Abnormal smallness or narrowness of the skull.

Leptocephalic (*lep-to-sef-al'-ik*), **Leptocephalous** (*lep-to-sef'-al-us*) [λεπτός, slight; κεφαλή, head]. Having an abnormally small head.

Leptocephalus (*lep to-sef'-al-us*) [λεπτός, thin; κεφαλή, head]. A monster with an abnormally small head from premature union of the frontal and sphenoid bones.

Leptocephaly (*lep-to-sef'-al-e*). See *Leptocephalia.*

Leptochasmus (*lep-to-kaz'-mus*) [λεπτός, thin; χάσμα, chasm]. Lissauer's term for a skull in which the angle formed by two lines drawn from the punctum alæ vomeris to the posterior nasal spine and the anterior margin of the foramen magnum respectively is between 94° and 114°.

Leptochroa (*lep-tok'-ro-ah*) [λεπτός, thin; χρόα, skin]. Delicacy of the skin.

Leptochrous (*lep'-tok-rus*) [λεπτός, thin; χρόα, skin]. Having a delicate skin.

Leptochymia (*lep-to-kim'-e-ah*) [λεπτός, thin; χυμός, juice]. Abnormal thinness or meagerness of the fluids of the body.

Leptodactylous (*lep-to-dak'-til-us*) [λεπτός, delicate; δάκτυλος, digit]. Characterized by slenderness of the fingers or toes, or both.

Leptodera (*lep-tod'-er-ah*) [λεπτός, thin; δέρος, skin]. A genus of vinegar eels. **L. stercoralis.** See *Thread-worms,* and *Parasites* (*Animal*), *Table of.*

Leptodermic, Leptodermous (*lep-to-der'-mik, lep-to-der'-mus*) [λεπτός, thin; δέρμα, skin]. Having a delicate skin.

Leptodontous (*lep-to-don'-tus*) [λεπτός, thin; ὀδούς, tooth]. Having thin or slender teeth.

Leptomeninges (*lep-to-men-in'-jēz*) [λεπτός, thin; μῆνιγξ, a membrane]. The arachnoid and pia, or the pia alone.

Leptomeningitis (*lep-to-men-in-ji'-tis*) [λεπτός, slight; μῆνιγξ, membrane; ιτις, inflammation]. Inflammation of the pia and arachnoid of the brain and the spinal cord, in contradistinction to *Pachymeningitis*, though meningitis alone usually signifies the same as leptomeningitis. See *Meningitis*. **L. cerebralis**, an inflammation confined usually to the pia of the convex surface of an anterior lobe of the cerebrum. **L., Cerebro-spinal**, an inflammation of the pia of the brain and cord. **L. spinalis**, an inflammation of the pia of the spinal cord. **L., Tuberculous**, an inflammation of the pia due to the presence of the tubercle-bacillus.

Leptomeninx (*lep-to-men'-ingks*) [λεπτός, delicate; μῆνιγξ, membrane: *pl.*, *Leptomeninges*]. The pia or the arachnoid; in the plural (*leptomeninges*), usually the arachnoid and pia taken together.

Leptophonia (*lep-to-fo'-ne-ah*) [λεπτός, delicate; φωνή, voice]. Delicacy, gentleness, or weakness of the voice.

Leptophonic (*lep-to-fon'-ik*) [λεπτός, thin; φωνή, voice]. Having a weak voice.

Leptoprosope (*lep-top'-ro-sōp*) [λεπτός, thin; πρόσωπον, face]. A person, or a head, with a long, narrow face.

Leptoprosopia (*lep-to-pro-so'-pe-ah*) [λεπτός, thin; πρόσωπον, face]. Narrowness of the face.

Leptoprosopic, Leptoprosopous (*lep-to-pro-sop'-ik*, *lep-to-pros'-o-pus*) [λεπτός, thin; πρόσωπον, face]. Having a long, narrow face.

Leptorhine (*lep'-tor-in*) [λεπτός, thin; ῥίς, nose]. Having a slender nose or proboscis. See *Index*.

Leptorrhinia (*lep-tor-in'-e-ah*) [λεπτός, thin; ῥίς, nose]. Narrowness of the nasal bones, or smallness of the nasal index.

Leptorrhizous (*lep-tor-i'-zus*) [λεπτός, thin; ῥίζα, root]. Having a slender root.

Leptosporangiate (*lep-to-spo-ran'-je-āt*) [λεπτός, slender; σπορά, seed; ἀγγεῖον, vessel]. In biology, having sporangia formed from a single cell.

Leptothrix (*lep'-to-thriks*) [λεπτός, thin; θρίξ, hair]. A genus of bacteria, whose elements form straight filaments, often of great length; possibly indistinguishable from the genus *Bacillus*. **L. buccalis**, occasionally found in the mouth, plays a part in the formation of dental tartar and in the production of caries of the teeth. **L. gigantea**, found in tartar of the teeth. See *Bacteria*, *Synonymatic Table of*.

Leptotrichia (*lep-to-trik'-e-ah*) [λεπτός, delicate; θρίξ, hair]. Abnormal or excessive fineness and delicacy of the hair.

Leptoxylem (*lep-to-zi'-lem*) [λεπτός, slender; ξύλον, wood]. In biology, undeveloped or rudimentary xylem.

Leptus (*lep'-tus*) [λεπτός, thin]. A genus of beetles. **L. autumnalis**, harvest bug; mower's mite. A parasite that burrows under the skin, causing lesions similar to those of itch. See *Parasites* (*Animal*), *Table of*.

Lerema (*ler-e'-mah*) [λήρημα, idle talk: *pl.*, *Leremata*]. An idle or childish utterance, as in senility, idiocy, or dementia.

Leresis (*ler-e'-sis*) [λήρησις, a speaking foolishly]. Garrulousness; insane or senile loquacity.

Leros (*le'-ros*) [λῆρος, foolish speaking]. Slight delirium, with talkativeness.

Lerp [Australian]. A kind of manna found upon the *Eucalyptus dumosa*, or mallee, an Australian shrub. **L.-amylum**, $C_6H_{10}O_5$, a peculiar carbohydrate found in the thready portion of lerp.

Lesage, Bacillus of. See *Bacteria*, *Synonymatic Table of*.

Lesbian Love [λέσβιος, Lesbian]. See *Tribadism*.

Lesbianism (*les' be-an-izm*) [λέσβιος, Lesbian]. The doctrine of Lesbian love.

Leschenema (*ies-ken-e'-mah*) [λέσχη, talk; λεσχηνεύειν, to chat]. Insane, senile, or hysteric loquacity.

Lesion (*le'-zhun*) [*læsio*; *lædere*, to hurt]. Any injury, hurt, or wound in any part of the body. In pathology, any morbid change. **L., Central**, one affecting the central nervous system. **L. of Continuity**, a division or break in any part that is normally continuous. **L., Diffuse**, one involving all the tissues of an organ. **L., Focal**, in the nervous system a circumscribed lesion giving rise to distinctive and localizing symptoms. **L., Initial, of Syphilis**, the chancre. **L., Irritative**, in the nervous system a lesion exciting the functions of the part wherein it is situated. **L. of Nutrition**, any pathologic alteration in the capillary system, consisting of increase or decrease in the amount of blood required for assimilation and absorption. **L., Organic**, a morbid structural change in the tissues of an organ. **L., Peripheral**, a lesion of the nerve-trunks or of their terminations. **L., Primary, of the Skin**, the change in the skin occurring in the developing stage of a skin-disease. This may be manifested by the macule, the papule, the tubercle, the pomphus, the phyma, the vesicle, the bulla, the pustule. **L., Primary, of Syphilis.** See *L., Initial*. **L., Secondary.** 1. In the skin, the change occurring in the primary lesion, due to irritation or other causes. It comprises erosions, ulcers, rhagades, squamæ, cicatrices or scars, crusts, and pigmentation. 2. One of the secondary lesions of syphilis. See *Syphilis*. **L., Systematic or Systemic**, in the spinal cord a lesion affecting one or more distinct systems or tracts, as in posterior sclerosis, in which the posterior columns or tracts are diseased. **L., Traumatic**, one due to an injury.

Lesser's Triangle. See *Triangles*, *Table of*.

Lethal (*le'-thal*) [*letalis*; *letum*, or *lethum*, death]. Deadly; pertaining to or producing death.

Lethal (*le'-thal*) [λήθη, forgetfulness], $C_{12}H_{26}O$. An alcohol found in spermaceti.

Lethality (*le-thal'-it-e*) [*lethalitas*, from *letum*, death]. Deadliness.

Lethargic (*leth-ar'-jik*) [ληθαργικός, from λήθη, a forgetting]. Relating to, affected with, or of the nature of, lethargy.

Lethargogenic (*leth-ar-go-jen'-ik*) [λήθαργος, forgetful; γεννᾶν, to produce]. Giving rise to lethargy.

Lethargus (*leth-ar'-gus*). See *African Lethargy*.

Lethargy (*leth'-ar-je*) [ληθαργία; λήθη, forgetfulness]. A condition of drowsiness or stupor that cannot be overcome by the will. See, also, *Somnambulism*. **L., African**, the African sleeping-sickness. **L. of Silkworms.** See *Flachèrie*.

Lethe (*le'-the*) [λήθη, forgetfulness]. Total loss of memory; amnesia.

Letheomania (*le-the-o-ma'-ne-ah*) [λήθη, oblivion; μανία, madness]. Morbid longing for narcotic drugs.

Letheon (*le'-the-on*) [λήθη, forgetfulness]. An old trade name for ethylic ether, used as an anesthetic.

Lethiferous (*leth-if'-er-us*) [λήθη, forgetfulness; *ferre*, to bear]. Producing sleep.

Letificant (*le-tif'-ik-ant*) [*lætificare*, to make glad]. A term applied to any remedy acting as a stimulant tonic in melancholy and languor.

Lettered (*let'-erd*) [*littera*, a letter]. In biology, possessing markings that resemble letters.

Letterwort (*let'-ter-wert*). Same as *Hellebore*, *q. v.*

Lettuce (*let'-us*). See *Lactucarium*.

Letzerich, Bacillus of. See *Bacteria*, *Synonymatic Table of*.

Leube and Riegel's Test-dinner. A dinner to ascertain the condition of the secretory function of the stomach. It consists of 400 c.c. of beef-soup, 200 grams of beefsteak, 50 grams of white bread, and 200 c.c. of water.

Leube's Pancreatic Meat-emulsion. See *Alimentation*, *Rectal.*

Leuc-. For words thus spelled and not found below see *Leuk-*.

Leuca (*leu'-kah*). Synonym of *Leprosy*, *q. v.*

Leucæthiops (*lu-se'-the-ops*) [λευκός, white; Αἰθίοψ, Ethiopian]. An albino of the black race.

Leuce (*lu'-se*) [λεύκη; λευκός, white]. White leprosy; also morphœa alba.

Leucemia (*lu-se'-me-ah*). See *Leukemia.*

Leuchemia (*lu-ke'-me-ah*). See *Leukemia.*

Leucin (*lu'-sin*) [λευκός, white], $C_6H_{13}NO_2$. A crystalline substance identical with amido-caproic acid, occurring in the pancreas, spleen, thymus gland, and other parts of the body. It is a product of pancreatic digestion. It may occur in the urine, especially in acute yellow atrophy of the liver and in yellow fever. In the impure form it crystallizes in rounded fatty-looking lumps often aggregated and at times exhibiting radiating striation. When pure, it forms very thin, white, glittering, flat crystals, very soluble in hot water, and oily to the touch. See *Scherer's Test* in *Tests, Table of.*

Leucinosis (*lu-sin-o'-sis*) [λευκός, white]. 1. Abnormally excessive proportion or production of leucin, as in the liver. 2. Acute yellow atrophy of the liver.

Leucism, Leucismus (*lu'-sizm*, *lu-siz'-mus*) [λευκός, white]. In biology, whiteness resulting from bleaching or etiolation; albinism.

Leucitis (*lu-si'-tis*). Same as *Sclerotitis.*

Leuco- (*lu'-ko-*). For words not found under this form see *Leuko-*.

Leucomain (*lu'-ko-mān*). See *Leukomain.*

Leukangeitis (*lu-kan-je-i'-tis*). Synonym of *Lymphangitis*, *q. v.*

Leukanilin (*lu-kan'-il-in*) [λευκός, white; *anilin*], $C_{20}H_{21}N_3$. A substance obtained by digesting the fuchsin salts with ammonium sulphid. It occurs as a white, flocculent precipitate which separates from water in small crystals. It yields rosanilin by oxidation.

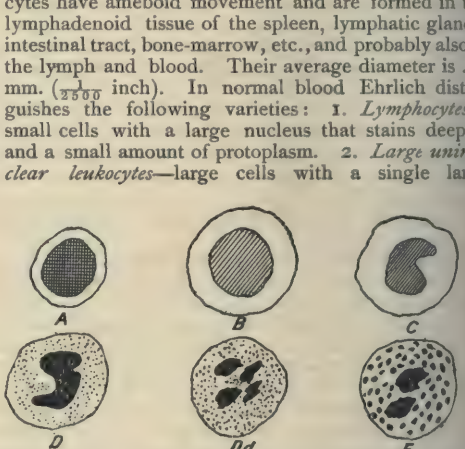
Leukasmus (*lu-kaz'-mus*). See *Leukoderma.* **L., Acquired.** See *Leukoderma.* **L., Congenital.** See *Albinismus.*

Leukemia (*lu-ke'-me-ah*) [λευκός, white; αἷμα, blood]. A disease of the blood and the blood-making organs, characterized by a more or less permanent increase in the number of white blood-corpuscles and the marrow of bone, and by enlargement of the spleen and the lymphatic glands, together or separately. The etiology is obscure; a history of malaria or syphilis has been present in some of the cases. The most characteristic symptom is the increase of white corpuscles in the blood. Instead of the ordinary ratio of white to red—1 to 500–1000—it may be 1 to 20, 1 to 10, or even 1 to 1. Interesting changes are seen in the relation of the various forms of leukocytes established by Ehrlich (see *Leukocyte*). In the myelo-splenic form of the disease, the lymphocytes are only slightly, if at all, increased. The eosinophiles are present in much larger numbers than normally. The polynuclear neutrophile forms are not increased. In addition to these, cells not seen in normal blood are found—the myelocytes, large mononuclear leukocytes, filled with neutrophile granules. They are held to originate in the bone-marrow. There is a moderate oligocythemia and a corresponding reduction in the amount of hemoglobin. The liver and the kidney may be the seats of a diffuse lymphatic infiltration; more rarely there are distinct lymphatic tumors. Charcot-Leyden crystals can be found in the blood after death. Fever, dizziness, and hemorrhage, and a peculiar form of retinitis, are often present. The disease is usually fatal.

Leukemic (*lu-ke'-mik*) [λευκός, white; αἷμα, blood]. Pertaining to leukemia.

Leuko- (*lu'-ko-*) [λευκός, white]. A prefix signifying white.

Leukoblast (*lu'-ko-blast*) [λευκός, white; βλαστός, germ]. 1. The germ of a leukocyte; also, a leukocyte itself. 2. A cell in bone-marrow, of a type that is believed to become developed into a red blood-corpuscle.



Leukocarpous (*lu-ko-kar'-pus*) [λευκός, white; καρπός, fruit]. In biology, bearing white fruit.

Leukochroos, or Leukochrus (*lu-kok'-ro-os*, *lu-kok'-rus*) [λευκός, white; χρώς, skin]. Having a white skin.

Leukocotin, or Leukocotoin (*lu-ko-ko'-tin*, *lu-ko-ko-to'-in*) [λευκός, white; *coto*], $C_{21}H_{20}O_8$. A body found in coto-bark.

Leukocrystallin (*lu-ko-kris'-tal-in*) [λευκός, white; κρύσταλλος, clear ice]. Peculiar crystals occasionally found in the blood of leukemic patients.

Leukocyte (*lu'-ko-sīt*) [λευκός, white; κύτος, cell]. The colorless or white corpuscle of the blood. Leukocytes have ameboid movement and are formed in the lymphadenoid tissue of the spleen, lymphatic glands, intestinal tract, bone-marrow, etc., and probably also in the lymph and blood. Their average diameter is .01 mm. ($\frac{1}{2500}$ inch). In normal blood Ehrlich distinguishes the following varieties: 1. *Lymphocytes*—small cells with a large nucleus that stains deeply, and a small amount of protoplasm. 2. *Large uninuclear leukocytes*—large cells with a single large nucleus, staining less deeply, and a large amount of protoplasm. 3. *Transitional forms*—cells with a single indented nucleus. 4. *Multinuclear cells*, with neutrophile granules—cells having a polymorphous nucleus or several nuclei. These constitute 70 per cent. of the entire number of white blood-corpuscles. 5. *Eosinophile cells.* In leukemia another cell, the *myelocyte*, makes its appearance. This is a large uninuclear cell, with neutrophile granules. Löwit recognizes two classes, leukoblasts and erythroblasts, the latter the antecedents of the red corpuscles. Most authorities reject this division, however. **L., Alpha,** and **L., Beta,** two terms used by Heyl, the former to express leukocytes that disintegrate during the coagulation of the blood; the latter, those that do not.

A. Lymphocyte. B. Large uninuclear leukocytes. C. Transitional forms. D.Dd. Multinuclear forms—neutrophile cells. E. Eosinophile cells.

Leukocythemia (*lu-ko-si-the'-me-ah*) [λευκός, white; κύτος, cell; αἷμα, blood]. See *Leukemia.*

Leukocythemic (*lu-ko-si-the'-mik*) [λευκός, white; κύτος, cell; αἷμα, blood]. Pertaining to leukemia.

Leukocytic (*lu-ko-sit'-ik*) [λευκός, white; κύτος, cell]. Relating to or characterized by leukocytes.

Leukocytogenesis (*lu-ko-si-to-jen'-es-is*) [λευκός, white; κύτος, cell; γεννᾶν, to beget]. The formation of white blood-corpuscles, or leukocytes.

Leukocytolysis (*lu-ko-si-tol'-is-is*) [λευκός, white; κύτος, cell; λύσις, solution]. The destruction of leukocytes.

Leukocytoma (*lu-ko-si-to'-mah*) [λευκός, white; κύτος, cell; ὄμα, tumor: *pl.*, *Leukocytomata*]. Any tumor containing cellular growths similar in constitution to the white corpuscles of the blood, such as tubercle, lupus, etc.

Leukocytosis (*lu-ko-si-to'-sis*) [λευκός, white; κύτος, cell]. A moderate and transient increase in the number of colorless blood-corpuscles, not accompanied, as in leukemia, by splenic and true glandular enlargement or disease of the bone-marrow.

Leukocytotic (*lu-ko-si-tot'-ik*) [λευκός, white; κύτος, cell]. Pertaining to leukocytosis.

Leukocyturia (*lu-ko-si-tu'-re-ah*) [λευκός, white; κύτος, cell; οὖρον, urine]. The presence of colorless blood-corpuscles in the urine.

Leukoderma (*lu-ko-der'-mah*) [λευκός, white; δέρμα, skin]. *Leukasmus; achroma cutis; leukopathia;* a congenital pigment-anomaly of the skin, in which, at the time of birth or soon after, whitish patches or bands, irregularly outlined and usually isolated, appear upon the skin of the child. See *Vitiligo.* **L., Acquired.** See *Vitiligo.* **L., Congenital.** See *Albinismus.* **L., Neuritic, L., Neurotic,** a localized pigment-atrophy, of nervous origin. **L., Syphilitic.** See *Syphilid, Pigmentary.*

Leukodermic (*lu-ko-der'-mik*) [λευκός, white; δέρμα, skin]. Exhibiting or pertaining to leukoderma.

Leukodontous (*lu-ko-don'-tus*) [λευκός, white; ὀδούς, tooth]. Having white teeth.

Leukogallol (*lu-ko-gal'-ol*) [λευκός, white; *galla*, gall], $C_{18}H_{10}Cl_{12}O_{14}$. A colorless substance, soluble in water, prepared by treating an acetic acid solution of pyrogallol with chlorin and hydrochloric acid.

Leukogasterous (*lu-ko-gas'-ter-us*) [λευκός, white; γαστήρ, belly]. White-bellied.

Leukogene (*lu'-ko-jen*) [λευκός, white; γεννᾶν, to beget]. A bleaching-agent.

Leukohemia (*lu-ko-hem'-e-ah*). See *Leukemia.*

Leukohemic (*lu-ko-hem'-ik*). See *Leukemic.*

Leukoinoitis (*lu-ko-in-o-i'-tis*) [λευκός, white; ἴς, fiber; ῖτις, inflammation]. Rheumatic inflammation of the white fibrous elements of the bronchi.

Leukol (*lu'-kol*). See *Chinolina.*

Leukolin (*lu'-ko-lin*). See *Chinolina.*

Leukolomous (*lu-kol'-o-mus*) [λευκός, white; λῶμα, border of a garment]. Having a white border.

Leukolysis (*lu-kol'-is-is*) [λευκός, white; λύσις, solution]. The process of destruction of the colorless corpuscles of the blood.

Leukoma (*lu-ko'-mah*) [λεύκωμα; λευκός, white]. An opacity of the cornea the result of an ulcer, wound, or inflammation, and presenting an appearance of ground glass. The term has been used also for albumin. See *Leukoplaques.* **L., Partial,** a leukoma circumscribed to a part of the cornea. **L., Total,** a leukoma involving the entire cornea.

Leukomain, or **Leucomain** (*lu-ko'-ma-in*) [λεύκωμα, white of egg]. The name applied by Gautier to the nitrogenous bases or alkaloids necessarily and normally developed by the vital functions or metabolic activity of living organisms, as distinguished from the alkaloids developed in dead bodies, and called by Selmi ptomains. From their chemic affinities leukomains may be divided into two groups: the *Urid acid group*, comprising *Adenin, Carnin, Gerontin, Guanin, Heteroxanthin, Hypoxanthin, Paraxanthin, Pseudoxanthin, Spermin, Xanthin;* and the *Kreatinin group*, in which are classed *Amphi-kreatinin, Cruso-kreatinin, Xantho-kreatinin,* and some unnamed bases. The appended table, p. 674, is modified from the work of Vaughan and Novy.

Leukomainemia (*lu-ko-ma-in-e'-me-ah*) [λεύκωμα, white of egg; αἷμα, blood]. The presence of leukomains in the blood; the retention or imperfect elimination of the various excretory products of the living cells of the organism.

Leukomainic (*lu-ko-ma'-in-ik*) [λεύκωμα, white of egg]. Pertaining to, or of the nature of, a leukomain.

Leukomatoid (*lu-ko'-mat-oid*). See *Leukomatous.*

Leukomatorrhea (*lu-ko-mat-or-e'-ah*) [λεύκωμα, white of egg; ῥοία, a flow]. An excessive whitish secretion. **L. salivalis,** salivation. **L. urinalis,** albuminuria. **L. vaginalis,** leukorrhea.

Leukomatosis (*lu-ko-mat-o'-sis*) [λεύκωμα, white of egg; νόσος, disease]. Abnormal increase of albumin in a part, as in the cornea, the lens, the joints; also amyloid degeneration.

Leukomatous (*lu-ko'-mat-us*) [λεύκωμα, white of egg]. Having the nature of leukoma. Affected with leukoma.

Leukomelanic (*lu-ko-mel'-an-ik*), **Leukomelanous** (*lu-ko-mel'-an-us*) [λευκός, white; μέλας, black]. Having a light, or fair skin, and black hair.

Leukomoria (*lu-ko-mo'-re-ah*) [λευκός, white, pale; μωρία, folly]. Restless or wandering melancholy; melancholia errabunda.

Leukomycosis (*lu-ko-mi-ko'-sis*) [λευκός, white; μύκης, fungus]. A name applied to leukemia, based on its supposed infectious origin.

Leukomyelitis (*lu-ko-mi-el-i'-tis*) [λευκός, white; μυελός, marrow]. Inflammation of the white or fibrous substance of the spinal cord. **L. posterioris chronica,** posterior sclerosis; locomotor ataxia.

Leukomyelopathy (*lu-ko-mi-el-op'-ath-e*) [λευκός, white; μυελός, marrow; πάθος, disease]. Any disease of the white substance of the myelon or spinal cord.

Leukon (*lu'-kon*) [λευκός, white]. In biology, a race with fair complexions and yellow or red hair. Cf. *Xanthochroia.*

Leukonecrosis (*lu-ko-ne-kro'-sis*) [λευκός, white; νέκρωσις, death]. A form of dry gangrene, distinguished by light or nearly natural color, instead of the usual dark color of gangrene.

Leukonic Acid (*lu-kon'-ik*). See *Acid.*

Leukonostoc (*lu-ko-nos'-tok*) [λευκός, white, and *nostoc*]. A genus of schizomycetes, having its elements disposed in chains and enveloped in a sheath of tough jelly. **L. mesenteroïdes,** is abundant in molasses, beet-root juice, and in sugar-refineries. See *Bacteria, Synonymatic Table of.*

Leukonychia (*lu-ko-nik'-e-ah*) [λευκός, white; ὄνυξ, nail]. A rare and peculiar whitish discoloration of the nails, caused by the presence of air beneath them.

Leukopathic (*lu-ko-path'-ik*) [λευκός, white; πάθος, disease]. Relating to or affected with leukopathia.

Leukopathy (*lu-kop'-ath-e*), **Leukopathia** (*lu-ko-path'-e-ah*) [λευκός, white; πάθος, suffering]. Any deficiency of coloring-matter; albinism. See *Leukoderma.* **L., Congenital.** See *Albinism.* **L., Acquired.** See *Leukoderma.* **L., Partial.** See *Vitiligo.* **L., Universal.** Albinism.

Leukophagium (*lu-ko-faj'-e-um*), **Leukophagum** (*lu-koff'-ag-um*) [λευκός, white; φαγεῖν, to eat]. An old remedy for pulmonary tuberculosis, consisting of almonds, rose-water, and partridge-flesh.

Leukophilous (*lu-koff'-il-us*) [λευκός, white; φίλος, loving]. In biology, light-loving.

Leukophlegmasia (*lu-ko-fleg-ma'-ze-ah*) [λευκός, white; φλέγμα, phlegm]. 1. A condition marked by a

tendency to dropsy, accompanied by a pale, flabby skin, and general edema of the whole body; edema without pitting on pressure. 2. Phlegmasia alba dolens. Also, subcutaneous emphysema. **L. Æthiopum,** African cachexia. **L. dolens puerperarum.** Same as *Phlegmasia alba dolens, q.v.* **L., Essential,** a form in which there is a rapid and widespread swelling, with fever, chills, and scanty urine. **L., Hysteric,** a peculiar form occurring in hysteric patients. **L., Primary.** See *L., Essential.* **L., Urinary,** anasarca following suppression of urine.

Leukopiper (*lu-ko-pi'-per*) [λευκός, white; *piper*, pepper]. White pepper.

Leukoplakia (*lu-ko-pla'-ke-ah*) [λευκός, white; πλάξ, surface]. Whitening of a surface. **L. buccalis,** a chronic superficial glossitis characterized by the presence of pearly-white or bluish-white patches on the surface of the tongue. This condition is also called *Leukoma* and *lingual psoriasis.* It is a rare affection in individuals under twenty, and in women. It is due to some irritant cause, such as the smoking of a pipe and the wearing of tooth-plates.

TABLE OF LEUKOMAINS.

Name.	Formula.	Discoverer.	Source.	Physiologic Action.
Amphi-creatinin.	$C_9H_{19}N_7O_4$.	Gautier.	Muscle.	
Carnin.	$C_7H_8N_4O_3$.	Weidel.	Meat-extract.	Non-poisonous.
Cruso-creatinin.	$C_5H_8N_4O$.	Gautier.	Muscle.	
Gerontin.	$C_6H_{14}N_2$.	Grandis.	Liver of dog.	Poisonous; paralyzes nerve-centers.
Guanin.	$C_5H_5N_5O$.	Unger.	Animal and vegetable tissues; guano.	Non-poisonous.
Heteroxanthin.	$C_6H_6N_4O_2$.	Salomon.	Urine.	
Hypoxanthin.	$C_5H_4N_4O$.	Scherer.	Brain, muscle, kidney, liver, spleen, certain plants, etc.	Non-poisonous; excito-motor.
Methyl-hydantoin.	$C_4H_6N_2O_2$.	Guaretchi and Mosso.	Fresh meat.	
Parareducin.	$C_6H_9N_3O$.	Thudichum.	Urine.	
Paraxanthin.	$C_7H_8N_4O_2$.	Thudichum, Salomon.	Urine.	Poisonous.
Protarnin.		Miescher.	Spawn of salmon.	
Pseudoxanthin (?)	$C_4H_5N_5O$.	Gautier.	Muscle.	
Reducin (?)	$C_{12}H_{24}N_6O_9$.	Thudichum.	Urine.	
Salamandarin.	$C_{34}H_{60}N_2O_5$.	Zalesky.	Salamander.	Poisonous.
Sarcin or sarkin.	See *Hypoxanthin.*			
Spermin.	C_2H_5N (?)	Schreiner.	Semen, testicles; Charcot-Leyden crystals; tissues in leukemia.	Non-poisonous.
Unnamed.	$C_3H_5NO_2$.	Pouchet.	Urine.	
Unnamed.	$C_7H_{12}N_4O_2$.	Pouchet.	Urine.	
Unnamed.	$C_{11}H_{24}N_{10}O_5$.	Gautier.	Muscle.	
Unnamed	$C_{12}H_{25}N_{11}O_5$.	Gautier.	Muscle.	
Unnamed.	$C_{13}H_{24}N_2O_2(C_{52}H_{96}N_8O_8PS)$.	Eliacheff.	Normal urine.	Slightly poisonous.
Unnamed.	$C_{14}H_{25}N_3O_3$.	Eliacheff.	Urine in tuberculosis.	Poisonous.
Urethrobromin.	See *Paraxanthin.*			
Xanthin.	$C_5H_4N_4O_2$.	Marcet.	Most animal tissues; certain plants; certain calculi.	Slightly poisonous; muscle-stimulant.
Xantho-creatinin.	$C_5H_{10}N_4O$.	Gautier.	Muscle.	Poisonous.

Leukophlegmatic (*lu-ko-fleg-mat'-ik*) [λευκός, white; φλέγμα, phlegm]. Affected with or pertaining to leukophlegmasia.

Leukophlegmatodes (*lu-ko-fleg-mat-o'-dēz*). See *Leukophlegmatic.*

Leukophthalmous (*lu-koff-thal'-mus*) [λευκός, white; ὀφθαλμός, eye]. Having unusually white eyes.

Leukophyl (*lu'-ko-fil*) [λευκός, white; φύλλον, leaf]. In biology, a chlorophyl-producing chromogen believed to exist in etiolated plants.

Leukoplaques (*lu'-ko-plaks*) [λευκός, white; πλάξ, surface]. The white patches of *Leukoplakia buccalis, q.v.*

Leukoplasia (*lu-ko-pla'-se-ah*). See *Leukoplakia.*

Leukoplast, or Leukoplastid (*lu-ko-plast'*, or *lu-ko-plast'-id*) [λευκός, white; πλάσσειν, to form]. In biology, one of the starch-forming, colorless, proteid bodies found in cells not exposed to light; amyloplast.

Leukoplaxia (*lu-ko-plaks'-e-ah*). See *Leukoplakia.*

Leukopleurous (*lu-ko-plu'-rus*) [λευκός, white; πλευρά, rib]. Having white sides or flanks.

Leukopodious, Leukopodous (*lu-ko-po'-de-us, lu-kop'-o-dus*) [λευκός, white; πούς, foot]. Having white feet.

Leukopogous (*lu-kop'-o-gus*) [λευκός, white; πώγων, beard]. White-bearded.

Leucopous (*lu'-ko-pus*). See *Leukopodous*.

Leukops (*lu'-kops*) [λευκός, white; ὤψ, eye]. An individual having white eyes.

Leukopterous (*lu-kop'-ter-us*) [λευκός, white; πτερόν, wings]. In biology, possessing white wings.

Leukorrhagia (*lu-kor-a'-je-ah*) [λευκός, white; ῥεγνύναι, to burst forth]. An excessive leukorrheal flow.

Leukorrhea (*lu-kor-e'-ah*) [λευκός, white; ῥοία, a flow]. A whitish muco-purulent discharge from the female genital canal, popularly called "the whites." **L., Cervical,** that due to disease of the cervix uteri. **L., Infantile,** a form occurring in female infants, due to lack of cleanliness, to irritant urine, or to worms. **L., Menstrual,** a variety occurring in young anemic girls at the menstrual period, instead of the menses. **L. nabothi,** a sero-sanguineous discharge occurring for two or three days before labor. **L. masculina syphilitica.** Synonym of *Gonorrhea, q. v.* **L. of Pregnancy,** a vaginal discharge in the pregnant woman. It is more abundant than in the non-pregnant state, and is sometimes confounded with hydrorrhœa gravidarum. **L., Periodic,** a periodic form coinciding with the menstrual periods. **L., Uterine, L., Vaginal, L., Vulval,** forms due to uterine, vaginal, and vulval inflammation respectively.

Leukorrheal (*lu-kor-e'-al*) [λευκός, white; ῥοία, flow]. Of the nature of, or pertaining to, leukorrhea.

Leukosarcoma (*lu-ko-sar-ko'-mah*) [λευκός, white; σάρκωμα, a fleshy tumor: *pl.*, *Leukosarcomata*]. A non-pigmented sarcoma.

Leukoscope (*lu'-ko-skōp*) [λευκός, white; σκοπεῖν, to inspect]. An instrument used in testing for color-blindness.

Leukosin (*lu'-ko-sin*) [λευκός, white]. A principle said by some to be present in asthma-crystals, and in crystals found in the blood in certain cases of leukemia.

Leukosis (*lu-ko'-sis*) [λευκός, white: *pl.*, *Leukoses*]. 1. Any disease of the lymphatic system. 2. Abnormal whiteness of the skin. Also, the development and progress of leukoma.

Leukospermous (*lu-ko-sper'-mus*) [λευκός, white; σπέρμα, seed]. In biology, bearing white seeds.

Leukotic (*lu-kot'-ik*) [λευκός, white]. Relating to leukoma.

Leukotin (*lu-ko'-tin*) [λευκός, white]. $C_{21}H_{20}O_6$. A crystalline substance found in *Paracoto;* it is soluble in alcohol, ether, and chloroform.

Leukotrichous (*lu-kot'-rik-us*) [λευκός, white; θρίξ, hair]. White-haired.

Leukoturic Acid (*lu-kot-u'-rik*). See *Oxalantin.*

Leukous (*lu'-kus*) [λευκός, white]. White.

Leukuresis (*lu-ku-re'-sis*) [λευκός, white; οὖρον, urine]. Albuminuria.

Leusin (*lu'-sin*). See *Leucin.*

Levant Plague. Synonym of the *Plague, q. v.* **L. Wormseed.** See *Santonica.*

Levantine Plague. Synonym of the *Plague, q. v.*

Levasseur Sign. See *Death.*

Levator (*le-va'-tor*) [L., "a lifter:" *pl.*, *Levatores*]. 1. That which raises or elevates, as certain muscles. See *Muscles, Table of.* 2. An instrument used for raising a depressed portion of the skull.

Leven (*lev'-en*). See *Leaven.*

Lever (*le'-ver*) [*levare*, to elevate]. 1. A vectis or one-armed tractor, used in obstetrics. 2. A dental instrument, used in lifting out decayed stumps. **L., Davy's,** an aorta-compressor. It is a wooden bar, which is introduced into the rectum.

Levert's Law. See *Law.*

Levicellular (*lev-e-sel'-u-lar*) [*levis*, smooth; *cellula*, cell]. Smooth-celled, as a levicellular myoma, or a levicellular muscle-fiber.

Levigable (*lev'-ig-a-bl*) [*lævigare*, to make smooth]. Susceptible of being levigated, or reduced to fine powder by a mechanical process.

Levigate (*lev'-ig-āt*) [*lævigare*, to make smooth]. To reduce to a fine powder by rubbing or grinding; to triturate.

Levigation (*lev-ig-a'-shun*) [*lævigatio; lævigare*, to make smooth]. The trituration of a substance made into a paste with water or other liquid. When performed with a muller on a slab of porphyry it is called *porphyrization.*

Levis's Apparatus. An apparatus for treating fracture of the clavicle, composed of an axillary pad and a sling. **L.'s Splints,** supporting structures made of light metal, and perforated, for use in the treatment of fractures.

Levitation (*lev-it-a'-shun*) [*levitas*, lightness]. 1. The pretended elevation of the body into the air without support, a feat professedly performed by various modern thaumaturgists. 2. The subjective sense of being aloft, and without support; a symptom in certain cases of insanity.

Levogyrous (*le-vo-ji'-rus*) [*lævus*, left; γῦρος, a turn]. See *Levorotatory.*

Levorotatory (*le-vo-ro'-tat-o-re*) [*lævus*, left; *rotare*, to turn]. Causing to turn toward the left hand; a levorotatory crystal is one that turns the rays of polarized light to the left.

Levulan (*lev'-u-lan*) [*lævus*, left], $C_6H_{10}O_5$. An anhydrid of levulose obtained from beet-sugar molasses.

Levulin (*lev'-u-lin*) [*lævus*, left]. A carbohydrate identical with synanthrose, occurring in immature grain and the tubers of certain composite flowers.

Levulinic Acid (*lev-u-lin'-ik*). See *Acid.*

Levulosan (*lev-u-lo'-san*) [*lævus*, left], $C_6H_{10}O_5$. A dehydration-product prepared by heating levulose.

Levulose (*lev'-u-lōs*) [*lævus*, left], $C_6H_{12}O_6$. The natural sugar of fruits. It reduces an alkaline solution of copper sulphate. See *Sugar, Glucose,* and *Fructose.*

Levulosuria (*lev-u-lōs-u'-re-ah*) [*lævus*, left; οὖρον, urine]. The presence of levulose, or fruit-sugar, in the urine.

Lewinin (*lu'-in-in*) [from Dr. *Lewin*, who described it]. The *alpha* resin of kava, *q. v.*; it is said by Lewin to be as effective a local anesthetic as cocain.

Lexipharmac (*leks-if-ar'-mak*) [λῆξις, cessation; φαρμακόν, poison]. An alexipharmac.

Lexipyretic (*leks-ip-i-ret'-ik*) [λῆξις, cessation; πυρετός, fever]. 1. Febrifugal; antipyretic. 2. A febrifugal medicine.

Leyden (*li'-den*) [Dutch]. A town in Holland. **L. Battery.** A series of Leyden jars connected tandem. **L.-blue.** Same as *Cobalt-blue.* **L. Jar,** a glass jar coated within and without with tinfoil, reaching nearly to the neck, and surmounted by a knobbed conductor in connection with the inner coating. It is designed for the temporary "accumulation" of electricity, or rather for the preservation of the high potential to which the inner foil may be charged. It is discharged by connecting the outer foil with the knob. The jar was first made in the town of Leyden, its discovery being due to Cuneus, a pupil of Muschenbrœck. It is also called Kleistian jar or Kleist's jar. Kleist was a prebendary of Cammin, in Pomerania, and is said to have invented the jar independently of Cuneus, and a year before him, *viz.*, in 1745. **L.,**

Periodic Vomit of. Synonym of *Angioneurotic Edema.*

Leyden's Crystals. See *Charcot-Leyden Crystals.*

Leydig's Cells. Peculiar goblet-cells found in the epidermis of aquatic vertebrata. **L., Duct of.** See *Duct.*

Liatris (*li-a'-tris*) [origin unknown]. A genus of composite-flowered herbs. **L. cylindrica, L. elegans,** and **L. spicata** are diuretic; **L. scariosa** and **L. squarrosa** are popularly esteemed as remedies for rattlesnake-bite. **L. odoratissima,** southern vanilla, contains *cumarin,* the flavoring principle of the tonka bean. Unof.

Libanotus (*lib-an-o'-tus*) [λιβανωτός, from λίβανος, frankincense]. An old name for olibanum.

Libanus (*lib'-an-us*) [λίβανος, frankincense]. Frankincense, or olibanum.

Libavius, Fuming Liquor of. An old name for anhydrous stannic chlorid.

Liber (*le'-ber*) [L.]. A book. **L. pharmaceuticus,** a dispensatory.

Liber (*li'-ber*) [*liber,* the inner bark of a tree]. The inner layer of the bark in Gymnosperms and Dicotyledons.

Liberation (*lib-er-a'-tion*) [*liberare,* to make free]. The act of freeing. **L. of the Arms,** in breech-presentations, the bringing down of the arms of the fetus when they have become extended along the sides of the child's head.

Liberomotor (*lib-er-o-mo'-tor*) [*liberare,* to disengage; *motor,* mover]. Setting free or disengaging motor energy.

Libidinous (*lib-id'-in-us*) [*libidinosus,* lustful]. Characterized by strong sexual desire.

Libido (*lib-id'-o*) [L.]. Desire; lust. **L. intestini,** desire for defecation. **L. sexualis,** lust. **L. urinæ,** desire to urinate.

Liborius, Bacillus of. See *Bacteria, Synonymatic Table of.*

Libra (*le'-brah*) [*libra,* a balance]. A weight of twelve troy ounces, or 5760 grains. Also, applied to the avoirdupois pound of sixteen ounces, or 7000 grains.

Libriform (*lib'-rif-orm*) [*liber,* inner bark; *forma,* form]. In biology, resembling liber or bast. **L. Cells,** those cells of the wood that are excessively thick-walled and resemble bast or liber-fibers.

Lice (*lis*). See *Louse.*

License (*li'-sens*) [*licentia,* license]. An official permit or authority conferring on the recipient the right and privilege of exercising his profession.

Licentiate (*li-sen'-she-āt*) [*licentiatus,* one licensed]. A term sometimes applied to a person who practises a profession by the authority of a license.

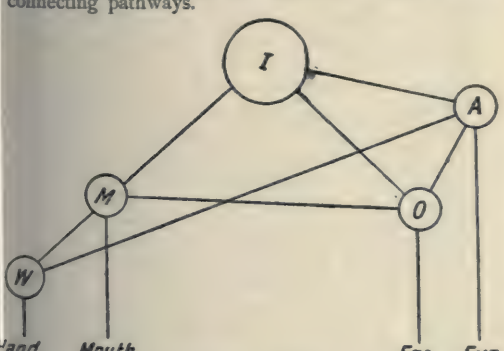
Lichen (*li'-ken*) [λειχήν, a lichen]. A generic term for a well-defined group of inflammatory affections of the skin, in which the lesions consist of solid papules throughout the entire course of the disease. **L. acuminatus,** a variety of *L. ruber* in which the papules are acuminate. It is usually a very acute variety, accompanied by grave constitutional symptoms (rigors, pyrexia, sweats, prostration), and by itching. The papules are minute, firm, conic, capped with scales, very closely aggregated, but can generally be recognized as surrounding the hair-follicles. **L. agrius.** See *Eczema papulosum.* **L. annulatus serpiginosus.** See *Seborrhœa corporis.* **L. Carrageen,** Irish moss. **L. circinatus serpiginosus.** See *Seborrhœa corporis.* **L. circumscriptus.** Same as *L. circinatus serpiginosus.* See also *Eczema papulosum.* **L. confertus,** a form characterized by the presence of superficial papules occurring in clusters. **L. corneus,** a form in which there are elevated horny patches. **L. diabeticorum.** See *Xanthoma diabeticorum.* **L. disseminatus,** a variety in which the lesions are irregularly scattered over the body. **L. ferox** or **L. ferus.** See *L. agrius.* **L. gyratus.** See *Seborrhœa corporis.* **L. hæmorrhagicus,** a petechial papular eruption. **L. inveterata,** a chronic intractable form, with marked thickening of the skin. **L. lividus,** a severe form of purpura in which hemorrhage occurs into the lesions around the follicles. **L. menti.** See *Sycosis.* **L. obtusus,** *Lichen ruber obtusus;* a variety of *L. planus* in which the lesion consists of medium-sized papules, hemispherically formed, flattened on the top, and marked in the center by a fine indentation, hard, dry, smooth, wax-like, translucent to brownish-red, and scaleless. The disease is less acute than *L. acuminatus,* itches less, and is mostly circumscribed. The hair and nails never suffer. **L. pilaris,** *Lichen spinulosus; Lichen spinosus;* an inflammatory disease of the hair-follicles, in which a spinous epidermic peg occupies the center of the papule. It is a rather rare disease and occurs mostly in children. The papules appear in crops, each one being the size of a pin's head, red, conic, and containing in its center a horny spine that projects about one-sixteenth of an inch. There is little or no itching. See also *Keratosis pilaris.* **L. planus,** *Lichen ruber planus; Lichen psoriasis;* an inflammatory skin-disease, with an eruption made up of papules that are broad and angular at the base, flat and apparently glazed on the summit, slightly umbilicated, and of a dull purplish-red color. These lesions are usually symmetrically disposed, and are generally situated on the flexor surfaces of the forearms, about the wrists, the flanks, around the waist, and the knees, and calves, and also on the mucous membranes. The papules may be discrete or may coalesce, and itching may be slight or severe. **L. planus verrucosus,** a late stage of *L. planus,* characterized by wart-like enlargements of the papillæ, which are covered with dense horny crusts of a dirty-lilac hue. They are usually seen on the lower part of the leg. **L. psoriasis.** See *L. planus.* **L. ruber,** *Lichen ruber acuminatus;* a very rare skin-disease, with lesions consisting, in the beginning, of discrete, miliary, conic papules, but, as the disease advances, becoming aggregated and forming continuous red, infiltrated, and scaling patches. The whole surface may eventually become involved. The nails of the fingers and toes become affected, being of a dirty-brown color, rough, flaky, and breaking off short. The etiology and pathology of this condition are obscure. **L. ruber acuminatus.** See *Pityriasis rubra pilaris* and *Lichen ruber.* **L. ruber moniliformis,** a rare variety in which, besides the ordinary papules and plaques, there are thick moniliform bands in the flexures of the limbs, on the abdomen, and on the neck. **L. ruber obtusus.** See *L. obtusus.* **L. ruber planus.** See *L. planus.* **L. scrofulosorum.** See *L. scrofulosus.* **L. scrofulosus,** *L. scrofulosorum;* a form occurring in strumous children. The eruption is situated on the trunk, especially upon the back, either diffusely or in patches. The papules are very small, pale, conic, and surmounted by fine scales; they cause no itching, and on fading leave a rather persistent yellowish pigmentation. **L. simplex,** *Gale bedouine;* the papular stage of eczema. See *Eczema papulosum.* **L. spinosus.** See *L. pilaris.* **L. spinulosus.** See *Keratosis pilaris* and *Lichen pilaris.* **L. strophulosus.** See *Strophulus.* **L. syphiliticus,** the minute papular syphilid. See *Syphilid, Follicular.* **L. tropicus.** See *Prickly Heat.* **L. urticatus.** See *Urticaria papulosa.*

Licheniasis (*li-ken-i'-as-is*) [λειχήν, lichen]. The condition of one affected by one of the forms of *lichen.* **L. strophulus.** See *Lichen strophulus.*

Lichenicolous (*li-ken-ik'-o-lus*) [λειχήν, a lichen; *colere*, to inhabit]. Growing as a parasite upon lichens.

Licheniform (*li-ken'-if-orm*) [λειχήν, lichen, tree-moss; *forma*, form]. Shaped like a lichen.

Lichenin (*li'-ken-in*) [λειχήν, lichen], $C_6H_{10}O_5$ or $C_{12}H_{20}O_{10}$. Moss-starch; a starch-like body found in lichens, especially in Cetraria, Ramalina, Usnea, Parmelia, Cladonia, and in Corsican moss (*Alsidium helminthochorton*). Iodin imparts a dirty-blue color to it. It is insoluble in cold water, but forms a jelly with hot water. See *Cetraria;* also, *Carbohydrates, Table of.*



Lichenism (*li'-ken-izm*) [λειχήν, lichen]. In biology, the special form of consortism or symbiosis exhibited by algæ and fungi in lichens. Cf. *Schwendener's Theory.*

Lichenoid (*li'-ken-oid*) [λειχήν, lichen; εἶδος, like]. 1. Same as *Dextrolichenin.* 2. See *Wandering Rash.*

Lichnoerythrin (*lik-no-er'-ith-rin*) [λειχήν, lichen; ἐρυθρός, red.] A group of red coloring-matters found especially in lichens.

Lichnoxanthin (*lik-no-zan'-thin*) [λειχήν, lichen; ξανθός, yellow]. A group of yellow coloring-matters occurring in both the highest and lowest classes of plants, but especially developed in lichens.

Lichtheim's Schema. A diagrammatic representation of the centers and pathways concerned in written and spoken language. In the schema, A represents the center for visual memories, and O that for auditory memories. M is the center for muscular memories concerned in speech, and W that for muscular memories connected with writing. I is the center for intellectual concepts. Taking the word "bell" as an example, at A will be stored the memory of the appearance of the bell, at O that of the sound of the word, at M the memory of the muscular movements necessary to pronounce the word, and at W those concerned in writing it. I represents the center of the intellectual concept of the object "bell"—the knowledge of its uses and properties. The lines indicate afferent, efferent, and connecting pathways.

LICHTHEIM'S SCHEMA.

Licinium (*li-sin'-e-um*) [*licium*, a thread of a web: *gen.*, *Licinii*]. Lint; surgeon's lint or charpie.

Lick (*lik*) [ME., *licken*, to lick]. To rub with the tongue; to lap.

Licoperdon (*li-ko-per'-don*). See *Lycoperdon.*

Licorice (*lik'-or-is*) [ME., *licorice*, licorice]. See *Glycyrrhiza.* **L., Indian.** See *Abrus.*

Lid [ME., *lid*, lid]. See *Eyelid.* **L.-cells,** in biology, the "stigmatic cells" which for a time close the neck of the archegonium in cryptogamic plants. **L.-clamp.** See *Blepharostat.*

Lie (*li*) [ME., *lien*, to lie]. 1. To rest in a recumbent position. 2. A popular name for a "gift-spot" or white spot upon a finger nail.

Lieberkühn's Reflector (*le'-ber-kēn*) [after *Lieberkühn*, a German physician]. A device attached to a microscope for the purpose of throwing light upon opaque objects. **L.'s Ampulla.** See *Ampulla.* **L., Crypts of.** See *Crypt.* **L., Glands of.** See *Gland.* **L.'s Jelly,** an insoluble variety of alkali-albumin formed by adding strong potash to undiluted white of egg.

Liebermann's Reaction. See *Tests, Table of.*

Liebig (*le'-big*). A celebrated German chemist and physiologist. **L.'s Beef-tea,** the soluble extractive matter of lean meat. It is prepared by macerating a pound of lean meat, free from fat and cut into small pieces, in a pint of cold water, in which ℥xxx of hydrochloric acid and gr. xl of sodium chlorid have been dissolved. The liquid is expressed and strained. **L.'s Bouillon.** See *Bouillon.* **L.'s Extractum carnis,** a proprietary preparation consisting of the soluble fibrin of meat with the natural mineral salts and a flavoring principle, osmazome. **L.'s Foods,** those infant-foods in which the starch is to a great extent converted into sugar by malting. **L.'s Infants' Food,** a highly nutritious food made in the following manner: Mix well ½ ounce of ground malt with ½ ounce of wheat-flour and 7¼ grains of potassium bicarbonate; add 1 ounce of water and 5 ounces of fresh cow's milk. Warm over a slow fire, and keep stirring until it begins to thicken. Remove from the fire, stir for five minutes, replace it on the fire, and remove it as soon as thick. As the starch is converted into dextrin and sugar by the diastase of the malt, it will become a thin and sweet liquid. Then, finally, boil it well. Strain through muslin. **L.'s Method,** a method of estimating the chlorids in the urine, by precipitation by mercuric nitrate. See also *Urea.*

Liebreich's Bandage. See *Bandage.* **L.'s Solution,** a solution of cantharidinate of potassium for hypodermatic injection in the treatment of tuberculosis. Cantharidin 2, hydrate of potassium 4 (or hydrate of sodium 3), distilled water 200. Heat to solution and add distilled water q. s. to 10,000. *Dose* by hypodermatic injection, ½ to 1 c.c. (8 to 16 minims). It causes transudation of blood-serum at the seat of the tuberculosis.

Lien (*li'-en*) [L.]. The spleen. *L. mobile.* See *Wandering Spleen.*

Lienal (*li'-en-al*) [*lien*, the spleen]. Relating to the spleen.

Lienculus (*li-en'-ku-lus*) [dim. of *lien*, spleen: *pl.*, *Lienculi*]. A detached part or exclave of the spleen.

Lienic (*li-en'-ik*) [*lien*, a spleen]. Pertaining to the spleen.

Lienitis (*li-en-i'-tis*) [*lien*, spleen; ιτις, inflammation]. Splenitis.

Lienocele (*li-en'-o-sēl*) [*lien*, a spleen; κήλη, hernia]. Hernia of some part or of all of the spleen.

Lienomalacia (*li en-o-mal-a'-se-ah*) [*lien*, spleen; μαλακία, softening]. Morbid softening of the tissue of the spleen.

Lienteric (*li-en-ter'-ik*) [λεῖος, smooth; ἔντερον, intestine]. Pertaining to or affected with lientery.

Lientery (*li'-en-ter-e*) [λεῖος, smooth; ἔντερον, intestine]. A kind of diarrhea in which the food passes rapidly through the bowels without undergoing digestion.

Liernur System. See *Sewage, Disposal of.*

Lieutaud, Uvula of. A longitudinal mesial ridge in the trigone of the bladder.

Life (*līf*) [ME., *lif*, life]. The force or principle underlying or causing the phenomena of organized beings. The power by which an organism exists and exercises self-movement in response to emotions or sensations and adapts itself to its environment. **L., Animal,** the functions depending directly on the cerebro-spinal nervous system and the voluntary muscles, as distinguished from *L., Vegetative;* that is, the functions of digestion, respiration, reproduction, etc.; **L., Change of,** that period in the life of a female at which menstruation ceases; the climacteric period. **L., Duration of.** See *Probable*. **L. Everlasting;** Cud-weed, the herbs *Gnaphalium margaritaceum* and *G. polycephalum*, tonic, astringent, and anodyne. They constitute a domestic remedy of some repute in affections of the chest and bowels. Dose of a decoction *ad lib.;* of the fld. ext. ♏xv–℥j. Unof. **L., Expectation of,** the average number of years a person is expected to live, as calculated from life-tables. The following table, taken from those constructed by Dr. W. Ogle, of the English Registrar-General's department, shows the average expectation of life at given ages, and also the number of persons of each sex, among every million born at a given time, who may be expected to be alive at the end of each year after that. The figures are based on the death-rates of the years 1871–80:—

Age.	Of 1,000,000 born, the number surviving at the end of each year of life.		Mean after-lifetime (expectation of life).	
	Males.	Females.	Males.	Females.
0	1,000,000	1,000,000	41.35	44.62
1	841,417	871,266	48.05	50.14
2	790,201	820,480	50.14	52.22
3	763,737	793,359	50.86	52.99
4	746,587	775,427	51.01	53.20
5	734,068	762,622	50.87	53.08
6	726,815	755,713	50.38	52.56
7	721,103	750,276	49.77	51.94
8	716,309	745,631	49.10	51.26
9	712,337	741,727	48.37	50.53
10	708,990	738,382	47.60	49.76

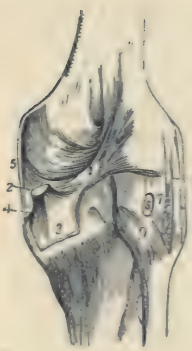
L., Extra-uterine, post-natal existence. **L., Fetal,** life of the fetus. **L., Intra-uterine,** life within the uterus. **L., Mean Duration of,** the expectation of life at birth. **L., Reproductive, L., Sexual,** that period of life during which the individual is capable of begetting or bearing offspring. **L.-root,** ragwort. The herb *Senecio aureus* gathered in flower; an expectorant, diuretic, alterative, and tonic. It was formerly used by the Indians as a vulnerary, and is a favorite remedy with eclectic practitioners. Dose of a decoction *ad lib.;* of the fld. ext. ♏xxx–℥j; of a strong tincture, ♏viij–xx; of *senecin*, its resinoid, gr. j–iij. **L.-table,** a table constructed to show the number and ages of the living, and the number and ages of the dying in a community or society. **Halley's Life-table,** the earliest English table, was constructed in the second half of the 18th century, and suggested De Mowre's Hypothesis. **Price's Northampton Life-table** was used by the Equitable Life Assurance Co., of New York, upon its establishment in 1762. These tables were not constructed by a comparison of the deaths and the living at each age, but from the deaths only; and as births and deaths are not equal, and as migration also disturbs the stability of population, these tables are not correct, as they overstate the mortality of young adults

and do not dissociate males and females. Dr. Farr constructed three **English Life-tables,** designated respectively, Nos. 1, 2, and 3, and various other tables have been made, called the **Healthy Districts,** the **Upper Class Experience,** the **Healthy Males,** the **Clerical Experience-tables,** etc. The last noteworthy table is the **New English Life-table,** by Dr. Ogle, which starts with a million males and a million females and shows the number surviving at each age, and the mean expectation of life at each age. See *Life, Expectation of.* **L.-time, Mean After.** Synonym of *Expectation of life.* See *Life, Expectation of.* **L. Vegetative.** See *L., Animal.*

Lift-cure (*lift-kūr*). The therapeutic use of the "health lift" (*q. v.*), and of other similar devices.

Ligament (*lig'-am-ent*), **Ligamentum** (*lig-am-en'-tum*) [*ligamentum; ligare,* to bind]. A band of flexible, compact connective tissue connecting the articular ends of the bones, and sometimes enveloping them in a capsule. **L., Accessory.** See *L., Coracohumeral.* **L., Acromio-clavicular,** a broad ligament covering the acromio-clavicular articulation and extending from the clavicle to the acromial process of the scapula. **L., Acromio-clavicular, Inferior,** one extending from the clavicle to the acromial process of the scapula, across the lower portion of the acromio-clavicular articulation. **L., Alar** (*of knee*), one of the two folds of synovial membrane on either side of the mucous ligament. **L., Annular** (*of radius*), that surrounding the head of the radius. **L., Annular** (*of stapes*), that extending from the base of the stapes to the oval window. **L., Annular, Anterior** (*of ankle*), the broad ligament covering the anterior surface of the ankle-joint. **L., Annular, Anterior** (*of wrist*), a strong ligament extending from the trapezium to the unciform bone, confining the flexor tendons. **L., Annular, External** (*of ankle*), that joining the posterior border of the external malleolus and the external surface of the calcaneum. **L., Annular, Internal** (*of ankle*), one joining the internal malleolus and the inner surface of the os calcis. **L., Annular, Posterior** (*of carpus*), a strong ligament reaching from the styloid process and lower end of the radius, across the back of the wrist to the styloid process of the ulna. **L., Anterior** (*of ankle*), a small ligament in front of the ankle-joint. **L., Anterior** (*of elbow*), that extending from the coronoid process of the ulna to the coronoid fossa of the humerus. **L., Anterior** (*of knee*), the ligamentum patellæ. **L., Anterior** (*of malleus*), that extending from the spine of the sphenoid to the anterior portion of the head and neck of the malleus. **L., Anterior** (*of uterus*), one of the fibrous and peritoneal folds extending from the bladder to the uterus. **L., Anterior** (*of wrist*), a strong, broad ligament extending from the anterior surface of the upper row of carpal bones to the lower ends of the ulna and radius. **L., Arcuate,** one of the arched ligaments extending from the body of the diaphragm to the last rib, and to the transverse process of the first lumbar vertebra. **L., Arnold's.** See *L., Suspensory* (*of incus*). **L., Arterial,** the fibrous remains of the ductus arteriosus. **L., Aryteno-epiglottic,** one of the ligamentous folds joining the epiglottis and the arytenoid cartilage. **L., Arytenoid, Inferior,** one of the false vocal bands. **L., Astragalo-calcaneal, External,** that joining the external surface of the astragalus and the outer margin of the calcaneum. **L., Astragalo-calcaneal, Internal,** one extending from the os calcis to the posterior margin of the sustentaculum tali. **L., Astragalo-calcaneal, Posterior.** See *L., Calcaneo-astragaloid, Posterior.* **L., Astragalo-navicular, Superior.** See *L., Astragalo-scaphoid, Superior.* **L., Astragalo-scaphoid, Internal,** one joining the inner surfaces of the astragalus and the scaphoid. **L., Astragalo-scaphoid, Superior,** one joining the anterior extremity of the astragalus and the upper surface of the scaphoid. **L., Atlanto-axial.** See *L., Atlo-axoid.* **L., Atlanto-axial, Deep.** See *L., Atlo-axoid, Anterior.* **L., Atlanto-axial, Posterior,** one joining the neural arches of the atlas and the axis. **L., Atlanto-axial, Superficial.** See *L., Atlanto-axial, Anterior.* **L., Atlanto-occipital.** See *L., Atlo-occipital.* **L., Atlanto-occipital, Posterior.** See *L., Occipito-atlantal, Posterior.* **L., Atlo-axoid,** that joining the atlas and the axis. **L., Atlo-axoid, Anterior,** that joining the ventral margins of the atlas and the axis. **L., Atlo-occipital,** that joining the atlas and the occiput. **L., Auricular, Anterior,** a broad ligament extending from the zygoma to the cauda helicis. **L., Auricular, Posterior,** one reaching from the mastoid process to the posterior surface of the ear. **L., Auricular, Superior,** a portion of the temporal fascia, inserted into the upper portion of the cartilage of the ear. **L. of Barkow,** ligamentous fibers in the fatty tissue in the upper portion of the olecranon fossa. **L., Bellini's.** See *L., Tendino-trochanterian.* **L., Bertin's,** the ilio-femoral ligament. **L. of Bigelow.** See *L., Ilio-femoral.* **L., Broad** (*of liver*), a broad fold of peritoneum extending from the diaphragm to the upper surface of the liver. **L., Broad** (*of lungs*), one of the folds of the pleura, connecting the lower surfaces of the lungs with the diaphragm. **L., Broad** (*of uterus*), a fold of peritoneum extending laterally from the uterus to the pelvic wall. **L., Burns'** (*Allen*). See *L., Hey's.* **L., Calcaneo-astragaloid, Internal.** See *L., Astragalo-calcaneal, Internal.* **L., Calcaneo-astragaloid, Interosseous,** that uniting the calcaneum and the astragalus. **L., Calcaneo-astragaloid, Posterior,** one joining the calcaneum and the posterior border of the astragalus. **L., Calcaneo-cuboid, Dorsal.** See *L., Calcaneo-cuboid, Superior.* **L., Calcaneo-cuboid, Internal,** one joining the inner surfaces of the calcaneum and the cuboid. **L., Calcaneo-cuboid, Interosseous.** See *L., Calcaneo-cuboid, Internal.* **L., Calcaneo-cuboid, Long,** one running from the under surface of the calcaneum to the under surface of the cuboid. **L., Calcaneo-cuboid, Short,** a thick ligament extending between the os calcis and the under surface of the cuboid. **L., Calcaneo-cuboid, Superior,** one attached to the dorsal surface of the calcaneum, and inserted into the dorsal surface of the cuboid. **L., Calcaneo-fibular,** that joining the apex of the external malleolus to the outer surface of the calcaneum. **L., Calcaneo-navicular, Inferior.** See *L., Calcaneo-scaphoid, Inferior.* **L., Calcaneo-scaphoid, Dorsal.** See *L., Calcaneo-scaphoid, External.* **L., Calcaneo-scaphoid, External,** that extending from the calcaneum at its articulation with the astragalus to the external surface of the scaphoid. **L., Calcaneo-scaphoid, Inferior,** one joining the anterior and inner end of the calcaneum to the under surface of the scaphoid. **L., Calcaneo-scaphoid, Interosseous.** See *L., Calcaneo-scaphoid, External.* **L., Calcaneo-scaphoid, Plantar.** See *L., Calcaneo-scaphoid, Inferior.* **L., Calcaneo-scaphoid, Superior.** See *L., Calcaneo-scaphoid. External.* **L., Camper's,** the deep layer of the perineal fascia covering the bulb of the urethra and the crura of the penis. **L., Capsular,** a heavy fibrous structure surrounding an articulation, and lined by synovial membrane. **L., Carcassonne's.** See *L., Pubo-vesical, Middle.* **L., Carpal, Anterior,** that covering the palmar surface of the carpus. **L., Carpal, Common,** the annular ligament of the wrist-

joint. **L., Carpal, Dorsal,** short ligaments binding together the dorsal surfaces of the carpal bones. **L., Carpal, Posterior.** See *L., Annular, Posterior* (*of carpus*). **L., Carpo-metacarpal, Dorsal,** those joining the dorsal surfaces of the carpal and metacarpal bones. **L., Carpo-metacarpal, Interosseous,** one joining the os magnum and the unciform to the third and fourth metacarpal bones. **L., Carpo-metacarpal, Palmar,** those joining the palmar surfaces of the metacarpal to the carpal bones. **L., Caudal,** fibrous tissue uniting posteriorly the two lower vertebræ of the coccyx. **L., Check,** one controlling the movements of a joint. **L., Ciliary.** See *L. pectinatum.* **L., Cleido-costal.** See *L., Rhomboid.* **L., Colles'.** See *L., Triangular.* **L., Conoid,** the inner portion of the coraco-clavicular ligament. It is attached to the coracoid process of the scapula and the coronoid tubercle of the clavicle. **L., Cooper's Suspensory.** See *L., Suspensory* (*of Mamma*). **L., Coraco-acromial,** a triangular-shaped ligament extending from the tip of the acromial process to the outer surface of the coracoid process of the scapula. **L., Coraco-clavicular,** that joining the coracoid process of the scapula and the clavicle. **L., Coraco-humeral,** that joining the coracoid process of the scapula and the upper and posterior portion of the capsule of the shoulder-joint and the upper part of the humerus. **L., Coracoid,** a fibrous structure forming the scapular foramen, extending from the coracoid process to the supra-scapular notch. **L., Corniculo-pharyngeal,** ligamentous fibers extending from the cornicula of the larynx to the walls of the pharynx. **L., Coronary** (*of knee*), short fibers binding the semilunar cartilages to the head of the tibia. **L., Coronary** (*of liver*), a peritoneal fold extending from the posterior edge of the liver to the diaphragm. **L., Coronary** (*of radius*). See *L., Annular* (*of radius*). **L., Costo-central,** ligamentous tissue binding the head of a rib to the vertebral body. **L., Costo-central, Anterior,** a fan-shaped ligament extending from the vertebræ and the inter-vertebral cartilages to the head of the rib. **L., Costo-clavicular.** See *L., Rhomboid.* **L., Costo-colic.** See *L., Phrenico-colic.* **L., Costo-coracoid,** that joining the first rib and the coracoid process of the scapula. **L., Costo-pericardiac,** that joining the upper costo-sternal articulations with the pericardium. **L., Costo-sternal, Anterior,** a fibrous structure joining the sternum and the anterior edges of the cartilages of the true ribs. **L., Costo-sternal, Posterior,** one joining the sternum and the posterior surface of the cartilages of the true ribs. **L., Costo-transverse,** one of the ligaments binding the ribs to the adjacent transverse processes of the dorsal vertebræ. **L., Costo-transverse, Anterior.** See *L., Costo-transverse, Superior.* **L., Costo-transverse Interosseous.** See *L., Costo-transverse, Middle.* **L., Costo-transverse, Long.** See *L., Costo-transverse, Superior.* **L., Costo-transverse, Middle,** one running between the anterior surface of the transverse process of a dorsal vertebra and the neck of the adjacent rib. **L., Costo-transverse, Posterior,** one joining the transverse process of a dorsal vertebra and the tubercle of the adjacent rib. **L., Costo-transverse, Superior,** one extending between the lower margin of the transverse process of a dorsal vertebra, and the crest on the upper margin of the neck of the subjacent rib. **L., Costo-vertebral,** one of those binding the ribs to the adjacent vertebræ. **L., Costo-vertebral, Interarticular,** one of the strong ligaments joining the dorsal intervertebral fibro-cartilages and the crests on the heads of the ribs. **L., Costo-xiphoid,** fibrous tissue binding the cartilages of the sixth and seventh ribs to the xiphoid cartilage. **L., Cotyloid,** a ring of fibro-cartilaginous tissue at the margin of the acetabulum. **L., Cowper's.** Same as *L., Pubic.* **L., Cranio-vertebral,** one of those extending between the cranium and the vertebræ. **L., Crico-arytenoid, Posterior,** one of those joining the cricoid and arytenoid cartilages posteriorly. **L., Crico-pharyngeal,** that extending between the upper and posterior margin of the cricoid cartilage and the anterior pharyngeal wall. **L., Crico-Santorinian,** one of those binding together Santorini's cartilages and the cricoid cartilage. **L., Crico-thyroid,** one of those joining the cricoid and thyroid cartilages. **L., Crico-thyroid, Anterior,** one on the anterior surfaces of the cricoid and thyroid cartilages. **L., Crico-thyroid, Middle,** the crico-thyroid membrane. **L., Crico-tracheal,** that joining the cricoid cartilage and the uppermost tracheal ring. **L., Crucial** (*of atlas*). See *L., Cruciform.* **L., Crucial** (*of the fingers*), one of the small ligaments running obliquely on the palmar surface of the phalangeal joints. **L., Crucial, Anterior,** the smaller crucial ligament of the knee, extending from the upper surface of the tibia to the inner surface of the external condyle of the femur. **L., Crucial, External.** See *L., Crucial, Anterior.* **L., Crucial, Internal.** See *L., Crucial, Posterior.* **L., Crucial, Posterior,** one extending from the popliteal notch of the tibia, and the external semilunar cartilage, to the anterior portion of the internal condyle of the femur. **L., Cruciate,** a Y-shaped process of the deep fascia of the leg, situated at the bend of the ankle. It extends from the internal malleolus to the external surface of the anterior portion of the calcaneum. **L., Cruciform,** a cross-shaped ligament, formed by the transverse ligament of the atlas and a vertical band of fibers extending from the middle of this ligament to the body of the axis. **L., Cuneiform, Interosseous.** See *L., Intercuneiform.* **L., Deltoid.** See *L., Lateral Internal* (*of ankle-joint*). **L., Dentate.** See *L., Denticulate.* **L., Denticulate,** a band of fibrous connective tissue passing from the arachnoid to the pia in the interval between the anterior and posterior nerve-roots. **L., Douglas's,** the folds of peritoneum extending between the dorsal surface of the uterus and the ventral surface of the rectum. **L., Duodeno-renal,** a peritoneal fold joining the transverse mesocolon and the parietal peritoneum in the region of the right kidney. It forms the posterior boundary of Winslow's foramen. **L. of Ellis.** See *L. of the Rectum.* **L., External** (*of malleus*), that running from the outer wall of the tympanum to the crista capitis mallei. **L., Falciform.** a sickle-shaped expansion of the great sacro-ischiatic ligament, extending along the inner margin of the tuberosity and inferior ramus of the ischium. **L., Falciform** (*of liver*). See *L., Broad* (*of liver*). **L. of Fallopius.** See *L., Poupart's.* **L., False** (*of bladder*), one of the peritoneal folds radiating from the urinary bladder. **L., False, Superior** (*of the bladder*), one of the peritoneal folds, running in the median line, from the fundus of the bladder to the umbilicus. **L., Femoral.** See *L., Hey's.* **L., Flood's,** the gleno-humeral ligament. **L., Gastro-colic,** the fold of the great omentum attached to the colon and the stomach. **L., Gastro-hepatic,** the fold of the great omentum attached to the stomach and the liver. **L., Gastro-lienal.** See *L., Gastro-splenic.* **L., Gastro-pancreatic,** a sickle-shaped peritoneal fold joining the posterior surface of the stomach and the anterior surface of the pancreas. **L., Gastro-phrenic.** See *L., Phrenico-gastric.* **L., Gastro-splenic,** a peritoneal fold joining the gastric cul-de-sac and the



LIGAMENTS OF ELBOW-JOINT.

1. Humerus. 2. Ulna. 3. Radius. 4. External lateral ligament. 5. Orbicular ligament. 6. Posterior ligament. 7, 8. Condyles of humerus. 9. Interosseous membrane.

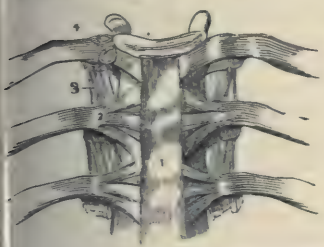
RIGHT KNEE-JOINT, INTERNAL LIGAMENTS, ANTERIOR VIEW.

1. Lower extremity of femur. 2. Anterior crucial ligament. 3. Posterior crucial ligament. 4. Transverse ligament. 5. Intercondylar fossa. 6. Semi-lunar fibro-cartilages (internal). 7 Semi-lunar fibro-cartilages (external). 8. Ligamentum patellæ. 9. Tubercle of tibia. 10. Capsular ligament. 11. Interosseous membrane.

LIGAMENTS OF RIGHT KNEE-JOINT, POSTERIOR VIEW.

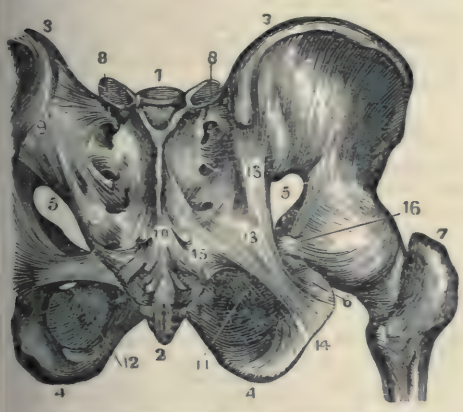
1. Posterior ligaments, or ligamentum Winslowii (oblique fasciculus). 2. Tendon of semi-membranous muscle. 3. Tibia. 4. Bursa. 5. Internal lateral ligament. 6. Long external lateral ligament. 7. Short external lateral ligament. 8 Popliteus muscle. 9. Posterior, or internal crucial ligament.

a. Anterior common ligament. *b*. Anterior occipito-atloid ligament. *c*. Anterior common ligament (continuation). *d*. Anterior atlo-axial ligament. *e*. Capsular ligament. *f*. Synovial membrane. *g*. Lateral occipito-atloid ligament.

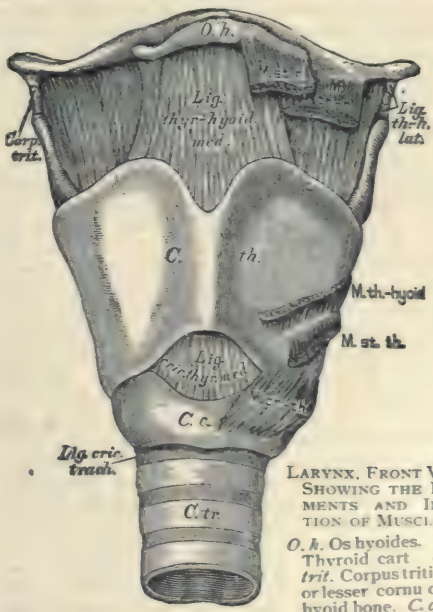


LIGAMENTS OF THE SHOULDER-JOINT.

1. Superior acromio-clavicular ligament. 2. Coraco-clavicular. 3. Coraco-acromial. 4. Transverse. 5. Capsular. 6. Coraco-humeral. 7. Tendon of long head of biceps.



LIGAMENTS OF THE OCCIPITO-ATLOID JOINT.



1. Anterior common ligament. 2. Anterior costo-vertebral, or stellate ligament. 3. Anterior costo-transverse ligament.

LIGAMENTS OF THE COSTO-VERTEBRAL ARTICULATIONS.

LIGAMENTS OF THE PELVIS, POSTERIOR VIEW.

1. Articular surface of sacrum for last lumbar vertebra. 2. Coccyx. 3. Crest of ilium. 4. Tuberosity of ischium. 5. Great sacro-sciatic foramen. 6. Lesser sacro-sciatic foramen. 7. Great trochanter. 8. Posterior sacro-iliac ligament. 9. Posterior inferior spine of ilium. 10. Supra-spinous ligament. 11. Obturator membrane. 12. Lesser sacro-sciatic foramen. 13, 14. Great sacro-sciatic ligament. 15. Lesser sacro-sciatic ligament. 16 Spine of ischium.

LARYNX, FRONT VIEW, SHOWING THE LIGAMENTS AND INSERTION OF MUSCLES.

O. h. Os hyoides. *C. th.* Thyroid cart. *Corp. trit.* Corpus triticeum or lesser cornu of the hyoid bone. *C. c.* Cricoid cart. *C. tr.* Tracheal cartilage. *Lig. thyr.-hyoid med.* Middle thyro-hyoid ligament. *Lig. th.-h. lat.* Lateral thyro-hyoid ligament. *Lig. cric.-thyr. med.* Middle crico-thyroid ligament. *Lig. cric.-trach.* Crico-tracheal ligament. *M. st.-h.* Sterno-hyoid muscle. *M. th.-hyoid.* Thyro-hyoid muscle. *M. st.-th.* Sterno-thyroid muscle. *M. cr.-th.* Crico-thyroid muscle.

hilum of the spleen. **L. of Gerdy,** the suspensory ligament of the axilla, extending from the coracoid process to the skin surrounding the hollow of the axilla. **L., Gimbernat's,** a triangular expansion of the aponeurosis of the external oblique muscle, connected anteriorly to Poupart's ligament and attached to the ilio-pectineal line. **L., Gleno-humeral,** a portion of the coraco-humeral ligament, attached to the inner and upper portion of the bicipital groove. **L., Glenoid,** one of those joining the phalanges (palmar surfaces) and the corresponding metacarpal bones. **L., Glenoid** (*of scapula*), a ring of fibro-cartilaginous tissue attached to the rim of the glenoid fossa. **L., Glosso-epiglottic,** an elastic ligamentous band connecting the epiglottis to the hyoid bone. **L., Glosso-epiglottidean.** See *L., Glosso-epiglottic.* **L., Helmholtz's,** that portion of the anterior ligament of the malleus that is attached to the spina tympanica major. **L., Hepatico-colic,** a peritoneal fold joining the under surface of the right lobe of the liver and the ascending meso-colon. **L., Hepatico-duodenal,** a peritoneal fold running from the transverse fissure of the liver to the duodenum. It forms the anterior boundary of Winslow's foramen. **L., Hepatico-renal.** See *L., Hepatico-colic.* **L., Hey's,** also called the femoral ligament; a sickle-shaped expansion of the fascia lata. **L., Hunter's,** a term for the round ligament of the uterus. See *L., Round* (*of uterus*). **L., Hyo-epiglottic,** one joining the under surface of the epiglottis and the upper surface of the hyoid bone. **L., Ilio-femoral,** a strong ligament extending from the anterior inferior iliac spine to the lesser trochanter and the intertrochanteric line. **L., Ilio-femoral, Anterior,** the anterior portion of the ilio-femoral ligament. **L., Ilio-femoral, Inferior.** See *L., Ilio-femoral, Anterior.* **L., Ilio-femoral, Lateral.** See *L., Ilio-femoral, Superior.* **L., Ilio-femoral, Superior,** one extending from the anterior inferior spine of the ilium to the proximal end of the anterior intertrochanteric line. **L., Ilio-lumbar,** a ligament extending from the transverse process of the fifth lumbar vertebra to the iliac crest and the anterior surface of the sacro-iliac synchondrosis. **L., Ilio-lumbar, Inferior.** See *L., Ilio-lumbar.* **L., Ilio-lumbo-vertebral.** See *L., Ilio-lumbar.* **L., Ilio-pectineal,** that portion of the pelvic fascia extending from the ilio-pectineal line to the capsular ligament of the hip. **L., Ilio-pubic.** See *L., Poupart's.* **L., Ilio-sacral, Anterior.** See *L., Sacro-iliac, Anterior.* **L., Ilio-sacral, Interosseous.** See *L., Sacro-iliac, Interosseous.* **L., Ilio-sacral, Long Posterior.** See *L., Sacro-iliac, Oblique.* **L., Ilio-sacral, Short Posterior.** See *L., Sacro-iliac, Short.* **L., Ilio-trochanteric.** See *L., Ilio-femoral, Superior.* **L., Inferior** (*of glottis*), one of the inferior or true vocal bands. **L., Inferior** (*of malleus*), one extending from the handle of the malleus to the outer wall of the tympanum. **L., Infundibulo-ovarian,** that portion of the free edge of the broad ligament of the uterus extending between the infundibulum and the pelvic end of the ovary. **L., Infundibulo-pelvic,** that portion of the free edge of the broad ligament of the uterus joining the infundibulum and the pelvic wall. **L., Inguinal.** See *L., Poupart's.* **L., Inguinal, External,** the part of Poupart's ligament running from the anterior superior iliac spine to the fascia lata. **L., Interarticular** (*of hip*). See *L. teres.* **L., Interarticular** (*of ribs*). See *L., Costo-vertebral, Interarticular.* **L., Interchondral,** one of those joining adjacent costal cartilages. **L., Interclavicular,** one joining the sternal extremities of the clavicles and the sternum. **L., Intercostal,** one of those joining adjacent ribs. **L., Intercostal, External,** one of those filling the intercostal spaces externally between the sternum and the intercostal muscles. **L., Intercostal, Internal,** one of the fibrous bands uniting adjacent ribs. **L., Intercrural,** one of those connecting the laminæ of the vertebræ. **L., Intercuneiform,** one of those joining the cuneiform bones of the tarsus. **L., Interhyal,** one in the embryo joining the malleus and the stylohyal cartilage. **L., Interlobular,** a prolongation of the pleura, between the lobes of the lungs. **L., Intermetacarpal,** one of those joining the metacarpal bones. **L., Intermetacarpal, Dorsal,** one of four ligaments running transversely across the dorsal surfaces of the upper ends of the metacarpal bones. **L., Intermetacarpal, Palmar,** one of those joining the palmar surfaces of the upper ends of the metacarpal bones. **L., Intermetatarsal,** one of those joining the metatarsal bones. **L., Intermetatarsal, Dorsal,** a ligamentous structure joining the dorsal surfaces of the bases of the metatarsal bones. **L., Intermetatarsal, Plantar,** one of those joining the plantar surfaces of the upper ends of the metatarsal bones. **L., Intermuscular,** a fascial prolongation between muscles. **L., Interosseous, Inferior Tibio-fibular.** See *L., Tibio-fibular Interosseous, Inferior.* **L., Interspinal.** See *L., Interspinous.* **L., Interspinous,** one extending between the spinous processes of adjacent vertebræ. **L., Intertransverse,** one extending between the transverse processes of adjacent vertebræ. **L., Ischio-capsular,** one extending from the ischium, near the acetabulum, to the zona orbicularis. **L., Ischio-femoral,** one running from the ischium to the great trochanter. **L., Jugal** (*of larynx*). See *L., Crico-Santorinian.* **L., Lateral** (*of liver*), one of the peritoneal folds between the sides of the liver and the under surface of the diaphragm. **L., Lateral, External** (*of ankle*), that running between the external malleolus and the calcaneum. **L., Lateral, External** (*of carpus*), that extending from the scaphoid bone to the styloid process of the radius. **L., Lateral, External** (*of elbow*), that extending from the annular ligament of the radius to the external condyle of the humerus. **L., Lateral, External** (*of jaw*), that extending from the lower border of the zygoma to the outer surface of the neck of the inferior maxilla. **L., Lateral, External** (*of knee*), that joining the head of the fibula and the internal condyle of the tibia. **L., Lateral, External** (*of wrist*). See *L., Lateral, External* (*of carpus*). **L., Lateral, Internal** (*of ankle-joint*), one joining the internal malleolus, and the astragalus, calcaneum, and scaphoid. **L., Lateral, Internal** (*of carpus*), a ligamentous cord joining the styloid process of the ulna, the pisiform bone, and the anterior annular ligament. **L., Lateral, Internal** (*of elbow*), one extending from the coronoid process of the ulna and the inner edge of the sigmoid fossa, to the internal condyle of the humerus. **L., Lateral, Internal** (*of jaw*). See *L., Lateral, Internal* (*of Temporo-maxillary articulation*). **L., Lateral, Internal** (*of knee*), one extending from the internal condyle of the femur to the internal condyle and shaft of the tibia. **L., Lateral, Internal** (*of temporo-maxillary articulation*), one extending from the inferior maxilla, near the inferior dental foramen, to the spinous process of the sphenoid bone. **L., Lateral, Long External** (*of knee*), one running from the external condyle of the femur to the head of the fibula. **L., Lateral, Short External** (*of knee-joint*), one extending from the head of the fibula to the external condyle of the femur and posterior portion of the

capsular ligament. **L., Lateral, Short Internal** (*of knee-joint*), one joining the upper portion of the tibia and the internal fibro-cartilage. **L., Lauth's,** the transverse ligament of the atlas. **L., Longitudinal** (*of liver*). See *L., Broad* (*of liver*). **L., Lumbo-costal,** the anterior edge of the lumbo-dorsal fascia. **L., Lumbo-iliac.** See *L., Ilio-lumbar.* **L., Lumbo-sacral,** a part of the ilio-lumbar, extending from the sacrum to the ilium, across the sacro-iliac synchondrosis. **L., Mauchart's.** Same as *L., Odontoid, Alar.* **L., Metacarpal, Transverse,** one joining the distal extremities of the four inner metacarpal bones. **L., Metacarpo-phalangeal, Anterior.** See *L., Glenoid.* **L., Metacarpo-phalangeal, Lateral,** one joining the lateral surfaces of the phalanges and metacarpal bones. **L., Metatarsal, Interosseous,** one of those joining adjacent metatarsal bones. **L., Metatarsal, Transverse,** one uniting the distal extremities of the metatarsal bones. **L., Metatarso-phalangeal, Lateral,** one joining the lateral surfaces of the phalanges and metatarsal bones. **L., Metatarso-phalangeal, Plantar,** one of those joining the plantar surfaces of the phalanges and metatarsal bones. **L., Mucous** (*of knee-joint*), a fold of synovial membrane extending from the intercondyloid fossa to the lower margin of the patella. **L., Naviculo-cuboid,** one of those between the scaphoid and cuboid bones. **L., Naviculo-cuneiform,** one of those joining the scaphoid and cuneiform bones. **L., Oblique** (*of forearm*). See *L., Round* (*of forearm*). **L., Obturator,** the obturator membrane. **L., Obturator, External.** See *L., Occipito-atlantal, Posterior.* **L., Occipito-atlantal, Lateral,** one of those joining the transverse processes of the atlas to the jugular processes of the occipital bone. **L., Occipito-atlantal, Posterior,** one joining the dorsal arch of the atlas and the posterior margin of the great foramen. **L., Occipito-atloid, Anterior,** a ligament joining the anterior arch of the atlas to the anterior margin of the great foramen. **L., Occipito-axial.** See *L., Occipito-axoid.* **L., Occipito-axoid,** a strong ligament attached to the clivus of Blumenbach above and to the body of the axis and adjoining vertebra below. **L., Odontoid,** any one of the broad, strong ligaments arising on either side of the apex of the odontoid process and connecting the atlas with the skull. **L., Odontoid, Alar.** See *L., Odontoid, Lateral.* **L., Odontoid, Lateral,** one of the ligaments joining the condyles of the occiput and the odontoid process of the axis. **L., Odontoid, Middle,** one joining the anterior margin of the great foramen and the tip of the odontoid process. **L., Omoclavicular.** See *L., Coraco-clavicular.* **L., Orbicular** (*of radius*). See *L., Annular* (*of radius*). **L., Ovarian,** a band of muscular fibers, extending from the posterior surface of the uterus on either side to the ovary. **L., Palmar.** See *L., Glenoid.* **L., Palpebral.** See *L., Tarsal.* **L., Palpebral, External,** that joining the outer margin of the orbit and the tissues of the eye-lid. **L., Palpebral, Internal,** one extending from the nasal process of the superior maxilla to the lacrymal spine of the lacrymal bone and the inner end of the tarsal cartilage. **L. patellæ,** a strong fibrous structure, extending from the tubercle of the tibia upward to become the tendon of the quadriceps extensor muscle; it embraces the patella. **L., Patellar, Lateral,** one of those joining the sides of the condyles of the femur and the patella. **L. pectinatum,** the spongy tissue at the junction of the cornea and sclera in the sinus of the anterior chamber of the eye. It forms the root of the iris. **L., Phalangeal, Anterior,** one of the ligaments on the palmar and plantar surfaces of the phalanges. **L., Phalangeal, Lateral,** one of those joining the sides of contiguous phalanges. **L., Phrenico-colic,** a peritoneal fold joining the diaphragm and the splenic flexure of the colon. **L., Phrenico-gastric,** a peritoneal fold between the diaphragm and the cardiac end of the stomach. **L., Phreno-colic.** See *L., Phrenico-colic.* **L., Phreno-splenic.** See *L., Suspensory* (*of spleen*). **L., Plantar, Deep.** See *L., Calcaneo-cuboid, Short.* **L., Plantar, Long.** See *L., Calcaneo-cuboid Long.* **L., Plantar, Short.** See *L., Calcaneo-cuboid, Short.* **L., Pleuro-colic.** See *L., Phrenico-colic.* **L., Posterior** (*of ankle-joint*), a transverse ligament covering the ankle-joint posteriorly. **L., Posterior** (*of elbow*), a ligament covering the elbow posteriorly. **L., Posterior** (*of incus*), one joining the horizontal process of the incus and the posterior tympanic wall. **L., Posterior** (*of knee-joint*), one bounding the knee posteriorly. **L., Posterior** (*of malleus*), the posterior portion of the external ligament of the malleus. **L., Posterior** (*of sacro-coccygeal articulation*). See *L., Sacro-coccygeal, Posterior.* **L., Posterior** (*of wrist*), one covering the dorsal surface of the carpus. **L., Poupart's,** the ligament extending from the anterior superior spine of the ilium to the spine of the pubis and the pectineal line. It is the lower portion of the aponeurosis of the external oblique muscle. **L., Pterygo-maxillary,** one joining the apex of the internal pterygoid plate of the sphenoid and the posterior extremity of the internal oblique line of the lower jaw. **L., Pubic,** a portion of the fascia lata attached to the crest of the pubes. **L., Pubic, Anterior,** a band of fibrous tissue covering the anterior surface of the pubis. **L., Pubic, Inferior,** a triangular ligament, extending from the symphysis of the pubis to the rami of the pubic bones. **L., Pubic, Posterior,** one covering the symphysis pubis posteriorly. **L., Pubic, Superior,** one extending across the upper surface of the symphysis pubis. **L., Pubo-femoral,** one joining the margin of the obturator foramen, the pectineal eminence and the superior ramus of the pubis with the lesser trochanter of the femur. **L., Pubo-prostatic,** the anterior true ligament of the bladder. **L., Pubo-vesical, Middle,** in the female, a ligament between the anterior surface of the bladder, the inferior pubic ligament and the crura of the clitoris. **L., Pulmonary.** See *L., Broad* (*of lung*). **L., Pylori-colic,** one running from the pyloric end of the stomach to the transverse colon. **L., Radio-carpal.** See *L., Lateral, External* (*of carpus*). **L., Radio-ulnar, Anterior,** a ligament uniting, anteriorly, the lower end of the ulna and the anterior edge of the sigmoid cavity of the radius. **L., Radio-ulnar, Posterior,** one joining the posterior surface of the lower end of the ulna, and the posterior margin of the sigmoid cavity of the radius. **L., Radio-ulnar, Round.** See *L., Round* (*of forearm*). **L. of the Rectum,** that part of the recto-vesical fascia extending to the side of the rectum. **L. of Retzius,** the outer portion of the anterior annular ligament of the leg. **L., Rhomboid,** one joining the cartilage of the first rib and the tuberosity of the clavicle. It is a part of the costo-clavicular ligament. **L., Round** (*of forearm*), one joining the coronoid process of the ulna and the tuberosity of the radius. **L., Round** (*of hip*). See *L. teres.* **L., Round** (*of liver*), a fibrous cord running from the umbilicus to the notch in the anterior border of the liver. It represents the remains of the obliterated umbilical vein. **L., Round, Posterior,** a muscular band extending from the posterior surface of the uterus through the broad ligament to the sub-peritoneal pelvic fascia. **L., Round** (*of superior radio-ulnar articulation*). See *L., Round* (*of forearm*).

L., Round (*of uterus*), a ligament running from the anterior surface of the cornu of the uterus, through the inguinal canal to the mons veneris. **L., Sacro-coccygeal, Anterior,** a two-headed ligament extending from the first vertebra of the coccyx to the last sacral vertebra anteriorly. **L., Sacro-coccygeal, Lateral,** one of those joining the sides of the sacrum and the transverse processes of the coccygeal vertebræ. **L., Sacro-coccygeal, Posterior,** one extending from the lower portion of the sacrum over the posterior surface of the coccyx. **L., Sacro-iliac, Anterior,** a thin fibrous structure covering the pelvic surfaces of the sacrum and ilium. **L., Sacro-iliac, Interosseous,** one joining the sacrum and ilium. **L., Sacro-iliac, Long.** See *L., Sacro-iliac, Oblique.* **L., Sacro-iliac, Oblique,** a portion of the posterior sacro-iliac ligament, arising from the posterior spine of the ilium. **L., Sacro-iliac, Posterior,** one extending from the side of the sacrum to the posterior spines of the ilium. **L., Sacro-iliac, Short,** that extending from the posterior inferior iliac spine to the side of the sacrum. **L., Sacro-ischiatic, Great.** See *L., Sacro-sciatic, Great.* **L., Sacro-ischiatic, Lesser,** one extending from the spine of the ischium to the point of junction of the sacrum and coccyx. **L., Sacro-sciatic, Anterior.** See *L., Sacro-ischiatic, Lesser.* **L., Sacro-sciatic, Great,** a triangular-shaped ligament extending from the sacrum, coccyx, and inferior iliac spine, to the tuberosity of the ischium. **L., Sacro-sciatic, Large.** See *L., Sacro-ischiatic, Great.* **L., Sacro-sciatic, Lesser.** See *L., Sacro-ischiatic, Lesser.* **L., Sacro-sciatic, Posterior.** See *L., Sacro-ischiatic, Great.* **L., Sacro-sciatic, Small.** See *L., Sacro-ischiatic, Lesser.* **L., Sacro-spinal.** See *L., Sacro-ischiatic.* **L., Sacro-spinous.** See *L., Sacro-ischiatic.* **L., Sacro-vertebral.** See *L., Lumbo-sacral.* **L. of Schlemm,** a ligament of the shoulder-joint. **L., Spheno-maxillary.** See *L., Internal Lateral* (*of temporo-maxillary articulation*). **L., Spiral,** one attached to the wall of the cochlea. **L., Stellate.** See *L., Costo-central, Anterior.* **L., Sternal, Anterior,** one connecting the manubrium and the gladiolus, anteriorly. **L., Sternal, Posterior,** one joining the posterior surfaces of the two upper bones of the sternum. **L., Sterno-clavicular, Anterior,** a fibrous structure extending anteriorly from the sternum to the inner end of the clavicle. **L., Sterno-clavicular, Posterior,** one joining the clavicle and the sternum posteriorly. **L., Sterno-costal, Anterior.** See *L., Costo-sternal, Anterior.* **L., Sterno-costal, Posterior.** See *L., Costo-sternal, Posterior.* **L., Sterno-xiphoid.** See *L., Sternal, Anterior.* **L., Stylo-hyoid,** a fibrous cord extending from the apex of the styloid process of the temporal bone, to the lesser cornu of the hyoid bone. **L., Stylo-maxillary,** a ligament joining the styloid process of the temporal bone and the under surface of the posterior margin of the ramus of the inferior maxilla. **L., Stylo-myloid.** See *L., Stylo-maxillary.* **L., Sub-pubic.** See *L., Pubic, Inferior.* **L., Superior** (*of clitoris*), one extending from the clitoris over the bulb of the vagina, and blending with the perineum. **L., Superior** (*of incus*). See *L., Suspensory* (*of incus*). **L., Superior** (*of malleus*), a round ligament extending from the head of the malleus to the upper and outer wall of the tympanic cavity. **L., Supra-scapular.** See *L., Coracoid.* **L., Supra-spinal,** one uniting the apices of the spinous processes of the vertebræ. **L., Supra-spinous.** See *L., Supra-spinal.* **L., Suspensory** (*of bladder*). See *L., False, Superior* (*of bladder*). **L., Suspensory** (*of clitoris*), one attaching the clitoris to the lower portion of the symphysis pubis. **L., Suspensory** (*of crystalline lens*), the zonule of Zinn. **L., Suspensory** (*of diaphragm*), that portion of the prevertebral fascia, attaching the center of the diaphragm to the bodies of the last cervical and first dorsal vertebræ. **L., Suspensory** (*of humerus*). See *L., Coraco-humeral.* **L., Suspensory** (*of incus*), *Arnold's ligament*, connecting the body of the incus with the roof of the tympanum. **L., Suspensory** (*of liver*). See *L., Broad* (*of liver*). **L., Suspensory** (*of malleus*). See *L., Superior* (*of malleus*). **L., Suspensory** (*of mamma*), a fibrous band extending from the fascia above over the anterior surface of the mamma. **L., Suspensory** (*of mesentery*), the root of the mesentery. **L., Suspensory** (*of penis*), that attaching the upper portion of the dorsum of the penis to the anterior surface of the symphysis pubis. **L., Suspensory** (*of spleen*), a peritoneal fold attaching the spleen to the lower surface of the diaphragm. **L., Suspensory** (*of uterus*). See *L., Broad* (*of uterus*) and *L., Round* (*of uterus*). **L., Tarsal,** the tarso-orbital fascia. **L., Tarso-metatarsal, Dorsal,** one of those joining the metatarsal and tarsal bones. **L., Tarso-metatarsal Interosseous, External,** that joining the external surface of the external cuneiform bone and the third and fourth metatarsal bones. **L., Tarso-metatarsal Interosseous, Internal,** one joining the internal cuneiform and second metatarsal bones. **L., Tarso-metatarsal Interosseous, Middle,** one joining the external cuneiform and second metatarsal bones. **L., Tarso-metatarsal, Plantar,** one of those joining the plantar surfaces of the tarsal and metatarsal bones. **L., Tendino-trochanterian,** *Bellini's ligament*, a strong ligament extending from the capsule of the hip-joint to the greater trochanter of the femur. **L. teres,** a rounded fibrous cord attached to the center of the articular surface of the head of the femur, and extending to the margin of the cotyloid notch of the acetabulum. **L., Thyro-arytenoid.** See *Vocal Bands.* **L., Thyro-arytenoid, Inferior,** one of the inferior or true vocal bands. **L., Thyro-arytenoid, Superior,** one extending between the inner surface of the upper portion of the thyroid cartilage and the anterior surfaces of the apices of the arytenoid cartilages. **L., Thyro-epiglottic,** one extending from the notch between the wings of the thyroid cartilage to the apex of the epiglottis. **L., Thyro-hyoid,** the thyro-hyoid membrane. **L., Thyro-hyoid, Lateral,** one of those joining the tips of the greater cornua of the hyoid bone and the superior cornua of the thyroid cartilage. **L., Thyro-hyoid, Middle,** the center line of the thyro-hyoid membrane. **L., Tibio-fibular, Inferior Posterior,** one at the lower tibio-fibular articulation, running obliquely downward from the tibia to the fibula. **L., Tibio-fibular, Inferior Transverse.** See *L., Tibio-fibular, Transverse.* **L., Tibio-fibular Interosseous,** one extending between the tibia and the fibula. **L., Tibio-fibular Interosseous, Inferior,** one joining the tibia and the fibula at their lower extremities. **L., Tibio-fibular, Posterior Inferior.** See *L., Posterior* (*of lower tibio-fibular articulation*). **L., Tibio-fibular, Posterior Superior,** one joining the posterior surface of the external tuberosity of the tibia and the head of the fibula, posteriorly. **L., Tibio-fibular, Superior Posterior.** See *L., Tibio-fibular, Posterior Superior.* **L., Tibio-fibular, Transverse,** one extending between the lower posterior border of the tibia and the external malleolus. **L., Tibio-tarsal,** one extending from the lower anterior margin of the tibia to the upper surface of the astragalus. **L., Transverse** (*of acetabulum*). See *L., Transverse* (*of hip-joint*). **L., Transverse** (*of atlas*), one attached to two small tubercles on the inner surface of

the atlas, and surrounding the odontoid process of the axis. **L., Transverse** (*of hip-joint*), one extending across the cotyloid notch of the acetabulum. **L., Transverse** (*of knee-joint*), one extending from the anterior margin of the external semilunar fibro-cartilage to the extremity of the internal semilunar fibro-cartilage. **L., Transverse, Medial** (*of tarsus*), one extending from the first cuneiform to the bases of the third and fourth metatarsal bones. **L., Transverse** (*of shoulder-joint*). See *L., Coraco-acromial.* **L., Transverso-costal.** See *L., Costo-transverse.* **L., Trapezoid,** the anterior or external portion of the coraco-clavicular ligament, extending from the upper surface of the coracoid process of the scapula, to the under surface of the clavicle. **L., Triangular:** 1. *The coraco-acromial ligament, q.v.* 2. That portion of the aponeurosis of the external oblique muscle extending from the outer portion of Poupart's ligament to the linea alba. **L., Triangular** (*of liver*). See *L., Lateral* (*of liver*). **L., Triangular, Anterior** (*of pelvis*). See *L., Pubic, Inferior.* **L., Utero-rectal.** See *L., Utero-sacral.* **L., Utero-sacral,** one of the recto-uterine folds of peritoneum. **L., Utero-vesical,** one of the folds of peritoneum connecting the bladder to the uterus. **L., Vertebral, Posterior,** one extending from the axis to the sacrum, along the posterior surface of the bodies of the vertebræ. **L., Vesico-uterine.** See *L., Utero-vesical.* **L., Weitbrecht's.** A bundle of fibers upon the anterior aspect of the interosseous ligament of the radio-cubital articulation. **L., Winslow's,** the posterior ligament of the knee-joint. See *L., Posterior* (*of knee-joint*). **L., Y-shaped** (*of Bigelow*), the *Ilio-femoral ligament.* **L. of Zinn,** the tendinous origin of the external, inferior, and internal recti muscles of the eye.

Ligamental (*lig-am-en'-tal*), **Ligamentary** (*lig-am-en'-ta-re*) [*ligare*, to bind]. Of the nature of a ligament.

Ligamentous (*lig-am-en'-tus*) [*ligamentum*, from *ligare*, to bind]. Of the nature of, or pertaining to, a ligament.

Ligamentum (*lig-am-en'-tum*) [L.: *pl., Ligamenta*]. See *Ligament.* **L. dentis,** a name given to that portion of the gum which is attached to the neck of a tooth.

Ligation (*li-ga'-shun*) [*ligatio: ligare*, to tie]. The operation of tying, especially of tying arteries. **L. of Cord,** applying a ligature about the umbilical cord of the new-born child. **L., Multiple,** the application of several ligatures in the course of a vessel. **L. in Continuity,** ligation of a vessel in its course for the cure of an aneurysm or to arrest hemorrhage at some distant point.

Ligator (*li-ga'-tor*) [*ligare*, to bind]. An instrument used in placing and fastening ligatures.

Ligature (*lig'-at-ūr*) [*ligatura; ligare*, to tie]. A cord or thread of any material for tying arteries, etc. **L., Animal,** one made from sheepgut or catgut, or the tendons or sinews of various animals. **L., Articulated,** the Écraseur, *q.v.* **L., Aseptic,** one rendered free from infective material by soaking in and cleansing with germicidal solutions, or by boiling or heating. **L., Buckskin,** the first absorbable ligature used by Physick, who employed untanned buckskin. **L., Carbolized,** a ligature rendered aseptic by carbolic acid. **L., Catgut,** a ligature made from the middle coat of the sheep's intestine, and rendered aseptic and tough by carbolic acid or perchlorid of mercury. **L., Chromicised,** a ligature hardened by treatment with a solution of chromic acid. **L., Deer-skin,** a ligature formed of a thin strip cut from prepared deer-skin and rendered aseptic. **L., Double,** the application of two ligatures to a vessel, between which it is divided. In the case of a pedunculated growth it refers to two ligatures passed through the same opening and tied at opposite sides. **L., Elastic,** a narrow band or thread of india-rubber applied tightly to a part so as to destroy the tissues and by compression to lead to separation. It is used in the treatment of hemorrhoids, anal fistula, and in the removal of pedunculated growths. **L., Erichsen's,** one consisting of a double thread, one-half of which is white, the other half black; it is used in the ligation of nevi. **L., Hemp,** a thread made from hemp-fibers rendered aseptic. **L., Horsehair,** an excellent ligature formed by plaiting together a number of strands of horsehair. After immersion in oil for some time it becomes extremely supple, and is capable of slow absorption. **L., Immediate,** a ligature including the vessel alone. **L., Intermittent,** a tourniquet applied above a poisoned wound to interrupt the blood-current; it is occasionally relaxed to allow of renewal of the circulation. **L., Kangaroo,** a ligature made from the smaller tendons of the kangaroo's tail, dried and carbolized. It is stouter than the catgut ligature, and is not absorbed so readily. **L., Lateral,** partial occlusion of the lumen of a vessel by a loose ligature. **L., "Loose,"** a ligature employed by the younger Cline and South. It consists in the application of a thread around an artery so loosely as not to interfere with the passage of the blood. It was erroneously believed to cause an inflammation that would completely block up the vessel. **L., Mediate,** one enclosing some of the soft parts as well as the artery. **L., Metallic,** one made of silver or other metal. **L., Momentary,** the momentary application of a tight ligature so as to rupture the intima of an artery. **L., Ox-aorta,** a form of broad ligature introduced by Barwell for the purpose of tying an artery without lacerating its inner and middle coats; it consists of the middle coat of the aorta of the ox, cut spirally, allowed to dry, and, ten minutes before using, soaked in a five per cent. solution of carbolic acid in water. **L., Permanent,** one made of non-absorbable material. **L., Phlebotomy,** the application of a band to a limb to produce distention of the veins to facilitate venesection. **L., Provisional,** a ligature applied during an operation, with the intention of removing it before the completion of the operation. **L., Quadruple,** two double ligatures passed at right angles through a growth and tied in four sections; it is used in the strangulation of nevi. **L., Scarpa's,** one employed in the ligation of arteries; it consists of a small fold of linen which is placed against the vessel and over which the ligature is tied. **L., Silk,** a thread of silk for ligating vessels. **L., Silkworm-gut,** a material recommended for purposes of ligation by MacSweeny in 1818. It is the fiber drawn out from the silkworm killed when it is just ready to spin its cocoon. **L., Soluble,** an animal ligature capable of being absorbed. **L., Tendon,** the tendon, or strips of tendons, of various animals, as those of the kangaroo, deer, and whale, dried and carbolized. **L., Wire,** a metallic wire for the ligation of arteries and other parts. After its application it is cut short and allowed to become encapsulated.

Light (*līt*) [ME., *light*, light]. That form of energy which, when impinging upon the retina, gives rise to the sensation of vision. The old theory was the so-called *Emission*, or *Corpuscular Theory*, which regarded light as consisting of minute material particles emitted by the luminous body and giving rise to the sensation of vision by impinging upon the retina. The accepted, or *Undulatory, Theory* regards light as a form of ethereal vibration or undu-

lation produced by the luminous body and propagated in all directions with a velocity in a vacuum of about 186,500 miles per second. *Maxwell's Electromagnetic Theory* supposes light to be an "electromagnetic disturbance propagated by vibrations at right angles to the direction of the ray, and taking place in the ether, the strains or vibrations of which serve to propagate electromagnetic induction." **L., Axial,** light-rays that are parallel to each other and to the optic axis; in microscopy the axial ray of the cone of light must be parallel to the optic axis of the microscope. **L.-blue.** See *Pigments, Conspectus of.* **L.-brain,** a weak-minded person. **L., Central.** See *L., Axial.* **L., Diffused,** that reflected simultaneously from an infinite number of surfaces, or that which has been scattered by means of a concave mirror or lens. **L., Dispersion of.** See *L., Spectrum of.* **L., Drummond,** that produced by heating lime to incandescence, as in the oxy-hydrogen flame. **L., Electric,** that produced by the passage of electricity through a medium having high resistance, such as the carbon-film of the incandescent light, or the interval of air between the carbons of the arc light, the medium of high resistance being heated to whiteness. **L.-green.** See *Pigments, Conspectus of.* **L.-headed,** giddy; flighty; delirious. **L., Incandescent,** the incandescence produced as a result of the resistance offered to the passage of an electric current through a delicate film of carbon. **L., Incident,** or **Direct,** that falling upon a surface or object. **L., Monochromatic,** that which, on being analyzed by a prism, consists approximately of waves of one length only. **L., Oblique,** when parallel rays or the axial ray of a cone of light forms an angle with the optic axis of the microscope. See also *Illumination, Oblique.* **L.-red.** Same as *Ocher.* **L., Reflected,** light thrown upon the object and then thrown back from the object. **L., Reflection of,** that property by which a ray of light striking an object rebounds, or is sent out again. Rays falling on a plane surface are reflected at an angle equal to that of the incident ray. Objects are perceived by the light reflected by such rays. **L., Refraction of,** that property by which a ray or pencil of light, when passing through media of different densities, is deflected out of its course. See *Law of Refraction.* **L.-sense,** the faculty by which different degrees of light or brightness may be distinguished. **L., Spectrum of.** See *Spectrum,* and *Wave-lengths.* **L.-spot, Triangular,** the pyramidal spot of light seen on the normal tympanic membrane, having its apex at the umbo, and its base toward the periphery. **L., To Feel;** quickening; the sensation conveyed to the mother by the movements of the fetus in utero. **L., Transmitted,** the light passing through an object.

Lighterman's Bottom. Inflammation of the bursa over the tuberosity of the ischium, from much sitting.

Lighting (*lit'-ing*) [ME., *lihtinge*, lighting]. The proper arrangement of the optic parts of a microscope, with the mirror so that the field is equally illuminated.

Lightning (*lit'-ning*) [ME., *light*, light]. An atmospheric discharge of electricity. In the form commonly known as "chain" or "bolt" lightning, the electricity has an extremely high potential, and a stroke under such circumstances is invariably fatal when the discharge passes through a living body. The form known as "sheet" lightning is a "brush" discharge of low potential, and is harmless. **L. Catarrh.** Synonym of *Influenza.* **L. Pains,** the lancinating pains of locomotor ataxia, usually occurring in the thighs, but also at times in the arms, head, and trunk. They are severe and come on in paroxysms, and may or may not follow the course of a nerve or nerves.

Lights (*lits*) [ME., *light*, light]. The lungs, so-called because of their light weight.

Lignaloes (*lig-nal'-ōz*) [*lignum aloes*]. Same as *Agallochum* and *Eagle-wood, q. v.*

Lignatile (*lig'-nat-il*) [*lignum*, wood]. Same as *Lignicole.*

Ligneous (*lig'-ne-us*) [*lignum*, wood]. Woody, or having a woody texture.

Lignerolle's Amputation. See *Operations, Table of.*

Lignicole (*lig'-nik-ōl*) **Lignicoline** (*lig-nik'-o-lin*) [*lignum*, wood; *colere*, to dwell]. In biology, growing upon wood.

Lignification (*lig-nif-ik-a'-shun*) [*lignum*, wood; *facere*, to make]. The process of turning into wood; sometimes also applied to amyloid degeneration, *q. v.*

Ligniform (*lig'-nif-orm*) [*lignum*, wood; *forma*, form]. Resembling wood.

Lignin (*lig'-nin*) [*lignum*, wood], $C_{19}H_{24}O_{10}$ (?). A modification of cellulose, constituting the greater portion of the weight of most dry wood. It has not been isolated. **L., Tests for;** phloroglucin gives a violet color to lignified cell-walls. Anilin sulphate, in slightly acidulated solution, gives a bright-yellow color.

Lignite (*lig'-nīt*) [*lignum*, wood]. Brown coal; imperfectly formed coal, or that in which the original form of the wood is so distinctly preserved that it can be readily distinguished by the eye. It is a source of certain members of the paraffin group of hydrocarbons. See *Coal.*

Lignivorous (*lig-niv'-or-us*) [*lignum*, wood; *vorare*, to eat, to devour]. Applied to such insect larvæ, ants, beetles, etc., as devour wood.

Lignoin (*lig'-no-in*) [*lignum*, wood], $C_{20}H_{23}NO_8$. An alkaloid found in certain *Cinchonas.*

Lignose (*lig'-nōs*). See *Cellulose.*

Lignum (*lig'-num*) [L.]. Wood. **L. agallochum,** aloes wood. **L. benedictum,** guaiac wood. **L. cedrium,** cedar wood. **L. vitæ.** See *Guaiacum.*

Ligroin (*lig'-ro-in*) [origin obscure]. A product obtained from petroleum, boiling at from 80° to 120° C., and having a specific gravity of from .710 to .730. It is used in pharmacy for solvent purposes, and for burning in sponge-lamps.

Ligula (*lig'-u-lah*) [dim. of *lingua*, a tongue]. A little tongue or tongue-shaped organ; the epiglottis; the clavicle; the tenia of the fourth ventricle, called also *ala pontis* or *ponticulus.* Also, a name given to the tongue of an articulate. See *Lingula.* In biology, applied to various strap-shaped organs or parts, as the corolla-blade in a plant, or the long tongue-like organ of hymenopterous insects. Also called *Ligule.*

Ligulate (*lig'-u-lāt*) [*ligula*, from *lingua*, tongue]. Shaped like a small tongue; strap-shaped.

Ligule (*lig'-ūl*) [*ligula*, a variety of *lingula*, a little tongue; a strap]. Same as *Ligula.*

Liguliform (*lig-u'-lif-orm*). See *Ligulate.*

Ligulin (*lig'-u-lin*) [*ligula*, a little tongue]. The coloring-matter of *Levisticum officinale*, Koch, and of the berries of the common privet (*Ligustrum vulgare*). With limestone water it strikes a bright-red color changing to blue, whence it has been used as a test for the presence of limestone in water.

Ligusticum (*li-gus'-tik-um*) [λιγυστικός, Ligurian]. A genus of umbelliferous plants: lovage. **L. actæifolium** is carminative and stimulant, as is also **L. apiifolium** of N. America. Unof.

Ligustrum (*li-gus'-trum*) [L.]. A genus of oleaceous shrubs; privets. **L. vulgare,** the common privet, has astringent leaves and bark, and cathartic berries. Unof.

Lilac (*lī'-lok*) [Ar., *ḥlāk*, lilac]. The leaves and fruit of *Syringa vulgaris*, a bitter tonic, with reputed antiperiodic properties. Unof.

Lily of the Valley. See *Convallaria majalis.*

Limb (*lim*) [ME., *lim*, a limb]. 1. A member of an animal body, other than the head or trunk; a leg or arm. 2. In biology, the lateral area, border, or margin of an organ or part. An organ of prehension or locomotion. **L., Anterior** (*of the internal capsule*), the part of the internal capsule in front of the knee, included between the caudate and the lenticular nucleus. **L., Artificial,** a mechanical substitute for an arm or a leg. **L.-girdle,** the bony or cartilaginous junction of a limb and the trunk. **L., Pectoral,** the upper or fore-limb. **L., Pelvic,** the lower or hind-limb. **L. Plexus,** the supposed rearrangement of nerve-strands so as to connect nerves derived from different parts of the spinal cord with particular groups of muscles. **L., Posterior** (*of the internal capsule*), the portion behind the knee, situated between the caudate nucleus and the optic thalamus. **L.-root,** the part of a skeleton that bears a limb.

Limbate (*lim'-bāt*) [*limbus*, a border]. Bordered.

Limbation (*lim-ba'-shun*) [*limbus*, a border]. In biology, the formation of an extended border; a lateral thickening.

Limbed (*limd'*) [ME., *lim*, a limb]. Having limbs.

Limbic (*lim'-bik*) [*limbus*, a border]. Marginal; pertaining to a border. **L. Fissure.** See *Fissure.* **L. Lobe,** that surrounding the corpus callosum.

Limburger Cheese. See *Cheese.*

Limbus (*lim'-bus*) [L.]. A border. The circumferential edge of any flat organ or part. **L. corneæ,** the edge of the cornea at its junction with the sclerotic coat. **L. laminæ spiralis,** the spiral membranous cushion, at the border of the osseous lamina spiralis of the cochlea. **L. luteus.** See *Macula lutea.* **L. vieussenii,** that portion of the edge of the *septum secundum* in the fetal heart of the rabbit that forms part of the boundary of the foramen ovale.

Lime (*lim*) [Ar., *limūn*, a lemon]. The fruit of several species of *Citrus*, as *C. limetta.* **L.-juice,** the juice of the lime. It should contain, when bottled, a small percentage of sulphurous acid, to prevent fermentation.

Lime (*lim*) [ME., *lim*, lime]. The popular name for calcium oxid, CaO (quicklime), and calcium hydrate, Ca(HO). Calcium oxid (quicklime) has a great affinity for water and for CO_2. On contact with the former, slaked lime is formed, with the evolution of heat. On living tissues it acts as a caustic. **L., Burnt, L., Caustic,** calcium oxid, quicklime. **L., Chlorid of, L., Chlorinated,** the chlorid of lime of commerce, is not a distinct chemic compound; its chief constituent, and the one on which its disinfectant properties depend, is calcium hypochlorite, which liberates chlorin. **L.-secreting Glands.** See *Morrens' Glands.* **L., Milk of,** a milky fluid consisting of calcium hydrate suspended in water. **L., Quick, L., Slaked,** common terms for lime. **L.-ointment,** an ointment consisting of slaked lime 4, lard 1, and olive oil 3. **L.-water,** a solution of calcium hydrate in water. It is astringent and alkaline, and prevents the formation of dense coagula if added to milk. It is used in cases of diarrhea and vomiting.

Limen (*lī'-men*) [*λιμήν*, a harbor]. Threshold.

Limic (*lim'-ik*) [*λιμός*, hunger]. Pertaining to hunger.

Liminal (*lim'-in-al*) [*λιμήν*, threshold]. Least; lowest; minimal. **L. Intensity.** See *Law, Fechner's.*

Limitans, Limiting (*lim'-it-anz, lim'-it-ing*) [*λιμήν*, threshold]. Bounding. **L. Membrane,** the thin membrane on which the epithelial tissue of the various glands rests. **L. Membrane, External,** the thin layer between the outer nuclear layer of the retina and that of the rods and cones. **L. Membrane, Internal,** in the eye, the inner layer of the retina.

Limitrophic (*lim-it-rōf'-ik*) [*limitropus*, a name given to Roman lands furnishing subsistence to soldiers]. Regulating the processes of nutrition; a qualification sometimes applied to the great ganglionic cord of the sympathetic nerve-system, or to that system at large; pertaining to the sympathetic nerves.

Limnemic (*lim-ne'-mik*) [*λίμνη*, marsh]. Pertaining to, or caused by the influence of, a marsh.

Limnomephitis (*lim-no-me-fī'-tis*) [*λίμνη*, marsh; *mephitis*, noxious odor]. Any miasm or noxious odor arising from marshy ground or swamps.

Limoctonia (*lim-ok-tō'-ne-ah*) [*λιμός*, hunger; *κτείνειν*, to destroy]. Death from hunger; suicide by hunger.

Limonene (*lī'-mo-nēn*) [*limo*, a lemon]. The same as *Citrene, q. v.*

Limonum (*li-mō'-num*) [L.: *gen., Limonis;* from the Arabic *limūn*]. Lemon. The fruit of *Citrus limonum*, of the same genus as the orange and the lime. The rind contains a volatile oil, isomeric with oil of turpentine. The pulp yields about 7 per cent. of citric acid, $C_6H_8O_7$, which has about the same properties as acetic acid, but has much value as a refrigerant and antiscorbutic. The expressed juice is largely employed as a refrigerant drink in fevers. **L., Ol.,** the volatile oil. Dose ♏j–v. **L., Spt.,** "essence of lemon," 6 parts of oil and 4 of peel in 90 parts of alcohol. **L., Succus** (B. P.), used in preparing syrupus limonis. **L., Syr.,** lemon-juice 40, lemon-peel 2, sugar 60, water q. s. ad 100. Dose ℥j. **L., Tinct.** (B. P.) Dose ℥ss–ij. **Acidi citrici, Syr.,** citric acid, water, āā 8, spt. of lemon 4, water 980.

Limophoitos (*lim-o-fo'-it-os*), **Limophoitosis** (*lim-o-fo-it-o'-sis*) [*λιμός*, hunger; *φοῖτος*, madness]. Insanity due to hunger or lack of nutrition.

Limophoitosic (*lim-o-fo-it-o'-sik*) [*λιμός*, hunger; *φοιτάειν*, to wander]. Insane from hunger or underfeeding.

Limophthisis (*lim-off'-this-is*) [*λιμός*, hunger; *φθίσις*, wasting]. The wasting of the body due to privation and lack of food.

Limopsora (*lim-op-so'-rah*) [*λιμός*, hunger; *ψώρα*, itch]. A kind of scabies (or pruritus?) asserted to attack man and other animals after long deprivation of food.

Limopsorus (*lim-op-so'-rus*) [*λιμός*, hunger; *ψώρα*, itch]. A disease, like scurvy, pellagra, or famine-fever, due to poor or insufficient food.

Limoseric (*lim-o-ser'-ik*) [*λιμός*, hunger]. Pertaining to or caused by hunger.

Limosis (*lim-o'-sis*) [*λιμός*, hunger: *pl., Limoses*]. Unnatural appetite; a class of diseases distinguished by depraved appetite.

Limotherapy (*lim-o-ther'-ap-e*) [*λιμός*, hunger; *θεραπεία*, treatment]. The treatment of disease by partial or total deprivation of food. This method is useful in certain stages of syphilis, in the treatment of aneurysm, and is recommended in some cases of malignant disease.

Limp [AS., *lemp*, awkward]. A halting gait. See *Claudicatio.*

Limprecht's Method. See *Nitrogen.*

Linagogue (*lin'-ag-og*), **Linagogus** (*lin-ag-o'-gus*) [*linum*, thread; *ἀγωγός*, leading]. An instrument used in guiding the course of a suture.

Linament (*lin'-am-ent*) [*linum*, flax]. Charpie; lint; a tent for a wound.

Linaria (*lin-a'-re-ah*) [*linum*, flax]. A genus of herbs. **L. vulgaris.** See *Antirrhinum linaria.*

Lincture (*link'-tūr*) [*linctus; lingere*, to lick]. A medicine to be taken by licking; an electuary; looch, lohoch, or eclegma. [Old.]

Linctus (*link'-tus*) [L.]. Same as *Lincture.*

Line (*lin*) [*linea*, a line]. In geometry, that extension of dimension which has length, but neither breadth nor thickness. Also, the $\frac{1}{10}$ part of an inch. In anatomy, a boundary or guide-mark. A *Table of Lines* is appended. **L., Atmospheric,** those lines of Fraunhofer's spectrum due to absorption of light-rays by the atmosphere. **L., Atrope,** a name given by Helmholtz to the perpendicular to the plane of the axes of rotation of the eye. **L., Colored** (*of the enamel*), one of the concentric striæ of enamel prisms. They may indicate the laminar formation of the enamel. **L.-writing.** See *Ataxiagram.*

TABLE OF LINES OR LINEÆ.

Name.	Department, Significance, etc.	Description.
Abdominal.	See *L. alba.*	
Of accommodation.	In optics.	Czermak's term for that portion of the visual line in which lie objects that are seen with distinctness, and with a given state or degree of accommodation.
Alba.	In anatomy.	1. A tendinous raphé extending in the median line of the abdomen from the pubes to the ensiform cartilage. It is formed by the blending of the aponeuroses of the oblique and transversalis muscles. 2. *Hunter's line*, the anterior peduncles of the pineal gland.
Albicantes.	Distention of the abdomen from pregnancy, ascites, or tumors.	Glistening white lines in either iliac region of the abdomen.
Alveolo-basilar.	Craniometry.	A line joining the basion and the alveolar point.
Alveolo-nasal.	Craniometry.	A line joining the nasal and the alveolar point.
Aspera.	Anatomy.	1. A rough longitudinal ridge on the posterior surface of the middle third of the femur, dividing below into two and above into three ridges. 2. A ripa; especially the line of rupture of the pia and endyma on the dorsal surface of the thalamus, corresponding with the margin of the fornix and the choroid sulcus of Schwalbe.
Atmospheric.	In spectroscopy.	That portion of Fraunhofer's lines produced by the absorption of light-rays by atmospheric air.
Atrope.	Optics.	The line normal to the plane of the axes of rotation of the eye.
Atrophic.	Distention of the abdomen.	See *L. albicantes.*
Auriculo-bregmatic.	Craniometry.	A line passing from the auricular point to the bregma, and dividing the pre-auricular from the post-auricular part of the cranium.
Axillary, anterior and posterior.	In physical diagnosis.	Vertical lines extending downward from the axilla on the side of the trunk.
Baillarger's.	See *L., Inner* and *Outer.*	
Base line.	Brain-surgery.	A line running backward from the infra-orbital ridge through the middle of the external auditory meatus, and prolonged to the middle line of the head posteriorly.
Basio-alveolar.	Craniometry.	See *L., Alveolo-basilar.*
Basio-bregmatic.	Craniometry.	The line joining the basion and the bregma.
Baudelocque's.	Obstetrics.	The external conjugate diameter of the pelvis.
Biauricular.	Craniometry.	The line separating the anterior from the posterior portion of the skull. It extends from one auditory foramen over the vertex to the other.
Blue.	In chronic lead-poisoning.	A blue-black line at the dental margin of the gums.
Bryant's.	In surgery.	See *L., Test.*
Burton's.	See *L., Gingival.*	In various diseases.
Camper's (*profile*).	Craniometry.	A line running from the external auditory meatus to a point just below the nasal spine.
Cardiac.	In palmistry.	The line that runs across the palm of the hand from the radial side to the base of the index finger.
Cephalic.	Craniometry.	Any line joining certain points on the surface of the skull.
Of Chaussier.	Anatomy.	See *L. media mesolobii.*
Clapton's.	Chronic copper-poisoning.	A green line at the margin of the gums, with a similar green stain extending for some distance on the teeth.
Colored (*of the enamel*).	Nature and significance not well understood.	Concentric brown lines or striæ crossing the enamel-prisms of the teeth.

TABLE OF LINES OR LINEÆ.—*Continued.*

Name.	Department, Significance, etc.	Description.
Contour.	Microscopic anatomy.	Lines in dentine more or less parallel with the pulp-cavity, probably due to the presence of interglobular spaces.
Corrigan's.	Chronic copper-poisoning.	A purple line at the junction of the teeth and gums.
Costo-articular.	In physical diagnosis.	A line drawn between the sterno-clavicular articulation and the point of the eleventh rib.
Costo-clavicular.	In physical diagnosis.	See *L., Parasternal.*
Cruciate (4 in number).	In anatomy.	Ridges upon the ental surface of the occipital bone that radiate from the internal occipital protuberance.
Crull's.	Craniometry.	See *L., Supraorbital.*
Curved, inferior (*of the ilium*).	In anatomy.	A line extending from the upper part of the anterior-inferior spinous process of the ilium, and terminating at the middle of the great sciatic notch.
Curved, inferior (*of the occipital bone*).	In anatomy.	A ridge extending transversely across the outer surface of the occipital bone at about one-third of the distance between its anterior border and the anterior border of the foramen magnum.
Curved, inferior (*of the parietal bone*).	In anatomy.	See *L., Temporal.*
Curved, middle (*of the ilium*).	In anatomy.	A line commencing about an inch or an inch and a half behind the anterior superior spine of the ilium and arching backward and downward to the upper margin of the great sciatic notch.
Curved, superior (*of the ilium*).	In anatomy.	A line commencing about two inches in front of the posterior extremity of the crest of the ilium and curving downward and forward toward the posterior part of the great sciatic notch.
Curved, superior (*of the occipital bone*).	In anatomy.	A semicircular line, passing outward and forward from the external occipital protuberance.
Curved, superior (*of the parietal bone*).	In anatomy.	A ridge upon the outer surface of the parietal bone, parallel to and slightly above the temporal line.
Of Daubenton.	Craniometry.	A line joining the opisthion and the projection of the lower border of the orbit.
Of demarcation.	In surgery.	A line of division between healthy and gangrenous tissues.
Of De Salle.	In abdominal and other wasting diseases.	See *L., Nasal.*
Dobie's.	Microscopic anatomy.	The thin, dark disc or membrane passing transversely through and bisecting the clear zone or stria in a striated muscle-fiber.
Doornick's horizontal line.	Craniometry.	A line drawn from the median incisors to the maximum occipital point.
Douglas's.	Topographic anatomy.	See *L., Semicircular.*
Eberth's.	Microscopic anatomy.	The lines of junction of the cardiac muscle-cells.
Ectental.	Microscopic anatomy.	The line of junction of the ectoderm and endoderm.
Ellis's curved line.	In pleurisy.	The curved line followed by the upper border of a pleuritic effusion, or of a hydrothorax. It is somewhat like the letter S, the highest point being in the axilla, from which it descends toward the sternum.
Embryonic.	Embryology.	The primitive trace in the center of the germinal area of the ovum.
Eminens (*of the cricoid cartilage*).	Anatomy.	A mesal ridge of the dorsal half of the cricoid cartilage.
Eminens (*of the patella*).	Anatomy.	A ridge on the posterior surface of the patella, dividing that surface into two unequal parts, the outer of which is the larger.
Eminens (*of the posterior pyramid, also of Reil*).	In anatomy.	A ridge descending posteriorly from the summit of the pyramis cerebelli.
Eminens transversa (*of the hyoid bone*).	Anatomy.	The horizontal ridge crossing the ventral surface of the body of the hyoid bone.
Eminentes.	Anatomy.	The ridges upon the costal surface of the scapula, in the subscapular fossa.
Facial.	Craniometry.	1. A straight line tangential to the glabella and some point at the lower portion of the face. 2. See *L., Camper's.*

TABLE OF LINES OR LINEÆ.—*Continued.*

NAME.	DEPARTMENT, SIGNIFICANCE, ETC.	DESCRIPTION.
Of fate.	In palmistry.	A line beginning near the wrist and running up the middle of the palm toward the base of the index-finger.
Festooned (*of the cardiac extremity of the esophagus*).	Anatomy.	The whitish, dentated border of the mucosa of the esophagus at its junction with the mucosa of the stomach.
Of fixation.	In optics.	An imaginary line drawn from the object viewed through the center of rotation of the eye.
Focal.	In optics.	The lines, anterior and posterior, that bound the focal interval.
Of fortune.	In palmistry.	A line running upward to the base of the ring-finger.
Fraunhofer's.	In spectroscopy.	The black lines that cross a very pure solar spectrum. They are produced by the light from lower portions of the solar surface passing through certain incandescent metallic vapors in the luminiferous envelop of the sun, and in the aqueous vapor and permanent gases of the earth's atmosphere.
Fraunhofer's, artificial.	In spectroscopy.	A black line occupying the position of a luminous line in the spectrum when a metallic vapor is interposed in the ray of light; the position of the line varies with different metals.
Frohmann's.	Microscopic anatomy.	Transverse lines or striæ appearing on the axis-cylinder of medullated nerve-fibers, near the nodes of Ranvier, after the fibers have been stained with silver nitrate. Their significance is unknown.
Frontal, minimum.	Craniometry.	The shortest transverse measurement of the forehead.
Fusca.	In pregnancy.	The pigmentation of the linea alba.
Gant's (*of section*).	In surgery.	A section of the femur, through an imaginary line below the trochanter major.
Genal (*Jadelot's*).	Supposed to indicate disease of some abdominal organ.	A line in a child's face, running downward from the region o the malar bone to join the nasal line.
Of Gennari.		Same as *L. of Baillarger*.
Gingival (*Burton's*).	Characteristic of various diseases.	A reddish streak or margin at the reflected edge of the gums.
Gluteal, anterior, inferior, posterior.	See *L., Curved (of the ilium)*, *Inferior Middle*, *Superior*.	
Göttingen.	Anatomy.	A line following the general direction of the upper margin o the zygoma.
Of Haller.	Anatomy.	See *L. splendens*.
Of the head.	In palmistry.	A line beginning between the thumb and index-finger, and ex tending across the center of the palm of the hand parallel t the line of the heart.
Of health.	In palmistry.	See *L., Hepatic*.
Of the heart.	In palmistry.	See *L., Cardiac*.
Of Helmholtz.	In optics.	See *L., Atrope*.
Hepatic.	In palmistry.	A line beginning at the wrist near the line of life and runnin upward to the base of the little finger.
Hilton's.	In anatomy.	A white line marking the point of junction of the skin of th perineum with the mucosa of the anus, and also the point separation of the external from the internal sphincter. It i not always readily detected.
Holden's.	Topographic anatomy. Of value in amputation of the hip-joint.	A sulcus below the fold of the groin, starting from the femor scrotal furrow, and fading away between the great trochante and the anterior superior iliac spine. It crosses the middle c the capsule of the hip.
Horizontal.	Microscopic anatomy.	See *L., Eberth's*.
Hunter's.	Topographic anatomy.	See *L. alba*.
Ihering's.	Craniometry.	A line tangential to the lower margin of the orbit, and pas ing through the auricular point.
Iliac.	Anatomy.	The iliac portion of the ilio-pectineal line.
Ilio-pectineal.	Obstetrics.	The bony ridge marking the brim of the true pelvis, situate partly on the ilium and partly on the pubis.
Ilio-pubic.	Obstetrics.	See *L., Ilio-pectineal*.

TABLE OF LINES OR LINEÆ.—*Continued.*

Name.	Department, Significance, etc.	Description.
ncremental (*Salter's*).	Microscopic anatomy.	A curved line in dentine, supposed to indicate the laminar structure, and to correspond to the successive laminæ or strata of dentine.
nner (*of Baillarger*).	Anatomy.	A thin, whitish line parallel to the surface, seen with the naked eye, in a section of the gray matter of the cerebrum. It is the fifth line from without inward.
nnominate.	Obstetrics.	See *L., Ilio-pectineal.*
nteraurícular.	Craniometry.	A line joining the two auricular points.
ntercellular.	Microscopic anatomy.	The narrow intervals between contiguous cells of epithelium or endothelium. They are filled by the cell-cement.
ntercondylar.	Anatomy.	A transverse ridge joining the condyles of the femur above the intercondyloid fossa.
ntercondyleañ.	Anatomy.	See *L., Intercondylar.*
nterjugal.	Craniometry.	A line joining the jugal points.
ntermalar.	Craniometry.	A line joining the malar points.
ntermediate.	Microscopic anatomy.	See *L., Dobie's.*
ntermediate (*of the lium*).	Anatomy.	The ridge upon the crest of the ilium between its inner and outer lip.
ntertrochanteric, anterior (*of the femur*).	Anatomy.	A line upon the anterior surface of the femur, separating the neck and shaft, extending between the tubercle and a point close to and in front of the lesser trochanter.
ntertrochanteric, posterior (*of the femur*).	Anatomy.	A ridge on the posterior surface of the femur, extending between the greater and lesser trochanters.
ntertuberal.	Anatomy.	A line joining the inner borders of the ischial tuberosities, immediately below the small sciatic notch.
adelot's	Various diseased conditions.	See *L., Genal, Labial, Nasal,* and *Oculozygomatic.*
f Kilian.	Anatomy.	See *L. prominens.*
irchoff's.	In spectroscopy.	See *L., Fraunhofer's.*
abial (*of Jadelot*).	Supposed to indicate pulmonary disease.	A line on an infant's face running downward and backward from the angle of the mouth.
ateral.	Comparative anatomy.	In fishes, the line of openings of ducts on either side of the body.
life.	In palmistry.	A line starting near the wrist, skirting the base of the thumb, and terminating between the thumb and the line of the head.
gar's.	In anatomy; the upper point of trisection of the first indicates the emergence of the gluteal artery: the middle of the second, the spot where the sciatic artery leaves the pelvis.	Two lines, one joining the posterior iliac spine at a point midway between the tuber ischii and the great trochanter; the other from the posterior iliac spine to the inner point of trisection of a line between the tuber ischii and the trochanter.
ammillary.	Physical diagnosis.	A vertical line passing through the center of the nipple.
edia mesolobii.	Anatomy.	The raphé of the callosum.
edia scroti.	Anatomy.	The raphé of the scrotum.
edian.	Anatomy.	A line joining any two points at the periphery of the meson or median plane of the body.
elo-hyoidean.	Anatomy.	See *L., Oblique, Internal* (*of the inferior maxilla*).
sal (*of Jadelot*). Also alled *De Salle's line.*	Supposed to indicate abdominal disease and other wasting diseases.	A line on a child's face, starting at the upper margin of the ala nasi, and encircling the angle of the mouth, extending downward to the outer edge of the orbicularis muscle.
so-alveolar.	Craniometry.	See *L., Alveolo-nasal.*
so-basilar.	Craniometry.	The line drawn through the basion and the nasal point.
so-lambdoid (*of oirier*).	Craniometry.	A line drawn from the naso-frontal groove to a point one centimeter above the lambda. It is of value in determining the position of the fissure of Rolando.
so-subnasal.	Craniometry.	The line running from the subnasal spine to the naso-frontal suture.
laton's.	In surgery; in dislocation of the femur backward the trochanter is always found above this line.	A line drawn from the anterior superior spine of the ilium to the most prominent part of the tuberosity of the ischium.

TABLE OF LINES OR LINEÆ.—*Continued.*

NAME.	DEPARTMENT, SIGNIFICANCE, ETC.	DESCRIPTION.
Neutral.	In physics.	The optic axis of a crystal.
Nigra.	Obstetrics.	The discoloration of the linea alba in pregnancy.
Nuchal, inferior.	Anatomy.	The inferior curved line of the occiput.
Nuchal, median.	Anatomy.	The external occipital protuberance.
Nuchal, superior.	Anatomy.	The superior curved line of the occiput.
Oblique (*of the fibula*).	Anatomy.	A prominent ridge on the internal surface of the shaft of the fibula, commencing above at the inner side of the head, and terminating in the interosseous ridge at the lower fourth of the bone.
Oblique (*of the radius*).	Anatomy.	A prominent ridge running from the lower part of the bicipital tuberosity, downward and outward, to form the anterior border of the bone.
Oblique (*of the thyroid cartilage*).	Anatomy.	A line extending downward and outward from the tubercle of the thyroid cartilage.
Oblique (*of the tibia*).	Anatomy.	A rough ridge that crosses the posterior surface of the tibia obliquely downward from the back part of the articular facet for the fibula to the internal border.
Oblique, external (*of the inferior maxilla*).	Anatomy.	A prominent ridge on the external surface of the inferior maxilla just below the mental foramen, from which it runs outward, upward, and backward to the anterior margin of the ramus.
Oblique, internal (*of the inferior maxilla*).	Anatomy.	A ridge on the internal surface of the lower jaw, commencing at the posterior portion of the sublingual fossa, continuing upward and outward so as to pass just below the last two molar teeth.
Oculozygomatic (*of Jadelot*).	Supposed to indicate cerebro-spinal disease.	A line on a child's face running from the inner angle of the eye, downward and outward, to the malar bone.
Ogston's.	Surgery; in section of the internal condyle from the shaft of the femur.	The line for the tendon of the adductor magnus, running from the tubercle of the femur to the intercondyloid notch.
Outer (*of Baillarger*).	Anatomy.	A thin, whitish line parallel to the surface, seen with the naked eye in a section of the gray matter of the cerebrum. It is the third line from without inward.
Owen's.	Microscopic anatomy.	See *L.*, *Contour*.
Pacini's.	Comparative anatomy.	A dark line in the electric plate of *Gymnotus*, separating the plate into two parts.
Pallial.	Comparative anatomy.	In *molluscs*, the lines left in the dead shell by the muscular margin of the mantle.
Parasternal.	Physical diagnosis.	A line midway between the two nipples.
Parturient.	Obstetrics.	The axis of the parturient canal.
Pectineal.	Obstetrics and anatomy.	That portion of the ilio-pectineal line which is formed by the pubic bone.
Of Poirier.	See *L.*, *Naso-lambdoid*.	
Popliteal.	Anatomy	See *L.*, *Oblique* (*of the tibia*).
Primitive.	Embryology.	The primitive streak of the embryo.
Profile (*of Camper*).	See *L.*, *Camper's*.	
Profile (*of Topinard*).	See *L.*, *Topinard's*.	
Prominens (*of Kilian*).	Anatomy.	The promontory of the sacrum.
Quadrate.	Anatomy.	A well-marked eminence on the femur commencing about the middle of the posterior intertrochanteric line, and descending vertically for about two inches along the posterior surface of the shaft.
Of Reil.	Anatomy.	See *L. eminens* (*of the posterior pyramid*).
Respiratory.	In sphygmography.	The line connecting the bases of the upward strokes in a tracing of the pulse. In quiet breathing it is nearly straight, but in labored respiration and in some diseased conditions it becomes a more or less regular curve, due to the influence of the respiration on the circulation.
Roser's.	In surgery.	Same as *L.*, *Nélaton's*.
Salter's.	Microscopic anatomy.	See *L.*, *Incremental*.

TABLE OF LINES OR LINEÆ.—*Continued.*

NAME.	DEPARTMENT, SIGNIFICANCE, ETC.	DESCRIPTION.
Scapular.	Physical diagnosis.	A vertical line downward from the lower angle of the scapula.
Schreger's.	Microscopic anatomy.	Lines in dentine, having a general parallelism to the pulp-cavity. They are caused by a row of the primary or great curvatures of the dentinal tubules.
Semicircular (*Douglas's*).	Topographic anatomy.	The curved lower edge of the internal layer of the aponeurosis of the internal oblique muscle of the abdomen, where it ceases to cover the posterior surface of the rectus abdominis.
Semilunar (*of Spigelius*).	Topographic anatomy.	A curved tendinous condensation of the aponeurosis of the external oblique muscle of the abdomen, running along the outer border of the rectus abdominis.
Of sight.	In optics.	An imaginary line drawn from the object viewed to the center of the pupil.
Sinuous, inferior (*of the anus*).	Anatomy.	The convoluted line at the junction of the mucosa of the rectum with the integument at the anus.
Soleal.	Anatomy.	Oblique line of the tibia at the attachment of the soleus muscle.
Spigel's.	Topographic anatomy.	See *L., Semilunar.*
Of Spigelius.	Topographic anatomy.	See *L., Semilunar.*
Splendens (*of Haller*).	Anatomy.	A longitudinal fibrous band extending along the middle line of the anterior surface of the spinal pia.
Sternal.	Physical diagnosis.	The median line of the sternum.
Sterno-mastoid.	In surgery.	A line drawn from a point between the two heads of the sterno-mastoid muscle to the mastoid process.
Supracondylar, external (*of the femur*).	Anatomy.	The external, inferior continuation of the linea aspera of the femur.
Supracondylar, internal (*of the femur*).	Anatomy.	The inner of the two ridges into which the linea aspera of the femur divides.
Supra-orbital.	In craniometry.	A line extending horizontally across the forehead immediately above the root of the external angular process of the frontal bone
Temporal.	Anatomy.	A curved line on the outer surface of the parietal bone, just below the parietal eminence, forming in part the upper boundary of the temporal fossa.
Test (*Bryant's*).	Surgery.	A line for detecting fracture or shortening of the neck of the femur. If two lines are drawn to meet at right angles, one of them backward from the anterior superior spinous process of the ilium, and the other upward from the top of the trochanter major; the latter is the test-line. Its length is to be compared with the same line on the uninjured side.
Thompson's.	Frequently noticeable in pulmonary tuberculosis.	A red line of vascular tissue along the margin of the gums.
Tinard's profile.	Craniometry.	A line joining the intersuperciliary point and the most prominent point of the chin.
Transverse (*of the abdomen*).	Anatomy.	The tendinous intersections in the course of the rectus abdominis muscle.
Transverse (*of the fourth ventricle*).	Anatomy.	The striæ acusticæ of the fourth ventricle.
Transverse (*of sacrum*).	Anatomy.	Ridges formed by the lines of union of the four sacral vertebræ.
Trapezoid.	Anatomy.	The line of attachment of the trapezoid ligament on the inferior surface of the outer portion of the clavicle.
Vicq d' Azyr.	Anatomy.	See *L., Outer (of Baillarger).*
Virchow's.	Craniometry.	The line extending from the root of the nose to the lambda.
Visual.	Optics.	An imaginary line, drawn from a point looked at, through the nodal point of the eye, to the macula lutea.
Wagner's alveolar line.	Craniometry.	A line extending from the maximum occipital point to the superior alveolar point.
Zöllner's.	In optics (*for test-purposes*).	Draw three parallel horizontal lines one centimeter apart, and through the upper and lower ones draw short, oblique, parallel lines in the direction from above and the left to below and the right; through the middle line draw similar oblique lines, but in the opposite direction; then the three horizontal lines no longer appear to be parallel; they are actually so, but some appear to converge and others to diverge.

Linea (*lin'-e-ah*) [L.]. A line. See *Line.*

Lineage (*lin'-e-āj*) [*linea*, a line]. The line of descent from an ancestor; ancestry.

Lineal (*lin'-e-al*) [*linea*, line]. Pertaining to lineage. See also, *Linear.*

Lineament (*lin'-e-am-ent*) [*lineamentum; linea*, a line]. The outline of the face, or of any of its features. Also, the outline of the embryo.

Linear (*lin'-e-ar*) [*linea*, a line]. Resembling or pertaining to a line. Applied in biology to an organ that is narrow, many times longer than broad, and that has parallel margins. **L. Craniectomy.** See *Craniectomy.* **L. Extraction.** See *Cataract.* **L. Fracture**, one forming a line, and attended with little or no displacement of the fragments.

Lineolate (*lin'-e-o-lāt*) [*lineola*, a little line]. In biology, minutely lined or scored.

Lineolet (*lin'-e-o-let*) [*lineola*, a small line]. In biology, a minute line.

Ling's System. A method of treatment of disease by gymnastic and other rhythmic movements of the body, employed by Ling, a Swedish physician; kinesitherapy. See *Swedish System.*

Lingam (*lin'-gam*). See *Phallus.*

Lingism (*ling'-izm*). See *Ling's System.*

Lingua (*lin'-gwah*) [L.: *gen.* and *pl.*, *Linguæ*]. The tongue. **L. frænata**, tongue-tie. **L. geographica**, leukoplakia of the tongue. **L., Posterior**, the epiglottis. **L. propendula**, an obsolete synonym of *Macroglossia.*

Lingual (*lin'-gwal*) [*lingua*, tongue]. Shaped like the tongue. Pertaining to the tongue. **L. Artery.** See *Arteries, Table of.* **L. Bone.** See *Hyoid Bone.* **L. Muscle.** See *Muscles, Table of.* **L. Nerve.** See *Nerves, Table of.* **L. Nerve of Fifth Pair.** See *Lingual* (3), *Table of Nerves.* **L. Nerve of Vagus.** See *Pneumogastric, Table of Nerves.* **L. Ribbon.** See *Odontophore.*

Lingualis (*ling-gwa'-lis*). See *Muscles, Table of.*

Linguatula (*lin-gwat'-u-lah*) [*lingula*, a small tongue]. See *Parasites, Table of.*

Linguetta (*ling-gwet'-ah*) [L., dim. of *lingua*, a tongue]. A small tongue. **L. laminosa.** See *Lingula.*

Linguiform (*ling'-gwif-orm*) [*lingua*, tongue; *forma*, form]. Shaped like a tongue.

Lingula (*lin'-gu-lah*) [dim. of *lingua*, a tongue]. A transversely lamellose lobule between the valve of Vieussens and the central lobule of the cerebellum. It is called, also, the *linguetta laminosa*, the *ligula*, and the *processus petrosus anticus.* Also, the line of demarcation between the general, pial surface of the myel and oblongata, and the endymal, metacelian surface. **L. mandibularis**, the prominent, thin scale of bone partly surrounding the large foramen of the lower jaw; it serves for the attachment of the sphenomandibular ligament. **L. sphenoidalis**, a small, tongue-like process of bone projecting backward in the angle between the body and great wing of the sphenoid bone. **L. of Wrisberg**, connecting fibers of the motor and sensory roots of the trifacial nerve.

Lingulate (*ling'-gu-lāt*) [*lingula*, dim. of *lingua*, tongue]. Tongue-shaped.

Linhart's Mixture. See *Anesthetic.*

Liniment (*lin'-im-ent*). See *Linimentum.*

Linimentum (*lin-im-en'-tum*) [*linere*, to smear: *pl.*, *Linimenta*]. A liniment. A thin, liquid ointment for external application, usually a solution of a medicinal substance in an excipient of oil or oily mixtures. There are nine official *linimenta*, and 23 others are given in the U. S. Dispensatory. **L. exsiccans.** See *Pick's Liniment.* **L., St. John Long's**, a powerful counter-irritant containing oil of turpentine, acetic acid, and yolk of egg. **L., Stokes'**, a stimulating lini ment containing oil of turpentine 100, acetic acid 15 rose-water 80, linseed oil 4, and the yolk of one egg **L., Swediaur's**, a salve for application to carcinoma tous ulcers, containing arsenious acid and olive oil.

Linin (*li'-nin*) [*linum*, flax]. 1. A strongly purgativ principle obtainable from *Linum catharticum*, or purg ing flax. Unof. 2. In biology, minute threads extend ing between the individual microsomata (*ids*) in cell-nucleus. (O. von Rath.) The achromatin of th nuclear network; *parachromatin*, less correctly calle *nucleo-hyaloplasm.*

Linitis (*li-ni'-tis*) [λίνον, web; ιτις, inflammation]. A inflammation of the network of filamentous areola tissue surrounding the vessels of the stomach. **L. Plastic**, a term for fibrinous infiltration of the pylorus **L., Suppurative**, suppurative or phlegmonous gas tritis.

Link (*lingk*) [ME., *lenke*, a link]. A loop of a chain

Linoleic Acid (*lin-o-le'-ik*). See *Acid.*

Linolein (*lin-o'-le-in*) [*linum*, flax; *oleum*, oil]. Th neutral fat contained in linseed oil, to which th drying property of the oil is due. It is, chemically, linoleate of glycerin.

Linseed (*lin'-sēd*). See *Linum.* **L. Oil**, *Oleum lini*, i expressed from the seeds of the *Linum usitatissimum* or flax-plant. By cold pressure is obtained a pale tasteless oil, which is used in Russia and Polan in cooking, as a substitute for lard or butter. By warm pressure an amber-colored or dark-yellow oil is ob tained. Linseed oil is, when fresh, somewhat viscic but as a drying-oil it gradually absorbs oxygen, an becomes thick and eventually dry and hard. It is use in the preparation of paints, varnishes, printers' ink and oil-cloth. **L. Poultice**, a poultice made of linsee meal.

Lint [*linum*, flax]. A loosely woven or partly felte mass of broken linen-fibers, made by scraping an "picking" old linen cloth. It is used as a dressin for wounds and raw surfaces. See *Charpie.* **L., Com mon**, lint that is twilled on one side and "woolly on the other. In the spreading of an ointment th twilled side is used.

Linteum (*lin'-te-um*) [L.]. Lint. **L., Paten** English charpie; lint that is scraped on both side a soft finish being thus given to the two surface **L., Picked**, charpie.

Linum (*li'-num*) [L.: *gen.*, *Lini*]. Flaxseed. Lin seed. The seeds of *L. usitatissimum*, the comme flax-plant, containing 30–40 per cent. of fixed (linseed oil in the embryo of the seed, and 15 per cent. mucilage in the epithelium. It is a demulcent, emo lient, and expectorant, useful in all inflammations mucous membranes. **L., Cataplasma** (B. P.), ma from linseed meal. **L. catharticum** is an active purg tive and vermifuge. **L., Farina** (B. P.), flaxseed me used as a poultice. **L., Ol.**, the fixed oil of flaxsee expressed cold; a glycerid of linoleic acid. D ℥ss–ij. **L., Infus.**, unof., "flaxseed tea," flaxsee ℥iij, licorice root ℥j, water ℥x, infused four hour Dose indefinite. **L., Semen**, linseed or flaxsee **Carron Oil**, linseed oil emulsified in lime-water. Th genus *Linum* contains several other species.

Liodermia (*li-o-der'-me-ah*) [λεῖος, smooth; dépμα skin]. A condition of smoothness and glossiness the skin. **L. essentialis cum melanosi et telang ectasia.** Synonym of *Xeroderma pigmentosum.*

Liomyoma (*li-o-mi-o'-mah*) [λεῖος, smooth; μῦς a muscle-tumor]. A tumor composed of unstripe muscular tissue; its most common seat is the uteru where, on account of the admixture of fibrous tissue, is known as uterine fibroid.

Liotrichous (*li-ot'-rik-us*). See *Leiotrichous.*

Lip [ME., *lip*, lip]. Either of the fleshy folds surrounding the orifice of the mouth; or one of the labia majora. See *Labium.* **L.-protector,** a shield for protecting the lip during a dental operation. **L.-reading, German System of,** a method of teaching deaf-mutes to speak by imitating the movements of the lips and tongue, while modulation is secured by feeling the vibrations of the teacher's larynx, the pupil in this way attempting to control the natural harshness of the laryngeal sounds. **L.-salve,** a cosmetic ointment for the lips.

Lipa (*li'-pah*) [L.]. Fat.

Lipacidemia (*lip-as-id-e'-me-ah*) [λίπος, fat; *acidus*, sour; αἷμα, blood]. The presence of fatty acids in the blood, with diminution of its alkalinity.

Lipaciduria (*lip-as-id-u'-re-ah*) [λίπος, fat; *acidus*, acid; οὖρον, urine]. The presence of fatty acids in the urine.

Lipæmia (*lip-e'-me-ah*). See *Lipemia.*

Lipanin (*lip'-an-in*) [λίπος, fat]. A substitute for cod-liver-oil, consisting of pure olive-oil and six per cent. of oleic acid. It speedily emulsifies in weak solutions of soda, has an agreeable taste, and is readily taken. The dose is from 2 to 6 tablespoonfuls daily.

Lipara (*lip'-ar-ah*) [λιπαρός, fatty]. An emollient plaster.

Liparia (*lip-a'-re-ah*) [λιπαρία, fatness]. Fatness; obesity.

Liparocele (*lip'-ar-o-sēl*) [λιπαρός, fat; κήλη, a tumor]. A fatty tumor or cyst; a hernia containing fatty tissue.

Liparoid (*lip'-ar-oid*) [λιπαρός, fatty; εἶδος, like]. Resembling fat.

Liparomphalos (*lip-ar-om'-fal-os*) [λιπαρός, fat; ὀμφαλός, the navel]. A fatty tumor situated at the navel, or involving the umbilical cord.

Liparoscirrhus (*lip-ar-o-skir'-us*) [λιπαρός, fat; σκίρρος, a carcinomatous growth]. A fatty, scirrhous tumor.

Liparotrichia (*lip-ar-o-trik'-e-ah*) [λιπαρός, fat; θρίξ, hair]. Abnormal greasiness of the hair.

Liparous (*lip'-ar-us*) [λιπαρός, fat]. Fat; obese.

Lipemania (*li-pe-ma'-ne-ah*). See *Lypemania.*

Lipemia (*lip-e'-me-ah*) [λιπός, fat; αἷμα, blood]. The presence of an emulsion of fine oil-globules in the blood, a condition sometimes noted in diabetes. **L., Intra-ocular,** a condition characterized by marked distention of the retinal vessels, and a salmon-colored fundus. **L. retinalis.** Same as *L., Intra-ocular.*

Lipocele (*lip'-o-sēl*). Synonym of *Liparocele, q. v.*

Lipochrin (*lip'-o-krin*) [λίπος, fat; ὠχρός, sallow]. A yellow pigment obtained from the fat-globules in the retinal epithelium. It is soluble in chloroform, ether, and benzol. It is probably closely allied to the yellow coloring-matter of many other animal fats. It is slowly bleached by sunlight.

Lipochrome (*lip'-o-krōm*) [λίπος, fat; χρῶμα, color]. Any one of the very numerous fatty pigments of the animal economy, such as the chromophanes and lutein. They are fatty pigments characterized by exhibiting absorption-bands, which, though varying somewhat in position according to the solvent employed, are usually situated toward the violet end of the spectrum. Under this class of pigments are included the *luteins.* These fatty pigments are found in the blood and viscera of many invertebrates.

Lipodermatous (*lip-o-der'-mat-us*) [λείπειν, to leave; δέρμα, skin]. Affected with lipodermia.

Lipodermia (*li-po-der'-me-ah*). See *Leipodermia.*

Lipofibroma (*lip-o-fi-bro'-mah*) [λίπος, fat; *fibroma*, a fibrous tumor]. A lipoma with fibrous elements.

Lipogastrosis (*lip-o-gas-tro'-sis*) [λείπειν, to leave; to be lacking; γαστήρ, stomach]. In biology, absence of a proper enteric cavity, or stomach.

Lipogenesis (*lip-o-jen'-es-is*) [λίπος, fat; γένεσις, birth]. The formation or deposit of fat.

Lipogenous (*lip-oj'-en-us*) [λιπός, fat; γεννᾶν, to beget]. Fat-producing.

Lipoid (*lip'-oid*) [λίπος, fat; εἶδος, like]. Resembling fat or oil.

Lipoma (*lip-o'-mah*) [λίπος, fat; ὄμα, a tumor: *pl.*, *Lipomata*]. A fatty tumor. **L. arborescens tuberculosum,** tuberculous disease of a joint, in which the whole inner surface of the synovial membrane is covered with sessile or pedunculated papillomatous growths, small and rather uniform in size. If these become detached they constitute the so-called rice-bodies. **L. colloides,** myxo-lipoma. **L., Cystic,** one containing cysts. **L., Fibrous.** See *Lipofibroma.* **L., Myxo-,** a lipoma containing myxomatous tissue. **L., Pendulous,** *Lipoma pendulum.* **L. pendulum,** a lipoma having a pedicle. **L., Telangiectatic,** one containing many dilated blood-vessels.

Lipomatoid (*lip-o'-mat-oid*). See *Lipomatous.*

Lipomatosis (*lip-o-mat-o'-sis*) [λίπωμα, a fatty tumor]. A general deposition of fat; obesity.

Lipomatous (*lip-o'-mat-us*) [λίπωμα, a fatty tumor]. Of the nature of a lipoma; fatty.

Lipomeria (*lip-o-me'-re-ah*) [λείπειν, to leave; μέρος, a part]. A monstrosity having one limb absent.

Lipomyxoma (*lip-o-miks-o'-mah*) [λίπος, fat; μύξωμα, a myxomatous tumor: *pl.*, *Lipomyxomata*]. A myxoma with fatty elements.

Liposarcous (*lip-o-sar'-kus*) [λείπειν, to leave; σάρξ, flesh]. Lean; emaciated.

Liposis (*lip-o'-sis*). See *Lipomatosis.*

Lipospongosis (*lip-o-spun-go'-sis*) [λίπος, fatty; σπόγγος, sponge]. The formation of a fatty or sponge-like outgrowth.

Lipostomatous (*lip-o-sto'-mat-us*) [λείπειν, to leave; στόμα, mouth]. Having no mouth.

Lipostomosis (*lip-o-sto-mo'-sis*) [λείπειν, to leave; to be lacking; στόμα, mouth]. In biology, absence of the oral aperture.

Lipostomy (*lip-os'-to-me*) [λείπειν, to leave; στόμα, mouth]. Atrophy of the mouth.

Lipothymia (*lip-o-thi'-me-ah*). See *Leipothymia.*

Lipotype (*lip'-o-tīp*) [λείπειν, to leave, to be lacking; τύπος, impression, type]. In biology, a type of organism, the absence of which is characteristic of a particular district or region; thus the *Bovidæ* and *Viverridæ* are lipotypes of the neotropic region.

Lipoxenous (*lip-oks'-en-us*) [λείπειν, to leave; ξένος, host]. In biology, applied to a parasite that leaves its host and completes its existence independently.

Lippa (*lip'-ah*). Lippitudo, *q. v.*

Lippia (*lip'-e-ah*) [after Augustus *Lippi*, a French physician]. A genus of verbenaceous plants. The leaves of **L. mexicana,** growing in Mexico and the U. S., are demulcent and expectorant, and do not nauseate. Dose of the tincture ʒss-j. **L. dulcis** and **L. graveolens** have similar uses. Unof.

Lippich's Polarimeter. A polarimeter for the quantitative determination of sugar in the urine.

Lippiol (*lip'-e-ōl*) [*lippia; oleum*, oil]. A medicinal camphor derivable from *Lippia mexicana.* Unof.

Lippitude (*lip'-e-tūd*), **Lippitudo** (*lip-e-tu'-do*) [*lippus*, blear-eyed; a watery condition of the eyes]. A condition marked by a moist and raw margin of the eyelids, with a discharge of purulent matter. **L. angularis,** a chronic inflammation of the lids at the external canthus. **L. neonatorum,** ophthalmia neonatorum.

Lipsis (*lip'-sis*) [λεῖψις a leaving]. Cessation; ending. **L. animi,** fainting.

Lipuria (*lip-u'-re-ah*) [λίπος, fat; οὖρον, urine]. The presence of fat in the urine.

Lipyl (*lip'-il*) [λίπος, fat; ὕλη, matter], C_3H_2. The supposed radicle of glycerin; also, an old name for glyceryl, C_3H_5.

Liquable (*lik'-wah-bl*) [*liquare*, to render liquid]. Capable of being liquefied.

Liquamen (*lik'-wam-en*) [*liquare*, to render liquid]. The liquid obtained by melting solids.

Liquation (*lik-wa'-shun*) [*liquare*, to render liquid]. The process of melting.

Liquefacient (*lik-we-fa'-se-ent*) [*liquefaciens*, liquefying]. 1. Having the power to liquefy or soften. 2. An agent that has the power to liquefy a hard deposit or growth.

Liquefaction (*lik-we-fak'-shun*) [*liquefactio; liquefacere*, to change to liquid form]. The condition of having been changed to a liquid; the process of change into a liquid. **L.-necrosis.** See *Necrosis.*

Liquefactive (*lik-we-fak'-tiv*) [*liquefacere*, to render liquid]. Pertaining to, causing, or characterized by liquefaction.

Liquescent (*lik-wes'-ent*) [*liquescere*, to become liquid]. Becoming, or tending to become, liquid.

Liqueur (*lik-ur'*) [Fr. for "liquor"]. Any cordial or alcoholic drink; especially a compound of alcohol with some flavoring-agent, usually a mixture of aromatic oils; it is often combined with a bitter substance derived from herbs. Formerly the liquors were used as remedies, but now they are mostly served with the meals. Some are employed as vehicles for various remedies.

Liquid (*lik'-wid*) [*liquidus; liquere*, to melt]. That form of a substance in which the molecules are in a state intermediate between attraction and repulsion; a substance that flows and takes the shape of the containing-vessel. Water between 0° and 100° C. is the best example. **L. Acid-green.** See *Pigments, Conspectus of.* **L.-blue.** Same as *Indigo-blue.* **L. Gelatin.** See *Gelatin.* **L. Glue.** See *Glue.* **L., Hager's,** a substitute for ammonium sulphid or hydrogen sulphid, made by dissolving 0.2 gram of sulphur lotum in 5 cgm. of carbon bisulphid, and adding 5 cgm. of benzene and 10 cgm. of ether. **L. Indigo-blue.** Same as *Soluble Blue.* **L., Maynard's Adhesive,** collodion. **L. of Regnauld.** See *Anesthetic.*

Liquidambar (*lik'-wid-am'-bar*) [*liquidus*, liquid; *ambar*, amber]. A genus of hamamelidaceous trees. **L. altingia,** of Malaysia, affords a portion of commercial styrax. **L. orientale,** of Asia, affords *Styrax, q. v.* **L. styraciflua,** of North America (sweet-gum, bilsted, copalm) affords a stimulant gum, and is useful in diarrheas and in coughs and colds. The name of *liquidambar* has been applied to the sweet-gale or sweet-fern (*Comptonia asplenifolia*). Unof.

Liquidity (*lik-wid'-it-e*) [*liquidus*, liquid]. Fluidity; the state of being liquid.

Liquiform (*lik'-wif-orm*) [*liquor*, liquid; *forma*, form]. Of the nature of a liquid.

Liquor (*lik'-or* or *li'-kwor*) [L.]. A liquid. In pharmacy, any solution in water of non-volatile substances, except infusions, decoctions, syrups, but including the solution of gutta-percha (in chloroform). There are 20 official *liquores;* and a large number besides are given in the "U. S. Dispensatory" from the "National Formulary" and the British Pharmacopeia. In anatomy, any fluid of the body. **L. acidus halleri,** consists of 1 part of sulphuric acid and 3 parts of alcohol, colored by red-poppy petals. **L. amnii,** the liquid contained in the amniotic sac in which the fetus lies. Its normal quantity is from one to two pints. At the middle of pregnancy it equals in weight that of the fetus. It serves a number of useful functions, and in labor protects the fetus and cord from pressure, dilates the os and lubricates the genital canal. **L. Cotunnii,** the perilymph secreted by the fibro-serous membrane of the internal ear. **L. entericus,** the intestinal juice. **L. folliculi,** the fluid filling the follicle or space about the developing ovum in the ovary. **L. gastricus,** the gastric juice. **L., Labarraque's,** liquor sodæ chloratæ. **L. lymphæ,** the fluid portion of lymph, analogous to liquor sanguinis. **L., Malt,** a name given to beer, ale, stout, etc. Malt liquors are made by fermenting an infusion of malt (barley) in the presence of hops and other substances. **L. Morgagni,** the small quantity of fluid found between the crystalline lens and its capsule. **L. pancreaticus,** pancreatic juice. **L. sanguinis,** the blood-plasma; the fluid portion of the blood. **L. scarpæ.** See *Endolymph.* **L. sedans.** See *Viburnum.* **L. seminis,** a colorless, transparent, and albuminous liquid, which, along with the spermatozoa and seminal granules, constitutes the semen. **L., Spirituous,** a distilled alcoholic liquor. **L. stypticus,** liquor ferri chloridi.

Liquorice (*lik'-or-is*). See *Glycyrrhiza.* **L., Wild.** See *Abrus.*

Lirate (*li'-rāt*) [*lira*, a ridge]. Ridged or furrowed.

Lirella (*li-rel'-ah*) [*lira*, a furrow]. In biology, the peculiarly furrowed apothecium of certain lichens.

Liriodendrin (*lir-i-o-den'-drin*) [λείριον, lily; δένδρον, tree]. An alkaloidal precipitate from the bark of *Liriodendron tulipifera.* It is stimulant, tonic, and diuretic, and is said to have toxic qualities. Unof.

Liriodendron (*lir-e-o-den'-dron*) [λείριον, lily; δένδρον, tree]. A genus of magnoliaceous trees. **L. tulipifera,** of N. America and Asia, is the tulip-tree, miscalled poplar. Its bark is stimulant, tonic, and antipyretic. Dose of the saturated tincture, one fluidram. Unof.

Lisfranc's Operations. See *Operations, Table of.* **L.'s Tubercle,** a rough spot on the anterior surface of the first rib near the superior border. It serves for the attachment of the scalenus anticus muscle.

Lisle's Fever-powder. A powder similar to *James's Powder, q.v.*

Lisp [ME., *lispen*, to lisp]. To imperfectly pronounce the sibilant letters.

Lisping (*lisp'-ing*) [ME., *lispen*, to lisp]. A defect of speech, natural or acquired, in which sibilant letters are sounded like linguals, especially *s* as *th.* It sometimes arises from too great length of the tongue.

Lissauer's Angles. See *Angles.* **L., Columns of.** See *Column.* **L.'s Tract,** a group of fine nerve-fibers in the spinal cord lying ventrad and dorsad of the entrance of the dorsal roots. These fibers, which proceed from dorsal roots at a lower level, are supposed to be in relation with the posterior vesicular column.

Lissotrichous (*lis-ot'-rik-us*) [λισσός, smooth; θρίξ, hair]. In biology, having straight, smooth hair; less correctly written *leiotrichous* and *liotrichous.*

Listen (*lis'-n*) [ME., *listnen*, to listen]. To give heed to; to give ear.

Lister's Method. See *Listerian Methods,* and also *Fractional Cultivation.*

Listerian Methods of Dressing Wounds. Carbolic acid was the first antiseptic, but from its volatility and slowness of action as a germicide, it was replaced by corrosive sublimate. But this proved irritating and was precipitated by the albumin of the blood-serum. What might be called the **Third Method** was the antiseptic dressing called **Sero-sublimate Gauze,**

consisting of a gauze charged with a solution of corrosive sublimate in the serum of horses' blood. This was found difficult to manufacture and was harsh and non-absorbent. The **Fourth Method** consisted in a combination of chlorid of ammonium and bichlorid of mercury, called **Sal-alembroth.** This was likewise objectionable because of its ready solubility in the blood-serum. **Fifth Method,** a gauze containing three or four per cent. by weight of the biniodid of mercury. This proved irritating to the skin. A **Sixth Method** consists in the employment of gauze impregnated with a solution of a double cyanid of zinc and mercury colored with rosanilin. This is said to be non-volatile, unirritating, insoluble in water, and only soluble in 3000 parts of blood-serum. It possesses but little germicidal power, while but 1 : 1200 keeps animal fluids free from putrefaction. **Seventh Method**; lately Lister has returned to the use of carbolic acid, preferring it to corrosive sublimate: (1) because it is a more powerful antiseptic; (2) because it has greater penetrating power. He combines it with the use of the double cyanid gauze, preparing the latter with a 1 to 20 solution of carbolic acid.

Listerine (*lis'-ter-in*) [after *Lister*, an English physician]. A proprietary preparation said to contain thyme, eucalyptus, baptisia, gaultheria, and mentha arvensis, with two grains of benzo-boric acid in each dram.

Listerism (*lis'-ter-izm*) [after *Lister*, an English physician]. A general name for the antiseptic and aseptic treatment of wounds according to the principles first enunciated by Lister. See *Listerian Methods*.

Listing's Law. See *Law*. **L.'s Reduced Eye,** in optics, a schematic simplified eye in which there is a mean nodal or principal point lying between the two nodal or principal points, the distance between these two points being so small (only 0.4 mm.) that they may practically be assumed to be one. By this arrangement there is gained but one refractive surface for all the media of the eye. See *Eye*.

Liter (*le'-ter*) [*litra*, a pound]. The unit of capacity in the metric system, equal to 0.88036 of an imperial quart, or 1.056 United States quarts; it is the volume of one kilogram of water at its maximum density.

Lithagogectasia (*lith-ag-o-jek-ta'-ze-ah*) [λίθος, stone; ἀγωγός, leading; ἔκτασις, a stretching out]. Lithectasy.

Lithagogue (*lith'-ag-og*) [λίθος, stone; ἀγωγός, leading]. Any agent or remedy, not mechanical, which tends to expel calculi from the bladder.

Litharge (*lith'-arj*). See *Lead* and *Pigments, Conspectus of*.

Lithate (*lith'-āt*) [λίθος, stone]. Any salt of lithic (uric) acid; a urate.

Lithectasy (*lith-ek'-tas-e*) [λίθος, stone; ἔκτασις, a stretching out]. Dilatation of the urethra and neck of the bladder for the removal of calculi.

Lithectomy (*lith-ek'-to-me*) [λίθος, stone; ἐκτομή, a cutting out]. Same as *Lithotomy*.

Lithemia (*lith-e'-me-ah*) [λίθος, stone; αἷμα, blood]. Modified gout. A condition in which, owing to defective metabolism of the nitrogenous elements, the blood becomes charged with deleterious substances, principally, perhaps, of the uric acid group, although their exact chemic nature is not determined.

Lithemic (*lith-e'-mik*) [λίθος, stone; αἷμα, blood]. Pertaining to or suffering from lithemia.

Lithenate (*lith'-en-āt*). See *Lithate*.

Lithia (*lith'-e-ah*) [λίθος, a stone], Li_2O. Oxid of lithium, an alkaline caustic. **L. Water,** mineral water containing lithium salts in solution. In the United States, are the *Buffalo Lithia Water*, water from Buffalo Lithia Springs, Mecklenburg County, Va.; *Farmville Lithia Water*, from Farmville, Va.; *Londonderry Lithia Water*, from Londonderry N. H. The proportion of bicarbonate of lithia contained in the three waters mentioned is as follows: Londonderry, 8.620, Buffalo, 1.484–2.25, Farmville, 1.99.

Lithiasic Acid (*lith-e-as'-ik*). Uric acid, *q. v.*

Lithiasis (*lith-i'-as-is*) [λίθος, stone]. The formation of calculus, especially of urinary calculus, and of gouty concretions in general; also the general state of the body that favors such calculous formation. **L. conjunctivæ,** an affection of the eyes characterized by calcareous degeneration of the secretion at the mouths of the Meibomian ducts, commonly seen in elderly people, especially such as are rheumatic. On everting the lids the small, yellowish-white concretions, gritty to the touch, may be found.

Lithiate (*lith'-e-āt*). See *Urate*.

Lithic (*lith'-ik*) [λιθικός, stony]. 1. Pertaining to stone, or calculus. 2. Pertaining to lithium. **L. Acid.** See *Acid, Uric*.

Lithium (*lith'-e-um*) [λίθος, stone: *gen.*, *Lithii*]. Li = 7; quantivalence 1. One of the rarer alkaline metals, a few of the salts only being used in medicine. See *Elements, Table of*. Because of its low atomic weight, its high saturating-power makes its salts more highly alkaline than those of sodium and potassium. The carbonate and citrate are used largely in rheumatism and gout. **L. benzoas,** $LiC_7H_5O_2$. Dose gr. ij–x. See *Benzoic Acid*. **L. bromidum,** LiBr. See *Bromin*. **L. carbonas,** Li_2CO_3, not deliquescent. Dose gr. ij–xv. **L.-carmin Solution.** See *Stains, Table of*. **L. citras,** $Li_3C_6H_5O_7$, deliquescent. Dose gr. v–xxx. **L. guaiacus,** contains 3 parts of guaiacum and 1 of lithium. Dose gr. v. **L. hippuras,** used in gout. Dose gr. v–x. **L. oxidum.** See *Lithia*. **L. salicylas,** $2LiC_7H_5O_3.H_2O$. See *Salix*. **Liquor lithiæ effervescens** (B. P.), useful in gout. Dose f℥ v–x.

Lithiuria (*lith-e-u'-re-ah*) [λίθος, stone; οὖρον, urine]. Lithuria, *q. v.*

Lithobexis (*lith-o-beks'-is*) [λίθος, stone; βήξ, cough]. Cough with expectoration of calcareous particles.

Lithocenosis (*lith-o-sen-o'-sis*) [λίθος, stone; κένωσις, evacuation]. The extraction of the fragments of calculi that have been crushed or mechanically divided.

Lithoclast (*lith'-o-klast*). See *Lithotrite*.

Lithoclastic (*lith-o-klas'-tik*) [λίθος, stone; κλάειν, to break]. Relating to the surgical crushing of a calculus in the bladder.

Lithoclasty (*lith'-o-klas-te*). Lithotrity, *q. v.*

Lithoclysmia (*lith-o-kliz'-me-ah*) [λίθος, stone; κλύσμα, clyster]. An injection of solvent liquids into the bladder for the removal of calculi.

Lithocyst (*lith'-o-sist*) [λίθος, stone; κύστις, bladder]. In biology: (*a*) One of the marginal bodies, in the form of little bags of crystals, found in the covered-eyed *Medusæ*; rudimentary or incipient organs of vision; they are the exclusive seat of spontaneity, so far as the so-called "primary movements" are concerned. (*b*) One of the "crystal-cells" of plants.

Lithocystotomy (*lith-o-sis-tot'-o-me*) [λίθος, stone; κύστις, bladder; τομή, a cut]. Lithotomy, *q. v.*

Lithocysturia (*lith-o-sis-tu'-re-ah*) [λίθος, stone; κύστις, bladder; οὖρον, urine]. Disease of the bladder caused by lithuria.

Lithodectasy (*lith-o-dek'-tas-e*). Lithectasy, *q. v.*

Lithodialysis (*lith-o-di-al'-is-is*) [λίθος, stone; διαλύειν, to dissolve]. 1. The solution of calculi in the bladder. 2. The surgical operation of breaking or crushing a vesical calculus, previous to its removal by mechanical or other means.

Lithodialytic (*lith-o-di-al-it'-ik*) [λίθος, stone; διαλύειν, to dissolve]. Relating to or causing lithodialysis.

Lithodomous (*lith-od'-o-mus*) [λίθος, stone; δόμος, house]. In biology, dwelling in stones.

Lithodrassic (*lith-o-dras'-ik*) [λίθος, a stone; δράσσειν, to grasp]. Capable of seizing a stone. **L. Forceps,** a variety of forceps used in operations for stone in the bladder.

Lithodyalisis (*lith-o-di-al'-is-is*). See *Lithodialysis.*

Lithofellic or **Lithofellinic Acid** (*lith-o-fel'-ik, lith-o-fel-in'-ik*) [λίθος, stone; *fel,* gall], $C_{20}H_{36}O_4$. An acid found in intestinal concretions.

Lithogenesis (*lith-o-jen'-es-is*) [λίθος, stone; γένεσις, genesis]. The formation of calculi or stones.

Lithogenous (*lith-oj'-en-us*) [λίθος, stone; γεννᾶν, to beget]. Pertaining to or causing the formation of calculi or stones.

Lithogeny (*lith-oj'-en-e*). See *Lithogenesis.*

Lithoid, Lithoidal (*lith'-oid, lith-oid'-al*) [λίθος, stone; εἶδος, like]. Resembling a stone.

Lithokelyphopedion (*lith-o-kel-if-o-pe'-de-on*) [λίθος, stone; κέλυφος, shell; παιδίον, child]. Calcification of the fetus and the fetal membranes.

Lithokelyphos (*lith-o-kel'-if-os*) [λίθος, a stone; κέλυφος, an egg shell]. See *Lithopedion.*

Lithokonion (*lith-o-ko'-ne-on*) [λίθος, stone; κονιᾶν, to pulverize]. An instrument formerly used in pulverizing vesical calculi.

Litholabe (*lith'-o-lāb*) [λίθος, stone; λαβεῖν, to seize]. An instrument for grasping and holding a vesical calculus during an operation for its removal.

Litholaby (*lith-ol'-a-be*). See *Lithotrity.*

Litholapaxy (*lith-ol-ap-ak'-se*) [λίθος, stone; λάπαξις, removal]. An operation for crushing stone in the bladder and removing the fragments at the same sitting by irrigation.

Litholeïn (*lith-o'-le-in*) [λίθος, stone; *oleum,* oil]. A substance similar to vaselin, and, because of its antiseptic and antiparasitic qualities, proposed as a substitute for it. It is oily, of neutral reaction, without smell or taste, and contains no fat.

Lithology (*lith-ol'-o-je*) [λίθος, stone; λόγος, treatise]. The science of the nature and treatment of calculi.

Litholysis (*lith-ol'-is-is*) [λίθος, a stone; λύσις, solution]. See *Lithodialysis.* **L., Voltaic,** electrolytic lithodialysis.

Litholyte (*lith'-o-līt*) [λίθος, stone; λύειν, to loose]. A catheter used in the litholytic treatment of calculi.

Litholytic (*lith-o lit'-ik*) [λίθος, stone; λύειν, to loosen]. Pertaining to litholysis, or the dissolving of calculi in the bladder.

Lithomalacia (*lith-o-mal-a'-se-ah*) [λίθος, stone; μαλακία, softness]. The softening of a stone in the bladder; the softening of any calculus.

Lithometer (*lith-om'-et-er*) [λίθος, stone; μέτρον, measure]. An instrument for estimating the size of a vesical calculus.

Lithometra (*lith-o-me'-trah*) [λίθος, stone; μήτρα, womb]. Ossification or concretion of, or within, the womb.

Lithomyl (*lith'-o-mil*) [λίθος, stone; μύλη, mill]. An instrument for pulverizing a calculus.

Lithomyly (*lith-om'-il-e*). Same as *Lithotrity.*

Lithonephria (*lith-o-nef'-re-ah*) [λίθος, stone; νεφρός, kidney]. Disease due to renal calculus.

Lithonephritis (*lith-o-nef-ri'-tis*) [λίθος, stone; νεφρός, kidney; ιτις, inflammation]. Inflammation of the kidney due to the presence of renal calculi.

Lithonephrotomy (*lith-o-nef-rot'-o-me*) [λίθος, stone; νεφρός, kidney; τομή, a cut]. Surgical incision of the kidney for the removal of a renal calculus.

Lithonlytic, Lithonthryptic (*lith-on-lit'-ik, lith-on-thrip'-tik*). See *Lithotriptic.*

Lithontripsy (*lith-on-trip'-se*) [λίθος, stone; τρίβειν, to rub]. Synonym of *Lithotripsy, q. v.*

Lithontriptic (*lith-on-trip'-tik*) [λίθος, stone; τρίβειν, to rub]. See *Lithotriptic* and *Antilithic.*

Lithontriptor (*lith-on-trip'-tor*) [λίθος, stone; τρίβειν, to rub]. A lithotrite.

Lithopedion (*lith-o-pe'-de-on*) [λίθος, stone; παιδίον, child]. The calcified or mummified remains of a dead fetus carried in the uterus, its appendages, or the abdominal cavity, sometimes long beyond the normal period of gestation.

Lithophagy (*lith-off'-aj-e*). See *Lithotrity.*

Lithophan (*lith'-o-fan*). See *Pigments, Conspectus of.*

Lithophone (*lith'-o-fōn*) [λίθος, stone; φωνή, sound]. An instrument for detecting by sound the presence of calculi in the bladder.

Lithophthisis (*lith-off'-this-is*) [λίθος, stone; φθισις, phthisis]. Tuberculosis of the lungs with calcareous concretions.

Lithoplatomy (*lith-o-plat'-om-e*) [λίθος, stone; πλατός, wide]. Removal of a vesical calculus by dilating the urethra.

Lithopriny (*lith-op'-rin-e*). See *Lithotrity.*

Lithoprion (*lith-op-re'-on*) [λίθος, a stone; πρίων, a saw]. An instrument for sawing instead of crushing a vesical calculus.

Lithoprisy (*lith-op'-riz-e*) [λίθος, stone; πρῖσις, sawing]. The operation of sawing through a stone in the bladder.

Lithoscope (*lith'-o-skōp*) [λίθος, stone; σκοπεῖν, to examine]. An instrument for the detection and examination of calculi in the bladder.

Lithotecnon (*lith-o-tek'-non*) [λίθος, stone; τέκνον, child]. Same as *Lithopedion, q. v.*

Lithoterethrum, Lithoteretron (*lith-o-ter'-eth-rum, lith-o-ter'-et-ron*) [λίθος, stone; τέρετρον, gimlet]. A lithotrite.

Lithothlibia (*lith-o-thlib'-e-ah*) [λίθος, stone; θλίβειν, to press]. The operation of crushing a vesical calculus between a sound introduced into the bladder and a finger in the rectum or vagina.

Lithothryptic (*lith-o-thrip'-tik*) [λίθος, stone; θρυπτικός, breaking; θρύπτειν, to break]. Same as *Lithotritic.*

Lithothryptist (*lith-o-thrip'-tist*) [λίθος, stone; θρύπτειν, to break]. One who practises lithotrity.

Lithothryptor (*lith-o-thrip'-tor*) [λίθος, stone; θρύπτειν, to break]. An instrument used in lithotrity.

Lithothrypty (*lith'-o-thrip-te*) [λίθος, stone; θρύπτειν, to break]. Lithotrity; the operation of crushing a calculus.

Lithotome (*lith'-o-tōm*) [λίθος, stone; τομή, a cutting]. A cutting-instrument for use in lithotomy; a cystotome. **L. caché,** a lithotome in which the blade is concealed, but is readily made to protrude after the introduction of the instrument.

Lithotomic (*lith-o-tom'-ik*) [λίθος, stone; τομή, a cutting]. Relating to lithotomy. **L. Posture.** See *Postures, Table of.*

Lithotomist (*lith-ot'-o-mist*) [λίθος, stone; τομή, a cutting]. A surgeon who practises or performs lithotomy.

Lithotomy (*lith-ot'-o-me*) [λίθος, stone; τέμνειν, to cut]. Incision into the bladder to remove a calculus. **L., Bilateral,** entrance into the bladder by means of a curved incision into the perineum just in front of the rectum, the lithotome entering by an incision into the urethra at this point. **L., Central.** See *L., Median.* **L., High, L., Hypogastric,** a suprapubic cystotomy for the removal of a stone. **L., Lateral,** the perineal incision is about 1½ inches in front of the rectum and to the left of the raphé, the cut being

downward and outward, with the patient on his back and the thighs elevated. **L., Median or Marian,** the perineal incision is made in the median line one-half inch in front of the anus, by a straight, double-edged bistoury. **L., Medio-bilateral,** a modification of the bilateral, consisting in a median incision through the perineum, with division of each lateral lobe of the prostate. **L., Medio-lateral,** a modification of the lateral operation, the perineal incision being made in the median line, and the prostatic incision laterally. **L., Perineal,** a lithotomy through a perineal incision. **L. Position.** See *Postures, Table of.* **L., Pre-rectal,** a modification of the bilateral, in which after a median incision through the perineum, the anterior wall of the rectum is dissected from the bulb of the urethra, and the membranous urethra is punctured just anterior to the prostate, the latter being divided by the lithotome. **L., Recto-vesical,** extraction of a vesical stone by an incision through the rectum. **L., Renal,** Nephrolithotomy. **L., Supra-pubic,** by an incision above the pubis at a point where the bladder is not covered by peritoneum. **L., Urethral,** an incision through the membraneous portion of the urethra for removal of a calculus imbedded in the urethra. **L., Vaginal,** by incision through the vaginal wall.

Lithotony (*lith-ot'-o-ne*) [λίθος, stone; τείνειν, to stretch]. Removal of a vesical calculus through an artificial fistula, which is gradually dilated.

Lithotresis (*lith-o-tre'-sis*) [λίθος, stone; τρῆσις, a boring]. The drilling of holes through a calculus, as a step in its destruction and removal.

Lithotripsy (*lith-o-trip'-se*) [λίθος, stone; τρίβειν, to rub]. The operation of crushing calculi of the bladder. See annexed illustration.

THE LITHOTRITE IN POSITION DURING THE OPERATION OF LITHOTRITY.

Lithotriptic (*lith-o-trip'-tik*) [λίθος, stone; τρίβειν, to rub]. Relating to lithotripsy.

Lithotriptor (*lith-o-trip'-tor*) [λίθος, stone; τρίβειν, to rub]. An instrument designed for crushing calculi in the bladder. **L., Urethral,** an instrument for crushing urethral calculi.

Lithotrite (*lith'-o-trit*) [λίθος, stone; *terere*, to rub]. An instrument for crushing or pulverizing a vesical calculus.

Lithotritic (*lith-o-trit'-ik*) [λίθος, stone; *terere*, to rub]. Pertaining to lithotrity.

Lithotrity (*lith-ot'-rit-e*), **Lithotriture** (*lith-ot'-rit-ūr*) [λίθος, stone; *terere*, to rub]. The process of crushing a stone in the bladder, by the lithotrite, into fragments small enough to pass through the urethral canal. **L., Electric,** lithotrity by means of electrolysis.

Lithotrypsis (*lith-o-trip'-sis*). Same as *Lithotrity, q.v.*

Lithotrypterion (*lith-o-trip-ter'-e-on*) [λίθος, a stone; τρίβειν, to rub]. A small lithotrite.

Lithotryptor (*lith-o-trip'-tor*), **Lythotrypter** (*lith-o-trip'-ter*). Same as *Lithotrite, q.v.*

Lithous (*lith'-us*) [λίθος, stone]. Having the nature or composition of stone.

Lithoxyduria (*lith-oks-id-u'-re-ah*) [λίθος, stone; ὀξύς, acid; οὖρον, urine]. The morbid presence of xanthic oxid in the urine.

Lithuresis (*lith-u-re'-sis*) [λίθος, stone; οὔρησις, making water]. The voiding of small calculi with the urine.

Lithuria (*lith-u'-re-ah*) [λίθος, stone; οὖρον, urine]. A condition marked by excess of lithic acid, or its salts, in the urine.

Lithurorrhea (*lith-u-ror-e'-ah*). Same as *Lithuresis.*

Litigation Symptoms. Various vague manifestations of nervous shock following injury, concerning which the question of malingering arises, and which may become the subject of medico-legal inquiry.

Litmate (*lit'-māt*) [Dan., *lac*, lac; *moes*, pulp]. A salt of litmic acid.

Litmic Acid (*lit'-mik*) [Dan., *lac*, lac; *moes*, pulp]. A constituent of litmus.

Litmus (*lit'-mus*) [Dan., *lac*, lac; *moes*, pulp]. Archil. A blue pigment obtained from *Rocella tinctoria*, a lichen. It is employed in chemic determinations to detect the presence of acids and alkalies. See *Pigments, Conspectus of.* **L. Paper, Blue,** unsized paper steeped in a solution of litmus; it turns red on contact with acid solutions. **L. Paper, Red,** unsized paper steeped in litmus tincture colored red with acid; it turns blue on contact with alkaline solutions. **L. Solution, L. Tincture,** a solution of litmus used for the determination of reaction as to acidity or alkalinity.

Litrameter (*lit-ram'-et-er*) [λίτρα, pound; μέτρον, measure]. An instrument for ascertaining the specific gravity of fluids.

Litre (*le'-ter*). See *Liter* and *Metric System.*

Litter (*lit'-er*) [ME., *liter*, a litter; *lectica*, a couch]. An extemporized stretcher or couch, with handles, for carrying the sick or wounded. **L., Halsted's,** a litter made of two poles, united by two transverse iron bars, and a piece of canvas stretched between the poles. It has four legs, each 14 inches in length. **L., Hand,** a litter that is carried by hand. **L., Schell's,** a litter similar to Halsted's, but instead of having stationary legs the handles are hinged, serving as legs.

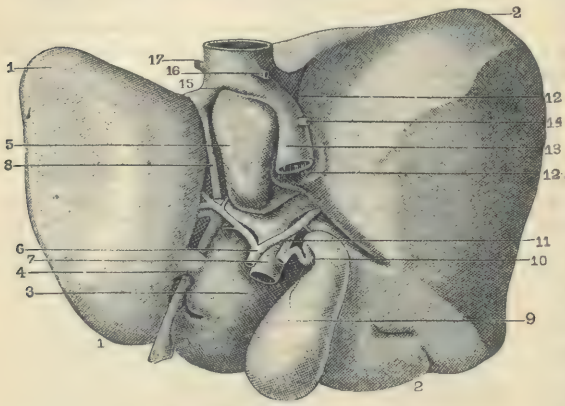
Little, Disease of. Infantile spasmodic tabes. See *Diseases, Table of.*

Littoral (*lit'-or-al*) [*litus, litoralis*, sea-shore]. Belonging to or inhabiting the shore.

Littre's Glands. See *Gland.* **L.'s Hernia,** diverticular hernia. See *Diseases, Table of,* and *Hernia.* **L.'s Operation.** See *Operations, Table of.* **L.'s Suture.** See *Suture.*

Litura (*lit-u'-rah*) [*litura*, an erasure, blot, blur: *pl.*, *Lituræ*]. In biology, a blurred marking.

Liturate (*lit'-u-rāt*) [*liturare*, to erase]. Marked with abrasions of the surface. To abrade.



Live (*liv*) [ME., *liven*, to live]. To continue in being. To have life.

Live (*hv*) [by apheresis from *alive*]. Living; animate; manifesting life. **L.-birth,** birth characterized by "the manifestation of some certain sign or signs of life by the child after it is completely born." **L.-blood,** the name given to the sensation of fluttering

in the eyelid, due to spasmodic action of the orbicularis palpebrarum muscle.

Livedo (*liv-e'-do*) [*livere*, to grow black]. Same as *Livor*.

Liver (*liv'-er*) [ME., *liver*, liver]. The largest gland in the body, a part of the digestive tract, and situated on the right side of the abdominal cavity, just below the diaphragm. Its functions are: (1) the secretion of bile; (2) the formation of glycogen; (3) the production, at least at a certain period of development, of

INFERIOR SURFACE OF LIVER.

1, 1. Left lobe. 2, 2. Right lobe. 3. Quadrate lobe. 4. Caudate lobe. 5. Lobulus spigelii. 6. Hepatic artery. 7. Vena portæ. 8. Fibrous cord from obliteration of the ductus venosus. 9. Gall-bladder. 10. Cystic duct. 11. Hepatic duct. 12. Fissure for inferior vena cava. 13. Inferior vena cava. 14. Mouth of capsular vein. 15. Left hepatic vein. 16. Mouth of right diaphragmatic vein. 17. Mouth of left diaphragmatic vein.

blood-corpuscles; (4) the destruction of blood-corpuscles; (5) the formation of a large quantity of urea; (6) the retention and destruction of certain poisonous substances absorbed from the intestinal tract. Anatomically, it consists of five lobes—the right, the left, the lobus spigelii, the lobus quadratus, and the lobus caudatus. These lobes are made up of lobules or acini, and these again of hepatic cells, capillaries, arteries and veins, lymphatics and biliary channels, each lobule being surrounded by connective tissue. The weight of the liver is between 50 and 60 ounces. **L., Albuminoid**, or **Amyloid**, a liver the seat of amyloid degeneration. **L., Bacony**. Same as *L., Amyloid*. **L., Bastard**, the spleen. **L., Beaver-tail**, a liver the left lobe of which in form resembles a beaver's tail. **L., Biliary Cirrhotic**, a liver the seat of chronic inflammation the result of obstruction and distention of the bile-ducts. **L.-blotches**, liver-patches; a vulgar term for the chloasmata of pregnancy, seen upon the brow and cheeks of the pregnant woman. They may also be present at the menstrual epochs and at the menopause. **L., Bronze**, a liver discolored by excess of biliary pigment. **L., Cirrhotic**, a liver the seat of chronic inflammation, with overgrowth of the connective tissue and atrophy of the parenchyma. **L.-clapping**, in *massage*, strong percussion of the liver with the full palm of the hand. **L.-cough**, a reflex cough due to disease of the liver. **L., Degraded**, the division of the human liver into an unusual number of lobes, such as is normal in the gorilla. **L., Drunkard's**, usually, a cirrhotic liver. **L., Fatty**, a liver with marked fatty infiltration and degeneration. **L., Floating**, a movable condition of the liver, with displacement. **L.-fluke**. See *Trematodes*, *Distoma*, and *Parasites* (*Animal*), *Table of*. **L., Hobnail**. See *Hobnail Liver*. **L., Gin-drinkers'**, or **Gin**, atrophic cirrhosis of the liver. **L., Granulated**, or **Granular**, a cirrhotic liver, with a granular surface, owing to the contraction of the interlobular connective tissue. **L., Lænnec's Cirrhosis of**, atrophic cirrhosis of the liver. See *Diseases, Table of*. **L.-leaf**. See *Hepatica*. **L., Leukemic**, a liver very much increased in size on account of a diffuse infiltration with leukemic, or lymphoid, tissue. **L., Mammillated**. See *Hobnail Liver*. **L., Movable**. See *L., Floating*. **L., Nutmeg**, a condition of the liver met with in heart-disease, fatty infiltration, and amyloid disease. The surface of a section has a peculiar, mottled appearance. The center of the lobules is dark, the periphery lighter in color. **L.-pad**, a bag or cushion stuffed with medicated materials and worn upon the hypogastric region, for its supposed efficacy in hepatic disease. **L.-patches**. See *L.-blotches*. **L., Pulsation of**. See *L.-pulse*. **L.-pulse**, a systolic pulsation over the region of the liver in cases of tricuspid regurgitation. **L.-rot**, disease in sheep due to the presence in the bile-ducts of the liver of the *Distoma hepaticum* or *Liver-fluke*. **L.-spot**, chloasma; pityriasis versicolor. **L.-sugar**. Synonym of *Glycogen*. **L. of Sulphur**. See *Hepar sulphuris*. **L., Syphilitic**, this may be a liver the seat of gummata, which on healing leave scars, or of a diffuse inflammation that may lead to cirrhosis, with atrophy or, especially in hereditary syphilis, to enlargement of the liver. **L., Tight-lace**, a liver in which the right lobe is thickened vertically from compression, marked by the ribs, and atrophic from constant pressure by tight stays. **L., Wandering**, a condition occasionally seen in women who have given birth to many children, and in those whose abdominal tissues exhibit unusual laxity. The liver is displaced from its ordinary situation, and falls into the lower portion of the abdomen, where it swings upon its elongated attachments. **L., Waxy**. See *L., Amyloid*. **L.-wort**. See *Hepatica*.

Livid (*liv'-id*) [*lividus; livere*, to be dark]. Discolored from the effects of congestion or contusion; black and blue; pale lead-color.

Lividity (*liv-id'-it-e*) [*lividus*, from *livere*, to be dark]. The state of being livid. **L., Cadaveric**, or **Post-mortem**, the bluish discoloration in the dependent parts of a corpse, due to the gravitation of the blood.

Livor (*li'-vor*) [*livor; livere*, to be dark]. Lividity. The discoloration consequent upon severe contusion and congestion of a part; post-mortem sugillation or discoloration of the skin. **L. emortualis**, change in the color of the skin of a corpse due to putrefaction. **L. febris**, the lividity occurring during a chill.

Lix (*liks*) [L.: *gen.*, *Licis*]. Wood-ashes, or the lye therefrom.

Lixivia (*liks-iv'-e-ah*) [L.]. Same as *Lixivium*.

Lixivial (*liks-iv'-e-al*) [*lixivia*, lye]. Relating to lixiviation.

Lixiviation (*liks-iv-e-a'-shun*) [*lixivia*, lye]. The process of leaching ashes. Also, the process of separating by solution any alkaline salt from the insoluble impurities with which it is mixed.

Lixivious (*liks-iv'-e-us*) [*lixivia*, lye]. Lixivial, *q. v.*

Lixivium (*liks-iv'-e-um*) [*lixivia*, lye]. The filtrate obtained by leaching ashes; practically a solution of an impure potassium hydrate.

Lizard-tail (*liz'-ard-tal'*). See *Saururus cernuus*.

Loathing (*lōth'-ing*) [ME., *loth*, hateful]. Intense disgust, which may excite nausea.

Lobar (*lo'-bar*) [*lobus*, a lobe]. Pertaining to a lobe, rather than to a lobule. **L. Pneumonia**. See *Pneumonia, Croupous*.

Lobate, or Lobed (*lo'-bāt, lōbd*) [*lobus*, lobe]. In biology. possessing lobes, or of the form of a lobe.

Lobe (*lōb*) [*λοβός, lobus*, a lobe]. Any one of the parts or divisions into which an organ may be separated by fissures and constrictions; as the lobes of the brain, liver, ear, etc. A more or less rounded part or projection of an organ. **Lobes of Brain**; each half of the convex cerebral surface is divided by fissures into five lobes, the frontal, parietal, occipital, temporo-sphenoidal, and central, or island of Reil, to which some writers add a fronto-parietal lobe. See *Brain* and *Fissure*. **Lobes of Liver.** See *Liver*. **L., Marginal**, the first frontal convolution running along the margin of the longitudinal fissure. **Lobes, Optic**, the tubercula quadrigemina. **L., Slender** (*of the cerebellum*). The fourth of the five lobes on the under surface of either hemisphere of the cerebellum.

Lobelacrin (*lo-bel-a'-krin*) [from M. de *Lobel*, a French botanist]. An acrid principle derivable from *Lobelia inflata*. Unof.

Lobelet (*lōb'-let*). Same as *Lobulet*.

Lobelia (*lo-be'-le-ah*) [from M. de *Lobel*, a French botanist]. The leaves and tops of *L. inflata*, an expectorant, antispasmodic, and emetic; in larger doses a motor depressant and narcotic. It is valuable in asthma and dry cough, and is the main ingredient of empiric cures for pulmonary tuberculosis. It makes an excellent enema in strangulated hernia. **L., Acetum**, 10 per cent. of the drug. Dose ♏v–ʒj. **L., Fld. Ext.** Dose ♏j–x. **L., Infus.**, unof., ʒj to Oj. Dose ʒj–ʒj. **L., Tinct.**, 20 per cent. of the drug. Dose ♏v–xxx. **L., Tinct., Ætherealis** (B. P.) Dose ♏x–xxx. The genus *Lobelia* contains many species, most of them having little-understood medicinal qualities.

Lobelin (*lo-be'-lin*) [from M. de *Lobel*, a French botanist]. 1. A precipitate from the tincture of *Lobelia inflata*; an emetic, nervine, anti-spasmodic, resolvent and relaxant. Dose, as an emetic 1 to 3 grains in warm water, repeated, if necessary, in ten minutes, until an effect is produced. As a diaphoretic and expectorant from ¼ to ½ grain. Unof. 2. An oily liquid alkaloid, from the plant *Lobelia inflata*; actively poisonous. Unof.

Lobopneumonia (*lo-bo-nu-mo'-ne-ah*). See *Pneumonia, Croupous*.

Lobstein's Cancer. Retroperitoneal sarcoma. It often attains a considerable size. See *Diseases, Table of*. **L. Disease**, idiopathic fragility of the bones without anatomic change.

Lobular (*lob'-u-lar*) [*lobulus*, a little lobe]. Like a lobule. Pertaining to any lobule. **L. Pneumonia.** See *Pneumonia, Catarrhal*.

Lobulate, Lobulated (*lob'-u-lāt, lob'-u-la-ted*) [*lobulatus*, from *lobulus*, a little lobe]. Consisting of small lobes or lobules.

Lobulation (*lob-u-la'-shun*) [*lobulus*, small lobe]. Division into lobules. **L., Congenital**, preservation in adult life of the fetal lobulation of an organ.

Lobule (*lob'-ūl*) [*lobus*, a lobe]. See *Lobulus*. **L., Oval**, the paracentral lobule. **L., Paracentral**, the superior connecting convolution of the ascending frontal and ascending parietal gyri. **L., Pneumogastric**, the flocculus of the cerebellum.

Lobulet (*lob'-u-let*) [dim. of *lobulus*, a lobule]. A minor lobule, especially of the lung; a group, or series of groups, of five or six air-sacs connected with the dilated end of a bronchiole.

Lobulization (*lob-u-liz-a'-shun*). See *Lobulation*.

Lobulus (*lob'-u-lus*) [dim. of *lobus*, a lobe: *pl.*, *Lobuli*]. A small lobe or division of an organ. **L. caudatus**, the tailed lobe, or elevation of the liver that separates the right extremity of the transverse fissure from the commencement of the fissure for the inferior vena cava. **L. centralis**, the superior vermiform process; the island of Reil. **L. corporis striati**, the island of Reil; the lenticular nucleus. **L. of Ear**, the soft mass at the lower part of the pinna of the ear. **L. fissuræ sylvii**, the island of Reil. **L. hepatis anonymus.** See *Liver, Quadrate Lobe of*. **L. paracentralis.** See *Paracentral Gyrus in Table of Convolutions*. **L. quadratus**, the square lobe upon the inferior surface of the right lobe of the liver. **L. spigelii**, the lobule projecting from the posterior portion of the inferior surface of the liver. **L. tuberis**, the nodule of the cerebellum; the supra-marginal gyrus. **L. vagi**, the flocculus of the cerebellum.

Lobus (*lo'-bus*) [L., a lobe]. A lobe. Any well-defined, rounded part of an organ. **L. caudatus.** See *Lobulus*. **L. opertus**, the insula of the brain. **L. quadratus.** See *Lobulus*.

Local (*lo'-kl*) [*localis; locus*, place]. Not general. Affecting a part or place.

Localization (*lo-kal-iz-a'-shun*) [*locus*, a place]. The designation of the seat of any pain, irritation, injury, or disease, or the process by which a general condition manifests itself in a particular place. The faculty of locating sensory impressions. **L., Cerebral**, the determination of the anatomic position of the centers in the brain that preside over certain physiologic acts; or of the seat of pathologic conditions interfering with the proper function of these centers. See illustrations annexed. **L., Spinal-cord**; Gowers' table, showing the approximate relations to the spinal nerves of the various functions of the cord, is given herewith.

DIAGRAM OF THE MOTOR AREAS ON THE OUTER SURFACE OF A MONKEY'S BRAIN. (*Horsley and Schäfer.*)

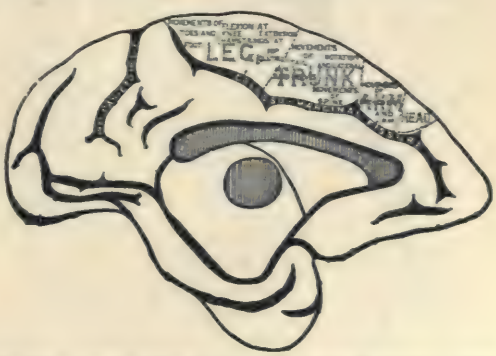


DIAGRAM OF THE MOTOR AREAS ON THE MARGINAL CONVOLUTION OF A MONKEY'S BRAIN. (*Horsley and Schäfer.*)

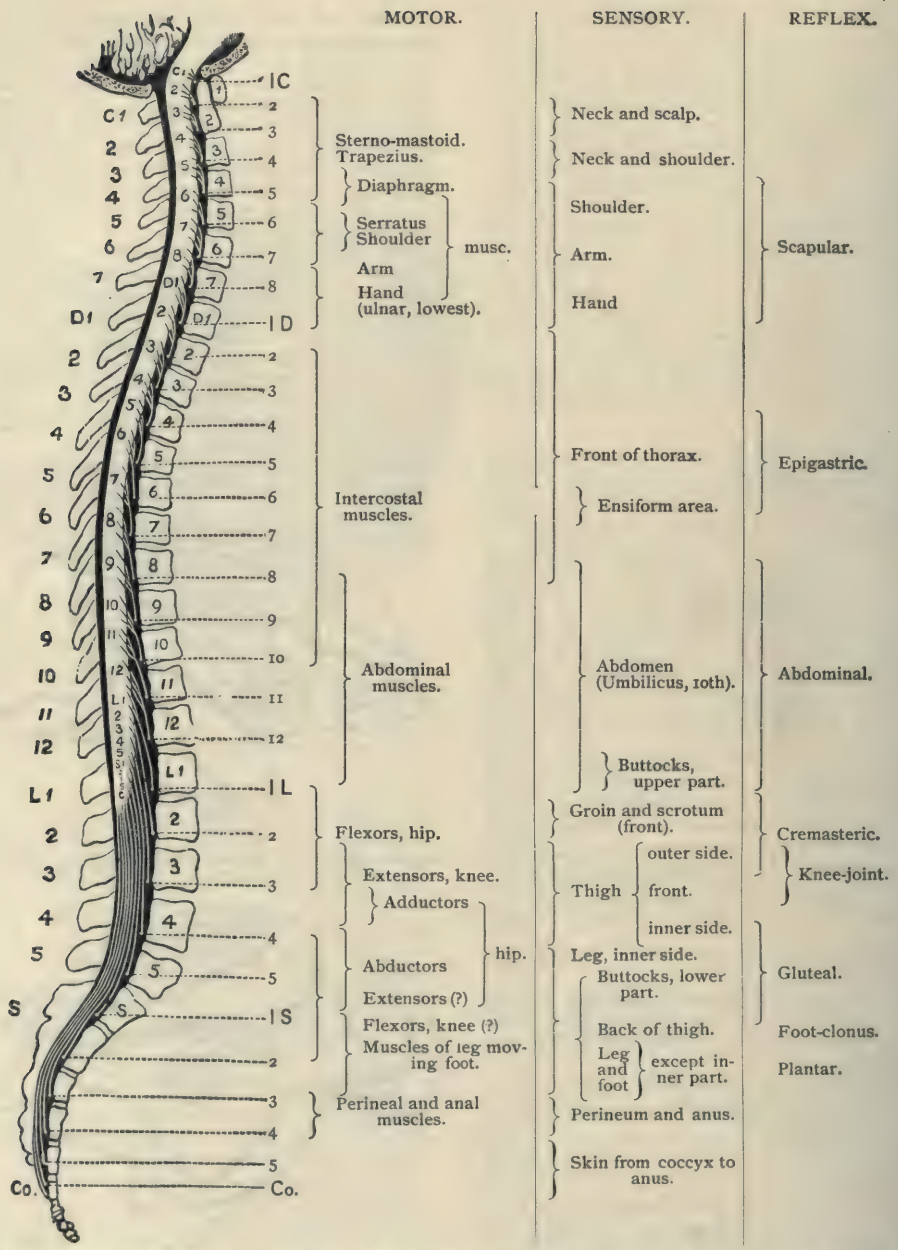

DIAGRAM AND TABLE SHOWING THE APPROXIMATE RELATION TO THE SPINAL NERVES OF THE VARIOUS MOTOR, SENSORY, AND REFLEX FUNCTIONS OF THE SPINAL CORD. (*Arranged by W. R. Gowers, from anatomic and pathologic data.*)

Localized (*lo'-kal-izd*) [*locus*, a place]. Confined to a particular place.

Locellus (*lo-sel'-us*) [dim. of *loculus*, a little place: *pl.*, *Locelli*]. In biology, a subdivision of a loculus.

Loch (*lok*) [Arab.]. A lincture, or electuary. (Old.)

Lochaditis (*lok-ad-i'-tis*). Same as *Logaditis*.

Lochia (*lo'-ke-ah*) [λόχια, λόχος, lying-in]. The discharge from the genital organs during from two to four weeks succeeding labor. **L. alba**, the whitish flow that takes place from about the seventh day. **L. rubra**, the sanguineous flow of the first few days. **L. serosa**, the serous discharge taking place about the fifth day.

Lochia (*lo'-ke-ah*) [λοχεία, childbirth]. Childbirth; confinement. (Rare.)

Lochial (*lo'-ke-al*) [λόχια, λόχος, lying-in]. Pertaining to the lochia.

Lochiation (*lo-ke-a'-shun*) [λόχια, λόχος, lying-in]. Aveling's term for the excretion of the lochia.

Lochioceliitis (*lo-ke-o-se-le-i'-tis*) [λόχιος, puerperal; κοιλία, abdomen; ιτις, inflammation]. Puerperal abdominal inflammation.

Lochiocolica (*lo-ke-o-kol'-ik-ah*) [λόχιος, puerperal; κωλικός, pertaining to the colon]. Pain in the abdominal region dependent upon, or associated with, some lochial irregularity.

Lochiodochium (*lo-ke-o-do'-ke-um*). See *Lochodochium*.

Lochiometra (*lo-ke-o-me'-trah*) [λοχία, lochia; μήτρα, uterus]. A collection of lochia in the uterus.

Lochiopyra (*lo-ke-op'-ir-ah*) [λόχιος, relating to childbed; πῦρ, fire, fever]. Puerperal fever. Same as *Lochiopyra*.

Lochiorrhagia (*lo-ke-or-a'-je-ah*) [λόχια, lochia; ῥηγνύναι, to burst forth]. An excessive flow of the lochia.

Lochiorrhea (*lo-ke-or-e'-ah*) [λόχια, lochia; ῥοία, a flow]. An abnormal flow of the lochia.

Lochiorrhoic (*lo-ke-or-o'-ik*) [λόχια, lochia; ῥοία, flow]. Pertaining to lochiorrhea.

Lochioschesis (*lo-ke-os'-kes-is*) [λόχια, lochia; σχέσις, retention]. Suppression or retention of the lochia.

Lochioschetic (*lo-ke-os-ket'-ik*) [λόχια, lochia; σχέσις, retention]. Pertaining to lochioschesis.

Lochocacocolpia (*lo-ko-kak-o-kol'-pe-ah*) [λόχος, childbed; κακός, evil; κόλπος, vagina]. Vaginal or vulval gangrene after childbirth.

Lochoceliitis (*lo-ko-se-le-i'-tis*). See *Lochioceliitis*.

Lochodochium (*lo-ko-do'-ke-um*) [λόχος, childbirth; δέχεσθαι, to receive]. A lying-in hospital; a maternity.

Lochomeleagra (*lo-ko-mel-e-a'-grah*) [λόχος, childbirth; μέλος, limb; ἀγρα, seizure]. An attack of pain in the limbs of parturient women.

Lochometritis (*lo-ko-me-tri'-tis*) [λόχος, childbirth; μήτρα, womb; ιτις, inflammation]. Inflammation of the womb consequent upon delivery; puerperal metritis.

Lochometrophlebitis (*lo-ko-me-tro-fle-bi'-tis*) [λόχος, childbirth; μήτρα, womb; φλέψ, vein; ιτις, inflammation]. Phlebitis of the uterine veins in puerperal women.

Locho-oöphoritis (*lo-ko-o-off-or-i'-tis*) [λόχος, childbed; ὠόν, egg; φορός, bearing; ιτις, inflammation]. Puerperal inflammation of an ovary.

Lochoperitonitis (*lo-ko-per-it-on-i'-tis*) [λόχος, childbed; περιτόναιον, peritoneum; ιτις, inflammation]. Inflammation of the peritoneum following childbirth.

Lochopyra (*lo-kop'-ir-ah*) [λόχος, childbed; πῦρ, fire, fever]. Puerperal fever.

Lochos (*lo'-kos*) [λόχος, childbirth]. A pregnant woman; childbed. (Obs.)

Lochotyphus (*lo-ko-ti'-fus*) [λόχος, childbed; τῦφος, stupor]. Puerperal fever of a typhoid type.

Lock (*lok*) [ME., *lok*, lock]. 1. Anything that fastens something else. 2. To fasten by means of a lock; to fasten so as to impede motion. **L.-finger**, a peculiar and very uncommon affection of the fingers in which they suddenly become fixed in a flexed position. The locking is due to the presence of a small fibrous growth in the sheath of the extensor tendon. **L.-hospital**, an English hospital for the treatment of venereal diseases; it was originally kept with locked doors, whence the name. **L.-jaw**, tetanus; trismus. **L.-spasm**, Weir Mitchell's term for a severe form of writer's cramp, the hand becoming spasmodically firmly contracted, the spasm being followed by complete relaxation.

Locked (*lokt*) [ME., *lok*, a lock]. Fastened by means of a lock; immovable. **L. Heads.** See *Head-locking*. **L. Jaw.** See *Trismus*. **L. Joint**, Pajet's term for a condition similar to that described as lock-finger, but usually involving a knee-joint.

Loco or **L. Plant** or **L. Weed** (*lo'-ko*) [Sp. for "crazy"]. A name given in parts of the U. S. to various species of *Astragalus*, *Hosackia*, *Oxytropis*, and *Sophora*, poisonous plants that are believed to cause loco-disease in cattle and horses. **L.-disease**, a local epizoötic disease of cattle and horses, believed to be liable to follow the eating of any one of the plants called *loco*.

Locoed (*lo'-kōd*) [Sp., *loco*, crazy]. Suffering from *Loco-disease*, *q. v.*

Locomobile (*lo-ko-mo'-bil*) [*locus*, place; *mobilis*, movable]. Having the power to change place, or to move from a place.

Locomobility (*lo-ko-mo-bil'-it-e*) [*locus*, place; *mobilis*, movable]. The quality of being locomobile.

Locomotility (*lo-ko-mo-til'-it-e*) [*locus*, place; *motilitas*, motility]. The quality or power of moving from place to place.

Locomotion (*lo-ko-mo'-shun*) [*locus*, place; *movere*, to move]. Animal movement. **L. of an Artery**, the straightening out of a curved artery under the impulse of the pulse-wave.

Locomotive (*lo-ko mo'-tiv*) [*locus*, a place; *movere*, to move]. Moving from place to place; able to change its place; pertaining to locomotion. **L. Pulse.** See *Corrigan's Pulse*.

Locomotivity (*lo-ko-mo-tiv'-it-e*) [*locus*, place; *movere*, to move]. The power to move from one place to another.

Locomotor (*lo-ko-mo'-tor*) [*locus*, a place; *motor*, a mover]. 1. Pertaining to locomotion. 2. That which moves from place to place. **L. Ataxia**, or **L. Ataxy.** See *Ataxy* and *Tabes*.

Locomotorium (*lo-ko-mo-to'-re-um*) [*locus*, a place; *motor*, mover: *pl.*, *Locomotoria*]. In biology, the motive apparatus of an organism; the bones, muscles, and tendons.

Locomotory (*lo-ko-mo'-tor-e*) [*locus*, place; *movere*, to move]. Pertaining to locomotion.

Loculament (*lok'-u-lam-ent*) [*loculamentum*, a case, box, cell]. Same as *Loculus*.

Loculamentum (*lok-u-lam-en'-tum*). Same as *Loculus*.

Locular, Loculate (*lok'-u-lar*, *lok'-u-lāt*) [*loculus*, a cell]. In biology, possessing one or more cell-like subdivisions; divided into or having loculi.

Locule (*lok'-ūl*). See *Loculus*.

Loculicidal (*lok-u-lis-i'-dal*) [*loculus*, a cell; *cædere*, to cut]. In biology, applied to seed-capsules that split open along the dorsal suture.

Loculus (*lok'-u-lus*) [dim. of *locus*, a place: *pl.*, *Loculi*]. In biology, a small space or cavity; a small compartment or cell, as the seed-chamber of a fruit.

Locus (*lo'-kus*) [L.: *pl.*, *Loci*]. An indefinite term in anatomy, meaning a place or position. **L. cinereus, L. cœruleus, L. ferrugineus**, a bluish-tinted eminence on the fasciculi teretes of the fourth ventricle of the brain. **L. luteus**, the regio olfactoria of the nose; so called from the yellowish color of the epithelium. **L. minoris resistentiæ**, a spot of diminished resistance—a term given to a locality, varying in different individuals, and often accidentally developed, whose resistance to the invasion of disease is less than that of other parts. **L. niger**, a dark area in the center of a section of the crus cerebri. See *Intercalatum*. **L. perforatus**, a name given to the anterior and the posterior perforated space at the base of the brain through which many vessels pass. **L. prædilectiorus**, the point of election. **L. ruber**, the red nucleus of the tegmentum.

Locust-tree. See *Hymenæa courbaril*.

Lodicle (*lod'-ik-l*). Same as *Lodicule*.

Lodicula (*lod-ik'-u-lah*). Same as *Lodicule*.

Lodicule (*lod'-ik-ūl*) [*lodicula*, dim. of *lodix*, a coverlet]. In biology, a small scale found between the stamens and palet of many grasses.

Lodoicea (*lod-o-is'-e-ah*) [after *Laodice*, daughter of Priam, King of Troy]. A genus of palms. **L. sechellarum**, the double-cocoanut tree, a palm of the Seychelle Islands. This tree and its double nut are highly esteemed in the East, where magic virtues are ascribed to the fruit. Latterly a fluid extract of the plants has been recommended as a tonic, febrifuge, and alexipharmac. Dose, gtt. ij–v. Unof.

Loeb, Bacillus of. See *Bacteria, Synonymatic Table of.*

Loebisch's Formula. See *Christison's Formula.*

Löffler's Alkaline Solution. A staining-agent used in the histologic laboratory. See *Stains, Table of.* **L.'s Bacillus**, the bacillus of diphtheria. See *Bacillus, Klebs-Löffler's*, under *Bacteria, Synonymatic Table of.* **L.'s Blood-serum Mixture**, a mixture consisting of one part of neutral meat-infusion bouillon containing 10 per cent. of grape-sugar and 3 parts of blood-serum; it is a culture-medium. **L.'s Method**, a method of staining the flagella of microörganisms. See *Stains, Table of.*

Löhlein's Diameter. In pelvimetry, the internal ascending oblique diameter, measured by the finger in the vagina from the center of the sub-pubic ligament to the upper anterior angle of the great sacro-sciatic foramen. It is 2 cm. less than the transverse diameter of the superior strait of the pelvis.

Lœmia (*lem'-e-ah*). See *Loimia.*

Lœmic (*lem'-ik*). See *Loimic.*

Lœmography (*lem-og'-ra-fe*) [λοιμός plague; γράφειν, to write]. See *Loimology.*

Lœmoid (*lem'-oid*). See *Loimic.*

Lœmology (*lem-ol'-o-je*). See *Loimology.*

Lœmophthalmia (*lem-off-thal'-me-ah*) [λοιμός, plague; ὀφθαλμία, ophthalmia]. A contagious ophthalmia.

Löwe's Oak-red. See *Oak-bark.* **L.'s Reagent or Test**, a solution for the detection of sugar in the urine. It consists of subnitrate of bismuth, glycerin, and soda lye. See *Tests, Table of.* **L.'s Ring**, a demonstration of the yellow spot of the retina which, in a strong light, appears surrounded by a bright area, two or three times as large as the spot. Clerk-Maxwell's experiment consists in looking through a solution of chrome-alum, when there is seen an oval, purplish spot due to the pigment of the yellow spot.

Lœwenberg, Canal of. See *Canal.*

Löwit's Method. See *Stains, Table of.*

Logadectomy (*log-ad-ek'-to-me*) [λογάδες, whites of the eyes; ἐκτομή, excision]. Excision of a piece of the conjunctiva. (Obs.)

Logades (*log'-ad-ēz*) [λογάδες]. The whites of the eyes; the sclerotic coats of the eyes. (Obs.)

Logaditis (*log-ad-i'-tis*) [λογάδες, whites of the eyes; *ιτις*, inflammation]. Same as *Sclerotitis.* (Obs.)

Logadoblennorrhea (*log-ad-o-blen-or-e'-ah*) [λογάδες, whites of the eyes; βλέννα, mucus; ῥοία, flow]. Conjunctival blennorrhea. (Obs.)

Logan Crown. In dentistry, an artificial crown the base of which is deeply recessed, leaving a thin border to be fitted to the natural root. One end of the dowel is baked into the crown during its manufacture. The concavity of the base facilitates the adjustment of the crown to the end of the root, and gives a more permanent form to the cement holding the dowel or post.

Loganin (*log'-an-in*), $C_{25}H_{34}O_{14}$. A glucosid extracted from strychnos seeds.

Logodiarrhea (*log-o-di-ar-e'-ah*) [λόγος, word; διάῤῥοια, a flowing through]. Excessive or maniacal loquacity.

Logographic (*log-o-graf'-ik*) [λόγος, word; φράφειν, to write]. Pertaining to written words. **L. Alalia**, that in which the thoughts cannot be expressed in writing.

Logomania (*log-o-ma'-ne-ah*) [λόγος, word; μανία, madness]. 1. Insanity characterized by talkativeness. 2. Aphasia.

Logomonomania (*log-o-mo-no-ma'-ne-ah*) [λόγος, word; μόνος, single; μανία, mania]. Monomania marked by loquacity.

Logoneurosis (*log-o-nu-ro'-sis*) [λόγος, word; νεῦρον, nerve; νόσος, disease: *pl.*, *Logoneuroses*]. 1. Any neurosis marked by a speech-defect. 2. Any neurosis attended with impairment of the mental powers.

Logopathy (*log-op'-ath-e*) [λόγος, word; πάθος, disease]. Any disease affecting the speech; dyslogia.

Logoplegia (*log-o-ple'-je-ah*) [λόγος, word; πληγή, stroke]. An aphasic symptom, consisting in the impossibility of uttering a word, though the memory of its sound is clear.

Logoplegic (*log-o-ple'-jik*) [λόγος, word; πληγή, stroke]. Relating to, or characterized by, logoplegia.

Logorrhea (*log-or-e'-ah*) [λόγος, word; ῥοία, a flow]. 1. Abnormal rapidity of speech; a symptom of cerebral irritation. 2. Same as *Logodiarrhea.*

Logwood (*log'-wood*). See *Hematoxylon.* **L.-black.** See *Pigments, Conspectus of.*

Lohoch (*lo'-hok*). Same as *Loch.*

Loimia (*loi'-me-ah*) [λοιμός, plague]. A pestilence or plague.

Loimic (*loi'-mik*) [λοιμικός; λοιμός, plague]. Pertaining to the plague or to any pestilence.

Loimology (*loi-mol'-o-je*) [λοιμός, plague; λόγος, a treatise]. The science of contagious epidemic diseases.

Loimopyra (*loi-mop'-ir-ah*) [λοιμός, plague; πῦρ, fire]. Pestilential fever.

Loin (*loin*) [ME., *loine*, loin]. Either of the lumbi, or lower part of the back in the region of the hips.

Loliin (*lo'-le-in*) [*lolium*, darnel]. A volatile, poisonous alkaloid contained in the seeds of *Lolium temulentum.*

Lolium (*lo'-le-um*) [L., darnel]. A genus of grasses, one of which, **L. temulentum**, poisonous darnel, is remarkable as one of the few grasses that appear to have poisonous qualities. Its seeds in particular are said to have narcotic qualities. By some writers this poisonous effect has been denied, and by others it has been referred to the presence of ergot; late researches seem to confirm the popular belief. Unof.

Loma (*lo'-mah*) [λῶμα, hem, fringe: *pl.*, *Lomata*]. In biology, a flap or fringe along the toe of a bird.

Lomastome (*lo'-mas-tōm*) [λῶμα, hem, fringe; στόμα, mouth]. In biology, applied to such shells as have a reflected peristome.

Lomatine (*lo'-mat-in*) [λῶμα, hem, fringe]. In biology, margined or fringed.

Lombardian Leprosy. See *Pellagra.*

Loment (*lo'-ment*) [*lomentum*, a mixture of bean-meal and rice]. In biology, a legume that when ripe breaks transversely into joints.

Lomentum (*lo-men'-tum*). Same as *Loment.*

Lomilomi (*lo'-me-lo'-me*) [Hawaiian]. A kind of shampoo or massage, practised by the Polynesians.

London Paste. A caustic paste containing equal parts of caustic soda and unslaked lime. It must be mixed with water before using. **L. White.** Same as *White Lead.*

Long [ME., *long*, long]. Having great length. **L.-sight.** Synonym of *Presbyopia* and *Hyperopia.* **L.-sightedness.** See *Hyperopia.* **L. Thread-worms.** See *Thread-worms.*

Longevity (*lon-jev'-it-e*) [*longa*, long; *vita*, life]. Long life.

Longi- (*lon'-je-*) [*longus*, long]. A prefix signifying length or extent.

Longicaudate (*lon-je-kaw'-dāt*) [*longus*, long; *cauda*, a tail]. In biology, having a long tail.

Longiductor (*lon-je-duk'-tor*) [*longus*, long; *ductor*, leader]. The adductor longus muscle. See *Muscles, Table of.*

Longimanus (*lon-je-ma'-nus*) [*longus*, long; *manus*, hand]. Long-handed.

Longing (*lawng'-ing*) [ME., *longen*, to desire earnestly]. The earnest desire for anything; it is a condition often present in the female during pregnancy.

Longipedate (*lon-je-pe'-dāt*) [*longus*, long; *pes*, foot]. Long-footed.

Longiperoneus (*lon-je-per-o-ne'-us*) [*longus*, long; περόνη, fibula]. The peroneus longus muscle. See *Muscles, Table of.*

Longipes (*lon'-je-pēs*). See *Longipedate.*

Longisect (*lon-je-sekt'*) [*longus*, long; *secare*, to cut]. To make a longisection, *q.v.*

Longisection (*lon-je-sek'-shun*) [*longus*, long; *sectio*, cutting]. Longitudinal section; especially used of the body from extremity to extremity. The division of a body into sections parallel with its long axis. See *Position and Direction, Table of.*

Longissimus (*lon-jis'-im-us*) [super. of *longus*, long]. Longest. **L. capitis, L. cervicis,** the trachelomastoid muscles. See *Muscles, Table of.* **L. dorsi.** See *Muscles, Table of.*

Longitude (*lon'-jit-ūd*) [*longitudo*, length]. Angular distance from any standard meridian perpendicular to the plane of the axis.

Longitudinal (*lon-jit-u'-din-al*) [*longitudinalis*, pertaining to length]. In anatomy, lengthwise, or in a direction the opposite of transverse. **L. Fissure,** of the *cerebrum*. See *Fissures, Table of.* **L. Sinus,** the triangular subcranial venous channel extending from the crista galli to the tentorium.

Longus (*lawng'-gus*) [L., long]. Long. **L. colli.** See *Muscles, Table of.* **L. capitis,** the rectus capitis anticus major muscle. See *Muscles, Table of.* **L. dorsi.** The longissimus dorsi muscle. See *Muscles, Table of.* **L. lumborum,** an inconstant muscle attached to the bodies of the two upper lumbar vertebræ and the three lower dorsal vertebræ.

Lonsdale's Apparatus. An apparatus for treating fracture of the patella, consisting of movable arms suspended from two upright rods that are attached to a long posterior splint. To these arms are fastened padded plates that hold the fragments together.

Looch (*lo-ok'*) [Fr.]. Same as *Loch.*

Loodianah Disease. See *Anthrax.*

Loofah (*loo'-fah*). See *Luffa.*

Look-at-his-face Disease. Carate; a form of syphilitic skin-disease in Spain, characterized by blotches upon the face.

Loong. See *Lung.*

Loop [ME., *lope*, a loop]. A folding of a cord, fiber, tube, or cord-like structure, upon itself. **L. of Henle.** See *Tubuli uriniferi.* **L., Obstetric,** the fillet.

Looped (*loopt*) [ME., *lope*, loop]. Doubled upon itself; containing loops. **L. Tubes of Henle.** See *Tubuli uriniferi.*

Loose (*lūs*) [ME., *loos*, loose]. Lax; wanting power of restraint; as *loose* bowels. **L. Ligature.** See *Ligature.*

Looseness (*loos'-nes*) [ME., *loos*, loose]. Popular name for diarrhea. **L. of the Teeth,** *Odontoseisis; Odontosismus;* this results from disease of the gums and the gradual destruction of the alveolar processes.

Loosestrife (*loos'-strīf*). See *Lysimachia.*

Lophadia (*lo-fad'-e-ah*). See *Lophia.*

Lophanthus (*lo-fan'-thus*) [λόφος, crest; ἄνθος, flower]. A genus of labiate plants, popularly called hyssops, or hedge-hyssops. **L. anisatus, L. nepetoides,** and **L. urticæfolius** of North America have the general properties of the mint-family. Unof.

Lophia (*lo'-fe-ah*) [λόφος, the back of the neck]. The upper part of the back near the first dorsal vertebra.

Lophin (*lo'-fin*) [λόφος, a tuft], $C_{21}H_{18}N_2$. Triphenyl glyoxalin; a substance produced by distilling amarin. It is not readily soluble in alcohol, crystallizes in long needles, and melts at 275° C.

Lophiodontous (*lo-fe-o-don'-tus*) [λόφος, crest; ὀδούς, tooth]. Having crested molar teeth.

Lophodont (*lo'-fo-dont*) [λόφος, a crest; ὀδούς, tooth]. In biology, applied to that dentition in which the crowns of the molar teeth possess ridges or crests, as distinguished from *bunodont*. See *Lophiodontous.*

Lophophore (*lo'-fo-for*) [λόφος, a crest; φόρος, bearing]. In biology, the frame or stage surrounding the mouth of a polyzoan and giving support to the tentacles.

Lophosteon (*lo-fos'-te-on*) [λόφος, a crest; ὀστέον, bone: *pl.*, *Lophostea*]. In biology, the median one of the five bones that make up the sternum of a carinate bird.

Loquacity (*lo-kwas'-it-e*) [*loquacitas; loquax*, talkative]. Volubility of speech; talkativeness; a condition that is frequently excessive in various forms of mental disorder.

Lorate (*lo'-rāt*) [*lorum*, a thong, or lash]. In biology, shaped like a long strap.

Lordoma (*lor-do'-mah*) [λορδοῦν, to bend inward]. The anterior or forward incurvation of the spine.

Lordoscoliosis (*lor-do-sko-le-o'-sis*) [λόρδωσις, λορδόειν, to bend; σκωλίωσις, crookedness]. Lordosis with scoliosis.

Lordosis (*lor-do'-sis*) [λόρδωσις, λορδόειν, to bend]. A curvature of the spine with a forward convexity. **L., Paralytic,** lordosis due to paralysis of either the spinal or the abdominal muscles. **L. valgorum,** genu valgum, *q. v.*

Lordotic (*lor-dot'-ik*), **Lordosic** (*lor-dos'-ik*), **Lordous** (*lor'-dus*) [λόρδωσις, λορδόειν, to bend]. Bent with the convexity turned ventrad; applied to the spinal column.

Lore (*lōr*) [*lorum*, a thong, lash, strap]. In biology, the space between the eye and the bill or nostrils in birds and reptiles.

Loreta's Operation. 1. The forcible dilatation of the pylorus for the relief of stricture after celiogastrotomy. 2. The treatment of aneurysm by the introduction of metal wire into the sac, through which a current of electricity is then passed. See *Operations, Table of.*

Lorica (*lor-ri'-kah*) [L., a corselet, cuirass: *pl.*, *Loricæ*]. In biology, a protective sheath or carapace.

Loricate (*lor'-ik-āt*) [*lorica*, a coat of mail]. In biology, covered with a protective coat.

Lorication (*lor-ik-a'-shun*) [*lorica*, a leather cuirass]. The protection of a glass vessel against heat by a coating of sand and clay.

Loriculate (*lor-ik'-u-lāt*) [*loricula*, a small breastplate]. Consisting of long divisions.

Lorum (*lo'-rum*) [L., thong, whip, strap: *pl.*, *Lora*]. Same as *Lore.*

Lourd, Lourderie (*loord, loor'-der-e*). See *Gid.*

Losi-piercing (*lo'-se-pēr'-sing*). See *Thoka-losi.*

Losophan (*lo'-so-fan*). Tri-iodo-cresol, an agent said to be strongly parasiticidal, and useful in parasitic dermatoses, whether due to fungous or animal parasites.

Lostorfer's Corpuscles. The granular masses alleged by Lostorfer to have been found in the blood of syphilitic patients.

Lote (*lōt*). See *Celtis.*

Lotio (*lo'-she-o*) [L.]. See *Lotion.* **L. adstringens,** Warren's styptic, consisting of five parts of sulphuric acid, and four parts each of turpentine and alcohol. **L. nigra.** See *Hydrargyrum.*

Lotion (*lo'-shun*) [*lotio*, a wash]. Any medicinal solution intended for external use. **L., Black.** See *Hydrargyrum.* **L., Cold Evaporating,** plumbi acet. ʒj, pulv. opii ʒj, aquæ Oj. Or, liq. plumbi subacetat. fʒiv, tinct. opii fʒij, aquæ Oj; for external use. **L., Goulard's,** liquor plumbi subacetatis. See *Plumbum.* **L. for Mouth,** acid pyrolig. ʒj, aquæ. fʒviij; use externally. Or, tinct. myrrh ʒss, potass. chlor. ʒiij, aquæ fʒiv. **L., Red,** zinci sulph. gr. x, spts. rosmarin., tinct. lavand. comp., āā fʒjss, aq. fʒx; use locally.

Lotophagous (*lo-toff'-ag-us*) [λωτός, lotus; φαγεῖν, to devour]. Lotus-eating.

Lotura (*lo-tu'-rah*). [L.]. Lotion. **L. carnis, L. carnium,** a sanguinolent and serous liquid sometimes discharged in cases of dysentery or diarrhea.

Louis's Angina. See *Ludwig's Angina.* **L.'s Angle.** See *Angle.* **L.'s Law.** See *Law.*

Louping-ill (*loop'-ing-il*) [E. dial., *loup*, to spring]. Leaping-evil: a disease of sheep causing them to spring up in going forward (Scotch). It is due to the presence of a cystic parasite in the spinal canal. See *Cœnurus cerebrales*, under *Parasites* (*Animal*), *Table of.*

Louse (*lows*). See *Pediculosis.*

Lousiness (*low'-ze-nes*). See *Pediculosis.*

Lousy (*low'-ze*) [ME., *lous*, a louse]. Affected with pediculosis.

Louvred Panes. See *Ventilation.*

Lovage (*luv'-azh*) [ME., *loveache*]. The root of *Ligusticum levisticum* and *Levisticum officinale*, stimulant, aromatic, carminative, and emmenagogue drugs. Dose of a fld. ext. fʒj–ij. Unof.

Love (*luv*) [ME., *loven*, to love]. 1. To regard with strong affection. 2. Sexual passion. **L.-potion.** See *Philter.*

Low Crown. An artificial crown inserted into the natural root of a tooth; it consists of a gold-backed porcelain facing, to which is attached a combined post and cap. which, from its peculiar form, is called a "step-plug," and which fits into an enlarged root-canal of a similar form.

Lower, Tubercle of. See *Tubercle.*

Loxa Bark (*loks'-ah bark*). Pale cinchona; the bark of *Cinchona officinalis.*

Loxarthron (*loks-ar'-thron*) [λοξός, slanting; ἄρθρον, a joint]. Any oblique or abnormal direction of a joint, not caused by spasm or luxation.

Loxarthrosis (*loks-ar-thro'-sis*) [λοξός, awry; ἄρθρωσις, joint]. Distortion of a joint.

Loxauchenus (*loks aw-ken'-us*) [λοξός, oblique; αὐχήν, neck]. Lissauer's term for a skull in which the angle formed by the intersection of the radius fixus and a line drawn between the basion and the inion is from 14° to 20°.

Loxia (*loks'-e-ah*). See *Torticollis.*

Loxic (*loks'-ik*) [λοξός, oblique]. Distorted; awry; twisted.

Loxochordus (*loks-o-kor'-dus*) [λοξός, oblique; *chorda*, a cord]. Lissauer's term for a skull in which the angle formed between the intersection of the radius fixus and the line drawn from the bregma to the lambda is between 17° and 29°.

Loxocoryphus (*loks-o-kor'-if-us*) [λοξός, oblique; κορυφή, the head]. Lissauer's term for a skull in which the angle formed by the intersection of the radius fixus and a line connecting the bregma and the lambda is between 17° and 28.5°.

Loxocyesis (*loks-o-si-e'-sis*) [λοξός, awry; κύησις, pregnancy]. Oblique displacement of the gravid uterus.

Loxodont (*loks'-o-dont*), **Loxodontous** (*loks-o-don'-tus*) [λοξός, aslant; ὀδούς, tooth]. Having teeth placed at abnormal angles with the jaw.

Loxolophodont (*loks-o-lof'-o-dont*) [λοξός, slanting; λόφος, a crest; ὀδούς, tooth]. In biology, a form of dentition in which oblique crests connect the anterior internal tubercle of the upper molars with two external tubercles; this is characteristic of a gigantic Ungulate.

Loxometopus (*loks-o-met-o'-pus*) [λοξός, oblique; μέτωπον, the space between the eyes]. Lissauer's term for a skull in which the angle formed by the intersection of the radius fixus and a line drawn from the bregma to the nasal point is between 43° and 47°

Loxophthalmos (*loks-off-thal'-mos*). Synonym of *Strabismus, q. v.*

Loxopisthius (*loks-o-pis'-the-us*) [λόξος, oblique; ὀπισθιος, hinder]. Lissauer's term for a skull in which the angle formed by the intersection of the radius fixus and a line drawn through the lambda and the inion is between 95° and 104°.

Loxopisthocranius (*loks-o-pis-tho-kra'-ne-us*) [λοξός, oblique; ὀπισθεν, behind; κρανίον, skull]. Lissauer's term for a skull in which the angle formed between the radius fixus and a line drawn through the lambda and the opisthion is between 119° and 130°.

Loxoprosopus (*loks-o-pros'-o-pus*) [λοξός, oblique; πρόσωπον, face]. Lissauer's term for a skull in which the angle formed by the intersection of the radius fixus and a line drawn from the nasion to the alveolar point is between 78.5° and 89.5°.

Loxopterygin (*loks-o-ter'-ij-in*) [λοξός, oblique; πτέρυξ, a wing], $C_{26}H_{34}N_2O_2$. A white amorphous alkaloid obtained from the bark of *Loxopterygium lorentzii.*

Loxopterygium (*loks-o-ter-ij'-e-um*) [λοξός, oblique; πτέρυξ, wing]. A genus of anacardiaceous trees. **L. lorentzii, L. sagotii,** red quebracho, the bark of which is used as a substitute for cinchona. Unof.

Loxorrhinus (*loks-or-i'-nus*) [λοξός, oblique; ῥίς, nose]. Lissauer's term for a skull in which the angle formed between the radius fixus and a line drawn from the nasion to the subnasal point is between 77.5° and 87.5°.

Loxotic (*loks-ot'-ik*). See *Loxic.*

Loxotmesis (*loks-ot-me'-sis*). See *Loxotomy.*

Loxotomy (*loks-ot'-o-me*) [λοξός, oblique; τομή, a cutting]. That form of amputation commonly known as the "oblique section."

Loy's Disease. Horse-pox. See *Diseases, Table of.*

Lozenge (*loz'-enj*) [ME., *losange*, lozenge]. A medicated tablet with sugar as a basis. See *Trochiscus.*

Lubido (*lu-bid'-o*). See *Libido.*

Lubricant (*lu'-brik-ant*) [*lubricare*, to make smooth]. Making smooth, oily, or slippery.

Lubricating (*lu'-brik-a-ting*) [*lubricare*, to make smooth]. Making smooth or slippery. **L. Oils,** oil products obtained chiefly from petroleum and used for lubricating purposes. Some crude petroleums are natural lubricating oils, requiring little or no treatment to fit them for use. The other petroleum lubricating oils are obtained in one of two ways—either by driving off the light hydrocarbons from the crude oil, yielding what is called a "reduced oil," or they are the oil obtained by distilling the petroleum residuum in the stills. The lightest of the lubricating oils, varying in gravity from 32° B. to 38° B., are frequently called "neutral oils." They are largely used for the purpose of

mixing with animal or vegetable oils, and it is therefore necessary that they should be thoroughly deodorized, decolorized, and deprived of the blue fluorescence, or "bloom," characteristic of petroleum distillates that contain paraffin. Heavier lubricating oils are called "spindle" oils and "cylinder" oils. The most important characters to be possessed by these oils are high fire-test, low cold-test, and a high degree of viscosity.

ubrication (*lu-brik-a'-shun*) [*lubricare*, to make smooth]. The process of making smooth or slippery by the application of a lubricant.

ubricity (*lu-bris'-it-e*) [*lubricare*, to make slippery]. A synonym of lasciviousness; slipperiness.

ubricous (*lu'-brik-us*) [*lubricus*, *lubricare*, to make smooth]. Smooth, slippery.

uca, Horizontal Plane of. See *Plane*.

ucent (*lu'-sent*) [*lucere*, to shine]. Bright, shining.

ucernal (*lu-ser'-nal*) [*lucerna*, a lamp]. Pertaining to lamp-light.

ucet, Bacillus of. See *Bacteria*, *Synonymatic Table of*.

ucid (*lu'-sid*) [*lucidus*, clear]. Clear, shining, unobscured. In biology, having a smooth, shining surface. **L. Interval**, the transitory return of normal mental action and sanity in certain forms and cases of insanity.

ucidity (*lu-sid'-it-e*) [*lucidus*, clear]. Clearness; lucid interval.

ucidum (*lu'-sid-um*) [*lucidus*, clear]. Clear. **L., Septum.** See *Septum*.

uciferase (*lu-sif'-er-āz*) [*lucifer*, light-bringing]. The name applied by Dubois to one of the two diastatic substances which become phosphorescent when mixed in the presence of water, and which are found in the mollusc, *Pholas dactylifera*, the mouth of which is luminous.

uciferin (*lu-sif'-er-in*) [*lux*, *lucis*, light; *ferre*, to bear]. A crystalline body obtained from the light-producing organs of certain animals.

ucifer-match Disease or **L.-match Maker's Disease.** Necrosis of the jaw due to phosphorus-poisoning.

uciform (*lu'-sif-orm*) [*lux*, light; *forma*, form]. Resembling light.

ucifugal (*lu-sif'-u-gal*) [*lux*, light; *fugere*, to flee]. Fleeing from or avoiding light.

ucifugous (*lu-sif'-u-gus*) [*lux*, light; *fugere*, to flee]. In biology, applied to organisms that avoid light.

ucilia (*lu-sil'-e-ah*) [L.]. A genus of dipterous insects, the larvæ of which act as facultative parasites, producing various forms of myiasis, *q. v.* See *Parasites* (*Animal*), *Table of*.

ucilin (*lu'-sil-in*) [*lux*, *lucis*, light]. A commercial mixture of lamp-petroleum and brown coal-oil.

ucina (*lu-si'-nah*) [*lux*, light]. The goddess of childbirth. **L. sine coitu.** Parthenogenesis, *q. v.*

ucomania (*lu-ko-ma'-ne-ah*) [λύκος, wolf; μανία, mania]. Same as *Lycanthropy*, *q.v.*

ucuma (*lu-ku'-mah*) [nat. Peruvian]. A genus of tropical American sapotaceous trees. **L. caimito**, of S. America (called *abi* and *abiaba*) is strongly tonic and antiperiodic, and is useful in diarrhea; other species have similar qualities. Unof.

ucumin (*lu-ku'-min*) [*lucuma*]. A bitter principle obtained from *Lucuma caimito*. It is recommended for use in diarrheas and in intermittent fevers. Dose gr. j–viij. Unof.

dwig's Angina. A cellulitis of the neck, usually a secondary inflammation in the specific fevers, particularly diphtheria and scarlet fever. It may, however, occur idiopathically or result from trauma. The swelling is marked in the submaxillary region. It is also called *Louis's Angina*. See *Angina*, and *Diseases*, *Table of*. **L.'s Angle** (*Angulus ludovici*), the angle that exists in some cases of emphysema between the manubrium and the body of the sternum. See *Angle*. **L.'s Ganglion.** See *Ganglia*, *Table of*.

Lücke's Test. See *Tests*, *Table of*.

Lues (*lu'-es*) [L.]. Formerly a pestilential disease; at present used as an euphemism for syphilis. **L. deifica, L. divina,** epilepsy.

Luetic (*lu-et'-ik*) [*lues*, a plague]. Affected with or relating to lues; syphilitic.

Luffa (*luf'-ah*) [Arab.]. A genus of cucurbitaceous plants. **L. acutangula,** the strainer vine, of India, having an edible fruit, a purgative and emetic root, and oil-bearing seeds. **L. amara** has similar uses. **L. cylindrica,** the "wash-rag," "towel gourd," or "vegetable sponge," bears a fruit which when dry contains a sponge-like network of fibers. This is sometimes used as a substitute for a sponge or towel. **L. purgans,** of S. America, affords a strongly purgative resin. Unof.

Lugol's Caustic. A solution of iodin and potassium iodid, of each one part, in water two parts. **L.'s Solution.** See *Iodin*.

Lumbaginous (*lum-baj'-in-us*) [*lumbus*, loin]. Affected with, or pertaining to, lumbago.

Lumbago (*lum-ba'-go*) [*lumbus*, the loin]. Pain in the structures about the loins, whether neuralgic or rheumatic.

Lumbar (*lum'-bar*) [*lumbus*, the loin]. Pertaining to the loins, especially to the region about the loins. **L. Abscess,** an abscess in the lumbar region. **L. Arteries.** See *Arteries*, *Table of*. **L. Colotomy.** See *Lumbo-colotomy*. **L. Myalgia,** lumbago. **L. Nephrectomy,** nephrectomy through an incision in the lumbar region. **L. Nephrotomy,** nephrotomy through an incision in the lumbar region. **L. Nerves.** See *Nerves*, *Table of*. **L. Reflex.** See *Reflexes*, *Table of*. **L. Region.** See *Abdomen*.

Lumben (*lum'-ben*) [*lumbus*, loins]. Belonging to the loin in itself.

Lumberman's Itch. Same as *Army Itch*.

Lumbifragium (*lum-bif-ra'-je-um*) [*lumbus*, loin; *frangere*, to break]. Lumbar hernia.

Lumbiplex (*lum'-be-pleks*). The lumbar plexus.

Lumbiplexal (*lum-be-pleks'-al*) [*lumbus*, loin; *plexus*, net]. Pertaining to the lumbiplex.

Lumbo-abdominal (*lum'-bo-ab-dom'-in-al*) [*lumbus*, loin; *abdomen*, abdomen]. Pertaining to the loin and the abdomen.

Lumbocolotomy (*lum'-bo-ko-lot'-o-me*) [*lumbus*, loin; κόλον, colon; τομή, a cutting]. Colotomy performed in the lumbar region.

Lumbo-costal (*lum-bo-kos'-tal*) [*lumbus*, loin; *costa*, rib]. Pertaining to the loins and the ribs.

Lumbodorsal (*lum-bo-dor'-sal*) [*lumbus*, loin; *dorsum*, back]. Pertaining to the lumbar and dorsal regions.

Lumbodynia (*lum-bo-din'-e ah*) [*lumbus*, loin; ὀδύνη, pain]. Same as Lumbago.

Lumbo-inguinal (*lum-bo-in'-gwin-al*) [*lumbus*, loin; *inguen*, groin]. Pertaining to the lumbar and inguinal regions.

Lumbosacral (*lum-bo-sa'-kral*) [*lumbus*, loin; *sacrum*, sacrum]. Pertaining to the lumbar and sacral regions.

Lumbricales (*lum-brik-a'-lēz*). See *Muscles*, *Table of*.

Lumbricide (*lum'-bris-id*) [*lumbricus*, earth-worm; *cædere*, to kill]. A drug fatal to lumbricoid worms.

Lumbriciform (*lum-bris'-if-orm*). See *Lumbricoid*.

Lumbricoid (*lum'-brik-oid*) [*lumbricus*, earth-worm; εἶδος, likeness]. Pertaining to, or resembling, a lumbricus.

Lumbricus (*lum'-brik-us*) [L.: *pl.*, *Lumbrici*]. A genus of worms, including the common earth-worm and certain intestinal worms. See *Parasites* (*Animal*), *Table of.*

Lumen (*lu'-men*) [*lumen*, light]. The caliber or canal of any tubular vessel; the cavity of a vessel when examined in transverse section.

Luminiferous (*lu-min-if'-er-us*) [*lumen*, light; *ferre*, to bear]. Emitting light.

Luminosity (*lu-min-os'-it-e*) [*luminosus*, full of light]. The property of emitting light.

Lumnitzer, Bacillus of. See *Bacteria, Synonymatic Table of.*

Lump [ME., *lompe*, a stump]. 1. A small mass; a protuberant part. 2. A dull person. 3. In the plural, a popular term for strumous enlargement of the cervical glands.

Lumpy (*lum'-pe*) [ME., *lompe*, a stump]. Abounding in, or consisting of, lumps. **L. Jaw.** See *Actinomycosis.*

Lunacy (*lu'-nas-e*) [*luna*, the moon]. A popular name for insanity, so called from the traditional belief that it was influenced by the moon.

Lunar (*lu'-nar*) [*luna*, moon]. Pertaining to the moon or to silver (*luna* of the alchemists). **L. Caustic.** See *Argentum* and *Caustic.*

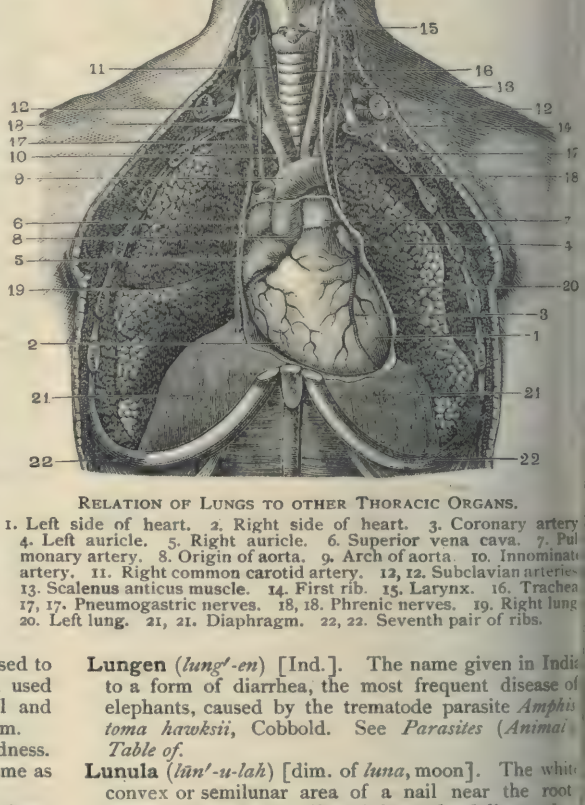
Lunare, or Os lunare (*lu-na'-re*) [*luna*, moon]. The semilunar bone of the carpus.

Lunaria (*lu-na'-re-ah*) [*lunaris*, pertaining to the moon]. Menstruation.

Lunate (*lu'-nāt*) [*lunare*, bent like a crescent]. In biology, crescent-shaped, or having crescentiform markings.

Lunatic (*lu'-nat-ik*) [*lunaticus; luna*, moon]. Affected with lunacy or insanity.

Lunatism (*lu'-nat-izm*) [*lunatismus; luna*, moon]. An old name for various diseases supposed to be under the controlling influence of the moon.



Lund's Apparatus. A triangular frame of iron used to correct prolapse of the uterus. **L.'s Oil**, an oil used for anointing catheters. It consists of olive oil and castor oil each one ounce, carbolic acid one dram.

Lune (*lūn*) [*luna*, moon]. A fit of lunacy or madness.

Lunella (*lu-nel'-ah*) [dim. of *luna*, moon]. Same as *Hypopyon.*

Lunet or **Lunette** (*lu-net'*) [Fr.]. A spectacle-lens. Also, a general term including telescopes, marine-glasses, spectacles, and all similar devices to aid vision.

Lung [ME., *lunge*, lung]. The organ of respiration, in which the impure venous blood is oxidized by the air drawn through the trachea, bronchi, and air-vesicles. There are two lungs, a right and a left, the former usually consisting of three, the latter of two lobes. The lungs are situated in the thoracic cavity, and are enveloped by the pleuræ. At the root or hilum the bronchus and its arteries, and the pulmonary artery and nerves enter, and the pulmonary and bronchial veins and lymphatics leave. The lung proper consists of minute air-vesicles held in place by connective-tissue trabeculæ. Capillaries traverse the walls of the air-vesicles and bring the circulating blood in close proximity to the air. The average weight of the adult right lung is 22 ounces; that of the left 20 ounces. **L., Black**, anthracosis of the lung. **L., Coal-miner's, L., Collier's**, anthracosis of the lung. **L.-fever**, croupous pneumonia. **L.-grown**, having the pleura adherent to the lungs. **L., Miner's**, anthracosis of the lung. **L.-sick**, a form of pneumonia prevalent among the oxen of South Africa. **L.-struck**, suffering from disease of the lungs. **L.-tester**, a spirometer. **L.-worm**, a parasitic worm in the lung. **L.-wort**, the leaves of *Pulmonaria officinalis*, a demulcent and mucilaginous drug. It is a favorite medicine in lung-complaints. Dose of the fld. ext. ʒ ss–j. Unof.

Relation of Lungs to other Thoracic Organs.

1. Left side of heart. 2. Right side of heart. 3. Coronary artery 4. Left auricle. 5. Right auricle. 6. Superior vena cava. 7. Pulmonary artery. 8. Origin of aorta. 9. Arch of aorta. 10. Innominate artery. 11. Right common carotid artery. 12, 12. Subclavian arteries. 13. Scalenus anticus muscle. 14. First rib. 15. Larynx. 16. Trachea. 17, 17. Pneumogastric nerves. 18, 18. Phrenic nerves. 19. Right lung. 20. Left lung. 21, 21. Diaphragm. 22, 22. Seventh pair of ribs.

Lungen (*lung'-en*) [Ind.]. The name given in India to a form of diarrhea, the most frequent disease of elephants, caused by the trematode parasite *Amphistoma hawksii*, Cobbold. See *Parasites* (*Animal*), *Table of.*

Lunula (*lūn'-u-lah*) [dim. of *luna*, moon]. The white convex or semilunar area of a nail near the root; onyx. **L. of the Cardiac Valves**, the delicate edge of the leaflets of the semilunar valves. **L. of Gianuzzi.** See *Crescents of Gianuzzi.* **L. lacrymalis** a small crest of bone separating the antrum of Highmore from the lacrymal groove.

Lunular (*lūn'-u-lar*), **Lunulate** (*lūn'-u-lāt*). See *Lunate.*

Lunule (*lu'-nūl*) [dim. of *luna*, the moon]. In biology, applied to crescentiform impressions or marks upon various animals.

Luny (*lu'-ne*) [*luna*, moon]. A popular term for crazy.

Lupia (*lu'-pe-ah*) [*lupus*, wolf]. A name given to several kinds of malignant tumor, phagedenic ulcer and fungoid growth, and also to a wen. See also *Molluscum.* **L. cancrosa**, carcinoma developing in atheroma of the skin. **L. scrofulosa**, scrofuloderma tuberculosum.

Lupiform (*lu'-pif-orm*) [*lupus*, a wolf; *forma*, form]. Same as *Lupoid.*

Lupigenin (*lu-pij'-en-in*) [*lupus*, a wolf], $C_{17}H_{12}O_6$. A substance resulting from the decomposition of lupiin by acids.

Lupiin (*lu'-pe-in*) [*lupus*, a wolf], $C_{29}H_{32}O_{16} + 7H_2O$. A bitter principle found in germinating lupine seeds.

Lupine (*lu'-pin*) [*lupus*, a wolf]. A popular name for various leguminous plants of the genus *Lupinus*,

many of which are poisonous. A large number of the species are American.

lupinidin (*lu-pin'-id-in*) [*lupus*, a wolf], $C_8H_{15}N$. A liquid alkaloid obtained from *Lupinus luteus*.

lupinin (*lu'-pin-in*) [*lupus*, a wolf], $C_{21}H_{40}N_2O_2$. An alkaloid, or tertiary amin, from the seeds of *Lupinus luteus;* also, an alkaloid from the seeds of *Lupinus albus;* also, a glucosid from the leaves of both species. All three are paralyzants, depressing the motor and sensory centers. The one first named has been proposed as a substitute for quinin.

lupinosis (*lu-pin-o'-sis*) [*lupus*, a wolf]. A disease of cattle said by some to be produced by eating the herbage of certain poisonous species of lupine. See *Lathyrism*.

lupinotoxin (*lu-pin-o-toks'-in*) [*lupinus*, lupine; τοξικόν, poison]. A resinoid derived from certain poisonous species of lupine, and said to be capable of producing the symptoms of lupinosis.

lupiology (*lu-pe-ol'-o-je*) [*lupia*, wen; λόγος, science]. The science of malignant tumors.

lupoid (*lu'-poid*) [*lupus*, wolf; εἶδος, like]. Having the nature of lupus.

lupomania (*lu-po-ma'-ne-ah*) [*lupus*, wolf; μανία, madness]. Rabies.

lupotome (*lu'-po-tōm*) [*lupus*, wolf; τομή, a cutting]. A cutting or scarifying instrument sometimes used in the treatment of lupus.

lupous (*lu'-pus*) [*lupus*, wolf]. Affected with or pertaining to lupus.

lupulin (*lu'-pū-lin*) [*lupus*, *lupulus*, hop]. 1. $C_{32}H_{50}O_7$. A crystalline principle obtainable from powdery glands of the hop-plant. See *Humulus*. It is said to be strongly narcotic. 2. The yellow, resinous powder of hops, composed mainly of dried glands from the strobiles of the plant; it is the *lupulinum* of the U. S. P. Its fluid extract and oleoresin are official. Dose of the fld. ext., gtt. 10–15; of the oleoresin, gr. ij–v. 3. The precipitate from a tincture of the cones of hops, *Humulus lupulus*, a nervine, hypnotic, febrifuge, antiperiodic, and tonic. Dose from 1 to 2 grains. Unof.

lupulina (*lu-pu-li'-nah*) [L.: *gen.*, *Lupulinæ*]. Same as *Lupulin*.

lupulinum (*lu-pu-li'-num*) [L.: *gen.*, *Lupulini*]. Same as *Lupulin*.

lupulus (*lu'-pu-lus*). See *Humulus*.

lupus (*lu'-pus*) [L., a wolf]. *Lupus vulgaris;* a chronic disease of the skin and some mucous membranes, characterized by the formation in the connective tissue of nodules of granulation-tissue. It passes through a number of clinical phases, and terminates by ulceration or atrophy, with scar-formation. The cause of the disease is the tubercle-bacillus. **L., Acne,** an obstinate papular eruption of doubtful character occurring in the localities usually selected by *Acne vulgaris* and sometimes associated with it. **L., Acneiform.** See *L. erythematosus sebaceus.* **L. anatomicus,** the anatomic tubercle. **L., Cazenave's,** lupus erythematosus, *q. v.* See also *Diseases, Table of.* **L., Common,** lupus vulgaris. **L., Disseminated Follicular,** *adenoid acne;* a variety of acne confined to the face, especially in the situations usually occupied by acne. The papules are from a large pin's head to a pea in size, conic and deep-red. They may coalesce to form a lupus-like tissue. **L. disseminatus,** a term applied to any case of lupus with multiple patches. **L. eczema,** a form of *L. erythematosus* resembling eczema. **L. endemicus.** See *Aleppo Boil.* **L. erythematodes.** Synonym of *L. erythematosus.* **L. erythematosus,** *L. erythematodes;* Cazenave's lupus; a form not due to the tubercle-bacillus. It occurs, as a rule, in multiple patches, with a tendency to symmetric arrangement, chiefly about the face and head, occasionally on the extremities, and rarely on the trunk. The patches are sharply defined at the border, flat, very slightly raised, and with a tendency to the formation of crusts. The color is bright-red, and there are no nodules. The disease tends to spread slowly at the periphery, and new patches may form in the neighborhood of the old. Feeble circulation favors the development of the disease. It is most common in females of adult or middle age. **L. erythematosus aggregatus.** See *L. erythematosus disseminatus.* **L. erythematosus circumscriptus,** the most common form, attacking chiefly the head and face, especially the nose, cheeks, and ears, often symmetrically. It appears in the early stage as isolated or grouped, small, red spots, about an eighth of an inch in diameter, with a yellowish spot at the center, and a small, closely adherent scale. These slowly extend peripherally and ultimately coalesce into patches of a dirty yellowish-white appearance. Cicatrization occurs in the center. The disease is one of long duration. **L. erythematosus corneus,** *L. erythematosus* in which the scales are not greasy. **L. erythematosus discoides,** the asymmetric form of *L. erythematosus.* **L. erythematosus discretus,** a form of *L. erythematosus* in which irregular patches are scattered over various parts of the body. It is associated with constitutional symptoms—fever and pains in the head, bones, joints, etc. **L. erythematosus disseminatus,** *L. erythematosus aggregatus; Lupus-psoriasis;* a rare form of *Lupus erythematosus,* characterized by a wider diffusion of the eruption, an extension by repeated outbreaks, and by the fact that the patches never coalesce. It is a chronic disease usually, but may be acute. **L. erythematosus sebaceus,** a form with special involvement of the sebaceous glands. **L. erythematosus telangiectodes,** a variety characterized by marked dilatation of the cutaneous blood-vessels. **L., Erythematous,** lupus erythematosus. **L. exedens.** Synonym of *L. vulgaris.* **L. exfoliativus.** See *Lupus maculosus.* **L. exuberans,** a form of lupus, usually *L. exulcerans,* associated with papillary excrescences. **L. exulcerans,** a term used to distinguish that form in which the destruction of tissue is rapid or intense, or in which the epidermis is lost and a secreting ulcerating surface is disclosed. **L. framboesiformis, L. framboesioides.** See *L. exuberans.* **L., Fungous.** Synonym of *Lupus exuberans.* **L. hæmorrhagicus,** *L. erythematosus disseminatus* associated with hemorrhagic vesicles and blebs that dry and form crusts. **L. hypertrophicus,** that variety in which new connective-tissue formation predominates over the destructive process, and markedly raised, thick patches result. **L. idiopathicus.** Synonym of *L. vulgaris.* **L. impetiginosus,** a form of *L. erythematosus* in its earlier stages resembling impetiginous eczema. **L. lymphaticus.** See *Lymphangioma circumscriptum.* **L. maculosus,** a variety characterized by the eruption of very soft, smooth, brownish-red, semi-translucent miliary nodules, which develop in the connective tissue of otherwise healthy skin without subjective sensations. This eruption constitutes the earliest sign of lupus. When the surface desquamates, the name *Lupus exfoliativus* is given to it. **L. miliaris.** See *L., Acne.* **L. mutilans,** lupus exedens, causing destruction of tissue and disfigurement. **L., Necrogenic,** the anatomic tubercle. **L. non-exedens,** lupus without ulceration. **L. papillaris, L. papillomatosus,** a form characterized by papillary growths that may reach the size of the palm. These are most frequently seen on the extremities and buttocks, and occur only on ulcerated surfaces. **L. per-**

forans, lupus ulcerating through the skin into a mucous cavity, or through the septum between two mucous cavities. **L. phagedænicus,** ulcerating lupus associated with phagedena. **L. prominens.** See *Lupus tuberosus.* **L.-psoriasis.** See *L. erythematosus disseminatus.* **L. rodens.** See *L. exulcerans.* **L. scrofulosus.** See *Scrofuloderma tuberculosum.* **L. sebaceus.** Synonym of *L. erythematosus.* **L. seborrhagicus.** Synonym of *L. erythematosus.* **L. serpiginosus,** a term applied to lupus that spreads or creeps on peripherally while cicatrizing centrally. **L. solitarius,** lupus vulgaris confined to a single patch. **L. superficialis.** Synonym of *L. erythematosus.* **L., Syphilitic,** a form of tubercular syphilid which is likely to ulcerate serpiginously, and closely simulates lupus vulgaris. It is due to the breaking down of superficial gummata. The ulcer is covered with a thick, greenish-brown crust, has a sharply punched-out margin and a circinate or reniform outline. The scar is usually flexible, white, and shining. **L. terebrans.** Synonym of *Lupus perforans.* **L. tuberculosus.** Synonym of *L. vulgaris.* **L. tuberosus,** a form of lupus with small nodular prominences. **L. tumidus,** a variety in which edematous infiltration and connective-tissue overgrowth are present, leading to the formation of nodular masses. **L. ulcerosus.** Synonym of *L. exulcerans.* **L. vegetans, L. verrucosus,** the formation in the lupus process of a warty-looking patch which is liable to become inflamed from time to time. This form occurs chiefly on the hands and feet, and usually in early life. **L. vorax.** See *L. exulcerans.* **L. vulgaris.** See *Lupus.* **L. vulgaris erythematodes,** a variety with lesions resembling those of *L. vulgaris* and *L. erythematosus.* It may invade the scalp and the mucous membrane of the mouth, spreading from the face. **L. of the Vulva.** See *Esthiomène.*

Luridity (*lu-rid'-it-e*) [*luridus; luror,* yellow color]. A pale-yellow color met with in certain cachectic conditions; also in atrophied paralyzed limbs.

Luschka's Bursa. See *L.'s Tonsil.* **L.'s Cartilage,** a nodule of elastic cartilage in the anterior part of the vocal band. **L.'s Gland,** the coccygeal gland, *q. v.* A small conglobate body lying near the tip of the coccyx just above the coccygeal attachment of the sphincter ani. Its function is not known. See *Gland.* **L.'s Tonsil,** the adenoid tissue that normally exists between the orifices of the Eustachian tubes, analogous in structure to the lymphoid constituents of the tonsil. It is also called "*Third tonsil*" and "*Pharyngeal tonsil.*" **L.'s Villi,** minute spheroid, partially vesicular outgrowths from the upper layer of the pia, which eventually become the Pacchionian bodies.

Luscitas (*lus'-it-as*) [*luscus,* one-eyed]. 1. The state of being blind in one eye. 2. Strabismus, especially when caused by paralysis or rheumatism.

Lusis (*lu'-sis*) [λοῦσις, a washing]. A washing.

Lussac, Gay, Law of. See *Law.*

Lust [ME., *lust,* lust]. Carnal desire; sexual appetite; concupiscence.

Lustful (*lust'-ful*) [ME., *lust,* lust]. Libidinous; having prurient lust.

Lustgarten, Bacillus of. See *Bacteria, Synonymatic Table of.* **L.'s Method,** a method of staining the bacillus of syphilis. See *Stains, Table of.*

Lustramentum (*lus-tram-en'-tum*) [*lustrare,* to purify]. A purge.

Lusus (*lu'-sus*) [*ludere,* to play]. A play; a game. **L. naturæ,** a freak of nature; any abnormal departure from that which is natural.

Lutation (*lu-ta'-shun*) [*lutum,* mud]. The hermetic sealing of a vessel.

Lutein (*lu'-te-in*) [*luteus,* yellow]. 1. A pigment obtained from corpora lutea by extraction with chloroform. It occurs in minute rhombic prisms or plates that are pleochromatic and insoluble in water, but readily soluble in alcohol, ether, and chloroform. Lutein is more or less rapidly bleached by the action of light. 2. A red lipochrome pigment found by MacMunn in the blood of *Holothusia nigra.* **L.-cells,** large cells, containing granules of lutein, characteristic of the metamorphosed clot of ruptured Graafian follicles, to the margins of which they impart a bright yellow color, whence the name *corpora lutea.* These cells appear to arise from the *theca interna.* See illustration.

LUTEIN-CELLS.

Luteolin (*lu'-te-o-lin*) [*luteus,* yellow]. A yellow coloring-substance obtained from diphenylamin and diazoxylenesulphonic acid; also, a crystalline body, $C_{20}H_{14}O_6$, found in *Reseda lutea.* See *Pigments, Conspectus of.*

Luteolous (*lu-te'-o-lus*) [*luteolus,* dim. of *luteus* golden-yellow]. In biology, buff, or yellowish.

Luteous (*lu'-te-us*) [*lutum,* mud]. Clay-colored, mud colored; saffron, or reddish-yellow.

Lutescent (*lu-tes'-ent*) [*lutum,* mud]. In biology yellowish, or becoming yellow.

Luton's Sugar-test. See *Tests, Table of.*

Lutose (*lu'-tōs*) [*lutum,* mud]. In biology, applied to such organisms as are covered with a substance like mud.

Luxation (*luks-a'-shun*). See *Dislocation.*

Luxatura (*luks-at-u'-rah*). See *Dislocation.*

Luxus (*luks'-us*) [L., "excess,"]. Excess. **L.-breathing,** the breathing of more air than is actually called for by the needs of the organism. **L.-consumption,** a term applied by Bidder and Schmidt to the metabolism of certain surplus proteid material, which though inside the body, does not form a component part of any of its tissues, but constitutes a kind of reservoir of force upon which the organism can draw.

Luys' Body. A lentiform ganglion of a milk-and-coffee color, which lies in the ideal continuation of the lateral part of the ganglion of Sœmmering. It represents the boundary between the crusta and the tegmentum. **L.'s Transference Method.** See *Hypnotism.*

Lycaconitin (*lik-ak-on'-it-in*) [*λύκος,* a wolf; *aconitum* aconite], $C_{27}H_{34}N_2O_6 + H_2O$. An amorphous alkaloid, soluble in water, alcohol, and chloroform, obtained from *Aconitum lycoctonum.* In its toxicologic action it resembles curare.

Lycanthrope (*li'-kan-thrōp*) [*λύκος,* wolf; *ἄνθρωπος* man]. A person affected with lycanthropy.

Lycanthropic (*li-kan-throp'-ik*) [*λύκος,* wolf; *ἄνθρωπος* man]. Pertaining to or affected with lycanthropy.

Lycanthropy (*li-kan'-thro-pe*) [*λύκος,* a wolf; *ἄνθρωπος* man]. A form of mania in which a person imagines himself a wild beast. Cf. *Zoanthropy.*

Lychnidiate (*lik-nid'-e-āt*) [*λύχνος,* a lamp]. In biology, luminous, phosphorescent.

Lycin (*li'-sin*). See *Betaïn.*

Lycodes (*li-ko'-dēz*) [*λύκος,* wolf]. A chronic form of tonsillitis. See *Lycoides.*

Lycoid (*li'-koid*) [*λύκος,* wolf; *εἶδος,* like]. Resembling a wolf.

Lycoides (*li-koid'-ēz*) [*λύκος,* wolf; *εἶδος,* like]. A term applied to a form of quinsy popularly attributed to excess of spermatic fluid in the seminal reservoir and its entrance into the blood.

Lycomania (*li-ko-ma'-ne-ah*) [*λύκος*, wolf; *μανία*, madness]. Synonym of *Lycanthropy*, *q. v.*

Lycoperdon (*li-ko-per'-don*) [*λύκος*, wolf; *πέρδεσθαι*, to break wind]. A genus of gasteromycetous fungi. **L. bovista**, fist-ball, puff-ball, devil's snuff-box. This has been used as a styptic, and is now to some extent employed in nervous diseases. The fumes have been used as an anesthetic. **L. giganteum**, the giant puff-ball; similar to *L. bovista*. **L. proteus.** See *L. giganteum*.

Lycopersicon, Lycopersicum (*li-ko-per'-sik-on*, *li-ko-per'-sik-um*) [*λύκος*, wolf; *περσικός*, peach]. A section of the *Solanaceæ*, of which several species are well known. See *Solanum*.

Lycopin (*li'-ko-pin*) [*λύκος*, wolf; *πούς*, foot]. A precipitate from a tincture of *Lycopus virginicus*, an astringent, styptic, sedative, and tonic. Dose from 1 to 4 grains. Unof.

Lycopodin (*li-ko-po'-din*) [*λύκος*, wolf; *πούς*, foot], $C_{32}H_{52}N_2O_3$. A bitter alkaloid found in *Lycopodium clavatum* and *L. complanatum*. It is readily soluble in water, ether, and in alcohol. Unof.

Lycopodium (*li-ko-po'-de-um*) [*λύκος*, wolf; *πούς*, foot]. Club-moss, witch-meal, wolf's-claw. In medicine, the sporules of *L. clavatum* and other varieties, in the form of a light, fine, yellowish powder, are used as a desiccant and absorbent on moist and excoriated surfaces; in pharmacy, as an inert powder in which to imbed pills to prevent their adhering to each other. Lycopodium is inflammable and slightly explosive, whence the name "vegetable sulphur." A large number of species are known. **L. clavatum**, lycopodium. **L. complanatum**, common club-moss, ground-pine, found in Europe and North America. **L. inundatum**, marsh club-moss. **L. officinale.** See *L. clavatum*. **L. phlegmasia**, an Asiatic species said to possess aphrodisiac properties. **L. recurvum.** See *L. selago*. **L. rubrum**, a species which is actively purgative. It has been employed in South America in elephantiasis. **L. saussurus**, Brazilian piligon. Its alkaloid, *piligonin*, is a powerful emetic, purgative, and convulsant. **L. selago**, fir-moss, fir-club-moss, tree-moss; a species found in Europe and North America. It is cathartic and emetic in its action. Unof.

Lycopus (*li'-ko-pus*). See *Bugleweed*.

Lycorexia, Lycorrhexy (*li-kor-eks'-e-ah*, *li'-kor-eks-e*) [*λύκος*, wolf; *ὄρεξις*, appetite]. A wolfish or canine appetite; bulimia.

Lycostoma (*li-kos'-to-mah*) [*λύκος*, wolf; *στόμα*, mouth]. Cleft palate.

Lye (*li*) [ME., *ley*, lye]. The solution of alkaline hydrates obtained by leaching ashes; any alkaline solution.

Lyencephalous (*li-en-sef'-al-us*) [*λύειν*, to loosen; *ἐγκέφαλος*, brain]. Having cerebral hemispheres that are loosely united.

Lygismus (*li-jis'-mus*) [*λυγισμός*, from *λυγίζειν*, to bend]. A melodious, flexible voice; also, dislocation.

Lygmus (*lig'-mus*) [*λυγμός*]. Synonym of *Hiccough*.

Lygodesmia (*li-go des'-me-ah*) [*λίγος*, twig; *δεσμός*, bond]. A genus of composite-flowered herbs. **L. spinosa**, of Nevada and California, has about its stem, at the ground, a tuft of woolly or silky fiber, useful as a hemostatic. Unof.

Lygophilous (*li-goff'-il-us*) [*λύγη*, twilight; *φιλεῖν*, to love]. Seeking dark places.

Lying-down, Lying-in. See *Puerperal State*.

Lyma (*li'-mah*) [*λῦμα*, washings: *pl.*, *Lymata*]. 1. Filth, or sordes. 2. Lochia.

Lymph (*limf*) [*lympha*, water]. The fluid in the lymphatic vessels, the product of the filtration of the liquid portion of the blood through the walls of the capillaries. Applied, also, to certain products of lymph-exudation in wounds, etc. **L., Animal**, vaccine-lymph obtained from an animal. **L., Aplastic**, a lymph-product of inflammation that will not form embryonic tissue. It is called, also, *Corpuscular* or *Croupous lymph*. **L., Bovine**, vaccine-material obtained from a cow or a calf. **L., Calf**, vaccine from the calf. **L.-cell, L.-corpuscle**, a leukocyte occurring in the lymph. **L.-corpuscles**, the colorless corpuscles of the lymph. **L., Euplastic.** See *L., Plastic*. **L., Fibrinous.** Same as *L., Plastic*. **L.-follicles**, branched lacunar labyrinthine parts composed of adenoid tissue intercalated in the course of the lymphatic vessels. They are not true glands. **L.-glands.** See *Lymphatic Glands*. **L.-hearts**, exist in certain cold-blooded animals, the frog, *e. g.*, having two axillary and two sacral hearts for pumping the lymph. **L., Humanized**, vaccine from a human being. **L., Inflammatory**, that thrown out as a product of inflammation in wounds, etc. **L., Koch's**, a term for the fluid called, by Koch, *paratoloid*, now known as *tuberculin*. See *Tuberculin*. It is recommended by Koch for hypodermatic injection in cases of tuberculous disease. **L., Plastic**, fibrinous lymph; that forming embryonic tissue. **L.-scrotum**, an anasarcous condition of the scrotum due to the presence of *Filaria sanguinis hominis* in the blood-stream. See *Filaria*. **L.-spaces**, the lacunæ that occur in connective tissue, and contain lymph. **L., Vituline.** See *L., Calf*.

Lymphaden (*lim-fa'-den*) [*lympha*, water; *ἀδήν*, gland]. Any lymphatic gland.

Lymphadenectasis (*lim-fad-en-ek'-tas-is*) [*lympha*, lymph; *ἀδήν*, gland; *ἔκτασις*, distention]. A tumor of a lymph-gland, due to dilatation of its sinuses.

Lymphadenhypertrophy (*lim-fad-en-hi-per'-tro-fe*) [*lympha*, lymph; *ἀδήν*, gland; *ὑπέρ*, over; *τροφή*, nourishment]. Hypertrophy of the lymphatic glands.

Lymphadenia (*lim-fad-e'-ne-ah*) [*lympha*, lymph; *ἀδήν*, gland]. A general hyperplasia of the lymphatic tissue with or without leukocytosis.

Lymphadenism (*lim-fad'-en-izm*) [*lympha*, lymph; *ἀδήν*, gland]. The general condition of disease that accompanies lymphadenoma.

Lymphadenitis (*lim-fad-en-i'-tis*) [*lympha*, lymph; *ἀδήν*, gland; *ιτις*, inflammation]. Inflammation of a lymphatic gland. **L., Cutaneous**, mycosis fungoides. **L., Septic**, a form due to the presence of microörganisms. **L., Simple**, lymphadenitis due to irritation.

Lymphadenoid (*lim-fad'-en-oid*) [*lympha*, lymph; *ἀδήν*, gland; *εἶδος*, like]. Resembling, or of the nature of, a lymphatic gland.

Lymphadenoma (*lim-fad-en-o'-mah*) [*lympha*, lymph; *ἀδηνώμα*, a glandular tumor: *pl.*, *Lymphadenomata*]. Hodgkin's disease; Malignant lymphoma; Pseudoleukemia; Anæmia lymphatica; Adénie [Fr.]. A disease of the lymphatic structures of the body characterized by a hyperplasia, and often a new formation of lymphatic tissue in glands, spleen, and bone-marrow. The cervical glands are usually first involved. The blood, as a rule, presents the characters of anemia without increase in the number of white corpuscles. Pyrexia, often of a remittent type, is common. The disease occurs most frequently in males. The duration is from two to five years, and the disease results fatally. Occasionally lymphadenoma is converted into a true leukemia. **L., Hard**, a form characterized by indurated, firm, glandular swellings. **L., Leukemic**, when associated with leukemia. **L., Soft**, a form in which the enlarged lymphatic glands are soft.

Lymphadenosis (*lim-fad-en-o′-sis*) [*lympha*, lymph; *ἀδήν*, gland; *νόσος*, disease]. General lymphadenoma.

Lymphadermia, Cutaneous (*lim-fad-er′-me-ah*). Synonym of *Granuloma fungoides*.

Lymphæduct (*lim′-fe-dukt*). See *Lympheduct*.

Lymphæmia (*lim-fe′-me-ah*). See *Lymphemia*.

Lymphagogue (*lim′-fag-og*) [*lympha*, lymph; *ἀγωγός*, leading]. An agent that increases the production of lymph.

Lymphaneurysma (*lim-fan-u-riz′-mah*) [*lympha*, lymph; *ἀνεύρυσμα*, aneurysm: *pl.*, *Lymphaneurysmata*]. Lymphangiectasis; a tumor caused by dilatation of lymphatic vessels. **L., Ganglionar,** an endemic form, with multiple localized dilatations of the lymphatic vessels. **L., Sporadic,** a localized form, usually of traumatic or infectious origin.

Lymphangei- (*lim′-fan-je-*). See *Lymphangi-*.

Lymphangeiitis (*lim-fan-je-i′-tis*). See *Lymphangitis*.

Lymphangiectasis (*lim-fan-je-ek′-tas-is*) [*lympha*, lymph; *ἀγγεῖον*, vessel; *ἔκτασις*, widening]. Abnormal dilatation of the lymphatic vessels. See *Angiokeratoma*. **L., Endemic,** a form common in the tropics, and generally due to filariasis.

Lymphangiectodes (*lim-fan-je-ek-to′-dēz*). See *Lymphangioma circumscriptum*.

Lymphangienchysis (*lim-fan-je-en′-kis-is*) [*lympha*, lymph; *ἀγγεῖον*, vessel; *ἐγχυσις*, a pouring in]. Injection of the lymphatic vessels.

Lymphangiography (*lim-fan-je-og′-ra-fe*) [*lympha*, water; *ἀγγεῖον*, vessel; *γράφειν*, to write]. A description of the lymphatics.

Lymphangiology (*lim-fan-je-ol′-o-je*) [*lympha*, lymph; *ἀγγεῖον*, vessel; *λόγος*, treatise]. The anatomy, physiology, and pathology of the lymphatics.

Lymphangioma (*lim-fan-je-o′-mah*) [*lympha*, lymph; *ἀγγεῖον*, vessel; *ὄμα*, tumor: *pl.*, *Lymphangiomata*]. A dilated or varicose condition or tumor of the lymphatic vessels. **L. capillare varicosum.** Synonym of *L. circumscriptum*. **L. cavernosum.** Synonym of *L. circumscriptum*. **L. circumscriptum,** *Lymphangiectodes; Lupus lymphaticus*, a very rare disease of the skin occurring in early life. It is marked by the formation of straw-yellow vesicles, deeply situated in the skin, with thick and tense walls, and connected with the lymphatics. Their usual seats are the shoulders, trunk, face, neck, thighs, and arms. The disease gradually spreads and tends to recur. Its cause is unknown. **L. tuberosum multiplex,** a very rare disease of the skin, probably congenital, characterized by the formation of large, brownish-red papules or tubercles, the size of lentils, not arranged in groups or clusters, but scattered indiscriminately over the trunk. They dip down into the subcutaneous tissue, and both feel and look solid, but on section they prove to be made up of greatly dilated lymphatics.

Lymphangio-myoma (*lim-fan′-je-o-mi-o′-mah*). See *Myoma*.

Lymphangion (*lim-fan′-je-on*) [*lympha*, lymph; *ἀγγεῖον*, vessel]. A lymphatic vessel.

Lymphangiopyra (*lim-fan-je-op′-ir-ah*) [*lympha*, lymph; *ἀγγεῖον*, vessel; *πῦρ*, fire]. Fever due to or accompanying a disease of the lymphatics.

Lymphangioscopy (*lim-fan-je-os′-ko-pe*) [*lympha*, lymph; *ἀγγεῖον*, vessel; *σκοπεῖν*, to inspect]. Inspection or observation of the lymphatics.

Lymphangiotomy (*lim-fan-je-ot′-o-me*) [*lympha*, lymph; *ἀγγεῖον*, vessel; *τομή*, a cutting]. Dissection or anatomy of the lymphatics.

Lymphangitis (*lim-fan-ji′-tis*) [*lympha*, lymph; *ἀγγεῖον*, vessel; *ιτις*, inflammation]. Inflammation of a lymphatic vessel. **L., Tubular,** a form involving the chief lymphatics and attended with the production of red lines on the skin. **L., Wandering,** a form occurring usually on the back of the hand, and due to frequent contact with putrefying tissues. It occurs in reticular patches connected by wavy lines.

Lymphangoncus (*lim-fan-jon′-kus*) [*lympha*, lymph; *ἀγγεῖον*, vessel; *ὄγκος*, a tumor]. A firm swelling of the lymphatic vessels.

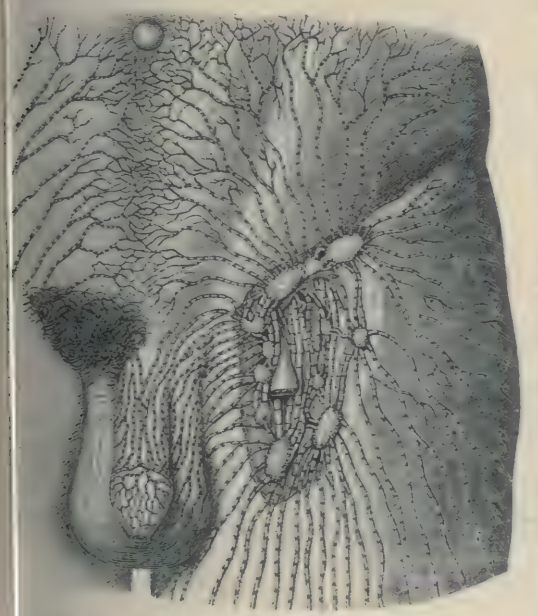
Lymphapostema (*lim-fap-os-te′-mah*) [*lympha*, lymph; *ἀπόστημα*, abscess: *pl.*, *Lymphapostemata*]. A lymphatic abscess.

Lympharia (*lim-fa′-re-ah*) [*lympha*, lymph]. A name proposed for lymphatic tissue.

Lymphate (*lim′-fāt*) [*lympha*, water]. Raving; frightened into madness.

Lymphatic (*lim-fat′-ik*) [*lymphaticus; lympha*, lymph]. Pertaining to lymph; containing or characterized by lymph. **L. Edema.** See *Lymphedema*. **L. Glands,** the glands intercalated in the pathway of the lymphatic vessels, through which the lymph is filtered. **L. Temperament.** See *Temperament*. **L. Vessels.** See *Lymphatics*.

Lymphatico-sanguine (*lim-fat′-ik-o-san′-gwin*) [*lympha*, lymph; *sanguis*, blood]. Both lymphatic and sanguine. See *Temperament*.



EFFERENT LYMPHATICS OF CERVICAL AND AXILLARY GLANDS.

1. Superior extremity of thoracic duct. 2. Its entrance at the junction of the internal jugular and left subclavian veins.

Lymphatics (*lim-fat′-iks*) [*lympha*, lymph]. The lymphatic vessels, including capillaries, afferent and efferent vessels, and ducts or trunks; the lymph vessels; capillary tubes extending to nearly every part of the body, from which they take up the lymph, forming the principal part of the absorbent system. *Afferent* or *inferent* lymphatics, those that convey lymph to the lymphatic glands; *efferent* lymphatics, those that conduct lymph from the glands.

LYMPHATIC GLANDS AND VESSELS OF THE CAVITY OF THE AXILLA.

LYMPHATIC GLANDS AND VESSELS OF THE INGUINAL REGION.

Lymphatism (*lim'-fat-izm*) [*lymphatismus*]. The lymphatic temperament; scrofula.

Lymphatitis (*lim-fat-i'-tis*). See *Lymphangitis.*

Lymphatocele (*lim-fat'-o-sēl*) [*lympha*, lymph; κήλη, tumor]. A tumor composed of dilated lymph-vessels.

Lymphatology (*lim-fat-ol'-o-je*). See *Lymphology.*

Lymph-canalicular (*limf'-kan-al-ik'-u-lar*) [*lympha*, lymph; *canaliculus*, small channel]. Pertaining to the ultimate channels of the lymphatic vessels.

Lymphedema (*lim-fe-de'-mah*) [*lympha*, lymph; οἴδημα, edema]. Edema due to accumulation of lymph; serous edema.

Lympheduct (*lim'-fe-dukt*) [*lympha*, lymph; *ducere*, to lead]. A lymphatic vessel or duct.

Lymphemia (*lim-fe'-me-ah*) [*lympha*, lymph; αἷμα, blood]. Leukemia characterized by pathologic processes in the lymphatic glands, which become hypertrophied; the kidney or liver sometimes presents what appears to be an element composed of lymphatic tissues.

Lymphenteritis (*lim-fen-ter-i'-tis*) [*lympha*, lymph; ἔντερον, bowels; ιτις, inflammation]. Inflammation of the bowels attended with serous infiltration. 2. Inflammation of the serous coat of the intestine; peritonitis.

Lymphepatitis (*limf-hep-at-i'-tis*) [*lympha*, lymph; ἧπαρ, liver; ιτις, inflammation]. Inflammation of the peritoneal coat of the liver.

Lympheurysma (*lim-fu-riz'-mah*). See *Lymphaneurysma.*

Lymphexosmosis (*lim-feks-os-mo'-sis*) [*lympha*, lymph; ἐξ, out; ὠσμός, thrust]. Exosmosis of lymph; passage of lymph outward, through the coats of the lymph-vessels.

Lymphitis (*lim-fi'-tis*). See *Lymphangitis.*

Lymphoblast (*lim'-fo-blast*) [*lympha*, lymph; βλαστός, germ]. Any cell with a nutritive function.

Lymphocele (*lim'-fo-sēl*) [*lympha*, lymph; κήλη, tumor]. A tumor containing an abnormal collection or quantity of lymph.

Lymphocyte (*lim'-fo-sīt*) [*lympha*, lymph; κύτος, a cell]. 1. A lymph-cell. 2. One of Ehrlich's classes of leukocytes, comprising those small cells having large nuclei and a very small amount of protoplasm. See *Leukocyte.*

Lymphocythemia (*lim-fo-si-the'-me-ah*) [*lympha*, lymph; κύτος, cell; αἷμα, blood]. A condition of the blood in which the lymphocytes are increased.

Lymphodermia (*lim-fo-der'-me-ah*) [*lympha*, lymph; δέρμα, skin]. An affection of the lymphatics of the skin. **L. perniciosa**, a certain form of *Mycosis*, or fungoid granuloma.

Lymphoduct (*lim'-fo-dukt*). See *Lympheduct.*

Lympho-gastritis (*lim-fo-gas-tri'-tis*) [*lympha*, lymph; γαστήρ, stomach; ιτις, inflammation]. Lymphatic gastritis.

Lymphogenous (*lim-foj'-en-us*) [*lympha*, lymph; γεννᾶν, to beget]. Producing lymph.

Lymphoid (*lim'-foid*) [*lympha*, lymph; εἶδος, like]. Having the appearance or character of lymph.

Lymphology (*lim-fol'-o-je*) [*lympha*, lymph; λόγος, science]. The study of the anatomy and physiology of the lymphatic system.

Lymphoma (*lim-fo'-mah*) [*lympha*, lymph; ὄμα, tumor: *pl.*, *Lymphomata*]. A lymph-tumor; also, lymphadenoma. The term includes formations not strictly tumors but hyperplasias of the tissues proper to lymphatic glands. **L., Heteroplastic.** Synonym of *Lymphadenoma.* **L., Leukemic.** See *Lymphadenoma, Leukemic.* **L., Malignant.** Synonym of *Lymphadenoma.* **L., Scrofulous.** tuberculous enlargement of lymphatic glands. **L., Typhoid**, the formation of small lymphatic masses in the intestinal peritoneum and in the liver and kidneys in typhoid fever.

Lymphomatous (*lim-fo'-mat-us*) [*lympha*, lymph; ὄμα, tumor]. Of the nature of, affected with, or relating to, lymphoma.

Lymphoncus (*lim-fong'-kus*) [*lympha*, lymph; ὄγκος, tumor]. A hard lymphatic swelling. **L. iridis.** See *Iridauxesis.*

Lympho-nephritis (*lim-fo-nef-ri'-tis*) [*lympha*, lymph; νεφρός, kidney; ιτις, inflammation]. Inflammation of the serous, or outer, surface of the kidney.

Lymphopathy (*lim-fop'-ath-e*) [*lympha*, lymph; πάθος, disease]. Any disorder of the lymphatic organs.

Lympho-peritonitis (*lim-fo-per-it-on-i'-tis*) [*lympha*, lymph; περιτόναιον, peritoneum; ιτις, inflammation]. Lymphatic peritonitis.

Lymphopyra (*lim-fop'-ir-ah*). See *Lymphangiopyra.*

Lymphorrhagia (*lim-for-a'-je-ah*) [*lympha*, lymph; ῥηγνύναι, to burst forth]. An effusion or flow of lymph from a ruptured lymphatic vessel.

Lymphorrhea (*lim-for-e'-ah*) [*lympha*, lymph; ῥοία, a flow]. A discharge of lymph from a wound, internally or externally.

Lympho-sarcoma (*lim-fo-sar-ko'-mah*) [*lympha*, lymph; σάρκωμα, a fleshy mass: *pl.*, *Lympho-sarcomata*]. Properly, a form of sarcoma having some of the structural elements of a lymphatic gland; also, a sarcoma seated upon, or involving, a lymphatic gland. **L. thymicum**, a lympho-sarcoma originating in a persistent thymus gland and attended with metastasis to various parts of the body.

Lympho-sarcomatosis (*lim'-fo-sar-ko-mat-o'-sis*) [*lympha*, lymph; σάρκωμα, fleshy mass]. A condition or diathesis marked by the development of lympho-sarcoma; also, the process of such development.

Lymphosis (*lim-fo'-sis*) [*lympha*, lymph]. The elaboration of lymph.

Lymphostasis (*lim-fos'-tas-is*) [*lympha*, lymph; στάσις, a placing]. Stasis or stoppage of the flow of lymph.

Lymphotomy (*lim-fot'-o-me*). See *Lymphangiotomy.*

Lymphotorrhea (*lim-fot-or-e'-ah*) [*lympha*, lymph; οὖς, ear; ῥοία, a flow]. A serous or watery discharge from the ear.

Lymphuria (*lim-fu'-re-ah*) [*lympha*, lymph; οὖρον, urine]. A condition in which the urine spontaneously coagulates, but contains no fat, as it does in chyluria.

Lynx (*links*) [λύγξ, a sobbing]. Hiccough; violent sobbing.

Lyon's Apparatus. See *Urea* and *Disinfection.*

Lyons Blue. Same as *Spirit-blue.*

Lypemania (*li-pe-ma'-ne-ah*) [λύπη, sadness; μανία, madness]. A form of dementia accompanied by profound mental depression and refusal to take food.

Lyperophrenia (*li-per-o-fre'-ne-ah*) [λυπηρός, distressing; φρήν, mind]. Melancholia.

Lypothymia (*li-po-thi'-me-ah*) [λύπη, sadness; θυμός, mind]. Melancholia; severe mental prostration from grief. This condition is not to be confounded with *Leipothymia*, *q. v.*

Lyra (*li'-rah*) [λύρα, a lyre]. A lyre. **L. of Fornix**, certain longitudinal, transverse, and oblique lines on the under surface of the fornix, the arrangement of which bears a fanciful resemblance to a harp. **L. of Uterus**, the uterine arbor vitæ. **L. of Vagina**, the vaginal rugæ.

Lyrate (*li'-rāt*) [*lyra*, a lyre]. In biology, lyre-shaped.

Lysemia (*li-se'-me-ah*) [λύσις, solution; αἷμα, blood]. A dissolution of the blood, or a losing of the integral parts of it.

Lysigenetic (*lis-ij-en-et'-ik*). Same as *Lysigenous.*

Lysigenic (*lis-ij-en'-ik*). Same as *Lysigenous.*

Lysigenous (*lis-ij'-en-us*) [λύσις, a setting free; γενής, born, produced]. In biology, a term applied to intercellular spaces formed by the breaking down of contiguous cells. Cf. *Schizogenic.*

Lysimachia (*lis-im-a'-ke-ah*) [λύσις, a loosing; μάχη, battle]. A genus of primulaceous plants of many species. **L. nemorum, L. nummularia, L. vulgaris,** of Europe, and **L. quadrifolia,** and other N. American species are used in domestic medicine. Unof.

Lysinosis (*lis-in-o'-sis*) [λύσις, λύειν, to loose (a ravelling or shred)]. Hertz's term for a disease of the lungs due to the inhalation of cotton-fibers.

Lysiplasta (*lis-ip-las'-tah*) [λύσις, a loosing; πλάσσειν, to mould]. Diseased states marked by excessive secretion.

Lysis (*li'-sis*) [λύσις, λύειν, to loose]. A term somewhat loosely used, but now applied to the gradual decline of a disease, especially a fever.

Lysol (*li'-sol*). A saponified phenol derived from cresols by the action of nascent soap. It is an excellent disinfectant in from one to three per cent. solutions, and has been used in dermatology and gynecology. Unof.

Lyssa (*lis'-ah*) [λύσσα, madness]. 1. A synonym of *Hydrophobia* or *Rabies.* 2. Mania or madness.

Lyssic (*lis'-ik*) [λύσσα, madness]. Pertaining to rabies; due to rabies.

Lyssin (*lis'-in*) [λύσσα, madness]. The specific virus or germ of hydrophobia.

Lyssodegma (*lis-o-deg'-mah*). Synonym of *Lyssodexis.*

Lyssodexis (*lis-o-deks'-is*) [λύσσα, madness; δάκνειν, to bite]. The bite of a rabid dog.

Lyssoid (*lis'-oid*) [λύσσα, rabies; εἶδος, like]. Resembling rabies; resembling madness.

Lyssophobia (*lis-o-fo'-be-ah*) [λύσσα, madness; φόβος, fear]. Morbid dread of rabies; pseudo-hydrophobia.

Lyterian (*li-te'-re-an*) [λυτήριος, loosing]. Indicative of a lysis, or of a favorable crisis, terminating an attack of disease.

Lythrum (*lith'-rum*) [λύθρον, bloody defilement]. A genus of lythraceous plants. **L. salicaria,** or willow herb, is used as an astringent in leukorrhea, diarrhea and hemorrhage from the lungs. Unof.

Lytic (*lit'-ik*) [*lyticus*, λυτικός]. Relating to a lysis or to a solution.

Lytta (*lit'-ah*). 1. Synonym of *Hydrophobia.* 2. A long, median, pointed, fibrous or cartilaginous process (*glossohyal*) in the tongue of carnivora. It is the "worm" of the dog's tongue, commonly held to be a parasite and often extracted by fanciers. **L. vesicatoria.** See *Cantharis.* **L. vittata,** the potato-fly containing one per cent. or more of cantharidin.

M

M. The abbreviation of *Musculus*, of *Meter*, of *Myopia*, of *Minim*, of *Molar*, and of *Misce*, mix; it is also used to represent the number 1000.

mm. An abbreviation for millimeter.

mmm. An abbreviation for Micro-millimeter.

μ (*mu*). The abbreviation universally adopted for micron or *micro-millimeter*.

Ma. An abbreviation of *Milliampère*.

Maas's Mixture. A mixture employed in the treatment of eczematous diseases of the ear. It is constituted as follows: corrosive sublimate 5 parts, sodium chlorid 500 parts, glycerin 200 parts.

Maba (*ma'-bah*) [native Tonga-Tabu]. A genus of ebenaceous trees and shrubs of many species. **M. ebenus**, of the Moluccas, is regarded as a good antisyphilitic and antirheumatic. Unof.

Mac. An abbreviation of *Macera*, macerate.

Mac., Mc., M'., beginning proper names will be found as if spelled Mac, and in strict alphabetic order.

Macaco Worm (*mak-a'-ko wurm*) [from a Malagasy name]. The larva of a S. American fly, *Dermatobia noxialis*, which infests the skin of men and animals. See *Parasites* (*Animal*), *Table of*.

Macallo (*mak-al'-o*). See *Andira*.

Macaroni (*mak-ar-o'-ne*) [Ital.]. 1. Slender tubes made of flour-paste; a favorite dish in Italy and also in the U. S. 2. An active purgative used in lead-colic. Antimony sulphid is one of the ingredients.

McBurney's Point. A localized point of tenderness on deep pressure, supposed to be diagnostic of appendicitis. It is about two inches above the anterior superior spine of the ilium on a line drawn from this point to the umbilicus.

Macdowel's Frenum. See *Frenum*.

McDowell's Operation. See *Operations*, *Table of*.

Mace (*mās*). See *Myristica*.

Macene (*mās-ēn'*) [*macis*, mace], $C_{10}H_{16}$. An essential oil resulting from the distillation of the flowers of nutmeg. The hydrochlorate on distillation yields a camphor.

Maceration (*mas-er-a'-shun*) [*maceratio; macerare*, to make soft]. Extraction of the medicinal qualities of a substance by steeping or infusing. Applied, also, to a softening and non-putrefactive decomposition of the dead fetus long carried in the uterus.

Macewen's Method. A method of preparing animal ligatures. To 1 oz. each of water and glycerin add 12 grs. of chromic acid crystals; in this steep the ligatures ten days, then remove and thoroughly dry; for preservation keep in a 5 per cent. carbolic-acid solution. **M.'s Operation.** See *Operations*, *Table of*.

Machopolyp (*mak'-o-pol-ip*) [μάχη, fight; πολύποις, a polyp]. In biology, a modified polyp abundant in the *Plumularidæ*, having a defensive function; some animals possess urticating capsules, others, instead, adhesive granules. The name was introduced by Hamann; it is also called *Guard-polyp*.

Macies (*ma'-se-ēz*) [*macies*, a wasting]. Atrophy, leanness, wasting. **M. infantum.** Synonym of *Tabes mesenterica*.

Macilent (*mas'-il-ent*) [*macilentus*, lean]. Meager; thin; lean.

Macintosh's Cream. A dressing for urticaria. It consists of subnitrate of bismuth 2 drams, oxid of zinc ½ dram, glycerin 1½ drams, liquid carbolic acid from 20 to 30 minims, vaselin 6 ounces.

M'Kinnell's Ventilator. See *Ventilation*.

Mackintosh (*mak'-in-tosh*) [after Charles *Mackintosh*, the inventor]. A fabric of silk or cotton, rendered waterproof and airproof by a coating of india rubber; it is used in antiseptic surgery and in obstetrics.

McLeod's Capsular Rheumatism. A form of rheumatoid arthritis attended with effusion into the synovial capsules and into the synovial sheaths and bursæ about the affected joints. See *Diseases*, *Table of*.

Maclurin (*mak-lu'-rin*) [after W. *Maclure*], $C_{15}H_{12}O_5$. A principle found in yellow-wood (*Morus tinctoria*), from which it may be extracted by hot water. It occurs in the form of a yellow, crystalline powder, soluble in water and alcohol; it is found also in *Maclura aurantia*, or Osage-orange.

McMunn's Elixir. See *Opium*.

Macquer's Arsenical Salt. The arseniate of potassium.

Macradenous (*mak-rad'-en-us*) [μακρός, large; ἀδήν, gland]. Having large glands.

Macræsthete (*mak'-res-thēt*) [μακρός, large; αἰσθητός, perceived by the senses]. In biology, Moseley's term for one of the more or less fusiform sense-bodies that occupy the cavities of the megalopores of the *Chitonidæ*. They terminate in conspicuous obconical plugs of transparent, highly refractive tissue, and are composed of a number of cylindric strands of tissue held closely together. Cf. *Æsthete*.

Macrandrous (*mak-ran'-drus*) [μακρός, long; ἀνήρ, male]. In biology, applied to such plants (*algæ*) as have the male plants large or elongated.

Macrantrus (*mak-ran'-trus*) [μακρός, large; ἄντρον, a cave]. Lissauer's term for a skull in which the vertical line extending from the most prominent point of the frontal torus to the radius fixus is from four to nine mm. in front of that from the nasion to the radius fixus.

Macrauchen (*mak-raw'-ken*) [μακρός, large; αὐχήν, neck]. A long-necked person.

Macrencephalic (*mak-ren-sef-al'-ik*). **Macrencephalous** (*mak-ren-sef'-al-us*) [μακρός, long; ἐγκέφαλος, brain]. Having a large or long skull.

Macrencephalus (*mak-ren-sef'-al-us*) [μακρός, large; ἐγκέφαλος, brain]. Lissauer's term for a skull in which the angle formed by the junction of the lines drawn from the hormion to the nasion and to the inion is between 156.5° and 170°.

Macrencranus (*mak-ren-kra'-nus*) [μακρός, large; ἐν, in; κρανίον, skull]. Lissauer's term for a skull having a large cerebellar sector (from 20° to 27.5°).

Macritas (*mak'-rit-as*) [*macer*, lean]. Emaciation; leanness.

Macro- (*mak'-ro-*) [μακρός, long, great]. A prefix signifying great, long, or extensive.

Macrobiosis (*mak-ro-bi-o'-sis*) [μακρός, long; βίος, life]. A condition characterized by long life; longevity.

Macrobiote (*mak-ro'-be-ōt*) [μακροβίοτος, having a long life]. One who lives long.

Macrobiotic (*mak-ro-bi-ot'-ik*) [μακρός, long; βίος, life]. Pertaining to long life; long-lived.

Macrobiotics (*mak-ro-bi-ot'-iks*) [μακρός, long; βίος, life]. A proposed system of living in a manner conducive to length of life; the art or study of longevity.

Macrobius (*mak-ro'-be-us*). See *Macrobiotic*.

Macrocarpin (*mak-ro-kar'-pin*) [μακρός, large; καρπός, fruit]. A crystalline neutral principle extracted from the root of *Thalictrum macrocarpum*.

Macrocarpous (*mak-ro-kar'-pus*) [μακρός, long; καρπός, fruit]. In biology, bearing large fruit.

Macrocephalia (*mak-ro-sef-a'-le-ah*) [μακρός, large; κεφαλή, head]. Excessive development of the head

in size. A systematic deviation in a genus or a species distinguished by abnormally large heads.

Macrocephalous (*mak-ro-sef'-al-us*) [μακρός, large; κεφαλή, head]. Characterized by an abnormally large head. In biology, applied to plant-embryos that have very large and consolidated cotyledons, such as the horse-chestnut.

Macrocephaly (*mak-ro-sef'-al-e*). See *Macrocephalia*.

Macrocercus (*mak-ro-ser'-kus*) [μακρός, long; κέρκος, tail]. Long-tailed. In zoölogy, a genus in which the spermatozoa were at one time classed.

Macrochasmus (*mak-ro-kaz'-mus*) [μακρός, large; χάσμα, chasm]. Lissauer's term for a skull in which the angle formed by the junction of lines drawn from the wing of the vomer to the posterior nasal spine and to the anterior margin of the foramen magnum is between 94° and 114°.

Macrocheilia (*mak-ro-ki'-le-ah*) [μακρός, large; χεῖλος, lip]. Excessive size or development of the lips; a characteristic of certain negro and negroid tribes. It occurs also in cretinoid states and when the lips and cheeks are the seat of lymphangioma.

Macrocheiria (*mak-ro-ki'-re-ah*) [μακρός, large; χείρ, hand]. Great enlargement of the hands.

Macrochemistry (*mak-ro-kem'-is-tre*) [μακρός, large; χημεῖα, chemistry]. Chemistry in which the reactions are observable with the naked eye. Cf. *Microchemistry*.

Macrococcus (*mak-ro-kok'-us*) [μακρός, long or large; κόκκος, a berry: *pl.*, *Macrococci*]. A term applied to cocci that are somewhat larger than the average.

Macrocolia (*mak-ro-ko'-le-ah*) [μακρός, long; κῶλον, limb]. The possession of long limbs.

Macrocolous (*mak-rok'-o-lus*) [μακρός, long; κῶλον, limb]. Having long limbs.

Macrocosm (*mak'-ro-kozm*) [μακρός, large; κόσμος, world]. The world or cosmos, in contradistinction to man, the microcosm; or *little universe*.

Macrocosmic (*mak-ro-koz'-mik*) [μακρός, large; κόσμος, world]. Pertaining to the macrocosm.

Macrocosmology (*mak-ro-koz-mol'-o-je*) [μακρός, large; κόσμος, world; λόγος, science]. The science of the macrocosm or outer world; mineralogy.

Macrocyte (*mak'-ro-sīt*) [μακρός, large; κύτος, cell]. A giant blood-corpuscle found in the blood in pernicious anemia, and leukemia.

Macrocythemia (*mak-ro-si-the'-me-ah*) [μακρός, long, great; κύτος, cell; αἷμα, blood]. A condition in which the size of the red blood-corpuscles is increased; it may be due to malaria, anemia, or lead-poisoning.

Macrocytosis (*mak-ro-si-to'-sis*) [μακρός, large; κύτος, cell]. The formation of macrocytes.

Macrodactylia (*mak-ro-dak-til'-e-ah*) [μακρός, long; δάκτυλος, finger]. An abnormally great length, or size, of fingers or toes.

Macrodactylism (*mak-ro-dak'-til-izm*). See *Macrodactylia*.

Macrodactyly (*mak-ro-dak'-til-e*). See *Macrodactylia*.

Macrodont (*mak'-ro-dont*) [μακρός, large; ὀδούς, tooth]. Large-toothed, as applied to the comparative size of the teeth of different races. When the dental length multiplied by 100 divided by the basinasal length exceeds 44, the skull is considered a **macrodont**, if under 42 a **microdont**, if intermediate a **mesodont**.

Macrogastria (*mak-ro-gas'-tre-ah*) [μακρός, large; γαστήρ, belly]. Dilatation of the stomach.

Macrogastrous (*mak-ro-gas'-trus*) [μακρός, large; γαστήρ, stomach]. Having a large stomach or belly.

Macrogenious (*mak-ro-je'-ne-us*) [μακρός, large; γένειον, chin]. Long-chinned.

Macroglossia (*mak-ro-glos'-e-ah*) [μακρός, great; γλῶσσα, tongue]. Hypertrophic development of the tongue, a condition seen in cretins, in whom it is probably due to lymphangioma.

Macrognathic (*mak-rog-nath'-ik*) [μακρός, long; γνάθος, jaw]. In biology, having long jaws; prognathous.

Macrogonidium (*mak-ro-go-nid'-e-um*) [μακρός, long, large; γονή, generation, seed: *pl.*, *Macrogonidia*]. In biology, a gonidium larger than the average.

Macromania (*mak-ro-ma'-ne-ah*) [μακρός, large; μανία, madness]. The insane delusion that objects are larger than they really are; or the impression that one's own body or members are much larger than they are.

Macromaniacal (*mak-ro-ma-ni'-ak-al*) [μακρός, large; μανία, madness]. Characterized by the insane impression that objects are larger than they really are.

Macromelia, (*mak-ro-me'-le-ah*), **Macromelus** (*mak-rom'-el-us*) [μακρός, long; μέλος, organ or member]. The excessive development of any organ or member.

Macromelia (*mak-ro-me'-le-ah*) [μακρός, long; μήλα, cheek]. Hypertrophy of the cheeks.

Macromere (*mak'-ro-mēr*) [μακρός, long; μέρος, part]. In biology, the larger of the two masses into which the vitellus divides in the development of a lamellibranch, termed by Rabe the "vegetative cell." One of the larger blastomeres in a holoblastic telolecithal germ. **M.-plate**, a plate of 16 macromeres arranged on the vegetative side of the germ in the *Ctenophora*.

Macromyelon (*mak-ro-mi'-el-on*). See *Metencephalon*.

Macronemous (*mak-ro-ne'-mus*) [μακρός, long; νῆμα, thread]. Having long tentacles.

Macronosia (*mak-ro-no'-ze-ah*) [μακρός, long; νόσος, illness]. A protracted or chronic disease.

Macronucleus (*mak-ro-nu'-kle-us*). See *Nucleus*.

Macronychous (*mak-ro-nik'-us*) [μακρός, large; ὄνυξ, talon]. Having long nails or claws.

Macropanencephalus (*mak-ro-pan-en-sef'-al-us*) [μακρός, large; πᾶν, all; ἐγκέφαλος, brain]. Lissauer's term for a skull in which the angle formed by the junction of the lines joining the hormion to the nasion and to the basion is between 185.5° and 206°.

Macropetalous (*mak-ro-pet'-al-us*) [μακρός, long; πέταλον, a leaf]. In biology, having large petals.

Macrophage (*mak'-ro-fāj*) [μακρός, large; φαγεῖν, to devour]. A large phagocyte. "Metschnikoff's term for certain large leukocytes occurring in structures affected with erysipelas. He believes that they consume and destroy the debris of the dead and dying *microphages*."

Macrophagocyte (*mak-ro-fag'-o-sīt*) [μακρός, large; φαγεῖν, to devour; κύτος, a cell]. A large-sized phagocyte, possessed of a single nucleus, and derived from some fixed connective-tissue element.

Macrophagus (*mak-roff'-ag-us*). See *Macrophage*.

Macrophallus (*mak-ro-fal'-us*) [μακρός, large; φαλλός, penis]. A penis abnormally large or long.

Macropharynx (*mak-ro-far'-ingks*) [μακρός, large; φάρυγξ, pharynx]. A large pharynx.

Macrophonous (*mak-roff'-o-nus*) [μακρός, large; φωνή, sound]. Loud-voiced.

Macrophthalmos (*mak-roff-thal'-mos*) [μακρός, long, large; ὀφθαλμός, eye]. In biology, having large eyes.

Macrophylline (*mak-ro-fil'-in*) [μακρός, long, large; φύλλον, a leaf]. In biology, consisting of large leaf like parts or organs.

Macrophyllous (*mak-ro-fil'-us*) [μακρός, long; φύλλον, a leaf]. In biology, having large leaves.

Macrophysocephalus (*mak-ro-fi-so-sef'-al-us*) [μακρός, large; φυσᾶν, to puff up; κεφαλή, head]. 1. Enlargement of the head from emphysema. 2. Caput succedaneum.

Macropia (*mak-ro′-pe-ah*). See *Megalopsia.*

Macroplasia (*mak-ro-pla′-ze-ah*) [μακρός, large; πλάσις, a moulding]. Excessive development of portions of the body.

Macropneuma, Macropnea (*mak-ro-nu′-mah, mak-rop′-ne-ah*) [μακρός, long; πνεῦμα, πνοή, air, wind]. Deep breathing.

Macropodal (*mak-rop′-o-dal*) [μακρός, large; πούς, foot]. Large-footed.

Macropodia (*mak-ro-po′-de-ah*) [μακρός, large; πούς, foot]. Excessive size of the feet.

Macropodous (*mak-rop′-o-dus*) [μακρός, long; πούς, foot]. 1. Large-footed. 2. In biology, applied to leaves with long foot-stalks, or to embryos with peculiarly large radicles.

Macropous (*mak′-ro-pus*). See *Macropodal.*

Macroprosopia (*mak-ro-pro-so′-pe-ah*) [μακρός, large; πρόσωπον, face]. A monstrosity with a huge face.

Macropsia (*mak-rop′-se-ah*). See *Megalopsia.*

Macropterous (*mak-rop′-ter-us*) [μακρός, long; πτερόν, wing]. In biology, having long wings; longipennate.

Macrorhinia (*mak-ro-rin′-e-ah*) [μακρός, large; ῥίς, nose]. Congenital hypertrophy of the nose.

Macrorhis (*mak′-ro-ris*) [μακρός, large; ῥίς, nose]. Having a large nose.

Macrorhynchus (*mak-ro-rin′-kus*) [μακρός, large; ῥύγχος, beak]. Large-beaked.

Macroscelia (*mak-ro-ske′-le-ah*) [μακρός, large; σκέλος, leg]. Excessive development of the legs.

Macroscopic (*mak-ro-skop′-ik*) [μακρός, large; σκοπεῖν, to see]. Large enough to be seen by the naked eye; gross; not microscopic. **M. Morbid Anatomy,** naked-eye or gross morbid anatomy.

Macroseme (*mak′-ro-sēm*) [μακρός, large; σῆμα, sign, index]. Having an orbital index in excess of 89.

Macrosiphon (*mak-ro-si′-fon*) [μακρός, long; σίφων, siphon]. In biology, applied to the long, horny funnel of certain cephalopods.

Macrosiphonula (*mak-ro-si-fon′-u-lah*) [μακρός, long; σίφων, siphon: *pl.*, *Macrosiphonulæ*]. In embryology, a larval stage of certain cephalopods characterized by the appearance of the macrosiphon.

Macrosis (*mak-ro′-sis*) [μακρός, large]. A state of increase in volume.

Macrosmatic (*mak-roz-mat′-ik*) [μακρός, large; ὀσμάεσθαι, to smell]. Having well-developed olfactory organs.

Macrosomatia (*mak-ro-so-ma′-she-ah*), **Macrosomia** (*mak-ro-so′-me-ah*) [μακρός, large; σῶμα, body]. Great or teratic size of body; largeness of body sufficient to constitute a monstrosity.

Macrosomatous (*mak-ro-so′-mat-us*) [μακρός, large; σῶμα, body]. Having a large body. Characterized by an abnormally or teratically large body.

Macrosomite (*mak-ro-so′-mīt*) [μακρός, long; σῶμα, body]. In embryology, one of the larger primitive segments or metameres in the embryos of certain insects.

Macrosporangiophore (*mak-ro-spo-ran′-je-o-for*) [μακρός, long, large; σπορά, seed; ἀγγεῖον, vessel; φόρος, bear]. In biology, the envelop of a macrosporangium.

Macrosporangium (*mak-ro-spo-ran′-je-um*) [μακρός, long; σπορά, seed; ἀγγεῖον, vessel: *pl.*, *Macrosporangia*]. In biology, a sporangium containing macrospores; a megasporangium, oösporangium, or gonotheca.

Macrospore (*mak′-ro-spor*) [μακρός, long; σπορά, seed]. In biology: (*a*) a spore of relatively large size; (*b*) one of the larger anisospores arising in the reproduction of colony-forming Radiolarians.

Macrosporophyl, (*mak-ro-spo′-ro-fil*) [μακρός, long, large; σπορά, seed; φύλλον, leaf]. The leaf bearing the macrosporangium in the higher Pteridophyta.

Macrostoma (*mak-ros′-to-mah*) [μακρός, large; στόμα, mouth]. Congenital fissure of the angle of the mouth, producing a large opening.

Macrostomatous (*mak-ro-sto′-mat-us*) [μακρός, large; στόμα, mouth]. Large-mouthed.

Macrostomia (*mak-ro-sto′-me-ah*) [μακρός, large; στόμα, mouth]. Excessive size, or width, of the mouth, or of the oral fissure.

Macrostyle (*mak′-ro-stil*) [μακρός, long; στῦλος, pillar]. In botany, having a relatively long style.

Macrostylospore (*mak-ro-stī′-lo-spor*) [μακρός, long, large; στῦλος, pillar; σπορά, seed]. In biology, a relatively large stylospore.

Macrotes (*mak-ro′-tēz*) [μακρός, large; οὖς, ear]. One having large ears.

Macrotin (*mak′-ro-tin*) [μακρός, large; οὖς, ear]. A resin extracted from cimicifuga by alcohol, and precipitated by water. See *Cimicifuga.*

Macrotome (*mak′-ro-tōm*) [μακρός, long; τομή, a cutting]. A saw-box; a box used for the division of the cranium in post-mortem examination of the brain.

Macrozoögonidium (*mak-ro-zo-o-go-nid′-e-um*) [μακρός, long, large; ζῷον, an animal; γονή, seed: *pl.*, *Macrozoögonidia*]. In biology, a relatively large zoögonidium.

Macrozoöspore (*mak-ro-zo′-o-spor*) [μακρός, long; ζῷον, an animal; σπορά, seed]. In biology, a relatively large form of zoöspore.

Macula (*mak′-u-lah*) [L.: *pl.*, *Maculæ*]. A spot or discoloration of the skin, not elevated above the surrounding level. It may be of various sizes, shapes, and tints, and is due to hyperemia, to extravasation of blood and blood coloring-matter, to dilatation of the cutaneous vessels, or to changes in the pigmentation of the skin. **M. acusticæ,** the terminations of the auditory nerve in the saccule and utricle. **M. albida,** leukoderma. **M. artificialis,** a spot produced artificially in order to deceive. **M. aurea,** the central fovea of the retina. **M., Cerebral.** See *Tâche cérébrale.* **M. cerulea,** a dark spot occurring on a skin infested with parasites. **M. corneæ arcuata,** the arcus senilis. **M. cribrosa,** a name given to the perforations of the *fovea hemispherica* for the passage of the filaments of the auditory nerve. **M. flava.** See *M. lutea.* **M. folliculi,** the stigma of the Graafian vesicle. **M. fusca,** a spot due to diseases characterized by pigmentation, as lentigo and chloasma. **M., Germinal,** the small spot constituting the germinal vesicle or nucleus of the ovum. **M. hepatica,** a liver-spot, including pigmentary spots due to various diseases. **M. lata plateri,** an obscure disease of the skin, sometimes epidemic, characterized by burning, red spots and pustulation. **M. lenticularis,** a lenticular spot; the roseola of typhoid fever. **M. livida,** a hemorrhagic or purpuric spot. **M. lutea,** the yellow spot of the retina, called, sometimes, the *spot of Sœmmering,* but usually called simply *the macula.* The depression in its center is called the fovea centralis. It is the point of clearest vision and is pierced by the visual axis. **M. materna,** birth-mark, or nevus. **M. nigra,** a disease of the skin associated with very dark spots of pigmentation. **M. ocularis,** the eye-spot of the Protozoa, Cnidaria, Platodes, and Crustacea. **M., Roberts',** a heaping up of pigment in a part of a red corpuscle when a dilute solution of tannic acid is added to the blood. **M. solaris,** a freckle. **M. syphilitica,** the coppery stain of the skin left by a syphiloderm.

Macular (*mak′-u-lar*) [*macula,* spot]. Exhibiting or characterized by maculæ. Pertaining to the *Macula lutea.*

Maculate (*mak′-u-lāt*) [*maculatus,* p.p. of *maculare* to spot]. In biology, blotched or spotted.

Maculation (*mak-u-la'-shun*) [*maculatio*, a spotting]. The state or quality of being spotted; the formation of maculæ; a spot or macula.

Macule (*mak'-ūl*) [*macula*, a spot]. See *Macula*. **M., Gonorrheal,** Sänger's term for the purplish-red areola resembling a flea-bite, surrounding the orifice of the duct of Bartholin's gland in gonorrheal vaginitis.

Maculiform (*mak-u'-lif-orm*) [*macula*, spot; *forma*, form]. Resembling a macula.

Maculose, Maculous (*mak'-u-lōs, mak'-u-lus*). See *Macular*.

Mad [ME., *made*, mad]. 1. Disordered in intellect; insane. 2. Furious from disease; rabid. **M.-doctor,** an alienist. **M.-house,** an asylum for the insane. **M.-man,** an insane person. **M. Staggers,** the enzoötic cerebritis of horses. See *Staggers*. **M.-stone,** according to popular superstition, a small stone believed to possess the property of absorbing the poison (especially snake-poison) or disease from wounds, made, *e. g.*, by poisoned arrows, or morbid parts. It is called also *Snakestone*. Galen believed that certain medicines attract poisons as the magnet does iron. Most madstones are an aluminous shale, or other absorptive substance.

Madar (*mad-ar'*), **Mudar** (*mu-dar'*) [Hind., *madār*]. The shrubs *Calotropis gigantea*, and *C. procera*, of India; also their bark, leaves, flowers, fruits, and juice, which are tonic, alterative, and emetic; it is used in Asia in a wide range of diseases. Unof., except in the Indian Pharmacopeia. *C. gigantea* yields *Madar-alban*, a colorless crystalline substance soluble in the alkalies, but not in water; and *Madar-fluavil*, a yellowish, viscid body, soluble in cold alcohol, in ether, and in benzene, insoluble in water, in acids, and in alkalies.

Madarosis (*mad-ar-o'-sis*) [μαδάρωσις; μαδαρός, bald]. Loss of the eyelashes or hairs of the eyebrows.

Madarotic (*mad-ar-ot'-ik*), **Madarous** (*mad'-ar-us*) [μαδάρωσις; μαδαρός, bald]. Affected with or relating to madarosis.

Madder (*mad'-er*) [ME., *moder*, madder]. The plant *Rubia tinctorum;* also its root, well-known as a dyestuff. It was formerly considered emmenagogue and diuretic. Unof. See also *Pigments, Conspectus of.* **M.-brown, M.-carmin, M.-orange, M.-purple.** See *Pigments, Conspectus of.* **M.-red.** Same as *Madder*. **M.-yellow.** See *Pigments, Conspectus of.*

Maddox Test, or **Maddox Glass-rod Test.** A test of heterophoria by means of a short cylinder of transparent glass about one-eighth of an inch long, fitted into a slot in an opaque disc to be set in the trial-frame before one eye, with a colored plano lens before the other eye. The rod converts the image of a distant flame into a thin line of light. The relative position of the two images thus formed permits the measure of imbalance of the muscles.

Madefaction (*mad-e-fak'-shun*) [*madefacere*, to moisten]. The act of moistening.

Madeira (*mad-a'-rah*) [Pg., *madeira*, wood]. A fine sherry wine from the island of Madeira.

Maderna (*mad-er'-nah*). Synonym of *Madarosis*.

Madescent (*mad-es'-ent*) [*madescere*, to become wet]. Becoming moist.

Madesis (*mad-e'-sis*). Synonym of *Madarosis*.

Madidans (*mad'-id-anz*) [L.]. Weeping, oozing. See *Eczema madidans*.

Madisis (*mad'-is-is*). Synonym of *Madarosis*.

Madisterion, Madisterium (*mad-is-ter'-e-on, mad-is-ter'-e-um*) [μαδιστήριον, from μαδίζειν, to pluck bare]. Epilating-forceps.

Madness (*mad'-nes*). See *Insanity* and *Mania*.

Madrid Colic. See *Colic*.

Madura Foot. See *Foot, Fungus*.

Mæeia (*me-i'-ah*) [μαιεία, from μαιέυεσθαι, to act as a midwife]. An old synonym of *Obstetrics*.

Mæeleutherosis (*me-el-u-ther-o'-sis*) [μαιά, midwife; ἐλευθέρωσις, a freeing]. Delivery by the aid of a midwife. (Obs.)

Mæeuma (*me-e-u'-mah*) [μαίευμα, from μαιέυεσθαι, to act as midwife]. The newly-born babe. (Obs.)

Mæeusiomania (*me-u-se-o-ma'-ne-ah*). See *Maiusiomania*.

Mæeusiophobia (*me-u-se-o-fo'-be-ah*). See *Maiusiophobia*.

Mæeusis (*me-u'-sis*) [μαίευσις, from μαιέυεσθαι, to act as midwife]. Delivery.

Mæeuter, Mæeutes (*me-u'-ter, me-u'-tēz*) [μαιεύτηρ, μαιεύτης, from μαιέυεσθαι, to act as midwife]. An obstetrician; accoucheur. (Obs.)

Mæeutics (*me-u'-tiks*). See *Maiutics*.

Mæeutria (*me-u'-tre-ah*) [μαιεύτρια, from μαιέυεσθαι, to act as midwife]. Midwife. (Obs.)

Mæeutric (*me-u'-trik*) [μαιεύτρια, midwife]. Pertaining to a midwife. (Obs.)

Mæna (*me'-nah*) [μαίνη, a small sea-fish]. A species of herring. The brine from the salted fish has been employed as a dressing for gangrenous ulcers.

Magdala Red (*mag-da'-lah*). See *Naphthalene-red*.

Magdaleon (*mag-da'-le-on*), **Magdalia** (*mag-da'-le-ah*) [μαγδαλιά, from μάσσειν, to knead]. A bread-pill or bolus; a roll of plaster.

Magendie, Foramen of. See *Foramina, Table of.* **M.'s Solution.** See *Morphin*.

Magenta (*ma-jen'-tah*) [from a town in Italy]. A coal-tar dye; one of the forms of anilin-red; properly, a hydrochlorid of rosanilin. From it fuchsin and a large number of other dyes are prepared. One of the peculiar and somewhat glaring red tints which it produces is also called magenta. See *Fuchsin*, and *Pigments, Conspectus of.*

Maggot (*mag'-ot*) [ME., *magot*, maggot]. 1. The larva of any insect, as a fly, that burrows in wounds or ulcers. Maggots are especially annoying in military practice and in hot countries. 2. A whim or fixed idea dominant in the mind, as of an insane or paranoiac person.

Magistery (*maj-is'-ter-e*) [*magisterium*, masterpiece]. Formerly, a preparation considered to have especial virtue as a remedy. **M. of bismuth,** the subnitrate of bismuth. **M. of tin** (*M. Jovis*), precipitated stannous oxid.

Magistral (*maj'-is-tral*) [*Magister*, a master]. A term employed to denote those medicines that are prepared on prescription, in distinction from those prepared or sold without the physician's order.

Magma (*mag'-mah*) [μάγμα, mass: *pl.*, *Magmata*]. Sediment, dregs; any pulpy mass.

Magmatic (*mag-mat'-ik*), **Magmoid** (*mag'-moid*) [μάγμα, mass]. Of the nature of or resembling a magma.

Magnesia (*mag-ne'-se-ah*) [μάγνης, magnet: *gen. Magnesiæ*]. Magnesium oxid, MgO. **M. White,** magnesium carbonate. See *Magnesium*.

Magnesian (*mag-ne'-se-an*). See *Magnesic*.

Magnesic (*mag-ne'-sik*) [μαγνησία, from μάγνης, magnet]. Pertaining to or containing magnesium.

Magnesium (*mag-ne'-se-um*) [μαγνησία, magnet: *gen.*, *Magnesii*]. Mg; atomic weight 24.3; quantivalence II; spec. gravity 1.75. One of the metals of the alkaline earths, widely distributed in inorganic nature and forming also a constituent of animal and vegetable tissues. See *Elements, Table of.* The physiologic effects of its salts are antacid and laxative. Various salts are

extensively used in medicine. **M. boratis, Liquor** (B. P.), contains one part of boric acid in six. It is recommended as a paint in diphtheria. **M. carbonas,** $(Mg.CO_3)_4Mg.(HO)_2.5H_2O$. Dose gr. x–℥j. **M. carb., Liquor** (B.P.) Dose ℥j–ij. **M. citras effervescens granulatus,** a preparation dissolving in water with effervescence. **M. citras granulatus,** "granulated citrate of magnesia," combined with citric acid, sugar, sodium bicarbonate, alcohol, and water. Dose ℥ij–℥j. **M. citratis, Liq.,** contains M. carbonate gr. 200, citric acid gr. 400, syr. of citric acid gr. 1200, potassium bicarbonate gr. 30, water q. s. ad. ℥xij. Dose ℥iv–vj. **M. oxid.,** Mg.O, magnesia, the oxid of the metal, a constituent of several laxative mixtures. Dose gr. x–℥j. **Magnesia ponderosa,** heavy or calcined magnesia. Dose gr. x–℥j. **M. sulphas,** $Mg.SO_4.7H_2O$, "Epsom salt," "salts," much used as a popular purgative. Dose ℥j–℥j. **M. sulphat., Enema** (B.P.), composed of sulphate of magnesium one part, olive oil one part, starch mucilage 15 parts. **M. sulphis,** $MgSO_3.6H_2O$. Dose gr. x–xxx. **M., Trochisci,** each contains magnesia gr. iij, nutmeg, gr. $\frac{15}{100}$, sugar, tragacanth, water, q. s.

Magnet (*mag'-net*) [from *μαγνησία, Magnesia*, a district in Asia Minor, where loadstone was first found]. Loadstone, a magnetic oxid of iron. A body having the power to attract the unlike pole of another magnet, or to repel the like pole, and also to attract easily-magnetizable bodies. A body having a magnetic field. **M., Electro-,** a piece of soft iron temporarily magnetized by induction or by insertion into a helix. **M., Gruening's,** an instrument consisting of several magnetized steel rods, used for the removal of iron and steel particles from the eye. **M., Horse-shoe,** an iron magnet having the shape of a horse-shoe. **M.-operation,** the operation of removing foreign bodies of steel from the eye by the aid of a magnet. **M., Permanent,** one the magnetic properties of which are permanent, in contradistinction to **M., Temporary,** which derives its magnetism from another magnet or from a galvanic current.

Magnetic (*mag-net'-ik*) [*μάγνησιος, magnetic*]. Pertaining, or belonging, to a magnet. Possessed of magnetism. **M. Axis,** the line joining the poles of a magnet. **M. Field,** a space traversed by lines of magnetic force.

Magnetism (*mag'-net-izm*) [*μαγνής*, magnet]. The peculiar power possessed by the loadstone or natural magnet, and, under certain conditions, by other mineral substances, to attract or repel other masses. The science that treats of the nature and properties of magnets and the magnetic field. **M., Animal,** an empiric term for hypnotism. See *Somnambulism* and *Hypnotism.*

Magnetization (*mag-net-iz-a'-shun*) [*μάγνης*, magnet]. The process of rendering a substance magnetic.

Magneto-electric (*mag-net'-o-e-lek'-trik*) [*μάγνης*, magnet; *ἤλεκτρον*, amber]. Relating to magneto-electricity.

Magneto-electricity (*mag-net'-o-e-lek-tris'-it-e*) [*μάγνης*, magnet; *ἤλεκτρον*, amber.] Electricity produced by means of a magnet.

Magnetograph (*mag-net'-o-graf*) [*μάγνης*, magnet; *γράφειν*, to write]. An instrument for determining the intensity of magnetic action.

Magneto-induction (*mag-net'-o-in-duk'-shun*) [*μάγνης*, magnet; *inductio*, induction]. The production of an induced current by the insertion of a magnet within a coil of wire.

Magnetology (*mag-net-ol'-o-je*) [*μάγνης*, magnet; *λόγος*, science]. The science of magnets and magnetism.

Magnetometer (*mag-net-om'-et-er*) [*μάγνης*, magnet; *μέτρον*, a measure.] A series of magnets suspended so as to record graphically variations in direction and intensity of magnetic force.

Magneto-therapy (*mag-net'-o-ther'-ap-e*) [*μάγνης*, magnet; *θεραπεία*, treatment]. The use of the magnet in hypnotic therapeutics.

Magniductor (*mag-ne-duk'-tor*) [*magnus*, great; *ductor*, a leader]. The adductor magnus of the thigh.

Magnification (*mag-nif-ik-a'-shun*) [*magnificare*, to magnify]. In microscopy, the result obtained by dividing a linear dimension of the image by the corresponding linear dimension of the object magnified.

Magnify (*mag'-nif-i*) [*magnificare*, to magnify]. To make greater.

Magnifying (*mag'-nif-i-ing*) [*magnificare*, to magnify]. Making greater. **M. Power.** See *Magnification.*

Magnium (*mag'-ne-um*). Synonym of *Magnesium.*

Magnolia (*mag-no'-le-ah*) [after Pierre *Magnol*, a French botanist]. A genus of trees. The bark of *M. glauca*, the common swamp sassafras, and several other species of the same genus are used in medicine. Magnolia is an aromatic, bitter tonic, popular as a remedy in rheumatism and malarial fevers. Dose ℥ss-j. Unof.

Magnolin (*mag-no'-lin*) [after Pierre *Magnol*, a French botanist]. A crystalline substance found in the fruit of magnolia.

Magnum, or Os magnum [L. for "great bone"]. The largest bone in the distal row of the carpus situated between the unciform and the trapezoid bones.

Magnus's Law. See *Law.* **M.'s Method,** in obstetrics, a method of bringing down the arms of the fetus after version. When the arms are about the neck, the hand should be introduced in the ordinary method, two or three fingers being placed on the superior edge of the scapula, which is gently pressed downward. This will cause the arms to move suddenly and to come down without further help. **M.'s Sign.** See *Death.*

Máhámari (*mah-hah-mah'-re*) [E. Ind.]. Synonym of the *Plague, q.v.* See *Pali.*

Mahua (*mah'-u-ah*). See *Bassia.*

Maid, Maiden (*mād, ma'-den*) [ME., *maide, maiden*, a maid]. A young unmarried woman; a virgin. **Maidenhead,** popular expression for maidenhood; virginity; also the hymen.

Maidismus (*ma-id-iz'-mus*) [*mays, maidis*, maize]. Maize-poisoning, or pellagra.

Maieleutherosis (*ma-el-u-ther-o'-sis*) [*μαία*, midwife; *ἐλευθέρωσις*, delivery]. Delivery by the aid, or with the attendance, of a midwife.

Maieusiomania (*ma-u-se-o-ma'-ne-ah*) [*μαίευσις*, delivery; *μανία*, madness]. Puerperal insanity.

Maieusiophobia (*ma-u-se-o-fo'-be-ah*) [*μαίευσις*, childbirth; *φόβος*, fear]. Morbid dread of childbirth.

Maieutics (*ma-u'-tiks*) [*μαιεύτης*, an obstetrician; *μαιευτική*, obstetrics]. Midwifery; obstetrics.

Maignen's Compound. Powdered charcoal and lime supported on asbestos-cloth and used for filtration. It is employed in disinfecting sewage.

Mailed (*māld*) [ME., *maile*, a link]. In biology, provided with some kind of protective or defensive coat, as of scales or plates; loricate; lepidote.

Maim (*mām*) [ME., *maimen*, to mutilate]. 1. To disable by mutilation. 2. A crippling. 3. See *Mayhem.*

Main de la griffe, Main en griffe. See *Atrophy, Progressive Muscular*, and *Claw-hand.*

Maisonneuve's Bandage. See *Bandage.*

Maissiat's Band. A firm, dense portion of the fascia lata of the thigh passing down to become attached

to the outer tuberosity of the tibia; the ilio-tibial band. It helps to limit adduction of the thigh.

Maize (*māz*) [W. Ind., *mahiz*, maize]. 1. Indian corn. See *Zea mays*. 2. A coal-tar color, used in dyeing silk and wool reddish-yellow in an acid bath. It is the sodium salt of the disulphonic acid of azoxystilbene, and is called *Sun-yellow*. **M.-poisoning.** See *Pellagra*.

Maizena (*ma-ze′-nah*) [W. Ind., *mahiz*, maize]. A flour made from maize.

Maizenic Acid (*ma-zen′-ik*). See *Acid*.

Make (*māk*) [ME., *maken*, to make]. "The make," a colloquialism for designating the making of the electric current by applying the electrode to the conducting surfaces of the body. Interruption of the current is called "*the break*."

Makrantrus. See *Macrantrus*.

Makrencephalus. See *Macrencephalus*.

Makrencranus. See *Macrencranus*.

Makro- (*mak′-ro-*). See *Macro-*.

Makrodaktylia (*mak-ro-dak-til′-e-ah*). See *Macrodactylia*.

Makropsia (*mak-rop′-se-ah*). See *Megalopsia*.

Makrosomia (*mak-ro-so′-me-ah*). See *Macrosomia*.

Mal [*malum*, evil, disease]. Disease. See *Epilepsy*. **M. de mer.** See *Sea-sickness*. **M. de dent,** odontalgia.

Mala (*ma′-lah*) [L.: *pl.*, *Malæ*]. 1. The cheek-bone or prominence of the cheek. 2. Plural of *Malum*, the cheek. In biology, one of the inner lobes of the maxilla of certain coleopterous larvæ (Schrödte).

Malabar, Leprosy of. Synonym of *Elephantiasis arabum*. **M. Nut.** See *Adhatoda vasica*. **M. Ulcer.** See *Phagedæna tropica*.

Malacarne, Antrum of. See *Antrum*. **M.'s Pyramid,** the posterior extremity of the pyramid of the cerebellum.

Malachite-green. See *Pigments, Conspectus of*.

Malacia (*mal-a′-se-ah*) [μαλακία, a softening]. Any morbid softening of tissue. Also, a depraved appetite. **M., Amphiblestroid,** softening of the retina. **M. cordis.** See *Myomalacia*. **M., Halisteretic,** malacia characterized by the absorption of the lime-salts of the bones.

Malacismus (*mal-as-iz′-mus*). See *Malacia*.

Malacocataracta (*mal-ak-o-kat-ar-ak′-tah*) [μαλακός, soft; καταράκτης, cataract]. A soft cataract.

Malacogaster (*mal-ak-o-gas′-ter*) [μαλακία, a softening; γαστήρ, stomach]. Softening of the gastric walls. A synonym of *Gastromalacia*.

Malacoid (*mal′-ak-oid*) [μαλακός, soft; εἶδος, form]. In biology, applied to organisms, organs, or tissues of soft texture.

Malacology (*mal-ak-ol′-o-je*) [μαλάκια, soft-bodied animals; λέγειν, to speak]. In biology, that department of science that deals with the *Mollusca*; conchology.

Malacoma (*mal-ak-o′-mah*) [μαλακός, soft: *pl.*, *Malacomata*]. The softening of any organ or part of the body. Also, a synonym of *Molluscum sebaceum*.

Malacophonous (*mal-ak-off′-o-nus*) [μαλακός, soft; φωνή, voice]. Soft-voiced.

Malacosarcosis (*mal-ak-o-sar-ko′-sis*) [μαλακός, soft; σάρξ, flesh]. Softness of tissues, as of muscle.

Malacosis (*mal-ak-o′-sis*) [μαλακός, soft]. The condition distinguished by the abnormal softening of the tissues of any part of the body. Also, the process of malacoma. **M. cordis.** See *Myomalacia*.

Malacosomous (*mal-ak-o-so′-mus*) [μαλακός, soft; σῶμα, body]. Soft-bodied.

Malacosteon (*mal-ak-os′-te-on*). See *Osteo-malacia*.

Malacostome (*mal-ak-os′-tōm*) [μαλάκια, a kind of *mollusc*; στόμα, mouth]. In biology, the mouth of a mollusc (L. Agassiz). Cf. *Actinostome*.

Malacostomous (*mal-ak-os′-to-mus*) [μαλακός, soft; στόμα, mouth]. In biology, applied to animals having a soft or unarmed mouth.

Malacotomy (*mal-ak-ot′-o-me*) [μαλακός, soft; τομή, a cutting]. In biology, the anatomy of the mollusca; incision of the abdomen; celiotomy.

Malacozoön (*mal-ak-o-zo′-on*) [μαλακός, soft; ζῷον, animal]. A soft animal; a mollusc.

Malactic (*mal-ak′-tik*) [μαλακτικός]. Emollient; softening.

Malady (*mal′-ad-e*) [*malum*, evil]. Any illness or disease. **M., Cheyne's English,** hypochondriasis. **M., Post-boys',** aneurysm of the aorta, comparatively common among mounted mail-carriers.

Malagma (*mal-ag′-mah*) [μάλαγμα, a poultice: *pl.*, *Malagmata*]. See *Poultice*.

Malaguti's Law. See *Law*.

Malaise (*mal-āz′*) [Fr., *malaise*]. A general feeling of illness, accompanied by restlessness and discomfort; dysphoria.

Malakin (*mal′-ak-in*). The salicyl-derivative of paraphenetidin. A synthetic product allied to phenacetin, and recommended as an antirheumatic, antipyretic, and antineuralgic. It appears in the form of small, light yellow, fine needles that melt at 197.6° F., insoluble in water, but fairly soluble in hot alcohol. Dose, from 60 to 90 grains daily. Unof.

Malamid (*mal′-am-id*) [μᾶλον, an apple; *amid*], $C_4H_8O_3N_2$; a substance formed by the action of ammonia upon dry ethyl malate. It occurs in large crystals, and when heated with water it breaks up into malic acid and ammonia.

Malandria (*mal-an′-dre-ah*). See *Mallenders*.

Malar (*ma′-lar*) [*mala*, cheek]. Pertaining to the cheek-bone. **M. Bones,** the two cheek-bones. **M. Foramen.** See *Foramina, Table of*. **M. Points.** See *Craniometric Points*.

Malaria (*mal-a′-re-ah*) [It., *mala aria*, bad air]. See *Malarial Fever*. **M., Bacillus of.** See *Bacillus of Malaria*, in *Bacteria, Synonymatic Table of*. **M., Hematozoön of, M., Plasmodium of.** See *Malarial Fever* and *Polimitus malariæ*, under *Parasites (Animal), Table of*. **M., Larval,** a masked form of intermittent fever.

Malarial (*mal-a′-re-al*) [It., *mala aria*, bad air]. Pertaining to malaria. **M. Cachexia,** a chronic form of malaria characterized by anemia, general failure of health, a sallow complexion, and enlargement of the spleen. **M. Fever,** a generic name for a group of diseases associated with the presence in the blood of the *Polimitus malariæ*, and characterized by paroxysmal periodicity, enlargement of the spleen and liver, melanemia, and the presence in the blood, free or within the red corpuscles, of parasites (plasmodia) that exert a deleterious influence upon the red cells. The paroxysms may be *intermittent*, *remittent* or *irregular*. If repeated daily the fever is designated *quotidian*; if on alternate days, *tertian*; if with an interval of two days, *quartan*. If two paroxysms occur daily the fever is designated a *double quotidian*. There may be a *double tertian* form, a paroxysm occurring daily, but only those of alternate days being alike; a *double quartan* form, and others. When the paroxysms succeed one another so closely that the cold stage of one begins before the sweating-stage of its predecessor ends, the fever is designated *subintrant*. A typical malarial paroxysm consists of a *cold stage*, a *hot stage*, and a *sweating stage*, occurring in the sequence given. *Intermittent fever* is characterized by the occurrence of a complete intermission of the

symptoms in the interval between two paroxysms, the temperature becoming normal or subnormal. In *remittent fever* there is only an amelioration of the symptoms in the intervals. *Hemorrhagic malarial fever* is a grave form of malarial intoxication in which the height of the paroxysm is characterized by headache, severe pain in the back, nausea, vomiting, decided jaundice, and hemorrhages from various mucous surfaces, particularly from the kidneys. In certain localities in which the malarial organisms are exceedingly numerous or intensely virulent the attack displays a *pernicious* tendency. Of this type there may be a *cerebral* form, characterized either by delirium and excitement, or by coma and depression; a *thoracic* form, in which the respiration is accelerated and there is an urgent sense of the need of air; a *gastro-intestinal* form, attended with nausea, vomiting, jaundice, and diarrhea; or an *asthenic* or *algid* form, in which there is a condition of marked debility and a striking coldness of the surface and of the breath. To the irregular manifestations of malarial poisoning, sometimes acute, but more frequently subacute or chronic, which do not at any time present the classical association of chill, fever and sweat, the designation of "*dumb ague*" is given. The enlargement of the spleen in a case of chronic malaria or of malarial cachexia is sometimes designated "*ague cake.*" **M. Hematuria**, the presence of blood in the urine as a result of malarial poisoning. See *Malarial Fever.* **M. Neuralgia**, neuralgia due to malarial intoxication. **M. Purpura**, a purpuric eruption produced by the presence of the malarial poison in the blood. **M. Yellow Fever.** See *Hematuria, Malarial.*

Malarious (*mal-a'-re-us*). See *Malarial.*

Malaris (*ma-lar'-is*) [*mala*, cheek]. A part of the orbicularis palpebrarum muscle, taking its origin from the lower inner margin of the orbit and the adjacent portion of the nose, and inserted near the origin of the zygomaticus major.

Malassez's Disease. Cyst of the testicle. See *Diseases, Table of.*

Malassimilation (*mal-as-im-il-a'-shun*) [*malus*, bad; *assimilatio*, likeness]. A defective condition of the digestive system in which nutriment is not properly digested and absorbed.

Malate (*mal'-āt*) [*μᾶλον*, an apple]. A salt of malic acid.

Malaxation (*mal-aks-a'-shun*) [*malaxatio; malaxare*, *μαλάσσειν*, to soften]. 1. The kneading of medicine in pharmacy. 2. Massage, as of the eyeball, or of a tumor. See *Pétrissage.*

Malaxis (*mal-aks'-is*). Synonym of *Malacia.*

Malayan Idiocy. See *Idiocy, Ethnic.*

Male (*māl*) [ME., *male*, male]. The masculine sex, or that which pertains to that sex. In botany, applied to flowers with stamens, but without ovaries. **M. Blade**, the sliding blade of a lithotrite; the blade of an obstetric forceps that bears the key. **M. Fern**, the *Aspidium filix mas.* **M. Organ**, the penis. **M. Uterus**, a term that has been applied to the prostate gland. See *Reproductive Organs.*

Maleate (*mal'-e-āt*) [*μᾶλον*, apple]. A salt of maleic acid.

Maleic Acid (*mal'-e-ik*) [*μᾶλον*, apple], $C_4H_4O_4$. A dibasic acid, obtained from malic acid by distillation.

Malella (*mal-el'-ah*) [dim. of *mala*, jaw: *pl.*, *Malellæ*]. In biology, one of two movable toothed appendages of the mouth-parts of a myriapod.

Malen (*mal'-len*) [*mala*, cheek]. Belonging to the malar bone in itself.

Malformation (*mal-for-ma'-shun*) [*mal*, ill; *formatio*, a forming]. In embryology and teratology, an abnormal development or formation of the whole or parts of the fetus. Malformations, according to Hirst and Piersol, may be grouped into the following classes: 1. Those produced by variations in growth, either excessive or arrested. 2. Those produced by the defective union of component embryonic parts. 3. Those produced by cleavage (either partial or complete) of the primary embryonal cell-masses. **M., Congenital**, faulty development present at birth.

Malgaigne's Apparatus. An apparatus for correcting forward displacement of the upper fragment in fracture of the thigh. **M.'s Hernia.** See *Hernia, Congenital.* **M.'s Hooks**, an instrument for holding the parts

MALGAIGNE'S HOOKS.

of a fractured patella in apposition, for the purpose of aiding union.

Malgenic (*mal-jen'-ik*) [*malum*, evil; *γεννᾶν*, to beget]. Producing disease.

Malia (*mal'-e-ah*). Synonym of *Equinia.*

Maliasmus (*mal-e-az'-mus*). Synonym of *Glanders.*

Malic Acid (*mal'-ik*). See *Acid.*

Malice Prepense [Fr., *malice*, evil; *prepenser*, to premeditate]. In law, a premeditated determination to commit a crime.

Malign (*mal-in'*). See *Malignant.*

Malignancy (*mal-ig'-nan-se*) [*malignitas*, from *malus*, evil]. The quality of being malignant.

Malignant (*mal-ig'-nant*) [*malus*, evil]. A term applied to diseases that increase in intensity with rapidity, or that proceed to a fatal end. **M. Edema.** See *Edema.* **M. Fever.** Synonym of *Typhus Fever.* **M. Papillary Dermatitis**, or **Paget's Disease of the Nipple.** See *Dermatitis, Carcinoma*, and *Paget's Disease*, in *Diseases, Table of.* **M. Pustule.** Synonym of *Anthrax.* **M. Tumor**; in general, carcinomatous and sarcomatous growths are classed as malignant. **M. Vesicle.** Synonym of *Anthrax.*

Malignity (*mal-ig'-nit-e*). Synonym of *Malignancy.*

Malingerer (*mal-in'-jer-er*) [Fr., *malinger*]. A term applied to one who feigns illness or defect.

Malingering, Malingery (*mal-in'-jer-ing, mal-in'-jer-e*) [Fr., *malinger*]. The feigning of disease.

Malipedes (*mal-ip'-id-ēz*) [*mala*, jaw; *pes*, foot]. In biology, the fourth and fifth pair of cephalic appendages of the *Chilopoda*, among Myriapods.

Malis (*ma'-lis*) [*μᾶλις*]. A name vaguely applied to various diseases, generally of the skin, and especially to such as are due to vermin, or to parasitic worms that burrow in the skin.

Malleability (*mal-e-ab-il'-it-e*) [*malleus*, hammer]. The quality of being malleable.

Malleable (*mal'-e-a-bl*) [*malleus*, hammer]. Capable of being beaten or rolled into thin sheets; applied especially to metals.

Malleal, Mallear (*mal'-e-al, mal'-e-ar*) [*malleus*, hammer]. Relating to the malleus.

Malleation (*mal-e-a'-shun*) [*malleatio; malleus*, hammer]. A spasmodic action of the hands, consisting in continuously striking any near object. It is a symptom of chorea, and other nervous disorders.

Malledius (*mal-e'-de-us*) [*malleus*, hammer; *stapes*, stirrup]. The tensor tympani muscle.

Malleiform (*mal-e'-if-orm*) [*malleus*, hammer; *forma*, form]. Hammer-shaped.

Mallein (*mal′-e-in*) [*malleus*, farcy]. A fluid obtained from potato-cultures of the *Bacillus mallei*, the microörganism of glanders. When injected into the circulation of a glandered animal, it causes an elevation of temperature, and on account of this property it has been recommended for use in the early diagnosis of farcy or glanders.

Mallenders (*mal′-en-derz*) [*malandria*, blisters on the neck]. A kind of eczema or scab above the fore-foot, and about the knee of the horse.

Malleo-incudal (*mal′-e-o-ing′-ku-dal*) [*malleus*, hammer; *incus*, anvil]. Relating to the malleus and the incus.

Malleolar (*mal-e′-o-lar*) [*malleolus*, little hammer]. Relating to a malleolus.

Malleolus (*mal-e′-o-lus*) [dim. of *malleus*, hammer: *pl.*, *Malleoli*]. A part of a process or bone having a hammer-head shape. In biology, a layer or bent-down shoot which emits roots at the notched bend. **M., External,** a name by which the lower extremity of the fibula is known. **M., Internal,** the pyramidal process of the internal surface of the lower extremity of the tibia.

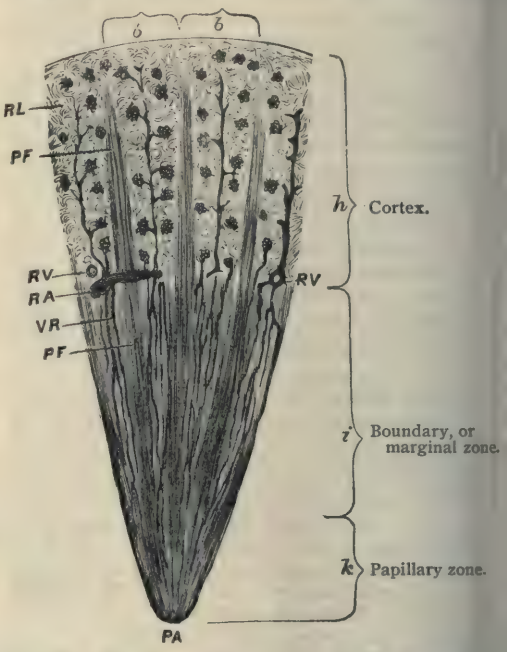
Mallet (*mal′-et*) [OF., *mallet*, a hammer]. A small wooden hammer. **M., Automatic,** an instrument operated by the action of a steel spiral spring, and used for condensing gold in filling teeth. **M., Electromagnetic,** a dental mallet operated by electricity. **M.-finger.** See *Finger*. **M., Hyde's Pneumatic,** a dental mallet with an air-pump attached, which is operated by the foot, revolving a fly-wheel and a drive-wheel. **M.-toe,** a deformity of a toe characterized by deficient extension or undue flexion of the terminal phalanx.

Auditory Ossicles. 1. Head of malleus. 2. Processus brevis. 3. Processus gracilis. 4. Manubrium. 5. Long process of incus and stapes. 7. Stapes.

Malleus (*mal′-e-us*) [*malleus*, hammer: *pl.*, *Mallei*]. 1. A bone or ossicle of the internal ear having the shape of a hammer. It is articulated with the incus, and the tensor tympani muscle arises from it. 2. Synonym of *Equinia*. 3. In biology: (*a*) One of the Weberian ossicles that form a chain between the air-bladder and the auditory apparatus in certain fishes; (*b*) One of the paired calcareous pharyngeal structures of a rotifer. **M. humidus.** Synonym of *Glanders*.

Mallory's Phospho-molybdic Acid Hematoxylin. See *Stains, Table of*.

Mallow (*mal′-o*). See *Malva*.

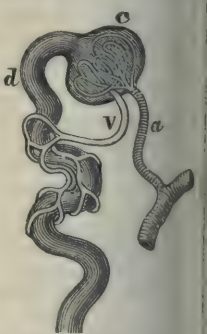


Malnutrition (*mal-nu-trish′-un*) [*malus*, bad; *nutrire*, to nourish]. Imperfect nutrition or sustenance, due to imperfect assimilation of the food.

Malo-maxillary (*ma′-lo-maks′-il-a-re*) [*mala*, cheek; *maxilla*, maxilla]. Relating to the cheek or malar bone and the maxilla.

Malonic Acid (*mal-on′-ik*). See *Acid*.

Malpighi, Acini of. The Malpighian bodies. **M., Bodies of.** See *Malpighian Bodies*. **M., Canals of,** renal organs or tubes in certain arthropods. **M., Capsule of,** the membranous envelop of a renal glomerulus. **M., Corpuscles of.** See *Malpighian Corpuscles*. **M., Follicles of.** See *Malpighian Bodies*. **M., Glomerules of,** the *Malpighian Bodies*, *q. v.* **M., Pyramids of.** See *Pyramid*. **M., Tubes or Tubules of.** See *M., Canals of*. **M., Tuft of.** See *Malpighian*. **M., White Canals of.** See *Canal*. **M., Yellow Canals of.** See *Canal*.



Malpighian Bodies (*mal-pig′-e-an*) [from *Malpighi*, an Italian anatomist]. The commencement of the uriniferous tubules, consisting of the glomerulus of vessels (the *Malpighian tuft*) and the membranous envelop

Longitudinal Section of a Malpighian Pyramid

PF. Pyramids of Ferrein. RA. Branch of renal artery. RV. Lumen of renal vein receiving interlobular vein. VR. Vasa recta. PA. Apex of a renal papilla. *b*, *b*. The bases of the renal lobules.

(the *Malpighian capsule*). **M. Corpuscles,** a name given to certain whitish, minute granules in the red substance of the spleen along the course of the blood-vessels. They are composed of lymphadenoid tissue. **M. Follicles,** the *M. bodies*. **M. Layer,** the *rete mucosum* of the skin. **M. Tuft.** See *Malpighian Bodies*. **M. Vessels,** tubular, cecal diverticula of the hind-gut of Arthropods, especially characteristic of the *Antennata;* they arise as invaginations from the ectodermal proctodeum, and vary in number and in function as excretory organs.

Malpighian Tuft.

a. Renal artery. *v*. Renal vein. *d*. Tube of Ferrein. *c*. Capsule of Müller investing the Malpighian tuft.

Malposition (*mal-po-zish′-un*) [*malus*, bad; *positio*, from *ponere*, to place]. The improper or abnormal position of any part or organ, especially of the fetus.

Malpractice (*mal-prak′-tis*) [*malus*, bad; πρᾶξις, action]. A term applied to the treatment of a disease that is contrary to that taught by experience, as the improper setting of a fracture or reduction of a dislocation; also, the unlawful production of an abortion.

Malpresentation (*mal-pre-sen-ta′-shun*) [*malus*, bad; *præsentare*, to place before]. A position of the child at birth in such form that its delivery is difficult or impossible.

Malt. Maltum (*mawlt, mawl'-tum*) [L.: *gen.*, *Malti*]. The seed of common barley, *Hordeum distichum*, germinated until the maximum amount of diastase, the ferment that converts starch into grape-sugar, is developed. It is nutritive, and valuable, also, for the diastase, which aids in the digestion of farinaceous foods. It is employed in wasting diseases, preferably mixed with milk. *Mellin's Infant Food*, *Horlick's Food*, popular preparations, consist mainly of granulated extract of malt. *Hoff's Malt Extract* contains a small percentage of alcohol. **M. Ext.**, the soluble principles of malt, mainly diastase and glucose, in a concentrated form, unfermented. Dose ʒj–iv. **M., Infus.** Dose ʒij–iv. **M. Liquors**, fermented and clarified solutions of malt that have been subjected to vinous fermentation, hops being added to prevent acetous fermentation subsequently. *Beer* is made by a comparatively slow fermentation, and contains about 2.5 per cent. of alcohol. *Ale* and *Porter* are fermented more rapidly, and contain about 4.7 per cent. of alcohol. The malt used in making porter is browned, giving the liquor a darker color. Malt liquors contain about 5 per cent. of albuminous matter, 2 of phosphates, and 1 of carbon dioxid. **M. Vinegar.** See *Vinegar*.

Malta Fever. See *Mediterranean Fever*.

Maltese Cross. A form of surgical dressing made by taking a square piece of muslin or linen and folding it upon itself twice, the first fold making it oblong, and the second square. Thus prepared, one angle will be found to consist of four layers separable from one another. Let this angle be slit down within two or three inches of the center, and then the piece opened out, when it will be seen to have the form of a Maltese cross. It is used to dress stumps.

Maltha (*mal'-thah*) [*μάλθα*, pitch]. Mineral tar, or pitch; a semi-fluid form of bitumen. In biology, a pudding-tissue containing cells (Hæckel).

Malthaxis (*mal-thaks'-is*). Synonym of *Malaxation*.

Malthobiose (*mal-tho'-be-ōs*). Same as *Maltose*.

Maltoblast (*mal'-tho-blast*) [*μαλθακός*, soft; *βλαστός*, germ]. Any cell of the kind that gives rise to elastic, adipose, connective, or other soft tissue.

Malthusianism (*mal-thu'-se-an-izm*) [*Malthus*, an English economist]. The doctrine that the increase of population is proportionately greater than the increase of subsistence.

Maltine (*mawl'-tin*) [*maltum*, malt]. A name given to various proprietary preparations of malted wheat, or barley, useful as food for invalids.

Malting (*mawl'-ting*) [*maltum*, malt]. The process in the manufacture of beer during which the grain—usually barley—is germinated, by means of steeping in water, until it swells and becomes soft. In order to remove the carbon dioxid, which interferes with germination, and to prevent an excessive rise of temperature, so-called *pneumatic* malting has been devised. Moist, heated air is passed through the germinated grain for this purpose.

Maltodextrin (*mawl-to-deks'-trin*) [*maltum*, malt; *dexter*, right], $C_6H_{10}O_5$. A carbohydrate, *q. v.*, intermediate between starch and maltose.

Maltose (*mawl'-tōs*) [*maltum*, malt], $C_{12}H_{22}O_{11} + H_2O$. A variety of sugar, formed, together with dextrin, by the action of malt diastase upon starch (in the mash of whiskey and beer). It is capable of direct fermentation. It is obtained in the form of crystalline crusts composed of hard white needles, which lose their water of crystallization at 100° C. Its properties closely resemble those of grape-sugar. See *Carbohydrates, Table of*.

Maltum (*mawl'-tum*) [L.: *gen.*, *Malti*]. See *Malt*.

Malulella (*mal-u-lel'-ah*) [double dim. of *mala*, jaw: *pl.*, *Malulellæ*]. In biology, an appendix to the second pair of jaws of a Myriapod.

Malum (*mal'-um*) [*malum*, evil]. Disease. **M. ægyptiacum**, diphtheria. **M. articulorum.** Synonym of *Rheumatism* and of *Gout*. **M. articulorum senilis.** Synonym of *Arthritis deformans*. **M. caducum**, the falling sickness, or epilepsy. **M. Cotunnii**, sciatica. **M. coxæ.** Synonym of *Hip-disease*. **M. perforans pedis**, perforating ulcer of the foot. **M. pilare**, trichiosis. **M. primarium**, a primary or idiopathic disease. **M. rustii**, a form of cervical Pott's disease described by Rust. **M. arteriarum senilis**, senile endarteritis deformans. **M. venereum.** Synonym of *Syphilis*.

Malusic Acid (*mal-u'-sik*). Synonym of *Malic Acid*.

Malva (*mal'-vah*) [L., mallow]. A genus of malvaceous plants, the true mallows; many of the species are demulcent. **M. alcea**, **M. rotundifolia**, and **M. silvestris**, are valued in domestic practice, and are safe and useful remedies in coughs, ulcerations, and diarrhea. Unof.

Malvaceous (*mal-va'-she-us*) [*malva*, mallow]. Belonging to the mallows.

Malwa Sweating-sickness. A disease of Central India resembling cholera, but characterized by profuse sweating and periodic remissions. Death is likely to follow.

Mamelon (*mam'-el-on*). See *Nipple*.

Mameluc (*mam'-el-ūk*). See *Mulatto*.

Mamma (*mam'-ah*) [*μάμμα*, the child's word for mother; *μάμμη*, breast: *gen.* and *pl.*, *Mammæ*]. The milk-secreting gland of the mother. The breast.

Mammal (*mam'-al*) [*mammalis*, from *mamma*, breast]. Having breasts; a member of the Mammalia.

Mammalgia (*mam-al'-je-ah*) [*μάμμη*, breast; *ἄλγος*, pain]. Pain in the breast or mammary organ; mastodynia.

Mammalia (*mam-a'-le-ah*) [*mamma*, breast]. A division of the class of vertebrates including all animals that suckle their young.

Mammalogy (*mam-al'-o-je*) [*mamma*, breast; *λόγος*, science]. The science of the *Mammalia*.

Mammary (*mam'-a-re*) [*mamma*, breast]. Pertaining to the mammæ. **M. Artery.** See *Arteries, Table of*. **M. Gland.** See *Gland*. **M. Triangle.** See *Triangle*.

MAMMARY GLAND.
1. Lactiferous ducts. 2. Lobuli of the mammary gland.

Mammate (*mam'-at*) [*mamma*, breast]. Having mammæ or breasts.

Mammatomy (*mam-at'-o-me*) [*μάμμη*, breast; *τομή*, a cutting]. Any surgical cutting operation performed upon the mamma.

Mammea (*mam-e'-ah*) [Haytian, *mamey*]. A genus of guttiferous tropical trees. **M. americana**, the mammee-apple, has large, edible fruits, anthelmintic seeds, antipyretic bark, a diuretic sap, and an antiparasitic gum-resin. Unof.

Mammifer (*mam'-if-er*), **Mammiferous** (*mam-if'-er-us*) [*mamma*, breast; *ferre*, to bear]. Having mammæ or milk-bearing glands.

Mammiform (*mam'-if-orm*) [*mamma*, breast; *forma*, shape]. Teat-like in form; shaped like a cone whose apex is rounded.

Mammilla (*mam-il'-ah*) [dim. of *mamma*: *pl.*, *Mammillæ*]. A small prominence or papilla. In biology, a nipple-like structure. **M. of Breast**, the nipple or teat. **M. of Kidney**, the conic-shaped apex of the kidney at the point where the urine escapes.

Mammillaplasty (*mam-il-ap-las'-te*) [*mammilla*, nipple; πλάσσειν, to mold]. A plastic operation for the purpose of elevating a depressed nipple.

Mammillaria (*mam-il-a'-re-ah*) [*mammilla*, breast]. 1. A genus of cactuses of some 360 species; the nipple-cactuses. *M. lewinii* affords the highly poisonous anhaloin, *q. v.*; other species are used as poultices when crushed. 2. See *Tuber cinereum*.

Mammillaris maligna (*mam-il-a'-ris mal-ig'-nah*). Same as *Paget's Disease of the Nipple*.

Mammillary (*mam'-il-a-re*) [*mammilla*, dim. of *mamma*, breast]. Nipple-shaped. **M. Bodies**, the corpora albicantia. **M. Process**, the mastoid process of the temporal bone. **M. Tubercle**, the metapophysis of a lumbar vertebra.

Mammillate (*mam'-il-āt*), **Mammillated** (*mam'-il-a-ted*) [*mamillatus*, from *mammilla*, dim. of *mamma*, breast]. Covered upon the surface with mammillæ or teat-like protuberances.

Mammillation (*mam-il-a'-shun*) [*mammilla*, dim. of *mamma*, breast]. A granulation, especially on some mucous surface.

Mammilloid (*mam'-il-oid*) [*mammilla*, nipple; εἶδος, like]. Nipple-shaped.

Mammitis (*mam-i'-tis*). Synonym of *Mastitis*.

Mammose (*mam-ōs'*) [*mamma*, breast]. Having full or abnormally large breasts.

Mammula (*mam'-u-lah*) [dim. of *mamma*, the breast: *pl.*, *Mammulæ*]. In biology, a term applied to such nipple-like processes as the spinnerets of spiders.

Man [ME., *man*, man]. The only genus of the order *Bimana*, class *Mammalia*. A term used generally to include the human race. It also denotes the adult male of the genus. **M., Descent of**, the theory that man has developed, by successive gradations, from lower forms of animal life. See *Darwinism*. **M.-hole**, an opening into a drain or sewer, boiler or furnace, to permit of inspection or cleaning. **M.-orchid**. See *Aceras*.

Manaca (*man'-ak-ah*) [Braz., *manacan*]. The root of *Franciscea uniflora*, known in Brazil as "vegetable mercury." It excites the lymphatic system and is in high repute as an antisyphilitic. In small doses it is a resolvent; in larger doses a purgative. Dose of the fld. ext. ɱx. Unof.

Manakin (*man'-ak-in*). See *Manikin*.

Manal (*ma'-nal*) [*manus*, the hand]. In biology, pertaining to the palmar or metacarpal region of the hand. **M. Formula**, Harrison Allen's term for the widths of the spaces in bats between the metacarpal bones at the distal ends when the wing is extended, as compared with the length of the forearm.

Manchester-brown. Same as *Phenylene-brown*. **M.-yellow**. Same as *Martius's Yellow*.

Manchineel (*man-chin-ēl'*). See *Hippomane mancinella*.

Mancinism (*man'-sin-izm*) [*mancus*, imperfect, maimed]. Left-handedness

Mancona Bark (*man-ko'-nah*). See *Casca Bark*.

Mandarin (*man'-dar-in*) [Pg., *mandarim*, a mandarin]. A coal-tar color used in dyeing. It is produced from beta-naphthol, and dyes a bright reddish-orange shade. It is also called *tropæolin*. See *Pigments, Conspectus of*. **M., Oil of**, $C_{10}H_{16}$, a fine quality of the oil of orange, derived from *Citrus nobilis*.

Mandelic Acid (*man-del'-ik*). See *Acid*.

Mandible (*man'-dib-l*), **Mandibula** (*man-dib'-u-lah*), **Mandibulum** (*man-dib'-u-lum*) [*mandere*, to chew]. A name sometimes applied to the inferior maxillary bone.

Mandibular (*man-dib'-u-lar*) [*mandere*, to chew]. Pertaining to the mandible, or lower jaw. **M. Tubercle**, a small nodule behind the angle of the mouth dependent upon an imperfection in the closure of the mandibular fissure of the face. It is often associated with other congenital anomalies, especially of the ears.

Mandibularis externus (*man-dib-u-la'-ris eks-ter'-nus*) [L.]. Synonym of the *Masseter Muscle*. See *Muscles, Table of*.

Mandibulate (*man-dib'-u-lāt*) [*mandere*, to chew]. Having a mandible.

Mandibulo-condylial (*man-dib'-u-lo-kon-dil'-e-al*) [*mandere*, to chew; κόνδυλος, a knob]. Pertaining to both mandible and condyles. **M.-c. Triangle**. See *Triangles, Table of*.

Mandibulo-coronal (*man-dib'-u-lo-kor-o'-nal*) [*mandere*, to chew; *corona*, a crown]. Pertaining to both the mandible and the coronal suture. **M.-c. Triangle**. See *Triangles, Table of*.

Mandibulo-facial (*man-dib'-u-lo-fa'-shal*) [*mandere*, to chew; *facies*, a face]. Pertaining to both mandible and face. **M.-f. Index**, in craniometry the vertical projection-measurement of the lower jaw compared with that of the face, the latter being taken as 100.

Mandibulo-gonial (*man-dib'-u-lo-go'-ne-al*) [*mandere*, to chew; γωνία, an angle]. Pertaining to both mandible and gonion. **M.-g. Triangle**. See *Triangles, Table of*.

Mandibulo-infrafacial (*man-dib'-u-lo-in'-frah-fa-shal*) [*mandere*, to chew; *infra*, beneath; *facies*, a face]. Pertaining to both the mandible and the lower portion of the face. **M.-i. Index**, the vertical projection measurement of the lower jaw compared with that of the lower face, the latter being taken as 100.

Mandibulo-maxillary (*man-dib'-u-lo-maks'-il-a-re*) [*mandibula*, mandible; *maxilla*, maxilla]. In biology, related to both the mandibles and the maxillæ.

Mandibulo-suprafacial (*man-dib-u-lo-su'-pra-fa-shal*) [*mandibula*, mandible; *supra*, above; *facies*, face]. Pertaining to both the mandible and upper portion of the face. **M.-s. Index**, the vertical projection measurement of the lower jaw compared with that of the upper face, the latter being taken as 100.

Mandragora (*man-drag'-o-rah*) [μανδραγόρας, mandrake]. The mandrake. A genus of solanaceous old world plants. **M. officinalis**, the true mandrake, has long been used as a narcotic and hypnotic. Unof.

Mandragorin (*man-drag'-o-rin*) [μανδραγόρας, mandrake], $C_{17}H_{23}NO_3$. A poisonous alkaloid from the root of *Mandragora officinalis* and *M. autumnalis*. It has nearly the same effects as atropin. Unof.

Mandrake (*man'-drāk*). See *Mandragora* and *Podophyllum*.

Mandrin (*man'-drin*) [Ger.]. The firm guide or stylet (usually of metal) which gives rigidity to a flexible catheter whilst it is being inserted.

Manducation (*man-du-ka'-shun*) [*manducatio*, chewing]. The chewing or mastication of food.

Manducatory (*man-du'-kat-or-e*) [*manducare*, to chew]. Pertaining to manducation.

Manec's Paste. A paste used in dermatology. It is composed of arsenious acid gr. 15, black sulphid o

mercury gr. 75, spongia usta gr. 35. This is made into a thick paste with a few drops of water.

Manfredi, Micrococcus of. See *Bacteria, Synonymatic Table of.*

Manganese (*man'-gan-ēz*), **Manganum** (*man-gan'-um*) [an altered form of *Magnesium: gen., Mangani.*] Mn = 54, quantivalence II, IV. A silver-white metal having the general properties of iron. See *Elements, Table of.* It is used in medicine and pharmacy in the form of oxids, sulphates, and iodid. In small doses, it is a general tonic; in large doses, a gastro-intestinal irritant. **M.-brown.** See *Pigments, Conspectus of.* **M. et ferri carbonas saccharatus.** Dose gr. v–xx. **M. et ferri iodidi, Syr.** Unof. Dose ♏x–xxx. **M.-green.** See *Pigments, Conspectus of.* **M. iodidi, Syr.,** unof., contains ʒj of the salt to each ℥j of syrup. Dose ♏x–xxx. **M. oxid. nig.,** MnO_2, "black oxid of manganese," used in the manufacture of chlorin-gas. Dose gr. ij–x. **M. sulphas,** $MnSO_4.4H_2O$, emetic and cholagogue, useful in jaundice and catarrh of the biliary passages. Dose gr. ij–v. **Potassii permanganas,** $K_2Mn_2O_8$, an excellent antiseptic and germicide, efficient as a local wash, ʒj to Oj, in diphtheria, scarlatina, etc., in carcinoma and foul ulcers, tainted breath, and the fetid odor of the feet. **P. permang., Liq.** (B. P.) Dose ʒij–iv; externally ʒj to ℥v–x of water.

Manganesium (*man-gan-ē'-ze-um*). See *Manganese.*

Mangania (*man-gan-i'-ah*) [*μαγγανεία*]. Quackery.

Manganic (*man-gan'-ik*) [see *Manganese*]. A term applied to compounds containing manganese.

Manganium (*man-gan'-e-um*). See *Manganese.*

Manganization (*man-gan-iz-a'-shun*) [*μάγγανον*, philter]. Adulteration of drugs.

Manganon (*man'-gan-on*) [*μάγγανον*, philter]. A charm, spell, or philter.

Manganous (*man'-gan-us*) [see *Manganese*]. Pertaining to those compounds that contain manganese as a bivalent element.

Mange (*mānj*) [Fr., *manger*, to eat]. The common name applied indifferently to the various forms of acariasis (*Sarcoptinitic*, or *Demodetic Scabies*) produced in mammals by several acaridian parasites. It is known as *scabbia, rogna, raspa*, in Italy; *sarna, roña*, in Spain; *itch, scald, juck, mange*, in England; *gale*, in France; *Krätze, Krätzauschlag*, in Germany. It prevails at times epizoötically, and in most varieties is transmissible to man. See *Sarcoptes scabiei*, De Geer, *Psoroptes longirostris*, Mégnin, *Chorioptes spathiferus*, Mégnin, *Demodex folliculorum*, Owen—all under *Parasites* (*Animal*), *Table of.*

Mangifera (*man-gif'-er-ah*). See *Mango.*

Mangili's Ganglion. The pedal ganglion of Mollusca.

Mangini's Reagent. A reagent for testing for alkaloids. It consists of potassium iodid 3 parts, bismuth iodid 16 parts, and HCl 3 parts.

Mangle (*mang'-gl*) [ME., *mangelen*, to mutilate]. To lacerate; to wound in a jagged or irregular manner.

Mango (*man'-go*) [Pg., *manga*, mango]. The fruit of *Mangifera indica;* the bark yields an unofficial remedy having reputed properties as an astringent and tonic to the mucous membranes. It has been recommended for catarrh of the nasal passages and for purulent discharges from the vagina, and as a wash in skin-diseases. Dose of the fluid extract, ♏x–ʒj. Unof.

Mangostin (*man'-go-stin*) [Pg., *manga*, mango]. $C_{20}H_{12}O_5$. A crystalline, bitter principle found in the shells of the fruit of *Garcinia mangostana.*

Manhood (*man'-hood*) [ME., *man*, man]. That period in which a man possesses all of his physical and generative faculties; virility.

Mania (*ma'-ne-ah*) [*μανία, μαίνεσθαι*, to rage]. A form of insanity marked by great exaggeration of nervous action. It may occur suddenly, or follow an attack of melancholia. The patient presents an infinite variety of moods, is the subject of hallucinations and illusions, often shows a tendency to destroy what he comes in contact with, and is untidy; there is a marked change in character, and decided insomnia. There is rapid and progressive emaciation. The brain is found to be in a hyperemic condition, and the disease is probably due to a loss of the inhibitory action of the highest controlling centers of the brain. Mania is most common in young adult life. Heredity is a strong predisposing cause, while mental strain, bereavements, shocks, and alcoholism may act as exciting causes. The great majority of the cases recover. **M., Acute.** See *Mania.* **M., Acute Delirious,** acute mania in which delirium is a prominent feature. **M., Alcoholic,** acute mania of alcoholic origin. It is to be distinguished from delirium tremens, although sometimes used synonymously with it. **M. a potu.** See *Delirium.* **M., Bell's,** an acute delirium running a rapidly fatal course, with slight fever, and in which post-mortem no lesions are found sufficient to account for the symptoms. There are the wildest hallucinations, insomnia, and intense excitement, followed by a condition called *typho-mania*, with elevation of temperature, dry tongue, and rapid, feeble pulse. The disease is almost always fatal, ending in from one to three weeks. Its nature is unknown. See *Diseases, Table of.* **M. brevis,** transitory mania, *q. v.* **M. of Character,** reasoning monomania. **M. concionabunda,** a form characterized by a constant desire to speak publicly. **M. crapulosa,** dipsomania. **M., Dancing,** an epidemic of choreic or convulsional movements, especially prevalent in the middle ages. **M., Epileptic,** a maniacal outburst in an epileptic; it may come on slowly. In many cases it is associated with a destructive tendency. **M. errabunda,** wandering mania, in which the patient wanders about or rushes forward regardless of obstacles. **M., Furious,** a violent form of mania; delirium furibundum. **M. hallucinatoria.** See *Insanity, Confusional.* **M., Homicidal,** one in which the individual displays a tendency to kill. **M., Hypochondriacal,** mania associated with hypochondriacal delusions. **M., Hysteric,** an outburst resembling mania occurring in an hysteric subject; it is usually associated with erotic manifestations. **M., Incendiary.** See *Pyromania.* **M., Morphin,** morphinomania, *q. v.* **M. potatorum.** Synonym of *M., Alcoholic.* **M., Preaching,** an epidemic, somewhat analogous to dancing mania, that occurred in Sweden in 1841 and 1842. Those affected, chiefly young girls, passed through a period of trance, then through a stage of violent choreiform movements, and, lastly, into a period of quiet, during which they would preach or speak. **M., Puerperal,** a form of mania or abnormal mental action sometimes following childbirth. **M., Reasoning,** simple mania, or mania with delirium—a simple exaltation of the mental faculties. **M., Religious,** mania in which the central idea is religious in character, or in which a powerful religious emotion has been the exciting cause. **M., Senile,** a maniacal outburst in old persons. **M. sine delirio,** mania without delirium. **M., Transitory.** See *Frenzy, Transitory.* **M., Typho-,** acute delirious mania associated with fever, dry, coated tongue, and other symptoms of the typhoid state. **M., Wolf.** See *Lycanthropy.*

Maniac (*ma'-ne-ak*) [*μανία*, madness]. An insane person; one affected with mania.

Maniacal (*ma-ni'-ak-al*) [*μανία*, madness]. Having

the nature of madness or insanity. **M. Chorea.** See *Chorea insaniens.* **M. Outburst,** a sudden development of mania, not uncommon in epilepsy and in general paralysis of the insane.

Maniacocomium (*ma-ne-ak-o-ko'-me-um*), **Maniacomium** (*ma-ne-ak-o'-me-um*). See *Manicocomium.*

Manica (*man'-ik-ah*) [*manus*, hand]. A protection-covering, as a sleeve or a glove. **M. Hippocratis,** Hippocrates' sleeve, a name formerly used to designate the cloth strainer of the apothecary.

Manicate (*man'-ik-āt*) [*manicatus*, sleeved]. In biology, having a felted, hairy coating that may be removed entire.

Manicocomium (*ma-nik-o-ko'-me-um*), **Manicomum** (*ma-nik'-o-mum*) [μανικός, insane; κομέειν, to care for]. An asylum for the insane.

Manicula (*ma-nik'-u-lah*) [dim. of μανία, mania]. A mild form of mania.

Maniculum (*man-ik'-u-lum*) [dim. of *manus*, hand]. The fore-foot of a mammal.

Manicure (*man'-ik-ūr*) [*manus*, the hand; *cura*, care]. The processes employed in caring for and beautifying the hand. Also, one who professionally attends to the care of the hands and nails; a chiropodist.

Maniform (*man'-if-orm*) [*manus*, hand; *forma*, form]. Hand-shaped.

Manigraph (*man'-ig-raf*) [μανία, mania; γράφειν, to write]. An alienist; one who is an expert in insanity.

Manigraphy (*man-ig'-ra-fe*) [μανία, madness; γράφη, writing]. A treatise on, or the science of, insanity.

Manihot (*man'-e-hot*) [L.]. A genus of euphorbiaceous plants. **M. aipi** and **M. utilissima** afford cassava and tapioca, *q. v.* Unof.

Manihotoxin (*man-e-ho-toks'-in*) [*manihot*, manihot; τοξικόν, poison]. A poisonous, crystalline principle from the root of *Manihot utilissima.*

Manikin (*man'-ik-in*) [OF., *manequin*, a puppet]. A model of plaster, *papier machè*, etc., designed to show the anatomy or functions of an animal or organ, especially of a human being.

Manila Hemp. See *Hemp.*

Maniluvium (*man-il-u'-ve-um*) [*manus*, hand; *lavare*, to wash]. A hand-bath; a wash or lotion for the hands.

Manioc (*man'-e-ok*) [Braz.]. The plant *Manihot utilissima.* **M., Sweet** (*Manihot aipi*), used as an esculent vegetable, like potatoes. See *Manihot.*

Manimetrum (*man-im-ēt'-rum*) [*manus*, hand; μέτρον, measure]. A hand-measure or cheirometer.

Maniple (*man'-ip-l*) [*manipulus*, from *manus*, hand]. A handful, or pugil.

Maniplies (*man-ip-liz'*). See *Manyplies.*

Manipulation (*man-ip-u-la'-shun*) [*manipulus*, a handful]. The act of doing with the hands; an operation or experiment in which the hands are particularly employed; dexterity in such acts. A method of reducing dislocations, herniæ, and of treating aneurysms; massage.

Manipulator (*man-ip'-u-la-tor*) [*manipulare*, to lead by the hand]. One who manipulates; a masseur or masseuse. **M., Amalgam,** a dental instrument for introducing amalgam fillings.

Manipulus (*man-ip'-u-lus*). See *Maniple.*

Manistupration (*man-is-tu-pra'-shun*). Synonym of *Masturbation.*

Mann's Reagent. See *Tests, Table of.*

Manna (*man'-ah*) [μάννα, manna]. The exudation of the flowering ash, *Fraxinus ornus*, and other trees. Its properties are due to mannite or manna, $C_6H_{14}O_6$, sugar, dextrin, and a resinous principle. It is a mild laxative, and may be advantageously combined with rhubarb or magnesium citrate. Dose ʒj–ij. Unof.

Manneberg, Streptococcus of. See *Bacteria, Synonymatic, Table of.*

Mannid (*man'-id*) [*μάννα*, manna], $C_6H_{10}O_4$. A syrupy substance derived from mannite by dehydration

Manniferous (*man-if'-er-us*) [*μάννα*, manna; *ferre*, to bear]. Producing manna.

Mannikin (*man'-ik-in*). See *Manikin.*

Manning's Splint. A splint used in the treatment of fracture of the patella.

Manniparous (*man-ip'-ar-us*). See *Manniferous.*

Mannitan (*man'-it-an*) [*μάννα*, manna], $C_6H_{12}O_5$. A sweet, syrupy substance produced by the action of sulphuric acid on mannite.

Mannite (*man'-it*). See *Manna* and *Mannitol.*

Mannitic Acid (*man-it'-ik*). See *Acid.*

Mannitol (*man'-it-ol*), **Mannite** (*man'-it*) [*μάννα*, manna], $C_6H_{14}O_6$. A hexahydric alcohol produced in the vinous fermentation of the different varieties of sugar. It is also obtained by extracting manna with alcohol and allowing the solution to crystallize. It forms delicate, colorless needles or rhombic prisms. It is slightly soluble in water, readily so in boiling alcohol. It possesses a very sweet taste and melts at 166° C. See *Manna.*

Mannitone (*man'-it-ōn*) [*μάννα*, manna]. A crystalline isomer of mannitan produced when mannite is heated with water in a sealed tube.

Mannitose (*man'-it-ōs*) [*μάννα*, manna], $C_6H_{12}O_6$. An amorphous substance, isomeric with levulose, but optically inactive, obtained from mannite by oxidation.

Manno-heptose (*man'-o-hep'-tōz*). See *Carbohydrates, Table of.*

Manno-monose (*man'-o-mo'-nōz*). See *Carbohydrates, Table of.*

Mannonic Acid (*man-on'-ik*). See *Acid.*

Manno-octose (*man'-o-ok'-tōz*). See *Carbohydrates, Table of.*

Mannose (*man'-ōs*) [*μάννα*, manna], $C_6H_{12}O_6$. The aldehyd of mannitol. It exists in three forms, dextro-mannose, levo-mannose, and inactive mannose. See *Carbohydrates, Table of.*

Manometer (*man-om'-et-er*) [*μανός*, rare; *μέτρον*, measure]. An instrument, in principle similar to

GAULE'S MAXIMUM AND MINIMUM MANOMETER, A, B. (The extremity A is connected with the heart, and B with the mercurial manometer.)

barometer, by which the tension of a vapor is measured. It consists essentially of a V-tube partly filled with mercury. It is also used to determine blood-pressure.

Manometric (*man-o-met'-rik*) [*μανός*, thin; *μέτρον*, measure]. Pertaining to the measurement of atmospheric pressure.

Manoscope (*man'-o-skōp*) [*μανός*, thin; *σκοπεῖν*, view]. An instrument for determining the density of air.

Manoscopy (*man-os'-ko-pe*) [*μανός*, thin; *σκοπεῖν*, view]. The estimation of the density of the air.

Mansorius (*man-so'-re-us*) [L.]. The buccinator muscle. See *Muscles, Table of.*

Manstupration (*man-stu-pra'-shun*). Synonym of *Masturbation.*

Mantle (*man'-tl*). See *Brain-mantle.*

Mantle-cell (*man'-tl-sel*). Same as *Tapetal Cell.*

Manual (*man'-u-al*) [*manus*, hand]. Pertaining to the hand. **M.-exercise Bone**, a small triangular osseous growth occasionally found in soldiers at the tendinous insertion of the left deltoid muscle. It is also called *drill-bone.* **M. Method.** See *French Method.*

Manubrial (*man-u'-bre-al*) [*manus*, hand]. Pertaining to a manubrium.

Manubrium (*man-u'-bre-um*) [L., a handle]. In biology, variously applied to handle-like or haft-like structures. **M. of Malleus**, a vertical process of bone forming the handle-shaped attachment of the malleus of the ear. **M. manus**, the radius. **M. of Sternum**, the upper piece of the sternum.

Manuduction (*man-u-duk'-shun*) [*manus*, hand; *ductio*, a leading]. The operations performed by the hands in surgical and obstetric practice.

Manuluvium (*man-u-lu'-ve-um*). Synonym of *Maniluvium.*

Manure (*man-ūr'*) [ME., *menuren*, to manage]. Dung or other substance used to fertilize soil.

Manus (*ma'-nus*) [L.]. The hand.

Manustupration (*man-u-stu-pra'-shun*). See *Masturbation.*

Manyplies (*man'-ip-līz*) [*many; ply*]. In biology, the third compartment in the complicated stomach of a ruminant. It is also called the *omasum* or *psalterium.*

Manz's Glands. Small flask-shaped depressions occasionally seen on the border of the eyelids in man, and commonly in lower animals.

Manzanita (*man-zan-ē'-tah*) [Sp., small apple]. The leaves of *Arctostaphylos glauca*, common to California; they are astringent and tonic with reference to the urinary organs. The drug resembles *Uva ursi* in properties. Dose of the fld. ext ♏xx–xxx. Unof.

Maple (*ma'-pl*) [ME., *mapel*, maple]. See *Acer.* **M.-sugar.** See *Saccharum.*

Maquer's Salt. A compound known as "super-arseniate of potassium."

Maranda (*mar-an'-dah*) [Ceylonese]. A Ceylonese tree belonging to the *Myrtaceae*, the leaves of which have been used in syphilis. Unof.

Maransis (*mar-an'-sis*). Synonym of *Marasmus.*

Maranta (*mar-an'-tah*). See *Arrowroot.*

Marantic (*mar-an'-tik*) [μαραντικός; μαραίνειν, to make lean]. Pertaining to marasmus, or to general malnutrition and prostration. **M. Clot**, a blood-clot produced by slowing of the circulation. **M. Thrombosis**, primary thrombosis of the cerebral sinuses in connection with general malnutrition.

Maraschino (*mar-as-ke'-no*) [Sp.]. A liquor made from morello cherries.

Marasmatic (*mar-az-mat'-ik*). Synonym of *Marasmic.*

Marasmic (*mar-az'-mik*) [μαρασμός, decay]. Affected with marasmus.

Marasmoid (*mar-az'-moid*) [μαρασμός, decay; εἶδος, like]. Resembling or simulating marasmus.

Marasmopyra (*mar-az-mop'-ir-ah*) [μαρασμός, wasting; πῦρ, fire]. Hectic fever.

Marasmous (*mar-az'-mus*). Synonym of *Marasmic.*

Marasmus (*mar-az'-mus*) [μαρασμός; μαραίνειν, to grow lean]. A gradual general deterioration of the mental and physical forces, with marked emaciation. As used popularly it is meant to refer to the wasting of infants. It is generally encountered in hand-raised babes, and is associated with indigestion from improper feeding, congenital syphilis, rickets, or tuberculosis. The children thus affected have a peculiar weazened or senile appearance. In the majority of cases, with proper care the child may be restored to health.

Marble-cutter's Phthisis. See *Chalicosis.*

Marc (*mark*) [Fr., dregs]. A side-product in the manufacture of wines, consisting of the stems, skins, and stones of the grapes. It is used for the purpose of making brandy by fermentation; with sheet-copper in the manufacture of verdigris; to start the fermentation in vinegar-making; as cattle-food; when dried, as fuel; or for fertilizing purposes. The refuse of olives, or of oil-seeds, after the removal of the oil, is also called marc.

Marcescent (*mar-ses'-ent*) [*marcescere*, to wither, fade, decay]. In biology, withered or shriveled.

March's Disease. Synonym of *Exophthalmic Goiter, q. v.* Also see *Diseases, Table of.*

Marchi's Solution. A solution for staining nerve-tissues. See *Stains, Table of.*

Marcid (*mar'-sid*) [*marcidus, marcere*, to wither]. 1. Shrunken; wasted. 2. Accompanied or characterized by wasting.

Marcor (*mar'-kor*). See *Marasmus.*

Mare [ME., *mare*, a horse; an incubus]. 1. The female of the horse. 2. The substance remaining after the first distillation of spirits. 3. Oppressed sleep; nightmare.

Maremmatic (*mar-em-at'-ik*) [*Maremme*, a malarious region of Italy]. Pertaining to very malarious regions, especially of Italy.

Marennin (*mar-en'-in*) [*mare*, the sea]. In biology, Lankester's name for the green coloring-principle absorbed by oysters from diatoms (*Navicula ostrearia*) in the process of greening.

Mareo (*mar'-e-o*) [Span.]. Mountain sickness. A malady characterized by nausea and violent headache, occasionally overcoming persons who ascend to high altitudes.

Margaric Acid (*mar-gar'-ik*). See *Acids, Table of Fatty.*

Margarin (*mar'-gar-in*) [μάργαρος, the pearl-oyster]. 1. A mixture of olein and palmatin. 2. An artificial substitute for butter.

Margarinic Acid (*mar-gar-in'-ik*). See *Acid, Margaric.*

Margaritoma (*mar-gar-it-o'-mah*) [μάργαρος, the pearl-oyster; ὄμα, a tumor]. Virchow's term for a true primary cholesteatoma-formation in the auditory canal.

Margarone (*mar'-gar-ōn*). See *Palmitone.*

Margarous Acid (*mar'-gar-us*). A synonym of *Acid, Stearic.*

Marginal (*mar'-jin-al*) [*marginalis*, from *margo*, margin]. Pertaining to the margin or border. **M. Convolution.** See *Convolutions, Table of.* **M. Lobe.** See *Lobe.*

Marginate (*mar'-jin-āt*) [*marginare*, to furnish with a border]. In biology, applied to structures in which the margin is peculiarly distinct.

Marginoplasty (*mar-jin'-o-plas-te*) [*margo*, margin; πλάσσειν, to shape]. Plastic surgery of the marginal portion of the eyelid.

Margosin (*mar'-go-sin*) [μάργαρος, the pearl-oyster]. A bitter alkaloid obtained from *Azadirachta indica.*

Maricolous (*mar-ik'-o-lus*) [*mare*, the sea; *colere*, to dwell]. In biology, applied to animals or plants inhabiting the sea; pelagic.

Marie's Disease. Akromegaly. See *Akromegaly*, and *Diseases, Table of.*

Marigold (*mar'-ig-ōld*). See *Calendula.*

Marine-blue. See *Pigments, Conspectus of.*

Mariotte's Experiment. A device for demonstrating the existence of the blind-spot of the eye, consisting in placing a spot upon a paper at such an angle with the visual axis that the image falls upon the papilla. **M.'s Blind-spot, M.'s Spot**, the point of entrance of the optic nerve into the fundus of the eye. **M.'s Law.** See *Law.*

Mariscous (*mar-is'-kus*) [*marisca*, hemorrhoid]. Pertaining to hemorrhoids.

Marito-nucleus (*mar-it-o-nu'-kle-us*) [*maritus*, married; *nucleus*, a little nut]. The nucleus of the ovum after its union with the male pronucleus.

Marjolin's Warty Ulcer. An ulcer resulting from the breaking down of warty cicatricial tissue. It is of slow progress, and finally gives rise to glandular enlargement. See *Diseases, Table of.*

Marjoram (*mar'-jo-ram*). See *Origanum.*

Mark [ME., *mark*, a mark]. Birth-mark, or mother's mark; nevus. **M., Portwine.** See *Nevus.*

Marl [ME., *marl*, marl]. A clay rich in calcium carbonate.

Marmalade, Marmelade (*mar'-mal-ād*) [Port., *marmello*, a quince]. A conserve prepared from the quince, orange, plum, peach, or other fruit, which is sliced and preserved in a saturated syrup.

Marmé's Reagent. See *Tests, Table of.*

Marmorate (*mar'-mo-rāt*) [*marmor*, marble]. In biology, traversed with vein-like markings like those of certain kinds of marble.

Maroon (*mar-oon'*). See *Pigments, Conspectus of.* **M.-oxid.** Same as *Purple-brown.*

Marriageable (*măr'-āj-a-bl*) [ME., *mariage*, marriage; *maritus*, a husband]. Of an age when marriage may be legally performed.

Marriot, Dry Vomit of. An emetic preparation consisting of equal parts of sulphate of copper and tartar emetic.

Marrow (*măr'-o*) [ME., *marow*, marrow]. A substance composed of water, fat, and albuminous matter, existing in the cavities of many of the long bones. **M.-cell**, a cell resembling a white blood-corpuscle, but larger and with a clearer protoplasm and a larger nucleus, and showing ameboid movement. It is found in the marrow of bones. **M., Fetal**, the juicy, red marrow filling the cavities of the fetal endochondral bones. **M., Red**, the reddish marrow, quite free from fat, contained near the articular extremities of long bones. **M., Spinal**, the spinal cord. **M., Yellow**, the fatty marrow of the shafts of long bones.

Marrubiin (*mar-u'-be-in*) [*marrubium*, horehound]. The crystalline, neutral, bitter substance found in *Horehound.*

Marrubium (*mar-u'-be-um*) [L.]. Horehound. The leaves and tops of *M. vulgare.* They contain a bitter principle and a volatile oil. In small doses horehound is a mild stomachic tonic; in larger doses a laxative. It exerts a soothing effect in catarrh of the nasal passages, and is therefore an ingredient of various cough-mixtures. Dose ʒss–j. Unof.

Mars (*marz*) [L., the war-god]. An old synonym for iron. See *Ferrum.* **M.-brown.** See *Pigments, Conspectus of.* **M.-red.** Same as *Ocher.* **M.-violet.** Same as *Mineral-purple.*

Marsala (*mahr-sa'-lah*) [Ital.]. An Italian wine containing 20 per cent. of alcohol.

Marsden's Mucilage or Paste. A caustic paste consisting of one part of white arsenic to two of gum-arabic.

Marsdenia (*marz-de'-ne-ah*) [after William *Marsden*, a British orientalist]. A genus of asclepiadaceous plants of which several species yield indigo. **M. condurango.** See *Condurango.* **M. erecta**, a poisonous species from Europe and Asia Minor. Taken internally it produces violent convulsions and death, and applied externally it blisters the skin.

Marsdenin (*marz-den'-in*) [after William *Marsden*, a British orientalist]. A bitter crystalline extractive from *Marsdenia erecta.*

Marsh [ME., *mersh*, a marsh]. A swamp or bog. **M.-fever.** See *Malaria.* **M.-gas**, Methyl Hydrid, Fire-damp, Methane; a hydrocarbon having the composition CH_4. It occurs in swamps as a product of the decomposition of vegetable tissue. It constitutes a large proportion of common illuminating-gas. **M.-miasm.** See *Malaria.* **M. Rosemary**, the root of *Statice caroliniana*, a bitter astringent, resembling kino in therapeutic properties. It is a popular New England remedy for cancrum oris and for aphthous affections of the mouth. Dose of the fld. ext. ʒss–j. **M. Trefoil.** See *Menyanthes trifoliata.* **M.-mallow.** See *Althæa.* **M.-marigold.** See *Caltha.* Unof.

Marsh's Test. See *Tests, Table of.*

Marshall's Cerate. A cerate composed of calomel ʒj, lead acetate ʒss, palm oil ʒvj, ointment of nitrate of mercury ʒij. **M., Vein of.** See *Vein.* **M.'s Vestigial Fold**, a crescentic fold of serous membrane of the pericardium containing the remains of the left superior vena cava.

Marson's Theory. A theory that claims that the degree and duration of vaccinal protection are proportionate to the perfection of the vaccine lesions and to the number of insertions made.

Marsupial (*mar-su'-pe-al*) [*μάρσυπος*, a pouch]. Pouched. In zoölogy, a mammal of the order *Marsupialia.* See *Marsupium* and *Mastotheca.* **M. Incisura** (*Incisura marsupialis*), the deep posterior notch between the two halves of the cerebellum, occupied by the falx cerebri.

Marsupiate (*mar-su'-pe-āt*). See *Marsupial*

Marsupium (*mar-su'-pe-um*) [*μάρσυπος*, a pouch, bag]. In biology, the fold of abdominal integument, or "pouch," that serves to support and protect the young of those mammals belonging to the sub-class *Metatheria* or *Didelphia*; a *Mastotheca*, *q. v.*

Marteno (*mar'-te-no*). Incorrect form of *Martynia*, *q. v.*

Martial (*mar'-shal*) [*martialis*, cf. *mars*, iron]. Ferruginous or chalybeate; containing iron.

Martin's Bandages. Long India-rubber bandages, from 5 to 21 feet in length, used in the treatment of chronic ulcers, varicose veins, and joint-disease. **M.'s Depilatory**, a preparation made by passing H_2S through a mixture of slaked lime two parts and water three parts. **M.'s Hemostatic**, surgeon's agaric saturated with ferric chlorid. **M.'s Operation.** See *Operations, Table of.*

Martindale's Mixture. See *Anesthetic.*

Martineau's Formula. A formula used in the treatment of syphilis, constituted as follows: Bichlorid of mercury 2½ drams, peptone ½ ounce, chlorid of ammonium ½ ounce. Fifteen grains of this preparation contain nearly four grains of sublimate. It was diluted with water alone or with a mixture of water and glycerin, and was injected in doses of from ¼ of a grain upward. It is not much used now. **M.'s Treatment.** See *Treatment, Methods of.*

Martius's Yellow. See *Pigments, Conspectus of.*

Martynia (*mar-tin'-e-ah*) [after John *Martyn*, an American botanist]. A genus of dicotyledonous gamopetalous plants. **M. proboscidea**, unicorn plant, employed as a mucilaginous drink in bladder-trouble.

Maruta (*ma-ru'-tah*) [L.]. A genus of composite-flowered herbs. **M. cotula**, mayweed, or dog-fennel, is an ill-scented weed common in Europe and North America. It is antipyretic and insecticide, is a vesicant of some power, and is said to be a good application to bruises and swellings. Unof.

Mas, Masc (*mas*, *mask*) [L. abbrev. of *masculus*, the male, or *masculinus*, masculine]. 1. In biology, employed to designate a male plant or animal. Its symbol is usually ♂. In old usage it was frequently employed in a fanciful way as the specific name of

plants. See *Aspidium filix mas*. 2. The center-pin of a trephine.

Mascarpio (*mas-kahr'-pe-o*) [*mas*, male; *carpere*, to pluck]. A masturbator.

Maschaladenitis (*mas-kal-ad-en-i'-tis*) [μασχάλη, axilla; ἀδήν, gland; ιτις, inflammation]. Inflammation of the glands of the axilla.

Maschaleous (*mas-kal'-e-us*) [μασχάλη, axilla]. Pertaining to the axilla.

Maschaliatria (*mas-kal-e-a'-tre-ah*) [μασχάλη, axilla; ἰατρεία, treatment]. Treatment by inunctions in the axilla.

Maschalister (*mas-kal'-is-ter*) [μασχαλιστήρ, girth, girdle]. The second cervical vertebra, the axis.

Maschaloncus (*mas-kal-ong'-kus*) [μασχάλη, axilla; ὄγκος, tumor]. An axillary tumor.

Maschalopanus (*mas-kal-op'-an-us*). Synonym of *Maschalaneus*.

Maschalyperidrosis (*mas-kal-ip-er-id-ro'-sis*) [μασχάλη, axilla; ὑπέρ, over; ἱδρωσις, sweating]. Excessive sweating in the armpits.

Masculine (*mas'-ku-lin*), **Masculous** (*mas'-ku-lus*) [dim. of *mas*, a male]. Of the male sex.

Masesis (*mas-e'-sis*). Synonym of *Mastication*.

Maseter (*mas'-e-ter*). Synonym of *Masseter*. See *Muscles, Table of*.

Mash [ME., *masche*, mash]. A mixture of malt and water prepared in breweries and distilleries for making beers and spirits. Also, the mixture of grains used in feeding animals.

Mask (*mask*) [Fr., *masque*, a mask]. 1. In biology, a mask-like formation or coloration of the head; a hood or capistrum. 2. In surgery, a bandage applied to the face in case of erysipelas and extensive burns or scalds. 3. Synonym of *Chloasma*. **M., Death**, a cast of the face of a dead person made by covering it with plaster-of-Paris or similar material, which is removed when hard. **M. of Pregnant Women**, the chloasma of pregnancy.

Masked (*maskt*) [Fr., *masque*, a mask]. Covered with a mask; concealed. In biology, applied to insects in the larval state, especially such as indicate by lines on the surface the future wings, legs, and other parts of the imago. In botany, the same as *Personate*. **M. Disease**, one that is concealed by concomitant symptoms. **M. Epilepsy**. See *Epilepsy*. **M. Malaria**. See *Dumb Ague* and *Malarial Fever*. **M. Reaction**, in chemistry, one that is concealed by a concurrent reaction.

Masochism (*mas'-o-kism*) [from Sacher-*Masoch*, an Austrian novelist]. Sexual perversion in which the pervert takes delight in being subjected to degrading, humiliating, or cruel acts on the part of his or her associate. It is the opposite of Sadism. The victims of this perversion experience peculiar pleasure at the sight of a rival who has obtained the favor of their mistress, and will even receive blows and lashes from the rival with a voluptuous mixture of pain and pleasure. Masochism corresponds to the Passivism of Stefanowski.

Masochist (*mas'-o-kist*) [*Masoch*, from Sacher-*Masoch*, an Austrian novelist]. One addicted to masochism.

Masochistic (*mas-o-kis'-tik*) [Sacher-*Masoch*, an Austrian novelist]. Relating to masochism.

Mason's Lung. A synonym of *Pneumonokoniosis*. **M.'s Method.** See *Treatment, Methods of*.

Masque (*mask*) [Fr.]. Reaumur's name for a grayish-brown, rounded part of the sexual apparatus of the drone-bee. It is thickly set with short spines having curved points. Also see *Mask*.

Masrite (*mas'-rit*). See *Masrium*.

Masrium (*mas'-re-um*) [Arab., *masr*, Egypt.]. A metal described as a new element, found in Egypt in a mineral first called "Johnsonite," but later masrite. The mineral, *masrite*, has the formula $(Al,Fe)_2O_3.(MsMnCoFe)O.4SO_3.20H_2O$. See *Elements, Table of*. Masrium has an atomic weight of 228. The sulphate, is a white salt, crystallizing poorly from water, but readily from a fifty per cent. alcoholic solution. The reactions of a soluble salt of masrium resemble those of zinc. The free metal has not been obtained; neither has its vapor-density been determined, or spectroscopic examination made.

Mass (*mas*) [*massa*, a mass]. Any aggregation of matter. **M., Blue**. See *Hydrargyrum*. **M., Intermediate Cell**, that part of the embryo from which the mesonephros is developed. **M., Investing**, the tissue that in early embryonic development surrounds the cranial portion of the notochord, and later is transformed into the parachordal cartilages. **M., Vallet's**, massa ferri carbonatis. See *Ferrum*.

Massa (*mas'-ah*) [L.]. A mass. In pharmacy, a medicinal substance together with an excipient that gives it the adhesive, plastic quality necessary to form a pill. There are three official *massæ*.

Massage (*mas-ahzh'*) [Fr., from μάσσειν, to knead]. A method of effecting changes in the local and general nutrition, action, and other functions of the body, by rubbing, kneading, and other manipulation of the superficial parts of the body by the hand or an instrument. A male operator is called a *masseur*, a female operator, a *masseuse*. **M., Friction**, superficial rubbing. **M. Method of Treating Lacrymal Stenosis.** See *Gould's Method*, under *Treatment, Methods of*.

Massering (*mas-er'-ring*) [Fr., from μάσσειν, to knead]. The performance of massage.

Massesis (*mas-e'-sis*). Synonym of *Mastication*.

Masset's Test. See *Tests, Table of*.

Masseter (*mas-e'-ter*) [μασητήρ, chewer]. See *Muscle*.

Masseteric (*mas-et-er'-ik*) [μασητήρ, chewer]. Masseterine; pertaining to the masseter muscle.

Masseterine (*mas-et'-er-en*) [μασητήρ, chewer]. Pertaining to the masseter muscle.

Masseur (*mas-ur'*) [Fr.]. A man who practises massage.

Masseuse (*mas-u(r)z'*) [Fr.]. A woman who practises massage.

Massicot (*mas'-ik-ot*) [Fr.]. PbO. Yellow protoxid of lead; litharge.

Massotherapeutics, Massotherapy (*mas-o-ther-ap-u'-tiks, mas-o-ther'-ap-e*) [μάσσειν, to knead; θεραπίνειν, to treat]. The treatment of disease by means of massage.

Massoy Bark (*mas-oi' bark*). 1. The bark of *Cinnamomum kiamis*, of the E. Indies; aromatic and antidysenteric; it affords the volatile *oil of massoy*. 2. The bark of *Massoia aromatica*, a tree of New Guinea.

Massula (*mas'-su-lah*) [L., dim. of *massa*, a lump or mass: *pl.*, *Massulæ*]. In biology: (*a*) an adherent group of pollen-grains produced by a single mother-cell. (*b*) One of the two or more spheric masses containing microspores, and derived from the mucilage of the microsporangia of Azolla. These masses are sometimes covered with barbed hair-like appendages, called *glochids*.

Mast-cells. Cells filled with basophile granules, found in the connective tissue and in foci of chronic inflammation.

Mastaden (*mas'-ta-den*) [μαστός, breast; ἀδήν, gland]. The mammary gland.

Mastadenitis (*mas-tad-en-i'-tis*) [μαστός, breast; ἀδήν, gland; ιτις, inflammation]. Inflammation of the mammary gland.

Mastalgia (*mas-tal'-je-ah*) [μαστός, breast; ἄλγος, pain]. Any pain in the breast.

Mastatrophia (*mast-at-ro'-fe-ah*) [*μαστός*, breast; *ατροφία*, atrophy]. Atrophy of the breast.

Mastauxe (*mas-tawks'-e*) [*μαστός*, breast; *αὐξη*, growth]. Increase in size, or excessive size, of the mammary apparatus.

Mastax (*mas'-taks*) [*μάσταξ*, the mouth]. In biology, the muscular pharynx, containing the masticatory apparatus of a rotifer or wheel-animalcule.

Mastecchymosis (*mast-ek-im-o'-sis*) [*μαστός*, breast; *ἐγχύμωσις*, ecchymosis]. Ecchymosis of the breast.

Mastelcosis (*mast-el-ko'-sis*) [*μαστός*, breast; *ἕλκωσις*, ulceration]. Synonym of *Masthelcosis*.

Master Tissues. A term applied to the muscular and nervous tissues of the body.

Masterwort (*mas'-ter-wert*). Cow Parsnip. The root of *Heracleum lanatum*, a stimulant, carminative, and antispasmodic. Dose of the fld. ext. ʒj–ij. Unof. See also *Imperatoria*.

Masthelcosis (*mas-thel-ko'-sis*) [*μαστός*, breast; *ἕλκωσις*, ulceration]. Ulceration of the breast.

Mastic (*mas'-tik*) [*mastiche; μαστίχη*, mastic]. The resin flowing from the incised bark of the *Pistacia lentiscus*. It occurs in pale, yellowish, transparent tears, that are brittle, with conchoidal fracture and balsamic odor, and soften between the teeth. It is soluble in alcohol, oil of turpentine, and acetone. It is used in varnish-making, and in dentistry as a temporary filling for teeth that have been prepared for their permanent filling. Internally its action is similar to that of the resin of turpentine. Dose gr. xx–xl.

Mastication (*mas-tik-a'-shun*) [*mastĭcare*, to chew]. The process of chewing and of insalivation.

Masticatory (*mas'-tik-at-o-re*) [*masticare*, to chew]. A term applied to remedies or agents designed to be masticated or chewed; also to agents increasing the flow of saliva. **M. Spasm**, spasm from irritation of the peripheral or of the central tract of the motor portion of the fifth nerve.

Mastiche (*mas'-ti-ke*). See *Mastic*.

Masticot (*mas'-tik-ot*). Synonym of *Massicot*.

Mastigium (*mas-tij'-e-um*) [*μάστιξ*, a whip: *pl.*, *Mastigia*]. In biology, one of the organs provided with defensive lashes, placed on the posterior extremity of certain lepidopterous larvæ.

Mastigobranchia (*mas-tig-o-brang'-ke-ah*) [*μάστιξ*, whip; *βράγχια*, gills]. In biology, the branchial lash of a crustacean. It is synonymous with the *epipodite* and *epignathite* of Milne-Edwards, and sometimes with part of the *podobranchite* of Huxley and with the *apodemata* of MacCoy, and the flabellum of old authors. (Bate.)

Mastigophoric (*mas-tig-o-for'-ik*) [*μάστιξ*, whip; *φόρος*, bear]. Same as *Mastigophorous*.

Mastigophorous (*mas-tig-off'-o-rus*) [*μαστιγοφόρος*, bearing a whip]. In biology, flagellate, as certain infusoria or zoöspores.

Mastigopod (*mas-tig'-o-pod*) [*μάστιξ*, a whip; *πούς* (*ποδ*), foot]. In biology, applied to the ciliated or flagellate stage in the development of certain organisms, as the myxomycetes.

Mastigosis (*mas-tig-o'-sis*) [*μαστίγωσις*, from *μαστιγοῦν*, to whip]. Flagellation as a therapeutic measure.

Mastilin (*mas'-til-in*) [*μαστίχη*, mastic]. The resin found in mastic.

Mastitis (*mas-ti'-tis*) [*μαστός*, breast; *ιτις*, inflammation]. Inflammation of the breast. **M. neonatorum**, mastitis of infants. **M., Parenchymatous**, inflammation of the proper glandular substance of the breast. **M., Retromammary, M., Submammary**, or Paramastitis, inflammation of the connective tissue between the gland and the thorax. **M., Supra-mammary**, inflammation of the superficial connective tissue of the breast.

Mastix (*mas'-tiks*). Synonym of *Mastic*.

Masto-carcinoma (*mas-to-kar-sin-o'-mah*) [*μαστός*, breast; *καρκίνωμα*, carcinoma]. Mammary carcinoma.

Masto-chondrosis (*mas-to-kon-dro'-sis*) [*μαστός*, breast; *χόνδρος*, cartilage]. A chondromatous tumor of the mamma.

Mastodealgia (*mas-to-de-al'-je-ah*) [*μαστώδης*, mastoid; *ἄλγος*, pain]. Pain in the mastoid process.

Mastodeocentesis (*mas-to-de-o-sen-te'-sis*) [*μαστώδης*, mastoid; *κέντησις*, a thrust]. Surgical perforation of the mastoid process.

Mastodeo-paracentesis (*mas-to-de-o-par-as-en-te'-sis*). Synonym of *Mastodeocentesis*.

Mastodynia (*mas-to-din'-e-ah*) [*μαστός*, breast; *ὀδύνη*, pain]. Pain in the breast.

Mastoid (*mas'-toid*) [*μαστός*, breast; *εἶδος*, like]. Having the shape of the breast; a descriptive term applied to a process and to a foramen of the temporal bone, and to other parts. **M. Abscess**, an abscess of the mastoid cells. **M. Angle**, the postero-inferior angle of the parietal bone. **M. Antrum**, a cavity in the mastoid portion of the temporal bone. **M. Cells**, the cells or hollow spaces exhibited in the structure of the mastoid process. **M. Disease**, inflammation and suppuration of the mastoid cells. **M. Foramen.** See *Foramina, Table of*. **M. Fossa.** See *Fossa*. **M. Process**, the protruding part of the temporal bone felt behind the ear.

Mastoidal (*mas-toi'-dal*), **Mastoideal** (*mas-toi-de'-al*), **Mastoidean** (*mas-toi-de'-an*) [*μαστός*, breast; *εἶδος*, like]. Pertaining to the mastoid process.

Mastoidealgia (*mas-toi-de-al'-je-ah*) [*μαστός*, breast; *ἄλγος*, pain]. Synonym of *Mastodealgia*.

Mastoideocentesis (*mas-toi-de-o-sen-te'-sis*). See *Mastodeocentesis*.

Mastoideus (*mas-toi-de'-us*) [*μαστός*, breast; *εἶδος*, like]. A muscle attached to the mastoid process. See *Muscles, Table of*.

Mastoiditis (*mas-toid-i'-tis*) [*μαστός*, breast; *εἶδος*, like; *ιτις*, inflammation]. 1. Inflammation of the mastoid cells, and of their lining mucous membrane. 2. Inflammation of the periosteum of the mastoid process.

Mastology (*mas-tol'-o-je*) [*μαστός*, breast; *λόγος*, treatise]. A treatise on the mammary apparatus, its anatomy and diseases.

Mastomenia (*mas-to-me'-ne-ah*) [*μαστός*, breast; *μήν*, month]. Vicarious menstruation from the breast.

Mastoncus (*mas-tong'-kus*) [*μαστός*, breast; *ὄγκος*, tumor]. Any tumor of the mammary gland or nipple.

Masto-occipital (*mas'-to-ok-sip'-it-al*) [*μαστός*, breast; *occiput*, occiput]. Pertaining to the mastoid process and the occipital bone.

Masto-parietal (*mas'-to-par-i'-et-al*) [*μαστός*, breast; *paries*, wall]. Pertaining to the mastoid process and the parietal bone.

Mastopathy (*mas-top'-ath-e*) [*μαστός*, breast; *πάθος*, disease]. Any disease or pain of the mammary apparatus.

Mastorrhagia (*mas-tor-a'-je-ah*) [*μαστός*, breast; *ῥήγνυναι*, to break forth]. Hemorrhage from the breast.

Masto-scirrhus (*mas-to-skir'-us*) [*μαστός*, breast; *σκιρρός*, hard]. Scirrhous carcinoma of the mamma.

Mastospargosis (*mas-to-spar-go'-sis*) [*μαστός*, breast; *σπάργωσις*, swelling]. Enlargement or swelling of a mamma, especially that due to excess of milk.

Mastosyrinx (*mas-to-si'-rinks*) [*μαστός*, breast; *σῦριγξ*, pipe]. A mammary fistula.

Mastotheca (*mas-to-the'-kah*) [*μαστός*, the breast; *θήκη*, a receptacle: *pl.*, *Mastothecæ*]. In biology, a pouch in which the nipples of the mammary glands are situated, as in the *Marsupialia*, whose young are born

in an exceedingly rudimentary condition, and are never nourished by means of an allantoic placenta, but are transferred to the nipple of the mother, to which they remain firmly attached for a considerable time and are nourished, the milk being injected into the mouth by compression of the muscle covering the mammary gland. Cf. *Marsupium*.

Mastous (*mas'-tus*) [μαστός, breast]. Having large mammæ.

Mastozoön (*mas-to-zo'-on*) [μαστός, breast; ξῷον, animal]. A mammal.

Mastupration (*mas-tu-pra'-shun*). Synonym of *Masturbation*.

Masturbation (*mas-ter-ba'-shun*) [*masturbari*, to pollute one's self; *manus*, the hand; *stuprare*, to ravish]. Production of the venereal orgasm by the hand; secret vice.

Masturbational, Masturbatory (*mas-ter-ba'-shun-al, mas-ter-ba'-tor-e*) [*masturbari*, to pollute one's self]. Pertaining to masturbation.

Masuri (*mas-u'-re*) [Ind.]. The name commonly given in India to a parasite of the horse, *Amphistoma collinsii*. See *Parasites* (*Animal*), *Table of*.

Matchmaker's Disease. See *Phosphorus-necrosis*.

Matè (*mah'-ta*) [Sp., *mate*, a vessel]. Paraguay Tea. The leaves of *Ilex paraguayensis*, an infusion of which is used in South America as a substitute for tea and coffee. Its properties are due to *caffein*.

Mater (*mah'-ter*). See *Dura Mater* and *Pia Mater*.

Materia (*mat-e'-re-ah*) [L.]. Matter. **M. chirurgica,** the instruments, appliances, and general outfit of a surgeon. **M. medica,** the science that treats of drugs; the things used in medicine.

Material (*mat-e'-re-al*) [*materia*, matter]. Pertaining to matter; also, the substance of which anything consists.

Materialism (*mat-e'-re-al-izm*). See *Spiritualism*.

Materies morbi (*mat-e'-re-ēz mor'-bi*) [L., "matter of disease]. 1. That material which is essential to the existence of a disease considered as an entity. 2. A material that is the immediate cause of a disease or of an illness.

Maternal (*mat-ur'-nal*) [*mater*, mother]. Pertaining to the mother. **M. Impressions.** See *Impressions*.

Maternity (*mat-ur'-nit-e*) [*mater*, mother]. 1. Motherhood. 2. [Fr., *maternité*.] A lying-in hospital.

Matica (*mat-e'-kah*). See *Matico*.

Maticin (*mat'-is-in*) [Sp., *matico*]. A bitter principle that exists in matico.

Matico (*mat-e'-ko*) [Sp.]. The leaves of *Artanthe elongata*, an aromatic tonic, stimulant, and aphrodisiac. It is valuable in catarrhal diseases of the mucous membranes; the leaves are efficacious as a hemostatic agent. Dose of the fld. ext. ʒss–ij; of a 10 per cent. tinct. ʒss–ij. **M., Infus.** (B. P.) Dose ʒj–iv.

Matrass (*mat'-ras*) [Fr., *matras*, a chemic vessel]. A urinal.

Matricaria (*mat-rik-a'-re-ah*) [*matrix*, womb]. German Chamomile; the flower-tops of *M. chamomila*. Matricaria contains a volatile oil and a bitter extractive principle, and is a mild tonic, and in large doses emetic and antispasmodic. It is a popular domestic remedy among the Germans, and is the chamomilla of the homeopathic pharmacopeia. Dose, of the infusion, indefinite.

Matriculate (*mat-rik'-u-lāt*) [*matricula*, a register]. To receive admission and to enroll one's self as a member of a college.

Matricyte (*ma'-tris-īt*) [μάτηρ, mother; κύτος, cell]. A mother-cell.

Matrix (*ma'-triks*) [L., a mold in which anything is cast]. 1. A mold; the cavity in which anything is formed. 2. That part or tissue into which any organ or process is set, as the matrix of a tooth or of a nail; the intercellular substance. 3. In dentistry, a piece of steel or other metal of suitable form, used in filling proximal cavities. 4. The uterus.

Matrixitis (*ma-triks-i'-tis*). Same as *Onychia*.

Matron (*ma'-tron*) [*matrona*, a matron]. The principal female nurse or housekeeper of a hospital.

Matted (*mat'-ed*) [ME., *matte*, a mat]. Closely adherent; applied to tissues or structures that have been bound together by inflammatory exudate.

Matter (*mat'-er*) [*materies; materia*, matter]. The substance, or stuff, of which anything is made; the term is used as the name of certain tissues (as white matter, gray matter); also of certain morbid products (*e.g.*, cheesy matter). Pus is colloquially designated as *matter*. **M., Cheesy,** the peculiar yellow cheese-like material, found in scrofulous and tuberculous glands, tissues, and other structures. **M., Gray** (of *Sömmering*). The locus niger of the crus cerebri.

Matteuci's Muscular Pile. See *Pile*.

Mattoid (*mat'-oid*) [*mattus*, drunk; εἶδος, like]. A person half-crazed; a crank, or paranoiac.

Maturant (*mat'-u-rant*) [*maturare*, to ripen]. 1. Ripening; hastening the process of maturation. 2. Any agent that promotes suppuration or maturation.

Maturation (*mat-u-ra'-shun*) [*maturatio; maturare*, to ripen]. 1. The period of ripening. The culminating stage of inflammation marked by the collection and excretion of pus in some part of the inflamed tissue. 2. The ripening of the ovum; the stage succeeding the extrusion of the polar bodies. **M. of Cataract.** See *Cataract*.

Maturative (*mat'-u-ra-tiv*). Synonym of *Maturant*.

Mature (*ma-tūr'*) [*maturare*, to ripen]. Ripe; also, to ripen.

Maturity (*ma-tu'-rit-e*) [*maturitas; maturare*, to ripen]. Full development; the quality or period of complete growth.

Matutinal (*ma-tu'-tin-al*) [*Matuta*, goddess of the morning]. Occurring in the morning, as matutinal nausea.

Matzoon (*mat'-zūn*). A variety of koumiss, prepared largely in Asiatic Turkey. It is the Turkish equivalent of the Arabian *leben*, *q.v.*

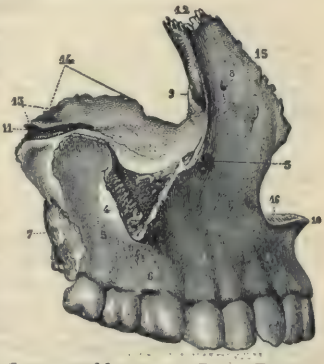
Mauchart's Ligaments. See *Ligament*.

Maumène's Test. See *Tests, Table of*.

Mauriceau's Method. See *Treatment, Methods of*.

Mauriceau-Lachapelle Method. Same as *Mauriceau's Method*.

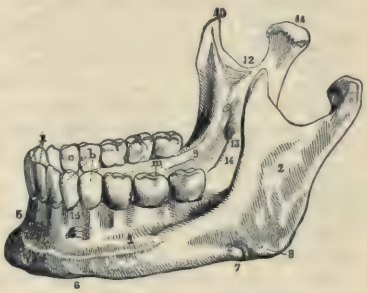
Mauthner, Sheath of. A thin zone of protoplasm situated immediately adjacent to the axis-cylinder of a nerve, and separating it from the medullary sheath.



Mauvanilin (*mawv-an'-il-in*) [Fr., *mauve*, yellow; *anilin*], $C_{19}H_{19}N_3O$. A derivative of anilin, occurring as a by-product in the manufacture of rosanilin. It is soluble in alcohol, in benzene, and in acetic ether. See *Pigments, Conspectus of*.

Mauve (*mawv*) [Fr.]. A purple dye derived from anilin. It is a salt of *mauvein*, *q.v.* See also *Pigments, Conspectus of*.

Mauvein (*maw'-ve-in*) [Fr. *mauve*, yellow], $C_{25}H_{24}N_4$. A base derived from anilin; its salts, especially the sulphate, form the anilin-dye mauve. It is a dark, crystalline powder, soluble in alcohol, insoluble in benzene and ether. See *Pigments, Conspectus of*.



Maw-bound. Constipated. **M.-worm.** Any intestinal worm that finds its way into the stomach, as *Oxyuris vermicularis*, or especially *Ascaris lumbricis*. See *Parasites* (*Animal*), *Table of*.

Maxilla (*maks-il'-ah*) [L., the jaw-bone: *pl.*, *Maxillæ*]. The bone of the upper jaw, the supra-maxillary bone proper, but applied also to the bone of the lower jaw;

Superior Maxillary Bone, External Aspect.

1. Anterior aspect of pyramidal process, or canine fossa. 2. Incisive or myrtiform fossa 3. Infra-orbital foramen. 4. Summit of pyramidal process, or malar process. 5. Posterior aspect of pyramidal process. 6. Inferior border of pyramidal process. 7. Posterior border, or maxillary tuberosity. 8. Nasal process. 9. Posterior border, grooved for lacrymal duct. 10. Anterior nasal spine. 11. Infra-orbital groove. 12. Summit of nasal process. 13. Posterior and superior angle. 14. Superior border. 15. Anterior border of nasal process. 16. Notch for anterior opening of nasal fossæ.

Inferior Maxillary Bone, External Aspect.

1. Body of bone and external oblique line. 2. Ramus. 3. Symphysis. 4. Incisive fossa. 5. Mental foramen. 6. Depression in inferior border for attachment of digastric muscle. 7. Depression for passage of facial artery. 8. Angle of jaw. 9. Posterior extremity of internal oblique line. 10. Coronoid process. 11. Condyle. 12. Sigmoid notch. 13. Origin of inferior dental canal. 14. Mylo-hyoid groove. 15. Alveolar border. *a*. Incisors. *b*. Bicuspids. *c*. Canines. *m*. Molars.

among insects and crustaceans, a member of one of the pairs of gnathites behind and below the mandibles.

Maxillar (*maks'-il-ar*), **Maxillary** (*maks'-il-a-re*) [*maxilla*, jaw-bone]. Pertaining to the maxillæ or jaws. **M. Bones**, the bones of the jaws, consisting of an inferior or lower, and a superior or upper jaw. **M. Nerve, Inferior.** See *Nerves, Table of.* **M. Nerve, Superior.** See *Nerves, Table of.* **M. Sinus**, the antrum of Highmore.

Maxillen (*maks'-il-en*) [*maxilla*, jaw-bone]. Belonging to the maxillary bone in itself.

Maxilliform (*maks-il'-if-orm*) [*maxilla*, jaw; *forma*, form]. Shaped like a jaw-bone.

Maxilliped, Maxillipede (*maks-il'-ip-ed, maks-il'-ip-ēd*) [*maxilla*, jaw; *pes*, foot]. In biology, one of the foot-jaws or gnathopodites of a crustacean.

Maxillitis (*maks-il-i'-tis*) [*maxilla*, jaw; *ιτις*, inflammation]. Inflammation of a maxillary gland.

Maxillo-dentary (*maks-il-o-den'-tar-e*) [*maxilla*, jaw; *dens*, tooth]. Pertaining to the jaw and the teeth.

Maxillo-jugal (*maks-il-o-ju'-gal*) [*maxilla*, jaw; *jugum*, yoke]. Pertaining to the jaw and the malar bone.

Maxillo-mandibular (*maks-il-o-man-dib'-u-lar*) [*maxilla*, jaw; *mandibula*, lower jaw]. Pertaining to the upper jaw and the lower jaw.

Maxillo-palatine (*maks-il-o-pal'-at-in*) [*maxilla*, jaw; *palatum*, palate]. Pertaining to the maxilla and the palatine bone.

Maxillo-palpebralis (*maks-il-o-pal-pe-bra'-lis*). Synonym of *Orbicularis palpebrarum.* See *Muscles, Table of.*

Maxillo-pharyngeal (*maks-il-o-far-in'-je-al*) [*maxilla*, jaw; *φάρυγξ*, pharynx]. Pertaining to the jaw and the pharynx.

Maxillo-turbinal (*maks-il-o-tur'-bin-al*) [*maxilla*, jaw; *turbo*, whirlwind]. Pertaining to the maxillo-turbinal bone. **M.-t. Bone**, the inferior turbinate bone.

Maximal (*maks'-im-al*) [*maximus*, the greatest]. Pertaining to the maximum; highest or largest. **M. Contraction**, the extreme height of the lift or muscular contraction reached by gradually increased stimulus. **M. Thermometer**, a clinical thermometer with a device (a pin on top of the mercurial column) for preserving a record of the highest temperature to which it may have been subjected since the last observation.

Maximum (*maks'-im-um*) [L., the greatest]. The greatest or highest degree. **M. Dose**, the largest dose of a medicament that may be safely given. **M. Occipital Point.** See *Craniometric Points.*

Maxwell's Spot. A peculiar figure seen when blue light corresponding to blue glass F, of Rathenow's scale, is made to pass with rapid intermissions before the eye. **M.'s Theory.** See *Light.*

May (*ma*) [*Maia*, the goddess of growth]. The name of the fifth month. Also, a descriptive term applied to many flowers that mature in that month. **M.-apple.** See *Podophyllum.* **M.-epidemic**, a synonym in Europe for *Croupous Pneumonia.* **M.-flower.** See *Trailing Arbutus.* **M.-weed.** See *Maruta.*

Mayer's Alcoholic Carmin. See *Stains, Table of.* **M.'s Cochineal.** See *Stains, Table of.* **M.'s Hemalum Staining Fluid.** See *Stains, Table of.* **M.'s Reagent.** See *Tests, Table of.* **M.'s Solution**, a culture-medium for bacteria. It contains di-hydropotassic phosphate, calcic phosphate, and magnesium sulphate, each .1 gram, pepsin .23 gram, and 15 per cent. solution of sugar-candy 20 c.c.

Mayet's Formula. See *Alimentation, Rectal.* **M.'s Paste**, a caustic paste composed of zinc chlorid 8 parts, zinc oxid 1 part, wheat flour 7 parts, water 1 part.

Mayhem (*ma'-hem*) [OF., *mehaigner*, to hurt]. A legal term signifying the violent and unauthorized privation by another, of any useful part or organ of the body; mutilation; maiming.

Maynard's Adhesive Liquid. Same as *Collodion.*

Mayor's Scarf. A simple dressing for fracture of the clavicle. It is made of a square of muslin, the diagonal being long enough to reach easily around the body. It is folded diagonally, and the forearm placed between the folds and laid horizontally across the chest; the ends of the diagonal are tied together at the back, and the other two ends are drawn snugly up in front so as to support the weight of the arm, and tied together around the neck. See *Handkerchief-dressing.*

Mays (*māz*) [L.]. The genus *Zea*, *q. v.*

Maza (*ma'-zah*) [*μᾶζα*, cake]. The placenta.

Mazalgia (*ma-zal'-ge-ah*) [*μαζός*, breast; *ἄλγος*, pain]. Mastalgia, or mastodynia.

Mazalysis (*ma-zal'-is-is*) [*μᾶζα*, cake; *ἀ* priv.; *λύσις*, a loosing]. Retention of the placenta. Sometimes used as synonym of *Mazolysis*, *q. v.*

Mazic (*ma'-zik*) [*μᾶζα*, placenta]. Pertaining to the placenta.

Mazischesis (*ma-zis'-kes-is*). Synonym of *Mazalysis.*

Mazocacothesis (*ma-zo-kak-oth'-es-is*) [*μᾶζα*, cake; *κακός*, ill; *θέσις*, placing]. Faulty implantation of the placenta.

Mazodynia (*ma-zo-din'-e-ah*) [μαζός, breast; ὀδύνη, pain]. Same as *Mastodynia*.

Mazology (*ma-zol'-o-je*). Same as *Mastology*.

Mazolysis (*ma-zol'-is-is*) [μᾶζα, cake; λύσις, loosing]. Separation of the placenta.

Mazolytic (*ma-zo-lit'-ik*) [μᾶζα, cake; λύσις, loosing]. Pertaining to mazolysis.

Mazopathy (*ma-zop'-ath-e*) [μᾶζα, cake, placenta; πάθος, illness]. 1. Any disease of the placenta. 2. [μαζός, breast; πάθος, illness]. Same as *Mastopathy*.

Meable (*me'-a-bl*) [*meabilis*, easily penetrating]. Capable of being readily traversed or passed through.

Mead (*mēd*) [ME., *mede*, mead]. Dilute, fermented honey or syrup flavored. See *Hydromel* and *Methæglin*.

Meadow Anemone. See *Pulsatilla*. **M. Saffron.** See *Colchicum*.

Meal (*mēl*) [ME., *mele*, meal]. A coarse flour made from leguminous seeds or cereals.

Measle (*mēz'-el*) [singular of ME. *meseles*, measles]. An individual *Cysticercus cellulosæ*. **M. of Pork.** See *Cysticercus*. **M.-worm**, cysticercus.

Measles (*mēz'-els*) [ME., *meseles*, measles]. 1. Rubeola, Morbilli. An acute, infectious disease, characterized by a peculiar eruption and by catarrhal inflammation of the mucous membranes of the conjunctiva and the air-passages. The period of incubation is nearly two weeks. The eruption is of a peculiar reddish color and assumes the form of concentric patches. The disease affects principally the young, is exceedingly contagious, and one attack of it confers almost perpetual immunity. 2. Fr., *ladrerie*; Ger., *Finnen*. A disease of the pig, the ox, the sheep, the reindeer, the dog, the cat, and man, due to the presence in the muscles, connective tissue, the brain, and other organs, of the finns or larvæ of various tapeworms; a form of cysticercosis. See *Cysticercus*, under *Parasites* (*Animal*), *Table of*. **M., Anomalous**, a form in which the symptoms are irregular, either the fever, catarrh, or eruption being absent. **M., Bastard.** Synonym of *Rötheln*. **M., Benign**, measles running through its ordinary course. **M., Black**, a very malignant, usually hemorrhagic form of measles. **M., Camp**, an epidemic form occurring among soldiers. **M., Choleriform**, a form in which choleraic symptoms supervene. **M., Dyspneic**, a grave form associated with congestion of the lungs and speedy death. It is most frequent in infants and young soldiers. **M., False.** Synonym of *Rötheln*. **M., Fire.** See *Rötheln*. **M., French.** Synonym of *Rötheln*. **M., German.** Synonym of *Rötheln*. **M., Hemorrhagic**, a form in which the eruption is hemorrhagic in type. **M., Malignant**, a fatal form with petechiæ, diarrhea and extreme prostration. **M., Putrid**, the same as *M., Malignant*. **M., Typhoid**, a severe form attended by hyperpyrexia and marked prostration.

Measly (*mēz'-le*) [ME., *meseles*, measles]. Containing measles (cysticerci); covered with a measles-like eruption.

Measures (*mezh'-ūrz*). See *Weights and Measures* and *Metric System*.

Meat (*mēt*) [ME., *mete*, meat]. The muscular tissues of an animal, used as food. **M.-biscuit**, a palatable biscuit, weighing about 1¼ lbs., and containing from 10 to 12 per cent. of water. It is made by mixing together, cooking, and baking, 1 lb. flour, 1 lb. meat, ¼ lb. suet, ½ lb. potatoes, with a little sugar, onion, salt, pepper, and spices. It will keep unchanged for four months. **M.-inspection**, the examination of meat, by experts, usually at the slaughter-houses, for the purpose of determining the presence or absence of disease, especially of tuberculosis and other infectious diseases, and of trichiniasis. **M.-washings.** See *Dysentery*.

Meatometer (*me-at-om'-et-er*) [*meatus*, meatus; μέτρον, measure]. An instrument used in measuring the caliber of the meatus urinarius.

Meatoscope (*me-at'-o-skōp*) [*meatus*, meatus; σκοπεῖν, to inspect]. A speculum used in the examination of the distal portion of the male urethra.

Meatotome (*me-at'-o-tōm*) [*meatus*, meatus; τομή, a cutting]. A cutting instrument used in performing meatotomy.

Meatotomy (*me-at-ot'-o-me*) [*meatus*, meatus; τομή, section]. Surgical incision of the meatus urinarius.

Meatus (*me-a'-tus*) [*meare*, to flow or pass]. A passage. **M. auditorius externus**, the canal extending from the concha to the membrana tympani. **M. auditorius internus**, the internal auditory canal. **M. urethræ, M. urinarius**, the orifice of the urethra. **M. of Nose**, one of the three meati into which the turbinal bones divide the nasal cavity. **M. venosus**, a short vein, the vitelline, into which the omphalo-mesenteric veins empty.

Mecca Balsam-tree. See *Carpobalsamum*.

Mechanencephalitis (*mek-an-en-sef-al-i'-tis*) [μηχανή, instrument; ἐγκέφαλος, brain; ιτις, inflammation]. Encephalitis due to injury.

Mechanic, Mechanical (*me-kan'-ik, me-kan'-ik-al*) [μηχανικός, pertaining to a machine]. Machine-like; lacking spontaneity; physical; non-vital; pertaining to mechanics. **M. Dentistry**, the art of constructing and applying artificial teeth, artificial palates, obturators and appliances for the correction of irregularity in the arrangement of the natural teeth. **M. Parts**, the stand of a microscope, excluding the ocular and objective. **M. Theory**, Virchow's theory of tumor-formation, viz., that tumors are due primarily to local irritation.

Mechanics (*me-kan'-iks*) [μηχανική, instrument]. The science that treats of forces and powers and their application, either directly or by the intervention of machinery. It may treat of bodies at rest (statics), or in motion (dynamics).

Mechanism (*mek'-an-izm*) [*mechanismus*, from μηχανή, instrument]. Any structure having the nature of a machine. The method by which any process is carried on. **M. of Accommodation.** See *Accommodation*. **M. of Labor.** See *Labor*.

Mechano-therapy (*mek'-an-o-ther'-ap-e*) [μηχανή, instrument; θεραπεία, treatment]. The use of mechanical agencies, such as massage, exercise, and the like, in the treatment of disease.

Meckel's Cartilage. The cartilage of the mandibular arch in the embryo. **M.'s Cave or Space**, the recess of dura mater lodging the Gasserian ganglion. **M.'s Diverticulum**, a diverticulum of the ileum, arising from one to two feet above the ilio-cecal valve, and representing a portion of the unobliterated omphalomesenteric canal of the fetus. See *Diverticulum*. **M.'s Ganglion.** See *Ganglia, Table of*. **M.'s Ligament.** See *Ligament*. **M.'s Plane.** See *Plane*.

Meckelian Bar. Same as *Meckel's Cartilage*. **M. Ganglion.** See *Ganglia, Table of*.

Mecometer (*me-kom'-et-er*) [μῆκος, length; μέτρον, measure]. An instrument used in measuring newborn infants.

Meconalgia (*me-kon-al'-je-ah*) [μήκων, poppy; ἄλγος, pain]. Pain or neuralgia following the disuse of opium.

Meconarcein (*mek-o-nar'-se-in*) [μήκων, opium; ναρκοῦν to benumb]. A preparation of opium alkaloids, having sedative properties, but which is free from morphin.

Meconate (*mek'-on-āt*) [*μήκων*, opium]. A salt of meconic acid.

Meconeuropathia (*mek-on-u-ro-pa'-the-ah*) [*μήκων*, opium; *νεῦρον*, nerve; *πάθος*, illness]. Nervous disorder due to the abuse of opium, or its narcotic derivatives.

Meconial Colic (*mek-o'-ne-al*). See *Colic.*

Meconic (*mek-on'-ik*) [*μήκων*, poppy]. Pertaining to opium. **M. Acid.** See *Acid.*

Meconidin (*mek-on'-id-in*) [*μήκων*, poppy], $C_{21}H_{23}NO_4$. An amorphous alkaloid of opium.

Meconidium (*mek-on-id'-e-um*) [*μήκων*, part of the intestine of a testaceous animal; the ink-bag of a cuttlefish: *pl.*, *Meconidia*]. In biology, one of the generative medusoid buds or zoöids developed on the gonotheca of certain hydroids (*Gonothyrea*), and that gives rise to ciliated embryos.

Meconin (*mek'-on-in*) [*μήκων*, poppy], $C_{10}H_{10}O_4$. A substance that results from the action of sodium amalgam upon opianic acid. It occurs already formed in opium, and is obtained on boiling narcotin with water. It yields shining crystals, melting at 102° C., and dissolving with difficulty in water. It is said to be an hypnotic. Unof.

Meconioid (*mek-o'-ne-oid*) [*μήκων*, poppy; *εἶδος*, like]. Resembling meconium.

Meconiorrhea (*mek-on-e-or-e'-ah*) [*μηκώνιον*, meconium; *ῥοία*, flow]. A morbidly free discharge of meconium.

Meconiosin (*mek-on-i'-o-sin*) [*μήκων*, poppy]. A neutral principle found in opium

Meconious (*mek-o'-ne-us*) [*μήκων*, poppy]. Pertaining to meconium.

Meconism (*mek'-on-izm*) [*meconismus*; *μήκων*, poppy]. The opium-habit; opium-poisoning, especially of the chronic kind.

Meconium (*mek-o'-ne-um*) [*μηκώνιον*, lit., "poppy-juice"]. The first fecal discharges of the newborn. It is a dark-green, viscid liquid, composed of the secretion of the liver with exfoliated epithelium from the bowel.

Meconoid (*mek'-on-oid*). Synonym of *Meconioid.*

Meconoiosin (*mek-on-oi'-o-sin*) [*μήκων*, poppy], $C_8H_{10}O_2$. A derivative of opium, crystalline in character and giving a dark-red color with sulphuric acid.

Meconology (*mek-on-ol'-o-je*) [*μήκων*, opium; *λόγος*, science]. The botany and pharmacology of opium, its allies and derivatives.

Meconophagism (*mek-on-off'-aj-izm*) [*μήκων*, opium; *φαγεῖν*, to eat]. The habit of opium-eating.

Meconophagist (*mek-on-off'-aj-ist*) [*μήκων*, opium; *φαγεῖν*, to eat]. An opium-eater.

Medeitis (*me-de-i'-tis*) [*μήδεα*, genitals; *ιτις*, inflammation]. Inflammation of the genital organs.

Media (*me'-de-ah*) [fem. of *medius*, middle: pl. of *medium*]. The middle coat of an artery, vein, or lymph-vessel.

Mediad (*me'-de-ad*) [*medius*, middle]. Toward the median plane or line.

Medial (*me'-de-al*). See *Median.*

Median (*me'-de-an*) [*medius*, the middle]. Middle, mesal, or mesial. **M. Artery.** See *Arteries, Table of.* **M. Line.** See *Line.* **M. Nerve.** See *Nerves, Table of.* **M. Operation.** See *Operations, Table of.* **M. Plane.** See *Plane.*

Mediastinal (*me-de-as-ti'-nal*) [*mediastinum*, mediastinum]. Pertaining to the mediastinum.

Mediastinitis (*me-de-as-tin-i'-tis*) [*mediastinum*, mediastinum; *ιτις*, inflammation]. Inflammation of the cellular tissue of the mediastinum. It is characterized by constant severe pain beneath the sternum, together with dyspnea. Pus may form and give rise to constitutional symptoms, and, if in large quantity, to a fluctuating tumor in an intercostal space or above the episternal notch.

Mediastino-pericarditis (*me-de-as'-tin-o-per-ik-ar-di'-tis*) [*mediastinum*, mediastinum; *περί*, around; *καρδία*, heart; *ιτις*, inflammation]. Combined inflammation of the mediastinum and the pericardium.

Mediastinum (*me-de-as-ti'-num*) [*in medio stare*, to stand in the middle]. A middle portion or septum separating adjacent parts. The pleural folds or septa extending from the spine to the sternum, and dividing the thoracic cavity into right and left chambers. It is divided into the anterior, the middle, and the posterior mediastinum, and otherwise into an upper (or superior) and a lower mediastinum. **M. testis**, a cavity in the posterior portion of the testicle formed by a projection inward of the tunica albuginea. It occupies about one-third of the transverse, and one-fourth of the longitudinal diameter of the testicle.

Mediate (*me'-de-āt*) [*medius*, the middle]. Indirect. Also applied to the medium interposed between the surface of the body, and the instruments used in percussion and auscultation. **M. Ligature.** See *Ligature.* **M. Percussion**, percussion on a pleximeter.

Medibasilic Vein (*me-de-bas-il'-ik*). The median basilic vein. See *Vein.*

Medicable (*med'-ik-a-bl*) [*medicari*, to heal]. Amenable to cure.

Medical (*med'-ik-al*) [*medicalis*; *medicari*, to heal]. Pertaining to medicine, or the healing art. **M. Ethics**, those principles of justice, honor, and courtesy that regulate the intercourse and conduct of physicians. **M. Jurisprudence.** See *Jurisprudence.*

Medicament (*med-ik'-am-ent*) [*medicamentum*, from *medicari*, to heal]. A medicinal substance.

Medicamental, Medicamentary (*med-ik-am-en'-tal*, *med-ik-am-en'-ta-re*) [*medicamentum*, from *medicari*, to heal]. Pertaining to medicine.

Medicamentation (*med-ik-am-en-ta'-shun*) [*medicamentum*, a medicine]. Treatment by medicines.

Medicamentous (*med-ik-am-en'-tus*). See *Medicinal.*

Medicamentum (*med-ik-am-en'-tum*). See *Medicament.* **M. arcanum**, a proprietary or secret remedy.

Medicaster (*med'-ik-as-ter*) [*medicus*, a physician]. An ignorant or unskilful physician or pretender; a quack.

Medicated (*med'-ik-a-ted*) [*medicatus*, medicated]. Treated or impregnated with medicine. Also, purified and made fit for medical use.

Medication (*med-ik-a'-shun*) [*medicatio*, medication]. Treatment by, or impregnation with, a medicine. **M., Hypodermatic, or Hypodermic**, treatment by the introduction of medicines beneath the skin, usually by means of a hypodermatic syringe.

Medicephalic (*me-de-sef-al'-ik*) [*medius*, middle; *κεφαλή*, head]. Median cephalic. See *Vein.*

Medicerebellar (*me-de-ser-e-bel'-ar*) [*medius*, middle; *cerebellum*, little brain]. Pertaining to the intermediate region of the cerebellum.

Medicerebral (*me-de-ser'-e-bral*) [*medius*, middle; *cerebrum*, brain]. Pertaining to the central portion of the cerebrum.

Medicinal (*med-is'-in-al*) [*medicina*, medicine]. Pertaining to, or having the nature of, a medicine. **M. Rashes**, eruptions on the skin following the internal administration of certain drugs, *e. g.*, bromin and the bromids, iodin and the iodids, belladonna, copaiba, chloral, mercury, quinin, the salicylates, antipyrin and arsenic.

Medicine (*med'-is-in*) [*medicina*, medicine]. The science and art of preserving health, and preventing and curing disease; the "healing art," including also the science of obstetrics. In a more restricted sense of the

word surgery is excluded. On the European continent it is customary to divide medicine into internal and external, the former implying the restricted sense of the term, or the study of diseases of internal organs, the latter referring to surgery or external diseases. The term is applied also to a particular drug or therapeutic application. **M., Atomistic,** dosimetric medicine. **M.-chest,** a case or compartment for storing or carrying medicines. **M., Clinical,** pertaining to the study of disease by the bedside of the patient; internal medicine. **M., Conservative,** a method of treatment with the object of preserving the vital forces, and not by active measures, that endanger the life of the patient; also used in the ordinary sense of the word as relying upon well understood, or accepted or established methods of treatment, rather than upon new and comparatively untried plans. **M., Domestic,** the use of domestic remedies. **M., Dosimetric.** See *Dosimetry*. **M., Eclectic.** See *Eclectic*. **M., Empiric.** See *Empiric*. **M., Equine,** veterinary medicine as applied to the horse. **M., Forensic,** or **M., Legal,** the relations of medicine to jurisprudence, involving the diagnosis of insanity, questions in toxicology, surgery, and the like. **M., Neurodynamic,** the application of heat and cold to the spine in the treatment of certain diseases. **M.,-pannier,** a pannier used in the United States army for transporting medicines. **M. Patent,** a mixture or compound of sundry drugs for the sale of which the deviser gets a patent from the government. The ordinary so-called patent medicines, however, are not patented, but have only the name copyrighted. **M., Pneumatic,** the treatment of disease by means of compressed and rarefied air. See *Waldenburg's Apparatus*. **M., Preventive,** that which aims at the prevention of disease, in the community as well as in the individual. **M., Proprietary.** See *Medicine, Patent*. **M., State,** medical jurisprudence. **M., Veterinary,** the science and treatment of the diseases of domestic animals.

Mediciner (*med-is'-in-er*) [*medicus*, a physician]. A physician.

Medicinerea (*me de-sin-e'-re-ah*) [*medius*, middle, and *cinereus*, ashen]. The gray matter of the claustrum and lenticula of the brain, lying between the cortex or ectocinerea and the entocinerea.

Medico-chirurgical (*med-ik-o-ki-rur'-jik-al*) [*medicus*, a physician; χειρούργος, a surgeon]. Pertaining conjointly to medicine and surgery.

Medico-legal (*med-ik-o-le'-gal*) [*medicus*, physician; *lex*, law]. Relating both to medicine and law.

Medico-mania (*med-ik-o-ma'-ne-ah*) [*medicus*, physician; μανία, madness]. Morbid interest or zeal in medical matters exhibited by non-professional persons.

Medicommissure (*me-de-kom'-is-ūr*) [*medius*, middle; *commissura*, commissure]. The middle commissure of the third ventricle. The junction of the mesal surfaces of the thalami. It is in a direct line between the porta and the aqueduct, and just dorsad of the aulix. It consists mainly of cells, and is so soft as commonly to be torn during the removal of the brain.

Medico-pneumatic (*med-ik-o-nu-mat'-ik*) [*medicus*, physician; πνεῦμα, air]. Relating to pneumatic medicine.

Medico-psychologic (*med-ik-o-si-ko-loj'-ik*) [*medicus*, physician; ψύχη, mind; λόγος, science]. Pertaining to medico-psychology.

Medico-psychology (*med-ik-o-si-kol'-o-je*) [*medicus*, physician; ψυχολογία, the science of the mind]. Psychologic medicine; the study of mental diseases.

Medicornu (*me-de-kor'-nu*) [*medius*, middle; *cornu*, horn]. The middle horn of the lateral ventricle.

Medicus (*med'-ik-us*) [L.]. A physician.

Medifurca (*me-de-fur'-kah*) [*medius*, middle; *furca*, fork: *pl.*, *Medifurcæ*]. In biology, the middle, forked apodeme that projects into the thoracic cavity of an insect from the sternal wall of the somite.

Medina-worm (*me-di'-nah-werm*). See *Filaria medinensis* under *Parasites* (*Animal*), *Table of*.

Medio-bilateral (*me-de-o-bi-lat'-er-al*) [*medius*, middle; *bis*, twice; *latus*, side]. Pertaining to the middle and to both sides.

Medio-carpal (*me-de-o-kar'-pal*) [*medius*, middle; *carpus*, carpus]. Pertaining to the articulation between the two rows of carpal bones.

Medio-colic (*me-de-o-kol'-ik*) [*medius*, middle; κῶλον, colon]. Pertaining to the middle portion of the colon.

Medio-dorsal (*me-de-o-dor'-sal*) [*medius*, middle; *dorsum*, back]. Both median and dorsal; on the mesial line of the back.

Medio-frontal (*me-de-o-frun'-tal*) [*medius*, middle; *frons*, forehead]. Pertaining to the middle of the forehead.

Medio-lateral (*me-de-o-lat'-er-al*) [*medius*, middle; *latus*, side]. Pertaining to the middle and to one side.

Medio-occipital (*me-de-o-ok-sip'-it-al*) [*medius*, middle; *occiput*, occiput]. Pertaining to the middle portion of the occipital region.

Medio-pontine (*me-de-o-pon'-tin*) [*medius*, middle; *pons*, bridge]. Pertaining to the central portion of the pons.

Medio-tarsal (*me-de-o-tar'-sal*) [*medius*, middle; *tarsus*, tarsus]. Pertaining to the middle articulation of the tarsal bones.

Medipectus (*me-de-pek'-tus*). Same as *Mesosternum*.

Medipeduncle (*me-de-pe-dung'-kl*) [*medius*, middle; *pedunculus*, peduncle]. The middle peduncle of the cerebellum; the lateral intermediate continuation of the cerebellum to the pons. It is the largest of the three peduncles of the cerebellum, and is mainly continued from the lateral lobe of the latter.

Mediscalenus (*me-de-ska-le'-nus*) [*medius*, middle; σκαληνός, scalene, oblique]. Synonym of *Scalenus medius*; see *Muscles, Table of*.

Medisect (*me-de-sekt'*) [*medius*, middle; *secare*, to cut]. To make a medisection, *q. v.*

Medisection (*me-de-sek'-shun*) [*medius*, middle; *sectio*, from *secare*, to cut]. Section of the body, or of any symmetric part, at the median longitudinal antero-posterior plane. See *Position and Direction, Table of*.

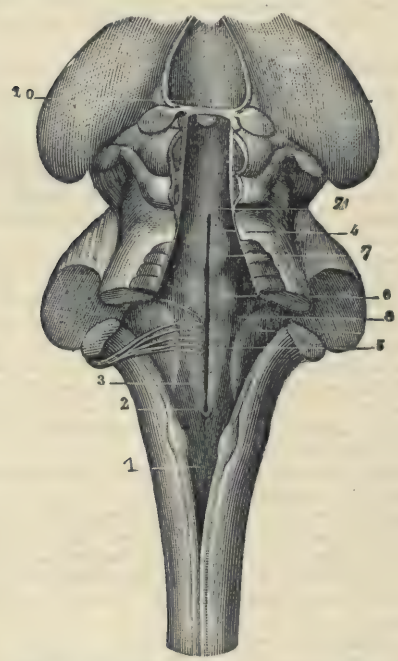
Medisternum (*me-de-ster'-num*). Synonym of *Mesosternum*.

Mediterranean Fever. See *Fever*.

Meditriceps (*me-de-tri'-seps*) [*medius*, middle; τρεῖς, three; κεφαλή, head]. The middle or long head of the triceps muscle.

Medium (*me'-de-um*) [*medius*, the middle: *pl.*, *Media*]. That in which anything moves or through which it acts. In medicine, the sum of conditions by which a patient is surrounded, especially those of light, temperature, and ventilation. Also, a person subject to hypnotizing influence. **M., Culture.** See *Media, Nutrient*. **M. of the Eye,** the refracting structures from the anterior surface of the cornea to the retina. **M., Fluid,** any liquid nutrient substance, such as bouillon, milk, and the like. **M., Mounting.** See *Mounting-media*. **M., Nutrient,** the substances used in bacteriologic studies for the cultivation of microorganisms. See *M., Fluid*, and *M., Solid*. **M., Solid,** any solid nutrient substance for the cultivation of bacteria, as gelatin, agar-agar, potato, and the like.

Mediumism (*me'-de-um-izm*) [*medius*, the middle]. Hypnotism.



Medius (*me'-de-us*) [*medius*, middle]. The middle.

Medoblennorrhea (*me-do-blen-or-e'-ah*). Synonym of *Gonorrhea* and *Gleet.*

Medorrhea (*me-dor-e'-ah*) [*μήδεα*, genitals; *ῥοία*, a flow]. A discharge from the reproductive organs. **M. urethralis,** gonorrhea. **M. virilis,** gonorrhea of the male urethra.

Medorrhoic (*me-dor-o'-ik*) [*μήδεα*, genitals; *ῥοία*, flow]. Pertaining to medorrhea.

Medulla (*me-dul'-ah*) [L., marrow]. A fatty substance or marrow occupying certain cavities. Also the central parts of certain organs, as distinguished from the cortex. See *Alba.* **M. of Bone,** bone-marrow. **M. dorsalis.** See *M. spinalis.* **M. of Hair,** the central portion or core of the hair. **M. of Nerve-fiber,** the myelin or white substance of Schwann. **M. oblongata,** the upper enlarged part of the spinal cord, extending from the cord opposite the foramen magnum to the pons Varolii. **M., Renal,** the substance of the renal pyramids. **M. spinalis, M. vertebralis,** the spinal cord or marrow; the myelon.

Dorsal Aspect of Medulla Oblongata.

1. Gray matter surrounding central canal. 2. Orifice of this canal. 3. Median fissure. 4. Its upper extremity. 5. Grayish-white matter giving origin to hypoglossal nerve. 6. Eminentia teres. 7. Prominence corresponding to nucleus of 6th nerve. 7'. Nucleus of 3d nerve. 8. Gray column giving origin to mixed nerves. 10. Third ventricle and posterior commissure.

Medullar (*me-dul'-ar*). Synonym of *Medullary.*

Medullary (*med'-ul-a-re*, or *med-ul'-a-re*) [*medulla*, marrow]. Pertaining to the medulla or to marrow; resembling marrow. Also, pertaining to the white substance of the brain contained within the cortical envelop of gray matter. **M. Canal,** the hollow interior of long bones, in which the marrow lies. **M. Carcinoma,** a soft carcinoma very rich in cells; encephaloid carcinoma. **M. Groove,** a longitudinal groove at the anterior part of the embryonal shield of the blastoderm. **M. Membrane,** the areolar envelop of the marrow of the long bones. **M. Plates.** See *Plate.* **M. Rays.** 1. Also called *Pyramids of Ferrein;* series or bundles of parallel tubules extending from the medulla of the kidney into the cortex. 2. Rays of fundamental tissue that connect the pith with the cortex, and separate the fibro-vascular bundles, in the stems of dicotyledons and gymnosperms. **M. Sarcoma,** a soft, round-celled sarcoma. **M. Sheath,** 1. the semi-fluid, fatty, white matter between the enveloping sheath and the central axis-cylinder, or essential part of a nerve. 2. A sheath composed of spiral ducts and wood-cells surrounding the pith, in dicotyledons and gymnosperms. **M. Tube,** the closing of the medullary groove, forming a closed medullary or neural tube. **M. Velum.** See *Velum.*

Medullated (*med'-ul-a-ted*) [*medulla*, marrow]. Containing or covered by medulla or marrow. **M. Nerve-fibers,** nerve-fibers provided with a medullary sheath, the myelin or white substance of Schwann. **Non-M. Nerve-fibers,** nerve-fibers not possessing a medullary sheath.

Medullic Acid (*med-ul'-ik*) [*medulla*, marrow], $C_{21}H_{42}O_2$. A monobasic acid derived from beef-fat.

Medullification (*med-ul-if-ik-a'-shun*) [*medulla*, marrow; *facere*, to make]. The formation of medulla.

Medullin (*med-ul'-in*) [*medulla*, marrow]. 1. A variety of cellulose obtained from the pith or medulla of certain plants. 2. An extract derived from the spinal cord.

Medulli-spinal (*med-ul-e-spi'-nal*) [*medulla*, marrow; *spinalis*, spinal]. Relating to the myelon or spinal marrow; myelonic.

Medullitis (*med-ul-i'-tis*) [*medulla*, marrow; *ιτις*, inflammation]. 1. Inflammation of marrow. 2. Myelitis.

Medullization (*med-ul-iz-a'-shun*) [*medulla*, marrow]. Softening of bone-tissue in the course of osteitis.

Medullo-arthritis (*med-ul-o-ar-thri'-tis*) [*medulla*, marrow; *ἄρθρον*, joint; *ιτις*, inflammation]. Inflammation of the marrow-elements of the cancellated articular portion of a bone.

Medullo-cell (*med-ul'-o-sel*) [*medulla*, marrow; *cellula*, cell]. A marrow-cell.

Medullo-encephalic (*med-ul'-o-en-sef-al'-ik*) [*medulla*, marrow; *ἐγκέφαλός*, brain]. Pertaining to the medulla and the encephalon; myelo-encephalic.

Medusa (*me-du'-sah*) [*Μέδουσα*, one of the Gorgons]. Jelly-fish. **M.'s Head.** See *Medusæ Caput.* **Medusæ Caput,** an extensive dilatation of the superficial veins of the abdomen about the umbilicus, seen in certain cases of portal obstruction. The condition largely depends upon the establishment of the venous collateral circulation through an anastomosis of the mesenteric veins and those of the abdominal walls, and, occasionally, also upon a patulousness of the umbilical vein.

Meerschaum (*mēr'-shawm*) [Ger., "sea-foam"], $Mg_2H_4Si_3O_9$. A native hydrated magnesium silicate; locally used in the same way as bole, or cimolian earth; it is a good absorbent application.

Mega-, Megalo- (*meg'-ah-, meg'-al-o-*) [*μέγας*: *gen.*, *μεγάλου*]. A prefix signifying large; also, indicating a unit one million times as great as the unit to which it is prefixed.

Megabacteria (*meg'-ah-bak-te'-re-ah*) [*μέγας*, large; *βακτήριον*, bacterium]. Large bacteria; a group of the coccobacteria.

Megacephalia (*meg-ah-sef-a'-le-ah*) [*μέγας*, large; *κεφαλή*, head]. The megacephalic condition.

Megacephalic (*meg-ah-sef-al'-ik*), **Megacephalous** (*meg-as-ef'-al-us*) [*μέγας*, large; *κεφαλή*, head]. A term applied to a skull whose capacity (measured by filling with shot through the foramen magnum) exceeds 1450 c.c. If less than 1350 it is called *microcephalic;* if between these numbers, *mesocephalic.*

Megacerus (*meg-as'-er-us*) [μέγας, large; κέρας, horn]. Large-horned; having large antennæ.

Megacheilus (*meg-ah-ki'-lus*) [μέγας, large; χείλος, lip]. Large-lipped.

Megacoccus (*meg-ah-kok'-us*) [μέγας, large; κόκκος, a berry]. A large-sized coccus.

Megadont (*meg'-ah-dont*) [μέγας, great; ὀδούς, tooth]. In biology, having large teeth. Cf. *Macrodont*.

Megadyne (*meg'-ah-din*) [μέγας, great; δύναμις, power]. A unit equal to a million dynes.

Megaelectrometer (*meg-ah-e-lek-trom'-et-er*) [μέγας, large; ἤλεκτρον, amber; μέτρον, measure]. An electrometer for measuring strong currents.

Megafarad (*meg-ah-far'-ad*) [μέγας, large; *Faraday*]. An electric unit equal to a million farads.

Megagastria (*meg-ah-gas'-tre-ah*) [μέγας, great; γαστήρ, belly]. Auxesis, or abnormal enlargement of the abdomen.

Megagnathus (*meg-ah-gna'-thus*) [μέγας, large; γνάθος, jaw]. Large-jawed.

Megalerg (*meg'-al-erg*). See *Electric Units*.

Megalesthete (*meg'-al-es-thēt*) [μέγας, great, large; αἰσθητής, one who perceives]. In biology, Moseley's term for peculiar organs of touch characteristic of the *Chitonidæ;* the "papilliform bodies" of Van Bemmelen. It is also written *Megalæsthete*.

Megaloblast (*meg'-al-o-blast*) [μέγας, large; βλαστός, germ]. A giant-cell or giant-corpuscle of the blood. See *Corpuscle*.

Megalocardia (*meg-al-o-kar'-de-ah*) [μέγας, large; καρδία, heart]. Auxesis, or enlargement of the heart.

Megalocarpous (*meg-al-o-kar'-pus*) [μέγας, great, large; καρπός, fruit]. In biology, producing large fruit.

Megalocelia (*meg-al-o-se'-le-ah*) [μέγας, large; κοιλία, belly]. Colon; also megagastria, *q. v.*

Megalocephalia (*meg-al-o-sef-a'-le-ah*) [μέγας, large; κεφαλή, head]. The condition of having a large or megacephalic head.

Megalocephalic (*meg-al-o-sef-al'-ik*). Same as *Megacephalic*.

Megalocephaly (*meg-al-o-sef'-al-e*). See *Megalocephalia*.

Megalocerus (*meg-al-os'-er-us*) [μέγας, large; κέρας, horn]. A monstrosity with horn-like projections on the forehead.

Megalocheirous (*meg-al-o-ki'-rus*) [μέγας, large; χείρ, hand]. Large-handed; having large antennæ.

Megalocornea (*meg-al-o-kor'-ne-ah*) [μέγας, large; *cornea*, cornea]. An enlarged condition of the cornea; it may depend upon congenital hypertrophy.

Megalocyte (*meg'-al-o-sīt*) [μέγας, large; κύτος, cell]. A red blood-corpuscle larger than the average; especially the form that characterizes pernicious anemia. See *Corpuscle*.

Megalodactylous (*meg-al-o-dak'-til-us*) [μέγας, great; δάκτυλος, digit]. Having an abnormal or excessive development and size of the fingers or toes.

Megalofrenum (*meg-al-o-fre'-num*) [μέγας, large; *frænum*, frenum]. An enlarged fourchet (Hadra).

Megaloglossia (*meg-al-o-glos'-e-ah*). Synonym of *Macroglossia*.

Megalomania (*meg-al-o-ma'-ne-ah*) [μέγας, great; μανία, madness]. Insanity with delusional ideas of one's own greatness or exaltation; applied especially to cases that do not present general paralysis, but a fixed and systematized delusion, or monomania of exaltation.

Megalomelia, Megalomelus (*meg-al-o-me'-le-ah, meg-al-om'-el-us*) [μέγας, great; μέλος, limb]. Fetal teratism characterized by great size of the limbs.

Megalophonic, Megalophonous (*meg-al-o-fo'-nik, meg-al-off'-o-nus*). Synonym of *Macrophonous*.

Megalopia (*meg-al-o'-pe-ah*). Synonym of *Megalopsia*.

Megalopodia (*meg-al-o-po'-de-ah*) [μέγας, large; πούς, foot]. The condition of having large feet.

Megalopore (*meg'-al-o-por*) [μέγας (μεγαλ-), large; πόρος, a pore or passage]. In biology, any large pore; specifically applied by Moseley to the larger of the pores arranged in more or less definite patterns in the tegmenta of the shells of nearly all chitonidæ. Cf. *Micropore*.

Megalopous (*meg-al-op'-us*). Synonym of *Macropous*.

Megalops (*meg'-al-ops*) [μέγας, (μεγαλ-), large; ὤψ, eye]. In biology, a stage in the development of certain crustaceans, characterized by relatively large eyes.

Megalopsia (*meg-al-op'-se-ah*) [μέγας, large; ὄψις, sight]. An apparent increase in the size of objects, ascribed to changes in the retinal end-organs, and to spasm of accommodation.

Megaloscope (*meg'-al-o-skōp*) [μέγας, great; σκοπεῖν, to inspect]. A magnifying endoscope or speculum.

Megaloscopy (*meg-al-os'-ko-pe*) [μέγας, large; σκοπεῖν, to inspect]. Inspection by means of the megaloscope.

Megalosplanchnos (*meg-al-o-splangk'-nos*) [μέγας, large; σπλάγχνον, viscus]. Possessing large viscera, especially a large liver.

Megalosplenia (*meg-al-o-sple'-ne-ah*) [μέγας, great; σπλήν, spleen]. Enlargement of the spleen.

Meganucleus (*meg-ah-nu'-kle-us*) [μέγας, large; *nucleus*, a kernel]. In biology, Maupas' term for the *macronucleus*, *nucleus*, or *endoblast*, of authors.

Megaphone (*meg'-ah-fōn*) [μέγας, great; φωνή, sound]. An instrument used for assisting the hearing of the deaf, by means of large reflectors of the sound-waves.

Megasclere (*meg'-ah-sklēr*) [μέγας, great, large; σκληρός, hard]. In biology, one of the large, skeletal spicules of a sponge, as distinguished from a *microsclere*.

Megascope (*meg'-ah-skōp*) [μέγας, large; σκοπεῖν, to inspect]. A microscope for examining objects of comparatively large size.

Megascopic (*meg-ah-skop'-ik*). See *Macroscopic*.

Megaseme (*meg'-ah-sēm*) [μέγας, great; σῆμα, sign, index]. See *Index*.

Megaspore (*meg'-ah-spōr*) [μέγας, great, large; σπόρος, seed]. Same as *Macrospore*.

Megasthenic (*meg-ah-sthen'-ik*) [μέγας, large; σθένος, strength]. Powerful; having great bodily strength.

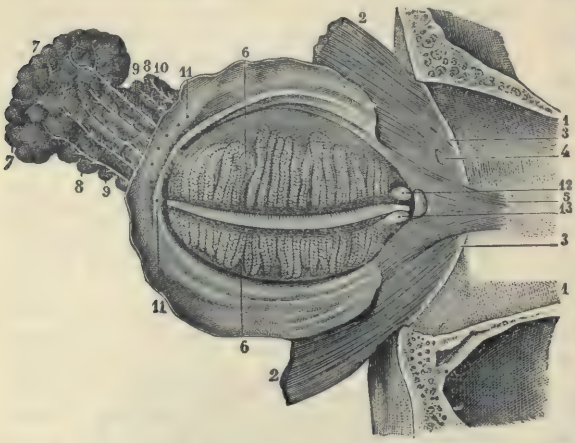
Megastoma (*meg-ah-sto'-mah*) [μέγας, large; στόμα, mouth]. A genus of infusorians. **M. entericum, M. intestinale,** a species found in the intestinal canal of the cat and of certain mice, and in human feces. It is probably identical with *Cercomonas intestinalis*.

Megastomatous (*meg-ah-sto'-mat-us*). Synonym of *Macrostomatous*.

Megavolt (*meg'-ah-volt*). See *Electric Units*.

Megazoöspore (*meg-az-o'-o-spor*) [μέγας, great; ζῷον, animal; σπόρος, seed]. Same as *Macrozoöspore*.

Meglin's Pills. Pills used in the treatment of neuralgia. They contain extract of hyoscyamus, oxid of zinc, and extract of valerian, each ¼ of a grain.



Megohm (*meg'-ōm*) [μέγας, great; *ohm*]. An electric unit equal to one million ohms.

Megrim (*me'-grim* or *meg'-rim*) [Fr., *migraine;* L., *hemicrania*]. Neuralgia or headache of one half of the head or upon one side, sometimes attended by aphasic and visual symptoms and sensory disturbance. See *Hemicrania* and *Migraine*.

Méhu's Test. See *Tests, Table of*.

Meibomian (*mi-bo'-me-an*) [*Meibomius*, a German physician]. Pertaining to Heinrich Meibom, or Meibomius, a German physician, 1638–1700. **M. Cyst,** a cyst of the Meibomian gland. **M. Glands,** the sebaceous glands of the eyelids, each having an excretory duct opening at the free border. Their secretion

prevents the tears from coming in contact with the skin. There are from 30 to 40 in the upper and from 20 to 30 in the lower lid.

THE LACRYMAL AND MEIBOMIAN GLANDS, AND ADJACENT ORGANS OF THE EYE.

1, 1. Inner wall of orbit. 2, 2. Inner portion of orbicularis palpebrarum. 3, 3. Attachment to circumference of base of orbit. 4. Orifice for transmission of nasal artery. 5. Muscle of Horner (tensor tarsi). 6, 6. Meibomian glands. 7, 7. Orbital portion of lacrymal gland. 8, 9, 10. Palpebral portion. 11, 11. Mouths of excretory ducts. 12, 13. Lacrymal puncta.

Meibomius, Cyst of, a cyst of a Meibomian gland. **M., Foramen of.** See *Foramina, Table of.* **M., Glands of.** See *Gland.*

Meigs's Capillaries. Capillaries penetrating the muscle-fibers of the heart. See *Capillary.* **M.'s Formula** or **Mixture,** an artificial food closely approaching in composition that of human milk. It consists of 10 c.c. of cream, 5 c.c. of milk, 10 c.c. of lime-water, 15 c.c. of water, and 2.2 grams of milk-sugar. It is alkaline in reaction, and is composed of 88.42 parts water, 11.58 parts total solids, 4 parts fat, 1.11 parts albuminoids, 6.26 parts sugar and 0.21 part ash.

Meio- (*mi'-o-*). For words thus beginning, see *Mio-*.

Meissner (*mis'-ner*). A German anatomist. **M., Corpuscles of.** See *Corpuscles, Tactile, of Wagner.* **M.'s Ganglia.** See *Ganglia, Table of.* **M.'s Method,** a method of inducing premature labor by puncturing the membranes close up to the fundus of the womb to permit of gradual escape of the liquor amnii. **M., Plexus of,** a plexus of nerves found in the submucous layer of the small intestine. See *Plexus.*

Mel [L.]. Honey. The substance deposited in the honeycomb by the common honey-bee, *Apis mellifica,* and a few other hymenopterous insects. It consists of a solution of cane-sugar and grape-sugar, with coloring and odorous matters. It is emollient, nutritive, and often laxative, its properties depending mainly on the character of the flowers from which it is taken. It is an excellent vehicle for expectorant gargles, etc. **M. boracis,** honey of borax; 64 grains of borax to the ounce of honey. **M. despumatum,** clarified honey, prepared by heating, skimming, and straining the natural product. **M. rosæ,** honey of rose; red rose 8, clarified honey 92 parts, dilute alcohol, *q. s.* It is used locally as a gargle.

Melada (*mel-a'-dah*) [Sp., fem. of *melar,* candy]. A moist brown sugar, produced like the muscovado, but not drained free of molasses.

Melagra (*mel-a'-grah*) [μέλος, limb; ἄγρα, seizure]. Pain or gout in the limbs.

Melain (*mel'-a-in*) [μέλας, black]. 1. The coloring principle of sepia. 2. A synonym of *Melanin.*

Melaleuca (*mel-al-u'-kah*). See *Cajuput.*

Melalgia (*mel-al'-je-ah*) [μέλος, limb; ἄλγος, pain]. Pain or neuralgia in the extremities.

Melam (*mel'-am*) [μέλας, black; *ammonia*], $C_6H_9N_{11}$. A complex cyanid, formed on rapidly heating $CNSNH_4$ to 200° C. with ammonium chlorid; it is a granular powder, of a yellow color, insoluble in water.

Melamin (*mel'-am-in*) [μέλας, black; *amin*], $C_3H_6N_6$. A substance obtained from crude melam by extraction with water. It is nearly insoluble in alcohol and ether, and crystallizes from hot water in shining monoclinic prisms.

Melamphonous (*mel-am'-fo-nus*) [μέλας, dark; φωνή, voice]. Hoarse-voiced.

Melampodium (*mel-am-po'-de-um*). See *Helleborus Black.*

Melampous (*mel-am'-pus*) [μέλας, black; πούς, foot]. Black-footed.

Melanæmia (*mel-an-e'-me-ah*). See *Melanemia.*

Melanagogue (*mel-an'-ag-og*) [μέλας, black; ἀγωγός, leading]. 1. Causing an expulsion of dark feces, or of bile. 2. A remedy that causes the expulsion of dark stools or of bile; formerly, a medicine of service in the treatment of choler, or melancholy.

Melancholia (*mel-an-ko'-le-ah*) [μέλας, black; χολή, bile; from a former supposition that it was due to excessive biliary secretion]. Melancholy; a form of insanity characterized by depression of spirits and gloominess without any adequate cause, the central idea being one of personal unworthiness. As the case develops, delusions, associated with illusions and hallucinations appear, and the patient may at times show suicidal tendencies. The general nutrition suffers, and in females menstruation is usually suppressed. The usual age at which melancholia appears is during middle life. It follows any depressing cause acting in conjunction with a strong hereditary tendency. It usually terminates in recovery, but some cases develop into dementia or mania, while others die from exhaustion, or commit suicide. **M. agitans, M. agitata, M., Excited,** or **M., Motor,** melancholia associated with excessive restlessness and mental agony. **M. attonita,** or **M. Stuporous,** a form in which the patient is plunged into absolute mental stupor. **M., Cataleptic,** a form associated with the cataleptic state. **M. catatonica** A synonym of *Catatonia.* **M., Delusional,** a form in which delusions constitute a prominent feature of the disease. **M. erotica,** a form caused by disappointment in love. **M. errabunda,** a form accompanied by great restlessness. **M., Homicidal,** melancholia with homicidal tendencies. **M., Hypochondriac,** in which the delusions refer mainly to the state of the patient's viscera. **M., Hysteric,** that due to hysteria. **M., Motor.** See *M. agitans.* **M., Puerperal,** melancholia appearing during the puerperium. **M., Resistive,** a form in which the extremities are rigid, and this rigidity increases when attempts are made to move them. The patient is obstinate in his nature also. **M., Simple,** the ordinary form. **M., Stuporous.** See *M. attonita.*

Melancholiac (*mel-an-ko'-le-ak*) [μέλας, black; χολή, bile]. A person who is affected with melancholia.

Melancholic (*mel-an-kol'-ik*) [μέλας, black; χολή, bile]. Sad; depressed; affected with melancholy.

Melancholy (*mel'-an-kol-e*). See *Melancholia.*

Melanchrous (*mel-an'-krus*) [μέλας, black; χρώς, color of skin]. Affected with melanism.

Melanedema (*mel-an-e-de′-mah*) [*μέλας*, black; *οἴδημα*, swelling]. Melanosis of the lungs.

Melanemia (*mel-an-e′-me-ah*) [*μέλας*, black; *αἷμα*, blood]. The presence in the blood-plasma or in the corpuscles, or in both, of dark pigment-granules due to the disintegration of the hemoglobin. Its most common cause is malaria. If very intense, as in pernicious forms of malaria, it may give rise to embolism of the capillaries of the brain or other organs.

Melanencephaloma (*mel-an-en-sef-al-o′-mah*) [*μέλας*, black; *ἐγκέφαλος*, brain; *ὄμα*, tumor]. A black outgrowth from the brain.

Melanephidrosis (*mel-an-ef-id-ro′-sis*) [*μέλας*, black; *ἐφίδρωσις*, morbid perspiration]. Black perspiration, or a disease characterized by black perspiration. See, also, *Chromidrosis*.

Melangeur (*mel-an-jur′*) [Fr.]. The graduated pipet of the hemocytometer.

Melanic (*mel-an′-ik*) [*μελανία*, blackness]. Characterized by, or pertaining to, a dark color, or to melanosis. **M. Acid**, $C_{10}H_8O_6$, a black powder resulting from the oxidation of potassium salicylate. It is insoluble in water, soluble in alcohol, ether, and alkalies.

Melanicterus (*mel-an-ik′-ter-us*) [*μέλας*, black; *ἴκτερος*, jaundice]. Black jaundice.

Melanidia (*mel-an-id′-e-ah*). See *Miner's Phthisis*.

Melanilin (*mel-an′-il-in*) [*μέλας*, black; *anilin*], $C_{13}H_{13}N_3$. A basic substance obtained from cyanogen chlorid and dry anilin.

Melanin (*mel′-an-in*) [*μέλας*, black]. 1. A black pigmentary matter occurring naturally in the choroid coat of the eye, the skin, the hair, the muscles, and, pathologically, in the skin in Addison's disease and in melanotic tumors. Melanin usually contains sulphur, more rarely iron. From its origin, being a product of cell-activity, it is classed as a metabolic pigment. It is generally soluble in hot alkalies and in hot acids, and its solutions are bleached by chlorin. 2. Specifically applied by Danilewsky to the pigment seen in the hematozoa of men and animals, and formed by these intracellular parasites from the hemoglobin of the red blood-corpuscles which they inhabit.

Melanism (*mel′-an-izm*) [*μέλας*, black]. In biology, the abnormal development of dark pigments in an organism.

Melano-cancroid (*mel-an-o-kang′-kroid*). Synonym of *Melano-carcinoma*.

Melano-carcinoma (*mel-an-o-kar-sin-o′-mah*) [*μέλας*, black; *καρκίνωμα*, carcinoma]. Melanotic carcinoma.

Melano-chlorosis (*mel-an-o-klo-ro′-sis*) [*μέλας*, black; *χλωρός*, green]. Chlorosis in which the skin has a blackish-green hue. Also the same as *Melanicterus*.

Melanochroic, Melanochroous (*mel-an-o-kro′-ik, mel-an-ok′-ro-us*) [*μέλας*, black; *χρόα*, color]. Having a dark color or complexion.

Melanocomous (*mel-an-ok′-o-mus*) [*μέλας*, black; *κόμη*, hair]. Black-haired.

Melanocyte (*mel′-an-o-sīt*) [*μέλας*, black; *κύτος*, cell]. Any wandering lymph-cell that has become discolored by the absorption of dark pigment-granules.

Melanoderma (*mel-an-o-der′-mah*), **Melanodermia** (*mel-an-o-der′-me-ah*) [*μέλας*, black; *δέρμα*, skin]. Black pigmentation or discoloration of the skin. **M., Parasitic.** See *Vagabond's Disease*.

Melanogen (*mel-an′-o-jen*) [*melanin*, from *μέλας*, black; *γεννᾶν*, to produce]. A material that becomes converted into melanin on the reception of the appropriate stimulus.

Melanoid (*mel′-an-oid*) [*μέλας*, black; *εἶδος*, like]. Dark-colored; resembling melanosis.

Melano-leukemia (*mel-an-o-lu-ke′-me-ah*) [*μέλας*, black; *λευκός*, white; *αἷμα*, blood]. Melanemia in association with leukemia.

Melanoma (*mel-an-o′-mah*) [*μελάνωμα*, from *μέλας*, black; *ὄμα*, tumor: *pl.*, *Melanomata*]. 1. A disease marked by the development and growth of black or dark-colored tubercles within the tissues of the viscera. 2. Any tumor containing or characterized by dark pigment.

Melanomyces (*mel-an-o-mi′-sēz*) [*μέλας*, black; *μύκης*, fungus]. A black fungous growth.

Melanopathy (*mel-an-op′-ath-e*), **Melanopathia** (*mel-an-o-path′-e-ah*) [*μέλας*, black; *πάθος*, illness]. A disease attended with increase or deepening of the normal pigmentation of a part.

Melanophthalmous (*mel-an-off-thal′-mus*) [*μέλας*, black; *ὀφθαλμός*, eye]. Black-eyed; having a melanoma of the eye.

Melanophyl (*mel′-an-o-fil*) [*μέλας*, black; *φύλλον*, leaf]. A black substance extracted from green leaves by means of hydrochloric acid and ether.

Melanorrhagia (*mel-an-or-a′-je-ah*) [*μέλας*, black; *ῥηγνύναι*, to burst forth]. The copious discharge of blackened feces.

Melanorrhea (*mel-an-or-e′-ah*) [*μέλας*, black; *ῥοία*, a flow]. Synonym of *Melena*. Also, a genus of the Anacardiaceæ. **M. usitata, M. usitatissima,** the black-varnish tree.

Melano-sarcoma (*mel-an-o-sar-ko′-mah*) [*μέλας*, black; *σάρξ*, flesh; *ὄμα*, tumor]. Melanotic sarcoma.

Melano-scirrhus (*mel-an-o-skir′-us*) [*μέλας*, black; *σκιῤῥός*, hard]. A form of scirrhous carcinoma characterized by pigmentation.

Melanose (*mel′-an-ōs*) [*μελάνωσις*, a becoming black]. A disease of grape-vines caused by the fungus *Septoria pelina*.

Melanosis (*mel-an-o′-sis*) [*μέλας*, black; *νόσος*, disease]. A general tendency to the formation in the blood, and the deposition in the skin, or in organs, of a dark pigment. **M. lenticularis progressiva.** See *Xeroderma pigmentosum*.

Melanosity (*mel-an-os′-it-e*) [*μέλας*, black; *νόσος*, disease]. The condition of being melanous; darkness, as of hair, eyes, or skin.

Melanospongus (*mel-an-o-spon′-gus*). Synonym of *Melanomyces*.

Melanothanatos (*mel-an-o-than′-at-os*). See *Plague*.

Melanotic (*mel-an-ot′-ik*) [*μέλας*, black; *νόσος*, disease]. Pertaining to melanosis.

Melanotrichous (*mel-an-ot′-rik-us*) [*μέλας*, black; *θρίξ*, hair]. Black-haired.

Melanous (*mel′-an-us*) [*μέλας* (*μελαν*), black]. In ethnology, applied to races with black hair and dark-brown or blackish skins. One of the two divisions of the *Melanochroi* according to Huxley's classification. Cf. *Xanthomelanous*.

Melanuresis (*mel-an-u-re′-sis*), **Melanuria** (*mel-an-u′-re-ah*) [*μέλας*, black; *οὖρον*, urine]. The presence of black pigmentary substance in the urine, or the disorder associated with it. Melanotic tumors are in some way related to this condition.

Melanuric (*mel-an-u′-rik*) [*μέλας*, black; *οὖρον*, urine]. Pertaining to, or characterized by, melanuria.

Melanurin (*mel-an-u′-rin*) [*μέλας*, black; *οὖρον*, urine]. A dark pigment found in the urine in melanuria; it is sometimes associated with the presence in the body of melanotic tumors.

Melas (*mel′-as*) [*μέλας*, black]. Black.

Melasicterus (*mel-as-ik′-ter-us*) [*μέλας*, black; *ἴκτερος*, jaundice]. Same as *Melanicterus*.

Melasma (*mel-az′-mah*) [*μέλας*, black]. Any morbid, dark discoloration of the skin. **M., Suprarenal.** Same as *Addison's Disease*. **M. Addisonii,** Addi-

son's disease. **M. palpebrarum**, the pigmentation about the eyelids observed in pregnancy and in certain nervous disorders. **M. uterinum**, melasma due to uterine disease.

Melasmic (*mel-az'-mik*) [μέλας, black]. Pertaining to or characterized by melasma.

Melastearrhea (*mel-as-te-ar-e'-ah*). Synonym of *Chromidrosis*.

Melatrophy (*mel-at'-ro-fe*) [μέλος, limb; ἀτροφία, lack of nutrition]. Wasting of the limbs.

Melaxanthous (*mel-aks-an'-thus*) [μέλας, black; ξανθός, yellow]. Black and yellow.

Meldometer (*mel-dom'-et-er*) [μέλδειν, to melt; μέτρον, measure]. An instrument for ascertaining the melting-points of metals, minerals, and other substances.

Meleagra (*mel-e-a'-grah*). Synonym of *Melagra*.

Melebiose (*mel-eb'-e-ōs*) [μέλι, honey], $C_{12}H_{22}O_{11}$. One of the sugars produced in the hydrolysis of melitriose. See *Carbohydrates, Table of*.

Meleguetta Pepper. See *Grains of Paradise*.

Melem (*mel'-em*) [μέλας, black], $C_6H_6N_{10}$. A complex cyanid.

Melena (*mel-e'-nah*) [μέλας, black]. The evacuation of tar-like stools due to the presence therein of altered blood. It is met with in a number of diseases, and often follows a profuse attack of hemoptysis. Also, a name given to the so-called black vomit. **M. cholæa**, same as *Melanicterus*. **M. neonatorum**, an extravasation of blood into the stomach and intestines of the newborn infant, occurring most often in the first few hours of life. It is due to duodenal ulcer, hemophilia, or some congenital defect increasing the intra-abdominal blood-pressure.

Melenagogue (*mel-en'-ag-og*) [*melæna*; μέλας, black; ἀγωγός, leading]. A remedy for, or medicine useful in, melena.

Melene (*mel'-ēn*) [*mel*, honey], $C_{30}H_{60}$. An alkylen or olefin obtained from ordinary wax; it melts at 62° C.

Melenemesis (*mel-en-em'-es-is*) [μέλας, black; ἔμεσις, vomiting]. Black vomit.

Melenic (*mel-en'-ik*) [μέλας, black]. Pertaining to melena.

Meleno-diarrhea (*mel-en-o-di-ar-e'-ah*). Synonym of *Melena*.

Melenorrhagia (*mel-en-or-a'-je-ah*). Synonym of *Melena*.

Melezibiose (*mel-ez-ib'-e-ōs*), **Melezitose** (*mel-ez'-it-ōs*) [Fr., *melèze*, larch], $C_{18}H_{32}O_{16} + 2H_2O$. A carbohydrate that occurs in the juice of *Pinus larix*, and closely resembling cane-sugar. It is distinguished from the latter by its greater rotatory power, and in not being so sweet to the taste. It melts at 148° F. See *Carbohydrates, Table of*.

Melia (*me'-le-ah*). See *Azedirach*.

Meliasmus (*me-le-az'-mus*). Synonym of *Glanders*.

Melibiose (*mel-ib'-e-ōs*). Synonym of *Melebiose*.

Melicera, Meliceris (*mel-is-e'-rah, mel-is-e'-ris*) [μηλικηρίς; μέλι, honey; κηρός, wax]. Honey-cyst. A term loosely applied to any cystic tumor whose contents have a honey-like appearance; a cyst that has undergone colloid degeneration, the contents being changed into a more or less hyaline, thick, honey-like liquid. See *Molluscum contagiosum*.

Meliceria (*mel-is-e'-re-ah*) [μέλι, honey; κηρός, wax]. The thick gelatinous substance found in certain tumors.

Meliceric (*mel-is-er'-ik*) [μέλι, honey; κηρός, wax]. Pertaining to meliceris.

Meliceroma (*mel-is-er-o'-mah*). Synonym of *Meliceris*.

Melicerous (*mel-is'-er-us*). Synonym of *Meliceric*.

Melicerum (*mel-is-e'-rum*). See *Meliceris*.

Melichrous (*mel'-ik-rus*) [μέλι, honey; χρώς, color]. Honey-colored.

Melilot (*mel'-il-ot*) [μέλι, honey; λωτός, lotus]. Any plant of the genus *Melilotus*.

Melilotic Acid (*mel-il-ot'-ik*). See *Acid*.

Melilotus (*mel-il-o'-tus*) [μέλι, honey; λωτός, lotus]. A genus of leguminous herbs. **M. officinalis**, yellow melilot and other species (*M. cærulea*, and other varieties) are official in various European countries. Melilotus is diuretic, anodyne, and expectorant. It contains *Coumarin*, *q. v.*; the powdered leaves are used in Switzerland for flavoring Chapziger cheese.

Melinephidrosis (*mel-in-ef-id-ro'-sis*) [μήλινος, quince-colored; ἐφίδρωσις, perspiration]. The excretion of a yellow sweat. It occurs in several infectious fevers in which the blood is profoundly altered, in jaundice, and after the excessive ingestion of rhubarb.

Meliphagous (*mel-if'-ag-us*) [μέλι, honey; φαγεῖν, to eat]. In biology, feeding upon honey; mellivorous.

Melissa (*mel-is'-ah*) [μέλισσα, a bee]. A genus of labiate plants. The leaves and tops of *M. officinalis*, lemon-balm, containing tannin, a bitter extractive, and an essential oil. It is a mild diaphoretic, but is employed chiefly as a flavor.

Melissyl (*mel-is'-il*) [μέλισσα, a bee; ὕλη, matter], $C_{30}H_6$. A hypothetic radicle occurring in many waxy compounds. It is also called *myricyl*.

Melitagra (*mel-it-a'-grah*) [μέλος, limb; ἄγρα, seizure]. Any arthritic or rheumatic pain in the limbs.

Melitagra (*mel-it-a'-grah*) [μῆλον, cheek; ἄγρα, seizure]. Eczema of the face.

Melitagra (*mel-it-a'-grah*) [μέλι, honey; ἄγρα, seizure]. The name given to the honey-like crusts sometimes seen in *Impetigo figurata*.

Melitemia (*mel-it-e'-me-ah*) [μέλι, honey; αἷμα, blood]. The presence of an excess of sugar in the blood.

Melithemia (*mel-ith-e'-me-ah*). See *Melitemia*.

Melithyperuria (*mel-ith-ip-er-u'-re-ah*) [μέλι, honey; ὑπέρ, over; οὖρον, urine]. Diabetes mellitus.

Melitis (*mel-i'-tis*) [μῆλον, cheek; ιτις, inflammation]. Inflammation of a cheek.

Melitismus (*mel-it-iz'-mus*) [μελιτισμός, from μέλι, honey]. The use of honey in medicine; an electuary of honey for cough in children.

Melitoptyalismus (*mel-it-o-ti-al-iz'-mus*) [μέλι, honey; πτύαλον, saliva]. The production of melitoptyalon.

Melitoptyalon (*mel-it-o-ti'-al-on*) [μέλι, honey; πτύαλον, saliva]. A saliva containing glucose said to be secreted by persons suffering from hectic fever.

Melitose (*mel'-it-ōs*) [μέλι, honey], $C_{18}H_{32}O_{16} + 5H_2O$. Raffinose, melitriose. A carbohydrate occurring in large quantity in Australian manna, flour of cotton-seeds, in small amounts in sugar-beets, and in the molasses in sugar-manufacture. It crystallizes in needles, which are more soluble in water and less in alcohol than cane-sugar. It is more strongly dextrorotatory than cane-sugar, and does not reduce Fehling's solution, but is easily fermented by yeast. See *Carbohydrates, Table of*.

Melitriose (*mel-it'-re-ōs*). See *Melitose*.

Melituria (*mel-it-u'-re-ah*) [μέλι, honey; οὖρον, urine]. Diabetes mellitus. **M. inosita**, the presence of inosite in the urine.

Melleous (*mel'-e-us*) [*melleus*, from *mel*, honey]. Honey-like.

Mellifavium (*mel-if-a'-ve-um*). Synonym of *Meliceria*.

Melliferous (*mel-if'-er-us*) [*mel*, honey; *ferre*, to bear]. Producing or carrying honey.

Mellific (*mel-if'-ik*) [*mel*, honey; *facere*, to make]. Producing honey.

Melligerous (*mel-ij'-er-us*). See *Mellific*.

Mellimid (*mel'-im-id*). See *Paramid*.

Mellin's Food. A variety of Liebig's food for infants. Its composition is: Water 5.0, fat 0.15, grape-sugar

44.69, cane-sugar 3.51, starch none, soluble carbohydrates 85.44, albuminoids 5.95, ash 1.89.

Mellita (*mel-i'-tah*) [*μέλι*, honey]. Pharmaceutic preparations known as *honeys*. They consist of honey, either natural, clarified, or flavored. There are three officinal *mellita*.

Mellitæmia (*mel-it-e'-me-ah*). See *Melitemia*.

Mellite (*mel'-it*). See Mellitic Acid.

Mellithemia (*mel-ith-e'-me-ah*). See *Melitemia*.

Mellitic Acid (*mel-it'-ik*). See *Acid*.

Mellituria (*mel-it-u'-re-ah*). See *Melituria*.

Mellivorous (*mel-iv'-o-rus*) [*mel*, honey; *vorare*, to devour]. In biology, feeding upon honey; meliphagous.

Mellogen (*mel'-o-jen*) [*μέλι*, honey; *γεννᾶν*, to produce], $C_{11}H_2O_4$. An amorphous, shiny substance obtained in the electrolysis of distilled water. It is infusible, soluble in hot water and in alkalies, insoluble in most mineral acids and other solvents; it possesses coloring properties.

Mellon (*mel'-on*), $C_3H_3N_9$. A complex cyanid produced on igniting ammonium sulphocyanid, melam, and other substances. It is a yellow insoluble powder.

Mellonic Acid (*mel-on'-ik*). Synonym of *Mellon*, and also of *Hydromellonic Acid*.

Mellophanic Acid (*mel-o-fan'-ik*). See *Acid*.

Melocactus (*mel-o-kak'-tus*) [*μῆλον*, melon; *κάκτος*, prickly plant]. A genus of the cactus family (*Cactaceæ*). **M. communis**, melon thistle, Turk's cap, Englishman's or Pope's head. A West Indian species possessing edible fruits. It is expectorant and antisyphilitic.

Melocampyle (*mel-o-kam'-pil*) [*μέλος*, limb; *καμπύλη*, crooked staff]. Deformity of the limbs from bending.

Melodidymus (*mel-o-did'-im-us*) [*μέλος*, limb; *διδυμος*, double]. A monstrosity with double limbs. Melodidymi are twins united by the limbs.

Melomania (*mel-o-ma'-ne-ah*) [*μέλος*, song; *μανία*, madness]. Inordinate devotion to music.

Melomaniac (*mel-o-ma'-ne-ak*) [*μέλος*, song; *μανία*, madness]. One who is affected with melomania.

Melomelia (*mel-o-me'-le-ah*). See *Melomelus*.

Melomelus (*mel-om'-el-us*) [*μέλος*, limb]. Melomelia; a form of double monster in which rudimentary limbs are attached at the point of junction of the normal limbs.

Meloncus (*mel-ong'-kus*) [*μῆλον*, cheek; *ὄγκος*, tumor]. A tumor of the cheek.

Melon-seed Bodies. Gelatinous bodies, somewhat resembling melon-seeds, found in joints and tendon-sheaths. The method of their origin is in dispute. They are also known as *rice-like bodies*.

Meloplastic (*mel-o-plas'-tik*) [*μῆλον*, cheek; *πλάσσειν*, to form]. Pertaining to meloplasty.

Meloplasty (*mel'-o-plas-te*) [*μῆλον*, cheek; *πλάσσειν*, to form]. The operation of engrafting or forming a new growth of tissue upon the cheek, in repair of an injury.

Melos (*me'-los*) [*μέλος*, a limb]. Limb.

Melosalgia (*mel-os-al'-je-ah*). See *Melalgia*.

Meloschisis (*mel-os'-kis-is*) [*μῆλον*, cheek; *σχίσις*, cleft]. A congenital cleft of the cheek.

Melosis (*me-lo'-sis*) [*μήλη*, probe]. The process of probing.

Melotridymus (*mel-o-trid'-im-us*) [*μέλος*, limb; *τρίδυμος*, threefold]. A fetal monstrosity with three pairs of limbs.

Melotris (*mel-o'-tris*) [*μήλη*, probe; *οὖς*, ear]. An aural probe.

Melt [ME., *melten*, to melt]. 1. To liquefy by means of heat. 2. The spleen of animals. More properly *milt*, *q. v.*

Melting (*melt'-ing*) [ME., *melten*, to melt]. Liquefying by means of heat. **M.-point**, the degree of temperature at which solids pass into the liquid state.

Melustum (*mel-us'-tum*) [*mel*, honey; *ustum*, from *urere*, to burn]. Molasses.

Memba Yaw (*mem'-bah yaw*) [for *remember*-yaw]. A yaw or frambesial excrescence occurring long after the primary attack of the yaws is over. See *Yaws*.

Member (*mem'-ber*) [*membrum*, a limb]. A part of the body, especially a projecting part, having a distinct function, as the legs, the arms, the tail, the penis. **M., Abdominal**, one of the hind or lower limbs. **M., Pelvic, M., Posterior**, one of the hind or lower limbs. **M., Thoracic**, one of the fore or upper limbs. **M., Virile**, the penis.

Membra (*mem'-brah*) [L.]. Plural of *Membrum*.

Membral (*mem'-bral*) [*membrum*, limb]. Pertaining to a limb or member.

Membrana (*mem-bra'-nah*) [L.: *pl.*, *Membranæ*]. A membrane. **M. adiposa**, the subcutaneous fatty layer. **M. adventitia**, the adventitia; also, the decidua reflexa. **M. agnina**, the amnion. **M. anterioris elastica**. See *Lamina, Elastic*. **M. basilaris**. See *Lamina basilaris*. **M. caduca**, the decidua. **M. capsularis**, a capsular ligament. **M. carnosa**: 1. The platysma myoides. 2. The dartos. **M. cellulosa**; 1. The decidua. 2. Adipose tissue. **M. ceratodes**, the cornea. **M. coronæ ciliaris**, zonule of Zinn. **M. coronoides**, the iris. **M. corticalis**, the vitelline membrane. **M. crassa**, the decidua reflexa. **M. cribriformis**, the decidua. **M. cribrosa**: 1. The decidua vera. 2. The septum crurale. **M. decidua**. See *Decidua*. **M. dentata**, the ligamentum denticulatum. See *Ligament*. **M. dermatodes**, the dura. **M. externa**, the vitelline membrane. **M. filamentosa**, the decidua reflexa. **M. flaccida**. See *Shrapnell's Membrane*. **M. foraminalis**, the iris. **M. germinativa**, the blastoderm. **M. granulosa**, the layer of small polyhedral cells within the theca folliculi of the Graafian follicle. **M. intermedia**, the mesoblast; also, the layer of gelatinous tissue between the amnion and chorion. **M. intestinalis**, the allantois, *q. v.* **M. Jacobi**. See *Membrane, Jacob's*. **M. laminosa**, the membrane covering the fetal surface of the placenta after removal of the amnion. It is the atrophied allantois. **M. limitans**, the limiting layer of the retina. There are two of these, the *interna* and *externa*, which are derived from either extremity of the fibers of Müller. **M. limitans interna**, applied by His to the layer formed in the developing spinal cord by the ental or central ends of the spongioblasts which later become the endyma. **M. localis**, the pia. **M. media**, the endochorion, *q. v.* **M. media cerebri**, the arachnoid. **M. medullaris**, the endyma. **M. mollis**, the pia. **M. neurium**, the epineurium, *q. v.* **M. nictans, M. nictitans**. See *Membrane, Nictitating*. **M. pellucida**, the amnion, *q. v.* **M. pigmenta**, the uvea iridis. **M. prolifera**, the blastodermic membrane. **M. proligera**. See *Discus proligerus*. **M. propria**, the delicate membrane upon which the epithelium of membranes, especially mucous membranes, rests; the basement membrane. **M. propria cerebri**, the pia. **M. pupillaris**. See *Membrane, Pupillary*. **M. putaminis**, the secondary envelop of a bird's egg; a fibrous membrane secreted in successive laminæ, covering the entire egg and albumen. **M. pyogena**. See *Membrane, Pyogenic*. **M. quadrangularis**, a fibrous membrane extending from the epiglottis to the arytenoid cartilages, as far as the free edge of the ary-epi-

glottic folds. **M. ruyschiana,** the middle or capillary layer of the choroid. **M. semilunaris conjunctivæ.** See *Membrane, Nictitating.* **M. serotina,** that part of the decidua which enters into the formation of the placenta. **M. sinuosa, M. spongiosa,** the decidua. **M. tectoria,** a delicate membrane of the internal ear, extending from the upper lip of the limbus above the sulcus spiralis and the organ of Corti as far as the last row of the outer hair-cells. It is also known as Corti's membrane. **M. tensa,** the tympanic membrane proper, exclusive of Shrapnell's membrane. **M. tenuis,** the arachnoid. **M. tympani.** See *Membrane, Tympanic.* **M. tympani, Artificial.** See *Membrane, Tympanic.* **M. tympani secundaria.** See *Membrane, Secondary Tympanic.* **M. urinaria,** the allantois. **M. vasculosa cerebri,** the pia. **M. vibrans.** Synonym of *M. tensa.* **M. virginalis,** the hymen. **M. vocalis,** the portion of the laryngeal mucosa investing the vocal bands.

Membranaceous (*mem-bran-a′-ce-us*) [*membranaceus*, from *membrum*, member]. Pertaining to, consisting of, or of the nature of, a membrane.

Membrane (*mem′-brān*) [*membrana*, from *membrum*, member]. In anatomy, a term applied to almost any thin, enveloping or lining substance. In the plural it usually signifies the fetal membranes. **M., Adventitious.** See *Adventitia.* **M., Albugineous.** See *Albuginea.* **M., Amphiblestroïd,** the retina. **M., Animal,** a membrane made from animal tissues, used in dialyzing; also, in the plural, the fetal membranes. **M., Arachnoid.** See *Arachnoid.* **M. of Arnold,** the pigmented layer of the iris. **M. of Ascherson.** See *M., Haptogenous.* **M., Bacillar.** See *M., Jacob's.* **M., Basement** or **Basal,** in histology, a delicate membrane, made up of flattened cells, and underlying the epithelium of the mucous surfaces. **M.-bone,** any bone that originates, not in cartilage, but in membrane, such as some of the cranial and facial bones. **M., Bowman's.** See *Bowman.* **M. of Bruch,** a thin, transparent, homogeneous membrane, the external or vitreous lamina of the choroid of the eye. **M., Caducous,** the decidua. **M., Cell,** the membrane surrounding a cell; the cell-wall. **M. of Corti.** See *Membrana tectoria.* **M., Costo-coracoid,** a dense layer of fascia extending between the subclavius muscle and the pectoralis minor, and forming the anterior portion of the sheath of the axillary vessels. **M., Crico-thyroid,** the triangular membrane connecting the thyroid and cricoid cartilages of the larynx. **M., Croupous.** See *M., Diphtheric.* **M., Debove's,** a deep, germinal layer of flattened cells in the mucosa of the trachea and extrapulmonary bronchi. **M. of Descemet.** See *Descemet's Membrane.* **M., Diphtheric,** a fibrinous layer formed on the surface of mucous membranes and extending downward for a variable depth. It is due to a process of coagulation-necrosis. The most common cause of its formation is the bacillus of diphtheria; irritant poisons also may produce it. **M., Drum.** Synonym of the tympanic membrane. **M., Elastic,** a membrane largely composed of elastic fibrous tissue. **M., Elytroid,** the fibers of the cremaster muscle covering the testicle. **M., False.** See *M., Diphtheric.* **M., Fenestrated.** See *Fenestrated Membrane of Henle.* **M., Fetal,** a name given to the chorion, amnion, and allantois. **M., Germinal,** the blastoderm. **M., Glassy,** the hyaloid membrane. **M., Granular.** See *Membrana granulosa.* **M., Haptogenous,** a delicate albuminous pellicle supposed to envelop the fat-globules of milk and of other fluids containing fat and albumin. **M., Homogeneous,** a delicate layer of connective tissue covering the placental villi. **M., Huxley's,** a sheath peculiar to hair and surrounding the proximal part of the shaft. **M., Hyaloid,** a delicate areolar membrane investing the vitreous humor of the eye. **M., Inorganic,** a membrane used in dialyzing fluids; it is composed of silicic acid. **M., Internal,** the endyma, *q.v.* **M., Interosseous,** a thin aponeurosis of parallel fibers extending between contiguous borders of the tibia and fibula, and the ulna and radius. **M., Jacob's,** the layer of rods and cones of the retina. **M., Krause's,** a thin, transverse, dark disc bisecting the light substance of the striped muscle-fibers; it divides the fibers into muscular compartments. **M., Meconic,** a layer within the rectum of the fetus, supposed to invest the meconium. **M., Mucous,** the continuation of the skin lining those internal cavities and organs exposed to or communicating with the air. It is kept moist by the mucus secreted by the goblet-cells and mucous glands. **M. of Nasmyth,** a delicate but firm membrane covering the ectal surface of the enamel for a short time after birth. **M., Nictitating,** the plica or third eyelid, a mucous fold at the nasal canthus of the eyes of birds and certain quadrupeds. **M., Nuclear,** the membrane surrounding the nucleus of a cell. **M., Obturator,** the fibrous membrane closing the obturator foramen. **M., Olfactory.** See *M., Schneiderian.* **M., Ovular.** See *M., Vitelline.* **M., Perforated** (*of Henle*), the ental elastic layer of an artery. **M., Perifibril,** a special membrane surrounding the skeletal threads of some sponges (*Chalinula*); it is composed of epithelial cells, either transparent or deeply-colored with granules (Hyatt). **M., Periodontal,** a fibrous layer covering the cement of teeth. **M., Pharyngeal,** the oral plate separating the primitive oral and pharyngeal cavities in the embryo. It is formed of an anterior ectodermic and posterior entoderm mic layer. **M., Pituitary.** Same as *M., Schneiderian.* **M., Primary,** the basement membrane. **M., Preformation,** a doubtful membrane supposed to cover the dentine papilla. **M., Proligerous.** See *Disc proligerus.* **M., Pseudo.** See *M., Diphtheric.* **M. Pupillary,** a delicate, transparent membrane closing the pupil in the fetus. It disappears between the seventh and eighth months. **M., Pyogenic,** the fibrous membrane forming the lining of abscess-cavities; instead of being a pus-producing membrane, it is really a protective layer, limiting the spread of the abscess, although it may form pus under certain circumstances. **M., Pyophylactic,** a term suggested by Roswell Park for the so-called "pyogenic membrane." **M., Reichert's.** See *M., Bowman.* **M. of Reissner,** a delicate membrane stretching across the outer wall of the cochlea. **M., Reticular,** the membrane covering the space of the outer hair cells of the cochlea. **M. of Ruysch.** See *Membrana ruyschiana.* **M., Schneiderian,** the mucosa lining the nasal fossæ. **M. of Schwann.** See *Neurilemma.* **M., Serous,** a delicate membrane covered with flat endothelial cells lining closed cavities of the body, *e.g.*, the peritoneum, the pleura. **M., Shell.** See *Membrana putaminis.* **M., Shrapnell's,** a small portion of the drum-membrane filling the notch of Rivini. It differs from the remainder of the drum-membrane in that it contains none of the fibrous tissue proper to the drum. It is also called *Membrana flaccida.* **M., Synovial,** membrane covering the articular extremities of bones and the inner surface of ligaments entering into the formation of a joint. **M., Tectorial.** See *Membrana tectoria.* **M., Tenon's.** See *Tenon's Capsule.* **M., Thyro-hyoid,** the broad membrane joining the thyroid cartilage and the hyoid bone. **M., Tubula**

the neurilemma, *q. v.* **M., Tympanic,** the membrane separating the external from the middle ear. It consists of three layers: an ectal or skin layer, a fibrous layer, and an ental layer like that lining the middle ear. **M., Undulator,** a delicate membrane uniting the spinal filament to the body and tail of the spermatozoön. **M., Utero-epichorial,** the decidua vera. **M., Vascular** (*of the eye*), the choroid, *q. v.* **M., Vestibular.** Same as *M. of Reissner.* **M., Virginal,** the hymen, *q. v.* **M., Vitellary, M., Vitelline,** the true cell-membrane of the ovum, lying within the zona pellucida. **M., Vitreous,** the membrane of Descemet; also the basement membrane of a hair-follicle. **M., Wachendorf's,** the papillary membrane. **M., Yolk.** Same as *M., Vitelline.* **M., Zinn's.** See *Zonule of Zinn.*

Membraneous (*mem-bra'-ne-us*). See *Membranous.*

Membraniform (*mem-bran'-if-orm*). See *Membranous.*

Membranine (*mem'-bran-in*). See *Membranous.*

Membrano-carneous (*mem-bran'-o-kar'-ne-us*) [*membrana*, membrane; *caro*, flesh]. Of a membranous and fleshy structure.

Membranocranium (*mem-bran-o-kra'-ne-um*) [*membrana*, membrane; κρανίον, skull]. The membranous skull of the fetus, prior to ossification.

Membranogenic (*mem-bran-o-jen'-ik*) [μεμβράνα, parchment membrane; γενής, producing]. In biology, having a tendency to form a membrane or a membranous growth.

Membranoid (*mem-bran-oid'*) [*membrana*, membrane; εἶδος, like]. Resembling membrane.

Membranology (*mem-bran-ol'-o-je*) [*membrana*, membrane; λόγος, science]. The anatomy, physiology, and pathology of the membranes of the body.

Membranosus (*mem-bran-o'-sus*) [*membrana*, membrane]. Membranous. **M., Semi-,** one of the hamstring muscles. See *Muscles, Table of.*

Membranous (*mem'-bran-us*) [*membranosus*, membranous]. Having the nature of, or characterized by, a membrane. In biology, applied to an organ or part that is flattened, thin and flexible. **M. Labyrinth.** See *Labyrinth.* **M. Urethra,** the part of the urethra between the two layers of the triangular ligament.

Membranula, Membranule (*mem-bran'-u-lah, mem-bran'-ūl*) [dim. of *membrana*, membrane]. A small membrane. In biology, specifically applied to a portion of the wing of certain insects.

Membranulet (*mem-bran'-u-let*). Same as *Membranula.*

Membrosus (*mem-bro'-sus*) [*membrum*, limb]. Having a large penis.

Membrum (*mem'-brum*) [L.: *pl., Membra*]. Same as *Member.* **M. muliebre,** the clitoris. **M. seminale, M. virile,** the penis.

Memory (*mem'-o-re*) [*memoria*, a recalling]. That faculty of the mind that enables one to recall ideas, events, and the images of objects that have produced sensation. **M., Loss of.** See *Amnesia.*

Menagogue (*men'-ag-og*). Synonym of *Emmenagogue.*

Menatechenzie (*men-at-ek-en'-ze*). See *Palmus.*

Mendel's Convolution. See *Convolutions, Table of.*

Mendelejeff's Classification. See *Element.*

Mendosus (*men-do'-sus*) [*mendax*, false]. False; applied to certain incomplete parts, as the floating ribs.

Menelcosis (*men-el-ko'-sis*) [μῆνες, menses; ἕλκωσις, ulceration]. Ulceration of the leg, with vicarious menstruation from the sore.

Menellipsis (*men-el-ip'-sis*) [μῆνες, menses; ἔλλειψις, a falling off]. Menopause.

Menes (*men'-ēz*) (μῆνες, menses]. Menses.

Menhaden Oil (*men-ha'-dn*) [a corruption of the Indian *munnawhatteaug*]. An oil obtained from the *Alosa menhaden*, a kind of herring. It is used in soap-making and in tanning, and, when pure, as a substitute for cod-liver oil.

Menhidrosis, Menidrosis (*men-hid-ro'-sis, men-id-ro'-sis*) [μῆνες, menses; ἱδρωσις, sweat]. A form of vicarious menstruation said to consist in monthly excess of sweat, sometimes sanguineous, instead of the menstrual flow.

Ménière's Disease. A disease or injury probably of the semicircular canals, characterized by nausea, vomiting, vertigo, deafness, tinnitus aurium, and other phenomena. It is called also aural or auditory vertigo. See *Diseases, Table of.*

Meningarthrocace (*men-in-gar-throk'-as-e*) [μῆνιγξ, membrane; ἄρθρον, joint; κακός, evil]. Inflammation of joint-membranes.

Meningeal (*men-in'-je-al*) [μῆνιγξ, membrane]. Pertaining to any membrane of the brain or myel, especially the dura.

Meninges (*men-in'-jez*) [pl. of μῆνιγξ, membrane]. A name applied to the membranes of the brain and myel, the dura, pia, and arachnoid. **M., Lepto-,** the pia and arachnoid.

Meningina (*men-in-ji'-nah*) [μῆνιγξ, membrane]. The pia and arachnoid considered as the proper meninges, and apart from the dura; the pia-arachnoid.

Meninginitis (*men-in-jin-i'-tis*) [μῆνιγξ, membrane; ιτις, inflammation]. Inflammation of the meningina; leptomeningitis.

Meningitic (*men-in-jit'-ik*) [μῆνιγξ, membrane]. Pertaining to, or affected with, meningitis.

Meningitis (*men-in-ji'-tis*) [μῆνιγξ, membrane; ιτις, inflammation]. Inflammation of the membranes of the brain or cord; that of the dura is termed pachymeningitis, that of the pia-arachnoid, leptomeningitis. **M., Acute.** See *Leptomeningitis.* **M., Ascending,** a form that begins in the membranes of the lower cord and ascends. **M., Basilar.** See *M., Tuberculous.* **M., Cerebral, M., Cerebro-spinal,** a form affecting the membranes of the brain, and those of the cord and brain respectively. It is usually epidemic. **M. of the Convexity,** simple leptomeningitis. **M., Epidemic.** Synonym of *Fever, Cerebro-spinal.* **M., Granular,** the same as *M., Tuberculous.* **M., Malignant.** Synonym of *Fever, Cerebro-spinal.* **M., Rhachidian.** Synonym of *M., Spinal.* **M., Scrofulous.** See *M., Tuberculous.* **M., Septic,** that due to an infectious process. **M. siderans,** a fulminant, rapidly fatal form of cerebro-spinal fever. **M., Simple,** that not due to tuberculosis or sepsis. **M., Spinal,** meningitis of the membranes of the spinal cord. **M., Syphilitic,** meningitis due to syphilis. **M., Traumatic,** that following injury to the skull or spinal column. **M., Tuberculous,** inflammation of the pia of the brain, with effusion of lymph and pus, caused by the deposit of miliary tubercles upon its surface or into its substance. **M., Typhoid.** Synonym of *Fever, Cerebro-spinal.*

Meningitophobia (*men-in-git-o-fo'-be-ah*) [μῆνιγξ, membrane; ιτις, inflammation; φόβος, fear]. An exaggerated fear of meningitis when the disease is epidemic, sometimes leading to the development of the symptoms of the disease.

Meningocele (*men-in'-go-sēl*) [μῆνιγξ, membrane; κήλη, tumor]. A tumor composed of cerebral or spinal membranes containing fluid, and perhaps nerve-tissue, protruding from an anomalous opening in the cranium or spinal column, usually covered by skin, but sometimes exposed by cutaneous defect.

Meningo-cephalitis (*men-in'-go-sef-al-i'-tis*). See *Meningo-encephalitis.*

Meningo-cerebritis (*men-in'-go-ser-e-bri'-tis*). See *Meningo-encephalitis.*

Meningococcus (*men-in'-go-kok'-us*) [*μῆνιγξ*, membrane; *κόκκος*, coccus]. A name for the supposed coccus, or microbe, of cerebro-spinal fever. See *Micrococcus intercellularis meningitidis* under *Bacteria, Synonymatic Table of.*

Meningo-encephalitis (*men-in'-go-en-sef-al-i'-tis*) [*μῆνιγξ*, membrane; *ἐνκέφαλον*, brain; *ιτις*, inflammation]. An inflammation of the brain and its membranes.

Meningo-ependymitis (*men-in'-go-ep-en-dim-i'-tis*) [*μῆνιγξ*, membrane; *ἐπένδυμα*, ependyma; *ιτις*, inflammation]. Meningitis with inflammation of the ependyma, a condition seen in adult hydrocephalus.

Meningo-gastralgia (*men-in'-go-gas-tral'-je-ah*) [*μῆνιγξ*, membrane; *γαστήρ*, stomach; *ἄλγος*, pain]. A painful condition of the mucous membrane of the stomach.

Meningo-gastric (*men-in'-go-gas'-trik*) [*μῆνιγξ*, membrane, *γαστήρ*, stomach]. Pertaining to the membranes of the stomach.

Meningo-gastritic (*men-in'-go-gas-trit'-ik*) [*μῆνιγξ*, membrane; *γαστήρ*, stomach; *ιτις*, inflammation]. Pertaining to meningo-gastritis.

Meningo-gastritis (*men-in'-go-gas-tri'-tis*) [*μῆνιγξ*, membrane; *γαστήρ*, stomach; *ιτις*, inflammation]. 1. Inflammation of the mucosa of the stomach. 2. Meningitis associated with gastritis.

Meningo-malacia (*men-in'-go-mal-a'-se-ah*) [*μῆνιγξ*, membrane; *μαλακία*, softness]. A softening of the cerebral or spinal meninges, or other membranes.

Meningomyces (*men-in-go-mi'-sēz*) [*μῆνιγξ*, membrane; *μύκης*, fungus). Fungosity of the meninges.

Meningo-myelitis (*men-in'-go-mi-el-i'-tis*) [*μῆνιγξ*, membrane; *μυελός*, marrow; *ιτις*, inflammation]. Inflammation of the myel and its meninges.

Meningo-myelocele (*men-in'-go-mi'-el-o-sēl*) [*μῆνιγξ*, membrane; *μυελός*, marrow; *κήλη*, tumor]. A tumor containing a portion of the myel, with its enveloping meninges.

Meningophylax (*men-in-gof'-il-aks*) [*μῆνιγξ*, membrane; *φύλαξ*, guard]. An old form of instrument for protecting the brain from injury during operations after trephining.

Meningorrhachidian (*men-in'-go-rak-id'-e-an*) [*μῆνιγξ*, membrane; *ῥάχις*, spine]. Relating to the spinal meninges.

Meningorrhagia (*men-in-gor-a'-je-ah*) [*μῆνιγξ*, membrane; *ῥηγνύναι*, to burst forth]. Meningeal hemorrhage.

Meningorrhea (*men-in-gor-e'-ah*) [*μῆνιγξ*, membrane; *ῥοία*, a flow]. Meningeal hemorrhage, or extravasation of blood.

Meningosis (*men-in'-go-sis*) [*μῆνιγξ*, membrane]. The union of bones by a membranous attachment.

Meningo-spinal (*men-in'-go-spi'-nal*) [*μῆνιγξ*, membrane; *spinalis*, spinal]. Meningeal and spinal; pertaining to the meninges of the spinal cord.

Meningo-symphysis (*men-in'-go-sim'-fis-is*) [*μῆνιγξ*, membrane; *σύν*, together; *φύειν*, to grow]. The morbid adhesion of the meninges to each other.

Meningo-symphytic (*men-in'-go-sim-fit'-ik*) [*μῆνιγξ*, membrane; *σύν*, with; *φύειν*, to grow]. Pertaining to or characterized by meningo-symphysis.

Meningo-syzygia (*men-in'-go-si-zij'-e-ah*) [*μῆνιγξ*, membrane; *συζυγία*, a coupling]. Same as *Meningo-symphysis.*

Meningozeuxis (*men-in'-go-zūks'-is*) [*μῆνιγξ*, membrane; *ζεῦξις*, a yoking]. Same as *Meningo-symphysis.*

Meningozeuxitis (*men-in'-go-zūks-i'-tis*) [*μῆνιγξ*, membrane; *ξεῦχις*, yoke; *ιτις*, inflammation]. Meningosymphysis with inflammation.

Meninguria (*men-in-gu'-re-ah*) [*μῆνιγξ*, membrane; *οὖρον*, urine]. The passage or presence of membranous shreds in the urine.

Meninguric (*men-in-gu'-rik*) [*μῆνιγξ*, membrane; *οὖρον*, urine]. Pertaining to or characterized by meninguria.

Meninx (*men'-ingks*) [*μῆνιγξ*, membrane]. Any one of the meninges, especially the dura.

Meniscitis (*men-is-i'-tis*) [*μηνίσκος*, crescent; *ιτις*, inflammation]. An inflammation of the semilunar cartilages of the knee-joint.

Meniscoid (*men-is'-koid*) [*μηνίσκος*, crescent; *εἶδος*, like]. Resembling a meniscus; crescent-shaped.

Meniscus (*men-is'-kus*) [*μηνίσκος*, a crescent: *pl.*, *Menisci*]. A concavo-convex lens. A concavo-convex articular cartilage, or the semilunar cartilage of the knee-joint. Also, the concavity or convexity produced on the surface of liquids in tubes and vessels by capillary attraction. **M., Tactile,** a form of nerve-ending with a concave surface turned ectad, each concavity containing a tactile cell.

Menispermin (*men-is-per'-min*) [*μήνη*, moon; *σπέρμα*, seed]. A precipitate from a tincture of the root of *Menispermum canadense;* alterative, tonic, laxative, diuretic, stimulant, and resolvent. Dose from 1 to 4 grains. Unof. 2. $C_{18}H_{24}N_2O_2$. A non-poisonous and inert alkaloid from *Anamirta cocculus* and *Menispermum canadense.*

Menispermum (*men-is-per'-mum*) [*μήνη*, moon; *σπέρμα*, seed]. The roots of *M. canadense*, or Canadian moon-seed. It is reputed to have tonic properties, and is used for sarsaparilla. Dose gr. v-xx in infusion; of a concentrated tinct., gtt. v-xv. **M., Ext., Fld.** Dose ʒj.

Menispin (*men'-is-pin*) [*μήνη*, moon; *σπέρμα*, seed]. A bitter alkaloid contained in the root of *Menispermum canadense.* It is readily soluble in alcohol, less so in water, in chloroform, and in ether.

Menocelis (*men-o-se'-lis*) [*μήν*, mouth; *κηλίς*, spot]. A dark spot upon the skin sometimes seen at or near the menstrual period.

Menocryphia (*men-o-krif'-e-ah*) [*μῆνες*, menses; *κρύφιος*, hidden]. Same as *Ischomenia.*

Menolipsis (*men-o-lip'-sis*) [*μῆνες*, menses; *λεῖψις*, an omission]. The retention or absence of the menses.

Menometastasis (*men-o-met-as'-tas-is*) [*μῆνες*, menses; *μετάστασις*, metastasis]. Vicarious menstruation.

Menopad (*men'-o-pad*) [*μῆνες*, menses; ME., *padde*, a pad]. A pad for catching the menstrual blood.

Menopause (*men'-o-pawz*) [*μῆνες*, menses; *παῦσις*, cessation]. The end of menstrual life, usually occurring at the age of from 45 to 50. It is also called the climacteric, or the change of life.

Menophania (*men-o-fa'-ne-ah*) [*μῆνες*, menses; *φαίνειν*, to appear]. The first appearance of the menses.

Menoplania (*men-o-pla'-ne-ah*) [*μῆνες*, menses; *πλάνη*, deviation]. A discharge of blood occurring at the menstrual period, but derived from some other part of the body than the uterus. Also, any deviation or aberration of the menstrual flow.

Menorrhagia (*men-or-a'-je-ah*) [*μῆνες*, menses; *ῥηγνύναι*, to burst forth]. An excessive menstrual flow.

Menorrhagic (*men-or-aj'-ik*) [*μῆνες*, menses; *ῥηγνύναι*, to burst forth]. Relating to, or characterized by, menorrhagia.

Menorrhalgia (*men-or-al'-je-ah*) [*μῆνες*, the menses; *ῥέειν*, to flow; *ἄλγος*, pain]. Painful menstruation. See *Dysmenorrhea* and *Menorrhspasm.*

Menorrhea (*men-or-e'-ah*) [*μῆνες*, menses; *ῥοία*, a flow]. The normal flow of the menses. Also, excessive menstruation.

Menorrhspasm (*men-or-spaz'-m*) [*μῆνες*, menses; *ῥεῖν*, to flow; *σπασμός*, spasm]. A painful, neuromuscular spasm of the uterus, caused by imperfect development and innervation, or by inflammatory processes.

Menoschesis (*men-os'-kes-is*) [*μῆνες*, menses; *σχέσις*, retention]. Retention of the menses.

Menoschetic (*men-os-ket'-ik*) [*μῆνες*, menses; *σχέσις*, retention]. Pertaining to, or characterized by, menoschesis.

Menosepsis (*men-o-sep'-sis*) [*μῆνες*, menses; *σῆψις*, putridity]. A putrid quality of the menses.

Menoseptic (*men-o-sep'-tic*) [*μῆνες*, menses; *σῆψις*, putridity]. Pertaining to, or of the nature of, menosepsis.

Menostasia, Menostasis (*men-os-ta'-ze-ah, men-os'-tas-is*) [*μῆνες*, menses; *στάσις*, standing]. A suppression of the menstrual flow.

Menostatic (*men-os-tat'-ik*) [*μῆνες*, menses; *στάσις*, a standing]. Pertaining to, or characterized by, menostasis.

Menotyphlosis (*men-o-tif-lo'-sis*) [*μήνη*, moon; *τύφλωσις*, a blinding]. Moon-blindness; a periodic blindness or dimness of vision, formerly ascribed to the influence of the moon, and popularly believed to affect certain horses.

Menoxenia (*men-oks-e'-ne-ah*) [*μῆνες*, menses; *ξένος*, strange, foreign]. Irregularity of menstruation.

Menoxenosis (*men-oks-en-o'-sis*) [*μήν*, month; *ξένωσις*, strangeness]. Same as *Menoxemia*.

Mens (*menz*) [L.: *gen.*, *mentis*]. Mind. *Compos mentis*, of sound mind. *Non compos mentis*, of unsound mind.

Menses (*men'-sēz*) [*mensis*, a month]. The recurrent monthly discharge of blood from the genital canal of the female during sexual life. See *Menstruation*. **M., Excessive, or Immoderate Flow of.** See *Menorrhagia*. **M., Obstructive, or Diminution of.** See *Amenorrhea*. **M., Suppression of.** See *Amenorrhea* and *Menostasis*.

Menstrua (*men'-stru-ah*) [L.: *pl.*, of *Menstruus*, monthly]. 1. The menses. 2. Plural of *Menstruum*, *q. v.* **M. alba.** Synonym of *Leukorrhea*.

Menstrual (*men'-stru-al*) [*menstrualis: menstruus*, monthly]. Pertaining to menstruation. **M. Blood**, the blood discharged at the menstrual period. **M. Colic.** See *Colic*. **M. Insanity.** See *Insanity*.

Menstruant (*men'-stru-ant*) [*menstruus*, monthly]. 1. Subject to, or capable of, menstruating. 2. One who menstruates, or is capable of menstruating.

Menstruate (*men'-stru-āt*) [*menstruare;* from *menstruus*, monthly]. To discharge the menstrual flow.

Menstruation (*men-stru-a'-shun*) [*menstruatio;* from *menstruus*, monthly]. A periodic discharge of a sanguineous fluid from the uterus and Fallopian tubes, occurring during the period of a woman's sexual activity, from puberty to the menopause. The flow is alkaline and composed of blood, shreds of mucous membrane, and vaginal and uterine secretion; it is darker than ordinary blood, and should not clot; its odor is characteristic and disagreeable; the usual quantity is from four to six ounces. **M., Vicarious**, the discharge of blood in connection with, or at the time of, menstruation, but taking place from some other organ or part than the vagina. Atopomenorrhea.

Menstruous (*men'-stru-us*) [*menstruus*, monthly]. Having, or pertaining to, the monthly flow.

Menstruum (*men'-stru-um*) [*menstruus*, monthly]. A liquid used for effecting solution. A solvent.

Mensuration (*men-su-ra'-shun*) [*mensurare*, to measure]. The estimation of quantity or dimension. In anatomy, the estimation of the dimensions of any organ or part of the body. In physical diagnosis, the measurement of parts of the body.

Mentagra (*men-ta'-grah*). See *Sycosis*. **M. parasitica.** See *Tinea sycosis*.

Mentagrophyte (*men-tag'-ro-fīt*), **Mentagrophyton** (*men-tag-roff'-it-on*) [*mentagra*, sycosis; *φυτόν*, plant]. A cryptogamous plant thought to cause sycosis.

Mental (*men'-tal*) [*mens*, the mind]. Pertaining to the mind. Also, pertaining to the *mentum* or chin. **M. Point.** See *Craniometric Points*.

Mentality (*men-tal'-it-e*) [*mens*, mind]. Mental activity and power; intellect.

Mentation (*men-ta'-shun*). See *Mentality* and *Ideation*.

Mentha (*men'-thah*) [L., mint]. A genus of labiate plants, including the true or typical mints. **M. arvensis, var.** *piperascens*. The source of *Menthol*, *q. v.* **M.-camphor.** See *Menthol*. **M. piperita**, peppermint. The leaves and tops of *M. piperita*, or common peppermint, having properties due to a volatile oil, in which form it is commonly used. It is an aromatic, stimulant, carminative, and antispasmodic, and is valuable internally to relieve flatulent colic, and externally to relieve superficial neuralgia. It is of reputed value in typhoid fever, and as an antiseptic in parasitic skin-diseases. **M. pip., Aqua**, contains 2 parts of the oil in 1000 of distilled water. Dose indefinite. **M. pip., Essentia** (B. P.) Dose ♏x–xx. **M. pip., Ol.**, the volatile oil, consists of a liquid terpene and a camphor, *menthol*, *q. v.* Dose ♏j–v. **M. pip., Spt.**, essence of peppermint, contains 10 per cent. of the oil and 1 per cent. of the herb in alcohol. Dose ♏x-xxx. **M. pip., Trochisci**, each contains $\frac{1.5}{100}$ of the oil, with sugar and tragacanth. Dose indefinite. **M. pulegium**, the true or European pennyroyal. Its odor and properties are much the same as those of American pennyroyal. **M. viridis**, spearmint. The leaves and tops of common "kitchen" mint, *M. viridis*, having properties due to a volatile oil, differing slightly in taste and odor from oil of peppermint. Its medicinal properties are like those of *M. piperita*. **M. virid., Aq.**, 2 parts of the oil in 1000 of water. **M. virid., Ol.**, the volatile oil. Dose ♏ij–v. **M. virid., Spt.**, alcoholic, contains 10 per cent. of the oil and 1 per cent. of the herb. Dose ♏x–xl.

Menthene (*men'-thēn*) [*mentha*, mint], $C_{10}H_{18}$. A liquid hydrocarbon produced when menthol is distilled with P_2O_5. It boils at 167° C.

Menthol (*men'-thol*) [*mentha*, mint], $C_{10}H_{20}O$. Japanese peppermint; peppermint camphor; mentha camphor; the chief component of peppermint oil, from which it separates in crystalline form on cooling. It possesses, like borneol, the character of an alicyclic alcohol; melts at 42° C., and boils at 213° C. It is obtained from *Mentha arvensis*, var. *piperascens*, a Chinese and Japanese herb; also from the seeds of *Carum copticum*, of India. It is used as a local application in neuralgia, sciatica, ringworm, and other painful conditions. Unof. **M., Emplast.**, containing menthol, wax, and resin; has a place in the 1890 addition to the B. P. **M. Pencil**, a small, pointed cylinder of menthol used as an application to the skin in neuralgia.

Menthone (*men'-thōn*) [*mentha*, mint], $C_{10}H_{18}O$. The ketone of menthol, a colorless liquid with a high boiling-point (206° C.). It is soluble in alcohol, in benzene, in carbon disulphid, and in chloroform, but insoluble in water.

Mentiferous (*men-tif'-er-us*) [*mens*, mind; *ferre*, to carry]. Conveying, or supposed to convey, mental impressions; telepathic. **M. Ether**, a supposed ethereal medium of telepathy, or thought-transfer.

Mentigo (*men-ti'-go*). See *Mentagra.*

Mento-bregmatic (*men'-to-breg-mat'-ik*) [*mentum*, chin; *βρήγμα*, bregma]. Extending from the chin to the bregma.

Mento-condylean (*men'-to-kon-dil'-e-an*) [*mentum*, chin; *κόνδυλος*, condyle]. Pertaining to the chin and the occipital condyles. **M.-c. Triangle.** See *Triangles, Table of.*

Mento-coronial (*men'-to-kor-o'-ne-al*) [*mentum*, chin; *corona*, crown]. Relating to the chin and the coronal suture. **M.-c. Triangle.** See *Triangles, Table of.*

Mento-gonial (*men'-to-go'-ne-al*) [*mentum*, chin; *γωνία*, angle]. Extending from the gonion to the gnathion. **M.-g. Triangle.** See *Triangles, Table of.*

Mento-hyoid (*men'-to-hi'-oid*) [*mentum*, chin; *ὑοειδής*, hyoid]. Relating to the chin and the hyoid bone.

Mento-labial (*men'-to-la'-be-al*) [*mentum*, chin; *labium*, lip]. Relating both to the chin and the lip.

Mento-mastoid (*men'-to-mas'-toid*) [*mentum*, chin; *μαστός*, nipple; *εἶδος*, like]. Relating to both chin and mastoid process. **M.-m. Triangle.** See *Triangles, Table of.*

Mento-meckelian (*men'-to-mek-el'-e-an*) [*mentum*, chin; *Meckel*, a German anatomist]. Pertaining to the distal or mental division of Meckel's cartilage.

Mentula (*men'-tu-lah*) [L.]. The penis.

Mentulagra (*men-tu-la'-grah*) [*mentulagra; mentula*, penis; *ἀγρα*, seizure]. Painful priapism; chordee.

Mentulomania (*men-tu-lo-ma'-ne-ah*). Synonym of *Masturbation.*

Mentum (*men'-tum*) [L., the chin: *pl.*, *Menta*]. The chin. In biology, variously applied to structures below the lip, or labium, as in insects, that part of the labium between the submentum and the ligula; in orchids, an extension of the foot of the column.

Mentzelia (*ment-ze'-le-ah*) [after C. *Mentzel*, a German botanist]. A genus of the Loaseæ. **M. aspera, M. hispida**, is a Mexican species, the root of which has drastic properties, and is also used in gonorrhea and syphilis. Unof.

Menyanthes (*men-e-an'-thēz*) [*μηναῖος*, monthly; *ἄνθος*, flower]. A genus of plants of the gentian order. **M. trifoliata.** See *Buckbean.*

Menyanthin (*men-e-an'-thin*) [*μηναῖος*, monthly; *ἄνθος*, flower], $C_{30}H_{46}O_{14}$. The bitter principle of *Buckbean.* It is a white, amorphous, bitter glucosid.

Meosis (*me-o'-sis*). See *Miosis.*

Mephitic (*me-fit'-ik*) [*Mephitis*, a mythologic divinity]. Foul or noxious; stifling; noisome, as a vapor, or stench. **M. Gangrene,** moist necrosis of bone, associated with the evolution of offensive odors.

Mephitis (*me-fi'-tis*) [L.]. 1. A pestilent or noxious exhalation. 2. A genus of American carnivorous mammals, the skunks. They are noted for the fetid secretion of their perineal glands, which has been used as an antasthmatic remedy and in hysteria. Unof.

Mephitism (*mef'-it-izm*). Synonym of *Mephitis* (first definition).

Meramaurosis (*mer-am-aw-ro'-sis*) [*μέρος*, part; *ἀμαυρόειν*, to darken]. Partial amaurosis.

Meranesthesia (*mer-an-es-the'-ze-ah*) [*μέρος*, part; and *ἀναισθησία*, anesthesia]. Partial or local anesthesia.

Meratrophy (*mer-at'-ro-fe*) [*μέρος*, part; *ἀτροφία*, want of nourishment]. Partial atrophy.

Mercaptal (*mer-kap'-tal*) [*mercurius*, mercury; *captans*, seizing]. A thio-acetal; a product of the union of a mercaptan and an aldehyd.

Mercaptan (*mer-kap'-tan*) [*mercurius*, mercury; *captans*, seizing]. A thio-alcohol; any one of a certain class of alcohols in which the oxygen is replaced by sulphur. The mercaptans are the sulphur analogues of the alcohols, and are colorless liquids, mostly insoluble in water, and possessed of a disagreeable odor resembling that of garlic.

Mercaptid (*mer-kap'-tid*) [*mercurius*, mercury; *captans*, seizing]. A metallic derivation of a mercaptan.

Mercaptol (*mer-kap'-tol*) [*mercurius*, mercury; *captans*, seizing]. A product of the union of a mercaptan and a ketone.

Mercier's Bar. The crescentic ridge of submucous tissue forming the posterior boundary of the trigone of the bladder.

Mercurial (*mer-ku'-re-al*) [*Mercury*, a Grecian god]. Pertaining to mercury. **M. Palsy,** a paralysis or an involuntary spasmodic twitching of the voluntary muscles, as a result of mercurial intoxication, and intensified on voluntary motion; it sometimes affects persons habitually exposed to the vapor of mercury. **M. Ptyalism.** Synonym of *Stomatitis, Mercurial.* **M. Rash,** an eczematous eruption arising from the continued use of mercury. **M. Tremors.** Same as *M. Palsy.* See also *Tremor.*

Mercurialin (*mer-ku'-re-al-in*) [*Mercury*, a Grecian god], CH_5N. An oily basic principle obtainable from *Mercurialis annua* and *M. perennis.* It is poisonous, diuretic, and cathartic. Unof.

Mercurialis (*mer-ku-re-a'-lis*) [*Mercury*, a Grecian god]. A genus of euphorbiaceous plants, with actively poisonous qualities. **M. annua** and **M. perennis** were formerly used in medicine, being strongly purgative, emmenagogue, and diuretic. Unof.

Mercurialism (*mer-ku'-re-al-izm*) [*Mercury*, a Grecian god]. A name for the morbid condition arising from the too free or the long continued use of mercury.

Mercurialist (*mer-ku'-re-al-ist*) [*Mercury*, a Grecian god]. One who prescribes mercury largely, or one who believes in the treatment of syphilis by mercury.

Mercurialization (*mer-ku-re-al-iz-a'-shun*) [*Mercury*, a Grecian god]. Bringing under the influence of mercury.

Mercuric (*mer-ku'-rik*) [*Mercury*, a Grecian god]. Pertaining to or containing mercury as a bivalent radicle.

Mercuricum (*mer-ku'-rik-um*) [*Mercury*, a Grecian god]. A term applied to compounds containing mercury as a bivalent radicle.

Mercurius (*mer-ku'-re-us*). See *Mercury.*

Mercurosum (*mer-ku-ro'-sum*) [*Mercury*, a Grecian god]. A term given to compounds containing mercury as a univalent radicle.

Mercurous (*mer'-ku-rus*) [*Mercury*, a Grecian god]. A term applied to compounds containing mercury as a univalent radicle.

Mercury (*mer'-ku-re*) [*Mercury*, a Grecian god]. See *Hydrargyrum.* **M. Weed,** the herb *Mercurialis annua.* See *Mercurialis.*

Merd [*merda, merdus*, feces]. Feces. **M. diaboli,** asafetida.

Merdivomous (*mer-div'-o-mus*) [*merda*, feces; *vomere*, to vomit]. Having stercoraceous vomiting.

Merdivorous (*mer-div'-or-us*) [*merda*, feces; *vorare*, to devour]. Devouring excrement.

Merechema (*mer-ek-e'-mah*) [*μηρός*, thigh; *ἦχημα*, sound: *pl.*, *Merechemata*]. An auscultatory sound ascribed to the friction of the thighs of the fetus.

Meremphraxis (*mer-em-fraks'-is*) [*μέρος*, part; *ἐμφραξις*, stoppage]. Partial obstruction.

Merenchyma (*mer-eng'-kim-ah*) [*μέρος*, a part; *ἔγχυμα*, in modern sense "parenchyma"]. In biology, an imperfect parenchyma.

Meretrix (*mer'-et-riks*) [*merere*, to earn money]. A prostitute.

Meriæum (*mer-e-e'-um*) [μερός, the thigh: *pl.*, *Meriæa*]. In biology, the anterior surface of the socket of the hind-leg of a beetle.

Meric (*mer'-ik*) [μέρος, part]. Relating to a part.

Mericarp (*mer'-ik-arp*) [μέρος, a part; καρπός, fruit]. In biology, one of the ripened carpels of a schizocarp; a portion of a fruit separating from the rest.

Mericism (*mer'-is-izm*). Same as *Merycism*.

Meride (*mer'-id*) [μέρος, part; μείρομαι, to share]. In biology, a colony of cells that either remains isolated or multiplies by gemmation to form a larger aggregate.

Meridian (*mer-id'-e-an*) [*meridies*, midday]. An imaginary great circle surrounding any globe and intersecting the poles. **M. of the Eye,** an imaginary circle surrounding the globe of the eye, *vertical* if supposed to be perpendicular, or *horizontal* if level. A *lens* is also described in the same way.

Meridional (*mer-id'-e-on-al*) [*meridies*, midday]. Relating to a meridian.

Meridrosis (*mer-id-ro'-sis*) [μέρος, part; ἱδρός, sweat]. Local perspiration.

Meris (*mer'-is*) [μερίς, a part: *pl.*, *Merides*]. In biology, a cell-colony either permanently isolated, or by budding giving rise to a higher aggregate, the *deme*.

Merismatic (*mer-is-mat'-ik*) [μέρισμα, a part; μερισμός, a division; μερίζειν, to divide]. In biology, characterized by the formation of internal septa.

Merismopedia (*mer-is-mo-pe'-de-ah*) [μερισμός, division; παίς, child]. A bacterium multiplying by two rectangular divisions, thus forming a tablet-like group of four cells in one plane. See *Bacteria, Table of*.

Merispore (*mer'-is-por*) [μέρος, part; σπόρος, seed]. The spores resulting from division of the endospore or exospore of fungi; one of the secondary spores of a compound spore.

Meristem (*mer'-is-tem*) [μεριστός, verbal adj. of μερίζειν, to divide]. In biology, the actively growing, undifferentiated cell-tissue of the growing tips of plants; the formative tissue of the cambium layer.

Meristematic (*mer-is-tem-at'-ik*). Synonym of *Merismatic*.

Meristogenetic (*mer-is-to-jen-et'-ik*) [μεριστός, divided; γεννᾶν, to beget]. Developed from meristem.

Merit (*mer'-it*) [μερίς, a part (μερίτης, a partaker)]. In biology, one of the small bodies or granules containing one or two chromatin-specks, or *microsomata*, formed by the breaking up of the male and female pronuclei in the process of impregnation. The *Spermatomeriten* and *Ovomeriten* of Boehm. Cf. *Idant*.

Merithal (*mer'-ith-al*) [μερίς, part; θαλλός, a branch]. Same as *Internode*.

Merizotropia (*mer-iz-o-tro'-pe-ah*). See *Merotropia*.

Merkel's Cells. The tactile corpuscles. **M.'s Ganglia,** small groups of subepidermic ganglion-cells; the tactile corpuscles. **M.'s Muscle.** See *Muscles, Table of*. **M.'s Plane.** See *Plane*. **M.'s Solution,** a fixing-agent used in histologic research. It is composed of equal parts of a one-fourth per cent. solution of platinum chlorid, and a one-fourth per cent. solution of chromic acid. The specimen is placed in this fluid for from two to three hours, and then preserved in alcohol. **M., Tactile Cells of.** See *Grandry's Corpuscles*. **M.'s Touch-corpuscles.** See *Grandry's Corpuscles*.

Meroblast (*mer'-o-blast*) [μέρος, a part; βλαστός, a germ]. In embryology, an ovum that contains beside the formative protoplasm or yolk, more or less food-yolk or nutritive protoplasm.

Meroblastic (*mer-o-blas'-tik*) [μέρος, a part; βλαστός, a germ]. In embryology, a term applied to such ova as present some impediment to the segmentation of the protoplasm of the vegetative pole, owing to which this process is more or less confined to one portion of the ovum, the protoplasm of the animal pole. The distinction between *meroblastic* and *holoblastic* is one of degree, not of kind. "The best known example of a vertebrate meroblastic ovum is undoubtedly the hen's egg." (Minot.)

Merocele (*mer'-o-sēl*) [μηρός, thigh; κήλη, hernia]. Femoral hernia.

Merocerite (*mer-os'-er-it*) [μηρός, thigh; κέρας, horn]. In biology, that joint of the antenna of a crustacean which is borne upon the ischiocerite.

Merocoxalgia (*mer-o-koks-al'-je-ah*) [μηρός, thigh; *coxa*, hip; ἄλγος, pain]. Pain affecting the thigh and hip.

Merocyte (*mer'-o-sīt*) [μέρος, a part; κύτος, a cell]. In biology, one of the eight nucleated masses of protoplasm of the meroblastic, mesolecithal, or telolecithal germ. (Lang.)

Merodialysis (*mer-o-di-al'-is-is*) [μέρος, part; διάλυσις, separation]. Partial decomposition.

Merogastrula (*mer-o-gas'-tru-lah*) [μέρος, a part; γαστήρ, belly: *pl.*, *Merogastrulæ*]. In biology, the gastrula of a meroblastic ovum.

Merogenesis (*mer-o-jen'-es-is*) [μέρος, part; γένεσις, genesis]. Segmentation; the origination of segments.

Merognathite (*mer-og'-nāth-it*) [μέρος, a part; γνάθος, jaw]. In biology, the fourth joint of one of the gnathites or jaw-feet of a crustacean. (Milne-Edwards.)

Meroistic (*mer-o-is'-tik*) [μέρος, a part; ᾠόν, egg]. In biology, applied to the ovaries of certain insects (*e. g.*, *aphis*) that give rise not only to ova and ovicapsular epithelium, but also to large vitelligenous cells. The latter are connected with the ova and supply nutritive material. Cf. *Panoistic*.

Merology (*mer-ol'-o-je*) [μέρος, share; λόγος, science]. General anatomy; the science of elementary tissues.

Meropia (*mer-o'-pe-ah*) [μέρος, part; ὤψ, sight]. Partial blindness; obscuration of vision.

Meroplanktonic (*mer-o-plank-ton'-ik*). See *Plankton*.

Meropodite (*mer-op'-o-dit*) [μηρός, thigh; πούς, foot]. In biology, the fourth joint of a developed endopodite; the inner of the two main divisions of the typical limb. (Milne-Edwards.)

Merorrheuma (*mer-o-ru'-mah*) [μέρος, part; ῥεῦμα, rheum]. Partial rheumatism.

Merorrhexis (*mer-or-eks'-is*). Synonym of *Merocele*.

Meros (*me'-ros*), **Merus** (*me'-rus*) [μηρός, thigh]. In biology, the thigh; the proximal segment of the lower or posterior limb. The fourth joint of any crustacean appendage, as the *merognathite* or *meropodite*.

Merosome (*mer'-o-sōm*) [μέρος, part; σῶμα, body]. In biology, one of the serial parts of a segmented organism; a *somite* or *metamere*.

Merotopia (*mer-o-to'-pe-ah*) [μέρος, part; τόπος, place]. Replacement of a part.

Merotrope (*mer'-o-trōp*), **Merotropia** (*mer-o-tro'-pe-ah*) [μέρος, part; τρόπος, a turning]. Synthesis of simpler bodies that have resulted from more complex compounds which did not combine directly.

Merotropia (*mer-o-tro'-pe-ah*) [μηρός, thigh; τρόπος, a turning]. Reduction of a dislocation of the femur.

Merry-thought (*mer'-e-thawt*). See *Furcula* and *Wish-bone*.

Méry's Glands. See *Gland*.

Merycism (*mer'-is-izm*) [μηρυκισμός, rumination]. Regurgitation and rechewing of food. Rumination; a phenomenon characteristic of an extremely homogeneous group of *Mammalia*, *i. e.*, the *Pecora*, or true ruminants, and sometimes observed in man.

Merycology (*mer-ik-ol'-o-je*) [μερυκίζειν, to ruminate; λόγος, science]. The study of rumination.

Merypertrophy (*mer-ip-er'-tro-fe*) [μέρος, part; ὑπέρ, over; τροφή, nourishment]. Partial hypertrophy.

Merz System. A system in use for the disposal of garbage and refuse, by which the waste material is subjected to a process akin to desiccation. See *Sewage, Disposal of.*

Mesad (*mes'-ad*) [μέσος, middle; *ad*, to]. Toward the mesial or mesal line or plane; toward the meson.

Mesal (*mes'-al*) [μέσος, the middle]. At or in the direction of the meson or median plane of the body. Compare the opposite, lateral. Also, see *Position and Direction, Table of.*

Mesallantoid (*mes-al-an'-toid*) [μέσος, middle; ἀλλάντοις, allantois]. An animal having a small allantoic sac.

Mesameboid (*mes-am-e'-boid*) [μέσος, middle; ἀμοιβή, a change; εἶδος, shape]. In embryology, any one of the leukocytes or wandering-cells, or perhaps the embryonic red blood-cells or the marrow-cells.

Mesaraic (*mes-ar-a'-ik*) [μέσος, middle; ἀραιά, belly]. Same as *Mesenteric.*

Mesaraion (*mes-ar-a'-e-on*), **Mesareum** (*mes-ar-e'-um*) [μεσάραιον, the mesentery]. The mesentery.

Mesarteritic (*mes-ar-ter-it'-ik*) [μέσος, middle; ἀρτηρία, artery; ιτις, inflammation]. Pertaining to or resulting from mesarteritis.

Mesarteritis (*mes-ar-ter-i'-tis*) [μέσος, middle; ἀρτηρία, artery; ιτις, inflammation]. Inflammation of the middle coat of an artery (usually chronic).

Mesaticephalic (*mes-at-is-ef-al'-ik*) [μεσότης, median; κεφαλή, head]. Pertaining to *Mesaticephalus.* Also, see *Index.*

Mesaticephalus (*mes-at-is-ef'-al-us*) [μεσότης, median; κεφαλή, head]. In craniometry, a term applied to a skull having a cephalic index of between 75 and 79.

Mesatipelvic (*mes-at-ip-el'-vik*) [μεσότης, median; πελλίς, pelvis]. A term applied to a pelvis whose index ranges between 90° and 95°.

Mesauchenous (*mes-aw'-ken-us*) [μέσος, middle; αὐχήν, neck]. Lissauer's term for a skull in which the angle formed between the radius fixus and a line joining the inion and the basion is between 26° and 38°.

Mesectoderm (*mes-ek'-to-derm*) [μέσος, middle; ἐκτός, outside; δέρμα, skin]. The ectal or ectodermal division of the mesoderm; also, indifferent tissue from which both ectoderm and mesoderm are developed.

Mesembryo (*mes-em'-bre-o*) [μέσος, middle; ἔμβρυον, embryo]. The blastula stage of the ova of metazoans.

Mesembryonic (*mes-em-bre-on'-ik*) [μέσος, middle; ἔμβρυον, embryo]. Pertaining to the mesembryo.

Mesencephal (*mes-en-sef'-al*). Same as *Mesencephalon.*

Mesencephalic (*mes-en-sef-al'-ik*) [μέσος, middle; ἐγκέφαλον, the brain]. Relating to the mesencephalon.

Mesencephalon (*mes-en-sef'-al-on*) [μέσος, middle; ἐγκέφαλον, the brain]. One of the divisions of the brain, consisting of the corpora quadrigemina, and the crura cerebri.

Mesenchyma (*mes-eng'-kim-ah*) [μέσος, middle; ἔγχυμα, an infusion]. The portion of the mesoderm that produces all the connective tissues of the body, the blood-vessels, and the blood, the entire lymphatic system proper, and the heart. The non-epithelial portions of the mesoderm.

Mesenchyme (*mes'-en-kim*) [μέσος, middle; ἔγχυμα, an infusion]. In biology: (*a*) applied to the mesoderm of certain animals (*e.g.*, sponges); (*b*) embryonic connective tissue composed of cells thrown off by the mesothelium.

Mesencranus (*mes-en-kra'-nus*) [μέσος, middle; ἐν, in; κρανίον, skull]. Lissauer's term for a skull having a median cerebellar sector of from 15° to 20°.

Mesenteric (*mes-en-ter'-ik*) [μεσεντερικός, from μέσος, middle; ἔντερον, intestine]. Pertaining to the mesentery.

Mesenterica (*mes-en-ter'-ik-ah*) [μέσος, middle; ἔντερον, intestine]. **1.** The mycelium of certain molds. **2.** A vessel of the mesentery. **M., Tabes.** See *Tabes.*

Mesenteriitis (*mes-en-ter-e-i'-tis*). Same as *Mesenteritis.*

Mesenteriolum (*mes-en-ter-i'-o-lum*) [dim. of μεσέντερον, mesentery]. A little mesentery; especially the fold of peritoneum that sometimes connects the appendix vermiformis with the mesentery.

Mesenteriophthisis (*mes-en-ter-e-off'-this-is*) [μεσέντερον, mesentery; φθίσις, wasting]. Tabes mesenterica, *q. v.*

Mesenteritic (*mes-en-ter-it'-ik*) [μέσος, middle; ἔντερον, intestine; ιτις, inflammation]. Pertaining to or affected with mesenteritis.

Mesenteritis (*mes-en-ter-i'-tis*) [μέσος, middle; ἔντερον, an intestine; ιτις, inflammation]. Inflammation of the mesentery. **M. chronica.** Synonym of *Tabes mesenterica.*

Mesenterium (*mes-en-ter'-e-um*) [L.: *pl.*, *Mesenteria*]. A mesentery.

Mesenteroid (*mes-en'-ter-oid*) [μεσεντέριον, mesentery; εἶδος, like]. Resembling the mesentery.

Mesenteron (*mes-en'-ter-on*) [μέσος, middle; ἔντερον, intestine]. The middle portion of the alimentary tract in the embryo.

Mesentery (*mes'-en-ter-e*) [μέσος, middle; ἔντερον, bowel]. **1.** A fold of the peritoneum that connects certain portions of the intestine with the posterior abdominal wall. **2.** A membranous septum dividing the perivisceral cavity into more or less completely separate chambers.

Mesentoderm, Mesendoderm (*mes-en'-to-derm, mes-en'-do-derm*) [μέσος, middle; ἐντός, within; δέρμα, skin]. The ental or entodermal division of the mesoderm; also, the indifferent tissue from which both entoderm and mesoderm are developed.

Mesepimeron (*mes-ep-im'-er-on*) [μέσος, middle; ἐπί, upon; μήρος, thigh: *pl.*, *Mesepimera*]. In biology, the middle lateral piece (epimeron) of the thorax or mesothorax of an arthropod.

Mesepisternum (*mes-ep-is-ter'-num*) [μέσος, middle; ἐπί, upon; στέρνον, breast: *pl.*, *Mesepisterna*]. In biology, one of the anterior lateral pieces of the mesothorax of an arthropod.

Meseraic (*mes-er-a'-ik*). See *Mesaraic.*

Mesethmoid (*mes-eth'-moid*) [μέσος, middle; ἠθμός, ethmoid]. The mesal element of the ethmoid bone, forming a separate bone in some of the lower animals.

Mesh [ME., *maske*, a mesh, or net]. A network, as of vessels or nerves.

Mesiad (*mes'-e-ad*) [μέσος, middle]. Same as *Mesad.*

Mesial (*mes'-e-al*) [μέσος, middle]. Same as *Median.*

Mesicerin (*mes-is-e'-rin*) [μεσίτης, a mediator; *cera*, wax], $C_6H_3(CH_2.OH)_3$. Mesitylene glycerol, produced by the action of tribrom-mesitylene upon boiling water and lead carbonate. It is a thick liquid.

Mesidic Acid (*mes-id'-ik*). See *Uvitic Acid.*

Mesien (*mes'-e-en*) [μέσος, middle]. Belonging to the mesion in itself.

Mesion (*mes'-e-on*) [μέσος, middle]. See *Meson.*

Mesiris (*mes-i'-ris*) [μέσος, middle; ἶρις, iris]. The middle layer of the iris, lying between the ectiris and the entiris.

Mesitilol (*mes-it'-il-ol*). Same as *Mesitylene.*

Mesitol (*mes'-it-ol*) [μεσίτης, a mediator], $C_9H_{12}O$. A crystalline body, chemically a hydrated mesitylene.

Mesitylene (*mes-it'-il-ēn*) [*μεσίτης*, a mediator], C_9H_{12}. Trimethyl benzin. It occurs in coal-tar, and is produced by distilling acetone or allylene with H_2SO_4. It is an oily, colorless, agreeable-smelling liquid, boiling at 163° C.

Mesitylenic Acid (*mes-it-il-en'-ik*). See *Acid*.

Mesmeric (*mez-mer'-ik*) [from *Mesmer*, an investigator of mesmerism]. Pertaining to or induced by mesmerism, as mesmeric sleep. **M. Coma**, hypnotism, *q. v.* **M. Lucidity**, clairvoyance. **M. Promise**, the same as *Hypnotic Suggestion*. **M. Sleep**, hypnotism, *q. v.* **M. State**, the condition of mesmerism.

Mesmerism (*mez'-mer-izm*) [*Mesmer*, an investigator of the phenomena]. The phenomena formerly known as somnambulism, and subsequently as animal magnetism, now better known as hypnotism.

Mesmerist (*mez'-mer-ist*) [*Mesmer*, an investigator of the phenomena]. One who induces mesmeric phenomena.

Mesmerization (*mez-mer-iz-a'-shun*). Synonym of *Hypnotization*.

Mesmeromania (*mez-mer-o-ma'-ne-ah*) [*Mesmer*, the investigator of mesmerism; *μανία*, madness]. Insane or delusional pursuit of mesmeric observations.

Meso- (*mes'-o-*) [*μέσος*, middle]. A prefix signifying *middle*.

Mesoarium (*mes-o-a'-re-um*) [*μέσος*, middle; *ᾠάριον*, dim. of *ᾠόν*, egg: *pl.*, *Mesoaria*]. In biology, that fold of the peritoneum in certain animals (*e. g.*, fishes) which forms the mesentery of the ovary. See *Mesovarium*.

Mesoarteritis (*mes-o-ar-ter-i'-tis*). Synonym of *Mesarteritis*.

Mesobacteria (*mes-o-bak-te'-re-ah*) [*μέσος*, middle; *βακτήριον*, little rod]. Medium-sized vegetable microorganisms.

Mesoblast (*mes'-o-blast*) [*μέσος*, middle; *βλαστός*, a germ]. In embryology: (*a*) a large, granular, single cell, the most posterior in each of the two bands from which the mesoderm arises in a metazoan, and which throws off cells to add to the mesodermal band. It appears to be a derivative of the entoderm; (*b*) The middle layer of the blastoderm, probably derived from both the ectoderm and entoderm, and from which are developed the vascular, muscular, and skeletal systems, the generative glands, and the kidneys. It is also called mesoderm. Kleinenberg protests against the use of the term mesoblast, at least in a sense implying any possibility of comparison with the primary layers, epiblast and hypoblast, of cœlenterata. **M., Parietal, M., Somatic**, the outer mesoblastic plates entering into the formation of the body-wall. It is also known as *Somatopleure*. **M., Splanchnic, M., Visceral**, the inner mesoblastic plates forming the wall of the digestive tract and its derivatives. It is also known as *Splanchnopleure*.

Mesoblastema (*mes-o-blas-te'-mah*) [*μέσος*, middle; *βλάστημα*, a shoot; *pl.*, *Mesoblastemas*]. In embryology, the germinal cells that go to form the mesoderm; the mesoblastic cells.

Mesoblastic (*mes-o-blas'-tik*) [*μέσος*, middle; *βλαστός*, sprout]. Pertaining to the mesoblast.

Mesobranchious (*mes-o-brang'-ke-us*) [*μέσος*, middle; *βρόγχια*, gill]. Having the gills or branchiæ in the middle of the body.

Mesobregmus (*mes-o-breg'-mus*) [*μέσος*, middle; *βρέγμα*, the sinciput]. Lissauer's term for a skull in which the angle formed between the radius fixus and the line joining the hormium and the bregma is between 68° and 82°.

Mesobronchitis (*mes-o-bron-ki'-tis*) [*μέσος*, middle; *βρόγχια*, bronchus; *ιτις*, inflammation]. An inflammation of the middle coat of the bronchial tubes.

Mesobronchium (*mes-o-bron'-ke-um*) [*μέσος*, middle; *βρόγχια*, bronchus]. One of the divisions of the trachea in birds.

Mesocæcum (*mes-o-se'-kum*). See *Mesocecum*.

Mesocardia (*mes-o-kar'-de-ah*) [*μέσος*, middle; *καρδία*, heart]. The position of the heart in the central and anterior part of the chest, a situation that is normal at an early stage of development

Mesocardium (*mes-o-kar'-de-um*) [*μέσος*, middle; *καρδία*, heart]. A mesoblastic fold attached to the heart.

Mesocarp (*mes'-o-karp*) [*μέσος*, middle; *καρπός*, fruit]. In biology, the middle layer of a three-layered pericarp; the sarcocarp.

Mesocecum (*mes-o-se'-kum*) [*μέσος*, middle; *cæcus*, blind]. The mesentery that sometimes connects the dorsal part of the cecum with the right iliac fossa.

Mesocele (*mes'-o-sēl*) [*μέσος*, middle; *κοιλία*, cavity]. The cavity or ventricle of the mesencephal; considerable in lower vertebrates but in adult mammals reduced to a slender passage, the aqueduct of Sylvius or *iter a tertio ad quartum ventriculum*.

Mesocœlia (*mes-o-se'-le-ah*) [*μέσος*, middle; *κοιλία*, cavity]. See *Mesocele*.

Mesocephalic (*mes-o-sef-al'-ik*) [*μέσος*, middle; *κεφαλή*, head]. See *Megacephalic*. **M. Pillars**, in entomology, a pair of strong rods running from the front to the back of the inside of the head of certain insects (*e. g.*, bees), and attached by their extremities just outside and below the antennæ, and at the rear of the head beneath and on each side of the occipital opening. (Cheshire.)

Mesocephalism (*mes-o-sef'-al-izm*), **Mesocephaly** (*mes-o-sef'-al-e*) [*μέσος*, middle; *κεφαλή*, head]. The condition of having a mesocephalic skull.

Mesocephalitis (*mes-o-sef-al-i'-tis*) [*μέσος*, middle; *κεφαλή*, head; *ιτις*, inflammation]. Inflammation of the mesocephalon or pons Varolii.

Mesocephalon (*mes-o-sef'-al-on*). See *Pons Varolii*.

Mesocerebrum (*mes-o-ser'-e-brum*). See *Pons Varolii*.

Mesochil (*mes-o-kil'*), **Mesochilium** (*mes-o-kil'-e-um*) [*μέσος*, middle; *χεῖλος*, lip]. In biology, the middle part of the tripartite labellum of certain orchids.

Mesochondriac (*mes-o-kon'-dre-ak*) [*μέσος*, middle; *χόνδρος*, cartilage]. Situated between any two contiguous tracheal cartilages.

Mesochoroidea (*mes-o-ko-roid-e'-ah*) [*μέσος*, middle; *χόριον*, the chorion; *εἶδος*, like]. The middle coat of the choroid.

Mesocolic (*mes-o-kol'-ik*) [*μέσος*, middle; *κῶλον*, colon]. Pertaining to the mesocolon.

Mesocolon (*mes-o-ko'-lon*) [*μέσος*, middle; *κῶλον*, colon]. The mesentery connecting the colon with the posterior abdominal wall. It is divided into *ascending*, *transverse*, and *descending* parts. **M., Sigmoid**, the fold of the peritoneum connecting the sigmoid flexure with the left iliac fossa.

Mesoconch (*mes'-o-kongk*) [*μέσος*, middle; *κόγχη*, a shell]. Possessing an orbital index of from 80° to 85°.

Mesocoracoid (*mes-o-kor'-ak-oid*) [*μέσος*, middle; *κόραξ*, a raven; *εἶδος*, form]. In comparative anatomy, situated between the hypercoracoid and the hypocoracoid; specifically an element in the shoulder-girdle of certain bony fishes.

Mesocord (*mes'-o-kord*) [*μέσος*, middle; *chorda*, cord]. An abnormality of the umbilical cord in which, instead of being directly inserted into the placenta, it is received into a fold of the amnion arranged analogous to the meso-rectum. This condition does not interfere with the health of the child.

Mesocornea (*mes-o-kor'-ne-ah*) [μέσος, middle; *corneus*, horny]. The proper substance of the cornea lying between the ectocornea and the entocornea.

Mesocranium (*mes-o-kra'-ne-um*). Synonym of *Vertex*.

Mesocuneiform (*mes-o-ku'-ne-if-orm*) [μέσος, middle; *cuneus*, wedge; *forma*, form]. The middle cuneiform bone of the tarsus.

Mesocyst (*mes'-o-sist*) [μέσος, middle; κύστις, bladder]. A double fold of peritoneum attaching the gall-bladder to the liver.

Mesoderm (*mes'-o-derm*) [μέσος, middle; δέρμα, skin]. In embryology, the middle of the three blastodermic layers of the germ in the metazoa. "The morphology of the mesoderm is one of the most vexed questions of the day. Scarcely an embryologist can be found who has not published opinions on this question considerably at variance with the opinions of others. It has been maintained that the mesoderm arises from the ectoderm; that it arises from the entoderm, or from both; from neither, but from two special segmentation-spheres; that it has a double origin, part coming from the blastoderm, part from the yolk; and even that there is no mesoderm." (Minot.)

Mesodiastolic (*mes-o-di-as-tol'-ik*) [μέσος, middle; διαστολή, diastole]. Occurring in the middle of the diastolic period.

Mesodme (*mes-od'-me*) [μεσόδμη]. See *Mediastinum*.

Mesodmitis (*mes-od-mi'-tis*). See *Mediastinitis*.

Mesodont (*mes'-o-dont*). See *Macrodont*.

Mesoduodenum (*mes-o-du-o-de'-num*) [μέσος, middle; *duodeni*, twelve each]. That part of the mesentery that sometimes connects the duodenum with the posterior wall of the abdominal cavity. Normally, the true duodenum has no mesentery, at least in its fully developed state.

Mesoepididymis (*mes-o-ep-id-id'-im-is*) [μέσος, middle; ἐπιδιδυμίς, epididymis]. The fold of the tunica vaginalis attaching the epididymis to the upper posterior part of the testis.

Mesogaster (*mes-o-gas'-ter*) [μέσος, middle; γαστήρ, stomach]. The part of the primitive gut giving rise to the duodenum, the liver, the pancreas, the jejunum, and the ileum.

Mesogastric (*mes-o-gas'-trik*) [μέσος, middle; γαστήρ, stomach]. Pertaining to the umbilical region.

Mesogastrium (*mes-o-gas'-tre-um*) [μέσος, middle; γαστήρ, stomach]. 1. The umbilical region of the abdomen. 2. A fold of mesentery, which, in early fetal life, connects the stomach with the posterior wall of the abdominal cavity.

Mesogenous (*mes-oj'-en-us*) [μέσος, middle; γένης, born]. In biology, increasing by growth at or from the middle, as the spores of certain fungi.

Mesoglœa (*mes-o-gle'-ah*) [μέσος, middle; γλοία, glue]. In biology, applied to the intercellular matrix or ground-substance of certain organisms.

Mesoglossal (*mes-o-glos'-al*) [μέσος, middle; γλῶσσα, tongue]. Pertaining to the middle of the tongue.

Mesogluteus (*mes-o-glu'-te-us*) [μέσος, middle; γλουτός, the buttock]. The middle gluteal muscle.

Mesognathic (*mes-og-na'-thik*) [μέσος, middle; γνάθος, jaw]. Relating to the mesognathion. See, also, *Index*.

Mesognathion (*mes-og-na'-the-on*) [μέσος, middle; γνάθος, jaw]. The intermaxillary bone.

Mesognathism (*mes-og-nāth'-ism*) [μέσος, middle; γνάθος, jaw]. The presence of a mesognathion.

Mesognathous (*mes-og'-na-thus*) [μέσος, middle; γνάθος, jaw]. Having a gnathic index between 98 and 103.

Mesognathy (*mes-og'-na-the*) [μέσος, middle; γνάθος, jaw]. The character of having a gnathic index between 98 and 103.

Mesogonious (*mes-og-o'-ne-us*) [μέσος, middle; γόνυ, knee]. Pertaining to the knee-joint.

Mesogonium (*mes-og-o'-ne-um*) [μέσος, middle; γόνος, producing: *pl.*, *Mesogonia*]. In biology, one of the mesenteria of a cnidarian, in which the gonades or reproductive glands are situated.

Mesohepar (*mes-o-he'-par*) [μέσος, middle; ἧπαρ, liver]. The peritoneal fold attached to the right hepatic lobe in many animals.

Mesolobe (*mes'-o-lōb*), **Mesolobus** (*mes-ol'-o-bus*) [μέσος, middle; λοβός, lobe]. The callosum.

Mesolobic (*mes-o-lo'-bik*) [μέσος, middle; λοβός, lobe]. Pertaining to the mesolobe.

Mesology (*mes-ol'-o-je*) [μέσος, middle; λόγος, science]. The science of environment in its relation to life.

Mesomental (*mes-o-men'-tal*) [μέσος, middle; *omentum*, omentum]. Relating to the middle of the omentum.

Mesomeria (*mes-o-me'-re-ah*), **Mesomerion** (*mes-o-me'-re-on*) [μέσος, middle; μηρός, thigh]. The perineum.

Mesometrion (*mes-o-me'-tre-on*). Synonym of *Mesometrium*.

Mesometritis (*mes-o-me-tri'-tis*) [μέσος, middle; μήτρα, womb; παρεγχυμα, parenchyma; -ῖτις, inflammation]. Inflammation of the mesometrium.

Mesometrium (*mes-o-me'-tre-um*), **Mesometry** (*mes-o-met'-re*) [μέσος, middle; μήτρα, womb]. The vascular membranous tissue connecting the body of the womb with the adjoining parts; the broad ligaments considered as one tissue.

Mesomphalion (*mes-om-fa'-le-um*), **Mesomphalium** (*mes-om-fa'-le-on*), **Mesomphalum** (*mes-om'-fal-um*) [μέσος, middle; ὀμφαλός, umbilicus, or the umbilical cord, navel]. The middle of the umbilicus, or the umbilical region.

Meson (*mes'-on*) [μέσος, the middle]. The imaginary plane in the body extending from the dorsal to the ventral aspect, and from the cephalic extremity, and serving to divide the body into symmetric right and left halves. Caudal to the cephalic plane.

Mesonasal (*mes-o-na'-sal*) [μέσος, middle; *nasus*, nose]. Pertaining to the middle or median region of the nose.

Mesonephric (*mes-o-nef'-rik*), **Mesonephritic** (*mes-o-nef-rit'-ik*) [μέσος, middle; νεφρός, kidney]. Pertaining to the mesonephron.

Mesonephron (*mes-o-nef'-ron*), **Mesonephros** (*mes-o-nef'-ros*) [μέσος, middle; νεφρός, kidney]. Pertaining to the Wolffian body, primitive kidney, archinephros (*mes-o-*de Wolff, or Urniere; a body arising from the portion of the Wolffian or nephridial nephron, corpus tebrate embryo. It is the chief renal organ of the posterior out life in the anamnia, whereas in the amniota it disappears during embryonic life, to be replaced through- true kidney, a small portion being retained to form with the sexual organs. 2. The mesonephros connected the kidney.

Mesonotal (*mes-o-no'-tal*) [μέσος, middle; νῶτος, the back]. Pertaining to the *Mesonotum*, *q. v.*

Mesonotum (*mes-o-no'-tum*) [μέσος, middle; back]. In biology, the medio-dorsal portion of the thorax of an insect.

Mesopanencephalus (*mes-o-pan-en-sef'-al-us*) [μέσος, middle; πᾶν, all; ἐγκέφαλος, brain]. Lissauer's term for a skull in which the angle between the line from the nasion and the basion to the pons varolii is between 163° and 165.5°.

Mesoparapteron (*mes-o-par-ap'-ter-on*) [μέσος, middle; παρά, beyond; πτερόν, wing]. In biology, the mesosclerite of the mesopleuron; the parapteron of the mesothoracic segment.

Mesopatagium (*mes-o-pat-a'-je-um*) [μέσος, middle; παταγεῖον, the border of a gown]. In biol-

part of the wing-membrane of bats which is limited by the vertical terminal branch of the intercosto-humeral line, by the forearm, and the fifth metacarpal bone and phalanges. Cf. *Dactylo-patagium*, *Ectopatagium*. (Allen.)

Mesophlebion (*mes-o-fleb′-e-on*), **Mesophlebium** (*mes-o-fleb′-e-um*) [*μέσος*, middle; *φλέβιον*, vein]. 1. The middle coat of a vein. 2. The space between two veins.

Mesophlebitis (*mes-o-fle-bi′-tis*) [*μέσος*, middle; *φλέψ*, vein; *ιτις*, inflammation]. Inflammation of the middle coat of a vein, or mesophlebion.

Mesophlœum (*mes-o-fle′-um*) [*μέσος*, middle; *φλοιός*, bark]. In biology, the green or middle layer of the bark.

Mesophragm (*mes′-o-fram*), **Mesophragma** (*mes-o-frag′-mah*) [*μέσος*, middle; *φράγμα*, partition: *pl.*, *Mesophragmata*]. In biology, a stiff plate between the meso-thorax and the meta-thorax in certain insects (*e. g.*, bees), giving attachment to part of the muscles of the organs of flight. (Cheshire.)

Mesophryon (*mes-off′-re-on*) [*μέσος*, middle; *ὀφρύς*, eyebrow]. The glabella.

Mesophyl (*mes′-o-fil*) [*μέσος*, middle; *φύλλον*, a leaf]. In biology, all the parenchyma or soft inner tissue of a leaf, between the layers of epidermis.

Mesophyllum (*mes-o-fil′-um*). Same as *Mesophyl.*

Mesophyte (*mes′-o-fit*), **Mesophytum** (*mes-off′-it-um*) [*μέσος*, middle; *φυτόν*, a plant: *pl.*, *Mesophyta*]. In biology, the line of demarcation between the internode and the petiole; the collar.

Mesopic (*mes-op′-ik*) [*μέσος*, middle; *ὤψ*, face]. Having small and retreating malar bones, with a naso-malar index of from 107.5 to 110.

Mesoplast (*mes′-o-plast*) [*μέσος*, middle; *πλαστός*, verbal adj. of *πλάσσειν*, to form, to mold]. In biology, the nuclear protoplasm of a cell-nucleus; the endoplast.

Mesoplastron (*mes-o-plas′-tron*) [*μέσος*, middle; Fr., *plastron*, a breast-plate]. In biology, the median and anterior plate of the plastron.

Mesopleura (*mes-o-plu′-rah*) [*μέσος*, middle; *πλευρά*, rib]. An intercostal space.

Mesopleurius, Mesopleurus (*mes-o-plu′-re-us*, *mes-o-plu′-rus*) [*μέσος*, middle; *πλευρά*, rib]. Pertaining to the spaces between the ribs. In the plural, the intercostal spaces.

Mesopleuron (*mes-o-plu′-ron*) [*μέσος*, middle; *πλευρόν*, a rib]. In biology, one of the lateral pieces or pleura of the mesothorax of an insect.

Mesopodialia (*mes-o-po-de-a′-le-ah*) [*μέσος*, middle; *πους* (*ποδ-*), foot]. In osteology, a collective term applied to the bones of the carpus and tarsus considered as forming a segment of the fore-limb or hind-limb. Cf. *Metapodialia.*

Mesopodium (*mes-o-po′-de-um*) [*μέσος*, middle; *πούς*, foot: *pl.*, *Mesopodia*]. In biology, the middle region of the foot of a gasteropod or pteropod, as distinguished from the *propodium* and *metapodium.*

Mesoprosopic (*mes-o-pros-o′-pik*) [*μέσος*, middle; *πρόσωπον*, face]. Having a face of moderate breadth; not chameprosopic or leptoprosopic.

Mesopsyche (*mes-op-si′-ke*) [*μέσος*, middle; *ψυχή*, soul]. Haeckel's term for the mesencephalon.

Mesopterygium (*mes-op-ter-ij′-e-um*) [*μέσος*, middle; *πτερύγιον*, a little wing: *pl.*, *Mesopterygia*]. In biology, the middle basal cartilage in the pterygium of a fish, between the *propterygium* and the *metapterygium.*

Mesoraic (*mes-or-a′-ik*). Synonym of *Mesenteric.*

Mesorchion (*mes-or′-ke-on*), **Mesorchis** (*mes-or′-kis*), **Mesorchium** (*mes-or′-ke-um*) [*μέσος*, middle; *ὄρχις*, testicle]. A fold of the peritoneum containing the fetal testes at about the fifth month, before their descent.

Mesorcin (*mes-or′-sin*), **Mesorcinol** (*mes-or′-sin-ol*) [*μεσίτης*, a mediator], $C_9H_{12}O_2$. A substance obtained from dinitro-mesitylene. It sublimes in shining leaflets, melts at 150° C., and distils at 275° C.

Mesorectum (*mes-o-rek′-tum*) [*μέσος*, middle; *rectus*, straight]. The narrow fold of the peritoneum connecting the upper part of the rectum with the sacrum.

Mesoretina (*mes-o-ret′-in-ah*) [*μέσος*, middle; *retina*, retina]. The middle layer of the retina, composed of the nuclear and the rod-and-cone layer. The mesoretina is also called the mosaic layer.

Mesorhine (*mes′-or-in*) [*μέσος*, middle; *ῥίς*, nose]. Having a nasal index between 48° and 52°. See *Index.*

Mesorhinium (*mes-o-rin′-e-um*) [*μέσος*, middle; *ῥίς*, the nose: *pl.*, *Mesorhinia*]. In biology, the part between the nostrils, as the beak of a bird.

Mesoropter (*mes-o-rop′-ter*) [*μέσος*, middle; *ὅρος*, boundary; *ὀπτεσθαι*, to sleep]. The normal position of the eyes when their muscles are at rest. **M., Muscular**, the angle formed by the visual axes of the eyes when the external ocular muscles are at rest.

Mesorrhine (*mes′-or-in*). See *Mesorhine.*

Mesosalpinx (*mes-o-sal′-pingks*) [*μέσος*, middle; *σάλπιγξ*, a trumpet]. A falciform, double fold of peritoneum bounded above by the Fallopian tube, internally by the lateral wall of the uterus, externally by the tubo-ovarian fimbria and the ligamentum infundibulo-ovaricum of Henle, and inferiorly by the ovary and the utero-ovarian ligament

Mesoscapula (*mes-o-skap′-u-lah*) [*μέσος*, middle; *scapula*, shoulder-blade]. The scapular spine.

Mesoscelocele (*mes-o-skel′-o-sēl*) [*μέσος*, middle; *σκέλος*, leg; *κήλη*, tumor]. Perineal hernia.

Mesoscelophyma (*mes-o-skel-o-fi′-mah*) [*μέσος*, middle; *σκέλος*, leg; *φῦμα*, tumor]. A perineal tumor.

Mesoscelus (*mes-os′-kel-us*) [*μέσος*, middle; *σκέλος*, leg]. The perineum.

Mesoscutellum (*mes-o-sku-tel′-um*) [*μέσος*, middle; *scutellum*, a little shield]. In biology, the scutellar sclerite of the mesothorax.

Mesoscutum (*mes-o-sku′-tum*) [*μέσος*, middle; *scutum*, a shield]. In biology, the scutum of the mesonotum.

Mesoseme (*mes′-o-sēm*) [*μέσος*, middle; *σῆμα*, sign, index]. Having a moderate orbital index. See *Index.*

Mesosigmoid (*mes-o-sig′-moid*) [*μέσος*, middle; *σίγμα*, sigma; *εἶδος*, form]. The mesentery of the sigmoid flexure of the colon.

Mesoskeleton (*mes-o-skel′-et-on*) [*μέσος*, middle; *σκελετόν*, skeleton]. The internal skeleton of an animal of mesodermic origin.

Mesosoma (*mes-o-so′-mah*) [*μέσος*, middle; *σῶμα*, the body: *pl.*, *Mesosomata*]. In biology, the middle region of the body. Especially is the term applied to lamellibranchiate molluscs to distinguish it from the *prosoma* and the *metasoma.*

Mesosperm (*mes′-o-sperm*) [*μέσος*, middle; *σπέρμα*, seed]. In biology, the inner coat or integument of the ovule. Cf. *Secundine.*

Mesospore (*mes′-o-spor*) [*μέσος*, middle; *σπόρος*, seed]. In biology: 1. The middle coat of a spore having three coats. 2. A spore of moderate size.

Mesostaphyline (*mes-o-staf′-il-in*) [*μέσος*, middle; *σταφυλή*, the uvula]. In craniometry, a term applied to a skull having a palatal index of from 80° to 85°.

Mesostate (*mes′-o-stāt*) [*μέσος*, middle; *στατός*, placed]. A generic term for the intermediate substances formed in the metabolic processes of secretion, nutrition, or cell-metamorphosis, between the less complex forms of the ingesta up to and through those of the highest complexity and instability (anabolism), and back again

to the simpler end-products of the katabolic processes. Those metastates formed in the "ascending staircase" —synthetic or anabolic—are called *Anastates*. Those of the descending staircase—analytic katabolic—are called *Catastates*. See *Anabolin*, *Katabolin*, *Metabolin*.

Mesosternal (*mes-o-ster'-nal*) [μέσος, middle; στέρνον, breast-bone]. Pertaining to the mesosternum.

Mesosternebra (*mes-o-ster'-neb-rah*) [μέσος, middle; *sternebra*, sternum]. Any sternebra that helps to make up the mesosternum or its homologue in any lower animal.

Mesosternum (*mes-ŏ-ster'-num*) [μέσος, middle; στέρνον, the sternum]. 1. In biology, the large ventral sclerite of an insect between the legs of the second thoracic segment. 2. The gladiolus, or second piece of the sternum.

Mesostethium (*mes-o-ste'-the-um*) [μέσος, middle; στηθίον, dim. of στῆθος, the breast: *pl.*, *Mesostethia*]. In biology, the large ventral sclerite of an insect between the bases of the middle and posterior legs; the metasternum.

Mesosthenic (*mes-o-sthen'-ik*) [μέσος, middle; σθένος, strength]. Having a moderate degree of muscular force.

Mesostomatous (*mes-o-sto'-mat-us*), **Mesostomous** (*mes-os'-to-mus*) [μέσος, middle; στόμα, mouth]. Having the mouth situated in the middle of the body.

Mesostylous (*mes-o-sti'-lus*) [μέσος, middle; στῦλος, a pillar]. In biology, having styles of intermediate length in heterostyled plants.

Mesotarsal (*mes-o-tar'-sal*). Synonym of *Mediotarsal*.

Mesotarsus (*mes-o-tar'-sus*) [μέσος, middle; τάρσος, any broad, flat surface: *pl.*, *Mesotarsi*]. In biology, the tarsus of the middle or second leg of a hexapod insect.

Mesothelioma (*mes-o-the-le-o'-mah*) [μέσος, middle; θηλή, nipple; ὄμα, a tumor]. A variety of epithelioma supposed to be developed from the mesoblast.

Mesothelium (*mes-o-the'-le-um*) [μέσος, middle; θηλή, the nipple]. In biology, an epithelial arrangement assumed by the mesodermic cells which bound the cavities formed in the mesoderm of a metazoan embryo; the peritoneal epithelium.

Mesothenar (*mes-o-the'-nar*) [μέσος, middle; θέναρ, palm]. The muscle drawing the thumb toward the palm of the hand; the adductor pollicis.

Mesothermal (*mes-o-ther'-mal*) [μέσος, middle; θέρμη, heat]. Of medium warmth.

Mesothoracotheca (*mes-o-tho-rak-o-the'-kah*) [μέσος, middle; θώραξ, chest; θήκη, a case: *pl.*, *Mesothoracothecæ*]. In entomology, that portion of a pupa-case covering the mesothorax.

Mesothorax (*mes-o-tho'-raks*) [μέσος, middle; θώραξ, chest]. In entomology, the second or intermediate segment of the thorax of an insect; to it are joined the second pair of legs and the first pair of wings.

Mesotic (*mes-ot'-ik*) [μεσότης, the middle]. Pertaining to, or affecting, the median or parenchymatous tissues.

Mesotocatarrhus (*mes-ot-o-kat-ar'-us*) [μέσος, middle; οὖς, ear; κατάρρος, catarrh]. Catarrh of the middle ear.

Mesotœchitis (*mes-o-te-ki'-tis*) [μεσότοιχος, dividing wall; ιτις, inflammation]. Inflammation of the mesotœchium.

Mesotœchium (*mes-o-te'-ke-um*) [μεσότοιχος, dividing wall]. The mediastinum.

Mesotomic (*mes-o-tom'-ik*) [μέσος, middle; τομή, a cutting]. Pertaining to mesotomism.

Mesotomism (*mes-ot'-o-mizm*) [μέσος, middle; τομή, a cutting]. The process of separating optically opposite isomers.

Mesotrocha (*mes-ot'-ro-kah*) [μέσος, middle; θώραξ, chest]. In embryology, that form of vermian and molluscan larva in which one or two rows of cilia are present in the middle of the body, and the characteristic telotrochal rings are absent. Cf. *Atrocha*, *Monotrocha*, *Telotrocha*, *Polytrocha*, *Nototrocha*, *Gasterotrocha*, *Amphitrocha*, *Actinotrocha*, *Trochophora*.

Mesoturbinal (*mes-o-ter'-bin-al*) [μέσος, middle; *turbo*, a wheel]. The lower part of the ectethmoid, overhanging the middle nasal meatus.

Mesotympanic (*mes-o-tim-pan'-ik*) [μέσος, middle; τύμπανον, a drum]. See *Symplectic*.

Mesovarium (*mes-o-va'-re-um*) [μέσος, middle; *ovarium*, ovary]. A peritoneal fold connecting the ovary to the broad ligament.

Mesoventral (*mes-o-ven'-tral*) [μέσος, middle; *venter*, belly]. Both median and ventral.

Mesoxalic Acid (*mes-oks-al'-ik*) [μέσος, middle; ὀξαλίς, sorrel], $C_3H_2O_5 + H_2O$. A crystalline acid obtained in several ways from alloxan and from amidomalonic acid.

Mesoxalylurea (*mes-oks-al-il-u'-re-ah*). Same as *Alloxan*.

Mesozoa (*mes-o-zo'-ah*) [μέσος, middle; ζῷον, animal]. A class of animals intermediate between the protozoa and the metazoa.

Mesquite (*mes'-kit*). See *Mezquite*.

Mestica (*mes'-tik-ah*). Same as *Cochineal*.

Mestome (*mes'-tōm*) [μέστωμα, fulness]. In biology, that portion of a fibrovascular bundle which is essentially conductive, as distinguished from the supporting tissue, *stereome*.

Meta- (*met'-ah-*) [μετά, among or between]. A prefix signifying over, beyond, among, between, change, or transformation. For many *meta-* organic compounds see the corresponding words without the prefix.

Meta-acetphenetidin (*met-ah-as-et-fen-et'-id-in*). See *Phenacetin*.

Metabasis (*met-ab'-as-is*) [μετά, over; βαίνειν, to go]. Any radical change in a disease. Also, a change in the treatment of a disease.

Metabole (*met-ab'-o-le*). Synonym of *Metabolism*; also of *Metabasis*.

Metabolia (*met-ab-o'-le-ah*). Synonym of *Metabolism*.

Metabolic (*met-ab-ol'-ik*) [μεταβολή, change]. Pertaining to metabolism. **M. Equilibrium**, the equality between the absorption and assimilation of food, and the excretion of effete or end-products.

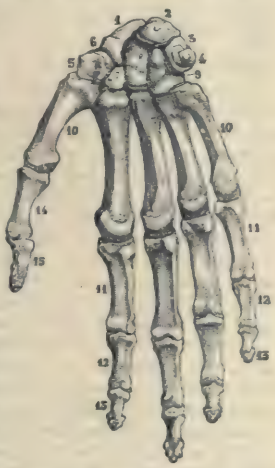
Metabolin (*met-ab'-o-lin*) [μεταβολή, change]. A product of metabolism; a metabolite or mesostate.

Metabolism (*met-ab'-o-lizm*) [μεταβολή, change]. A change taking place in the intimate condition of cells whereby their molecule becomes more complex or contains more force—*anabolism*—or less complex—*katabolism*. The former process is also called *constructive* or *synthetic metabolism*, the latter, *destructive metabolism*. The power that organized bodies possess of continually using up and renewing the matter composing the body.

Metabolite (*met-ab'-o-līt*) [μεταβολή, change]. Any product of metabolic change; any mesostate.

Metabolize (*met-ab'-o-līz*) [μεταβολή, change]. To transform by means of metabolism.

Metabolous (*met-ab'-o-lus*). Synonym of *Metabolic*.



Metaboly (*met-ab'-o-le*) [μεταβολή, later also μεταβολία, change, exchange]. Same as *Metabolism*.

Metacarpal (*met-ak-ar'-pal*) [μετακάρπιον, wrist]. Pertaining to the metacarpus, or to any bone of the metacarpus.

Metacarpen (*met-ak-ar'-pen*) [μετακάρπιον, wrist]. Belonging to the metacarpus in itself.

Metacarpo-phalangeal (*met-ak-ar'-po-pha-lan'-je-al*) [μετακάρπιον, wrist; φάλαγξ, phalanx]. Belonging to the metacarpus and the phalanges.

Metacarpus (*met-ak-ar'-pus*) [μετά, beyond; καρπός, wrist]. The bones, five in number, of the palm of the hand; that part between the carpus and the phalanges.

BONES OF THE HAND, SHOWING THE METACARPUS.

1. Scaphoid. 2. Semilunar. 3. Cuneiform. 4. Pisiform. 5. Trapezium. 6. Groove for tendon of flexor carpi radialis. 7. Trapezoid. 8. Os magnum. 9. Unciform. 10, 10. Metacarpal bones. 11, 11. First phalanges of fingers. 12, 12. Second phalanges. 13, 13. Third phalanges. 14. First phalanx of thumb. 15. Second phalanx.

Metacasein Reaction. The coagulation of milk on boiling, after treatment with pancreatic extracts.

Metacele, Metacelia (*met'-as-ēl, met-as-e'-le-ah*) [μετά, beyond; κοιλία, cavity]. The caudal or metencephalic portion of the fourth ventricle.

Metacellulose (*met-as-el'-u-lōs*) [μετά, along with; *cellula*, a cell]. An isomer of cellulose, with which it agrees in being soluble in concentrated sulphuric acid, and from which it differs in being insoluble in cupric ammonia even after the addition of acids. Cf. *Paracellulose*.

Metacheirisis (*met-ak-i'-ris-is*), **Metacheirismus** (*met-ak-i-ris'-mus*) [μετά, with; χείρ, hand]. Manipulation in the treatment of disease.

Metachloral (*met-ak-lo'-ral*) [μετά, beyond; χλωρός, green]. A tasteless, polymeric form of chloral, said to have properties not unlike those of chloral hydrate. Unof.

Metachoresis (*met-ak-o'-res-is*) [μετά, beyond; χώρησις, a going]. Metastasis; dislocation.

Metachromasia (*met-ak-ro-ma'-ze-ah*) [μετά, beyond; χρῶμα, color]. The chemico-chromatic changes induced in cells by the staining substances employed in histologic technic.

Metachromatism (*met-ak-ro'-mat-izm*) [μετά, after; χρῶμα, color]. Change of color, as of the hair.

Metachrosis (*met-ak-ro'-sis*) [μετά, beyond; χρώζειν, to tinge, to stain]. In biology, applied to the change or play of colors seen in the squid, chameleon, and other animals.

Metachysis (*met-ak'-is-is*) [μετά, beyond; χύσις, effusion]. The transfusion of blood. Also, the introduction of any substance into the blood by mechanical means.

Metacinesis (*met-as-in-e'-sis*). Synonym of *Metakinesis*.

Metacism (*met'-as-izm*) [μυτακισμός, from μῦ, letter m]. Repetition of the letter m.

Metacondyle (*met-ak-on'-dil*) [μετά, after; κόνδυλος, knuckle]. Any distal phalanx of a finger, or the bone thereof.

Metacone (*met'-ak-ōn*) [μετά, beyond; κῶνος, cone]. The outer posterior cusp of an upper molar tooth.

Metaconid (*met-ak-o'-nid*) [μετά, beyond; κῶνος, cone]. The inner anterior cusp of a lower molar tooth.

Metaconule (*met-ak-o'-nūl*) [μετά, beyond; κῶνος, cone]. The posterior intermediate cusp of an upper molar tooth.

Metacroleïn (*met-ak-ro'-le-in*) [μετά, beyond; *acer*, sharp; *oleum*, oil], $(C_3H_4O)_2$. A product of the burning of the HCl compound of acrolein with alkalies or potassium carbonate. It crystallizes from alcohol in tablets, fusing at from 45° to 46° C., and dissociating at 160° C.

Metacyesis (*met-as-i-e'-sis*) [μετά, beyond; κύησις, gestation]. Extra-uterine gestation, especially that which is begun in the oviduct and continued in the abdominal cavity.

Metadermatosis (*met-ad-er-mat-o'-sis*) [μετά, beyond; δέρμα, skin; νόσος, disease]. A pathologic production of epidermis.

Metadrasis (*met-ad-ra'-sis*) [μετά, over; δρᾶσις, exertion]. Overwork of body or mind.

Metafacial (*met-af-a'-shal*) [μετά, beyond; *facies*, face]. Posterior to the face.

Metagaster (*met-ag-as'-ter*) [μετά, beyond; γαστήρ, stomach]. The primitive digestive tube from which the respiratory organs are developed.

Metagastrula (*met-ag-as'-tru-lah*) [μετά, beyond; γαστήρ, belly]. A modification of segmentation, producing a form of gastrula differing from the simple gastrula of the amphioxus.

Metagenesis (*met-aj-en'-es-is*) [μετά, beyond, after; γένεσις, production]. In biology, indirect development, or the alternation of differently-formed generations which multiply in different ways, *i. e.*, sexually or gemmiparously.

Metagenetic, Metagenic (*met-aj-en-et'-ik, met-aj-en'-ik*) [μετά, beyond; γένεσις, origin]. Relating to metagenesis.

Metaglycerin (*met-ag-lis'-er-in*) [μετά, beyond; γλυκερός, sweet], $C_6H_{12}O_6$. An oily substance derived from glycerin by heating a solution of it in water to 100° C. or by treating glycerin with hydrochloric acid.

Metagnathism (*met-ag'-na-thizm*) [μετά, beyond; γνάθος, the jaw]. In biology, applied to the crossing of the mandibles, as seen in certain birds, *e.g.*, *Loxia curvirostra*.

Metakinesis (*met-ak-in-e'-sis*) [μετά, toward; κίνησις, movement, change]. 1. In biology, Waldeyer's term for the *pithode*, or *barrel-stage* of cell-division, in which the secondary threads or loops tend to pass toward the two poles of the nuclear spindle. 2. Any psychologic exhibition coördinate or correlate of kinesis. See *Kinesis*.

Metakresol (*met-ak-re'-sol*) [μετά, along with; κρέας, flesh; *oleum*, oil], $C_7H_8O_2$. A phenol isomeric with kresol. It boils at 201° C. (398.8° F.) and has an odor like that of carbolic acid.

Metal (*met'-al*) [μέταλλον, a metal]. Any elementary substance distinguished by malleability, ductility, fusibility, and the basic character of its oxid.

Metalbumin (*met-al'-bu-min*). See *Paralbumin*.

Metalepsy (*met'-al-ep-se*) [μετάληψις, participation]. In chemistry, change or variation produced by the displacement of an element or radicle in a compound by its chemic equivalent. It is the same as *Substitution*, *q. v.*

Metaleptic (*met-al-ep'-tik*) [μετάληψις, participation]. Relating to metalepsy; also applied to a muscle, associated in its movement with another.

Metallage, Metallaxis (*met'-al-āj, met-al-aks'-is*). Synonym of *Metabasis*, *q. v.*

Metallenterophthisis (*met-al-en-ter-off'-this-is*) [μέταλλον, metal; ἔντερον, intestine; φθίσις, wasting]. Intestinal wasting or phthisis caused by metallic poisoning.

Metallic (*met-al'-ik*) [μέταλλον, metal]. Resembling a metal. **M. Base for Artificial Teeth**, a metallic plate adapted to such portion of the alveolar arch as

is deprived of natural teeth, and is supplied with an artificial substitute. Gold and platinum are the most suitable metals for this purpose, and those usually employed by American dentists; but silver is also very frequently used. **M. Taste,** a peculiar taste observed in certain diseases, and also after the ingestion of some of the metallic poisons. **M. Tinkling,** the peculiar quality given to a sound produced in a cavity in a tuberculous lung, or in a pleural sac containing a liquid exudate and a layer of air above it. **M. Tractors,** the instruments used by Perkins in his system of metallo-therapy. See *Perkinism.*

Metalliform (*met-al'-if-orm*). See *Metallic.*

Metalline (*met'-al-ēn*) [*μέταλλον*, metal]. Consisting of metal.

Metallochymia (*met-al-o-kim'-e-ah*) [*μέταλλον*, metal; *χυμεία*, chemistry]. The chemistry of metals.

Metallodynia (*met-al-o-din'-e-ah*) [*μέταλλον*, metal; *ὀδύνη*, pain]. Pain caused by metallic poisoning.

Metalloid (*met'-al-oid*) [*μέταλλον*, metal; *εἶδος*, form]. 1. Resembling a metal in luster and color. 2. Any non-metallic element.

Metallophagia (*met-al-o-fa'-je-ah*), **Metallophagy** (*met-al-off'-a-je*) [*μέταλλον*, metal; *φαγεῖν*, to eat]. The insane impulse to swallow metallic objects.

Metalloscopy (*met-al-os'-ko-pe*) [*μέταλλον*, a metal; *σκοπεῖν*, to examine]. The art of determining by external application what metals or metallic substances act most easily and favorably upon a given person. See also *Metallotherapy.*

Metallotherapy (*met-al-o-ther'-ap-e*) [*μέταλλον*, metal; *θεραπεία*, therapy]. A method of treating certain hysteric or paralytic affections by the application of different metals to the affected part. There is usually a transfer of the anesthesia or paralysis to the limb of the other side. This method is called also Burcquism and Metalloscopy. An old method of similar character was called *Perkinism.*

Metallotoxemia (*met-al-o-toks-e'-me-ah*) [*μέταλλον*, metal; *τοξικόν*, poison; *αἷμα*, blood]. Toxemia, or blood-poisoning, due to the ingestion of a metal.

Metamere (*met'-am-ēr*) [*μετά*, after; *μέρος*, part]. Any one of the theoretic segments of a vertebrate animal.

Metameric (*met-am-er'-ik*) [*μετά*, after; *μέρος*, part]. A qualification applied to isomeric bodies containing several different carbon groups held in combination by an atom of higher valence.

Metamerid (*met-am'-ēr-id*) [*μετά*, after; *μέρος*, part]. A group of metameric bodies; usually applied to the more complex metameric substances.

Metamerism (*met-am'-er-izm*) [*μετά*, after; *μέρος*, a part]. A change in the arrangement of the parts or atoms of a chemic compound; a form of isomerism.

Metamethylphenol (*met-am-eth-il-fe'-nol*). Same as *Metakresol.*

Metamorphia (*met-am-or'-fe-ah*). Synonym of *Metamorphin.*

Metamorphic (*met-am-or'-fik*) [*μετά*, across; *μορφή*, form]. Pertaining to metamorphosis; also synonymous with metamorphous.

Metamorphin (*met-am-or'-fin*) [*μετά*, beyond; *Morpheus*, the god of sleep]. An alkaloidal decomposition-product obtained from the mother-liquor of morphin-manufacture. It is said to be narcotic and sudorific, but is little known and seldom used. Unof.

Metamorphism (*met-am-or'-fizm*). See *Metamorphosis.*

Metamorphology (*met-am-or-fol'-o-je*) [*μεταμόρφωσις*, a transformation; *λόγος*, science]. In biology, the science of the changes of form passed through by individual organisms in the course of their life-histories.

Metamorphopsia (*met-am-or-fop'-se-ah*), **Metamorphopsy** (*met-am-or'-fop-se*) [*μεταμορφόειν*, to change shape; *ὄψις*, sight]. An apparent distortion or change of form of objects, supposed to be produced by changes in the relative position of the retinal end-organs.

Metamorphosing (*met-am-or-fo'-zing*) [*μεταμόρφειν*, to change shape]. Altering; changing. **M. Breath-sound,** a variety of breathing related to the existence of a cavity. It occurs only in inspiration, and consists of a very harsh sound, which lasts for about one-third of the period of inspiration, when it is continued as blowing respiration, attended with metallic echo or ordinary râles. It is produced by the air entering the cavity through a narrow opening.

Metamorphosis (*met-am-or'-fo-sis*) [*μετά*, across; *μορφόειν*, to change]. A term denoting the structural changes in form which all organisms undergo during their development from the embryonic to the adult stage. It is applied particularly to that form of sexual reproduction in which the embryo undergoes a series of marked changes of external form (*e. g.*, the chrysalis, the pupa-stage, etc.), and in none of which reproduction is possible until the sexually developed form (the imago-stage of butterflies) is produced. In pathology, a degeneration. **M., Complete,** in insects, the three stages of metamorphosis, larva, pupa, imago. **M., Hemimetabolic,** a metamorphosis in which the succeeding stages do not differ much, although the first and last stages may present great variations. **M., Holometabolic.** See *M., Complete.* **M., Regressive, M., Retrograde,** a disintegrating change; a degeneration; also the change of an organ from a higher to a lower type. **M., Viscous,** the agglutination of blood-plaques and their conversion into a thrombus.

Metamorphous (*met-am-or'-fus*) [*μετά*, across; *μορφόειν*, to change]. Amorphous, but with a tendency to crystallize.

Metamorphy (*met-am-or'-fe*). Synonym of *Metamorphosis.*

Metamylene (*met-am'-il-ēn*) [*μετά*, across; *ἄμυλον*, starch], $C_{20}H_{40}$. A derivative of the polymers of amylene, produced by heating amylic alcohol with sulphuric or phosphoric acid, or with zinc chlorid.

Metanaphthalene (*met-an-af'-thal-ēn*) [*μετά*, beyond; *νάφθα*, naphtha]. A decomposition-product obtained by the destructive distillation of resin. It is isomeric with naphthalene, and boils at 235° C.

Metanaphthalin (*met-an-af'-thal-in*) [*μετά*, beyond; *νάφθα*, naphtha]. A solid hydrocarbon, insoluble in water, soluble in hot alcohol, in ether, and in naphtha, obtained in one stage of the dry distillation of a resin.

Metanauplius (*met-an-aw'-ple-us*) [*μετά*, after; *nauplius; ναῦς*, a ship; *πλεῖν*, a sail: *pl.*, *Metanauplii*]. In biology, a larval crustacean at a certain stage of development.

Metanephric (*met-an-ef'-rik*) [*μετά*, after; *νεφρός*, kidney]. Pertaining to the metanephros.

Metanephros, Metanephron (*met-an-ef'-ros, met-an-ef'-ron*) [*μετά*, after; *νεφρός*, kidney]. In biology, the kidney proper of vertebrates. The posterior of the three segmental bodies of the fetus; it forms the rudiment of the permanent kidney and ureter. It is a special portion of the Wolffian body, that develops late, and only occurs in the amniota as a gland distinct from the mesonephros. Cf. *Pronephros, Mesonephros.*

Metanil-yellow (*met'-an-il'-yel'-o*). Sodium-phenyl-amido-benzol-meta-sulphonate; a substance used in counter-staining tissues. See *Pigments, Conspectus of.*

Metanotum (*met-an-o'-tum*) [*μετά*, behind; *νῶτον*, the back: *pl.*, *Metanota*]. In biology, the third and last segment of the notum, or dorsal part of the metathorax of an insect.

Metaparapteron (*met-ap-ar-ap'-ter-on*) [*μετά*, with; *παρά*, beside; *πτερόν*, wing: *pl.*, *Metaparaptera*]. In biology, the third sclerite in the metapleuron of an insect.

Metapedium (*met-ap-e'-de-um*). Synonym of *Metatarsus.*

Metapeptone (*met-ap-ep'-tōn*) [*μετά*, beyond; *πέψις*, digestion]. A substance obtained by Meissner from the fluid resulting from the acid peptic digestion of any proteid after the parapeptone had been removed. The latter having been removed by filtration, to the filtrate was added some acid, and a precipitate was secured, to which was given the foregoing name. Meissner further describes a residue insoluble in dilute acids, but soluble in dilute alkalies, that made its appearance during the digestion of casein, and to this he gave the name of *dyspeptone*. Metapeptone is said to be intermediate between parapeptone and dyspeptone.

Metaphases (*met-af-a'-zēs*) [*μετά*, after, following; *φάσις*, a phase]. In biology, the final phase or set of phenomena of karyokinesis, from the division of the nuclear fibrils to the separation of the daughter-nuclei. (Strasburger.) Cf. *Anaphases*, *Prophases.*

Metaphenylendiamin (*met-af-en-il-en-di'-am-in*) [*μετά*, beyond; *phenylendiamin*]. A base similar in action to the toxic ptomains, quickly producing death in animals, preceded by ptyalism, vomiting, diarrhea, and excessive urinary secretion. See *Paraphenylendiamin.*

Metaphery (*met-af'-er-e*) [*μετά*, over; *φέρειν*, to carry]. In biology, the transposition or displacement of floral organs.

Metaphlogosis (*met-af-lo-go'-sis*) [*μετά*, beyond; *φλόγωσις*, a burning]. Severe inflammation with much engorgement, but of short duration.

Metaphosphoric Acid (*met-af-os-for'-ik*) [*μετά*, beyond; *phosphorus*]. See *Acid*, *Phosphoric.* **M. Test for Albumin.** See *Tests*, *Table of.*

Metaphrenon (*met-af'-ren-on*) [*μετά*, beyond; *φρήν*, diaphragm]. The space between the shoulders.

Metaphysical (*met-af-is'-ik-al*) [*μετά*, after; *φυσικά*, physics]. Of or pertaining to metaphysics. **M. Mania**, doubting insanity. **M. School**, a name assumed for an alleged system of medicine; the so-called mind-cure.

Metaphysician (*met-af-is-ish'-an*) [*μετά*, after; *φυσικά*, physics]. A term that has been applied to one who practises the mind-cure.

Metaphysicist (*met-af-iz'-is-ist*). Same as *Metaphysician.*

Metaphysics (*met-af-iz'-iks*) [*μετά*, beyond; *φύσις*, nature]. That science which includes the investigation and discussion of the nature of mind and all supersensible phenomena. **M., Medical**, the consideration of the essential nature and cause of disease. The philosophy of disease.

Metaphysis (*met-af'-is-is*). Synonym of *Metamorphosis.*

Metaplasia (*met-ap-la'-ze-ah*) [*μετά*, beyond; *πλάσσειν*, to form]. A transformation of a tissue into another without the intervention of an embryonal tissue. It occurs only among tissues closely related, and is most common in the connective tissues. Fibrous tissue may be transformed directly into bone, myxomatous into adipose tissue. Metaplasia occurs also in epithelium.

Metaplasis (*met-ap'-las-is*) [*μετά*, over; *πλάσις*, formation]. Fulfilled growth and development seen in the stage between anaplasis and cataplasis.

Metaplasm (*met'-ap-lazm*) [*μετά*, beyond; *πλάσμα*, molded material]. In biology, the name given by Hanstein to the granular substances mingled with protoplasm. Properly, protoplasm that has passed beyond its highest stage of perfection; a catastate. The term is used also as a synonym of *anastate*, and as a general term for both anastates and catastates.

Metaplastic (*met-ap-las'-tik*) [*μετά*, beyond; *πλασικός*, plastic]. Pertaining to metaplasia.

Metapleuron (*met-ap-lu'-ron*) [*μετά*, with; *πλευρόν*, a rib: *pl.*, *Metapleura*]. In biology, one of the lateral divisions of the metathorax of an insect.

Metaplex (*met'-ap-leks*), **Metaplexus** (*met-ap-leks'-us*) [*μετά*, behind; *plexus*, a twining]. The choroid plexus of the fourth ventricle.

Metapneustic (*met-ap-nūs'-tik*) [*μετά*, behind; *πνευστικός*, of or for breathing]. In biology, applied to that state of the tracheal system in insect larvæ in which all the stigmata remain closed, except the last pair, through adaptation to parasitism or an aquatic life.

Metapodialia (*met-ap-o-de-a'-le-ah*) [*μετά*, behind; *πούς*, foot]. In osteology, a collective term applied to the bones of the metacarpus and metatarsus considered as a segment of the fore-limb or hind-limb, respectively. Cf. *Mesopodialia.*

Metapodium (*met-ap-o'-de-um*) [*μετά*, behind; *πούς*, foot: *pl.*, *Metapodia*]. In biology, the posterior of the three sections into which the foot of some molluscs may be divided. A synonym of *Metatarsus.* Cf. *Mesopodium*, *Propodium.*

Metapophysis (*met-ap-off'-is-is*) [*μετά*, after; *ἀπόφυσις*, offshoot]. A mammillary process, such as is seen upon the lumbar vertebræ.

Metapore (*met'-ap-or*) [*μετά*, behind; *πόρος*, passage]. The foramen of Magendie; a mesal orifice in the metatela.

Metapsyche (*met-ap'-sik-e*) [*μετά*, behind; *ψυχή*, soul]. In anatomy, Haeckel's term for the hind-brain or metencephalon.

Metapsychosis (*met-ap-si-ko'-sis*) [*μετά*, beyond; *ψύχωσις*, psychosis]. Same as *Telepathy.*

Metapterygium (*met-ap-ter-ij'-e-um*) [*μετά*, behind; *πτερύγιον*, a little wing: *pl.*, *Metapterygia*]. In biology, the most posterior of the basal cartilages in the pterygium of a fish.

Metapterygoid (*met-ap-ter'-ig-oid*) [*μετά*, beyond; *πτέρυξ*, wing]. Placed behind the pterygoid bone.

Metaptosis (*met-ap-to'-sis*) [*μετά*, beyond; *πτῶσις*, a falling]. Metastasis; sudden metabolic change.

Metarrhea (*met-ar-e'-ah*). Synonym of *Metastasis.*

Metarrhysis (*met-ar'-is-is*). Synonym of *Metastasis.*

Metasaccharic Acid (*met-as-ak-ar'-ik*). See *Acid.*

Metasaccharin (*met-as-ak'-ar-in*) [*μετά*, beyond; *σάκχαρον*, sugar], $C_6H_{10}O_5$. An isomerid of saccharin. It crystallizes in plates and melts at 142° C.

Metaschematism (*met-as-ke'-mat-izm*) [*μεταχηματίζειν*, to change the form]. A transformation of a disease into another form; the change of one substance of the body into another.

Metasoma (*met-as-o'-mah*) [*μετά*, after; *σῶμα*, body]. The part of the body of lamellibranchs posterior to the foot; also the posterior part of cephalopods.

Metasomatome (*met-as-o'-mat-ōm*) [*μετά*, between; *σῶμα* the body; *τεμνεῖν*, to cut]. In biology, Goodsir's term for the interspaces between the primitive vertebræ (*Urwirbel*). Cf. *Somatome.*

Metasome (*met'-as-ōm*) [*μετά*, after; *σῶμα*, body]. In biology, the posterior part of the body of a mollusc.

Metaspondylum, Metaspondyllum (*met-as-pon'-dil-um*) [*μετά*, beyond; *σφόνδυλος*, vertebra]. An intervertebral disc.

Metastasis (*met-as'-tas-is*) [μεθιστάναι, to transpose]. 1. The change in position, manifestation, or character of a disease; thus, in mumps, the inflammation of the parotid sometimes disappears in a (metastatic) orchitis. Such cases are possibly explained by the transfer of the pathogenic virus from one place to another by the blood-current. 2. In pathology, the reproduction of disease at a distance from the primary seat by the conveyance of the causal agents through the blood or lymph-channels.

Metastate (*met'-as-tāt*) (μετά, beyond; στατός, placed]. Any substance produced by a metabolic process; an anastate or a catastate. Same as *Mesostate*.

Metastatic (*met-as-tat'-ik*) [μεταστατικός, from μεθιστάναι, to transpose]. Characterized by or pertaining to metastasis. **M. Abscess**, the secondary abscesses in pyemia. **M. Calcification**, calcareous infiltration due to an excess of lime-salts in the blood in diseases associated with rapid disintegration of bone.

Metasternum (*met-as-ter'-num*) [μετά, behind; στέρνον, breast: *pl.*, *Metasterna*]. In biology, the xiphisternum, or in insects the sternite of the metathorax.

Metasthenic (*met-as-then'-ik*) [μετά, behind; σθένος, strength, might]. In biology, having a strong, well-developed hind-region to the body.

Metastoma (*met-as'-to-mah*) [μετά, behind; στόμα, mouth]. In biology, the membranous appendage that lies behind and over the mandibles in crustacea; the posterior lip of some authors.

Metasyncrisis (*met-as-in'-kris-is*) [μετασυγκρίνειν, to discharge morbid fluids through pores]. 1. An induced crisis. 2. The restoration of diseased tissues.

Metasyncritic (*met-as-in-krit'-ik*) [μετασυγκρίνειν, to discharge morbid fluids through pores]. Pertaining to metasyncrisis; alterative.

Metatarsal (*met-at-ar'-sal*) [μετά, beyond; ταρσός, tarsus]. Pertaining to the metatarsus.

Metatarsalgia (*met-at-ar-sal'-je-ah*) [μετά, beyond; ταρσός, tarsus; ἄλγος, pain]. *Morton's toe;* a painful affection of the plantar digital nerves directly caused by pressure upon or pinching of them by certain portions of the metatarso-phalangeal articulations—especially the fourth. See *Diseases, Table of.*

Metatarsen (*met-at-ar'-sen*) [μετά, beyond; ταρσός, tarsus]. Belonging to the metatarsus in itself.

Metatarso-phalangeal (*met-at-ar-so-fa-lan'-je-al*) [μετά, beyond; ταρσός, tarsus; φάλαγξ, phalanx]. Pertaining to the metatarsus and the phalanges.

Metatarsus (*met-at-ar'-sus*) [μετά, beyond; ταρσός, tarsus: *pl.*, *Metatarsi*]. The bones of the arch of the foot, five in number, situated between the tarsus and the phalanges; the instep. In entomology: (*a*) the terminal joint or appendage of the tarsus of an insect's leg, called *planta empodium, scopula;* (*b*) the entire foot of the hind-leg.

Metatela (*met-at-e'-lah*) [μετά, behind; *tela*, tissue]. The tela of the metencephal; the velum medullare posterius, or inferior choroid tela. It constitutes the roof of the metacele.

Metathesis (*met-ath'-es-is*) [μετά, beyond; τιθέναι, to place]. An operation designed to effect a transformation or change in the seat of disease from one part to another. In chemistry, the interchange of two elements in decomposition.

Metathetic (*met-ath-et'-ik*) [μετά, beyond; τιθέναι, to place]. Of the nature of a metathesis.

Metathoracotheca (*met-ath-o-rak-o-the'-kah*) [μετά, beyond; θώραξ, the chest; θήκη, a case: *pl.*, *Metathoracothecæ*]. In entomology, that part of the integument covering the metathorax in a pupa.

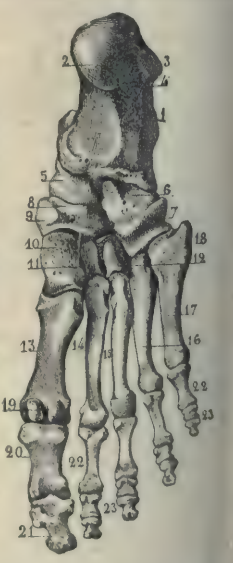
Metathorax (*met-ath-o'-raks*) [μετά, beyond; θώραξ, the chest]. In biology, the third and last segment of the thorax in insects; it bears the third pair of legs and the second pair of wings, and is composed of the metasternum, metapleura, and post-dorsum.

Metatocia (*met-at-o'-ke-ah*) [μετά, beyond; τόκος, birth]. Birth by any other than the normal process, as by Cesarean section.

Metatrophia (*met-at-ro'-fe-ah*) [μετά, beyond; τροφή, nourishment]. Any morbid condition or process of nutrition.

Metaxin (*met-aks'-in*) [μεταξύ, between]. A proteid found by Schwartz in the plasmatic substratum of chlorophyl-grains. It is easily digested by both pepsin and trypsin.

Metaxylene (*met-aks'-il-ēn*) [μετά, beyond; ξύλον, wood]. One of the constituents of xylol.



Metazoa (*met-az-o'-ah*) [μετά, beyond; ζῷον, animal]. Animals whose development is characterized by segmentation of the ovum. They comprise all animals except the Protozoa.

Metazoan (*met-az-o'-an*) [μετά, beyond; ζῷον, animal]. 1. A member of the *Metazoa*. A multicellular animal having a transitional stage (*Gastrula*) in its development, corresponding to a hypothetic ancestor, the *Gastræa*, which is held to have arisen from a Protozoan colony in the shape of a hollow sphere, by the formation and gradual deepening of a depression or invagination. 2. Pertaining to the metazoa.

Metecious (*met-e'-she-us*) [μετά, beyond; οἶκος, a house]. See *Heterecious*.

Metembryo (*met-em'-bre-o*) [μετά, after; ἔμβρυον, embryo]. In biology, the gastrula stage of the metazoan embryo.

Metencephal (*met-en-sef'-al*). Same as *Metencephalon*.

THE METATARSUS AND ADJACENT BONES.

1. Inferior surface of calcaneum. 2. Inner tuberosity. 3. Outer tuberosity. 4. Angular depression between these tuberosities. 5. Inferior portion of head of astragalus. 6. Plantar surface of cuboid, for attachment of inferior calcaneo-cuboid ligament. 7. Tuberosity of cuboid. 8. Scaphoid. 9. Tuberosity of scaphoid. 10. Inferior portion of internal cuneiform. 11. Apex of middle cuneiform. 12. Apex of internal cuneiform. 13, 14, 15, 16, 17. First, second, third, fourth and fifth metatarsal bones. 18. Tuberosity of fifth metatarsal bone. 19. Two sesamoid bones. 20. First phalanx of great toe. 21. Last phalanx of great toe. 22, 22. First phalanges of remaining toes. 23, 23. Second and third phalanges of these toes.

Metencephalic (*met-en-sef-al'-ik*) [μετά, after; ἐγκέφαλος, brain]. Pertaining to the metencephalon.

Metencephalon (*met-en-sef'-al-on*) [μετά, after; ἐγκέφαλος, brain]. 1. The afterbrain; the post-oblongata, or most caudal portion of the brain. 2. Rarely, the cerebellum and the pons.

Metensomatosis (*met-en-so-mat-o'-sis*) [μετά, beyond; ἐνσωμάτωσις, embodiment]. Transformation into or union with another body.

Metenteron (*met-en'-ter-on*) [μετά, after; ἔντερον, intestine]. The enteron in any secondary or specialized state due to modification of the archenteron.

Meteoric (*me-te-or'-ik*) [μετεωρίζειν, to elevate]. Pertaining to meteorism; also, pertaining to the atmosphere.

Meteorism, Meteorismus (*me'-te-or-izm, me-te-or-iz'-mus*) [μετεωρίζειν, to elevate]. Distention of the abdomen with gases; tympanites.

Meteoristic (*me-te-or-is'-tik*) [μετεωρίζειν, to elevate]. Synonym of *Tympanitic*.

Meteorization (*me-te-or-iz-a'-shun*) [μετεωρίζειν, to elevate]. The formation of gas in the abdomen; the production of meteorism.

Meteorology (*me-te-or-ol'-o-je*) [μετέωρον, meteor; λόγος, a treatise]. The science of the phenomena of the atmosphere and the laws of its motions.

Metepencephalon (*met-ep-en-sef'-al-on*) [μετά, after; ἐπί, upon; ἐγκέφαλος, brain]. The metencephalon and epencephalon considered together. It includes the cerebrum, the oblongata, and the pons.

Metepicele (*met-ep'-is-ēl*) [μετά, beyond; ἐπί, upon; κοιλία, belly]. The fourth ventricle of the brain; the ventricle of the metepencephalon; the metacele and epicele taken together.

Metepimeron (*met-ep-im'-er-on*) [μετά, after; ἐπί, upon; μηρός, a thigh: *pl.*, *Metepimera*]. In biology, the epimeron or lateral piece of the metathorax of an insect.

Metepisternum (*met-ep-is-ter'-num*) [μετά, after; ἐπί, upon; στέρνον, breast, breast-bone: *pl.*, *Metepisterna*]. In biology, one of the episterna of the metathorax of an insect.

Meter (*me'-ter*) [μέτρον, measure]. See *Metric System*. **M.-angle.** See *Angle*.

Methacetin (*meth-as'-et-in*) [μετά, beyond; *acetum*, vinegar], $C_9H_{11}NO_2$. An analogue of phenacetin, having the same antipyretic qualities as the latter, and more soluble. Dose from 2 to 4 grains exhibited with great caution. Unof.

Methal (*meth'-al*) [μετά, with; ὕλη, matter], $C_{14}H_{30}O$. An alcohol, not yet isolated, occurring in spermaceti.

Methane (*meth'-ān*) [μετά, with; ὕλη, matter], CH_4. Marsh-gas. The first member of the homologous series of paraffins, C_nH_{2n+2}. It occurs in nature wherever decomposition of organic matter is going on, especially in marshes. It is inflammable, and unites readily with the halogens. See *Carbohydrates*, *Table of*.

Metheglin (*me-theg'-lin*) [Welsh, *medd*, mead; *llyn*, liquor]. A variety of mead, or hydromel. See *Hydromel*.

Methemochymia (*meth-em-o-kī'-me-ah*) [μετά, amid; αἷμα, blood; χεῖν, to pour]. Synonym of *Transfusion*.

Methemoglobin (*met-hem-o-glo'-bin*) [μετά, with; αἷμα, blood; *globus*, a ball]. A modified form of hemoglobin produced by exposing blood, or solutions of hemoglobin, to the air for some time. It may be obtained in crystalline form as reddish-brown needles that are doubly refracting and readily soluble in water, though less so than oxyhemoglobin. It is the product either of the incomplete decomposition of hemoglobin or of its excessive oxidation; the oxygen is more firmly combined in it than in oxyhemoglobin. In poisoning with potassium chlorate, the nitrites, acetanilid, and some other bodies, the blood contains methemoglobin.

Methemoglobinemia (*met-hem-o-glo-bin-e'-me-ah*) [μετά, with; αἷμα, blood; *globus*, a ball; αἷμα, blood]. The presence of free methemoglobin in the blood. See *Methemoglobin*.

Methemoglobinuria (*met-hem-o-glo-bin-u'-re-ah*) [μετά, with; αἷμα, blood; *globus*, a ball; οὖρον, urine]. The presence of free methemoglobin in the urine.

Methexiphrenesis (*meth-eks-if-ren-e'-sis*) [μέθυ, wine; ἕξις, habit; φρένησις, inflammation of the brain]. Delirium tremens.

Methexomania (*meth-eks-o-ma'-ne-ah*) [μέθη, drink; ἕξις, habit; μανία, madness]. See *Methomania*.

Methilepsia (*meth-il-ep'-se-ah*) [μέθη, drink; λῆψις, seizure]. Irresistible desire for strong drink.

Methobiostatics (*meth-o-bi-o-stat'-iks*) [μέθη, strong drink; βίος, life; στατικός, causing to stand]. The study of the influence of alcoholic excess.

Method (*meth'-od*) [μέθοδος, method]. A system or plan of procedure. **M. of Definite Mixtures.** See *Anesthetic*. **M., Intensive.** See *Pasteur*. **M. of Treatment.** See *Treatment, Methods of*.

Methodism (*meth'-od-izm*) [μέθοδος, way, system]. The system of the treatment of disease according to a strict method, as taught by an ancient school or sect of physicians.

Methodist (*meth'-od-ist*) [μέθοδος, system]. A follower of methodism.

Methogastrosis (*meth-o-gas-tro'-sis*) [μέθυ, wine; γαστήρ, stomach; νόσος, disease]. Digestive disturbances consequent upon alcoholic excess.

Methol (*meth'-ol*) [μετά, with; ὕλη, matter]. One of the names of methylic alcohol.

Methomania (*meth-o-ma'-ne-ah*) [μέθη, drunkenness; μανία, madness]. 1. Same as *Mania a potu*. 2. (More often) the irresistible desire for strong drink; dipsomania.

Methyl (*meth'-il*) [μετά, with; ὕλη, matter]. In chemistry, a radicle molecule, having the composition CH_3. It is the base of a large number of compounds, including an alcohol, methyl-spirit, and several ptomains. **M.-alcohol** (*wood-spirit*), obtained in the destructive distillation of wood. It has a purely spirituous odor, a specific gravity of .7995 at 15° C., and boils at 55.1° C. It is miscible in all proportions with water, ordinary alcohol, and ether. **M.-alizarin,** $C_{15}H_{10}O_5$; a substance obtained by fusing methylanthraquinone sulphonic acid with alkalies. It is very similar to alizarin, melting at 250°–252° C., and readily subliming in red needles. **M.-anilin,** $C_6H_5.NH(CH_3)$; an anilin derivative. Boiling at 190°–191° C., it has an odor resembling that of anilin, and a specific gravity at 15° C. of 0.976. The methylated anilins are technically applied in the production of anilin dye-stuffs. They are formed on heating anilin together with HCl-anilin and methyl-alcohol to 200° C. or better still, by conducting CH_3Cl into boiling anilin. **M.-anthracene,** $C_{15}H_{12}$; a substance obtained on heating emodin with zinc-dust. It occurs in crude anthracene, and is obtained from oil of turpentine on exposure to a red heat. It resembles anthracene, crystallizes from alcohol in yellow leaflets, and melts at 190° C. **M.-arabinose.** See *Rhamnose*. **M.-benzene.** See *Toluene*. **M.-blue,** a basic anilin dye used for staining bacteria. See *Pigments, Conspectus of*. **M.-chlorid,** CH_3Cl, a liquefied gas used in the form of a spray as a local anesthetic for the relief of sciatica and similar neuralgic affections. See *Anesthetic*. **M.-ether,** C_2H_6O; dimethyl oxid, an inflammable gas; also, a salt of methyl. **M.-glycocoll.** See *Sarcosin*. **M.-green,** an anilin dye. See *Pigments, Conspectus of*. **M.-guanamin,** $C_4H_7N_5$; a crystalline body, readily soluble in hot water and in alcohol. **M.-guanidin,** $C_2H_7N_3$; *methyluramin*; a colorless, highly hygroscopic, and strongly alkaline base, insoluble in alcohol. It is the product of the oxidation of kreatin and kreatinin, and has been obtained from horseflesh after four months' decomposition at low temperature, and from cultures of the comma-bacillus. It is a colorless, easily deliquescing mass, possessing a strong alkaline reaction, and is highly poisonous. The symptoms

to which toxic doses give rise are dyspnea, muscle-tremor, and general clonic convulsions. See *Ptomains, Table of.* **M.-heptose.** See *Carbohydrates, Table of.* **M.-hexose.** See *Carbohydrates, Table of.* **M.-hydantoin, M.-hydrantoin,** a crystalline substance, obtained by fusing together sarcosin and urea, or by decomposing kreatinin. It melts at 145° C. **M.-hydrid,** marsh-gas. **M.-indol.** See *Skatol.* **M.-orange.** See *Pigments, Conspectus of.* **M.-phenyl Ether.** See *Anisol.* **M.-phenyl-ketone.** Same as *Hypnone.* **M. Salicylate,** $C_8H_8O_3$; an oily liquid of a peculiar odor, constituting 90 per cent. of the oil of wintergreen; it has been used in rheumatism instead of the alkaline salicylates. **M.-spirit.** See *M.-alcohol.* **M.-uramin.** See *M.-guanidin.* **M.-violet,** an anilin dye used for staining bacteria. Under the name of *Pyoktanin* Stilling recommends it very highly as an effective bactericide. Dose gr. j–v. Unof. See *Pigments, Conspectus of.*

Methylal (*meth'-il-al*) [μετά, with; ὕλη, matter; *alcohol*], $C_3H_8O_2$. A substance prepared by distilling methyl-alcohol with sulphuric acid. It is hypnotic and antispasmodic. Dose ʒj. Unof.

Methylamin (*meth-il'-am-in*) [μετά, with; ὕλη, matter; *amin*]. A colorless gas having the composition $N(CH_3)H_2$, easily condensing to a colorless liquid. It is used mainly as a reagent in certain organic tests. It occurs also as a ptomain in certain putrefactions, notably that of fish. It is also found in herring-brine, to which it gives odor.

Methylate (*meth'-il-āt*) [μετά, with; ὕλη, matter]. Methyl-alcohol in which a metal substitutes the hydrogen of the hydroxyl.

Methylated (*meth'-il-a-ted*) [μετά, with; ὕλη, matter]. Containing methyl-alcohol. **M. Spirits,** methyl-alcohol, wood-alcohol. The strongest methylated spirit free from mineral naphtha, can be used in place of 90 per cent. alcohol for hardening and preserving purposes.

Methylation (*meth-il-a'-shun*) [μετά, with; ὕλη, matter]. The process of mixing a substance with methyl-alcohol.

Methylene (*meth'-il-ēn*) [μετά, with; ὕλη, matter], CH_2. A bivalent hydrocarbon radicle that does not exist free, but occurs in many compounds. See *Anesthetic.* **M.-blue,** $C_{16}H_{18}N_3SCl$; a coal-tar dye prepared from dimethylanilin; it is much used in the arts and as a stain in bacteriology. Its 10 per cent. solution is recommended as a local application in diphtheria, tonsillitis, scarlatinal sore-throat, and other inflammatory conditions, and internally administered it has proved serviceable as an antiperiodic and antalgic. Dose gr. jss in capsule. Unof. **M. Dichlorid,** CH_2Cl_2; a general anesthetic, frequently used instead of chloroform. It is asserted by Genther and Eichholz to be more susceptible of management than the latter in protracted operations. Much of the methylene dichlorid contains 50–75 per cent. of chloroform. Unof. See *Anesthetic.*

Methylic (*meth-il'-ik*) [μετά, with; ὕλη, matter]. Containing methyl. Pertaining to methyl.

Methylized (*meth'-il-īzd*). Synonym of *Methylated.*

Methysis (*meth'-is-is*) [μέθυσις, from μεθύειν, to be intoxicated]. Intoxication.

Methyskomania (*meth-is-ko-ma'-ne-ah*) [μεθύσκειν, to make drunk; μανία, madness]. Same as *Methomania;* dipsomania.

Methystic (*meth-is'-tic*) [μεθυστικός, from μεθύειν, to be intoxicated]. 1. Intoxicant. 2. An intoxicating agent.

Methysticin (*meth-is'-tis-in*) [μεθυστικός, intoxicating]. A crystalline principle obtained from *Kava-kava,* closely allied to *piperin.* It is a neutral, tasteless substance, sparingly soluble in cold, but more freely in hot water, easily soluble in alcohol and ether. It is also called *Kavahin.*

Metis (*ma'-tēs*) [Fr.]. A half-breed of French and Indian parentage. See *Mulatto.*

Metoarion (*met-o-a'-re-on*) [μετά, after; ὠάριον, the ovule]. The corpus luteum.

Metodontiasis (*met-o-don-ti'-as-is*) [μετα, after; ὀδοντιᾶν, to cut teeth]. The second dentition; also, abnormality of teething.

Metœcesis (*met-es-e'-sis*) [μετά, beyond; οἴκησις, the act of dwelling]. Transposition; displacement.

Metopagus (*met-op'-ag-us*) [μέτωπον, front; πάγως, joined]. An ensomphalic twin monstrosity with united foreheads.

Metopantralgia (*met-o-pan-tral'-je-ah*) [μέτωπον, forehead; ἄντρον, cave; ἄλγος, pain]. Pain or neuralgia of the frontal sinus.

Metopantritis (*met-o-pan-tri'-tis*) [μέτωπον, forehead; ἄντρον, cave; ιτις, inflammation]. Inflammation of the metopantron.

Metopantron, Metopantrum (*met-o-pan'-tron, met-o-pan'-trum*) [μέτωπον, forehead; ἄντρον, cave]. The frontal sinus.

Metope (*met'-o-pe*) [μέτωπον, face]. In biology, that portion of the frontal surface of a crustacean in which the antennæ are situated. Same as *Facies.*

Metopic (*met-op'-ik*) [μέτωπον, forehead]. 1. Relating to the forehead; frontal. 2. A name applied to a cranium having a medio-frontal suture. **M. Points.** See *Craniometric Points.*

Metopion (*met-o'-pe-on*) [μέτωπον, forehead]. See *Craniometric Points.*

Metopism (*met'-o-pizm*) [μέτωπον, forehead]. Persistence of the frontal suture in adult life. See *Metopon.*

Metopium (*met-o'-pe-um*). Synonym of *Metopon.*

Metopodynia (*met-o-po-din'-e-ah*) [μέτωπον, forehead; ὀδύνη, pain]. Frontal headache.

Metopon (*met'-o-pon*) [μέτωπον, forehead; from μετά, between; ὤψ, eye]. Forehead; also an old name for galbanum.

Metopopagia (*met-o-po-pa'-je-ah*). Synonym of *Metopagus.*

Metoposcopy (*met-op-os'-ko-pe*) [μέτωπον, forehead; σκοπεῖν, to examine]. A variety of phrenology in which the character or the future of an individual is supposed to be determined by an inspection of the forehead.

Metosteon (*met-os'-te-on*) [μετά, after; ὀστέον, a bone; *pl.*, *Metostea*]. In biology, the posterior lateral piece of the sternum of a bird.

Metovum (*met-o'-vum*) [μετά, after; ὠόν, egg; *Metova*]. In embryology, an ovum that has been modified from its primitive condition as an egg-cell or protovum; an after-egg or deutovum. Cf. *Ovum.*

Metra (*me'-trah*) [μήτρα, uterus]. The uterus.

Metralgia (*met-ral'-je-ah*) [μήτρα, womb; ἄλγος, pain]. Pain or neuralgia of the uterus.

Metranastrophe (*met-ran-as'-tro-fe*) [μήτρα, womb; ἀναστροφή, a turning upside down]. Inversion of the uterus.

Metranemia (*met-ran-e'-me-ah*) [μήτρα, womb; priv.; αἷμα, blood]. Uterine anemia.

Metraneurysm (*met-ran'-u-rizm*) [μήτρα, womb; ἀνεύρυσμα, dilatation]. Dilatation of the uterus vulva.

Metrasia (*met-ra'-ze-ah*). Synonym of *Metratresia.*

Metratome (*met'-rat-ōm*) [μήτρα, womb; τομή, a cutting]. An instrument for incising the womb.

Metratonia (*met-rat-o'-ne-ah*) [*μήτρα*, womb; *ἀτονία*, atony]. Atony of the uterus.

Metratresia (*met-rat-re'-ze-ah*) [*μήτρα*, womb; *ἀτρησία*, atresia]. Atresia or imperforation of the womb.

Metratrophia (*met-rat-ro'-fe-ah*) [*μήτρα*, womb; *ἀτροφία*, atrophy]. Atrophy of the uterus.

Metrauxe (*met-rawks'-e*) [*μήτρα*, womb; *αὔξη*, increase]. Hypertrophy or enlargement of the uterus.

Metre (*me'-ter*). See *Metric System*.

Metrechoscope (*met-rek'-o-skōp*) [*μέτρον*, measure; *ἠχή*, round; *σκοπεῖν*, to inspect]. An instrument for applying metrechoscopy.

Metrechoscopy (*met-rek-os'-ko-pe*) [*μέτρον*, measure; *ἠχή*, round; *σκοπεῖν*, to inspect]. Combined auscultation and mensuration.

Metrectasia (*met-rek-ta'-ze-ah*) [*μήτρα*, womb; *ἔκτασις*, a stretching]. Dilatation of the womb.

Metrectatic (*met-rek-tat'-ik*) [*μήτρα*, womb; *ἔκτασις*, a stretching]. Affected with, or pertaining to, metrectasia.

Metrectomy (*met-rek'-to-me*) [*μήτρα*, womb; *ἔκτομη*, excision]. Excision or surgical removal of the womb.

Metrectopia, Metrectopy (*met-rek-to'-pe-ah*, *met-rek'-to-pe*) [*μήτρα*, womb; *ἔκτοπος*, displaced]. Displacement of the womb.

Metrelcosis (*met-rel-ko'-sis*) [*μήτρα*, womb; *ἕλκος*, ulcer]. Uterine ulceration.

Metremia (*met-re'-me-ah*) [*μήτρα*, womb; *αἷμα*, blood]. Congestion of the uterus.

Metremorrhagia (*met-rem-or-a'-je-ah*). Synonym of *Metrorrhagia*.

Metremorrhoid (*met-rem'-or-oid*) [*μήτρα*, womb; *αἷμα*, blood; *ῥοία*, flow]. A hemorrhoid of the uterus.

Metremphraxis (*met-rem-fraks'-is*) [*μήτρα*, uterus; *ἐμφράσσειν*, to obstruct]. Congestion, or infarction, of the uterine tissues.

Metremphysema (*met-rem-fis-e'-mah*). Synonym of *Physometra*.

Metreurysma (*met-ru-riz'-mah*) [*μήτρα*, womb; *εὐρύς*, wide]. Morbid dilatation, or width of the womb.

Metria (*me'-tre-ah*) [*μήτρα*, womb]. Any uterine affection. The term is used also as a synonym of *Puerperal Fever*.

Metric (*met'-rik*) [*μέτρον*, a measure]. Pertaining to the system of weights and measures, of which the meter is the basis. **M. System**, a decimal system of weights and measures employed in France, Germany, and other countries, and used generally in the sciences. The standard is the *meter*, the $\frac{1}{10000000}$ part of a quadrant of a meridian circle of the earth. The standard of capacity is the *liter*, a cubical volume $\frac{1}{10}$ meter in each dimension. The standard of weight is the *gram*, the weight of $\frac{1}{1000}$ liter (one cubic centimeter) of distilled water at its maximum density. The unit of superficial measure is the *are*, a square whose side is 10 meters or a decameter. As the unit of microscopic measurement the thousandth part of a millimeter has been adopted. It is called micron or microm, micromillimeter; abbreviated, *μ*. The multiples are expressed by the prefixes *deca*, *hecto*, and *kilo*; the subdivisions by the prefixes *deci*, *centi*, and *milli*.

1000	meters	=	1 kilometer.
100	meters	=	1 hectometer.
10	meters	=	1 decameter.
.1	meter	=	1 decimeter.
.01	meter	=	1 centimeter.
.001	meter	=	1 millimeter.
1000	liters	=	1 kiloliter.
100	liters	=	1 hectoliter.
10	liters	=	1 decaliter.
.1	liter	=	1 deciliter.
.01	liter	=	1 centiliter.
.001	liter	=	1 milliliter.
1000	grams	=	1 kilogram.
100	grams	=	1 hectogram.
10	grams	=	1 decagram.
.1	gram	=	1 decigram.
.01	gram	=	1 centigram.
.001	gram	=	1 milligram.

In common practice, however, the following divisions only are used, the others being expressed in figures:—

10 millimeters = 1 centimeter.
100 centimeters = 1 meter.
1000 meters = 1 kilometer.

1000 cubic centimeters = 1 liter.

1000 milligrams = 1 gram.
1000 grams = 1 kilogram.

The following are the equivalent values:—

1 meter = 39.37 inches.
1 liter = 1 quart + ⅛ gill, U. S. measure.
1 gram = 15.43 grains.
1 minim = 0.061 cubic centimeter.

See, also, *Weights and Measures*.

Metrine (*met'-ren*) [*μήτρα*, womb]. A term given to the germ of puerperal fever. See *Bacillus puerperalis*, under *Bacteria, Synonymatic Table of*.

Metritic (*met-rit'-ik*) [*μήτρα*, womb; *ιτις*, inflammation]. Pertaining to, or affected with, metritis.

Metritis (*met-ri'-tis*) [*μήτρα*, womb; *ιτις*, inflammation]. Inflammation of the uterus. **M., Exanthematous**, a form occurring in the course of one of the eruptive fevers. **M. gravidarum**, metritis occurring in a pregnant woman. **M., Puerperal**, metritis occurring during the puerperium. **M. rheumatica**, metritis due to rheumatism or occurring in a rheumatic subject. **M., Suppurative**, metritis proceeding to suppuration.

Metroblennorrhea (*met-ro-blen-or-e'-ah*) [*μήτρα*, womb; *βλέννα*, mucus; *ῥοία*, a flow]. Uterine blennorrhea.

Metrocace (*met-rok'-as-e*) [*μήτρα*, womb; *κακός*, evil]. Same as *Metrelcosis*.

Metrocampsis (*met-ro-kamp'-sis*) [*μήτρα*, womb; *κάμψις*, bending]. Obliquity or curvation of the uterus.

Metrocarcinoma (*met-ro-kar-sin-o'-mah*) [*μήτρα*, womb; *καρκίνωμα*, carcinoma]. Carcinoma of the uterus.

Metrocele (*met'-ro-sēl*) [*μήτρα*, womb; *κήλη*, hernia]. Hernia of the uterus.

Metrocholosis (*met-ro-kol-o'-sis*) [*μήτρα*, womb; *χόλος*, bile]. Puerperal fever with hepatic symptoms; bilious puerperal fever.

Metroclyst (*met'-ro-klist*) [*μήτρα*, womb; *κλύζειν*, to wash out]. An instrument for giving uterine douches.

Metrocolpocele (*met-ro-kol'-po-sēl*) [*μήτρα*, womb; *κόλπος*, vagina; *κήλη*, tumor]. A tumor of the vagina and womb; prolapse of the uterus into the vagina.

Metrocyte (*met'-ro-sīt*) [*μήτρα*, womb; *κύτος*, cell]. A large mononuclear, spheroid cell, of which the protoplasm contains hemoglobin. It is by Engel considered the source of all of the corpuscular elements of the blood. See also *Mother-cell*.

Metrodynamometer (*met-ro-di-nam-om'-et-er*) [*μήτρα*, womb; *δύναμις*, power; *μέτρον*, measure]. An instrument for measuring uterine contractions.

Metrodynia (*met-ro-din'-e-ah*) [*μήτρα*, womb; *ὀδύνη*, pain]. Any pain of the womb.

Metrodystocia (*met-ro-dis-to'-ke-ah*) [*μήτρα*, uterus; *δυστοκία*, painful delivery]. Dystocia whose cause resides in the uterus.

Metroectasia (*met-ro-ek-ta'-ze-ah*). Synonym of *Metrectasia*.

Metrofibroma (*met-ro-fi-bro'-mah*) [*μήτρα*, womb; *fibroma*, fibrous tumor]. Uterine fibroid tumor.

Metroleukorrhea (*met-ro-lu-kor-e'-ah*) [*μήτρα*, womb; *λευκός*, white; *ῥοία*, flow]. Uterine leukorrhea.

Metrology (*met-rol'-o-je*) [*μέτρον*, measure; *λόγος*, science]. The science of measures and of measurements.

Metroloxia (*met-ro-loks'-e-ah*) [*μήτρα*, womb; *λοξός*, oblique]. Obliquity of the uterus; hysteroloxia.

Metro-lymphangitis (*met'-ro-lim-fan-ji'-tis*) [*μήτρα*, womb; *λύμφα*, lymph; *ἀγγεῖον*, vessel; *ιτις*, inflammation]. Inflammation of the lymphatic vessels of the womb. Uterine lymphangitis.

Metromalacoma (*met-ro-mal-ak-o'-mah*). See *Hysteromalacoma*.

Metromalacosis (*met-ro-mal-ak-o'-sis*) [*μήτρα*, womb; *μαλακός*, soft]. The condition and progress of softening of the tissues of the uterus.

Metromania (*met-ro-ma'-ne-ah*). See *Hysteromania* and *Nymphomania*.

Metromania (*met-ro-ma'-ne-ah*) [*μέτρον*, measure; *μανία*, mania]. A mania for writing poetry.

Metromaniac (*met-ro-ma'-ne-ak*) [*μέτρον*, measure; *μανία*, mania]. One insanely fond of writing verses.

Metromelanorrhea (*met-ro-mel-an-or-e'-ah*) [*μήτρα*, womb; *μέλας*, black; *ῥοία*, flow]. A black discharge from the uterus.

Metrometer (*met-rom'-et-er*). See *Hysterometer*.

Metrometry (*met-rom'-et-re*). See *Hysterometry*.

Metronania (*met-ro-na'-ne-ah*) [*μήτρα*, womb; *νάνος*, dwarf]. Abnormal smallness of the womb.

Metroncus (*met-rong'-kus*). See *Hysteroncus*.

Metroneurosis (*met-ro-nu-ro'-sis*) [*μήτρα*, womb; *νεύρωσις*, neurosis]. Any neurosis caused by uterine disease.

Metronome (*met'-ro-nōm*) [*μέτρον*, measure; *νόμος*, law]. An instrument for measuring time in music; also one for testing the hearing.

Metroparalysis (*met-ro-par-al'-is-is*) [*μήτρα*, womb; *παράλυσις*, paralysis]. Uterine paralysis.

Metropathic (*met-ro-path'-ik*) [*μήτρα*, womb; *πάθος*, disease]. Pertaining to affections of the womb.

Metropathy (*met-rop'-ath-e*) [*μήτρα*, womb; *πάθος*, suffering]. Any uterine disease.

Metroperissia (*met-ro-per-is'-e-ah*) [*μήτρα*, womb; *περισσός*, full]. Hypertrophy of the uterus.

Metroperitonitis (*met-ro-per-it-on-i'-tis*) [*μήτρα*, womb; *περιτόναιον*, peritoneum; *ιτις*, inflammation]. Peritonitis secondary to inflammation of the womb.

Metropexia, Metropexy (*met-ro-peks'-e-ah, met'-ro-peks-e*). See *Hysteropexia*.

Metrophlebitis (*met-ro-fle-bi'-tis*) [*μήτρα*, womb; *φλέψ*, vein; *ιτις*, inflammation]. Inflammation of the veins of the uterus.

Metrophlegmymen (*met-ro-fleg-mi'-men*) [*μήτρα*, womb; *φλέγμα*, mucus; *ὑμήν*, membrane]. The mucosa of the uterus.

Metrophlegmymenitis (*met-ro-fleg-mi-men-i'-tis*) [*μήτρα*, womb; *φλέγμα*, mucus; *ὑμήν*, membrane; *ιτις*, inflammation]. Inflammation of the mucous membrane lining the uterus.

Metrophlogosis (*met-ro-flo-go'-sis*). Synonym of *Metritis*.

Metrophore (*met'-ro-for*). See *Hysterophore*.

Metrophyma (*met-ro-fi'-mah*) [*μήτρα*, womb; *φῦμα*, a growth]. A tumor of the womb.

Metroplethora (*met-ro-pleth'-or-ah*). Synonym of *Metremia*.

Metropolypus (*met-ro-pol'-ip-us*) [*μήτρα*, womb; *πολύπους*, polyp]. Uterine polyp.

Metroproptosis (*met-ro-prop-to'-sis*), **Metroptosis** (*met-rop-to'-sis*) [*μήτρα*, womb; *πτῶσις*, fall]. Prolapse of the uterus.

Metroproptotic (*met-ro-prop-tot'-ik*), **Metroptotic** (*met-rop-tot'-ik*) [*μήτρα*, womb; *πτῶσις*, a fall]. Pertaining to metroptosis.

Metropyophthisis (*met-ro-pi-off'-this-is*) [*μήτρα*, womb; *πύον*, pus; *φθίσις*, wasting]. A purulent wasting, or tabes, of the uterus.

Metrorrhagia (*met-ror-a'-je-ah*) [*μήτρα*, womb; *ῥηγνύναι*, to burst forth]. Uterine hemorrhage independently of the menstrual discharge.

Metrorrhagic (*met-ror-a'-jik*) [*μήτρα*, womb; *ῥηγνύναι*, to burst forth]. Pertaining to metrorrhagia.

Metrorrhea (*met-ror-e'-ah*) [*μήτρα*, womb; *ῥοία*, a flow]. Any morbid uterine discharge.

Metrorrhectic (*met-ror-ek'-tik*) [*μήτρα*, womb; *ῥῆξις*, rupture]. Pertaining to metrorrhexis.

Metrorrheuma (*met-ror-ru'-mah*) [*μήτρα*, womb; *ῥεῦμα*, rheum]. Rheumatism of the uterus.

Metrorrhexis (*met-ror-eks'-is*) [*μήτρα*, womb; *ῥῆξις*, rupture]. Rupture of the womb.

Metrosalpingitis (*met-ro-sal-ping-ji'-tis*) [*μήτρα*, womb; *σάλπιγξ*, tube; *ιτις*, inflammation]. Inflammation of the womb and oviducts.

Metrosalpingorrhagia (*met-ro-sal-ping-or-a'-je-ah*) [*μήτρα*, womb; *σάλπιγξ*, tube; *ῥηγνύναι*, to burst forth]. Hemorrhage from the oviducts.

Metrosalpingorrhexis (*met-ro-sal-ping-or-eks'-is*) [*μήτρα*, womb; *σάλπιγξ*, tube; *ῥῆξις*, rupture]. Rupture of an oviduct.

Metrosalpinx (*met-ro-sal'-pinx*) [*μήτρα*, uterus; *σάλπιγξ*, tube]. An oviduct, or Fallopian tube.

Metroscirrhus (*met-ro-skir'-us*) [*μήτρα*, womb; *σκίῤῥος*, hard]. A scirrhous tumor of the uterus.

Metroscolioma, Metroscoliosis (*met-ro-sko-le-o'-mah, met-ro-sko-le-o'-sis*) [*μήτρα*, womb; *σκολίωμα*, *σκολίωσις*, bend]. A flexion of the uterus.

Metroscope (*met'-ro-skōp*) [*μήτρα*, womb; *σκοπεῖν*, to observe]. An instrument for examining the uterus.

Metroscopy (*met-ros'-ko-pe*) [*μήτρα*, womb; *σκοπεῖν*, to observe]. The use of the metroscope; inspection of the uterus.

Metrospongioma (*met-ro-spon-je-o'-mah*) [*μήτρα*, womb; *σφογγία*, sponge; *ὄμα*, tumor]. A spongy tumor of the uterus.

Metrostaxis (*met-ro-staks'-is*) [*μήτρα*, womb; *στάξις*, a dropping]. Slight but persistent uterine hemorrhage.

Metrostenosis (*met-ro-sten-o'-sis*) [*μήτρα*, womb; *στένωσις*, contraction]. Contraction of the cavity of the womb.

Metrosteresis (*met-ro-ster-e'-sis*) [*μήτρα*, womb; *στέρησις*, deprival]. Removal or absence of the uterus.

Metrotome (*met'-ro-tōm*) [*μήτρα*, womb; *τομή*, a cutting]. Same as *Hysterotome*.

Metrotomy (*met-rot'-o-me*) [*μήτρα*, womb; *τομή*, a cutting]. Same as *Hysterotomy*.

Metrotuberculum (*met-ro-tu-ber'-ku-lum*) [*μήτρα*, womb; *tuberculum*, a small nodule]. A fungous excrescence of the uterus.

Metrotyloma (*met-ro-ti-lo'-mah*). Synonym of *Metratuberculum*.

Metrourethrotome (*met-ro-u-re'-thro-tōm*) [*μέτρον*, measure; *οὐρήθρα*, urethra; *τομή*, a cutting]. A form of urethrotome that will cut a stricture to the desired caliber; a graduated urethrotome.

Metrozoötia (*met-ro-zo-o'-te-ah*) [*μήτρα*, womb; *ζῶον*, animal]. An epidemic disease of the womb in cattle.

Metrydrorrhea (*met-rid-ror-e'-ah*). See *Hydrometra*.

Metrymenitis (*met-ri-men-i'-tis*). Synonym of *Metrophlegmymenitis*.

Metrypercinesis (*met-ri-per-sin-e'-sis*) [*μήτρα*, womb; *ὑπέρ*, over; *κίνησις*, movement]. Excessive uterine contraction.

Metryperemia (*met-ri-per-e'-me-ah*). Synonym of *Metremia*.

Metryperesthesia (*met-ri-per-es-the'-ze-ah*) [*μήτρα*, womb; *ὑπέρ*, over; *αἴσθησις*, perception]. Hyperesthesia of the uterus.

Metrypertrophia (*met-ri-per-trō′-fe-ah*). Synonym of *Metrauxe*.

Metternich-green. See *Pigments, Conspectus of.*

Meyer, Method of. A method of determining the vapor density of a substance. A weighed quantity of the substance is vaporized in an enclosed space, when it displaces an equal volume of air, which is measured. **M.'s Tissue-paper Test,** a test for color-blindness. If a border of gray paper is placed upon red paper, it appears to have the complementary color of its background (that is, green). This is particularly apparent when the whole is covered with a sheet of tissue-paper. A color-blind man cannot see the complementary color correctly.

Meynert's Bundle. See *M.'s Fasciculus.* **M.'s Commissure,** a bundle of large-sized nerve-fibers extending from the tuber cinereum and the anterior perforated substance into the optic tract, and terminating in the subthalamic body. **M.'s Fasciculus,** a fasciculus of white nerve-fibers extending between the habenular and interpeduncular ganglia. **M.'s Fountain-like Decussation,** a group of nerve-fibers that arise in the roof of the aqueduct and decussate in the dorsal segment of the raphé. **M., Ganglion of.** See *Ganglia, Table of.* **M.'s Granular Formation,** the fourth stratum of the cerebral cortex. **M.'s Projection System,** a plan of the construction of the nervous system, whereby it is divided into three sections: The *first* is composed of the fibers from the cortex of the brain through the corona radiata in a radiate direction; the *second*, of longitudinal bundles of fibers proceeding downward to the ganglionic gray matter reaching from the third ventricle through the aqueduct of Sylvius to the lowest part of the gray matter of the spinal cord; the *third*, the peripheral nerves, motor and sensory, proceeding from the central tubular gray matter.

Mezcal, Mescal (*mez-kahl′*) [Mex.]. An intoxicant spirit distilled from *pulque*, the fermented juice of various Mexican species of *Agave*.

Mezereon, Mezereum (*mez-e′-re-on, mez-e′-re-um*) [Ar., *māzariyūn*, the camellia]. The bark of *Daphne mezereum*, a powerful sialogogue and irritant poison, producing purging and gastro-enteric inflammation. It is used as an antisyphilitic, combined with sarsaparilla, but chiefly as a local irritant to stimulate indolent ulcers. **M., Ext.,** used in the preparation of liniment of mustard. **M., Ext., Æther.** (B. P.), used externally as a counter-irritant. **M., Ext., Fld.,** used in the preparation of **M., Ung.,** consisting of fld. ext. mezereon 25, lard 80, and yellow wax 12 parts.

Mezizah (*mez-i′-zah*) [Heb.]. The fourth act in the Jewish rite of circumcision. It consists in sucking the bleeding surface in order to secure the salutary influence of the saliva.

Mezquit (*mes-kēt′*) [Sp.]. The tree or shrub *Prosopis juliflora* of the S. W. United States and Mexico. Its gum resembles gum arabic.

Mho (*m′o*) [anagram of *ohm*]. The unit of electric conductivity; conductivity at the resistance of one ohm.

Miaria (*mi-a′-re-ah*) [*μιαρία*, defilement]. Synonym of *Miasm*.

Miasm, Miasma (*mi′-azm, mi-az′-mah*) [*μιαίνειν*, to pollute: *pl.*, *Miasmata*]. A term loosely applied to the floating germs of any form of microbic life, especially those generating in marshy localities.

Miasmal (*mi-az′-mal*) [*μίασμα*, miasm]. Containing, relating to, or depending upon, miasm.

Miasmatic (*mi-az-mat′-ik*) [*μιαίνειν*, to pollute]. Pertaining to or having the nature of miasma. See *Contagious.* **M., Contagio-,** a term applied to those diseases the specific germs of which, after leaving the animal body, undergo a further development before again becoming infectious. Typhoid fever, cholera, yellow fever, and some other diseases, are contagio-miasmatic. **M.-contagious.** See *Contagious.* **M. Diseases,** those diseases produced by infectious causes arising from without the animal body, *e.g.*, malaria.

Miasmatology (*mi-az-mat-ol′-o-je*) [*μίασμα*, miasm; *λόγος*, science]. The science or study of miasmata.

Miasmifuge (*mi-az′-mif-ūj*) [*μίασμα*, miasm; *fugere*, to put to flight]. Preventing or banishing miasmatic diseases.

Miasmo-contagious (*mi-az′-mo-kon-ta′-je-us*). See *Miasmatic.*

Miasmology (*mi-az-mol′-o-je*). Synonym of *Miasmatology.*

Mica (*mi′-kah*) [L., a crumb]. Thin, glossy, transparent scales, composed of aluminum silicate. **M. panis,** crumb of bread; used in pharmacy.

Micaceous (*mi-ka′-she-us*) [*mica*, crumb]. Resembling mica; composed of crumbs; friable.

Mication (*mi-ka′-shun*) [*micare*, to glitter]. Quick motion; a winking; systolic contraction.

Micella (*mi-sel′-ah*) [dim. of *mica*, a crumb, grain; *pl.*, *Micellæ*]. In biology, according to Nägeli's theory, one of the fundamental structural units of organized bodies. He defines it as "a minute crystal, microscopically invisible, consisting of a larger or smaller number of molecules, and, when turgid, surrounded by a layer of water." Weismann does not accept this as corresponding to his "biophore."

Micellar (*mi-sel′-ar*) [*micella*, dim. of *mica*, crumb]. Relating to a micella. **M. Aggregate,** a number of micellæ united together.

Michel's Diplococcus. The micrococcus found in contagious conjunctivitis. See *Bacillus of Conjunctival Catarrh*, under *Bacteria, Synonymatic Table of.* **M.'s Paste,** a caustic paste composed of asbestos one part, and concentrated sulphuric acid three parts.

Micheli's Placenta. The sporangium of certain fungi, as, for instance, those that give rise to otomycosis.

Michelia (*mi-ke′-le-ah*) [after P. A. *Micheli*, an Italian botanist]. A genus of magnoliaceous plants. **M. champaca.** See *Champak.*

Michigan Itch. Same as *Army Itch.* **M. Method,** a method of *Artificial Respiration.* The individual is placed on his face, the operator astride of the body. The shoulders are then raised as high as they can go, without the head leaving the floor, and this position is maintained while the operator counts three. The body is then allowed to return to the ground. Pressure is then made downward and inward on the lower ribs while two is counted. The operator then repeats the first series of movements.

Micology (*mi-kol′-o-je*). See *Mycology.*

Micracoustic (*mi-krah-kow′-stik*) [*μικρός*, small; *ἀκουστικός*, pertaining to hearing]. Hearing, or assisting in hearing, very small sounds.

Micræsthetes (*mi-kres′-thēts*) [*μικρός*, small; *αἰσθησις*, sensation]. In biology, small knob-like sense-organs found by Moseley in the micropores of certain *Chitonidæ*.

Micraine (*mik′-rān*). Synonym of *Migraine.*

Micranatomy (*mi-kran-at′-o-me*) [*μικρός*, small; *ἀνατομή*, a cutting up]. Minute anatomy; histology.

Micrander (*mi-kran′-der*) [*μικρός*, small; *ἀνήρ*, male]. In biology, a small male plant.

Micrane (*mik′-rān*). Synonym of *Migraine.*

Micrangiopathy (*mi-kran-je-op′-ath-e*) [*μικρός*, small; *ἀγγεῖον*, vessel; *πάθος*, disease]. Disease of the capillaries.

Micrangium (*mi-kran′-je-um*) [*μικρός*, small; *ἀγγεῖον*, vessel]. Capillary.

Micrantrus (*mi-kran′-trus*) [μικρός, small; ἄντρον, cave]. Lissauer's term for a skull in which a perpendicular from the most prominent point of the frontal torus upon the radius fixus is not more than 4 mm. in front of that from the nasion.

Micrencephalon, Micrencephalium (*mi-kren-sef′-al-on, mi-kren-sef-a′-le-um*) [μικρός, small; ἐγκέφαλος, brain]. 1. A small brain, as in cretinism. 2. Synonym of *Cerebellum.*

Micrencephalous (*mi-kren-sef′-al-us*) [μικρός, small; ἐγκέφαλος, brain]. Having a small brain.

Micrencephalus (*mi-kren-sef′-al-us*) [μικρός, small; ἐγκέφαλος, encephalon]. Lissauer's term for a skull in which the angle formed between lines drawn from the hormion to the nasion and to the inion respectively is between 129° and 142.5°.

Micrencranus (*mi-kren-kra′-nus*) [μικρός, small; ἐν, in; κρανίον, skull]. Lissauer's term for a skull with a cerebellar sector of from 8.5° to 15°.

Micristology (*mi-kris-tol′-o-je*). See *Histology.*

Micro- (*mi′-kro-. Mik′-ro-*, from an etymologic point of view, would seem preferable to *mi′-kro-*, but the balance of authorities is certainly in favor of the latter pronunciation.) [μικρός, small]. 1. A prefix signifying minute. 2. Also, a prefix occasionally used to signify a unit one-thousandth or one-millionth part of the unit to which it is prefixed.

Microanatomy (*mi-kro-an-at′-o-me*). See *Micranatomy.*

Microaudiphone (*mi-kro-aw′-dif-ōn*) [μικρός, small; *audire*, to hear; φονή, voice]. An instrument used for rendering audible sounds that are very slight.

Microbacteria (*mi-kro-bak-te′-re-ah*). See *Bacteria.*

Microbe (*mi′-krōb*) [μικρός, small; βίος, life]. The generic name for microörganisms, whether animal or vegetable. In ordinary use the term *microbe* is equivalent to *schizomyces*, and designates a vegetable microörganism. See *Microörganism.*

Microbial, Microbian, Microbic (*mi-kro′-be-al, mi-kro′-be-an, mi-kro′-bik*) [μικρός, small; βίος, life]. Pertaining to microbes.

Microbicide (*mi-kro′-bis-īd′*) [μικρός, small; βίος, life; *cædere*, to kill]. 1. Destructive to microbes. 2. An agent that destroys microbes.

Microbiohemia (*mi-kro-bi-o-hem′-e-ah*) [μικρός, small; βίος, life; αἷμα, blood]. A diseased condition resulting from the presence of microörganisms in the blood.

Microbiology (*mi-kro-bi-ol′-o-je*) [μικρός, small, little; βίος, life; λόγος, science]. Bacteriology, or the science of microörganisms.

Microbion, Microbium (*mi-kro′-be-on, mi-kro′-be-um*). Same as *Microbe.*

Microblast (*mi′-kro-blast*) [μικρός, small; βλαστός, germ]. An immature blood-corpuscle.

Microblepharia, Microblepharon (*mi-kro-blef-a′-re-ah, mi-kro-blef′-ar-on*) [μικρός, small; βλέφαρον, lid]. Abnormal smallness of the eyelids.

Microbrachius (*mi-kro-bra′-ke-us*) [μικρός, small; βραχίων, arm]. Congenital smallness of the arms.

Microbrachycephalia (*mi-kro-bra-ke-sef-a′-le-ah*) [μικρός, small; βραχύς, short; κεφαλή, head]. Brachycephalia combined with microcephalia.

Microcardia (*mi-kro-kar′-de-ah*) [μικρός, small; καρδία, heart]. Congenital smallness of the heart.

Microcaulia (*mi-kro-kaw′-le-ah*) [μικρός, small; καυλός, penis]. Abnormal or congenital smallness of the penis.

Microcephal (*mi-kro-sef′-al*) [μικρός, small; κεφαλή, head]. A person affected with microcephaly.

Microcephalia (*mi-kro-sef-a′-le-ah*). See *Microcephaly.*

Microcephalic (*mi-kro-sef-al′-ik*) [μικρός, small; κεφαλή, head]. Having a small head.

Microcephalism (*mi-kro-sef′-al-izm*). Synonym of *Microcephaly.*

Microcephalon (*mi-kro-sef′-al-on*) [μικρός, small; κεφαλή, head]. An abnormally small head.

Microcephalous (*mi-kro-sef′-al-us*) [μικρός, small; κεφαλή, head]. Having a small head; in botany, having flowers arranged in small heads.

Microcephaly (*mi-kro-sef′-al-e*) [μικρός, small; κεφαλή, head]. Abnormal smallness of the head.

Microcheilia (*mi-kro-ki′-le-ah*) [μικρός, small; χεῖλος, lip]. Abnormal congenital smallness of the lips.

Micro-chemistry (*mi-kro-kem′-is-tre*) [μικρός, small; χημεία, chemistry]. The chemic investigation of the more minute substances of nature. Also, the study of chemic reactions, in which a drop each of the reagent and the substance to be tested are made to coalesce on a porcelain or glass plate, the reaction being observed under a microscopic objective of low power.

Microcidin (*mi-kro-si′-din*) [μικρός, small; *cædere*, to kill]. A fine white powder resulting from heating naphthol-β to liquefaction, and adding half its weight of caustic soda. It is said to be a good antiseptic, ten times more powerful than phenol and twenty times more powerful than boric acid, and has but feeble toxic qualities. Internally it may be given in doses of from 10 to 30 grains per diem. Unof.

Microclysm (*mi′-kro-klism*) [μικρός, small; κλύσμα, clyster]. A small clyster; a clyster effective in small amounts.

Micrococcus (*mi-kro-kok′-us*) [μικρός, small; κόκκος, kernel]. A genus of schizomycetous microörganisms, having spheric elements, isolated, united in two's or in larger numbers, or disposed in chaplets, or masses of zoöglea. Sometimes they are united in such a way as to resemble a bunch of grapes and are then called **Staphylococci.** When united in couples they are called **Diplococci.** If arranged in strings or chaplets they are called **Streptococci.** Certain species are pathogenic, others are chromogenic, others have a fermentative action, and some no discoverable function. See *Bacteria, Synonymatic Table of.*

Microconidium (*mi-kro-kon-id′-e-um*) [μικρός, small; κόνις, dust: *pl.*, *Microconidia*]. In biology, a relatively small-sized conidium.

Microcoria (*mi-kro-ko′-re-ah*) [μικρός, small; κόρη, pupil]. Same as *Miosis.*

Microcornea (*mi-kro-kor′-ne-ah*) [μικρός, small; *corneus*, horny]. Abnormal smallness of the cornea.

Microcosm (*mi′-kro-kozm*) [μικρός, small; κόσμος, world]. Man in contradistinction to the universe, or the macrocosm; man considered as the epitome of the cosmos.

Microcosmic (*mi-kro-koz′-mik*) [μικρός, small; κόσμος, world]. Pertaining to the microcosm. **M. Salt,** sodium-ammonium-hydrogen phosphate; so called as being derivable from human urine.

Microcosmography (*mi-kro-koz-mog′-ra-fe*) [μικρός, small; κόσμος, universe; γράφειν, to write]. The study of the microcosm, especially of man.

Microcoulomb (*mi-kro-koo′-lom*) [μικρός, small; *Coulomb*, a French physician]. One millionth of a coulomb. See *Coulomb* and *Electric Units.*

Microcoustic (*mi-kro-kows′-tik*). Synonym of *Micracoustic.*

Microcranious (*mi-kro-kra′-ne-us*). Synonym of *Microcephalous.*

Microcrith (*mi′-kro-krith*) [μικρός, small; κριθή, barley]. A unit of molecular weight, equivalent to the weight of an atom of hydrogen.

Microcrystalline (*mi-kro-kris′-tal-in*) [μικρός, small; κρυστάλλινος, pertaining to a crystal]. Composed of crystals of microscopic size.

Microcyst (*mi'-kro-sist*) [μικρός, small; κύστος, cyst]. 1. A cyst of diminutive size, or one derived from another. 2. The resting swarm-spore of certain fungi.

Microcyte (*mi'-kro-sīt*) [μικρός, small; κύτος, cell]. A small red blood-corpuscle.

Microcythemia (*mi-kro-si-the'-me-ah*) [μικρός, small; κύτος, cell; αἷμα, blood]. Abnormal smallness of the red corpuscles of the blood, caused by certain poisons and diseases.

Microcytosis (*mi-kro-si-to'-sis*). Same as *Microcythemia*.

Microdactylia (*mi-kro-dak-til'-e-ah*) [μικρός, small; δάκτυλος, finger]. Abnormal smallness of the fingers.

Microdentism (*mi-kro-den'-tizm*). See *Microdontism*.

Microdont (*mi'-kro-dont*) [μικρός, small; ὀδούς, tooth]. Having small teeth. See *Macrodont*.

Microdontism (*mi-kro-don'-tizm*) [μικρός, small; ὀδούς, tooth]. Abnormal smallness of the teeth.

Microetiologic (*mi'-kro-e-te-o-loj'-ik*) [μικρός, small; αἰτία, cause; λόγος, science]. Connected with the study of the causation of microörganismal diseases.

Microfarad (*mi-kro-far'-ad*). See *Farad* and *Electric Units*.

Microform (*mi'-kro-form*) [μικρός, small; *forma*, form]. A microscopic object.

Microgenesis (*mi-kro-jen'-es-is*) [μικρός, small; γένεσις, origin]. Abnormally small development of a part.

Microgenia (*mi-kro-je'-ne-ah*) [μικρός, small; γένειον, chin]. Abnormal or congenital smallness of the chin.

Microgerm (*mi'-kro-jerm*) [μικρός, small; *germen*, seed, sprig]. A microbe; more properly, the spore of a microörganism.

Microglossia (*mi-kro-glos'-e-ah*) [μικρός, small; γλῶσσα, tongue]. Abnormal smallness of the tongue.

Micrognathia (*mi-krog-na'-the-ah*) [μικρός, small; γνάθος, jaw]. Abnormal smallness of the jaws, especially of the lower jaw.

Microgonidium (*mi-kro-go-nid'-e-um*) [μικρός, small; γονή, generation, seed: *pl.*, *Microgonidia*]. In biology, a relatively small-sized gonidium.

Microgram (*mi'-kro-gram*) [μίκρος, small; γράμμα, a Greek weight; gram]. A millionth part of a gram.

Micrograph (*mi'-kro-graf*) [μικρός, small; γράφειν, to delineate]. A device for enabling one to draw sketches on a very small scale.

Micrography (*mi-krog'-ra-fe*) [μικρός, small; γράφειν, to write]. A description of bodies that are studied under the microscope. See *Photo-micrography*.

Microgyria (*mi-kro-ji'-re-ah*) [μικρός, small; γῦρος, gyrus]. Smallness of the convolutions of the brain.

Microhistology (*mi-kro-his-tol'-o-je*). Synonym of *Micristology*.

Microhm (*mi'-krōm*) [μικρός, small; *ohm*]. The millionth part of an ohm.

Microkinesis (*mi-kro-kin-e'-sis*) [μικρός, small; κίνησις, motion]. A minor movement without definite purpose, especially in early infantile life; in children, any spontaneous act; in adults, fidgety movement, restlessness, as in sleep; post-epileptic action.

Microlentia (*mi-kro-len'-te-ah*) [μικρός, small; *lens*, lens]. The state of having an abnormally small crystalline lens.

Microliter (*mi'-kro-le-ter*) [μικρός, small; λίτρα, a liter]. The millionth part of a liter.

Microlith (*mi'-kro-lith*) [μικρός, small; λίθος, stone]. A microscopic calculus.

Micrology (*mi-krol'-o-je*) [μικρός, small; λόγος, a treatise]. A treatise on minute objects, especially microscopic objects.

Micromania (*mi-kro-ma'-ne-ah*) [μικρός, small; μανία, madness]. Delusion of belittlement; the impression that one's body, or some part of it, is or has become small, or that all objects around one are small.

Micromazia (*mi-kro-ma'-ze-ah*) [μικρός, small; μαζός, breast]. Abnormal smallness of the mammæ.

Micromelia (*mi-kro-me'-le-ah*) [μικρός, small; μέλος, limb]. Abnormal smallness of the limbs.

Micromelus (*mi-krom'-el-us*) [μικρός, small; μέλος, limb]. A single autositic monster of the species ectromelus, characterized by the presence of limbs that are normal in form but abnormally small.

Micromere (*mi'-kro-mēr*) [μικρός, small; μέρος, a part]. In biology, one of the smaller blastomeres formed in the segmentation of certain ova; specifically, the "animal cell" of Rabl.

Micromeria (*mi-kro-me'-re-ah*) [μικρός, small; μέρος, a part]. A genus of labiate herbs. **M. douglassii**, the *Yerba buena* of the Pacific U. S., is a fragrant aromatic stimulant and anthelmintic. Unof.

Micromerology (*mi-kro-me-rol'-o-je*) [μικρός, small; μέρος, part; λόγος, science]. The science of anatomic segments.

Micrometer (*mi-krom'-et-er*) [μικρός, small; μέτρον, measure]. An instrument designed for measuring exceedingly small dimensions. **M., Eye-piece,** a micrometer to be used with the eye-piece or ocular. **M., Object or Objective.** See *M., Stage*. **M., Ocular,** a micrometer to be used with the ocular. See *Ocular*. **M., Stage,** a finely divided scale or rule on glass or metal for determining the magnification of a compound microscope.

Micrometric (*mi-krom-et'-rik*) [μικρός, small; μέτρον, measure]. Pertaining to the micrometer; measuring very minute distances, surfaces, or objects, as a micrometric screw, or hematoscope.

Micrometry (*mi-krom'-et-re*) [μικρός, small; μέτρον, measure]. The determination of the size of objects by the aid of a micrometer. **M., Methods of Ocular,** are as follows: 1. By finding the value of a division of the ocular micrometer for each optic combination and tube-length used, and employing this valuation as a multiplier. Thus, if with a given optic combination and tube-length it required five divisions on the ocular micrometer to include the image of $\frac{2}{10}$ mm. of the stage micrometer, then one space on the ocular would include $\frac{1}{5}$ of $\frac{2}{10}$ mm., or $\frac{1}{25}$ mm.; and the size of any unknown object would be obtained by multiplying the number of divisions on the ocular micrometer required to include its image by the value of one space. 2. By finding the number of divisions on the ocular micrometer required to include the image of an entire millimeter of the stage micrometer, and using this number as a divisor. If five divisions of the ocular micrometer are required to include the image of $\frac{2}{10}$ mm. on the stage micrometer, then it would require $5 \div \frac{2}{10} = 25$ divisions on the ocular micrometer to include a whole mm. on the stage micrometer; then the number of divisions of the ocular micrometer required to measure an object divided by 25 would give the actual size of the object in millimeters or in a fraction of a millimeter. 3. By having the ocular micrometer ruled in millimeters and divisions of a millimeter, and then getting the size of the real image in millimeters. In employing this method a stage micrometer is used as an object, and the size of the image of one or more divisions is measured by the ocular micrometer. If the stage micrometer is ruled in $\frac{1}{10}$ and $\frac{1}{100}$ mm., and the ocular micrometer is ruled in millimeters and $\frac{1}{10}$ mm., take $\frac{2}{10}$ mm. on the stage micrometer as the object, and suppose it to require 10 of the $\frac{1}{10}$ spaces, or 1 mm., to measure the real image; then the real image must be magnified $\frac{10}{10} \div \frac{2}{10} = 5$ diameters. **M., Methods of Stage:** 1. By mounting the object upon a stage micrometer, and directly reading off the number of spaces covered by the object. 2. Divide the size of the image by the

magnification of the microscope. The elliptic nucleated red blood-corpuscle of the Necturus makes a good object. If its long axis is 18 mm., and the magnification of the microscope is 400 diameters, the actual length of the axis would be 18 mm. ÷ 400 = .045 mm. 3. By the use of a stage micrometer and camera lucida. Indicate by means of the camera lucida the outlines of the object to be measured. Replace the object with a stage micrometer. Note how many spaces are required to include the object. As the value of each space is known, the size of the object may be very readily computed.

Micromillimeter (*mi-kro-mil'-im-e-ter*) [*μικρός*, small; *mille*, thousand; *μέτρον*, measure]. 1. The one-thousandth part of a millimeter or the one-millionth part of a meter. It is the unit of certain microscopic measurements. It is called also *micron*. 2. The millionth part of a millimeter.

Micrommatous (*mi-krom'-at-us*) [*μικρός*, small; *ὄμμα*, eye]. Small-eyed.

Micromyelia (*mi-kro-mi-e'-le-ah*) [*μικρός*, small; *μυελός*, marrow]. Abnormal smallness of the myel, or spinal cord.

Micron (*mi'-kron*) [*μικρός*, small: *pl.*, *Microns* or *Micra*]. The millionth part of a meter or a thousandth of a millimeter, the generally accepted English form of Listing's mikron. It is the equivalent of $\frac{1}{25400}$ of an English inch, and its symbol is μ.

Micronucleus (*mi-kro-nu'-kle-us*) [*μικρός*, small; *nucleus*, a kernel]. A small or minute nucleus. In biology, Maupas' term for the *paranucleus*, or the *nucleolus* of other authorities.

Microörchid (*mi-kro-or'-kid*) [*μικρός*, small; *ὄρχις*, testicle]. Having very small testicles.

Microörganic (*mi-kro-or-gan'-ik*) [*μικρός*, small; *ὄργανον*, instrument]. Having the character of a microorganism.

Microörganism (*mi-kro-or'-gan-izm*) [*μικρός*, small; *ὄργανον*, instrument]. A term applied to a microscopic being of the animal or vegetable kingdom; in a special sense it is restricted to that vegetable group known as bacteria. See *Bacteria, Synonymatic Table of.*

Micropanencephalus (*mi-kro-pan-en-sef'-al-us*) [*μικρός*, small; *πᾶν*, all; *ἐγκέφαλος*, encephalon]. Lissauer's term for a skull in which the angle included between lines drawn from the hormion to the nasion and to the basion, respectively, is between 138° and 163°.

Microparasite (*mi-kro-par'-as-it*) [*μικρός*, small; *παράσιτος*, a parasite]. A parasitic bacterium or other microörganism.

Micropathologic (*mi-kro-path-o-loj'-ik*) [*μικρός*, small; *πάθος*, disease; *λόγος*, science]. Pertaining to micropathology.

Micropathologist (*mi-kro-path-ol'-o-jist*) [*μικρός*, small; *πάθος*, disease; *λόγος*, science]. One versed in micropathology.

Micropathology (*mi-kro-path-ol'-o-je*) [*μικρός*, small; *πάθος*, disease; *λόγος*, science]. The study of minute pathologic changes; also, the scientific study of microorganisms in their relation to disease. Morbid histology.

Microphage (*mi'-kro-fāj*) [*μικρός*, small; *φαγεῖν*, to devour]. A small phagocyte. Metschnikoff's term for certain small free leukocytes at the margin of an erysipelatous patch of skin, and which he believes to have the power of destroying the infecting micrococci of the disease. (*Power and Sedgwick.*)

Microphagist (*mi-krof'-aj-ist*) [*μικρός*, small; *φαγεῖν*, to eat]. In biology, a feeder on microscopic organisms.

Microphagocyte (*mi-kro-fag'-o-sīt*). See *Microphage.*

Microphagus (*mi-krof'-ag-us*) [*μικρός*, small; *φαγεῖν*, to eat]. A microphage.

Microphone (*mi'-kro-fōn*) [*μικρός*, small; *φωνή*, sound]. An instrument that amplifies delicate or feeble sounds.

Microphonia (*mi-kro-fo'-ne-ah*) [*μικρός*, small; *φωνή*, voice]. A weak voice; feebleness of the voice.

Microphotograph (*mi-kro-fo'-to-graf*) [*μικρός*, small; *φῶς*, light; *γράφειν*, to write]. A very small or microscopic photograph of an object; in most cases the object is greatly reduced in the photograph, and must be looked at with a microscope. Cf. *Photo-micrograph.*

Micro-photography (*mi-kro-fo-tog'-ra-fe*) [*μικρός*, small; *φῶς*, light; *γράφειν*, to write]. The production of photographs of microscopic size, usually of large objects. These photographs must then be examined with a magnifier or microscope. In French and German this term is also employed for *Photo-micrography, q. v.*

Microphthalmos (*mi-kroff-thal'-mos*) [*μικρός*, small; *ὀφθαλμός*, eye]. An abnormally small but otherwise healthy eye.

Microphylline (*mi-kro-fil'-in*) [*μικρός*, small; *φύλλον*, leaf]. In biology, possessing minute leaflets or scales.

Microphyllous (*mi-kroff'-il-us*) [*μικρός*, small; *φύλλον*, leaf]. In biology, having small leaves.

Microphyte (*mi'-kro-fīt*) [*μικρός*, small; *φυτόν*, plant]. Any microscopic plant, especially one that is parasitic in habits.

Microphytic (*mi-kro-fit'-ik*) [*μικρός*, small; *φυτόν*, plant]. Pertaining to microscopic vegetable life.

Micropia (*mi-kro'-pe-ah*). See *Micropsia.*

Microplasia (*mi-kro-pla'-ze-ah*) [*μικρός*, small; *πλάσις*, a molding]. Arrested development.

Micropodous (*mi-krop'-o-dus*) [*μικρός*, small; *πούς*, foot]. Small-footed.

Micropolariscope (*mi-kro-po-lar'-is-kōp*) [*μικρός*, small; *polaris*, polar; *σκοπεῖν*, to view]. A polariscope used in connection with a microscope.

Micropore, Microporus (*mi'-kro-por, mi-kro-por'-us*) [*μικρός*, small; *πόρος*, a pore or passage]. In biology, any small pore, as in the heads of certain spermatozoa; specifically applied by Moseley to the smaller pores in the tegmenta of the shells of nearly all *Chitonidæ*. Cf. *Megalopore.*

Microprosopa (*mi-kro-pro-so'-pah*) [*μικρός*, small; *πρόσωπον*, face]. Congenital smallness of the face.

Micropsia (*mi-krop'-se-ah*) [*μικρός*, small; *ὄψις*, sight]. An apparent diminution in the size of objects, supposed to result from changes in the retinal end-organs.

Micropsychia (*mi-kro-si'-ke-ah*) [*μικρός*, small; *ψυχή*, mind]. Weak-mindedness.

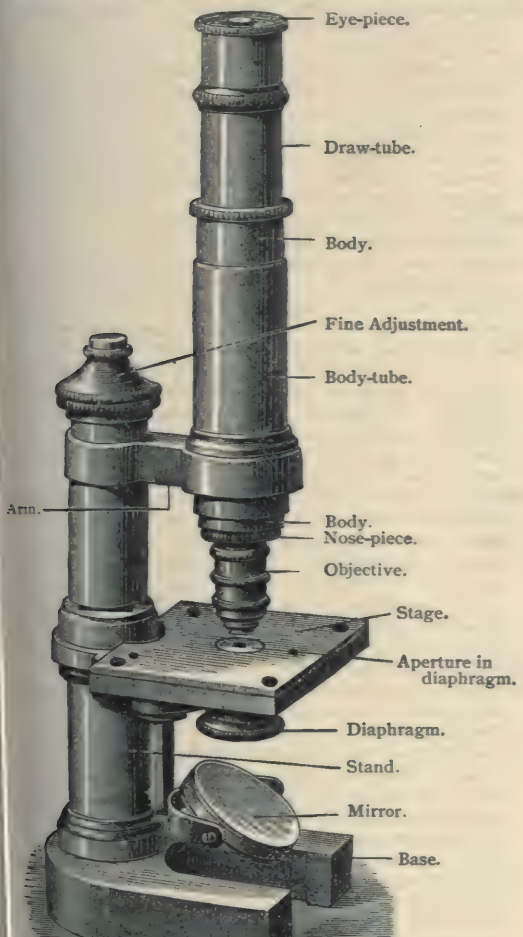
Micropsychosis (*mi-kro-si-ko'-sis*) [*μικρός*, small; *ψυχή*, mind]. The inchoate thinking of infantile life; the spontaneous, disconnected, and half-suppressed thinking of later life; wandering, dreamy, or uncontrolled mental action.

Micropus (*mi-krō'-pus*) [*μικρός*, small; *πούς*, foot]. Abnormal smallness of a leg; a congenital defect.

Micropyle (*mi'-kro-pīl*) [*μικρός*, small; *πύλη*, gate, orifice]. In biology, the small opening in an ovum or ovule through which the fertilizing particle may penetrate.

Microrhabd (*mi'-kro-rabd*) [*μικρός*, small; *ῥαβδος*, a rod, stick, wand]. In biology, a rhabdus-shaped microsclere or flesh-spicule of a sponge.

Microrrheometer (*mi-kro-re-om'-et-er*) [*μικρός*, small; *ῥεῖν*, to flow; *μέτρον*, measure]. An instrument for measuring liquids flowing through small tubes.



Microrrhinia (*mi-kro-rin'-e-ah*) [*μικρός*, small; *ῥις*, nose]. Congenital atrophy or smallness of the nose.

Microscelous (*mi-kros'-el-us*) [*μικρός*, small; *σκέλος*, leg]. Short-legged.

Microsclere (*mi'-kro-sklēr*) [*μικρός*, small; *σκληρός*, hard]. In biology, a flesh-spicule of a sponge.

Microsclerum (*mi-kro-sklē'-rum*) [*μικρός*, small; *σκλερός*, hard: *pl.*, *Microsclera*]. Same as *Microsclere*.

Microscope (*mi'-kro-skōp*) [*μικρός*, small; *σκοπεῖν*, to view]. An optic apparatus for giving an enlarged and distinct image of a minute and near object. **M., Achromatic,** one in which, by proper lenses, the chromatic aberration is corrected. **M., Achromatic Triplet,** a simple achromatic microscope consisting of one crown-glass and two flint-glass lenses cemented together. **M., Binocular,** a microscope having divergent oculars, one for each eye, so that the object is seen with both eyes. **M., Compound,** one that consists of two or more lenses or lens-systems, of which

PRINCIPAL PARTS OF THE MICROSCOPE.
(*Half natural size.*)

one, the objective, placed near the object, gives an enlarged and inverted real image. The other, the ocular, acting like a simple microscope, gives an enlarged virtual image of the real image. **M., Erecting,** one in which the image is made erect by means of a prism placed above the objective. **M., Oil-immersion,** a compound microscope of which the free surface of the objective is immersed in a drop of oil placed on the cover-glass. **M., Polarizing,** one with a polarizing-prism attached. **M., Simple,** one consisting of one or more lenses or lens-systems acting as a single lens. The rays of light that enter the eye of the observer, after refraction through these lenses, proceed directly from the *object* itself. **M., Tripod Magnifier,** a simple microscope mounted in a frame supported by three legs. **M., Water-immersion,** one similar to the oil-immersion microscope, except that a drop of water is used instead of oil.

Microscopic (*mi-kro-skop'-ik*) [*μικρός*, small; *σκοπεῖν*, to view]. Pertaining to the microscope; so small as to be invisible except with the aid of a microscope. **M. Slide, M. Slip.** See *Cover-glass*.

Microscopist (*mi-kros'-ko-pist*) [*μικρός*, small; *σκοπεῖν*, to view]. One who is skilled or expert in the use of the microscope.

Microscopy (*mi-kros'-ko-pe*) [*μικρός*, small; *σκοπεῖν*, to view]. The use of the microscope; microscopic study or observation.

Microseme (*mi'-kro-sēm*) [*μικρός*, small; *σῆμα*, sign, index]. Having a low index. See *Index*.

Microsiphonula (*mi-kro-si-fon'-u-lah*) [*μικρός*, small; *σίφων*, a tube, pipe: *pl.*, *Microsiphonulæ*]. In biology, a larval stage of certain cephalopods.

Microskopirlack (*mi-kro-sko-pēr'-lak*) [*Ger.*]. See *Mounting-media*.

Microsoma (*mi-kro-so'-mah*) [*μικρός*, small; *σῶμα*, body: *pl.*, *Microsomata*]. In biology, small chromatin-granules in the cell-nuclei; aggregated they form the "*merits*" of Bœhm, and the "ancestral germ-plasms" or "ids" of Weismann.

Microsomatia (*mi-kro-so-ma'-she-ah*). Synonym of *Microsoma*.

Microsomia (*mi-kro-so'-me-ah*) [*μικρός*, small; *σῶμα*, body]. An arrest of growth resulting in a dwarfing of the whole body.

Microspectroscope (*mi-kro-spek'-tro-skōp*) [*μικρός*, small; *spectrum*, spectrum; *σκοπεῖν*, to view]. A direct-vision spectroscope-prism in connection with the ocular of a microscope, by the use of which it is possible to examine the absorption-bands of a substance in minute quantities. The usual arrangement is a series of glass prisms in a small tube which is attached above the ocular.

Microsphyctous (*mi-kro-sfik'-tus*) [*μικρός*, small; *σφύξις*, pulse]. Having a small pulse.

Microsphyxia (*mi-kro-sfiks'-e-ah*) [*μικρός*, small; *σφύξις*, pulse]. Weakness or smallness of the pulse.

Microsplanchnus (*mi-kro-splangk'-nus*) [*μικρός*, small; *σπλάγχνον*, viscus]. Having small viscera.

Microsporangium (*mi-kro-spo-ran'-je-um*) [*μικρός*, small; *σπόρος*, seed; *ἀγγεῖον*, vessel: *pl.*, *Microsporangia*]. In biology, a sporangium that produces microspores.

Microspore (*mi'-kro-spor*) [*μικρός*, small; *σπόρος*, a seed]. In biology: (*a*) an asexually-produced spore of relatively small size, as in the *Rhizocarpæ*, *Selaginellæ*, *Isoetæ*; (*b*) One form of *anisospore* among the colonial *Radiolarians*.

Microsporidia (*mi-kro-spo-rid'-e-ah*) [*μικρός*, small; *σπόρος*, seed]. A genus of *sporidia*, a class of the sporozoa. They occur as parasites in the muscles of the frog, the marsh-tortoise, in worms and insects. In silkworms they are held by some to be the cause of *Pébrine*, *q.v.*

Microsporon (*mi-kro-spo'-ron*) [*μικρός*, small; *σπόρος*, seed]. A fungus to which several diseases of the skin and hair are believed to be due. **M. audouini,** the cause of *Pelade*, a disease of the hair-covered skin. **M. furfur.** See *Tinea versicolor*. **M. malassezii,** the specific fungus of pityriasis versicolor. **M. mentagrophytes,** the cause of mentagra, *q. v.* **M. mi-**

nutissimum, a species found in the groin and axilla, causing an eruption. See *Erythrasma*.

Microstat (*mi'-kro-stat*) [*μικρός*, small; *στατός*, fixed]. A stage and finder, for attachment to a microscope.

Microsthenic (*mi-kro-sthen'-ik*) [*μικρός*, small; *σθένος*, power]. Having feeble muscular power.

Microstoma (*mi-kro-sto'-mah*) [*μικρός*, small; *στόμα*, mouth]. Abnormal smallness of the mouth.

Microstomatous (*mi-kro-sto'-mat-us*) [*μικρός*, small; *στόμα*, mouth]. Small-mouthed.

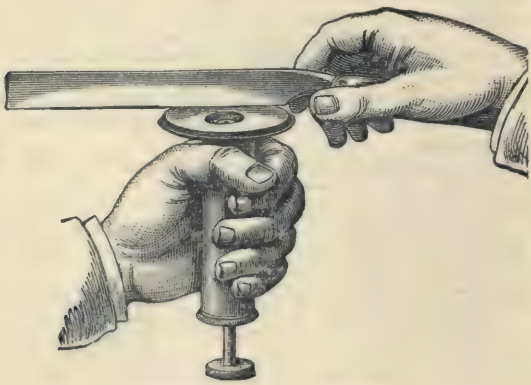
Microstome (*mi'-kro-stōm*) [*μικρός*, small; *στόμα*, a mouth]. In biology, a small mouth or orifice.

Microstomous (*mi-kros'-to-mus*). Synonym of *Microstomatous*.

Microstructure (*mi-kro-struk'-chūr*) [*μικρός*, small; *structura*, a structure]. Microscopic structure.

Microstylospore (*mi-kro-sti'-lo-spor*) [*μικρός*, small; *στῦλος*, a pillar; *σπόρος*, a seed]. In biology, a relatively small stylospore.

Microstylous (*mi-kro-sti'-lus*) [*μικρός*, small; *στῦλος*, a pillar]. In biology, applied to short-styled flowers; having long stamens.



Microsyphilionthus (*mi-kro-sif-il-e-on'-thus*) [*μικρός*, small; *syphilis*, syphilis]. A small syphilid.

Microtasimeter (*mi-kro-tas-im'-et-er*) [*μικρός*, small; *τάσις*, stretching; *μέτρον*, measure]. An instrument used in ascertaining small pressures.

Microtesia (*mi-kro-te'-ze-ah*) [*μικρότης*, smallness]. Congenital smallness of part of the body.

Microtia (*mi-kro'-she-ah*) [*μικρός*, small; *οὖς*, ear]. Abnormal smallness of the external ear.

Microtome (*mi'-kro-tōm*) [*μικρός*, small; *τομή*, a cutting]. An instrument for making thin sections for microscopic examination. The microtomes of Schanze, Rutherford, Hamilton, Williams, Lewis, Jung, Leiter, Ryder, Minot, Ranvier, and Cathcart are the most

RANVIER'S HAND MICROTOME.

used. **M., Freezing,** one in which the tissue is frozen, in order to secure the hardness required for properly cutting sections. **M., Hand,** one consisting of a hollow cylinder in which the specimen is imbedded, and the operation of which is carried out by hand. **M., Immersion,** one that permits of cutting the sections beneath the surface of alcohol. **M., Rocking,** for cutting sections in series. **M., Sliding,** one in which the cutting knife operates by a sliding-movement.

Microtomist (*mi-krot'-o-mist*) [*μικρός*, small; *τομή*, a cutting]. One who cuts sections with the microtome.

Microtomy (*mi-krot'-o-me*) [*μικρός*, small; *τομία*; *τέμνειν*, to cut]. In biology, the art of section-cutting, or preparing tissues for histologic investigation.

Microtrophous (*mi-krot'-ro-fus*) [*μικρός*, small; *τρόφη*, nourishment]. Under-fed; containing little nourishment.

Micro-volt (*mi'-kro-vōlt*). See *Electric Units*.

Microzoöid (*mi-kro-zo'-oid*) [*μικρός*, small; *ζῷον*, an animal; *εἶδος*, form]. In biology, applied to certain small, free, swimming zoöids among the *Vorticellidæ*.

Microzöon (*mi-kro-zo'-on*) [*μικρός*, small; *ζῷον*, an animal: *pl.*, *Microzoa*]. In biology, any microscopic animal; an animalcule.

Microzoöspore (*mi-kro-zo'-o-spōr*) [*μικρός*, small; *ζῷον*, an animal; *σπορά*, seed]. In biology, a relatively small zoöspore.

Microzymatous (*mi-kro-zi'-mat-us*) [*μικρός*, small; *ζύμη*, leaven]. Of the nature of, or caused by, a microzyme; zymotic.

Microzyme (*mi'-kro-zīm*) [*μικρός*, small; *ζύμη*, leaven]. Any one of those microörganisms, or particles of living matter, which according to the theory of Béchamp, are the real agents of the functions of the organism, and the perversion of whose function constitutes disease. They secrete a ferment, *Zymase*, which in disease is transformed into pathogenic substances.

Miction (*mik'-shun*) [*mictio*, urination]. The act of voiding the urine.

Mictopyous (*mik-top'-e-us*) [*μικτός*, mixed; *πύον*, pus]. Mixed with pus.

Micturition (*mik-tu-rish'-un*) [*micturitio; micturire*, to pass water]. The act of passing urine.

Mid [ME., *mid*, middle]. Middle. **M.-brain.** Synonym of *Mesencephalon*. **M.-facial,** pertaining to the middle of the face. **M.-frontal,** pertaining to the middle of the forehead. **M.-f. Process,** in the embryo, the central one of the three plates forming the fronto-nasal process. **M.-gut.** See *Mesogaster*. **M.-head.** See *Centriciput*.

Middle (*mid'-l*) [ME., *middel*, middle]. Mean; equally distant from the extremities. **M. Commissure,** the medicommissure, *q. v.* **M. Oil,** the second main fraction in the coal-tar distillation process. It is collected between 170° C. and 230° C., yielding upon further treatment two very important and valuable products, namely, liquid and solid carbolic acid and naphthalene.

Midriff. See *Diaphragm*.

Midwife. A female obstetrician; a female nurse who attends women in childbirth.

Midwifery. See *Obstetrics*.

Miescher's or **Miescherian Sacs, Tubes** or **Utricules.** Sausage-shaped Psorosperm-tubes or saccules, found occasionally in immense numbers in the muscles of pigs, cattle, sheep, mice and fowls, but never in man. See under *Parasites* (*Animal*), *Table of*. See *Utricule*. **M.'s Tubes.** See *M.'s Sacs*.

Migraine (*me'-grān*) [Fr.]. A paroxysmal, usually unilateral headache associated with gastric, vaso-motor, and visual symptoms. There is sharp pain most frequently in the temporo-frontal region of one side, with general hyperesthesia of the affected surface. There is photophobia; nausea and vomiting are common. The face may be pale or flushed. The disease may be hereditary, is often associated with anemia, overwork, dyspepsia, eye-strain, menstrual disorders, and other conditions. By some it is regarded as the sensory analogue of epilepsy. See *Hemicrania* and *Megrim*.

Migrainous (*me-gra'-nus*) [Fr., *migraine*]. Of the nature of, or associated with, migraine.

Migration (*mi-gra'-shun*) [*migratio; migrare*, to wander]. In zoölogy, the periodic departure of certain animals, especially birds, from one to another climate. **M., External** (*of the Ovum*), the passage of

the ovum from an ovary to the tube of the opposite side. **M., Internal** (*of the Ovum*), the passage of the ovum through the tube related to the ovary from which the ovule was discharged, into the uterus and across into the opposite tube. **M. of Ovum**, its passage from the ovary to the Fallopian tube. **M. of White Corpuscles**, one of the phenomena of inflammation, consisting in the passage of the white corpuscles of the blood through the vessel-wall.

Migratory (*mi'-grat-o-re*) [*migrare*, to wander]. Characterized by wandering, or changing locality. **M. Pneumonia.** See *Pneumonia migrans.*

Mika Operation (*mi'-kah*) [African]. A method in vogue among certain African tribes for the purpose of preventing impregnation. It consists in the formation of a permanent urethro-perineal fistula in the male.

Mikrantrus (*mi-kran'-trus*). See *Micrantrus.*

Mikrencephalus (*mi-kren-sef'-al-us*). See *Micrencephalus.*

Mikrencranus (*mi-kren-kra'-nus*). See *Micrencranus.*

Mikro- (*mi'-kro-*). See *Micro-.*

Mikron (*mi'-kron*). Same as *Micron.*

Mikulicz Drain. A method of draining the abdominal cavity after operation. A piece of iodoform-gauze, with a string tied to its center, is placed in the cavity, and into this improvised sac considerably more gauze is packed. Pressure is thus induced while the capillary action of the sac secures drainage.

Mil [*mille*, a thousand]. The one-thousandth part of an inch. **M., Circular**, the area of a circle the one-thousandth of an inch in diameter.

Mildew (*mil'-du*) [ME., *mildewe*, mildew]. The common name for any one of a number of minute fungi destructive to living plants and dead vegetable substances, as cloth and paper. The name is most properly applied to: (1) The *Erysiphæ*, or powdery mildews, which are parasitic upon living plants of many natural orders. Among the best known and most destructive is the vine mildew, or powdery mildew of the grape, *Oïdium tuckeri*, Berk, a native of America, where alone it produces its perithecial form, described as *Erysiphæ spiralis*, or *Uncinula ampelopsidis*, the conidial form only being known in Europe. The mildew infesting Compositæ, Plantago, Verbascum, Labiatæ, is *Erysiphæ lamprocarpa;* that of grasses, *E. graminis;* that of Umbelliferæ, clover, lucern, lupines, etc., *E. martii;* that of Polygonum, Rumex, Convolvulus, Dipsacus, Lathyrus, Delphinium, Aquilegia, Ranunculus, *E. communis;* that of the various species of Prunus, *Podosphæra kunzei;* and that of hops and other plants, *P. castagnei;* (2) The *Peronosporeæ*, or downy mildews, among which are a large number of well-known parasites, such as the American downy mildew of the grape, *Peronospora viticola;* that of the Umbellifera, *P. nivea;* that of Cruciferæ, cabbages, etc., *P. parasitica;* that of onions, *P. schleideniana;* that of violets, *P. violæ;* that of "potato rot," *Phytophthora infestans*, which, according to Bennett and Murray, first appears, as a rule, on the green leaves of the potato-plant in July or August, the sporangiophores emerging through the stomates. Sporanges are formed, under favorable conditions, in a few hours, and are carried by the wind to other potato-leaves, where they produce zoöspoores or germ-tubes, in drops of water formed by dew or rain; the germ-tubes penetrate the epiderm, setting up fresh growths of mycelium in new plants, and thus the disease is propagated; countless numbers of such propagating cells, each potentially the mother of a number of zoöspores, may thus be set free from a few diseased plants, and the spread of infection and destruction of tissue in warm, moist weather is almost inconceivably rapid. The disease extends to all parts of the plant, including the tubers, in which the mycelium often remains in a resting condition throughout the winter, a fresh start being made in the spring. For treatment, spraying with Bordeaux mixture, alone or in combination with solutions of ammoniacal carbonate of copper, sulphate of copper, sulphate of iron, etc., have been employed.

Milfoil (*mil'-foil*). See *Achillea.*

Miliaria (*mil-e-a'-re-ah*) [*milium*, millet]. Prickly heat; an acute inflammatory disease of the sweat-glands, the lesions consisting of pin-point or larger-sized vesicles and papules, accompanied by a pricking or tingling sensation. It runs an acute or subacute course, and is followed by slight desquamation. Relapses are common. **M. alba.** See *M. crystallina.* **M. crystallina**, a variety of *miliaria* in which the sweat accumulates under the superficial horny layers of the epidermis to form small, clear, transparent vesicles. It is also called *Sudamina crystallina.* These lesions are principally found on the neck, chest, back, and abdomen; they form rapidly, but do not increase in size, nor do they coalesce. They are followed by slight desquamation. Sometimes their contents become cloudy, milky, or semi-puriform in character (*Miliaria alba*). **M. lactea**, a form occurring in puerperal women. **M. papulosa**, a variety of *M. rubra.* It is the well-known "*prickly heat.*" **M. puerperalis, M. puerperarum**, a form occurring in lying-in women, especially in conditions of septic infection. **M., Red Gum.** See *M. strophulus.* **M. rubra**, a form of *miliaria* in which there is an inflammation of the tissues surrounding the sweat-glands, secondary to the retention of sweat. There is redness and itching; the eruption is very copious and thickly set, so that the skin assumes a vividly red color. **M. strophulus**, a form occurring in nursing infants, due to excessive swathing. **M. vesiculosa.** Same as *M. rubra.*

Miliariform (*mil-e-ar'-if-orm*). Synonym of *Miliary.*

Miliary (*mil'-e-a-re*) [*milium*, millet]. Of the size of a millet-seed. **M. Fever.** See *Fever.* **M. Tubercles**, tubercular nodules of very small size, usually present in large numbers, as in miliary tuberculosis. See, also, *Grutum.* **M. Tuberculosis.** See *Tuberculosis.*

Military Fever. See *Typhus Fever.* **M. Medicine, or Surgery**, the treatment of the diseases and wounds to which soldiers and sailors are liable.

Milium (*mil'-e-um*) [*milium*, millet-seed]. *Grutum; Strophulus albidus.* A skin-disease characterized by the formation of small, roundish, whitish, sebaceous, non-inflammatory elevations, situated just beneath the epidermis. They are found mainly on the face, eyelids, and foreheads of elderly persons, and may exist in immense numbers. They may undergo calcification, giving rise to *cutaneous calculi.* **M., Amyloid.** Synonym of *Molluscum contagiosum, q. v.* **M., Colloid**, a rare skin-disease characterized by the presence, especially on the bridge of the nose, forehead, and cheeks, of minute, shining, flat, or slightly raised lesions of a pale-lemon or bright-lemon color. It is a form of colloid degeneration of the skin, affecting persons of middle or advanced age.

Milk [ME., *milk*, milk]. The secretion of the mammary glands of Mammalia, consisting of water, casein, albumin, fat, milk-sugar, and salts. Cream consists mainly of the fats that rise to the surface of the milk. Skim-milk is the residue left after the removal of the cream. Buttermilk is cream from which the fatty matter has been removed. The sp. gr. of good

milk varies from 1.027 to 1.034. It should contain not less than 10 per cent. of cream. The reaction of milk, when first secreted, is alkaline, but it becomes acid on standing, as a result of fermentative processes. The relative proportion of the constituents in milk of different animals may be seen from the appended table of analyses from Wynter Blyth, 1882:—

	Fat.	Casein.	Albumin.	Milk-sugar.	Ash.	Total Solids.	Water.
Human milk,	2.90	2.40	0.57	5.87	0.16	12.00	88.00
Cow's milk,	3.50	3.98	0.77	4.00	0.17	13.13	86.87
Camel's milk,	2.90	3.84		5.66	0.66	13.06	86.94
Goat's milk,	4.20	3.00	0.62	4.00	0.56	12.46	87.54
Ass's milk,	1.02	1.09	0.70	5.50	0.42	8.83	91.17
Mare's milk,	2.50	2.19	0.42	5.50	0.50	11.20	88.80
Sheep's milk,	5.30	6.10	1.00	4.20	1.00	17.73	82.27

Fleischmann gives the computation of the several parts of cow's milk as follows:—

	Water.	Fat.	Casein.	Albumin.	Milk-sugar.	Ash.
Whole milk,.	87.60	3.98	3.02	4.40	4.30	0.70
Cream, . . .	77.30	15.45	3.20	0.20	3.15	0.70
Skim-milk, .	90.34	1.00	2.87	0.45	4.63	0.71
Butter, . . .	14.89	82.02	1.97	0.28	0.28	0.56
Buttermilk,	91.00	0.80	3.50	0.20	3.80	0.70
Curd, ...	59.30	6.43	24.22	3.53	5.01	1.51
Whey, . . .	94.00	0.35	0.40	0.40	4.55	0.60

M.-abscess, a mammary abscess. **M., Artificial Mother's,** cow's milk so prepared as to resemble in composition human milk. **M.-bath.** See *Bath.* **M.-blotch.** See *Crusta lactea.* **M., Blue,** a change in color of milk due to the development of the *Bacillus cyanogenus.* See *Bacteria, Synonymatic Table of.* **M., Butter.** See *Milk.* **M., Condensed,** the milk of cows from which a large part of the water has been evaporated and sugar added. **M.-crust,** a term for vesicular eczema in children. The same as milk-blotch. **M.-curdling Ferments.** See *Ferments.* **M.-cure,** the method of treating certain diseases by an exclusive diet of skim-milk. It is of service in dropsies of all kinds, obstinate intestinal neuralgias, incorrigible dyspepsias with grave disturbances of nutrition, hepatic disorders, asthma due to pulmonary catarrh and emphysema, hysteric and hypochondriac states associated with serious disturbances of nutrition, and in disorders of nutrition dependent on chronic catarrh of the stomach and intestine. **M.-cyst,** a peculiar and rare cystic tumor of the mammary gland. It is probably the result of extravasation of milk. The contained milk may become inspissated. **M., Deficiency of.** See *Agalactia.* **M.-duct,** a galactophorous duct. **M., Excessive Secretion of.** See *Galactorrhea.* **M.-fever,** certain phenomena, possibly with a slight rise of temperature, attending the establishment of the secretion of milk. It is due to a slight degree of septic intoxication. The term was formerly applied to all febrile exacerbations following parturition, and was often used synonymously with child-bed or puerperal fever. See, also, *Galactopyretus.* **M.-globule,** a globule of oil of the kind seen in freshly drawn milk. **M., Green,** colostrum. **M., Human.** See *Human.* **M.-leg.** See *Phlegmasia alba dolens.* **M.-maid's Cramp.** See *Cramp.* **M., Male,** the seminal fluid. **M.-molar,** any deciduous molar tooth. **M.-nurse,** a wet-nurse. **M.-plasma,** the whey, or plasma of milk, seen when the casein and butter have been removed. **M.-pump.** See *Breast-pump.* **M.-punch,** a nutritious preparation made by adding brandy, whiskey, or rum, to milk in the proportion of about one to four or six parts, and flavoring with sugar and nutmeg. **M.-rice Culture-medium:** to 100 parts by weight of finely powdered rice add 210 parts by measure of a 3 to 1 mixture of milk and bouillon. Beat together and sterilize. **M.-scab.** Same as *M.-blotch.* **M.-scall.** See *Porrigo larvalis.* **M.-sickness,** an epizootic disease of cattle, communicable to persons who drink their milk or eat their flesh. It is marked by "trembles," or chills, vomiting, and a disordered state of the functions of the alimentary canal. **M., Skim.** See *Milk.* **M.-spots,** small, opaque, white spots of thickened pericardium resulting from a localized inflammation. These spots may sometimes be the result of slow sclerotic changes occurring in old age. **M.-sugar.** See *Lactose.* **M. Teeth,** the teeth of the first dentition; deciduous or temporary teeth. **M.-tester,** a lactometer. **M.-thrush.** Synonym of *Aphtha.* **M.-vessel,** in biology, one of the tubes in which a milky fluid is secreted. **M.-weed,** silk-weed. The root of *Asclepias cornuti,* with properties similar to those of *A. tuberosa.* It is a popular cure-all. Dose of the fld. ext. ♏x–℥j. Unof. **M., Witches',** colostrum; also milk secreted by the male breast.

Milker's Cramp, or **Spasm.** See *Cramp.*

Millecoulomb (*mil-koo'-lōm*) [*mille,* one thousand; *Coulomb*]. One one-thousandth part of a coulomb.

Miller, Bacillus of, M., Spirillum of. See *Bacteria, Synonymatic Table of.* **M.-Lewis Bacillus.** A comma-bacillus found in the human mouth. Cf. *Bacillus dentalis viridans,* under *Bacteria, Synonymatic Table of.*

Miller's Asthma. See *Laryngismus stridulus* and *Diseases, Table of.*

Millers' Eczema. A form of eczema of the hands, occurring in millers, from the irritation of the flour.

M.s' Lung, a form of *Pneumonokoniosis.*

Millet-seed Rash. Synonym of *Miliaria.*

Mill-grinders' Phthisis. See *Pneumokoniosis.*

Milliampèrage (*mil-e-om'-pār-ahzh*) [*mille,* a thousand; *Ampère,* a French scientist]. The expression of electric current-strength in milliampères.

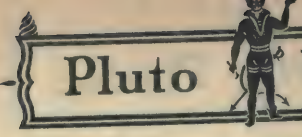
Milliampère (*mil-e-om'-pār*) [*mille,* thousand; *Ampère,* a French scientist]. One-thousandth of an ampère, 1 volt divided by 1000. See also *Ampère.*

Milliampèremeter (*mil-e-om'-pār-me-ter*) [*mille,* thousand; *Ampère,* a French scientist; *μέτρον,* measure]. An instrument for measuring the strength of an electric current.

Milligram (*mil'-ig-ram*). See *Metric System.*

Milliliter (*mil'-il-e-ter*). See *Metric System.*

Millimeter (*mil'-im-e-ter*). See *Metric System.*



Milliweber (*mil'-e-web-er*). Same as *Milliampère.*

Millon's Reagent. A reagent made by dissolving 10 grams of mercury in 20 grams of nitric acid, diluting the solution with an equal volume of water, and decanting in twenty-four hours. Proteids warmed in contact with the reagent at a temperature of 70° C. yield a purple-red color. See *Tests, Table of.*

Millstone-makers' Phthisis. A form of pneumonokoniosis due to the inhalation of fine particles in the manufacture of millstones.

Mill-tooth. A grinder; a molar tooth.

Milman's Drink. A diuretic for use in dropsy. It consists of a solution of ½ ounce of potassium bitartrate in two pounds of barley-water, with one or two fluid ounces of brandy added.

Milori Blue. Same as *Berlin Blue.*

Milphæ (*mil'-fe*) [*μίλφαι*, falling of the hair of the eyelids]. Same as *Milphosis.*

Milphosis (*mil-fo'-sis*) [*μίλφοσις*, baldness]. Baldness of the eyebrows.

Milt [a corruption of *milk*]. The spermatic organ or spermatic fluid of fishes, oysters, and other of the lower animals. See also *Spleen.* **M.-waste.** See *Asplenium.*

Miltosis (*mil-to'-sis*). Same as *Milphosis.*

Milzbrand (*milts'-brant*) [Ger.]. Synonym of Anthrax, *q. v.*

Mimesis (*mim-e'-sis*) [*μίμησις*, imitation]. In biology, mimicry; the simulation by an organism of some other organism or its environment.

Mimetic (*mim-et' ik*) [*μίμησις*, imitation]. Imitative; mimic.

Mimetism (*mim'-et-izm*). Same as *Mimesis* and *Mimicry.*

Mimic (*mim'-ik*) [*μιμικός*, from *μῖμος*, an actor]. Imitative simulating. **M. Aneurysm.** See *Phantom Aneurysm.* **M. Labor,** false labor. **M. Spasm,** habitspasm, or convulsive tic.

Mimicism (*mim'-is-izm*) [*μίμησις*, imitation]. Neuropathic imitation of words, gestures, etc.

Mimicry (*mim'-ik-re*) [*μῖμος*, an imitator: *pl.*, *Mimicries*]. Imitation. In biology, an imitative resemblance of one organism to another. The utilization by an organism of false warning or signaling colors for the repelling of enemies by the deceptive suggestion of some unpleasant or dangerous quality, or for attracting prey by the deceptive appearance of something attractive to them. Even foreign objects commonly associated with some well-defended and aggressive species may be mimicked by a comparatively defenseless form. (Poulton).

Mimmation (*mim-a'-shun*)[Ar., *mim*, the name of the letter *m*]. The unduly frequent use of the sound of the letter *m* in speech.

Mimochasmesis (*mim-o-kaz-me'-sis*) [*μιμεῖσθαι*, to imitate; *χάσμησις*, yawning]. Imitative yawning.

Mimography (*mim-og'-ra-fe*) [*μιμεῖσθαι*, to imitate; *γράφειν*, to write]. Sign-language used by deaf-mutes.

Mimosa-bark (*mi-mo'-sah*) [*μῖμος*, a mimic]. Wattle; the bark of numerous species of Acacia (*A. decurrens* and *A. dealbata*) from Australia and Tasmania, containing from 24 to 30 per cent. of mimotannic acid. It is used in leather-manufactures, and makes a red leather. It is generally used in admixture.

Mimosis (*mim-o'-sis*). Same as *Mimesis.*

Mimotannic Acid (*mim-o-tan'-ik*). See *Cutch.*

Mimotype (*mim'-o-tīp*) [*μῖμος*, a mimic; *τύπος*, form]. In biology, a form distantly resembling another and fulfilling similar functions; the representative in one country of a type or form found in another.

Mind (*mind*) [ME., *mind*, mind]. The understanding. The reasoning and intellectual faculties considered as a whole. **M.-blindness,** a form of aphasia in which, although the patient is perfectly able to see, no intellectual impression is conveyed to his mind by the object seen. This condition is also called *Visual Amnesia.* **M.-cure,** the alleged cure of disease through mental operations. **M-curer,** one who professes to cure disease by acting directly upon the mind of the patient. **M.-deafness,** a form of aphasia in which sounds, though heard and perceived as such, awaken no intelligent conceptions. This condition is also called *Auditory Amnesia.* **M.-healer.** Same as *M.-curer.* **M.-reading,** the perception of another's thoughts and feelings by a direct and occult process. **M.-sick,** insane.

Mindererus, Spirit of. See *Ammonii acetatis, Liq.*

Miner's Anemia. A disease of coal-miners due in part to the choke-damp, or ethylene which they breathe. **M.'s Asthma.** See *Anthracosis.* **M.'s Cachexia.** See *Ankylostomiasis.* **M.'s Disease.** Same as *M.'s Elbow.* **M.'s Elbow,** enlargement of the bursa over the olecranon, due to irritation while working and lying on the side. **M.'s Lung.** Same as *Anthracosis.* **M.'s Nystagmus.** See *Nystagmus.* **M.'s Phthisis,** anthracosis; a chronic affection of the lungs due to the constant inhalation of coal-dust; it is attended with cough and dyspnea, and with a black discoloration of the pulmonary tissues. It is designated by various other names. The process often ends in tuberculosis.

Mineral (*min'-er-al*) [*minera*, a mine]. Any inorganic chemic compound found in nature. The word is usually limited to the solid inorganic compounds. **M.-blue.** See *Pigments, Conspectus of.* **M. Colza Oil.** See *Burning Oil.* **M.-gray.** See *Pigments, Conspectus of.* **M.-green.** Same as *Paris-green.* **M.-lake.** See *Pigments, Conspectus of.* **M. Oil,** petroleum. **M.-orange.** See *Pigments, Conspectus of.* **M. Pitch,** bitumen. **M.-purple.** See *Pigments, Conspectus of.* **M. Sperm.** See *Burning Oil.* **M. Water,** water naturally or artificially impregnated with mineral salts or oxids. A classified list of the springs of the United States will be found in the appendix of the author's "Student's Medical Dictionary." The general classes into which the springs are grouped indicate the therapeutic actions of the waters. Analyses of typical examples of each class are there given in full; of the rest, the active ingredients are indicated by the chemic formulæ. Alkaline and carbonated springs are usually hot. Saline and sulphur springs may be either hot or cold. Silicious springs are always hot. **M. Wax.** See *Ozocerite.* **M.-white.** Same as *Permanent-white.* **M.-yellow.** Same as *Cassel Yellow.*

Mineralogy (*min-er-al'-o-je*) [*minera*, a mine; *λόγος*, science]. The science, or a scientific account, of minerals.

Mineromephitis (*min-er-o-mef-i'-tis*) [*minera*, mine; *mephitis*, a noxious exhalation]. Mephitic gas, or miasm from mines; choke-damp.

Miniate (*min'-e-āt*) [*minium*, red lead]. Vermilion-colored.

Minim (*min'-im*) [*minimus*, dim. of *minus*, little]. The one-sixtieth of a fluid dram. Symbol, ♏.

Minimeter (*min'-im-e-ter*) [*minim*, minim; *μέτρον*, measure]. An apparatus for measuring liquids in minims.

Minimetric (*min-im-et'-rik*) [*minim*, minim; *μέτρον*, measure]. Pertaining to measurement in mining. **M. Method,** a method of estimating CO_2 in the air. See *Ventilation.*

Minium (*min'-e-um*) [L., *min*, or *minium*, red lead]. Red oxid of lead, Pb_3O_4; used formerly in plasters. See also *Pigments, Conspectus of.*

Minor (*mi'-nor*) [L., "less"]. 1. Less; lesser; smaller. 2. An individual under legal age; one under the authority of parents or guardians. **M. Surgery.** See *Surgery, Minor.*

Minoration (*mi-nor-a'-shun*) [*minorare*, to make smaller]. Gentle purgation, or emesis.

Minorative (*mi'-nor-a-tiv*) [*minorare*, to make smaller]. 1. Effecting minoration. 2. A gently purgative remedy.

Minot's Theory. See *Heredity.*

Mint. See *Mentha.* **M.-worts.** See *Labiate Plants.*

Minutio (*min-u'-she-o*) [L.]. Synonym of *Minoration.* **M. morrachi.** An old method of reducing the strength of young men by venesection or other derivative means, in order to exert an anaphrodisiac influence.

Minythesis (*min-ith-e'-sis*) [μινύθησις, decrease]. Lysis; the stage of decrease in an attack of disease.

Mioangioneurosis (*mi-o-an-je-o-nu-ro'-sis*) [μείων, lesser; ἀγγεῖον, vessel; νεῦρον, nerve; νόσος, disease]. A nervous disorder of the smaller blood-vessels; a vaso-motor or vaso-inhibitory disturbance.

Miocardia (*mi-o-kar'-de-ah*) [μείων, less; καρδία, heart]. The systolic diminution of the volume of the heart. See *Auxocardia.*

Miocatantis (*mi-o-kat-an'-tis*) [μείων, lesser; κατάντης, sleep]. Lissauer's term for a skull in which the angle formed between the radius fixus and the line joining the hormion and the staphylion is between 23° and 45°.

Miokatantis (*mi-o-kat-an'-tis*). See *Miocatantis.*

Miophylly (*mi-off'-il-e*) [μείων, less; φύλλον, a leaf]. In biology, the diminution by suppression of the number of leaves in a whorl.

Miopragia (*mi-o-pra'-je-ah*) [μείων, less; πράσσειν, to do]. Diminished functional activity.

Miopragic (*mi-o-praj'-ik*) [μείων, less; πράσσειν, to do]. Resulting from too little activity.

Miosis (*mi-o'-sis*) [μείωσις; μείων, less]. 1. Contraction or decrease in the size of an organ, especially of the pupil. 2. A lessening of the intensity of existing symptoms.

Miostemonous (*mi-o-stem'-o-nus*) [μείων, less; στήμων, stamen]. Having the stamens fewer in number than the petals.

Miot's Operation. See *Operations, Table of.*

Miotaxy (*mi'-o-taks-e*) [μείων, less; τάξις, arrangement]. In biology, the complete suppression of an entire set of organs, as of the stamens, the petals, or the sepals of a flower.

Miotic (*mi-ot'-ik*) [μειωτικός, from μείων, less]. 1. Pertaining to, or characterized by, miosis; causing contraction of the pupil. 2. Any agent or medicine that contracts the pupil.

Miquel's Bulb. An apparatus for air-analysis.

Mirage (*mēr-ahzh'*) [Fr., *mirer*, to look at carefully]. An illusion caused by the reflection of objects against the surface upon which two layers of air of unequal density rest, the lighter on the heavier.

Mirbane, Oil of. A name for nitrobenzene.

Mirbel, Glands of. See *Gland.*

Mire (*mēr*) [Fr., the sight of a gun; a target]. Figures used upon the perimeter-bar of the ophthalmometer of Javal and Schiötz; by observing the variations of their images, as reflected from different meridians of the cornea, the measurement of corneal astigmatism is effected.

Mirocele (*mir'-o-sēl*). Same as *Merocele.*

Mirror (*mir'-or*) [Fr., *mirer*]. 1. A term applied to any polished surface that reflects a large proportion of the light falling upon it, especially a glass silvered on the anterior, or coated with a tin-amalgam on the posterior surface. Mirrors, plane or focusing, are used in the ophthalmoscope, laryngoscope, otoscope, etc., to reflect light into the cavity studied, and thus illuminate it for observation. 2. The movable silvered glass with a plane and a concave face for illuminating the object in microscopic observation. **M.-bar,** the bar supporting the mirror of a microscope. **M., Dentists',** a small speculum designed for the examination of the teeth; a mouth-glass. **M., Frontal, M., Head,** a circular mirror with a central perforation, strapped to the head by a band, and used to throw light on parts to be examined. **M.-writing,** a peculiarity of penmanship observed in left-handed persons, and characterized by a reversal of the form and arrangement of the letters, which appear as if seen in a mirror.

Miryachit (*mēr-e'-asch-it*) [Rus., "to play the fool"]. A peculiar disease observed in some Oriental tribes, the chief characteristic of which consists in mimicry by the patient of everything said or done by another. The same disease is called *Lata* by the Javanese. It is also allied to the "Jumpers" of Canada. See *Palmus.*

Misanthrope (*mis'-an-thrōp*) [μισεῖν, to hate; ἄνθρωπος, man]. A melancholy person; one who has an aversion to society.

Misanthropy (*mis-an'-thro-pe*) [μισεῖν, to hate; ἀνθρωπος, man]. Aversion to human society; a symptom not rare in melancholia.

Misbirth (*mis-berth'*). Synonym of *Abortion.*

Miscarriage (*mis-kăr'-āj*) [ME., *mis-*, wrong, bad; *carriage*, burden]. The expulsion of the fetus between the fourth and the sixth month of pregnancy.

Miscarry (*mis-kăr'-e*) [ME., *miscarien*, to miscarry]. To give birth to a non-viable fetus.

Miscegenation (*mis-ej-en-a'-shun*) [*miscere*, to mix; *genus*, race]. Mixture of different races by intermarriage.

Miscible (*mis'-ib-l*) [*miscere*, to mix]. Capable of being mixed.

Misemission (*mis-e-mish'-un*) [ME., *mis-*, wrong; *emittere*, to send forth]. A form of sterility in the male in which fertile semen may be secreted and ejaculated, but for some reason fails to be so deposited in the female organs as to come in contact with the ovum and impregnate it. Usually it is due to some malformation of the urethra.

Miserere mei (*miz-er-a'-ra ma'-e*) [L., "have mercy on me"]. An old name for volvulus, or intestinal colic; also for stercoraceous vomiting.

Mislactation (*mis-lak-ta'-shun*). See *Galactia.*

Mislocalization (*mis-lo-kal-iz-a'-shun*) [ME., *mis-*, wrong; *locus*, a place]. Failure properly to localize sensory impressions.

Mismenstruation (*mis-men-stru-a'-shun*) [ME., *mis-*, wrong; *menstruare*, to menstruate]. Any disturbance of menstruation.

Mismicturition (*mis-mik-tu-rish'-un*) [ME., *mis-*, wrong; *micturire*, to pass water]. Any disorder of micturition.

Misogamy (*mis-og'-am-e*) [μισεῖν, to hate; γάμος, marriage]. Morbid and unreasonable aversion to marriage.

Misogyny (*mis-og'-in-e*) [μισεῖν, to hate; γυνή, woman]. Morbid and unreasonable hatred of women; a symptom often seen in insanity and in sexual perversion.

Misologia (*mis-o-lo'-je-ah*) [μισεῖν, to hate; λόγος, reason]. Unreasoning aversion to intellectual or literary matters.

Misomania (*mis-o-ma'-ne-ah*) [μισεῖν, to hate; μανία, madness]. The delirium of persecution.

Misoneism (*mis-on-e'-izm*) [μισεῖν, to hate; νέος, new]. Fear or horror of novelty.

Misopedia (*mis-o-pe'-de-ah*)[μισεῖν, to hate; παῖς, child]. Morbid hatred of children, especially of one's own children.

Misopsychia (*mis-op-si'-ke-ah*) [μισεῖν, to hate; ψυχή, life]. Morbid disgust with life.

Misoptochos, Misoptochus (*mis-op'-to-kos, mis-op'-to-kus*) [μισεῖν, to hate; πτωχός, beggar]. Gout; facetiously so termed because the poor are not so liable to it.

Misozoia (*mis-o-zo'-e-ah*) [μισεῖν, to hate; ζωή, life]. Disgust with life, together with suicidal impulses.

Misplaced (*mis-plāst'*) [ME., *mis-*, wrong; *place*, place]. Out of proper position. **M. Menstruation,** vicarious menstruation.

Missed (*mist*) [ME., *missen*, to miss]. Passed; failure of attaining. **M. Abortion,** the retention of the product of conception in the uterine cavity after its death and with the appearance of some of the symptoms of abortion. **M. Labor,** a rare accident of pregnancy, in which there is the occurrence of a few labor-pains at term, their subsidence, and the retention of the product of conception *in utero* for a varying period thereafter. **M. Miscarriage.** Same as *M. Abortion.*

Misshapen (*mis-sha'-pen*) [ME., *mis-*, wrong; *shape*, shape]. Deformed; ill-shaped.

Missio (*mis'-e-o*) [L.]. A letting go. **M. sanguinis,** blood-letting.

Missoy (*mis'-oi*). See *Massoy Bark.*

Mistletoe (*mis'-l-to*). See *Viscum.*

Mistura (*mis-tu'-rah*) [*L. : gen.* and *pl.*, *Misturæ*]. A mixture. In pharmacy an aqueous preparation of an insoluble substance held in suspension, usually by the addition of soluble gum, egg-emulsion, etc. There are four official *misturæ*, besides six in the British Pharmacopeia and 18 in the National Formulary.

Mistus, Mixtus (*mis'-tus, miks'-tus*) [*miscere*, p.p. *mistus, mixtus*, to mix]. In biology, a cross-breed.

Mitchell's (*S. Weir*) **Treatment.** See *Treatment, Methods of.*

Mitchella (*mich-el'-ah*) [after John *Mitchell*, a Virginian botanist]. A genus of rubiaceous plants. **M. repens,** partridge-berry or checker-berry, is diuretic and astringent, and among the Indians has reputed emmenagogue properties. Unof.

Mite (*mīt*) [ME., *mite*, a mite]. The common name applied indifferently to any of the eight-legged insects of the order *Acarina*. The fact that the immature forms have but six legs has led to some confusion in the onomy of the group and the formation of spurious species (*e. g.*, *Leptus*). The mites are cosmopolitan, and the majority are parasitic upon plants and animals, while others infest organic substances, such as cheese, sugar, flour, old rags, rubbish, etc. For the true ticks see the genus *Ixodes;* for the garden and harvest "ticks," "mites," or "bugs," and certain ecto-parasites of birds, see the genera *Tetranychus* (*Leptus*), *Trombidium, Cheyletus, Harpirhynchus, Picobia;* and for those forms associated with the various acariases, the itch, mange, etc., of man and domestic animals, consult the genera *Chorioptes, Cytodites, Demodex, Dermanyssus, Dermoglyphus, Epidermoptes, Freyana, Hypodectes, Listrophorus, Megninia, Pterolichus, Psoroptes, Sarcoptes, Symbiotes, Symploplectes,* under *Parasites* (*Animal*), *Table of.*

Mithradate, Mithridate (*mith'-rad-āt, mith'-rid-āt*) [Μιθραδάτης, Μιθριδάτης, a Grecian king]. An old name for an electuary of many ingredients, used as an antidote and alexipharmac.

Mithradatism, Mithridatism (*mith'-rad-āt-izm, mith'-rid-āt-izm*) [Μιθραδάτης, Μιθριδάτης]. That immunity from the effects of a poison induced by the administration of gradually increased doses. The selection of the word has reference to the fable concerning Mithradates, king of Pontus, that he became so charged with the poisons with which he experimented that he acquired an immunity to them all.

Mitigate (*mit'-ig-āt*) [*mitigare*, to soften]. To allay; to make milder; to moderate.

Mitigated Stick, or **Caustic** (*mit'-ig-a-ted*) [*mitigare*, to soften]. See *Argentum.*

Mitigating (*mit'-ig-a-ting*) [*mitigare*, to soften]. Assuaging, allaying. Also, a descriptive term applied to anodynes.

Mitigation (*mit-ig-a'-shun*) [*mitigare*, to soften]. Attenuation; lessening.

Mitis-green. Same as *Schweinfurth-green.*

Mitochysis (*mi-tok'-is-is*) [μίτος, thread; χύσις, liquefaction]. Cell-multiplication, direct or by mitosis.

Mitom (*mi'-tōm*). Same as *Mitoma.*

Mitoma, Mitome (*mi-to'-mah, mi'-tōm*) [μιτός, a thread]. In biology, Flemming's term for the "filar mass," *i. e.*, the threads of the protoplasmic reticulum of a cell, also called *Cytomitoma*. Cf. *Paramitoma, Karyomitoma.*

Mitoplastic (*mi-to-plas'-tik*) [μίτος, thread, web; πλάσσειν, to form]. Serving to build up the tissues.

Mitosic (*mi-to'-sik*). Synonym of *Mitotic* or *Karyokinetic.*

Mitosis (*mi-to'-sis*) [μίτος, a thread]. In biology, the splitting of the nuclear chromatin of plant or animal cells while undergoing indirect division; karyomitosis, karyokinesis.

Mitotic (*mi-tot'-ik*) [μίτος, thread]. Pertaining to *Mitosis.*

Mitra hippocratis (*mi'-trah hip-pok'-ra-tis*). See *Bandage, Capeline.*

Mitral (*mi'-tral*) [*mitra*, miter]. Resembling a miter; mitriform; pertaining to the auriculo-ventricular valve of the left side of the heart. **M. Disease,** a generic term for organic disease of the mitral valve of the heart. **M. Incompetence.** See *M. Regurgitation* and *Endocarditis.* **M. Insufficiency.** See *M. Regurgitation* and *Endocarditis.* **M. Murmur.** See *Murmur.* **M. Obstruction,** disease of the mitral valve causing obstruction to the flow of blood through the left auriculo-ventricular opening. **M. Regurgitation,** disease of the mitral valve preventing its proper closure during the cardiac systole, and permitting blood to be forced back into the left auricle. **M. Stenosis.** See *M. Obstruction.* **M. Valve.** See *Valves.*

Mitrate (*mi'-trāt*) [*mitra*, miter]. In biology, bonnet-shaped, miter-shaped, mitriform.

Mitriform (*mi'-trif-orm*) [*mitra*, miter; *forma*, form]. See *Mitral.*

Mitscherlich's Test. See *Tests, Table of.*

Mittler's Green. See *Pigments, Conspectus of.*

Mixed Blood. See *Mulatto*, and *Griffe.*

Mixogamy (*miks-og'-am-e*) [μῖξις, a mixing; γάμος, marriage]. In biology, the congregation of males and females, the number of the former being in excess, as exhibited by certain fishes at spawning-time.

Mixopyus (*miks-o'-pe-us*) [μιγνύναι, to mix; πύον, pus]. Being mixed with pus.

Mixoscopia (*miks-o-sko'-pe-ah*) [μῖξις cohabitation; σκεπτεῖν, to look]. A form of sexual perversion in which the orgasm is excited by the sight of coitus. See *Voyeur.*

Mixture (*miks'-tūr*). See *Mistura.*

Mixtus (*miks'-tus*). See *Mistus.*

Mnemonics (*ne-mon'-iks*) [μνήμη, the memory]. The science of cultivation of the memory by systematic methods.

Moan (*mōn*) [ME., *monen*, to moan]. 1. To utter a low, dull sound expressive of suffering. 2. The sound so uttered.

Mobby (*mob′-e*). See *Mabby*.

Mobile (*mob′-il*) [*mobilis*, movable]. **M. Pain.** One that shifts from place to place. **M. Spasm,** athetosis; slow, irregular movement, as of the paralyzed parts in hemiplegia.

Mobility (*mob-il′-it-e*) [*mobilis*, movable]. That property by which the position of a body may be changed. The condition of being movable.

Mochlus (*mok′-lus*) [*μοχλός*, lever]. The obstetric lever, or vectis.

Mock Turkey-red. Same as *Barwood-red.*

Mocmain (*mok′-mān*) [Chinese for "tree-cotton"]. The cottony hairs of *Bombax heptaphyllum*, a species of cotton-tree, used in stuffing the pads of trusses.

Modal (*mo′-dal*) [*modus*, mode]. A term applied to the order of response of muscles and nerves to the galvanic current.

Model (*mod′-el*) [*modellus*, dim. of *modus*, measure]. A standard for imitation. **M., Antagonizing** (*for artificial teeth*), a contrivance for obtaining an exact representation of the manner in which the jaws meet, by which a dentist selects, arranges, and antagonizes artificial teeth.

Moderator (*mod′-er-a-tor*) [*moderare*, to regulate]. Reil's band. See *Band.* **M. Band.** See *Band.* **M. Centers, M. Nerves.** See *Inhibitory.*

Modification (*mod-if-ik-a′-shun*). See *Tuberculin.*

Modiolus (*mo-di′-o-lus*) [L., nave]. 1. The central pillar or axis of the cochlea, around which the spiral canal makes two and one-half turns. 2. The crown of a trephine.

Modulus (*mod′-u-lus*) [dim. of *modus*, measure, mode]. A unit of certain physical forces.

Modus (*mo′-dus*) [L.]. A mode or method. **M. operandi,** the method of the performance of an action.

Mœnia (*me′-ne-ah*) [L., *pl.*]. Walls. **M. dentis,** the portions of the jaws that bear the alveoli.

Mogigraphia (*mog-ig-raf′-e-ah*) [*μόγις*, with difficulty; *γράφειν*, to write]. Difficulty or inability to execute writing movements; writers' cramp.

Mogigraphic (*mog-ig-raf′-ik*) [*μόγις*, with difficulty; *φράφειν*, to write]. Characterized by mogigraphia.

Mogilalia (*mog-il-a′-le-ah*) [*μόγις*, with difficulty; *λαλιά*, talk]. Stammering, stuttering.

Mogilalism (*mog-il-a′-lizm*). Same as *Mogilalia.*

Mogiphonia (*mog-if-o′-ne-ah*) [*μόγις*, with difficulty; *φωνή*, sound]. A difficulty in producing loud vocal sounds with the larynx, ordinary speech remaining unaffected.

Mogographia (*mog-o-graf′-e-ah*). See *Mogigraphia.*

Mogostocia (*mog-os-to′-se-ah*) [*μόγος*, labor; *τόκος*, birth]. Painful or difficult parturition.

Mohr's Method. A volumetric method of estimating the chlorids in the urine. It is carried out by means of precipitation by a standard solution of silver nitrate.

Mohrenheim's Fossa. See *Fossa.* **M.'s Space,** the groove on the deltoid muscle between the cephalic vein and the humero-thoracic artery.

Moist [ME., *moist*, damp]. Damp; slightly wet. **M. Chamber,** a large circular glass with a lid, used in bacteriologic work, especially for growing potato-cultures. The chamber is kept moist by the evaporation of water from a moistened filter-paper which is laid on the bottom of the dish. **M. Colors.** See *Pigments, Colors, and Dyestuffs.* **M. Filter,** a filter-paper which is moistened with water. **M. Gangrene,** the form of gangrene that occurs in a part filled with blood. See *Gangrene.* **M. Melting,** the form of procedure in the extraction of fats, in which the material is melted over direct fire, with the addition of dilute sulphuric acid. This is the process now generally followed. **M. Tetter.** See *Eczema.* **M. Wart.** See *Verruca acuminata.*

Mola (*mo′-lah*). See *Mole.*

Molar (*mo′-lar*) [*moles*, mass]. Pertaining to masses, in contradistinction to molecular.

Molar (*mo′-lar*) [*mola*, a millstone]. In biology, a tooth that has no deciduous predecessor, but is behind other teeth, the premolars, which (except the first) have deciduous predecessors. **M. Glands,** the salivary glands of the horse and other mammals; the *superior* is outside and along the upper border of the buccinator muscle, the *inferior* is at the inferior border of the buccinator. These glands pour their secretion into the mouth by a series of orifices arranged in line on the buccal membrane, parallel to each molar arch. **M. Teeth.** See *Teeth.*

Molariform (*mo-lar′-if-orm*) [*mola*, millstone; *forma*, form]. Having the form of a molar tooth.

Molary (*mo′-lar-e*) [*molaria*, belonging to a mill]. In zoölogy, fitted for grinding.

Molasses (*mo-las′-sez*) [*mellaceus*, honey-like]. Theriaca; treacle; the uncrystallized residue of the refining of sugar. It is used in pharmacy.

Mold, Mould (*mōld*) [ME., *mould*, mold]. 1. A minute fungus or other vegetable growth of a low type appearing on moist and decaying bodies. 2. The matrix or prepared and shaped cavity in which anything is cast and receives its form. Anything that serves to regulate the size and form of bodies. Cast; form; shape. A fontanel or space occupied by a cartilaginous membrane in the skull of the fetus and of a newborn child, situated at the angles of the bones that form the skull.

Mole (*mōl*) [*mola*, a mass]. 1. A proliferative degeneration of the chorionic villi, producing a mass of berry-like vesicles attached to the placenta. It is called *Vesicular Mole* and *Hydatidiform* or *Myxomatous Degeneration of the Placenta.* 2. Also applied to a small, pigmented spot of the skin. **M., Blood,** a mass of coagulated blood and retained fetal membranes and placenta, sometimes found in the uterus after an abortion. **M., Carneous.** See *M., Fleshy.* **M., Cutaneous,** a pigmented spot on the skin. **M., Cystic.** Same as *M., Hydatidiform.* **M., False,** a mass of coagulated blood and exfoliated vaginal mucous membrane discharged occasionally in the course of membranous dysmenorrhea, and not due to a retained product of conception. **M., Fleshy,** the body formed in the uterine cavity when an ovum that has died is retained within the uterus for some time. It may undergo fatty or calcareous degeneration. **M., Hairy.** See *Nævus pilosus.* **M., Hydatid, M., Hydatidiform, M., Hydatoid.** See first definition under *Mole.* **M., Pigmentary.** See *Nævus pigmentosus.* **M., Sanguineous.** Same as *M., Fleshy.* **M., Stone,** a fleshy mole that has undergone calcareous degeneration. **M., True,** one the result of conception. **M., Tubal.** See *Tubal.* **M., Uterine,** a mass of morbid material sometimes contained in the uterus after the death of the product of conception. It is the result of some pathologic process. **M., Vesicular.** Same as *M., Hydatidiform.* **M., White,** a pigmentary nevus that has not yet attained its characteristic color.

Molecular (*mo-lek′-u-lar*) [dim. of *moles*, mass]. Pertaining to, or composed of, molecules. **M. Death** the changes of cellular or intimate structure that result in the disorganization of the vital cell or somacule, and that render impossible a resumption of its original function. See *Somatic Death.* **M. Débris** heterogeneous microscopic particles of degenerated tissue. **M. Heat,** the heat-capacity of a molecule or compound. **M. Motion,** the movements of the

molecules of a substance within that substance. **M. Weight**, the weight of a molecule of any substance as compared with the weight of an atom of hydrogen. It is equal to the sum of the weights of its constituent atoms.

Molecule (*mol'-e-kūl*) [*molecula*; dim. of *moles*, mass]. The smallest quantity into which the mass of any substance can be physically divided and retain its characteristic properties; or the smallest quantity that can exist in a free state. A molecule may be chemically separated into two or more atoms. The integrity and properties of a substance reside in its molecules. **Ms., Crystal**, bodies conceived as existing in solutions of crystalline substances. The presence of such molecules is supposed to be the source of the rotatory power of the solutions. **Ms., Organic.** See *Organic Molecules, Doctrine of.* **Ms., Physical**, the molecules to groups of which rotatory activity has been ascribed.

Moleschott's Potash-solution. A solution for histologic work, consisting of from 35 per cent. to 50 per cent. of potassic hydrate. **M.'s Standard Diet**, a diet for the healthy adult man per diem: Nitrogen 317 grains, carbon 4750 grains, hydrogen 202 grains, sulphur 24 grains, salts 461 grains.

Moli (*mo'-li*) [African]. The tree, *Dracæna schizantha*, of E. Africa. It produces one variety of dragon's blood, *q. v.* See, also, *Pterocarpus.*

Molilalia (*mol-il-a'-le-ah*) [μόλις, with toil; λαλιά, speech]. Difficulty of utterance; stuttering; mogilalia.

Molimen (*mo-li'-men*) [L., *molimen*, endeavor: *pl.*, *Molimina*]. Any effort or attempt. **M., Menstrual**, the menstrual act or function.

Molisch's Test. See *Tests, Table of.*

Molitor (*mol-i'-ter*). Synonym of *Masseter.*

Moll's Glands. See *Gland.*

Mollescence (*mol-es'-ens*) [*mollescere*, to soften]. Softening.

Mollification (*mol-if-ik-a'-shun*). Synonym of *Mollescence.*

Mollin (*mol'-in*) [*mollis*, soft]. A soft soap of potash and cocoanut-oil, proposed as a basis for ointments; it contains an excess of fat. Also a mixture of lard and glycerin, saponified with potassium hydrate and sodium hydrate. Mollin is a kind of soft soap, used in skin-diseases and as a vehicle for various active medicaments. Unof.

Mollinum (*mo-li'-num*) [*mollis*, soft: *gen.*, *Mollini*]. See *Mollin.* **M. hydrargyri**, mollin mixed with mercury; it is about twice the mercurial strength of ordinary *unguentum hydrargyri.*

Mollipilose (*mol-ip-i'-lōs*) [*mollis*, soft; *pilus*, a hair]. In biology, furnished with a soft downy coat.

Mollisin (*mol'-is-in*) [*mollis*, soft]. An ointment composed of yellow wax and spindle-oil.

Mollities (*mo-lish'-e-ēz*) [*mollis*, soft]. Softness. **M. ossium.** See *Osteomalacia.* **M. uteri**, softening of the uterus. It is most common in the cervix during pregnancy, but sometimes affects the body of the womb, both in the pregnant and non-pregnant state.

Mollugo (*mol-u'-go*) [L.]. A genus of herbs. **M. spergula, M. verticillata**, carpet-weed, Indian chickweed; a stomachic, antiseptic and laxative. Unof.

Mollusc or **Mollusk**(*mol'-usk*) [*molluscum*, a shell-fish]. Any member of the *Mollusca*, a class of soft-bodied invertebrates possessing an external and an internal shell. **M.-bodies**, glistening bodies, about the size of epithelial cells, found in the central and older parts of the growths in *Molluscum contagiosum*; they are considered by Neisser, Pfeiffer, and others as parasitic (coccidia), a view opposed by Török, Tommasoli, Israel, and Virchow.

Molluscous (*mol-us'-kus*) [*molluscum*, a shell-fish]. Pertaining to the *Mollusca* or second division of the animal kingdom. Also, pertaining to the disease *Molluscum.*

Molluscum (*mol-us'-kum*) [L.]. A term applied to several diseases of the skin. **M. Acne, M. adenosum.** Synonym of *M. contagiosum.* **M. atheromatosum**, *Molluscum contagiosum* with cystic tumors. **M. cholestericum.** Same as *Xanthoma, q. v.* **M. contagiosum**, *Molluscum epitheliale*, a skin-disease characterized by the formation of pinhead-sized to bean-sized and marble-sized, sessile or pedunculated, yellowish-white or pinkish tumors, rounded or acuminate, imbedded within or projecting from the skin, and having usually a dark-colored point at the apex, from which, on pressure, can be expressed a milky, curd-like, or inspissated cheesy mass. The lesions may be single or multiple, and occur usually in children or young adults upon the face, neck, and genitals. They may attain a very considerable size. The disease is probably due to a parasitic protozoön of the coccidium type. **M. epitheliale.** See *M. contagiosum.* **M. fibrosum**, a disease of the skin characterized by the formation therein of lax fibrous tissue, or of gelatinous tissue in process of becoming fibrous. It begins early in life, and the tumors tend to increase in number and size indefinitely. They are often associated with deficient mental development. The tumors vary in size from a pin's head to an orange, and may be sessile or pedunculated. Their number may reach into the hundreds or thousands. **M. giganteum**, a variety of *M. contagiosum* in which the tumors attain considerable size. **M. pendulum.** Synonym of *M. fibrosum.* **M. porcellanum.** Synonym of *M. contagiosum.* **M. sebaceum.** Synonym of *M. contagiosum.* **M., Sessile.** Synonym of *M. contagiosum.* **M. simplex.** Synonym of *M. fibrosum.* **M. verrucosum.** Synonym of *M. contagiosum.*

Mollusk (*mol'-usk*). See *Mollusc.*

Molops (*mo'-lops*) [μόλωψ, weal: *pl.*, *Molopes*]. A red spot on the skin, such as is seen in certain fevers. The mark of a stroke or stripe upon the skin.

Molt, Moult (*mōlt*) [ME., *mouten*, to molt]. To shed or cast, as the skin, feathers, or hair.

Molybdamaurosis (*mol-ib-dam-aw-ro'-sis*) [μόλυβδος, lead; ἀμαυρόειν, to darken]. Retro-bulbar neuritis due to lead-poisoning.

Molybdamblyopia (*mol-ib-dam-ble-o'-pe-ah*) [μόλυβδος, lead; ἀμβλύς, dulled; ὤψ, eye]. Impairment of vision due to lead-poisoning.

Molybdencephalia (*mol-ib-den-sef-a'-le-ah*) [μόλυβδος, lead; ἐγκέφαλος, brain]. Brain-disease due to lead-poisoning.

Molybdencephalopathia (*mol-ib-den-sef-al-o-path'-e-ah*), **Molybdencephalopathy** (*mol-ib-den-sef-al-op'-ath-e*) [μόλυβδος, lead; ἐγκέφαλος, brain; πάθος, disease]. Brain-disease due to lead-poisoning.

Molybdenterophthisis (*mol-ib-den-ter-off'-this-is*) [μόλυβδος, lead; ἔντερον, intestine; φθίσις, wasting]. A wasting enteric disorder due to lead-poisoning.

Molybdenum (*mol-ib-de'-num*) [μολύβδαινα, graphite; μόλυβδος, lead]. A metal somewhat resembling chromium; symbol, Mo; atomic weight, 96. See *Elements, Table of.*

Molybdepilepsia (*mol-ib-dep-il-ep'-se-ah*) [μόλυβδος, lead; ἐπιληψία, epilepsy]. Epilepsy induced by lead-poisoning.

Molybdo- (*mol-ib'-do-*) [μόλυβδος, lead]. A prefix denoting reference to or connection with lead. In chemistry, signifying composition with the element molybdenum.

Molybdocachexia (*mol-ib-do-kak-ek'-se-ah*) [μόλυβδος, lead; κακός, bad; ἕξις, habit]. A depraved state of

the body due to lead-poisoning; chronic lead-poisoning; plumbism.

Molybdocardialgia (*mol-ib-do-kar-de-al'-je-ah*) [*μόλυβδος*, lead; *καρδία*, heart; *ἄλγος*, pain]. Cardialgia due to lead-poisoning.

Molybdocolic (*mol-ib-do-kol'-ik*) [*μόλυβδος*, lead; *κῶλον*, colon]. Lead-colic; painters' colic.

Molybdodyspepsia (*mol-ib-do-dis-pep'-se-ah*) [*μόλυβδος*, lead; *δυς-*, ill; *πέπτειν*, to digest]. Dyspepsia caused by lead-poisoning.

Molybdonosus (*mol-ib-don'-o-sus*) [*μόλυβδος*, lead; *νόσος*, disease]. Synonym of *Plumbism*.

Molybdoparesis (*mol-ib-do-par'-es-is*) [*μόλυβδος*, lead; *πάρεσις*, paresis]. Partial paralysis, due to lead-poisoning.

Molybdosis (*mol-ib-do'-sis*) [*μόλυβδος*, lead]. Lead-poisoning; plumbism.

Molybdospasmos (*mol-ib-do-spaz'-mos*) [*μόλυβδος*, lead; *σπάσμος*, spasm]. Spasm or cramp produced by lead-poisoning.

Molybdosynolce (*mol-ib-do-sin-ol-'se*) [*μόλυβδος*, lead; *συνολκή*, a drawing together]. Contraction due to lead-poisoning.

Molybdotromos (*mol-ib-dot'-ro-mos*) [*μόλυβδος*, lead; *τρόμος*, tremor]. Tremor due to lead-poisoning.

Molyne (*mol-i'-ne*) [*μολύνειν*, to defile]. The anus.

Molynsis (*mol-in'-sis*) [*μολύνειν*, to defile]. A taint or defilement; miasm.

Momentum (*mo-men'-tum*) [*momen*, *momentum*, a motion]. Amount of force. Also, the quantity of potential energy possessed by a body in motion. It is estimated as the product of its weight, expressed in units of gravity, by its velocity, expressed in units of time. It is usually expressed by the formula $m = wv$, and may be estimated in foot-pounds or kilogrammeters.

Momiscus (*mo-mis'-kus*) [*μώμισκος*]. A molar tooth; the part of a molar tooth that is near the gum.

Momordica (*mo-mor'-dik-ah*) [*mordere*, *momordi*, to bite]. A genus of cucurbitaceous plants, mostly African and Asiatic. **M. bucha**, a species of cucumber native to Brazil. It is a powerful drastic purgative, useful in dropsy. **M. balsamina**. See *Balsam-apple*. Unof.

Momordicin (*mo-mor'-dis-in*). Same as *Elaterin*.

Mon- (*mon-*) [*μόνος*, one]. A prefix denoting *one* or *single*.

Monad (*mon'-ad*) [*μονάς*, a unit]. 1. Any single-celled microörganism, whether of animal or vegetable character; especially any flagellate infusorium (a microscopic animal). 2. See *Quantivalence*.

Monadelphia (*mon-ad-el'-fe-ah*) [*μόνος*, alone; *ἀδελφός*, brother]. One brotherhood; a name applied to certain hermaphrodite flowers.

Monadelphous (*mon-ad-el'-fus*) [*μόνος*, alone; *ἀδελφός*, brother]. In biology, in one brotherhood. Applied to stamens that are united by their filaments into one set.

Monadenoma (*mon-ad-en-o'-mah*) [*μόνος*, one; *ἀδήν*, gland; *ὄμα*, tumor]. A uniglandular adenoma.

Monadiform (*mon-ad'-if-orm*) [*μονάς*, a unit, a *monad*; *forma*, shape]. In biology, resembling a monad.

Monadigerous (*mon-ad-ij'-er-us*) [*μονάς*, a unit, a *monad*; *gerere*, to carry]. In biology, bearing or composed of monads or monadiform cells.

Monadina (*mon-ad-i'-nah*) [*μονάς*, a unit]. The flagellate infusorians, or *monadidæ*; a family of animal microörganisms.

Monadine (*mon'-ad-in*) [*μονάς*, a unit]. Pertaining to or of the nature of a monad.

Monadinic (*mon-ad-in'-ik*) [*μονάς*, a unit]. Belonging to the *Monadina*.

Monadology (*mon-ad-ol'-o-je*) [*μονάς*, a unit; *λόγος*, science]. The doctrine of Leibnitz, Lötze, Zimmermann, and Herbart, according to which the elementary particles of matter are vital forces acting from an internal principle.

Monæ (*mon'-e*) [L.]. Buttocks.

Monamin (*mon'-am-in*) [*μονάς*, a unit; *amin*]. One of a class of chemic compounds derived from ammonia by the replacement of the hydrogen by a monovalent alkyl. See *Amin*.

Monammonic (*mon-am-o'-nik*) [*μόνος*, single; *ammonium*]. Containing one molecule of ammonium.

Monandrous (*mon-an'-drus*) [*μόνος*, single; *ἀνήρ* (*ἀνδρ*), male]. In biology, having but one male; monarsenous.

Monanthemous (*mon-an'-them-us*) [*μόνος*, single; *ἄνθεμον*, a flower]. In biology, bearing but a single flower; monanthous.

Monantherous (*mon-an'-ther-us*) [*μόνος*, single; *ἄνθος*, flower]. In biology, a term applied to a stamen bearing but one anther.

Monanthous (*mon-an'-thus*) [*μόνος*, single; *ἄνθος*, flower]. In biology, producing but one flower.

Monarda (*mo-nar'-dah*) [after N. *Monardès*, a Spanish physician of the sixteenth century]. A genus of N. American labiate plants. **M. fistulosa** L., wild bergamot, **M. didyma**, bee-balm, and **M. punctata**, horsemint; are diaphoretic, carminative, and stimulant. Unof.

Monardella (*mon-ar-del'-ah*) [after *N. Monardès*, a Spanish physician of the sixteenth century]. A genus of some eleven species of fragrant labiate herbs, all Californian, and having the general properties of the mints, pennyroyal, and basil. Unof.

Monardin (*mo-nar'-din*) [N. *Monardès*, a Spanish physician of the sixteenth century], $C_{10}H_{14}O$. A substance much resembling thymol, but derived from the oil of horsemint, *Monarda punctata*.

Monarsenous (*mon-ar'-sen-us*) [*μόνος*, single; *ἄρσην*, male]. In biology, having but one male; monandrous.

Monarthral (*mon-ar'-thral*) [*μόνος*, single; *ἄρθρον*, a joint]. A term applied to a muscle that passes over but one joint, *e. g.*, the brachialis anticus. Its correlative is *disarthral*, applied to a muscle passing over two joints, *e. g.*, the biceps.

Monarthritis (*mon-ar-thri'-tis*) [*μόνος*, single; *ἄρθρον*, a joint; *ιτις*, inflammation]. Arthritis affecting only a single joint.

Monas (*mon'-as*) [*μονάς*, unit]. A genus of minute globose, plastic and free swimming animalcules inhabiting salt and fresh water, especially infusions. In this genus are included the simplest known forms of the typical flagellate infusoria. Early writers consigned to the genus many doubtful or immature micro-organisms, some of which have since been found to belong to the Bacteria, or to be zoöspore stages of Algæ, Palmellaceæ, or other protophytic plants.

Monaster (*mon-as'-ter*) [*μόνος*, single; *ἀστήρ*, star]. In embryology, the mother-star; the fourth, or equatorial stage of karyokinesis. That stage of indirect cell-division or mitosis at which a single star is formed by the arrangement of the chromatin-loops about the equator of the achromatin-spindle.

Monatomic (*mon-at-om'-ik*) [*μόνος*, single; *ἄτομος*, atom]. Having the valence of hydrogen; saturating or saturated by a single monad atom. See *Quantivalence*. **M. Alcohols**, those formed by the substitution in a hydrocarbon of one hydrogen group for one atom of hydrogen.

Monaxial, Monaxonic (*mon-aks'-e-al*, *mon-aks-on'-ik*) [*μόνος*, single; *ἄξων*, axis]. Having a single axis.

Monecious (*mon-e'-shus*) [*μόνος*, single; *οἶκος*, house]. Having male and female organs united in one animal; of plants, having the male and female organs in separate flowers, but on the same plant, as in the cucurbitaceous plants.

Monecism (*mon-e'-sizm*) [*μόνος*, single; *οἶκος*, house]. Hermaphrodism.

Monembryary (*mon-em'-bre-a-re*) [*μόνος*, single; *ἔμβρυον*, an embryo]. In biology, having a single embryo.

Moner, Moneron (*mo'-ner, mon'-er-on*) [*μόνος*, single]. In biology, a non-nucleated unicellular organism of the simplest possible character.

Monera (*mon-e'-rah*) [*μονήρης*, single]. An order or class of minute, marine rhizopods, including some of the lowest forms of animal life.

Moneron (*mon'-er-on*). See *Moner*.

Monerula (*mon-er'-u-lah*) [*μονήρης*, single]. A non-nucleated stage of the impregnated ovum in which it has the form of a simple moner.

Monesia (*mo-ne'-ze-ah*) [origin uncertain]. A vegetable extract from *monesia-bark*, produced by *Chrysophyllum buranhem*, a tree of Brazil. It occurs in irregularly-shaped dark-brown pieces, soluble in water, and with a sweetish, astringent taste. It has been used as a stomachic, alterative, and astringent. Dose gr. v–x. Unof.

Monesin (*mo-ne'-sin*) [*monesia*]. A principle (said to be identical with saponin) obtained from monesia; it is astringent, and is said to be oxytocic.

Money-counters' Disease. A disease of the hands, head, and conjunctivæ of persons handling bank-notes; it is supposed to be due to arsenic-poisoning.

Mongolian Idiocy. See *Idiocy, Ethnic*.

Mongrel (*mung'-grel*) [ME., *mungrel*, mongrel]. "An individual or a breed of animals resulting from repeated crossing or mixture of several varieties; the progeny of varieties, or especially of artificial varieties, as distinguished from the hybrid or cross between two different species."

Monilated (*mon'-il-a-ted*) [*monile*, a necklace]. In biology, having a necklace-like arrangement; moniliform.

Monilethrix (*mo-nil'-eth-riks*) [*monile*, a necklace; *θρίξ*, hair]. An affection of the hair in which nodes can be seen strung regularly or irregularly along the hair-shaft, the internodular portions being relatively colorless, atrophied, and thinned. As distinguished from the nodes of trichorrhexis, a fracture occurs through the thinned and apparently non-pigmented portion of the shaft, the pigmented node representing what is thought to be nearly normal hair-tissue.

Moniliform (*mon-il'-if-orm*) [*monile*, necklace; *forma*, form]. Shaped like a necklace; beaded. Resembling a string of beads. Applied to the shapes of certain hairs, roots, tubers, and other structures. **M. Bronchiectasis,** bead-like dilatations of a bronchial tube, resembling a rosary, the tube between the dilatations retaining its normal size.

Monilithrix (*mo-nil'-ith-riks*). See *Monilethrix*.

Moniodhydrin (*mon-e-od-hi'-drin*) [*μόνος*, single; *ὕδωρ*, water], $C_3H_5I(OH)_2$. A substitution-product of glycerin, occurring in the form of a yellow, syrupy liquid.

Moniodomethane (*mon-e-o-do-me'-thān*) [*μόνος*, single; *methane*], CH_3I. Methylic iodid, a colorless, heavy, ethereal fluid, of the specific gravity of 2.199 at 0° C., and boiling at 43.8° C. (111° F.). Its vapor has been used as an anesthetic, but its decomposition is easy, the irritating effects of iodin being produced.

Moniodophenol (*mon-e-od-o-fe'-nol*) [*μόνος*, single; *ἰώδης*, like a violet; *phenol*], C_6H_4IOH. An iodin-compound or substitution-product of phenol, existing in three isomeric forms.

Monism (*mon'-izm*) [*μόνος*, single]. Any scheme of philosophy, or system of thinking, that aims at deducing all the phenomena of force, matter, life, and action from one principle. In biology, the same as *Monogenesis, q. v.*

Monistic (*mon-is'-tik*) [*μόνος*, single]. Of, or pertaining to, or of the nature of, monism.

Monkey-hand (*munk'-e-hand*). The deformed hand of the early stage of progressive muscular atrophy. The hand presents an appearance of great length; the thumb approaches the index-finger, and is on a line with the other fingers.

Monkshood (*munks'-hood*) [ME., *monk*, monk; ME., *hood*, hood]. See *Aconite*. **M. Prepuce,** a redundant hooded prepuce upon the dorsal aspect of the penis. It is often associated with hypospadias.

Mono- (*mon'-o-*) [*μόνος*, single]. A prefix signifying *one* or *single*.

Monoathetosis (*mon-o-ath-et-o'-sis*) [*μόνος*, single; *ἄθετος*, without place]. Athetosis confined to one limb or one-half of the body.

Monobasic (*mon-o-ba'-sik*) [*μόνος*, single; *basis*, base]. Having one base; applied in chemistry to an acid that enters into combination with a univalent basic radicle to form a neutral salt, or a salt containing one equivalent of a base.

Monoblastic (*mon-o-blas'-tik*) [*μόνος*, single; *βλαστός*, germ]. In biology, applied to the single germ-layer stage of a metazoic embryo. Cf. *Monoplacular*. **M. Theory of Disease,** Nägeli's theory of the origin of miasmatic-contagious diseases, viz.: that they are due to microphytes, which before they can reproduce the disease must undergo a special stage of development in an abnormal earth substratum.

Monoblepharis (*mon-o-blef'-ar-is*) [*μόνος*, single; *βλεφαρίς*, eyelash]. A fungus having only a single posterior flagellum.

Monoblepsia, Monoblepsis (*mon-o-blep'-se-ah, mon-o-blep'-sis*) [*μόνος*, single; *βλέψις*, sight]. That condition in which either eye has a better visual power than both together.

Monobrachius (*mon-o-bra'-ke-us*) [*μόνος*, single; *βραχίων*, arm]. A fetus or person with but one arm.

Monobromacetanilid (*mon-o-brōm-as-et-an'-il-id*). Same as *Antisepsin*.

Monobromated (*mon-o-bro'-ma-ted*) [*μόνος*, one; *βρῶμος*, stench]. Containing one bromin atom; having one component atom of hydrogen replaced by bromin. **M. Camphor.** See *Camphor*.

Monocardian (*mon-o-kar'-de-an*) [*μόνος*, single; *καρδία*, heart]. Having a simple heart, single-chambered or not completely divided, as in vertebrates.

Monocarp (*mon'-o-karp*) [*μόνος*, single; *καρπός*, fruit]. In biology, a plant that bears fruit but once.

Monocarpellary (*mon-o-kar'-pel-a-re*) [*μόνος*, single; *καρπός*, fruit]. In biology, composed of but one carpel.

Monocarpous (*mon-o-kar'-pus*) [*μόνος*, single; *καρπός*, fruit]. In biology: (*a*) applied to plants that bear fruit once a year, as annuals; (*b*) a flower in which but a single ovary, simple or compound, is produced.

Monocelia (*mon-o-se'-le-ah*) [*μονος*, single; *κοιλία*, cavity]. Vertebrates whose encephalic cavity is single; the lancelets.

Monocelic (*mon-o-se'-lik*) [*μόνος*, single; *κοιλία*, cavity]. Having a single hollow cavity.

Monocentric (*mon-o-sen'-trik*) [*μόνος*, single; *κέντρον*, center]. Having but one center; unipolar.

Monocephalous (*mon-o-sef'-al-us*) [*μόνος*, single; *κεφαλή*, head]. In biology, arranged in a single head or head-like cluster.

Monocephalus (*mon-o-sef'-al-us*) [*μόνος*, single; *κεφαλή*, head]. A double monstrosity consisting of a single head with two bodies more or less completely fused.

Monocercous (*mon-o-ser'-kus*) [*μόνος*, single; *κέρκος*, the tail of a beast]. In biology, uniflagellate.

Monocerous (*mon-os'-er-us*) [*μονόκερως*, one-horned]. In biology, having but one horn or horn-like process.

Monochasium (*mon-o-ka'-se-um*) [*μόνος*, single; *χάσις*, separation, chasm: *pl.*, *Monochasia*]. In biology, a cyme with one main axis.

Monochlamydeus (*mon-o-klam-id'-e-us*) [*μόνος*, single; *χλαμύς*, a cloak]. In biology, applied to flowers having but one floral envelop or perianth whorl.

Mono-chloral-antipyrin (*mon'-o-klo'-ral-an-tip-i'-rin*). See *Hypnal*.

Monochlormethane (*mon-o-klor-meth'-ān*). Synonym of *Methyl-chlorid*.

Monochlorphenol (*mon-o-klor-fe'-nol*) [*μόνος*, single; *χλωρός*, green; *phenyl*], C_6H_4ClOH. A derivative of carbolic acid. It is a very volatile liquid, giving off vapors that are heavier than air. A mixture of monochlorphenol, alcohol, eugenol, and menthol has been called *chlorphenol*, and has been used in pulmonary troubles as a bactericide.

Monochorea (*mon-o-ko-re'-ah*) [*μόνος*, single; *χορεία*, dance]. Chorea confined to a single member or to a part of the body.

Monochroic, Monochroitic (*mon-o-kro'-ik, mon-o-kro-it'-ik*) [*μόνος*, single; *χρώς*, color]. Having only one color. Arterial blood is monochroic.

Monochromatic (*mon-o-kro-mat'-ik*) [*μόνος*, single; *χρῶμα*, color]. Having but one color.

Monochromous (*mon-ok'-ro-mus*). Synonym of *Monochromatic*.

Monochrous (*mon-ok'-ro-us*). Synonym of *Monochroic*.

Monocle (*mon'-o-kl*) [*μόνος*, single; *oculus*, eye]. A single lens or eye-glass.

Monoclinic (*mon-o-klin'-ik*) [*μόνος*, single; *κλίνη*, bed]. Pertaining to flowers that have the male and female organs in a single perianth. Also, applied to crystals in which the vertical axis is inclined to one, but is at right angles to the other lateral axis.

Monoclinous (*mon-o-kli'-nus*) [*μόνος*, single; *κλίνη*, bed]. In biology, having both male and female organs in the same flower.

Monococcus (*mon-o-kok'-us*) [*μόνος*, single; *κόκκος*, grain]. A single coccus; one not united in chains or pairs.

Monocotyledonous (*mon-o-kot-il-e'-don-us*) [*μόνος*, single; *κοτυληδών*, a cup-shaped hollow or cavity]. In biology, possessing but one cotyledon or seed-leaf.

Monocranus (*mon-ok'-ran-us*) [*μόνος*, single; *κρανίον*, cranium]. A fetal monster with a single cranium, the face in part double, three or four eyes, the brain in part double.

Monocrotic (*mon-o-krot'-ik*) [*μόνος*, single; *κρότος*, pulse]. Having but a single beat (as the normal pulse) for each cardiac systole; not dicrotic.

Monocrotous (*mon-ok'-ro-tus*). See *Monocrotics*.

Monocular (*mon-ok'-u-lar*). Synonym of *Uniocular*.

Monoculus (*mon-ok'-u-lus*) [*μόνος*, single; *oculus*, eye]. In surgery, a bandage for covering one eye.

Monocyclic (*mon-o-sīk'-lik*) [*μονόκυκλος*, having but one circle]. In biology, arranged in a single whorl.

Monocyst (*mon'-o-sist*) [*μόνος*, single; *κύστις*, cyst]. A tumor made up of a single cyst.

Monocystic (*mon-o-sis'-tik*) [*μόνος*, single; *κύστις*, cyst]. Composed of or containing but one cyst.

Monodactylous (*mon-o-dak'-til-us*) [*μόνος*, single; *δάκτυλος*, finger]. Having only one finger or toe.

Monodelph, Monodelphon (*mon'-o-delf, mon-o-del'-fon*) [*μόνος*, alone; *ἀδελφός*, brother]. In biology, a plant the stamens of which are united into a single group by their filaments.

Monodelphia (*mon-o-del'-fe-ah*) [*μόνος*, single; *δελφύς*, womb]. A class of mammals possessing a single uterus and a single vagina separated from the rectum.

Monoderic (*mon-o-der'-ik*) [*μόνος*, single; *δέρος*, skin]. Composed of a single layer.

Monodermic (*mon-o-der'-mik*) [*μόνος*, single; *δέρμα*, skin]. Having an envelop composed of a single layer.

Monodidymus (*mon-o-did'-im-us*) [*μόνος*, single; *δίδυμος*, twin]. One of twins.

Monodiplopia (*mon-o-dip-lo'-pe-ah*) [*μόνος*, single; *διπλόος*, double; *ὄψις*, sight]. Double vision with a single eye.

Monodisc strobila. See *Strobila*.

Monodont (*mon'-o-dont*) [*μόνος*, single; *ὀδούς*, tooth]. Having but one tooth.

Monoëmbryony (*mon-o-em'-bre-on-e*) [*μόνος*, single; *ἔμβρυον*, embryo]. In biology, having but a single embryo, as certain seeds.

Monoflagellate (*mon-o-flaj'-el-āt*) [*μόνος*, single; *flagellum*, a whip]. Monomastigate; having only one whip-like appendage, as an infusorian.

Monoformin (*mon-o-form'-in*) [*μόνος*, single, *formica*, an ant]. A substitution-compound of glycerin containing the radicle of formic acid. It is a colorless liquid, obtained by the action of oxalic acid and ether upon glycerin.

Monogamous (*mon-og'-am-us*) [*μόνος*, single; *γάμος*, marriage]. Having but one wife or mate; living in pairs. In botany, applied to flowers that have the two kinds of sexual elements isolated from one another or not collected under a single capitulum.

Monogamy (*mon-og'-am-e*) [*μόνος*, single; *γάμος*, marriage]. The marriage of two individuals of opposite sexes.

Monogastric (*mon-o-gas'-trik*) [*μόνος*, single; *γαστήρ*, stomach]. Having only one stomach or belly.

Monogeneous (*mon-o-je'-ne-us*) [*μόνος*, single; *γένος*, race]. Of one race or family. In botany, having but one surface of increase.

Monogenesis (*mon-o-jen'-es-is*) [*μόνος*, single; *γένεσις*, origin]. In biology: (*a*) development of offspring resembling the parent, as distinguished from *metagenesis*; (*b*) development from a single hermaphroditi parent; (*c*) origin of all organisms from a single cell.

Monogenetic (*mon-o-jen-et'-ik*) [*μόνος*, single; *γενετή*, source, beginning, birth]. In biology, exhibiting direct development without alternation of generations or heterogeny, as distinguished from *digenetic*.

Monogenic (*mon-o-jen'-ik*) [*μονός*, single; *γεννᾶν*, to produce]. In biology, producing but one sort of embryo, as distinguished from *diphygenic*.

Monogenism (*mon-oj'-en-izm*) [*μόνος*, single; *γένος*, race]. The doctrine that the members of the human race are descended from one pair only.

Monogenous (*mon-oj'-en-us*) [*μόνος*, single; *γένη*, produce]. In biology, applied to organisms that resemble their parents.

Monoglenous (*mon-o-gle'-nus*) [*μόνος*, single; *γλήνη*, pupil]. Having, or seeing with, but one pupil.

Monogoneutic (*mon-o-gon-u'-tik*) [*μόνος*, single; *γονεύειν*, to produce]. In biology, producing but a single brood during the year.

Monogonoporous (*mon-o-gon-op'-or-us*) [*μόνος*, single; *γόνος*, offspring; *πόρος*, passage]. Having only one genital outlet.

Monogony (*mon-og'-o-ne*) [*μόνος*, single; *γονία*, produce]. In biology, generation among animals which sex is not differentiated.

Monograph (*mon'-o-graf*) [*μόνος*, single; *γράφειν*, write]. A treatise or memoir concerning a single subject.

Monogynecial (*mon-o-jin-e'-se-al*)[*μόνος*, single; *γυνή*, female; *οἶκος*, house]. In biology, applied to fruits that are formed from the pistil of one flower.

Monogyny (*mon-oj'-in-e*) [*μόνος*, single; *γυνή*, female]. In biology, mating with but one female.

Monohemerous (*mon-o-hem'-er-us*) [*μόνος*, single; *ἡμέρα*, a day]. Lasting but a day; ephemeral.

Monohydric (*mon-o-hi'-drik*) [*μόνος*, single; *ὕδωρ*, water]. Containing one atom of hydrogen. Specifically applied to such acids as have a single hydrogen atom replaceable by a basic atom or radicle; and also to alcohols that by oxidation exchange two atoms of hydrogen for one of oxygen, and form acids containing the same number of carbon atoms as the alcohols from which they were derived.

Monoicous (*mon-o'-ik-us*). Synonym of *Monecious*.

Monoideism (*mon-o-i-de'-izm*) [*μόνος*, single; *ἰδέα*, idea]. The domination of a single idea, as in certain cases of hypnotism and insanity.

Monolein (*mon-o'-le-in*) [*μόνος*, single; *oleum*, oil], $C_{21}H_{38}O_3$. A compound of glycerin and oleic acid occurring in crystals.

Monolocular (*mon-o-lok'-u-lar*) [*μόνος*, single; *loculus* a cell or cavity]. Having one cell. Unicellular. Synonym of *Unilocular* and *Monocystic*.

Monomania (*mon-o-ma'-ne-ah*) [*μόνος*, single; *μανία*, madness]. A form of mania or madness in which a single delusion or form of delusion is especially dwelt upon. See *Paranoia*.

Monomaniac (*mon-o-ma'-ne-ak*) [*μόνος*, single; *μανία*, madness]. A person who dwells especially upon one delusion or form of delusion.

Monomastigate (*mon-o-mas'-tig-āt*). Same as *Monoflagellate*.

Monomeniscous (*mon-o-men-is'-kus*) [*μόνος*, single; *μηνίσκος*, a crescent, or concavo-convex]. In biology, applied to such invertebrate eyes as are provided with a single lens, *e.g.*, the central eyes of scorpions and Limulus, as distinguished from *polymeniscous*.

Monomerous (*mon-om'-er-us*) [*μόνος*, single; *μέρος*, part]. In biology, applied to flowers that are constructed on the numerical plan of one; or to single-jointed parts of certain animals.

Monommatous (*mon-om'-at-us*) [*μόνος*, single; *ὄμμα*, eye]. One-eyed.

Monomoria (*mon-o-mo'-re-ah*) [*μόνος*, single; *μωρία*, folly]. Melancholy.

Monomorphic (*mon-o-mor'-fik*) [*μόνος*, single; *μορφή*, form]. In biology: (*a*) applied to a collection of individuals, exhibiting similarity or identity of form; (*b*) applied to species in which the same forms recur one after another with comparatively insignificant individual characters; the opposite of *pleomorphic*.

Monomorpho-cellular (*mon-o-mor'-fo-sel'-u-lar*) [*μόνος*, single; *μορφή*, form; *cellula*, a little cell]. Having but one form of cell; as a monomorpho-cellular myxoma.

Monomorphous (*mon-o-mor'-fus*) [*μόνος*, single; *μορφή*, form]. Having but a single form; not polymorphous.

Monomphalia, Monomphalus (*mon-om-fa'-le-ah, mon-om'-fal-us*) [*μόνος*, single; *ὀμφαλός*, navel]. A double monstrosity united by a common umbilicus.

Monomyous (*mon-o-mi'-us*) [*μόνος*, single; *μῦς*, muscle]. Having only one muscle; applied to certain bivalves, the shells of which are closed by a single muscle.

Mononeurus (*mon-o-nu'-rus*) [*μόνος*, single; *νεῦρον*, nerve]. Having only one nervous system.

Mononoia, Mononœa (*mon-o-noi'-ah, mon-o-ne'-ah*) [*μόνος*, single; *νόος*, mind]. Same as *Monoideism*.

Mononuclear (*mon-o-nu'-kle-ar*). Synonym of *Uninuclear*.

Mononychous (*mon-o-nik'-us*) [*μόνος*, single; *ὄνυξ*, hoof]. Having an uncleft hoof.

Mononym (*mon'-o-nim*) [*μόνος*, single; *ὄνομα*, name]. A name consisting of but a single word. Thus *callosum* is a mononym for *corpus callosum*; *pia*, for *pia mater*; *myel*, for *spinal cord*.

Mononymic (*mon-o-nim'-ik*) [*μόνος*, single; *ὄνομα*, name]. Having but one name.

Monopagia (*mon-o-pa'-je-ah*) [*μόνος*, single; *πάγως*, fixed]. Fixed local pain in the head; clavus hystericus.

Monoparesis (*mon-o-par'-es-is*) [*μόνος*, single; *πάρεσις*, paresis]. Paralysis of a single part of the body, as one limb.

Monopathophobia (*mon-o-path-o-fo'-be-ah*) [*μόνος*, single; *πάθος*, disease; *φόβος*, fear]. Monomaniacal pathophobia.

Monopathy (*mon-op'-ath-e*) [*μόνος*, single; *πάθος*, disease]. Uncomplicated disease of a single organ.

Monopegia (*mon-o-pe'-je-ah*). See *Monopagia*.

Monopetalous (*mon-o-pet'-al-us*) [*μόνος*, single; *πέταλον*, leaf]. See *Gamopetalous* and *Sympetalous*.

Monophagia (*mon-o-fa'-je-ah*) [*μόνος*, single; *φαγεῖν*, to eat]. 1. Desire for a single article of food. 2. The eating of a single daily meal.

Monophasia (*mon-o-fa'-ze-ah*) [*μόνος*, single; *φάναι*, to speak]. A centric disturbance of speech, a form of aphasia, in which speech is limited to a single syllable, word, or sentence.

Monophobia (*mon-o-fo'-be-ah*) [*μόνος*, single; *φόβος*, fear]. 1. Morbid dread of being alone. 2. Fear in itself, or of everything, as a symptom in neurasthenia; abnormal timidity.

Monophosphatid (*mon-o-fos'-fat-id*) [*μόνος*, single; *phosphorus*]. Any phosphatid which contains only one phosphorus radicle. Several such compounds have been discovered in the brain-substance.

Monophthalmia (*mon-off-thal'-me-ah*) [*μόνος*, single; *ὀφθαλμός*, eye]. Synonym of *Cyclopia*.

Monophthalmous (*mon-off-thal'-mos*) [*μόνος*, single; *ὀφθαλμός*, eye]. Single-eyed; also, pertaining to a bandage for one eye.

Monophyletic (*mon-o-fi-let'-ik*) [*μόνος*, single; *φυλή*, tribe]. In biology, derived from a single prototype. **M. Hypothesis,** the doctrine of *Hæckel*, that the various organic lines of animals have descended from a common type.

Monophyllous (*mon-o-fil'-us*) [*μόνος*, single; *φύλλον*, leaf]. In biology, having but one leaf; formed of a single leaf.

Monophyodont (*mon-o-fi'-o-dont*) [*μόνος*, single; *φύειν*, to grow; *ὀδούς*, tooth]. Having only one set of teeth, as is the case with the Cetacea.

Monoplacid (*mon-o-plas'-id*) [*μόνος*, single; *πλακοῦς*, a flat cake]. In biology, applied to an echinoderm having but a single madreporic plate, as distinguished from *polyplacid*.

Monoplacula (*mon-o-plak'-u-lah*) [*μόνος*, single; *πλάξ*, plate, tablet: *pl.*, *Monoplaculæ*]. In embryology, a single-layered germ; a monoblastic discoid embryo.

Monoplasmatic (*mon-o-plaz-mat'-ik*). Synonym of *Monoplastic*.

Monoplast (*mon'-o-plast*) [*μόνος*, single; *πλαστός*, formed, molded]. In biology, any unicellular organism, as a moner or a simple histologic cell.

Monoplastic (*mon-o-plas'-tik*) [*μόνος*, single; *πλάσσειν*, to mould]. A term applied to cells constituted of only one substance.

Monoplastid (*mon-o-plas'-tid*) [*μόνος*, single; *πλαστός*, molded]. An organism or structural element composed of only a single cell.

Monoplegia (*mon-o-ple'-je-ah*) [*μόνος*, single; *πληγή*, stroke]. Paralysis of a single limb or of a single

muscle or group of muscles. **M., Central,** that due to a lesion of the brain. **M., Peripheral,** that due to a lesion of the nerves or of the ganglion-cells of the anterior horns of the spinal cord.

Monopodacephalus (*mon-o-po-das-ef'-al-us*) [*μόνος*, single; *πούς*, foot; *ἀ* priv.; *κεφαλή*, head]. An acephalic monstrosity with but a single foot.

Monopodia (*mon-o-po'-de-ah*). See *Monopus.*

Monopodial (*mon-o-po'-de-al*) [*μόνος*, single; *πούς* (*ποδ*), foot]. In biology, applied to that form of ramification in which all of the branches originate as lateral appendages.

Monopodium (*mon-o-po'-de-um*) [*μονόπους*, one-footed: *pl.*, *Monopodia*]. In biology, an axis of growth that elongates at the apex at the same time that lateral branches are sent out beneath in acropetal succession.

Monoprionidian (*mon-o-pri-o-nid'-e-an*) [*μόνος*, single; *πρίων*, a saw]. In biology, exhibiting a uniserial arrangement of serrations.

Monops (*mon'-ops*). Synonym of *Cyclops.*

Monopsia (*mon-ops'-e-ah*). See *Monophthalmia.*

Monopsychosis (*mon-o-si-ko'-sis*) [*μόνος*, single; *ψύχη*, mind: *pl.*, *Monopsychoses*]. Any kind of monomania or delusional insanity of a fixed type.

Monopus (*mon'-o-pus*) [*μόνος*, single; *πούς*, foot]. 1. A developmental defect consisting in absence of one foot or leg. 2. A one-footed monstrosity.

Monopyrenous (*mon-o-pi-re'-nus*) [*μόνος*, single; *πυρήν*, the stone of a fruit]. In biology, having but one kernel or stone.

Monorchid, Monorchis (*mon-or'-kid, mon-or'-kis*) [*μόνος*, single; *ὄρχις*, testis]. A person who has but one testicle, or in whom one testicle only has descended into the scrotum.

Monorganic (*mon-or-gan'-ik*) [*μόνος*, single; *ὄργανον*, instrument]. Pertaining to a single organ.

Monorrhinous (*mon-or-i'-nus*) [*μόνος*, single; *ῥίς*, nose]. Having a single median nasal cavity.

Monosaccharid (*mon-o-sak'-ar-id*). See *Polysaccharid.*

Monoscelous (*mon-os-el'-us*) [*μόνος*, single; *σκέλος*, leg]. One-legged.

Monose (*mon'-ōs*). See *Carbohydrates, Table of.*

Monosis (*mon-o'-sis*) [*μόνωσις*, separation, isolation]. In biology, the isolation of one organ from the rest.

Monositia (*mon-o-sit'-e-ah*). Synonym of *Monophagia.*

Monosoma, Monosomia (*mon-o-so'-mah, mon-o-so'-me-ah*) [*μόνος*, single; *σῶμα*, body: *pl.*, *Monosomata*]. A double monstrosity with a single body and two heads.

Monosomus (*mon-os'-o-mus*). See *Monosoma.*

Monospasm (*mon'-o-spazm*) [*μόνος*, single; *σπασμός*, spasm]. 1. Spasm affecting limited areas, as one side of the face, a single limb, or a single muscle or muscle-group. 2. An epileptiform seizure confined to one lateral half of the body.

Monosperm (*mon'-o-sperm*) [*μόνος*, single; *σπέρμα*, seed]. In biology, a one-seeded plant.

Monospheric (*mon-o-sfer'-ik*) [*μόνος*, single; *σφαῖρα*, sphere]. Consisting of a single sphere.

Monospondylic (*mon-o-spon-dil'-ik*) [*μόνος*, single; *σπόνδυλος*, a joint of the backbone]. Having a single centrum, as a vertebra.

Monospore (*mon'-o-spōr*) [*μόνος*, single; *σπόρος*, seed]. An unfertilized spore or ovum.

Monosporogony (*mon-o-spōr-og'-o-ne*) [*μόνος*, single; *σπόρος*, seed; *γίγνεσθαι*, to be born]. Development from a single unfertilized spore; parthenogenesis.

Monosporous (*mon-o-spōr'-us*) [*μόνος*, single; *σπόρος*, a seed]. In biology, producing but a single spore, as the hyphæ or asci of certain *Fungi.*

Monostachous (*mon-os'-tak-us*) [*μόνος*, single; *στάχυς*, an ear of corn, a spike]. In biology, producing a single spike.

Monostichous (*mon-os'-tik-us*) [*μόνος*, single; *στίχος*, a line]. In biology, arranged in a single row, rank, series, or layer; the autonym of *diplostichous.*

Monostigmatous (*mon-o-stig'-mat-us*) [*μόνας*, single; *στίγμα*, stigma]. In biology, having but a single stigma.

Monostomatous (*mon-os-to'-mat-us*) [*μόνος*, single; *στόμα*, mouth]. Having only one mouth; applied to a class of *Metazoa* the gastrula of which possesses only one ingestive opening.

Monostylous (*mon-o-sti'-lus*) [*μόνος*, single; *στῦλος*, pillar]. In biology, having but a single style.

Monosy (*mon'-o-se*) [*μόνωσις*, singleness; *μονοῦν*, to make single]. In biology, the abnormal disunion or isolation of organs ordinarily united partially or completely; if congenital it is called *ademsy*, if occurring in parts previously joined *dialysis.*

Monothalamous (*mon-o-thal'-am-us*) [*μόνος*, single; *θάλαμος*, chamber]. Consisting of only one chamber.

Monothelious (*mon-o-the'-le-us*) [*μόνος*, single; *θῆλυς*, female]. In biology, polyandrous; applied to species in which several males serve a single female.

Monotic (*mon-ot'-ik*) [*μόνος*, single; *οὖς*, ear]. Pertaining to but one of the ears.

Monotocous (*mon-ot'-o-kus*) [*μόνος*, single; *τόκος*, birth]. In biology, bearing fruit or producing young but once or but one at a time; uniparous.

Monotonia (*mon-o-to'-ne-ah*) [*μόνος*, single; *τόνος*, tone]. Uniformity of voice; in vocalization, that kind of uniformity that results from paralysis of the laryngeal tensors.

Monotonic (*mon-o-ton'-ik*) [*μονότονος*, of a single form, simple]. In biology, applied to such groups or masses of materials or organisms as are homogenous; being characterized by a single species or a single genus, or even a single family or order; the opposite of *Polymixic, q. v.*

Monotrema (*mon-o-tre'-mah*) [*μόνος*, single; *τρῆμα*, hole: *pl.*, *Monotremata*]. A single aperture. The *Monotremata* form a class of animals including the duckbill, in which the intestinal and the genito-urinary tracts open into a common cloaca.

Monotridymus (*mon-o-trid'-im-us*) [*μόνος*, single; *τρίδυμος*, triple]. A monstrosity consisting of three bodies or having triplicate parts.

Monotrochal (*mon-ot'-ro-kal*) [*μόνος*, single; *τροχός*, wheel]. In embryology, applied to embryos having but a single ciliated band.

Monotypal (*mon-o-ti'-pal*) [*μόνος*, single; *τύπος*, type]. Having but a single type or form, as a monotypal disease or genus.

Monotype (*mon'-o-tip*) [*μόνος*, single; *τύπος*, type]. In biology the sole typical representative of its kind.

Monovalent (*mon-ov'-al-ent*). Same as *Univalent.*

Monoxid (*mon-oks'-id*) [*μόνος*, single; *ὀξίς*, acid]. An oxid containing a single oxygen atom combined either with two univalent atoms or with one bivalent atom.

Monozoic (*mon-o-zo'-ik*) [*μόνος*, single; *ζῷον*, an animal]. In biology, applied to certain unsegmented animals, as *Amphilina, Caryophyllæus,* and *Archigetes* among the *Platodes.*

Monro, Foramen of. See *Foramina, Table of,* and *Porta.* **M., Sulcus of,** a slight furrow dividing the mesal surface of the thalamus of the brain into a dorsal and a ventral area. Also called *Aulix.*

Mons (*monz*) [L.: *pl.*, *Montes*]. 1. A mountain. In anatomy, the *Mons pubis* or the *Mons veneris.* **M. cerebelli.** See *Monticulus.* **M. pubis,** the emi

nence in front of the body and horizontal ramus of the os pubis; it is called also, in the female, *M. veneris*.

M. veneris, the mons pubis of the female.

Monsel's Solution, M.'s Salt. See *Ferrum*.

Monster (*mon'-ster*). See *Monstrosity*.

Monstricide (*mon'-stris-id*) [*monstrum*, monster; *cædere*, to kill]. The killing of a monster.

Monstriferous (*mon-strif'-er-us*) [*monstrum*, monster; *ferre*, to bear]. Producing monsters.

Monstrosity (*mon-stros'-it-e*) [*monstrum*, a monster]. 1. A teratism; a fetus or being with an abnormal development or superfluity or deficiency of parts or some vice of conformation. These may be compound or double, single or simple, according as the monster is composed of the malformations of one or more elementary organisms. 2. Teratism; the abstract quality of being monstrous; congenital deformity. A table of monstrosities is appended. **M., Emmenic,** Raciborski's term for a female child that menstruates during infancy. **M., Parasitic,** a compound monstrosity in which a subsidiary part is nourished by the autosite, or principal organism.

TABLE OF MONSTROSITIES.*

ACCORDING TO GEOFFROY SAINT-HILAIRE, ALTERED BY HIRST AND PIERSOL.

HEMITERATA.

I. ANOMALIES OF VOLUME.

A. OF STATURE.
1. *General Diminution*, as in a dwarf—delayed growth.
2. *General Increase*, as in a giant—precocious development.

B. OF VOLUME, strictly speaking.
1. *Local Diminution.* Affecting—
a. *Regions*, as a limb.
b. *Systems*, as undeveloped muscles.
c. *Organs* as small breasts, stenosis of canals, etc.
2. *Local increase*, affecting—
a. *Regions*, as the head.
b. *Systems*, as the adipose tissue.
c. *Organs*, as large breasts in women, lactiferous breasts in men.

II. ANOMALIES OF FORM. *Single Order*, including—deformed heads; anomalies of shape in the stomach; deformed pelves, etc.

III. ANOMALIES OF COLOR.

A. *Deficiency*, complete, partial or imperfect albinism.
B. *Excess*, complete, partial or imperfect melanism.
C. *Alteration*, as in unusual color of the iris.

IV. ANOMALIES OF STRUCTURE.

A. *Deficiency in Consistency*, as cartilaginous conditions of bones.
B. *Excess in Consistency*, as anomalous ossification.

V. ANOMALIES OF DISPOSITION.

A. BY DISPLACEMENT.
1. *Of the splanchnic organs*, as anomalous direction of heart or stomach, hernias, exstrophy of the bladder, etc.
2. *Of the non-splanchnic organs*, as club-foot, curvature of the spine, misplaced teeth, misplaced blood-vessels, etc.

B. BY CHANGE OF CONNECTION
1. *Anomalous articulations.*
2. *Anomalous implantations*, as teeth out of line.
3. *Anomalous attachments*, as of muscles and ligaments.
4. *Anomalous branches*, as of arteries and nerves.
5. *Anomalous openings*, as of veins into the left auricle, of the ductus choledochus in an unusual situation, of the vagina into the rectum, of the rectum into the male urethra, of the rectum at the umbilicus, cloaca.

C. IN CONTINUITY.
1. *Anomalous imperforations*, as of rectum, vulva, vagina, mouth, esophagus.
2. *Anomalous union of organs*, as of kidneys, testicles, digits, teeth, ribs; adhesion of the tongue to the palate.

D. BY CLOSURE, as in complete transverse septum in the vagina.

E. BY DISJUNCTION.
1. *Anomalous perforations*, as persistence of foramen ovale, ductus arteriosus, urachus.
2. *Anomalous divisions*, as splits, fissures in various organs, hare-lip, hypospadias, fissured tongue, cleft palate, fissured cheek.

VI. ANOMALIES OF NUMBER AND EXISTENCE.

1. *By numerical defect*, as absence of muscles, vertebræ, ribs, digits, teeth, a lung, a kidney, the womb, the bladder, etc.
2. *By numerical excess*, as supernumerary digits, ribs, teeth, breasts, a double uterus.

HETEROTAXIS.

I. SPLANCHNIC INVERSION.
II. GENERAL INVERSION.

HERMAPHRODITES.*

I. TRUE HERMAPHRODITES.
a. *Bilateral hermaphrodites.*
b. *Unilateral hermaphrodites.*
c. *Lateral hermaphrodites.*

II. PSEUDO-HERMAPHRODITES, with double sexual formation of the external genitals, but with unisexual development of the reproductive glands (ovaries and testicles).
a. *Male Pseudo-hermaphrodites* (with testicles).
1. *Internal pseudo-hermaphrodites.* Development of uterus masculinus.
2. *External pseudo-hermaphrodites.* External genitals approach the female type; the monstrosity presents a feminine appearance and build.
3. *Complete pseudo-hermaphrodites* (internal and external). Uterus masculinus with tubes; separate efferent canals for bladder and uterus.
b. *Female pseudo-hermaphrodites* (with ovaries). Persistence of male sexual parts.
1. *Internal hermaphrodites.* Formation of vas deferens and tubes.
2. *External hermaphrodites.* Approach of the external genitals to the male type.
3. *Complete hermaphrodites* (internal and external.) Masculine formation of the external genitals and of a part of the sexual tract.

MONSTERS.

CLASS I.—SINGLE MONSTERS.

ORDER I.—AUTOSITIC MONSTERS.

Genus I,	Species 1. *Ectromelus*	Phocomelus Hemimelus Micromelus Ectromelus
	Species 2,	Symelus Uromelus Sirenomelus
Genus II,	Single species, *Celosoma*,	Aspalasoma Agenosoma Cyllosoma Schistosoma Pleurosoma Celosoma
Genus III,	Species 1. *Exencephalus*,	Notencephalus Proencephalus Podencephalus Hyperencephalus Iniencephalus Exencephalus
	Species 2. *Pseudencephalus*,	Nosencephalus Thlipsencephalus Pseudencephalus
	Species 3. *Anencephalus*,	Derencephalus Anencephalus

*Reproduced with the kind consent of the Publishers, from "Human Monstrosities," By Barton Cooke Hirst, M. D., and George A. Piersol, M. D. Philadelphia: Lea, Brothers & Co., 1892.

*Klebs' classification of hermaphrodites as given by Ahlfeld, is substituted for that of Geoffroy Saint-Hilaire.

Genus IV,
- Species 1. *Cyclocephalus*, ... — Ethmocephalus; Cebocephalus; Rhinocephalus; Cyclocephalus; Stomocephalus
- Species 2. *Octocephalus*, ... — Sphenocephalus; Octocephalus; Edocephalus; Opococephalus; Triocephalus

ORDER II.—OMPHALOSITIC MONSTERS.

Genus I,
- Species 1. *Paracephalus*, ... — Paracephalus; Omacephalus; Hemiacephalus
- Species 2. *Acephalus*, ... — Acephalus; Peracephalus; Mylacephalus
- Species 3. *Asomata*.

Genus II, Single species, *Anideus*.

CLASS II.—COMPOSITE MONSTERS.

ORDER I.—DOUBLE AUTOSITIC MONSTERS.*

A. *Terata katadidyma.*
- Genus I, Diprosopus
- Genus II, Dicephalus
- Genus III, Ischiopagus
- Genus IV, Pygopagus

B. *Terata anadidyma.*
- Genus I, Dipygus
- Genus II, Syncephalus
- Genus III, Craniopagus

C. *Terata anakatadidyma*
- Genus I, Prosopothoracopagus
- Genus II, Omphalopagus
- Genus III, Rhaciphagus

ORDER II.—DOUBLE PARASITIC MONSTERS.

Genus I, .
- Species 1. *Heterotypus*, ... — Heteropagus; Heterodelphus; Heterodymus; Heterotypus; Heteromorphus
- Species 2. *Heteralius*, — Epicomus

Genus II,
- Species 1. *Polygnathus*, ... — Epignathus; Hypognathus; Paragnathus; Augnathus
- Species 2. *Polymelus*, — Pygomelus; Gastromelus; Notomelus; Cephalomelus; Melomelus

Genus III,
- *Endocyma*, ... — Dermocyma; Endocyma

ORDER III.—TRIPLE MONSTERS.

Monstrum (*mon'-strum*). See *Monstrosity.*

Monteggia's Dislocation (*mon-tej'-e-ah*). A form of dislocation of the hip-joint in which the head of the femur is near the anterior superior iliac spine, and the limb is rotated outward.

Monteverde's Sign or Test. See *Death, Signs of.*

Montgolfier's Formula. A formula for estimating the velocity of air. It is as follows: "The velocity in feet per second is equal to eight times the square root of the height through which the body has fallen." This is expressed by the formula.

$$v = 1/\sqrt{2g\left(x - \frac{x}{1 + .002\,(t - t')}\right)}$$

v = The velocity in feet per second.
g = The acceleration due to gravity, 32.18 feet per second.
x = Height of shaft.
t = Internal temperature.
t' = External temperature.
.002 = Co-efficient of expansion for 1° F.

* The third order of Geoffroy Saint-Hilaire, single parasitic monsters, under which name he describes dermoid cysts, is omitted. Forster's classification is substituted, with slight modification, for that of Geoffroy Saint-Hilaire.

Montgomery's Cups. The dilated canals of the uterine tubular glands. They appear as minute projections on the external surface of aborted ova. **M.'s Glands.** Accessory rudimentary milk-glands. (Rein.) See also *Gland.* **M.'s Tubercles.** Same as *M.'s Glands.*

Monthier's Blue. Same as *Prussian Blue.*

Monthlies (*munth'-lez*). See *Menses.*

Monthling (*munth'-ling*) [ME., *month*, month]. An infant one month old.

Monthly (*munth'-le*) [ME., *monethly*, monthly]. Occurring once a month; lasting for a month. **M. Courses.** See *Menses.* **M. Nurse,** a nurse who attends after childbirth.

Monti's Copper Method. A method of staining nerve-cells. See *Stains, Table of.*

Monticulus (*mon-tik'-u-lus*) [L.]. 1. A little elevation. 2. Same as *M. cerebelli.* **M. cerebelli,** the small convex projection on the upper part of the median line of the cerebellum; the central portion of the superior vermiform process.

Montpellier Yellow. Same as *Cassel Yellow.*

Mooltan Sore. Same as *Furunculus orientalis.*

Moon [ME., *moone*, moon]. The satellite of the earth. **M.-blindness,** amblyopia caused by exposure of the eyes to the moon's light during sleep. See also *Menotyphlosis.* **M.-blink,** a temporary evening blindness of the tropics, supposed to be due to sleeping in the moonlight. **M.-eye;** 1. An eye supposed to be affected by the moon. 2. A disease of the eye in horses. **M.-eyed,** dim-eyed; affected with moon-eye. **M.-face,** a full, round face. **M.-flaw,** an attack of lunacy. **M.-madness,** lunacy. **M.-seed.** See *Menispermum.* **M.-sick,** crazy. **M.-stricken, M.-struck.** See *Lunatic.* **M.-stroke,** a neurosis supposed to result from exposure to the rays of the moon.

Moonling (*moon'-ling*) [ME., *moone*, moon]. A lunatic.

Moore's Figure of Eight. A figure-of-eight bandage made of a folded shawl or strip of muslin, and used as a dressing for fracture of the clavicle. **M.'s Method.** See *Treatment, Methods of.* **M.'s Reagent and Test.** See *Tests, Table of.*

Moos-pappe (*mōz-pop-a'*) [Ger.] An absorbent material consisting of a variety of moss, and prepared for use as a surgical dressing.

Moosewood. See *Dirca palustris.*

Moral Insanity. See *Insanity.*

Morand's Disease. Paresis of the extremities. See *Diseases, Table of.* **M.'s Foot,** a foot with eight toes. See *Diseases, Table of.*

Morbi (*mor'-bi*) [L., plural and genitive of *Morbus*]. Of a disease. **Agens morbi,** the cause or agent of disease. **Ens morbi,** the being or essential quality of disease. **Materies morbi,** the substance producing a disease.

Morbid (*mor'-bid*) [*morbidus, morbus*, disease]. Pertaining to disease. **M. Anatomy,** the anatomy of organs or tissues in a state of disease.

Morbidity (*mor-bid'-it-e*) [*morbus*, disease]. The quality of disease or of being diseased. Also the conditions inducing disease. Also the statistics of the diseases in a community at a given period; the sick-rate. **M. and Mortality,** a term expressive of the statistical relations of disease and the death-rate.

Morbiferous (*mor-bif'-er-us*) [*morbus*, disease; *ferre*, to bear]. Conveying or spreading disease.

Morbific (*mor-bif'-ik*) [*morbus*, disease; *facere*, to make]. Causing or inducing disease.

Morbigenous (*mor-bij'-en-us*) [*morbus*, disease; γενναν, to produce]. Producing disease.

Morbility (*mor-bil'-it-e*). Same as *Morbidity*.

Morbilli (*mor-bil'-i*) [dim. of *Morbus*, disease]. See *Rubeola, Measles*.

Morbilliform (*mor-bil'-if-orm*) [*morbilli*, measles; *forma*, form]. Resembling measles.

Morbillous (*mor-bil'-us*) [*morbilli*, measles]. Pertaining to measles.

Morbose (*mor'-bōs*) [*morbosus*, *morbus*, disease]. Diseased.

Morbosity (*mor-bos'-it-e*) [*morbosus*, diseased]. A condition of disease.

Morbus (*mor'-bus*) [L.]. A disease or illness. **M. addisonii.** See *Addison's Disease*. **M. ætatis**, disease peculiar to a certain age. **M. anglicus.** Synonym of *Rachitis*. **M. ampullaceus.** Synonym of *Pemphigus*. **M. animatus**, a parasitic disease. **M. aphrodisiacus, M. aphrodisia.** Synonym of *Syphilis*. **M. apoplectiformis.** Synonym of *Ménière's Disease*. **M. arietis.** Synonym of *Influenza*. **M. articularis.** Synonym of *Gout*. **M. attonitus.** Synonym of *Catalepsy* and also of *Apoplexy*. **M. basedowii.** See *Exophthalmic Goiter*. **M. brightii.** See *Bright's Disease*. **M. bullosus.** Synonym of *Pemphigus*. **M. caducus.** See *Epilepsy*. **M. carinus.** Synonym of *Insolation*. **M. Celsi.** Synonym of *Catalepsy*. **M. cerebralis whytii.** Synonym of acute internal hydrocephalus. **M. ceruleus.** See *Cyanosis, Congenital*. **M. comitialis.** Synonym of *Epilepsy*. **M. costalis.** Synonym of *Pleurisy*. **M. coxarius.** See *Coxalgia*. **M. cucullus.** Synonym of *Whooping-cough*. **M. deificus.** Synonym of *Epilepsy*. **M. divinus, M. divus.** Synonym of *Epilepsy*. **M. dominorum.** Synonym of *Gout*. **M. elephas.** See *Elephantiasis arabum*. **M. erronum**, a deep bronze coloration of the skin resulting from prolonged exposure to the sun's rays or to vicissitudes of climate. **M. fellifluus.** Synonym of *Cholera*. **M. fœdus.** Synonym of *Epilepsy*. **M. gallicus.** Synonym of *Syphilis*. **M. gesticulatorius.** Synonym of *Chorea*. **M. glandulosus.** Synonym of *Glanders*. **M. heracleus, M. heraculeus.** Synonym of *Elephantiasis* and of *Epilepsy*. **M. hispanicus.** Synonym of *Syphilis*. **M. incurvus.** Synonym of *Kyphosis*. **M. indicus.** Synonym of *Syphilis*. **M. infantilis.** Synonym of *Epilepsy*. **M. insputatus.** Synonym of *Epilepsy*. **M. interlunis.** Synonym of *Epilepsy*. **M. ischiadicus.** Synonym of *Sciatica*. **M. italicus.** Synonym of *Syphilis*. **M. luteolus.** Synonym of *Jaundice*. **M. maculosus dieckerhoffii.** A hemorrhagic purpura of horses. **M. maculosus werlhofii.** See *Werlhof's Disease* and *Purpura hæmorrhagica*. **M. magnus.** Synonym of *Epilepsy*. **M. medicorum**, the mania of those who seek the advice of physicians for imaginary diseases. Over-much doctoring. **M. mucosus**, mucous disease; intestinal catarrh. **M. nauticus.** Synonym of *Sea-sickness*. **M. neapolitanus.** Synonym of *Syphilis*. **M. oryzeus.** Synonym of *Asiatic Cholera*. **M. pallidus, M. parthenius.** Synonym of *Chlorosis*. **M. puerperum.** Synonym of *Relapsing fever*. **M. Paxtonii**, a parasitic disease of the hair of the axilla. **M. pilaris.** Synonym of *Trichiasis*. **M. pleuriticus.** Synonym of *Pleurisy*. **M. plumbeus.** Synonym of *Plumbism*. **M. psoadicus.** Synonym of *Psoas Abscess*. **M. regius.** Synonym of *Jaundice*. **M. ruralis.** Synonym of *Ergotism*. **M. sacer.** Synonym of *Epilepsy*. **M. saltatorius.** Synonym of *Chorea*. **M. Sancti Lazari.** Synonym of *Leprosy*. **M. Sancti Valentini.** Synonym of *Epilepsy*. **M. scrophulosus.** Synonym of *Scrofula*. **M. senilis**, the physiologic retrogression frequently seen in old age. **M. sideratus.** Synonym of *Epilepsy*. **M. sonticus.** Synonym of *Epilepsy*. **M. suffocans.** Synonym of *Diphtheria*. **M. suffocatorius.** Synonym of *Diphtheria*. **M. tyrius.** Synonym of *Elephantiasis* and *Leprosy*. **M. virginens, M. virginum.** Synonym of *Chlorosis*. **M. werlhofii.** See *Werlhof's Disease*.

Mordacious (*mor-da'-se-us*) [*mordax*, biting]. Biting, pungent.

Mordant (*mor'-dant*) [*mordere*, to bite]. A substance that fixes the dyes used in coloring textures, or in staining tissues and bacteria. See *Pigments, Colors, and Dyestuffs*.

Mordicancy (*mor'-dik-an-se*) [*mordicare*, to bite]. Pungency; biting quality, as of a drug.

Mordicant (*mor'-dik-ant*). Synonym of *Mordacious*.

Mordication (*mor-dik-a'-shun*) [*mordicare*, to bite]. A burning and stinging inflammatory condition of the skin.

Morel's Ear. See *Ear, Deformities of*, and *Diseases, Table of*. **M.'s Tourniquet**, the first tourniquet known, introduced by Morel in 1674.

Morgagni (*mor-gan'-e*). A noted Italian anatomist of the eighteenth century. **M.'s Caruncle.** The middle lobe of the prostate gland. **M., Cataract of.** See *Cataract*. **M., Columns of.** See *Column*. **M., Foramen of.** See *Foramina, Table of*. **M.'s Fossa.** See *Fossa navicularis*. **M.'s Frenum**, the projection formed by the union of the ileo-colic and ileo-cecal valves. **M., Glands of.** See *Gland*. **M.'s Humor**, same as *M.'s Liquor*. **M., Hydatid of.** See *Hydatid*. **M.'s Lacuna**, one of the depressions of the urethral mucosa into which the urethral glands open. Also, the *Fossa navicularis*. **M.'s Liquor**, the fluid found within the capsule of the crystalline lens after death. **M., Sinus of.** See *Sinus*. **M., Ventricle of.** See *Ventricle*.

Morgan's Method. See *Treatment, Methods of*.

Morgue (*morg*) [Fr.]. A dead-house, a mortuary. A place where unknown dead are exposed for identification.

Mori, Succus; Mori, Syrupus. See *Morus*.

Moria (*mo'-re-ah*) [μωρία, folly]. A form of dementia characterized by talkativeness and childish silliness.

Moribund (*mor'-ib-und*) [*moribundus*, *moriri*, to die]. Dying. Ripe for dissolution.

Moric Acid (*mo'-rik*) [*morus*, a mulberry tree]. 1. A crystalline acid obtained from *Morus alba*. 2. Morin, *q. v.*

Moriform (*mo'-rif-orm*) [*morus*, a mulberry; *forma*, form]. Shaped like a mulberry. **M. Glands.** See *Gland*.

Morin (*mo'-rin*) [*morus*, a mulberry tree], $C_{13}H_8O_6 + 2H_2O$. A coloring-matter found in yellow-wood (*Morus tinctoria*). It decomposes into phloroglucin and resorcin. See *Pigments, Conspectus of*.

Morin's Base. See *Glucosin*.

Morindin (*mo-rin'-din*) [*morus*, the mulberry; *Indicus*, Indian], $C_{28}H_{30}O_{15}$. A crystalline substance found in *Morinda citrifolia*. On decomposition it is said to yield alizarin.

Morindon (*mor-in'-don*) [*morus*, a mulberry; *Indicus*, Indian], $C_{28}H_{10}O_{10}$. A beautiful red substance obtained from *Morindin*.

Moringa (*mo-ring'-gah*) [native Malabar]. A genus of dicotyledonous polypetalous trees. **M. pterygosperma, M. zeylanica**, horse-radish tree, found in the West Indies and the East. The oil of the seeds, the root, and the gum, all have been used in a great variety of diseases, both local and general. Unof.

Morioplasty (*mor'-e-o-plas-te*) [μόριον, part; πλάσσειν, to mold]. Autoplasty; plastic surgery.

Morning (*morn'-ing*) [ME., *morninge*, morning]. The first part of the day. **M. Sickness.** The nausea

of pregnant women, occurring chiefly in the early months of gestation; also, the imitative or sympathetic nausea sometimes experienced by the husband during the wife's early pregnancy; eonosus. **M.-tire.** A peculiar condition seen in melancholia and neurasthenia, in which the patient awakes in the morning from a sound sleep unrefreshed and, in fact, more fatigued than on retiring.

Morocco Leather. See *Leather*.

Morocomium (*mo-ro-ko'-me-um*) [*μωρός*, mad; *κομεῖν*, to care for]. An insane asylum.

Morodochium (*mo-ro-do'-ke-um*) [*μωρός*, silly; *δέχεσθαι*, to receive]. An asylum for the insane.

Morose (*mor-ōs'*) [*morosus*, fretful]. Of a sour temper; sullen.

Morosis (*mo-ro'-sis*) [*μώρωσις*, foolishness]. Insanity.

Morotrophium (*mo-ro-tro'-fe-um*). Synonym of *Moroconium*.

Moroxilic Acid (*mor-oks-il'-ik*) [*morus*, mulberry; *ὀξύς*, acid]. Same as *Moric Acid*.

Morph (*morf*) [*μορφή*, a blotch]. One of the dark spots that occur on the foreheads of blond women suffering from uterine trouble, or who are pregnant.

Morphea, Morphœa (*mor-fe'-ah*) [*μορφή*, a blotch]. *Circumscribed Scleroderma, Addison's Keloid;* the commonest form of scleroderma, occurring usually in young female adults. Its commonest seats are about the breasts and the face and neck, and often it follows the course of the nerve-distribution. It occurs in the form of patches, rounded, ovoid, or irregular in outline; small or large, soft or firm, smooth or shining, pale-yellowish or brownish in color. The lesions are, as a rule, asymmetric. The course of the disease is chronic. The disease may also manifest itself in the form of atrophic, pit-like depressions in the skin, and as lines, streaks, and telangiectases. **M. lardacea,** a form of *Morphea*. **M. maculosa,** a form of morphea characterized by the presence of macules. **M. nigra,** a pigmented form of *Morphea*. **M. tuberosa,** a variety of morphea in which nodules are formed.

Morpheomania (*mor-fe-o-ma'-ne-ah*). Same as *Morphiomania*.

Morphetin (*mor'-fet-in*) [*Morpheus*, god of sleep]. An amorphous, bitter substance resulting when morphin sulphate is boiled with lead peroxid and dilute sulphuric acid.

Morphew (*mor'-fu*). See *Morphea*.

Morphia (*mor'-fe-ah*). See *Morphina*.

Morphic (*mor'-fik*) [*μορφή*, form]. In biology, pertaining to form.

Morphina, Morphin (*mor-fi'-nah, mor'-fin*) [*Morpheus*, god of sleep; *gen.*, *Morphinæ*], $C_{17}H_{19}NO_3$. The name of the principal alkaloid of opium, to which the properties of that drug are chiefly due. It is an anodyne, hypnotic, and narcotic. ¼ gr. corresponds in activity with one grain of opium of average strength. **M. acetas,** soluble in water. Dose gr. $\frac{1}{20}$–j. **M. acetat., Liq.** (B. P.) Dose ♏xx–xl. **M. bromid., M. hydrobromat.,** $C_{17}H_{19}NO_3HBr$. A good sedative narcotic. Dose gr. $\frac{1}{10}$–½. **M. et chloroformi, Tinct.** (B. P.) Dose ♏v–x. **M. hydrochloras,** occurs in silky crystals, soluble in water. Dose gr. $\frac{1}{20}$–j. **M. hydrochlorat., Liq.** (B. P.) Dose ♏x–xl. **Injectio morphinæ hypodermica** (B. P.), contains one grain of the acetate of morphin in each ten minims of water. **M. et ipecacuanhæ, Troch.,** each contains gr. $\frac{1}{10}$ of morphin. **M. Oleatum,** contains morphin 10, oleic acid, 90 parts; for local use. Unof. **M., Pulv., Comp.,** Tully's powder, contains morphin sulphate 1, camphor, licorice, and calcium carbonate, āā, 20 parts. Dose gr. v–xv. **M. sulph., Liq.,** Magendie's solution; contains morphin sulph. gr. xvj to each fl. ℥. Dose ♏x–xv. Unof. **M. sulphas,** acicular crystals, soluble in hot water. Dose gr. ⅛–½. **M., Suppos.** (B. P.), each contains gr. ss morphin. **M., Suppos., cum sapone** (B. P.), each contains gr. ss of morphin. **M. tartras,** $C_4H_6O_6(C_{17}H_{19}NO_3)_2$, used hypodermatically. Dose, gr. $\frac{1}{10}$–½. **M., Trochis.** (B. P.) and **M. et ipecac., Trochis.** (B. P.), each containing gr. $\frac{1}{30}$ of morphin. Dose 1 to 4.

Morphinia (*mor-fin'-e-ah*) [*Morpheus*, god of sleep]. Any disease due to the excessive use of morphin.

Morphinism (*mor'-fin-izm*) [*Morpheus*, god of sleep]. The diseased condition caused by the excessive and habitual use of morphin.

Morphinization (*mor-fin-iz-a'-shun*) [*Morpheus*, god of sleep]. The production of the physiologic effects of morphin.

Morphinomania (*mor-fin-o-ma'-ne-ah*) [*Morpheus*, god of sleep; *μανία*, madness]. A morbid craving for morphin as a stimulant.

Morphinophagia, Morphiophagy (*mor-fin-o-fa'-je-ah, mor-fi-off'-aj-e*) [*Morpheus*, god of sleep; *φαγεῖν*, to eat]. Opium-eating.

Morphiomania (*mor-fe-o-ma'-ne-ah*). Synonym of *Morphinomania*.

Morphiopathy (*mor-fe-op'-ath-e*). Synonym of *Morphinomania*.

Morpho-biologic (*mor-fo-bi-o-loj'-ik*) [*μορφή*, form; *βίος*, life; *λόγος*, science]. Pertaining to the form and biology of an organism.

Morphœa (*mor-fe'-ah*). See *Morphea*.

Morphogenesis (*mor-fo-jen'-es-is*) [*μορφή*, form; *γένεσις*, origin]. See *Morphogeny*.

Morphogeny (*mor-foj'-en-e*) [*μορφή*, form; *γένεια*, generation]. In biology, the genesis of form; the history of the evolution of form.

Morphography (*mor-fog'-ra-fe*) [*μορφή*, form; *γράφειν*, to write]. In biology, systematic investigation of the structure of organisms in the most comprehensive way.

Morpholecithal (*mor fo-les'-ith-al*) [*μορφή*, form; *λέκιθος*, yolk of an egg]. 1. Germinal; formative. 2. Pertaining to the morpholecithus.

Morpholecithus (*mor-fo-les'-ith-us*) [*μορφή*, form; *λέκιθος*, yolk of an egg]. The formative yolk of an egg; the portion of an egg that undergoes segmentation and germination.

Morpholin (*mor'-fo-lin*) [*Morpheus*, god of sleep], C_4H_9NO. A compound formed by heating dioxyethylamin to 160° C. with HCl.

Morphologic (*mor-fo-loj'-ik*) [*μορφή*, form; *λόγος*, science]. Pertaining to the form of organisms or twin parts.

Morphology (*mor-fol'-o-je*) [*μορφή*, form; *λέγειν*, to speak]. The department of biology that deals with form and structure.

Morpholysis (*mor-fol'-is-is*) [*μορφή*, form; *λύσις*, loosing]. Destruction of form.

Morphomania (*mor-fo-ma'-ne-ah*). See *Morphinomania*.

Morphometry (*mor-fom'-et-re*) [*μορφή*, form; *μέτρον*, measure]. The measuring or determining of the forms of organisms.

Morphon (*mor'-fon*) [*μορφή*, form]. In biology, definite morphologic individual element or organism, one of the following categories: *plastid, idorgan* (= *organ, antimere, metamere*), *persona, corm, q.v.*

Morphonomy (*mor-fon'-o-me*) [*μορφή*, form; *νομία*, *νέμειν*, to distribute]. That department of biological science devoted to the investigation of the principles of organic morphology.

Morphonosus (*mor-fon'-o-sus*) [*μορφή*, form; *νόσος*

disease]. An anomalous change in the form of organs or parts.

Morphophyly (*mor-fof'-il-e*) [*μορφή*, form; *φυλή*, a tribe]. The department of phylogeny that deals with form alone.

Morphoplasm (*morf'-o-plazm*) [*μορφή*, form; *πλάσμα*, anything formed or molded]. In biology, Weismann's substitute for the word "protoplasm," to distinguish the vital substance of the cell from that of the nucleus; "*formative plasm*"; "*trophoplasm*" (Nägeli) as distinguished from the "*hereditary plasm*" or "*idioplasm*."

Morphosis (*mor-fo'-sis*) [*μορφόειν*, to form]. Any morbid formation or organic change. In biology, morphogenesis; the assumption of characteristic organic form.

Morphostœchiometry (*mor-fo-stek-e-om'-et-re*) [*μορφή*, form; *στοιχεῖον*, element; *μέτρον*, measure]. A classification of substances, as plants, crystals, etc., based on their external form.

Morphotic (*mor-fot'-ik*) [*μορφή*, form]. Pertaining to, or due to, morphosis; characterized by morphosis; pertaining to anatomic or organic elements. **M. Proteids**, those that become parts of the living cell or that actually enter into the structure of the tissues.

Morphotomy (*mor-fot'-o-me*). Synonym of *Anatomy*.

Morpion (*mor'-pe-on*) [Fr.]. The crab-louse.

Morren's Glands, Morrenian Glands. Three pairs of glandular lateral sacs that enter the posterior portion of the esophagus of the *Lumbricidæ* and related terrestrial *Oligochætæ*; they are also called the lime-secreting glands. See *Gland, Morrenian*.

Morrhua (*mor'-u-ah*) [*morua*, a cod; gen. *Morrhuæ*]. The principal genus of gadoid fishes, including the cod. **M., Oleum**, cod-liver oil. The fixed oil from the livers of the cod-fish, *Gadus morrhua*, and other species of *Gadus*. The best and only official oil is pale-yellow in color, and is usually obtained from drippings. It is an easily assimilated, nutritive food, indicated in tuberculosis, rickets, nervous debility, and strumous skin-diseases. Black coffee and oil of eucalyptus are the best vehicles for its administration. Dose ʒj–ij on a full stomach, or ʒj–ij by inunction. **Glyconin Emulsion**, contains ol. morrhuæ ʒiv, glyceritum vitelli (glyconin) ʒix, spt. ammoniæ arom. ʒj, sherry wine ʒij, acid. phosphoric dil. ʒiv, essent. amygdal. amar. ʒj to Oss of alcohol. Dose ʒij.

Morrhuic Acid (*mor'-u-ik*) [*morua*, a cod], $C_9H_{13}NO_3$. One of the alkaloids of cod-liver oil. See *Morrhuolins*.

Morrhuin (*mor'-u-in*) [*morua*, cod], $C_{19}H_{27}N_3$. One of the alkaloids of cod-liver oil. See *Morrhuolins*.

Morrhuol (*mor'-u-ol*) [*morua*, cod; *oleum*, oil]. An alcoholic extractive derivable from cod-liver oil, of complex, and probably of indefinite chemic structure. It has been proposed as a remedial agent in the place of the oil itself. Dose gr. iij–v, in capsules.

Morrhuolins (*mor'-u-o-linz*) [*morua*, cod; *oleum*, oil]. A general name for the alkaloids of cod-liver oil. These are amylamin, $C_5H_{13}N$; dihydrolutidin, $C_7H_{11}N$; oxycollidin, $C_8H_{11}NO$; morhuin, $C_9H_{27}N_3$; nicomorrhuin, $C_{20}H_{28}N_4$; asellin, $C_{25}H_{32}N_4$; and morrhuic acid, $C_9H_{13}NO_3$. The most active of these are amylamin, oxycollidin, morrhuin, and nicomorrhuin.

Morrison's Pill. A cathartic pill containing aloes, jalap, extract of colocynth, gamboge, rhubarb, and myrrh.

Mors (*morz*) [L.]. Death. **M. nigris.** See *Plague*.

Morsal (*mor'-sel*) [*morsus; mordere*, to bite]. Relating to the cutting or grinding portion of a tooth.

Morsulus (*mor'-su-lus*) [dim. of *morsus*, bite]. A lozenge or tablet.

Morsus (*mor'-sus*) [L.]. A bite. **M. diaboli**, the fimbriated distal extremity of an oviduct, also called the pavilion of the tube. **M. stomachi, M. ventriculi.** Synonyms of *Cardialgia*.

Mortal (*mor'-tal*) [*mortalis*, from *mors*, death]. Liable to death or dissolution; terminating in death; deadly; fatal.

Mortality (*mor-tal'-it-e*) [*mortalitas, mortalis*, from *mors*, death]. The quality of being mortal. Also, the *Death-rate*. **M.-table.** See *Life-table*.

Mortar (*mor'-tar*) [*mortarium*, an urn]. An urn-shaped vessel for containing substances for pulverization, this being accomplished by means of a pestle. It is usually of iron, porcelain, agate, or glass.

Mortariolum (*mor-ta-ri'-o-lum*) [dim. of *mortarium*, an urn]. A small mortar; also an alveolus.

Mortarium (*mor-ta'-re-um*) [L.]. Same as *Mortar*; also the trunk of the body from the neck to the hips.

Mortification (*mor-tif-ik-a'-shun*). See *Gangrene*.

Mortified (*mor'-tif-id*) [*mortificare*, to kill]. Gangrenous; dead.

Mortisection (*mor-tis-ek'-shun*). Synonym of *Autopsy*.

Morton's Affection. Same as *M.'s Foot*. **M.'s Fluid.** See *M.'s Solution*. **M.'s Foot**, a peculiar and painful disorder pertaining to the metatarso-phalangeal joint of the fourth toe. It consists in a local neuritis, from bruising of one or more branches of the external phalangeal nerve; probably due to high-heeled and tight shoes. See *Metatarsalgia* and *Diseases, Table of*. **M.'s Method.** See *Treatment, Methods of*. **M., Plane of.** See *Plane*. **M.'s Solution**, a solution consisting of potassium iodid gr. xxx, iodin gr. x, glycerin ʒj, used for injection in *spina bifida*. **M.'s Toe.** Same as *M.'s Foot*.

Mortuary (*mor'-tu-a-re*) [*mortuarium*, a tomb]. 1. A house or tomb for temporary burial. 2. Relating to death or burial.

Morula (*mor'-u-lah*) [dim. of *morum*, a mulberry: *pl.*, *Morulæ*]. In embryology, the solid "mulberry germ" or mass of "segmentation cells," "blastomeres" or "cleavage cells", which results from the complete segmentation of the vitellus of an ovum.

Morulation (*mor-u-la'-shun*) [*morula*, a little mulberry]. In embryology, the formation of the morula during the process of the segmentation of the egg.

Moruloid (*mor'-u-loid*) [*morula*, a little mulberry; *εἶδος*, like]. Resembling a morula.

Morus (*mo'-rus*) [L.: *gen. Mori*]. Mulberry. **Mori, Succus**, the juice of the ripe fruit of *M. nigra*. It is refrigerant, and may be given in fevers. **M., Syr.** (B. P.) Dose ʒj–ij.

Morvan's Disease. A trophic affection of the skin with pain followed by analgesia, first of one side, then of the other, and then the formation of a succession of whitlows, which are usually painless, and are attended with, or are the result of, necrosis of the phalanges. Muscular atrophy, paresis, contraction of the fingers, and loss of the sensations of heat or cold are other symptoms. Most cases occur between twenty and fifty years of age. See *Diseases, Table of*.

Morve (*morv*). See *Equinia*.

Mosaic (*mo-za'-ik*) [*μουσαϊκός*, mosaic]. Inlaid work made of small pieces inlaid to form a pattern. **M. Gold.** See *Pigments, Conspectus of*. **M. Layer.** See *Mesoretina*. **M. of Muscle-compartments**, the mosaic appearance observed in a striped muscle-fiber when treated with acetic acid.

Moschate (*mos'-kāt*) [*μόσχος*, musk]. Having the odor of moschus, or musk.

Moschatin (*mos'-kat-in*) [*μόσχος*, musk], $C_{21}H_{27}NO_7$. A bitter, brownish substance extracted from *Achillea moschata*.

Moschatous (*mos'-kat-us*). Synonym of *Moschate.*

Moschiferous (*mos-kif'-er-us*) [μόσχος, musk; *ferre*, to bear]. Yielding musk.

Moschocaryon (*mos-ko-kar'-e-on*) [μόσχος, musk; κάρυον, kernel]. Nutmeg.

Moschus (*mos'-kus*) [μόσχος, musk: *gen.*, *Moschi*]. Musk. The dried secretion obtained from the follicles of the prepuce of the musk-deer, *M. moschiferus.* It is always liable to adulteration, but the Chinese musk is considered the best. It is a diffusible stimulant acting on the nervous centers, and is used with advantage in the collapse of typhoid fever and in pneumonia. It is used chiefly as a perfume, the odor being somewhat aphrodisiac. Dose gr. ij–x. **M., Tinct.,** 10 per cent. in strength. Dose ʒj–jss.

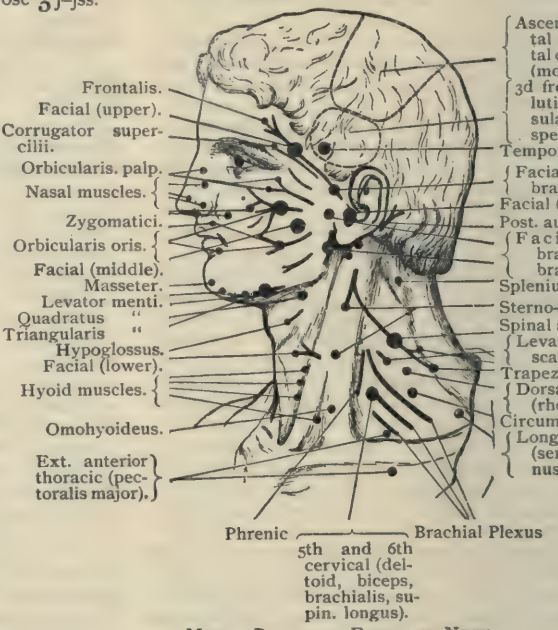
Mosler's Diabetes. See *Diabetes.*

Mosquito (*mus-ke'-to*) [Sp., a little gnat]. See *Culex.* Cf. *Parasites* (*Animal*), *Table of.* **M.-culture,** a culture of blood that has been drawn by a mosquito from a sick person.

Moss (*maws*) [ME., *mos*, moss]. A small herbaceous plant of the natural order *Musci.* **M., Ceylon.** See *Agar-agar.* **M., Club.** See *Lycopodium.* **M., Corsican.** See *Corsican Moss.* **M., Iceland.** See *Chondrus.* **M., Irish.** See *Carragheen.* **M.-starch.** See *Lichenin.*

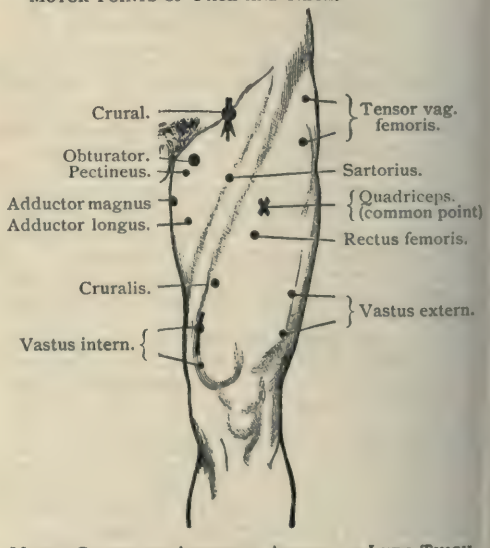
Motatorious (*mo-tat-o'-re-us*) [*motare*, p. p. *motatus*, to move]. In biology, vibratory; applied especially to certain long-legged spiders and crane-flies which have a habit of keeping the body in a state of constant vibration.

Moth (*mawth*) [ME., *mothe*, moth]. See *Chloasma.* **M.-patch.** Synonym of *Chloasma.*



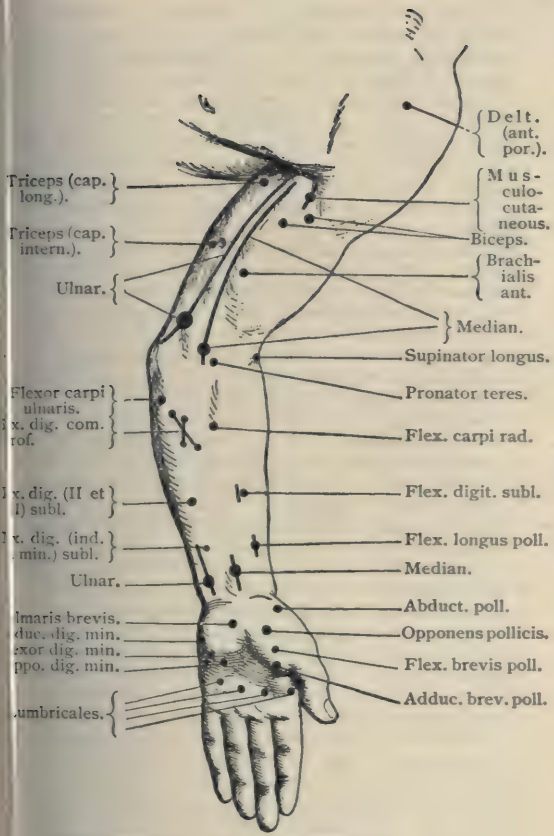
Mother (*muth'-er*) [ME., *moder*, mother]. A female parent. Also, any residue contained in a solution. **M.-cell,** a cell before segmentation, afterward splitting up into smaller cells called *Daughter-cells.* See *Cell.* **M.-liquor,** the liquid that remains after the contained dissolved substances have been partly or wholly crystallized or precipitated in an amorphous condition. **M.'s Mark.** See *Angioma* and *Nævus maternus.* **M.-nucleus.** See *Karyokinesis* and *Nucleus.* **M.-of-pearl Osteomyelitis.** See *Osteomyelitis, Conchiolin.* **M.'s Plaster.** See *Brown Plaster.* **M.'s Salve.** See *Brown Ointment.* **M.-skein.** See *Spirem.* **M.'s-spot,** a nevus. **M.-star,** a stage in karyokinesis. See *Karyokinesis*, and *Star.* **M. of Vinegar,** the gelatinous deposit found in vinegar, and formed by the filaments of *Mycoderma aceti*, so-called because, when introduced into a saccharine solution, it converts the solution into vinegar. **M.-water,** the remaining solution of salts and other substances that fail to crystallize after the spontaneously crystallizable salts have been removed. See *M.-liquor.* **M.-wort,** the herb *Leonurus cardiaca*, an emmenagogue, nervine, and antispasmodic. It is a popular remedy in amenorrhea and hysteria. Dose of the fld. ext. ʒss–ij. Unof. **M.-wreath.** See *Aster*, and *Wreath.*

Motile (*mo'-til*) [*movere*, to move]. Capable of spontaneous motion, as a motile flagellum.

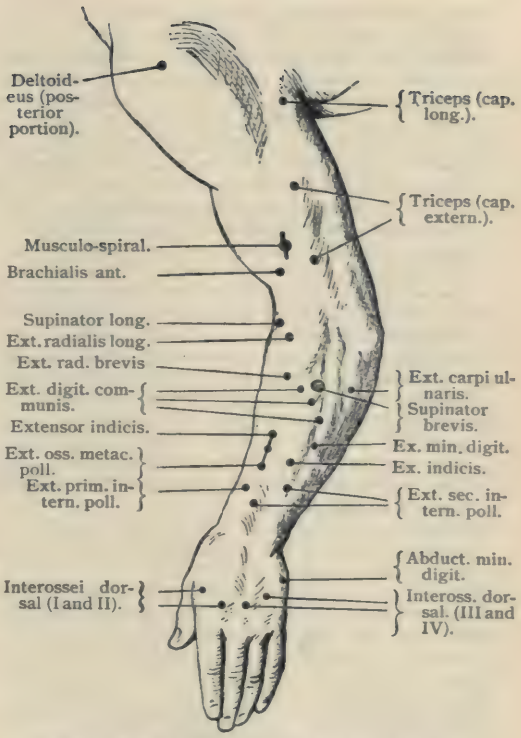


Motion (*mo'-shun*) [*movere*, to move]. Continuous change of position. Also, an evacuation of the bowels. **M., Ameboid,** the motion of certain low forms of living cells. **M., Brownian.** See *Brownian.* **M., Ciliary,** the waving or lashing movement of cells possessed of cilia. **M., Involuntary,** a movement of an organ or part that is not an act of volition. **M., Pendulum,** a to-and-fro movement like that of the pendulum, sometimes observed in the arms in obscure nervous diseases. **M., Voluntary,** any change of position of an organ or part due to an act of the will. See also *Movement.*

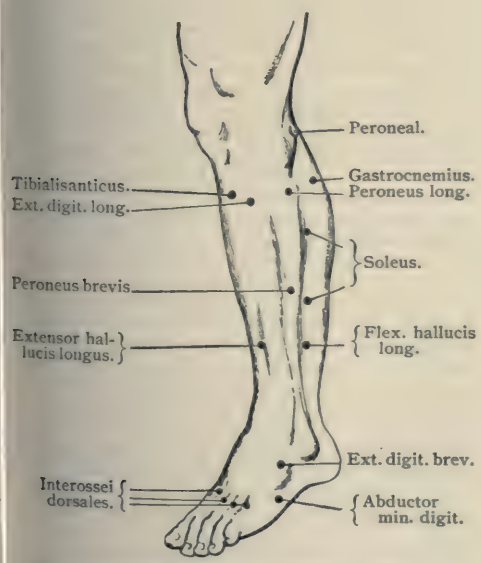
Motive (*mo'-tiv*) [*movere*, to move]. Causing motion; a determining impulse. **M. Force, M. Power,** the moving or impelling force.



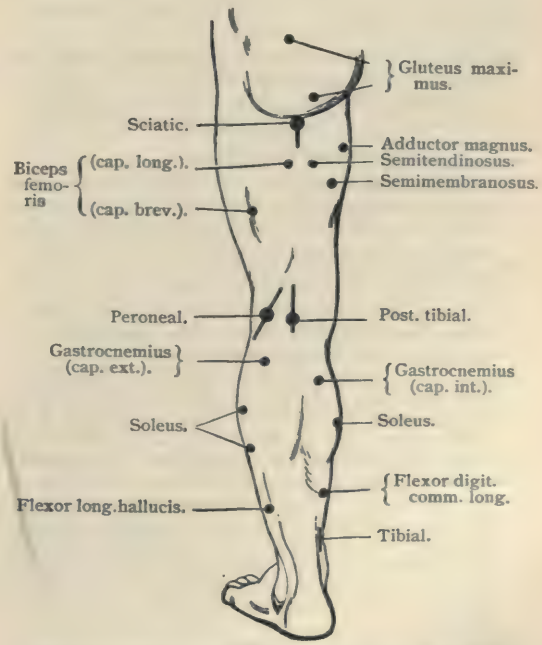
Motor (*mo'-tor*) [*movere*, to move]. A mover. A term applied to various muscles and to a class of nerves. **M. Aphasia.** See *Aphasia.* **M. Area,** the por-



MOTOR POINTS OF FACE AND NECK.



MOTOR POINTS OF ANTERIOR ASPECT OF LEFT THIGH.



Motor Points of Palmar Aspect of Left Arm.

Motor Points of Dorsal Aspect of Left Arm.

Motor Points of Outer Aspect of Left Leg.

Motor Points of Posterior Aspect of Left Thigh and Leg.

tion of the cerebral gyri in each hemisphere surrounding the central fissure, viz.: the precentral and postcentral gyri bordering the fissure, the posterior part of the three frontal gyri, and the paracentral lobule on the mesal surface of the hemisphere. Stimulation of this region by a weak faradic current induces movement in definite parts of the opposite half of the body. **M. Ataxia.** See *Ataxia.* **M. Cell,** a nerve-cell generating motor impulses. **M. Centers.** See *Center.* **M. Fibers,** centrifugal nerve-fibers exciting contraction of muscles. **M. Impulse,** the nerve-influence that results in action. **M. Nerves,** those efferent nerves that carry impulses to the muscles. **M. oculi.** See *Nerves, Table of.* **M. Path,** the path traversed by a motor impulse, from the brain to the muscles. **M. Points,** the points on the surface of the body where the various branches of the motor nerves supplying the muscles may be affected by electricity. See Cuts of Motor-points, pp. 784-785. **M. Vaso-.** See *Vaso-motor.*

Motorial (*mo-to′-re-al*) [*motorius*, motory]. Of or pertaining to motion. **M. End-plate,** an eminence of protoplasm within the sarcolemma where a nerve-fiber pierces the latter. It is produced by a spreading out of the axis-cylinder.

Motorium (*mo-to′-re-um*) [*movere*, to move]. The motor apparatus of the body, both nervous and muscular, considered as a unit.

Motory (*mo′-tor-e*) [*movere*, to move]. Same as *Motor.*

Motosis (*mo-to′-sis*) [μοτός, lint]. A lint-dressing.

Motricity (*mo-tris′-it-e*) [*movere*, to move]. Motor neuricity; the efferent motor impulse sent along a nerve.

Motschutkowski's Method. See *Treatment.*

Mottle (*mot′-l*) [ME., *motteleye*, a mixture of colors]. To mark with spots or blemishes.

Mottled (*mot′-ld*) [ME., *motteleye*, a mixture of colors]. Spotted; marked with patches of dark color; variegated. **M. Kidney.** Same as *Large White Kidney.*

Mottling (*mot′-ling*) [ME., *mottleye*, a mixture of colors]. A spotted condition.

Mouches volantes (*moosh vo-lont′*) [Fr.]. See *Muscæ volitantes.*

Mouilla (*moo-il′-ah*). An excellent liquid potash soap containing a large percentage of glycerin. It is employed in dermatology, and is useful in the treatment of comedones and for cleansing purposes. It does not contain enough fat for use on the face.

Mould, Mold (*mōld*). See *Mold* and *Fungus.*

Moulding-flask. A flask invented for obtaining castings from plaster models, which, on account of irregularity of the teeth or projection of the alveolar border, cannot be drawn from a simple impression in sand.

Mounding (*mown′-ding*) [ME., *mound*, a protection]. The rising in a lump of muscle-fibers when struck by a slight, firm blow. It is observed in the thin and feeble, and in certain diseases, as pulmonary tuberculosis and advanced locomotor ataxia. See *Myoidema.*

Mount (*mownt*) [ME., *mount*, a mountain]. In palmistry, a fleshy cushion in the palm of the hand. **M. of Jupiter,** the name given to the eminence at the root of the index finger. **M. of Mars,** the name given to the upper part of the hypothenar eminence. **M. of Mercury,** the name given to the eminence at the root of the little finger. **M. of the Moon,** the name given to the lower part of the hypothenar eminence. **M. of Saturn,** the name given to the eminence at the root of the middle finger. **M. of the Sun,** the name given to the eminence at the root of the ring-finger. **M. of Venus,** a name given in palmistry to the thenar eminence.

Mountain (*mown′-ten*) [ME., *mountaine*, mountain]. A high elevation of land. **M. Anemia.** See *Ankylostomiasis.* **M. Balm.** See *Eriodictyon.* **M.-blue.** Same as *Azurite.* **M.-climbing.** See *Terrain-cure.* **M. Fever,** a synonym of *Typhoid Fever, q. v.* **M.-green.** Same as *Brunswick Green and Malachite Green.* **M. Laurel.** See *Kalmia.* **M. Sage.** See *Sierra Salvia.* **M. Sickness,** symptoms consequent upon the ascent to high altitudes, consisting of debility, vomiting, tremulousness, headache, loss of muscular power, etc. See *Anoxysmia, Hypsonosus, Mareo.* **M. Tea,** a popular name for *Gaultheria procumbens, q. v.*

Mountaineering Malady. See *Mountain Sickness.*

Mountebank (*mown′-te-bank*) [It., *montambanco*, mountebank]. A quack who prescribes and sells medicines and nostrums in public places. Also called *Quacksalver.*

Mounting (*mown′-ting*) [ME., *mounten*, to mount]. In microscopy, the arrangement of a microscopic object upon some suitable support (slide) and in some suitable medium. **M.-cell,** in microscopy, a ring of card-board, metal, or rubber, for the support of the cover-glass, or to prevent the mounting-medium from spreading when the object is thick. **M.-media,** various fluids, or resins in the fluid state, afterward becoming solid, that are employed in the examination and temporary or permanent preservation of microscopic objects. See also *Stains, Table of.* The most important are as follows: ACETATE OF COPPER, for preserving and mounting green algæ. Acetate of copper 1 grm, glacial acetic acid 1 c.c, camphor-water 250 c.c., glycerin 250 c.c., corrosive sublimate 4 grms. The glycerin is sometimes omitted with advantage, as in the case of *volvox.* ACETATE OF POTASSIUM, used in a strongly concentrated solution; it behaves much as glycerin, but does not dry at the edges and is less refractive. BENZOL, employed as a solvent for Canada balsam and in preparing objects for balsam-mounts, but unfit for use as a medium for preliminary examination, on account of its great volatility. BERGAMOT, OIL OF. Schieffer-decker first recommended this oil as a clearing-agent and mounting-medium; it clears 95 per cent. alcohol preparations and celloidin preparations, and does not attack anilin colors. CANADA BALSAM. This should be deprived of certain volatile products before using. Solutions free from chloroform are to be preferred, especially for bacteria. Baumgarten recommends equal parts of Canada balsam and oil of cloves. Pure xylol answers equally well. Owing to the high refractive index of Canada balsam (1.53), bacteria are poorly defined in it. CARBOLIC ACID. One of the best agents for clearing and temporary examination of tissues. It is best used in concentrated solution in alcohol, when it clears instantaneously even very watery preparations. For clearing sections imbedded in celloidin, use a mixture of xylol and carbolic acid in equal parts. CAUSTIC POTASH. A very useful clearing-agent in moderately strong (5 per cent.) solutions, for the examination of plant-sections. If sections are to be permanently mounted, they should be washed in water, passed through dilute alcohol, and mounted in glycerin. CEDAR-OIL. On account of its refractive index, which resembles that of crown-glass; this is the most widely-used fluid for homogeneous immersion objectives. It is miscible with chloroform-balsam and with castor oil. It clears tissues in 95 per cent. alcohol without shrinkage, and does not extract anilin stains. It is, therefore, one of the most valuable of all media for preliminary examinations. CHLOROFORM, employed in preparing objects for mounting and sometimes as a solvent for balsam; but it is not to be recommended, as it tends to destroy the staining

especially in bacterial preparations. CLOVES, OIL OF. This has a tendency to form very convex drops, and to render tissues brittle; sometimes this is considered advantageous in minute dissections. It clears objects better than balsam, and may be used in connection with balsam-mounts; but, as it dissolves celloidin, it should not be used for sections imbedded in that medium. It darkens with age, and is commonly adulterated with phenol, which may be detected by *Fluckiger's* test: *i. e.*, shake the suspected oil with fifty parts of hot water, slowly evaporate the aqueous portion to a small bulk, and test it with a drop of ammonia and a pinch of chlorid of lime. If phenol be present, a green color is developed, which changes to a permanent blue color. COPAL VARNISH. Pale copal varnish, of the consistency of oil, is recommended as a substitute for Canada balsam. For very large sections it is very useful, makes no bubbles, and it dries so hard, if slightly warmed, as to stand wiping and dusting with a soft brush. By its use large and expensive cover-glasses may be dispensed with. CREASOTE (*Stieda's Method*). A very useful clearing-agent and temporary mount for watery sections. Rinse the sections in water; bring them upon the slide; remove the water by means of blotting-paper; add a drop of creasote at the side; when clear, draw off the creasote in the same way and replace with dammar. CSOKOR'S CEMENT FOR GLYCERIN-MOUNTS. Pure Venice turpentine is poured into some melted wax upon a water-bath until a portion taken out on a glass rod becomes stiff at once and does not stick to the hand. DAMMAR, used as a substitute for Canada balsam. Gum dammar dissolved in benzol, or xylol, about 100 grms. of dammar to 100 c.c. of benzol. DAMMAR AND MASTIC, much used as a substitute for Canada balsam. *First solution:* Gum dammar 100 grms., oil of turpentine 200 c.c. Dissolve and filter. *Second solution:* Gum mastic 50 grms., chloroform 200 grms. Mix the two solutions. FARRANT'S MEDIUM, recommended because tissues mounted in it preserve their normal appearance, and in that it is more convenient than glycerin, as it dries at the edges and fixes the cover-glass. Tissues may be mounted in it directly from water, but it is better that they be soaked for a time in dilute glycerin. Formula: Dissolve 1 grm. of arsenious acid in 200 c.c. of distilled water. In this fluid dissolve, at the ordinary temperature, 130 grms. of gum acacia, with frequent stirring; add 100 c.c. of glycerin; mix. Filter the solution through fine Swedish paper upon which has been deposited a thin layer of talc. GLYCERIN. When this is used as a mounting-medium, the best quality should be employed. A mixture of equal parts of water and glycerin is often preferred. As a mounting-medium for plant-tissues, the best preparation is glycerin and acetic acid in equal parts, boiled and filtered. For specimens stained in carmin, the glycerin should be acidulated with one per cent. of formic or acetic acid. GLYCERIN-JELLY. This is a mixture of glycerin and pure gelatin; it is liquid at the temperature of boiling water, and solidifies on cooling. Specimens should generally be saturated with glycerin before mounting. Goodale gives the following formula: One part of gelatin is soaked in six parts of water for two hours, seven parts of glycerin are added, and one part of carbolic acid is added to the whole. The mass is heated for fifteen minutes with constant stirring, and then filtered through glass-wool in a hot funnel. All of the ingredients must be absolutely pure. Wrap the cork of the bottle containing the jelly in a thin piece of linen which has been dipped in pure carbolic acid. Another formula is the following: Soften 25 grms. (6.4 ʒ) of gelatin in cold water. Warm the gelatin over a water-bath; add 5 c. c. (1.3 fʒ) of white of egg, to clarify. Do not heat above 75° or 80° C. (167° or 176° F.). Pass through a hot filter, mix with an equal volume of glycerin, and add 5 grms. (1.3 ʒ) of chloral hydrate. GLYCERIN-SOLUTION. Glycerin 10 parts, glucose 40 parts, spt. of camphor 10 parts, distilled water 140 parts. Mix and filter. The advantage of this medium is that it possesses the refractive index 1.37 in the yellow ray. GOLD SIZE, employed as a sealing for glycerin and potash mounts. HOYER'S MEDIUM. (*a*) For *anilin preparations:* A filtered solution of selected white gum-arabic in a 50 per cent. aqueous solution of acetate of potassium or acetate of ammonium. (*b*) For *carmin preparations* and *hematoxylin preparations:* The same as the first, but a concentrated solution of chloral hydrate, to which has been added from 5 to 10 per cent. of glycerin, is substituted for the solution of potassium or ammonium. It is recommended by Strasburger for plant-tissues. LAVDOWSKY'S MEDIUM, for mounting sections. It also clears somewhat. It consists of gum-sandarac 30 grms., dissolved in absolute alcohol 50 c.c. A thin solution may also be made by diluting with an equal quantity of absolute alcohol. MASKENLACK. An adhesive varnish prepared in Germany for securing the edges of cover-glasses when mounting-media lacking tenacity are used. MIKROSKOPIRLACK. A German varnish employed for securing the edges of cover-glasses when mounting-fluids lacking tenacity are used. SHELLAC. This is frequently employed in building up cells or securing the edges of cover-glasses. It may be best used in alcoholic solution, to which a few drops of castor oil are added to prevent brittleness. It may be tinged with the anilin dyes. SMITH'S (HAMILTON) HIGH-INDEX MOUNTING-FLUID FOR DIATOMS. In two (2) fluid drams of glycerin-jelly, made in the usual way, dissolve in the cold ten (10) drams of chemically-pure stannous chlorid. When the solution is complete, bring to the boil for a few minutes and filter while hot. The fluid must be used hot. This is done by simply heating the slide at the time of mounting. It has a refractive index (approximately) of 2.40. The color is equal to that of old yellow balsams. Diatoms mounted in it show with wonderful clearness. TURPENTINE, used as a clearing-agent, as a solvent for balsam, and as a medium for the temporary examination of sections. Its refractive index is such as to render it a valuable medium. *Thickened Turpentine* (the *verharztes Terpentinöl* of German writers), which is prepared by exposing rectified turpentine in thin layers to the air for several days, does not shrink alcohol preparations, as does the ordinary spirit. WHITE LEAD (*with oil*), used in building up cells and sealing mounting-media that lack tenacity. XYLOL, used in preparing objects, and as a solvent for Canada balsam. It is suitable as a medium for preliminary examination, on account of its great solubility. XYLOL-BALSAM. Canada balsam dissolved in xylol is used as a medium in mounting microscopic objects.

Moussena (*moo'-se-nah* or *moo-se'-nah*) [African]. The bark of *Albizzia anthelminthica*, a good-sized shrub of Abyssinia. It is said to be an efficient teniacide, acting without purging, nauseating, or producing colic. See *Acacia*.

Moussenin (*moo'-sen-in*) [*moussena*]. The alkaloid found in *Moussena* bark. It was discovered by Theil in *Albizzia anthelminthica*, and resembles saponin. It is also spelled *mussenin*.

Moustache (*mus'-tash*). See *Mustache* and *Mystax*.

Mouth (*mowth*) [ME., *mouth*, mouth]. The proximal

terminus of the alimentary canal extending from the lips to the pharynx. The cavity in which mastication takes place. Also, the termination of any canal. **M.-breather,** a person who habitually breathes through the mouth. **M.-breathing,** respiration through the oro-pharynx instead of, as normally, through the naso-pharynx. **M.-protector,** an appliance used to protect the lips and cheeks in using the discs with the dental engine. **M., Sore.** See *Aphtha* and *Stomatitis*. **M.-wash,** a gargle; any liquid preparation for the mouth and fauces.

Mouvement de manège [Fr.]. A form of forced movement in which the animal runs about in a circle; it is seen in certain cases of vivisection in which the semicircular canals of the internal ear have been divided.

Movement (*moov'-ment*) [*movere*, to move]. A motion or action. See *Motion*. **M., Acquired,** one acquired after much practice and the exercise of voluntary control. **M., Ameboid,** that resembling the movement of the ameba. It consists of a change in form by the throwing out of processes called pseudopods, the rest of the protoplasm flowing into the processes. It is observed in certain unicellular organisms and in leukocytes. See *Motion, Ameboid*. **M., Associated,** an involuntary movement in one part when another is moved voluntarily. **M., Brownian,** a physical phenomenon observed in aggregations of minute particles, and consisting of a rapid, oscillating movement without change of the relative position of the moving particles. See *Brownian*. **M., Ciliary,** the movement of the processes of ciliated cells or of the cilia of organisms. It is a rapid movement, generally in one direction. **M., Circus,** a type of manége movement [*q. v.*], in which the animal executes rapid circular movements or somersaults. It is produced experimentally by injury of the striatum, of the thalamus, or of the crus of one side. **M.-cure.** See *Kinesitherapy*. **M., Febrile,** febrile changes of temperature. **M., Fetal,** the muscular movements of the fetus in utero. **M., Forced,** unsymmetric movement of the body from unilateral injury of the motor centers or the conducting paths, as in the following: **Index M.,** when the cephalic part of the body is moved about the stationary caudal part; **Rolling M.,** when the animal rolls on its long axis. **M., Molecular.** Synonym of *Brownian Movement*. **M., Sarcodic.** Synonym of *M., Ameboid*.

Mower's Mite. See *Leptus autumnalis*.

de Mowre's Hypothesis. See *Life*.

Moxa (*moks'-ah*) [Chin. and Jap.]. A term used to designate combustible organic matter which, by burning in contact with the skin, produces a deep-seated eschar. The Chinese moxa consists of bundles of *Artemisia*. In modern surgery, rolls of cotton half an inch in diameter, impregnated with niter ʒj to ʒ viij of water are used. Cobwebs are also employed. Unof. **M.-bearer,** or **Porte-moxa,** an instrument for applying the moxa.

Moxiburium (*moks-ib-u'-re-um*). See *Moxibustion*.

Moxibustion (*moks-ib-us'-chun*) [*moxa*, moxa; *urere*, to burn]. The application of the actual cautery by means of the moxa. See *Byssocausis*.

Moxosphyra (*moks-os-fi'-rah*) [*moxa*, moxa; σφῦρα, hammer]. A hammer heated in boiling water and applied to the skin for purposes of counter-irritation.

Mucago (*mu-ka'-go*) [*mucus*, mucus]. Mucus; mucilage.

Mucamid (*mu'-kam-id*) [*mucus*, mucus; *amid*], $C_6H_{12}N_2O_6$. A crystalline substance isomeric with saccharamid.

Mucate (*mu'-kāt*) [*mucus*, mucus]. A salt of mucic acid.

Mucedin (*mu'-se-din*) [*mucus*, mucus]. A nitrogenous substance obtained by alcohol from gluten-fibrin; when freshly precipitated it is a yellowish-white slimy mass, with a silky luster. It is readily soluble in 60–70 per cent. alcohol, also in dilute acids and alkalies. See *Gluten* and *Mucin*.

Mucedo (*mu-se'-do*). Synonym of *Mucus*.

Mucic Acid (*mu'-sik*). See *Acid*.

Muciferous (*mu-sif'-er-us*) [*mucus*, mucus; *ferre*, to bear]. Producing or secreting mucus.

Mucific (*mu-sif'-ik*). Synonym of *Muciferous*.

Mucifluxus (*mu-sif-luks'-us*) [*mucus*, mucus; *fluere*, to flow]. A mucous discharge.

Muciform (*mu'-sif-orm*) [*mucus*, mucus; *forma*, form]. Resembling mucus.

Mucigen (*mu'-sij-en*) [*mucus*, mucus; γεννᾶν, to produce]. A hypothetic mucigenous substance of goblet-cells.

Mucigenous (*mu-sij'-en-us*) [*mucus*, mucus; γεννᾶν to produce]. Producing or secreting mucus.

Mucilage (*mu'-sil-ij*) [*mucilago*, mucilage]. See *Mucilago*. **M.-cell,** one of those plant-cells that secrete mucilage, owing to a change in the contents of the cell, to a disorganization of the cell-wall, or to both causes.

Mucilaginous (*mu-sil-aj'-in-us*) [*mucilago*, from *mucus*, mucus]. Pertaining to mucilage or gum. **M. Glands.** See *Gland*.

Mucilago (*mu-sil-a'-go*) [L.: gen., *Mucilaginis: pl., Mucilagines*]. A mucilage. In pharmacy, a thick, viscid liquid obtained by extracting the soluble mucilaginous principles of certain plants in water. There are four official *mucilagines*, besides three in the "National Formulary."

Mucin (*mu'-sin*) [*mucus*, mucus]. A glucosid, a compound of a proteid with a carbohydrate called animal gum, the characteristic substance in mucus, occurring also in saliva, bile, mucous tissue, synovia, etc. Decomposed it yields leucin and tyrosin. It is insoluble in water, and is precipitated by alcohol and acetic acid.

Mucinaginous (*mu-sin-aj'-in-us*). Same as *Mucigenous*.

Mucinogen (*mu-sin'-o-jen*) [*mucus*, mucus; γεννᾶν, to produce]. The antecedent principle from which mucin is derived.

Mucinoid (*mu'-sin-oid*) [*mucus*, mucus; εἶδος, like]. Resembling mucin.

Mucinuria (*mu-sin-u'-re-ah*) [*mucus*, mucus; οὖρον, urine]. The presence of mucin in the urine.

Muciparous (*mu-sip'-ar-us*) [*mucus*, mucus; *parere*, to bring forth]. Secreting or producing mucus.

Mucitis (*mu-si'-tis*) [*mucus*, mucus; ιτις, inflammation]. Inflammation of any mucous membrane; also, blenorrhea.

Mucocele (*mu'-ko-sēl*) [*mucus*, mucus; κήλη, tumor]. A mucous tumor or distention of the lacrymal sac.

Muco-colitis (*mu-ko-ko-li'-tis*) [*mucus*, mucus; κῶλον, colon; ιτις, inflammation]. Inflammation of the mucous membrane of the colon.

Mucocolpos (*mu-ko-kol'-pos*) [*mucus*, mucus; κόλπος, vagina]. A collection of mucus in the vagina.

Mucoderm (*mu'-ko-derm*) [*mucus*, mucus; δέρμα, skin]. The corium of a mucous membrane.

Mucoenteritis (*mu-ko-en-ter-i'-tis*) [*mucus*, mucus; ἔντερον, intestine; ιτις, inflammation]. Inflammation of the mucous membrane of the intestine.

Mucoglobulin (*mu-ko-glob'-u-lin*) [*mucus*, mucus; *globulus*, a ball]. Any one of a certain group of protoplastic substances, of which *plastin* is an example.

Mucoid (*mu'-koid*) [*mucus*, mucus; εἶδος, like]. Resembling mucus.

Muconic Acid (*mu-kon'-ik*) [*mucus*, mucus], $C_6H_8O_4$. A crystalline acid obtained from mucic acid.

Mucopeptone (*mu-ko-pep'-tōn*) [*mucus*, mucus; πέψις, digestion]. A form of peptone produced in gastric digestion when mucus is present together with certain albuminoids.

Muco-purulent (*mu-ko-pu'-ru-lent*) [*mucus*, mucus; *purulentus*, purulent]. Containing mucus mingled with pus.

Muco-pus (*mu'-kō-pus*) [*mucus*, mucus; *pus*, pus]. Mucus mingled with pus; mucus containing many leukocytes.

Mucor (*mu'-kor*) [L., mold]. 1. Moldiness; mustiness. 2. Mucus. 3. A genus of fungi. **M. aspergillus**, a species yielding dark-brown spores. **M. corymbifer**, found in the cerumen of the external auditory meatus. **M. mucedo**, the species that induces alcoholic fermentation. It is said to be found in the blood and sputa of patients suffering from measles. **M. vulgaris.** Same as *M. mucedo*.

Mucosa (*mu-ko'-sah*) [*mucus*, mucus]. The mucous membrane or its corium.

Mucose (*mu'-kōs*). Synonym of *Mucous*.

Mucoserous (*mu-ko-se'-rus*) [*mucus*, mucus; *serum*, serum]. Both mucous and serous; containing mucus and serum.

Mucosin (*mu'-ko-sin*) [*mucus*, mucus]. An albuminoid substance derived from mucus—isomerous with keratin; it is said by some to be simply mucin.

Mucoso-saccharin (*mu-ko'-so-sak'-ar-in*) [*mucosus*, mucous; *saccharum*, sugar]. An uncrystallizable sugar.

Mucous (*mu'-kus*) [*mucosus*, from *mucus*, mucus]. Containing or having the nature of mucus. A term applied to those tissues that secrete mucus. **M. Casts**, a term given to the casts found in the feces in cases of *Membranous Enteritis*. See also *Cylindroids*. **M. Catarrh**, catarrhal inflammation of a mucous membrane. **M. Disease**, a synonym of entero-colitis, especially in children. **M. Fever.** See *Fever*. **M. Ligament.** See *Ligament*. **M. Membrane.** See *Membrane*. **M. Patch**, a flattened, indurated, moistened surface, covered with a grayish-white exudation, occurring in syphilis, secondary or congenital, at points where folds of skin come in contact. **M. Râle**, a soft, moist crackling heard over the lungs in certain diseased states. See *Râles, Table of*. **M. Tissue**, myxomatous tissue.

Mucro (*mu'-kro*) [L., a sharp point, especially of a sword: *pl.*, *Mucrones*]. In biology, an angular prominence, a tip, spine, point, or process, as the apex of a Chiton shell.

Mucronate (*mu'-kro-nāt*) [*mucronatus*, pointed]. Narrowed to a point. In biology, applied to a leaf that is abruptly tipped with a small, soft point. **M. Cartilage**, the ensiform cartilage.

Mucroniform (*mu-kro'-nif-orm*) [*mucro*, sharp point; *forma*, form]. Shaped like a mucro.

Mucronule (*mu'-kro-nūl*) [dim. of *mucro*, a sharp point]. In biology, a small mucro.

Muculent (*mu'-ku-lent*) [*mucus*, mucus]. Rich in mucus.

Mucuna (*mu-ku'-nah*) [Braz.]. A genus of leguminous herbs. **M. pruriens**, cowhage; the hairs of the pods of the plant were formerly much used as a vermifuge for ascarides. It is very irritant to the intestinal mucous membrane, and applied to the skin excites intense itching, inflammation, and pustulation. It was administered in the form of an electuary, of which a teaspoonful or more was given, followed by a brisk purge. Unof.

Mucus (*mu'-kus*) [L.]. The viscid liquid secretion of mucous membranes, composed essentially of mucin holding in suspension desquamated epithelial cells, leukocytes, etc.

Mud [ME., *mud*, mud]. Moist, soft earth. **M.-bath.** See *Bath*. **M.-fever**, in veterinary medicine, the *scratches*, *q. v.*

Mudar (*mu'-dar*) [E. Ind.]. The root-bark of various Asiatic species of *Calotropis* (*C. gigantea*, *C. procera*, *C. hamiltoni*); it is alterative, tonic, diuretic, sudorific, and emetic. Unof.

Mudarin (*mu'-dar-in*) [E. Ind., *mudar*]. A bitter principle from mudar; it is said to be tonic, emetic, and alterative. Uncf.

Muga Silk. See *Silk*.

Mugrela, Tincture of. A tincture of the seeds of *Nigella sativa*, formerly used as a carminative.

Muguet (*mu-gwa'*) [Fr.]. Thrush; aphtha; parasitic stomatitis.

Mugwort (*mug'-wert*) [ME., *mugworte*, mugwort]. The leaves and tops of *Artemisia vulgaris*, having therapeutic properties similar to those of wormwood. See *Absinthium*. Dose of the fld. ext. ♏xx–℥j. Unof.

Mühlhäuser's Method. See *Sputum, Methods of Examination*.

Mulatto (*mu-lat'-o*) [Sp., *muleto;* dim. of *mulè*, a mule]. The offspring of a negro mother and a white father, or a white mother and a negro father. The term is also loosely applied to other and all degrees of intermixture. According to the classification adopted and recognized in the French slave-colonies, the people of color were supposed to represent a *whole* of 128 parts white and 128 parts black. Nine different varieties of mixed race were recognized; but between each of these there exist a vast number of intermediate shades and interblendings for which no classification was attempted, or could be made, even in theory:—

	Parts.	
	White.	Black.
1. The *sacratra*, nearest of all to the pure negro type, may be the result of 5 combinations, and may have	8– 16	112–120
2. The *griffe*, result of 5 combinations, . .	21– 32	96–104
3. The *capre*, or *marabou*, result of 5 combinations, ...	40– 48	80– 88
4. The *mulâtre* (mulatto), result of 12 combinations, ...	56– 70	58– 72
5. The *quarteron* (quadroon), result of 20 combinations, ...	71– 76	32– 57
6. The *mêtis*, result of 6 combinations, . .	104–112	16– 24
7. The *mamelouc*, result of 5 combinations,	116–120	8– 12
8. The *quarteronné*, result of 4 combinations, ...	122–124	4– 6
9. The *sang-mêlé* (lit. "mixed blood"), the result of 4 combinations, ...	125–127	1– 3

Mulberry (*mul'-ber-e*) [ME., *mulbery*, mulberry]. See *Morus*. **M. Calculus**, a large, rough urinary calculus of oxalate of lime. It often attains a considerable size, has a rough, irregular surface, and is of a dark color. It is very hard, and on section presents an angular structure, with dark-colored laminæ, which are very compact, and are often marked with fine parallel lines. The nucleus most commonly consists of a mixture of urates, uric acid, and oxalate of lime. **M. Mass.** See *Morula*. **M. Rash**, the eruption of typhus fever. **M. Rob.** See *Rob*. **M. Tongue.** See *Strawberry Tongue*.

Mulder's Angle. See *Angle*. **M.'s Hypothesis** or **Theory**, a theory concerning the origin of albumin-

oids; the theory published in 1838 by Mulder, that albuminous bodies are practically derivatives from one substance, termed by him *protein;* but it was soon shown that this theory was erroneous, and it has been generally abandoned. Cf. *Protein*. **M.'s Reagent,** a reagent for the detection of sugar in the urine. It consists of carmin, indigo, and an alkaline solution. See *Tests, Table of.*

Muley (*mu'-le*) [origin uncertain]. Hornless; applied to cattle.

Muliebrity (*mu-le-eb'-rit-e*) [*muliebritas; mulier*, woman]. Womanliness; puberty in the female.

Mullein (*mul'-en*). See *Verbascum.*

Müller, Canal of. See *Duct.* **M., Duct of.** See *Duct.* **M.'s Fibers,** the supporting fibers of the retina running transversely to its layers. See also *Fiber.* **M.'s Fluid,** a fluid used for hardening tissues. Its composition is as follows: Potassium bichromate, 2 to 2.5 parts; sodium sulphate, 1 part; water, 100 parts. It should be used in large quantities, renewed at the end of twelve hours, then every third day until the hardening is completed. Then wash well in water and preserve in alcohol. The color which the fluid imparts to tissues that have been preserved in it can be discharged by hydrate of chloral. **M.'s Ganglia.** See *Ganglia, Table of.* **M.'s Larva,** one of the free-swimming embryos of certain polyclad flat-worms (*Thysanozoön* and *Yungia*). **M.'s (Johannes) Law,** the tissue of which a tumor is composed has its type in the tissues of the animal body, either in the adult or in the embryonic condition. **M., Lid-muscle of,** bundles of non-striped muscle forming the tarsal portion of the fibrous extensions of the tendon of the levator palpebræ. **M.'s Muscles.** See *Muscles, Table of.* **M.'s Net.** See *Net.* **M.'s Ring,** the spurious internal os uteri. It marks the termination of the cervical mucous membrane. **M.'s Ring-muscle,** certain fibers of the ciliary muscle lying near the ciliary border, and abnormally developed in hyperopia. See *Muscles, Table of.*

Müllerian Cyst. See *Cyst.*

Mulley (*mūl'-e*) (origin uncertain). A term applied to cattle which are deprived of horns. Cf. *Muley.*

Mulomedicina (*mu-lo-med-is-i'-nah*) [*mulus*, mule; *medicina*, medicine]. Veterinary medicine.

Multi- (*mul'-te-*) [*pl.* of *multus*, much]. A Latin prefix signifying many.

Multiaxial (*mul-te-aks'-e-al*) [*multus*, many; *axis*, an axis]. In biology, having several lines of growth.

Multicapsular (*mul-tik-ap'-su-lar*) [*multus*, many; *capsula*, a little box]. In biology, composed of many capsules.

Multicellular (*mul-tis-el'-u-lar*) [*multus*, many; *cellula*, cell]. Many-celled.

Multicornate (*mul-tik-or'-nāt*) [*multus*, many; *cornua*, horn]. Having many horns.

Multicostate (*mul-tik-os'-tāt*) [*multus*, many; *costa*, a rib]. In biology, having many ribs.

Multicuspid, Multicuspidate (*mul-tik-us'-pid, mul-tik-us'-pid-āt*) [*multus*, many; *cuspis*, a point]. Having several cusps. **M. Teeth,** the molar teeth.

Multidentate (*mul-te-den'-tāt*) [*multus*, many; *dens*, a tooth]. A term applied in biology to parts armed with many teeth or tooth-like processes.

Multidigitate (*mul-te-dij'-it-āt*) [*multus*, many; *digitus*, a finger]. Having many digits or digitate processes.

Multiembryonate (*mul-te-em'-bre-on-āt*) [*multus*, many; ἔμβρυον, embryo]. In biology, having several embryos.

Multifetation (*mul-tif-e-ta'-shun*) [*multus*, many; *fœtatio*, fetation]. Pregnancy with more than one or two fetuses.

Multifid (*mul'-tif-id*). See *Multifidus spinæ*, in *Muscles, Table of.*

Multiflagellate (*mul-tif-laj'-el-āt*) [*multus*, many; *flagellum*, a whip]. In biology, having many flagella.

Multiflorous (*mul-tif-lo'-rus*) [*multus*, many; *flos*, a flower]. In biology, bearing many flowers.

Multifoliate (*mul-tif-o'-le-āt*) [*multus*, many; *folium*, a leaf]. In biology, bearing many leaves.

Multiform (*mul'-tif-orm*). Same as *Polymorphous.*

Multiganglionate (*mul-te-gang'-le-on-āt*) [*multus*, many; *ganglion*, ganglion]. Having many ganglia.

Multigravida (*mul-tig-rav'-id-ah*) [*multus*, many; *gravidus*, pregnant]. A pregnant woman who has passed through one or more pregnancies.

Multigyrate (*mul-te-ji'-rāt*) [*multus*, many; *gyrus*, a gyre]. Having many gyres, as the brain.

Multilaminate (*mul-til-am'-in-āt*) [*multus*, many; *lamina*, a thin layer]. Having many laminæ.

Multilobate (*mul-te-lo'-bāt*) [*multus*, many; λοβός, a lobe]. Composed of many lobes.

Multilobular (*mul-te-lob'-u-lar*) [*multus*, many; *lobus*, a lobe]. Many-lobed.

Multilocular (*mul-te-lok'-u-lar*) [*multus*, many; *loculus*, a locule or cell]. Many-celled; polycystic.

Multimammes (*mul-tim-am'-ēz*). Same as *Polymastia.*

Multinervate (*mul-tin-ur'-vāt*) [*multus*, many; *nerva*, nerve]. 1. Having many nerves. 2. Same as *Multicostate.*

Multinuclear (*mul-tin-u'-kle-ar*) [*multus*, many; *nucleus*, kernel]. Having several or many nuclei.

Multiovulate (*mul-te-o'-vu-lāt*) [*multus*, many; *ovulum*, an ovule]. In biology, bearing many ovules.

Multipara (*mul-tip'-ar-ah*) [*multus*, many; *parere*, to bring forth]. One bearing several offspring at a birth; more commonly, a gravid woman who has already borne one or more children.

Multiparient (*mul-tip-a'-re-ent*) [*multus*, many; *parere*, to bring forth]. Giving birth to several young.

Multiparity (*mul-tip-ar'-it-e*) [*multus*, many; *parere*, to bring forth]. The condition, state, or fact of being multiparous.

Multiparous (*mul-tip'-ar-us*) [*multus*, many; *parere*, to bring forth]. Relating to a multipara.

Multipartite (*mul-tip-ar'-tit*) [*multus*, many; *partire*, to divide]. In biology, composed of many parts, as leaves.

Multipede (*mul'-tip-ēd*) [*multus*, many; *pes*, a foot]. In biology, having many feet.

Multipetalous (*mul-tip-et'-al-us*). Same as *Polypetalous.*

Multiple (*mul'-tip-l*) [*multiplus*, manifold]. Having many parts or relations. **M. Fetation,** the presence of two or more fetuses in the uterus. **M. Gestation.** Same as *M. Fetation.* **M. Neuritis.** See *Neuritis.* **M. Pregnancy.** Same as *M. Fetation.* **M. Sclerosis.** See *Sclerosis.* **M. Staining,** the staining of tissues with more than one staining-agent.

Multiplicator, Multiplier (*mul'-tip-lik-a-tor, mul'-tip-li-er*) [*multiplicare*, to multiply]. An instrument for detecting an electric current and for measuring its strength.

Multipolar (*mul-tip-o'-lar*) [*multus*, many; *polus*, a pole]. Having more than one pole; applied also to nerve-cells having more than one process.

Multiradiate (*mul-te-ra'-de-āt*) [*multus*, many; *radius*, a ray]. In biology, having many rays.

Multisect (*mul'-tis-ekt*) [*multus*, many; *secare*, to cut]. In biology, divided into many sections.

Multiseptate (*mul-tis-ep'-tāt*) [*multus*, many; *sæpire*, to fence in]. In biology, having many partitions multilocular.

Multistaminate (*mul-tis-tam'-in-āt*) [*multus*, many; *stamen*, stamen]. In biology, bearing many stamens.

Multisulcate (*mul-tis-ul'-kāt*) [*multus*, many; *sulcus*, a furrow]. Having many sulci, as the brain.

Multituberculate (*mul-te-tu-ber'-ku-lāt*) [*multus*, many; *tuberculum*, a tubercle]. Having many tubercles.

Multivalent (*mul-tiv'-al-ent*) [*multus*, many; *valere*, to be worth]. In chemistry, combining with more than two atoms of a univalent element.

Multivorous (*mul-tiv'-o-rus*) [*multus*, many; *vorare*, to devour]. Voracious.

Mumble (*mum'-bl*) [ME., *momelen*, to mumble]. To speak in a low, inarticulate manner.

Mumbo-jumbo (*mum'-bo-jum'-bo*). See *Jumbai Bean*.

Mummification (*mum-if-ik-a'-shun*). See *Gangrene, Dry*.

Mummified (*mum'-if-īd*) [*μούμια*, mummy; *facere*, to make]. Dried, like a mummy. **M. Pulp**, the condition of the dental pulp when it is affected by dry gangrene.

Mummy (*mum'-e*) [*μούμια*, mummy]. An embalmed body, especially a body embalmed after the Egyptian process.

Mumps [D., *mompen*, to mumble]. Idiopathic parotiditis; an acute infectious disease of children, between the ages of five and fifteen, characterized by swelling of the parotid and other salivary glands, running a definite course, and generally terminating in recovery. The period of invasion is less than twenty-four hours, and the left parotid is usually first involved. When the disease occurs at or near puberty there is often a metastasis to the testes, or to the ovaries or mammæ in the female; rarely atrophy of the testis follows. The disease is most common in males and in the spring of the year. See *Parotiditis*.

Mundificant (*mun-dif'-ik-ant*), **Mundificative** (*mun-dif'-ik-at-iv*) [*mundus*, clean; *facere*, to make]. 1. Having the power to cleanse, purge, or heal. 2. A cleansing or healing agent.

Mungeet (*mun-gēt'*). See *Pigments, Conspectus of*.

Mungo (*mung'-go*). See *Shoddy*.

Munich (*mu'-nik*) [Ger.]. The capital of Bavaria. **M.-Frankfort Angle**, in craniometry, the facial angle having for its base a line joining the lower border of the orbit and the upper border of the external auditory meatus, and for its facial line one tangent to the most prominent portion of the alveolar border of the inferior maxilla. **M. Plane.** See *Plane*.

Munjeet (*mun-jēt'*). Same as *Mungeet*.

Munjistin (*mun-jis'-tin*) [Hind., *manjit*, a drug used for dyeing red], $C_8H_6O_3$. A coloring-substance obtained from *Rubia munjista*. It is nearly related in composition to purpurin and alizarin.

Munk's Visual Center. In the dog, the lateral convex portion of the occipital lobe of the cerebrum.

Mural (*mu'-ral*) [*murus*, wall]. Pertaining to a wall. **M. Gestation, M. Pregnancy**, pregnancy in the uterine extremity of a Fallopian tube.

Mures articulorum (*mu'-rēz ar-tik-u-lo'-rum*). See *Corpora libera articulorum*.

Murexan (*mu-reks'-an*) [*murex*, the purple-fish], $C_4H_5N_3O_3$. A substance identical with dialuramid, derived from murexid.

Murexid (*mu-reks'-id*) [*murex*, the purple-fish], $C_8H_8N_6O_6 + H_2O$. The ammonium salt of purpuric acid, used as a dye-stuff. It occurs in four-sided plates or prisms of a gold-green color. It dissolves in water with a purple-red color, but is insoluble in alcohol and ether. Upon the production of this substance depends the murexid test. See *Tests, Table of*, and *Pigments, Conspectus of*.

Murexoin (*mu-reks'-o-in* [*murex*, the purple-fish], $C_{12}H_{16}N_6O_6$. A derivative of amalic acid, obtained by treating the acid with water and ammonia.

Muriate (*mu'-re-āt*)[*muria*, brine]. An old name for a chlorid.

Muriated (*mu'-re-a-ted*) [*muria*, brine]. Containing chlorin or a chlorid. **M. Tincture of Iron**, tinctura ferri chloridi. See *Ferrum*.

Muriatic (*mu-re-at'-ik*) [*muria*, brine]. Pertaining to sea-salt. **M. Acid.** See *Acid, Hydrochloric*.

Muricate (*mu'-rik-āt*) [*muricatus*, pointed]. In biology, roughened with short rigid excrescences, spines, or prickles.

Muricatohisped (*mu-rik-at-o-his'-pid*) [*muricatus*, pointed; *hispidus*, hispid]. In biology, covered with rigid hairs or bristles.

Muriform (*mu'-rif-orm*) [*murus*, wall; *forma*, shape]. In biology, wall-like; resembling courses of bricks in a wall. **M. Body.** Same as *Morula*.

Murmur (*mer'-mer*) [L., a murmur]. A mimetic name for the sounds heard on auscultation, and caused by the friction of moving currents or gliding surfaces in the organs of circulation and respiration. See *Bruit*. **M., Accidental.** See *M., Hemic*. **M., Anemic.** See *M., Hemic*. **M., Aneurysmal**, the aneurysmal bruit. See *Bruit*. **M., Aortic**, one generated at the aortic orifice of the heart. **M., Arterial**, the sound made by the arterial current. **M. aurium.** Synonym of *Tinnitus aurium*. **M., Bellows**, the *bruit de soufflet*, heard in cardiac hypertrophy and in mitral insufficiency. **M., Blood.** See *M., Hemic*. **M., Brain**, a systolic sound heard over the anterior fontanel, especially in young rickety children. **M., Cardiac**, any one of those adventitious sounds produced by the abnormal passage of blood through the cavities and orifices of the heart or by perverted cardiac action. The names given to these murmurs correspond with the period of the cardiac cycle in which they occur. A murmur that occurs in the period of auricular systole, is termed *presystolic* or *auricular systolic;* one that occurs in the period of ventricular systole, *systolic;* one that occurs during the diastole of the ventricles, *diastolic;* and should the murmur immediately follow the first or second sound, *post-systolic* or *post-diastolic* respectively. In relation to their seat of generation, cardiac murmurs are designated *mitral, aortic, tricuspid*, and *pulmonary*. All murmurs should be timed by the carotid pulse, not by their relation to the apex-beat. Murmurs are most frequently caused by some change in one of the cardiac valves or orifices, allowing of a reflux of the blood, or obstructing its onward progress. A table of organic endocardial murmurs is appended. **M., Cardio-pulmonary**, an abnormal sound produced outside of the heart, but closely resembling one due to organic valve-disease. Such murmurs are of frequent occurrence, and may be due to displacement of, or pressure upon, the heart, effusion into the pleural cavity, changes in the pleura of the precordial area, changes in the lung overlying the heart, or changes in the pericardium. **M., Cephalic**, a murmur heard at different parts of the scalp in anemia; it is probably venous in origin. **M., Diastolic**, a murmur occurring during the diastole of the heart. **M., Direct**, a murmur produced by obstruction to the blood-current as it is passing in its normal direction. **M., Duroziez's**, the double murmur sometimes heard in the femoral artery in aortic regurgitation. See also *Signs and Symptoms, Table of*. **M., Dynamic**, one resulting from tumultuous and irregular action of the heart. **M., Endocardial**, a murmur produced within the cavities of the heart. **M., Exocardiac**, a murmur connected with the heart, but occurring outside of its

TABLE OF ORGANIC ENDOCARDIAL MURMURS.

Name, in Order of Frequency.	Time.	Site of Maximum Intensity.	Line of Conduction.	Direct or Indirect.	Basic or Apical.	Lesion.	Quality.
Mitral regurgitant.	Systolic.	Center of mitral area, above and to left of apex.	At sixth rib opposite apex, a line drawn from the anterior fold of axilla to lower angle of left scapula.	Indirect mitral.	Apical.	Mitral insufficiency or incompetence.	Variable; usually soft, blowing, bellows; may be distinctly musical.
Aortic obstructive.	Systolic.	Mid-sternum or to right of it, opposite third rib or second interspace.	Toward top of sternum, and along aorta and its large branches.	Direct aortic.	Basic.	Aortic obstruction or constriction.	Usually loud and harsh. Harshness is one of its distinguishing characteristics.
Aortic regurgitant.	Diastolic.	Mid-sternum opposite upper border of cartilage of third rib.	Down sternum to ensiform cartilage.	Indirect aortic.	Basic.	Aortic insufficiency or incompetence.	Soft, blowing, sometimes rough, frequently musical. It has the greatest area of diffusion of all the cardiac murmurs.
Mitral obstructive.	Presystolic.	Over mitral area around the apex.	Usually not transmitted.	Direct mitral.	Apical.	Mitral obstruction or constriction.	Generally low-pitched, rough, churning, grinding, or blubbering. Subject to great variation of pitch and quality.
Tricuspid regurgitant.	Systolic.	Mid-sternum just above the ensiform cartilage.	Toward the epigastrium.	Indirect tricuspid.	Apical.	Tricuspid insufficiency or incompetence.	Low-pitched, superficial, blowing, soft, faint.
Tricuspid obstructive.	Presystolic.	Mid-sternum opposite the cartilage of fourth rib.	Not transmitted.	Direct tricuspid.	Apical.	Tricuspid obstruction or constriction.	Undetermined.
Pulmonary obstructive.	Systolic.	Second interspace to the left of sternum or at the level of third rib.	Upward a short distance and to left of sternum, stopping abruptly.	Direct pulmonary.	Basic.	Pulmonary obstruction or constriction.	Often harsh and audible over the whole precordia; may be very faint; at times bellows.
Pulmonary regurgitant.	Diastolic.	Second left interspace.	Down left edge of sternum to ensiform cartilage.	Indirect pulmonary.	Basic.	Pulmonary insufficiency or incompetence.	Soft and blowing.

cavities, as the pericardial friction-sounds. **M., False.** See *M., Cardio-pulmonary.* **M., Flint's,** a murmur occasionally heard at the apex in aortic regurgitation. It is sometimes presystolic in time and is probably due to the fact that on account of the extreme ventricular dilatation the valves cannot be forced back against the walls and produce a relative narrowing of the auriculo-ventricular orifice. See also *Signs and Symptoms, Table of.* **M., Friction,** a murmur or sound produced by the rubbing of two inflamed serous surfaces upon each other. **M., Functional,** a cardiac murmur occurring from excited action of the heart, without any structural change in the valves or orifices. **M., Funic.** See *Souffle, Funic.* **M., Heart,** an abnormal sound produced within the heart or on its surface. **M., Hemic,** a sound believed to be due to changes in the quality or amount of the blood, and not to lesions of the vessels or valves. **M., Indirect,** one produced by the blood flowing in a direction contrary to the normal current. **M., Inorganic,** a murmur not due to valvular lesions; a hemic or a functional murmur. **M., Metadiastolic.** See *M., Post-diastolic.* **M., Metallic,** a murmur sometimes heard in pneumo-pericardium, and having a metallic quality. **M., Mitral,** a murmur produced at the mitral orifice. **M., Musical,** a heart-murmur having a musical quality. **M., New Leather.** See *Bruit de cuir neuf.* **M., Organic,** a murmur due to structural changes in the heart. **M., Pericardial,** a friction-sound produced by the rubbing of the pericardial surfaces upon each other. **M., Placental.** See *Souffle, Uterine.* **M., Post-diastolic,** a murmur heard immediately after the second sound of the heart. **M., Pressure,** usually a vascular murmur and due to compression of the vessel, as with the stethoscope. **M., Presystolic,** a murmur heard at the end of the diastolic pause, just before the first sound. It is the common murmur of mitral stenosis. **M., Pulmonary,** a murmur produced at the pulmonary valve. **M., Rasping,** a rough murmur. **M., Reduplicated,** a reduplication of the first or second heart-sound, due usually to an asynchronous action of the two sides of the heart. It occurs in conditions of increased resistance in the systemic or pulmonary circulation—as in chronic nephritis and in emphysema. It is quite frequent in mitral stenosis and in pericarditis. **M., Respiratory,** the sounds resulting from the passage of the air through the bronchial apparatus during inspiration and expiration. **M., Sawing,** a long, harsh heart-murmur. **M., Scapular,** the systolic murmur of mitral regurgitation transmitted to the angle of the left

scapula. **M., Subclavian,** a murmur heard over the subclavian arteries; it is not uncommon in pulmonary tuberculosis. **M., Systolic,** a murmur heard during the systole of the heart. **M., Tracheal,** a coarse respiratory murmur heard over the trachea. **M., Tricuspid,** a murmur produced at the tricuspid valve. **M., Uterine, M., Utero-placental.** See *Souffle, Uterine.* **M., Valvular,** a heart-murmur due to some change in a valve. **M., Vascular,** a hemic murmur heard in the blood-vessels. **M., Venous,** the hum heard in the veins of the neck, especially in anemia. See *Bruit de diable.* **M., Vesicular.** See *Vesicular.*

Murphy's Button. A mechanical device for coaptating the visceral surfaces in the performance of circular enterorrhaphy, as well as the various intestinal anastomoses. It consists of two brass buttons or plates, each with a peripheral collar and a central hollow stem, the hollow stem of one being slightly smaller than the other, so that it will readly slip within. These buttons may be of various sizes, from three-quarters to one and a quarter inches in diameter, and with central openings of from one-quarter to one-half an inch. In making an anastomosis or enterorrhaphy, a puckering or retaining suture is passed through all the coats around each opening, and after the shoulder of half the button is pushed through each of the openings the suture is drawn taut, so as to prevent the viscus receding from the button. Then the operation is completed by pressing the two halves together, a device on the smaller stem retaining the buttons in apposition. In a few days the buttons will be liberated by pressure-necrosis and carried down the intestinal canal by the natural peristalsis. **M.'s Method.** See *Operations, Table of.*

Murr, Murrain (*mur, mur'-ān*) [ME., *murrin*, murrain]. Any fatal epizoötic disease of cattle and sheep; also a synonym of foot-and-mouth disease.

Murray's Treatment. See *Treatment, Methods of.*

Murraya (*mur'-a-ah*) [after J. A. *Murray*, a Swedish botanist]. A genus of dicotyledonous trees. **M. exotica,** Chinese box, yields a perfume and a bitter extract, *murrayin.*

Murrayetin (*mur-a-et'-in*) [after J. A. *Murray*, a Swedish botanist], $C_{12}H_{12}O_5 + \frac{1}{2}H_2O$. A glucosid obtained from murrayin by the action of dilute acids.

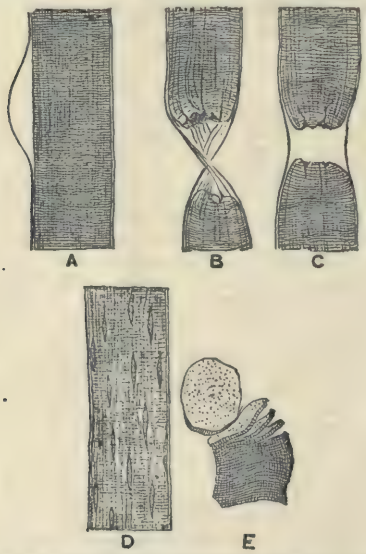
Murrayin (*mur'-a-in*) [after J. A. *Murray*, a Swedish botanist], $C_{18}H_{22}O_{10}$. A glucosid obtained from *Murraya exotica.*

Mururé (*mu-ru-ra'*) [Braz.]. The name given by the natives to a Brazilian tree, the botanic source of which is unknown. The bark presents a brick-red color, with darker patches on the outer surface; internally it is fibrous, grayish and rather hard. Upon incision a reddish, syrupy liquid exudes, which is of acid reaction, 1–100 density, and is called *Vegetable mercury.* Physiologic investigations show the liquid to be poisonous, injections of the neutralized juice having caused death in various animals.

Musa (*mu'-zah*) [Ar., *mūze*, banana]. A genus of monocotyledonous plants. **M. paradisiaca,** the plantain, *q. v.* **M. sapientum,** the banana, *q. v.*

Musca (*mus'-kah*) [*juvia*, a fly]. A genus of flies. **M. hispaniola.** See *Cantharis.*

Muscæ (*mus'-ke*) [L.]. Plural of *Musca.* **M., Entohyaloid.** See *M. volitantes.* **M. volitantes** [Fr., *Mouches volantes*], floating spots, or imperfections in the field of vision due to shadows of vitreous cells.



Muscardine (*mus'-kahr-din*) [Fr., a peculiar fungus]. See *Muskardine.*

Muscariform (*mus-kar'-if-orm*) [*muscarium*, fly-brush; *musca*, a fly; *forma*, form]. In biology, brush-shaped.

Muscarin (*mus'-kar-in*) [*muscarium*, a fly-brush], $C_5H_{15}NO_2$. An oxycholin found in fly agaric. It is formed by oxidizing cholin with HNO_3. It is a powerful respiratory and cardiac depressant, producing myosis, intestinal spasm, dyspnea, and death. Its action may be antagonized by subsequent injection of atropin. See also *Pigments, Conspectus of.* **M. nitras.** Dose gr. $\frac{1}{100}$ hypodermatically. Unof.

Muscle (*mus'-l*) [*musculus*, a muscle]. An aggregation of tissues, of which muscular tissue is the most important, having the property of contracting and of returning to its original shape. Muscles provide the means of movement in animals, and are of two kinds, the striped and smooth, striated and unstriated, the first being voluntary, the second involuntary, *i. e.*, not as a rule subject to the will. See *Table of Muscles*, p. 795. **M. of Accommodation,** the ciliary muscle. **Ms. of Animal Life, Striped, Striated or Voluntary Ms.,** those under the control of the will; they are composed of fasciculi of fibers enclosed in a delicate tissue called the internal perimysium. **M.-beater,** in massage, an instrument used for flagellation. See *Percussion.* **M.-bundle,** a group of muscle-fibers enclosed in an investing membrane. **M., Cardiac,** the muscular substance of the heart. **M.-case,** a membranous sac enclosing one of the muscle-compartments of a fiber of muscular tissue. **M.-casket,** a muscle-compartment. **M.-cell.** See *Myocyte.* **M., Circular,** a muscle surrounding circular openings; a sphincter. **M.-clot,** the clot formed in the coagulation of muscle-plasm. **M.-column,** a bundle of muscular fibrils in a muscle-fiber. **M.-comma.** See *Myocomma.* **M.-compartment,** one of the divisions of a muscle-fiber produced by the extension of Krause's membrane from the sarcolemma. **M.-corpuscle,** a muscle-nucleus. **M.-curve,** the tracing of a myograph. **M., Demipenniform,** a muscle with a tendinous portion extending throughout the whole length of its free margin. **M.-disc,** one of the superimposed discs of a muscle-prism. The same parts were designated by Rollet "chief substance discs." **M.-enzyme,** a ferment existing in the muscles, retaining its activity until heated to 100° F. It is not identical with fibrin-ferment. **Ms., Extrinsic** (*of the eye*), the recti, oblique, levator palpebræ, and orbicularis palpebrarum muscles. **Ms., Extrinsic** (*of the larynx*), the omo-hyoid and sterno-hyoid, the sterno-thyroid, superior, inferior and middle constrictors of the pharynx, the supra-hyoid. **M., Extrinsic** (*of the tongue*), the hyo-glossus, chondro-glossus, genio-hyo-glossus, palato-glossus, and stylo-glossus, and part of the superior pharyngeal constrictor. **M.-ferment.** See *M.-enzyme.* **M., Fusiform,** a spindle-shaped muscle with a large belly and a narrow origin and insertion. **Ms., Hamstring,** a name given to the biceps, semi-membranosus, and semi-tendinosus muscles. **M., Heart,** occupies an intermediate position between the spindle-shaped, non-striated involuntary cell and the striped voluntary fiber. It has no sarcolemma, its striæ are fainter, the muscle-nuclei are situated within the sarcous substance, and the contractile fibrillæ are peculiarly disposed. The peripheral fibrillæ are arranged in a radiating manner, the central portion being occupied by prismatic bundles of fibrillæ, nuclei, and sarcoplasm. Cardiac muscle-fibers differ in yet another point from ordinary striped muscular tissue—they branch and anastomose with each other. **M., Hollow,** that surrounding a cavity. **M., Inflected,** one that passes over a pulley. **M., Intrinsic,** a muscle confined to a part or organ. **M., Involuntary,** one not under the control

of the will, as the non-striated muscles. They vary from 75–225 μ in length, and from 4–8 μ in width. The cells are surrounded by a delicate hyaline sheath, and possess a rod-shaped nucleus. See *M., Unstriped.* **M.-juice.** Same as *M.-plasma.* **Ms. of Mastication,** the masseters, temporals, and external and internal pterygoid muscles. **M., Non-striated,** one composed of spindle-shaped involuntary muscle-fibers. **M.-nucleus,** the nucleus of a muscle-fiber. **M., Organic.** See *Involuntary.* **Ms. of Organic Life, Unstriped or Involuntary Ms.,** those composed of spindle-shaped, contractile fibers and nucleated cells collected in bundles. A table arranged alphabetically is appended, showing the principal muscles of the human body, with their origin, insertion, innervation, and function. **M., Papillary,** the muscular eminences in the ventricles of the heart, from which the chordæ tendineæ arise. **M., Pennate, M., Penniform,** a muscle with a central axis, from which the fibers radiate on each side. **M., Perforated** (*of Casserius*). See *M., Coraco-brachialis,* in *Table.* **M., Peripenial,** a layer of involuntary muscle beneath the skin of the penis. **M.-plasma,** a liquid obtained from

A. Striped muscle of frog, sarcolemma raised in the form of a bleb. B. Ruptured fiber with sarcolemma. C. Fiber ruptured by a hair. D. Effect of acetic acid on a muscle fiber. E. Muscle-discs. (*Stirling.*)

fresh muscle by expression, preferably after freezing. Its coagulation is the essential condition of rigor mortis, and is comparable to the coagulation of blood. The solid proteid thus separated is called myosin. Two of its proteids, paramyosinogen and myosinogen, go to form the clot, while the other three, myoglobulin, albumin, and myoalbuminose, remain in the muscle-serum. **M.-plate.** See *Myocomma,* and *Myotome.* **M.-prism,** a muscle-rod. **M.-reading,** the detection of a person's thoughts and emotions by the involuntary action of his muscles. **Ms. of Respiration,** those involved in the ordinary processes of breathing. Those concerned in *inspiration* are the diaphragm, the intercostals and the long and short elevators. Other muscles, including the trapezius, scaleni and pectoralis minor, are brought into play during forced inspiration. *Ordinary expiration* is non-muscular, the act being a purely passive one; *forced expiration,* however, brings into play most of the abdominal muscles. **M.-rod,** one of the ultimate divisions of the dim band of a muscle-compartment. **M.-serum,** the liquid residue left after the separation of the clot by coagulation of muscle-plasma. **M., Skeletal,** any one of those muscles attached to and acting on the skeleton. **M.-sound,** the sound produced by the

Isolated Smooth Muscular Fibers. Nitric acid. × 300. (*Stirling.*)

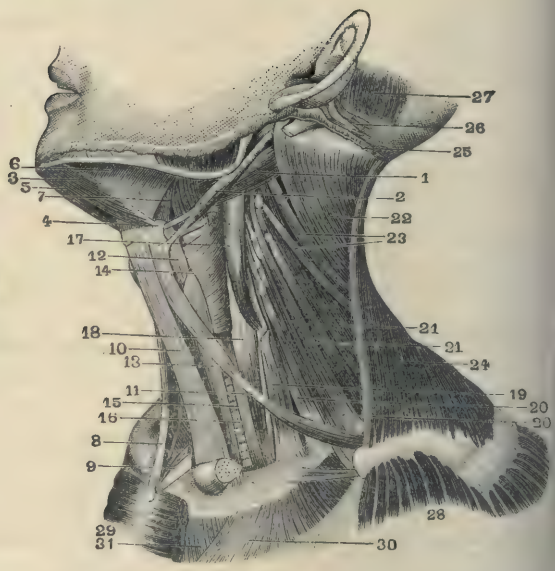
contraction of a muscle. **M.-spindle,** structures described by Kühne and considered by Kirschner as special sensory nerve-endings, and by Kölliker to be transient developmental structures connected with the cleavage of the muscle-fibers (Piersol). **M., Stalk,** a differentiation of the ectoplasm of the *Vorticella,* which, in contracting, rolls the stalk up spirally. **M., Striated,** a muscle constituted of striped muscle-fibers. **M., Striped.** Same as *M., Striated.* **M.-sugar.** See *Inosite.* **M., Tailor's.** Synonym of the sartorius muscle. See *Table.* **M.-telegraph,** an apparatus arranged by DuBois-Reymond especially for replacing the myograph in experiments during lectures. The muscle is

Muscular Fibers of the Human Heart. (*Stirling.*)

fixed in a vise; its other end is connected by a hook with a thread running over a reel. The reel supports a long indicating hand to which a colored disc is attached. The muscle, in shortening, turns the wheel and lifts the disc, which is easily seen from a considerable distance. A second thread, slung over the reel, supports a brass vessel, which may be filled with shot, so as to apply any desired weight to the muscle. **M.-tumor,** a myoma, *q. v.* **M., Unstriated, M. Unstriped.** See *M., Non-striated.* **M., Visceral,** any one of the muscles connected with the viscera; they are not under the command of the will. **M., Voluntary.** See *M., Striped.*

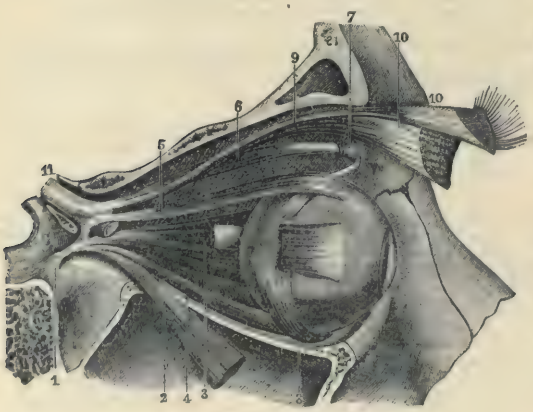
Muscoid (*mus'-koid*) [*musculus,* moss; εἶδος, like] Moss-like.

TABLE OF MUSCLES (ARRANGED ALPHABETICALLY).



NAME.	ORIGIN.	INSERTION.	INNERVATION.	FUNCTION.
Abductor hallucis.	Outer head of os calcis, plantar fascia, intermuscular septum; inner head, internal annular ligament, and tendon of tibialis posticus.	Inner portion of lower surface of base of great toe and inner side of internal sesamoid bone.	Internal plantar division of posterior tibial nerve.	Flexes and abducts first phalanx of great toe.
Abductor longus pollicis.	See *Extensor ossis metacarpi pollicis.*			
Abductor minimi digiti manus.	Pisiform bone.	First phalanx of the little finger.	Ulnar.	Abducts little finger.
Abductor minimi digiti pedis.	Outer tuberosity of the os calcis and plantar fascia.	First phalanx of the little toe.	External plantar.	Abducts little toe.
Abductor ossis metatarsi quinti.	Outer tubercle of calcaneum.	Tuberosity of base of 5th metatarsal bone.	External plantar.	Abducts little toe.
Abductor pollicis manus.	Trapezium, scaphoid, annular ligament, palmar fascia.	First phalanx of thumb.	Median.	Abducts and flexes first phalanx of thumb.
Abductor pollicis pedis.	Inner tuberosity of the os calcis.	First phalanx of great toe.	Internal plantar.	Abducts great toe.
Accelerator urinæ.	Central tendon of perineum and median raphe.	Bulb, spongy and cavernous parts of penis.	Perineal.	Ejects urine.
Accessorius ad accessorium.	See *Flexor accessorius longus digitorum pedis.*			
Accessorius ad flexorum profundum.	Internal condyle and coronoid process of humerus.	Into the perforating tendons of the flexor profunda.	Ulnar and anterior interosseous.	Assists in flexing fingers.
Accessorius orbicularis inferioris.	Inferior maxilla, external to levator labii inferioris.	At angle of mouth, joining buccinator and other muscles.		
Accessorius orbicularis superioris.	Alveolar border of superior maxilla opposite incisor teeth.	Angle of mouth; continuous with other muscles inserted at this point.		
Accessorius tricipites.	See *Dorso-epitrochlearis.*			
Accessory abdominal oblique.	Between the two oblique muscles from the 9th, 10th, or 11th rib.	Crest of ilium.	Intercostal, ilio-hypogastric, ilio-inguinal.	Assists in flexing thorax.
Accessory gluteus minimus.	Outer surface of the ilium.	Anterior border of the great trochanter.	Superior gluteal.	Assists gluteus minimus.
Accessory to the iliocostal.	Angles of 7th to 11th ribs and back of last rib.	Transverse process of 7th cervical vertebra, tubercle of 1st rib. Angles of 2d to 5th ribs.	External branches of posterior divisions of lumbar nerves.	Extension of lumbar spines on pelvis.
Accessory palmar abductor indicis (*anomalous*).	Third metacarpal bone.	Base of first phalanx of index finger.		
Accessory popliteus (*anomalous*).	Usually from a sesamoid bone on the posterior surface of lower end of femur.	With the popliteus.	Internal popliteal.	Assists in flexing leg.
Adductor brevis.	Ramus of pubes.	Upper part of the linea aspera of femur.	Obturator.	Adducts, rotates externally, and flexes thigh.
Adductor hallucis.	Tarsal ends of the three middle metatarsal bones.	Base of the first phalanx of great toe.	External plantar.	Adducts great toe.
Adductor longus.	Front of pubes.	Middle of linea aspera of femur.	Obturator.	Adducts, rotates outward, and flexes thigh.
Adductor magnus.	Rami of pubes and ischium.	All of the linea aspera of femur.	Obturator and great sciatic.	Adducts thigh and rotates it outward.
Adductor minimus.	A name given to the upper portion of the adductor magnus.			
Adductor pollicis.	Third metacarpal.	First phalanx of thumb.	Ulnar.	Draws thumb to median line.

MUSCLES.



MUSCLES OF THE FACE AND NECK.

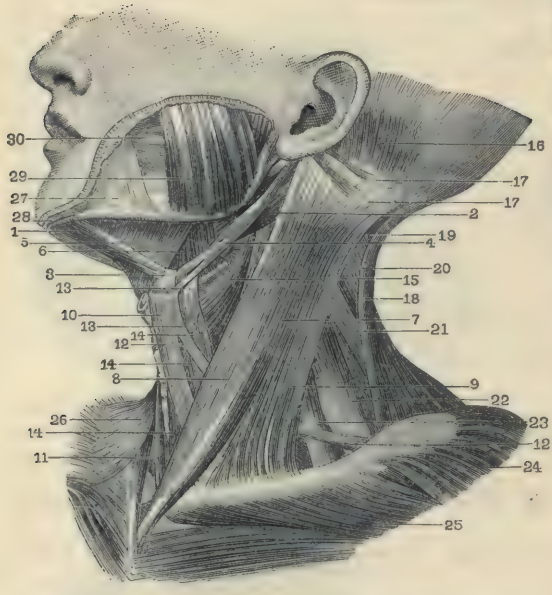
1. Frontal muscle. 2. Occipital muscle. 3, 3. Epicranial aponeurosis. 4. Temporal muscle. 5. Retrahens aurem. 6. Orbicularis palpebrarum. 7. Levator labii superioris et alæque nasi. 8. Dilator naris. 9. Compressor naris. 9'. Pyramidalis nasi. 10. Zygomatic minor. 11. Zygomatic major. 12. Masseter. 13. Levator anguli oris. 14. Levator labii superioris. 15. Orbicularis oris. 16. Buccinator. 16'. Depressor anguli oris. 17. Depressor labii inferioris. 18. Levator labii inferioris. 19. Sterno-mastoid. 20. Trapezius. 21. Digastric and stylo-hyoid. 22. Anterior belly of digastric. 23. Pulley for tendon of digastric. 24, 24. Omo-hyoid. 25. Sterno-hyoid. 26. Thyro-hyoid. 27. Mylo-hyoid. 28. Splenius capitis. 29. Splenius colli. 30. Levator anguli scapulæ. 31. Scalenus posticus. 32. Scalenus anticus.

MUSCLES OF SUPRA-HYOID AND INFRA-HYOID REGIONS.

1. Posterior belly of digastric. 2. Stylo-hyoid. 3. Anterior belly of digastric. 4. Tendon and pulley of digastric. 5. Anterior belly of right digastric. 6. Mylo-hyoid. 7. Hyo-glossus. 8. Sternal fibers of right sterno-mastoid. 9. Sternal fibers of left sterno-mastoid. 10. Sterno-hyoid. 11. Tendon of omo-hyoid. 12. Thyro-hyoid. 13. Sterno-thyroid. 14. Inferior constrictor of pharynx. 15. Trachea. 16. Esophagus. 17. Rectus capitis anticus major. 18. Longus colli. 19. Scalenus anticus. 20, 20. Scalenus posticus. 21, 21. Levator anguli scapulæ. 22. Splenius capitis. 23, 23. Splenius colli. 24. Trapezius. 25. Attachment of sterno-mastoid. 26. Retrahens aurem. 27. Occipital portion of occipito-frontal. 28. Deltoid. 29. Attachment of pectorales majores to sternum. 30. External intercostal. 31. Internal intercostal.

MUSCLES OF THE EYE.

1. Tendon of Zinn. 2. External rectus divided. 3. Internal rectus. 4. Inferior rectus. 5. Superior rectus. 6. Superior oblique. 7. Pulley for superior oblique. 8. Inferior oblique. 9. Levator palpebræ superioris. 10, 10. Its anterior expansion. 11. Optic nerve.



MUSCLES OF THE TONGUE. SUPERFICIAL LAYER.

1. Stylo-glossus. 2. Inferior fibers of stylo-glossus. 3. Anterior fibers of hyo-glossus or basio-glossus. 4. Posterior fibers. 5. Accessory fibers. 6. Genio-hyoid. 7. Genio-glossus. 8. Inferior lingual. 9. Palato-glossus. 10. Upper portion of Pharyngo-glossus (from superior constrictor of pharynx). 11, 11. Inferior portion. 12, 12. Middle constrictor of pharynx. 13. Stylo-pharyngeus. 14. Stylo-hyoid ligament and stylo-hyoid muscle.

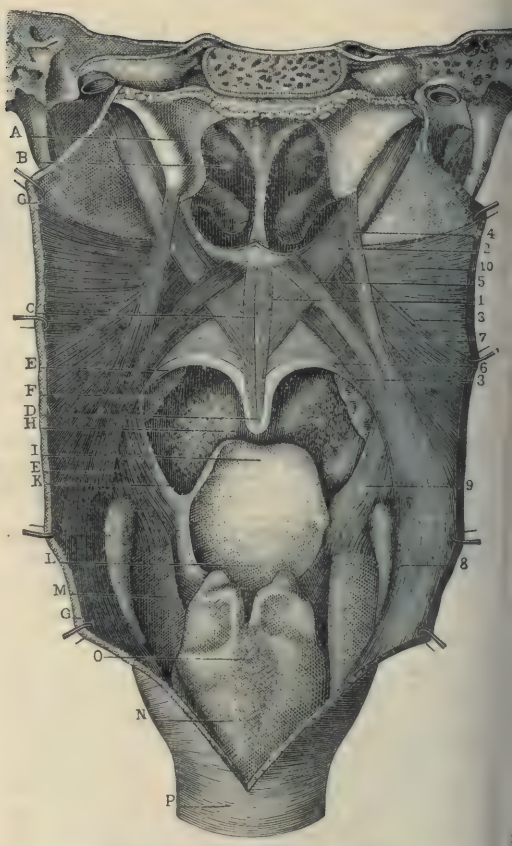


TABLE OF MUSCLES.—*Continued.*

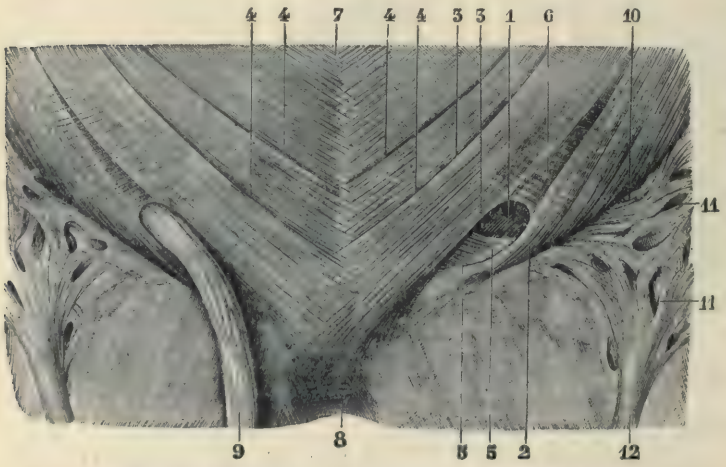
NAME.	ORIGIN.	INSERTION.	INNERVATION.	FUNCTION.
Adductor quadratus.	See *Adductor minimus.*			
Adjutor splenii.	See *Rhombo-atloid.*			
Agitator caudæ.	A name given to the lower edge of the gluteus maximus.	The femur or femoral aponeurosis.		
Amygdalo-glossus.	Pharyngeal aponeurosis covering the outer surface of the tonsil.	Continuous with the palato-glossus.		Aids the stylo-glossus in raising the margin of the tongue, rendering the dorsum concave.
Anconeus.	Back of external condyle of humerus.	Olecranon process and shaft of ulna.	Musculo-spiral.	Extends forearm.
Antitragicus.	Outer surface of antitragus.	Caudate process.	Temporal and posterior auricular.	
Arrectores pili.	Pars papillaris of the skin.	Hair-follicles.	Sympathetic.	Elevate the hairs of the skin.
Aryteno-epiglottideus inferioris.	Arytenoid (anteriorly).	Epiglottis.	Recurrent laryngeal.	Compresses saccule of larynx.
Aryteno-epiglottideus superioris.	Apex of arytenoid cartilage.	Aryteno-epiglottidean folds.	Recurrent laryngeal.	Constricts aperture of larynx.
Arytenoideus.	Posterior and outer border of one arytenoid.	Back of other arytenoid.	Superior and recurrent laryngeal.	Closes back part of glottis.
Attollens aurem.	Occipito-frontalis aponeurosis.	Pinna.	Temporal branch of facial.	Elevates pinna.
Attrahens aurem.	Lateral cranial aponeurosis.	Helix.	Facial.	Advances pinna.
Azygos pharyngis (*occasional*).	Pharyngeal tubercle of body of occiput.	Raphe of pharynx.	Glosso-pharyngeal, pharyngeal plexus.	Blends with superior constrictor.
Azygos uvulæ.	Posterior nasal spine of palate bone.	Uvula.	Facial through spheno-palatine ganglion.	Raises uvula.
Basio-glossus.	The fibers of the hyo-glossus arising from the hyoid bone. See *Hyo-glossus.*			
Biceps.	1. Long—Glenoid cavity. 2. Short—Coracoid process.	Tuberosity of radius.	Musculo-cutaneous.	Flexes and supinates forearm.
Biceps femoris.	1. Ischial tuberosity. 2. Linea aspera.	Head of fibula and outer tuberosity of head of fibula.	Great sciatic and external popliteal.	Flexes and rotates leg outward.
Biventer cervicis.	Transverse processes, 2–4 upper dorsal.	Superior curved line of occipital bone.	Portion of complexus.	Retracts and rotates head.
Bowman's.	See *Ciliary.*			
Brachialis anticus.	Lower half of the shaft of humerus.	Coronoid process of ulna.	Musculo-cutaneous, musculo-spiral.	Flexes forearm.
Brachio-capsularis.	See *Subscapularis.*			
Brachio-radialis.	See *Supinator longus.*			
Brücke's.	See *Ciliary.*			
Buccinator.	Alveolar process of maxillary bones and pterygo-maxillary ligament.	Orbicularis oris.	Facial, buccal branch.	Compresses cheeks, retracts angle of mouth.
Bulbo-cavernous.	See *Accelerator urinæ.*			
Cephalo-humeral.	See *Cleido-occipital.*			
Cephalo-pharyngeus.	See *Constrictor of*	*pharynx, superior.*		
Cervicalis ascendens.	Angles of 5 upper ribs.	Transverse processes of 4th, 5th, and 6th cervical vertebræ.	Branches of cervical.	Keeps head erect.
Chondro-coracoid (*anomalous*).	First costal cartilage.	Coracoid process, superficial to the coraco-brachialis.		

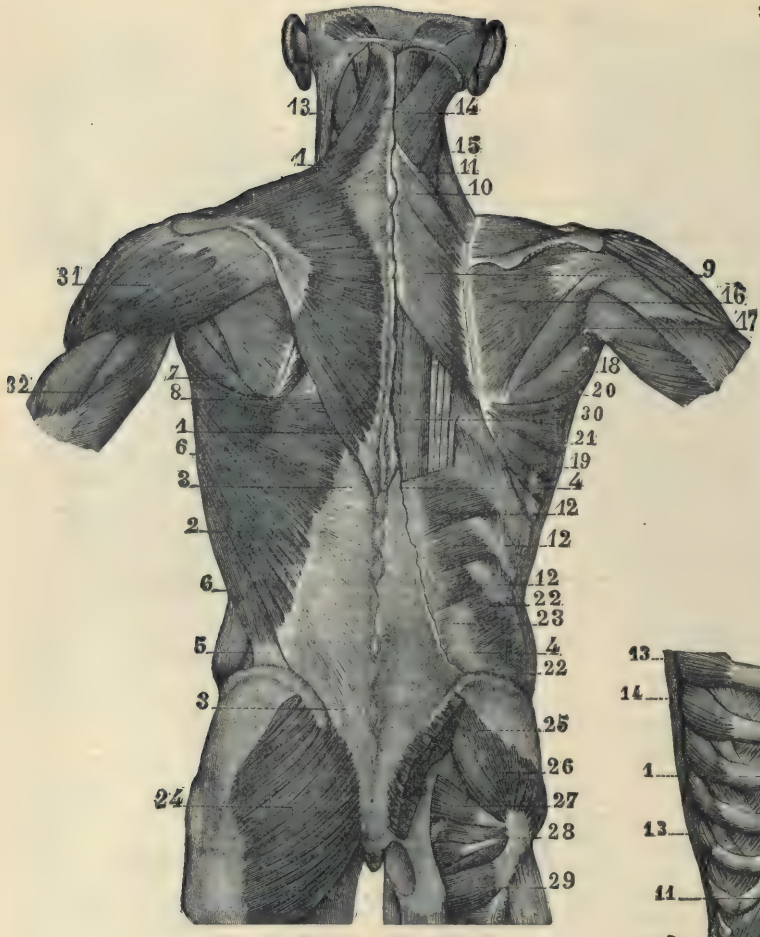


THE STERNO-CLEIDO-MASTOID MUSCLE. MUSCLES OF THE SUPRA-HYOID AND INFRA-HYOID REGIONS.

1. Anterior belly of digastric. 2. Posterior belly. 3. Tendon and pulley for tendon. 4. Stylo-hyoid. 5. Mylo-hyoid. 6. Hyo-glossus. 7. Sterno-cleido-mastoid. 8. Anterior or sternal portion. 9. Posterior or clavicular portion. 10. Left sterno-hyoid. 11. Right sterno-hyoid. 12, 12. Omo-hyoid. 13. Thyro-hyoid. 14, 14. Sterno-thyroid. 15. Anterior portion of inferior constrictor of pharynx. 16. Occipital muscle. 17, 17. Retrahens aurem. 18. Trapezius. 19. Splenius capitis. 20. Splenius colli. 21. Levator anguli scapulæ. 22. Scalenus posticus. 23. Scalenus anticus. 24. Superior portion of deltoid. 25. Superior portion of pectoralis major. 26. Inferior and anterior portion of right platysma myoides. 27. Depressor anguli oris. 28. Depressor labii inferioris. 29. Masseter. 30. Buccinator.

MUSCLES OF THE VELUM PALATI.

A. Cartilaginous portion of Eustachian tube. B. Posterior orifice of nasal fossa. C. Velum palati. D. Uvula. E. Posterior pillar of velum palati. F. Tonsil. G, G. Posterior wall of pharynx, divided in the median line. H. Base of tongue. I. Epiglottis. K. Left lateral prolongation of epiglottis. L. Entrance to larynx. M. Thyroid cartilage. N. Posterior wall of larynx. O. Group of racemose glands. P. Upper part of esophagus. 1. Azygos uvulæ. 2. Levator palati. 3, 3. Palato-pharyngeus. 4. External accessory fasciculus. 5. Internal accessory fasciculus. 6. Fibers arising from the median portion of the velum palati and terminating in the palato pharyngeus. 7. Internal fibers of the palato-pharyngeus. 8. Middle and external fibers. 9. Anterior fibers of stylo-pharyngeus. 10. Superior constrictor o pharynx.

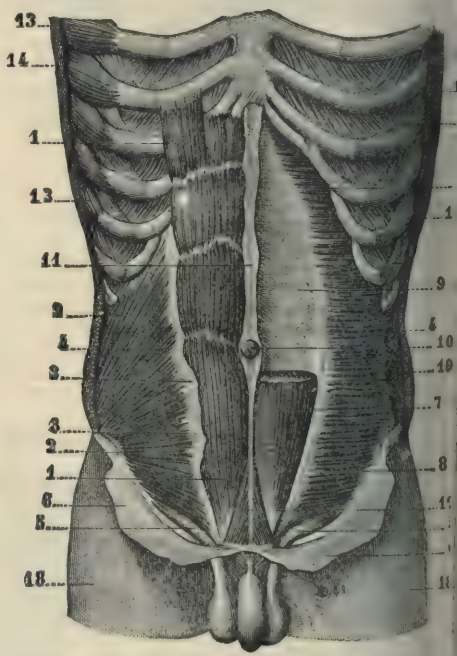


INFERIOR PORTION OF THE ABDOMINAL APONEUROSIS.

1. External abdominal ring. 2, Exter nal pillar. 3, 3. Internal pillar. 4, 4 Gimbernat's ligament. 5, 5. Its at tachment. 6. Intercolumnar fibers 7. Linea alba. 8. Symphysis pubis 9. Spermatic cord. 10. Crural arch 11, 11. Cribriform fascia. 12. Interna saphenous vein.

TABLE OF MUSCLES.—*Continued.*

NAME.	ORIGIN.	INSERTION.	INNERVATION.	FUNCTION.
Chondro-epitrochlearis (*anomalous*).	Cartilages of one or two ribs (7th) or from aponeurosis of external oblique.	Fascia on inner side of arm, or internal condyle of humerus.		
Chondro-glossus.	See *Hyo-glossus*.			
Choroid.	See *Ciliary*.			
Ciliary.	*Longitudinal* portion (Brücke's m.), junction of cornea and sclera; *circular* portion (Müller's m.), fibers form a circle.	Outer layers of choroid.	Ciliary.	The muscle of visual accommodation.
Circumflex palati.	See *Tensor palati*.			
Cleido-cervicalis (*anomalous*).	Transverse process of 6th cervical vertebra.	Outer end of clavicle.		A supernumerary scalene muscle.
Cleido-epitrochlearis.	Clavicular portion of deltoid.	Internal condyle of humerus.		
Cleido-hyoid (*anomalous*).	Clavicle near outer border of sterno-hyoid.	Body of hyoid.	Hypoglossal.	Depresses hyoid.
Cleido-occipitalis (*anomalous*).	Clavicle, posterior to sterno-mastoid.	Superior nuchal line of occiput.		
Coccygeus.	Ischial spine.	Coccyx, sacrum, and sacro-coccygeal ligament.	Sacral.	Supports coccyx, and closes pelvic outlet.
Complexus.	Transverse processes 7th cervical and 6 upper dorsal, and articular processes of 3d to 6th cervical.	Occipital bone.	Sub-occipital, great occipital, and branches of cervical.	Retracts and rotates head.
Compressor hemisphericum bulbi.	A name given to that part of the bulbo-cavernosus which covers the most prominent part of the bulb.			
Compressor narium.	Nasal aponeurosis.	Fellow muscle and canine fossa.	Facial.	Dilates nostril.
Compressor narium minor.	Alar cartilage.	Skin at end of nose.	Facial.	Dilates nostril.
Compressor sacculi laryngis.	Fibers of the aryteno-epiglottideus.		Recurrent laryngeal.	Compressor of saccule of larynx.
Compressor urethræ.	Ramus of pubes.	Fellow muscle.	Perineal.	Compresses membranous urethra.
Compressor vaginæ.	The analogue of the two bulbo-cavernosi of the male.		Perineal.	Compressor of vagina.
Compressor venæ dorsalis penis.	Fibers of the ischio-cavernosus.	Fascial sheath of penis, over dorsal vessels.		Compressor of dorsal vein.
Constrictor isthmi faucium.	See *Palato-glossus*.			
Constrictor of pharynx (inferior).	Cricoid and thyroid cartilages.	Pharyngeal raphe.	Glosso-pharyngeal, pharyngeal plexus and external laryngeal.	Contracts caliber of pharynx.
Constrictor of pharynx (middle).	Cornua of hyoid and stylo-hyoid ligament.	Pharyngeal raphe.	Glosso-pharyngeal and pharyngeal plexus.	Contracts caliber of pharynx.
Constrictor of pharynx (superior).	Internal pterygoid plate, pterygo-max. lig., jaw and side of tongue.	Pharyngeal raphe.	Glosso-pharyngeal and pharyngeal plexus.	Contracts caliber of pharynx.
Constrictor urethræ.	See *Compressor urethræ*.			
Constrictor vaginæ.	See *Compressor vaginæ*.			
Coraco-brachialis.	Coracoid process of scapula.	Inner surface of shaft of humerus.	Musculo-cutaneous.	Adducts and flexes arm.
Coraco-brachialis superior vel brevis.	See *Rotator humeri*.			

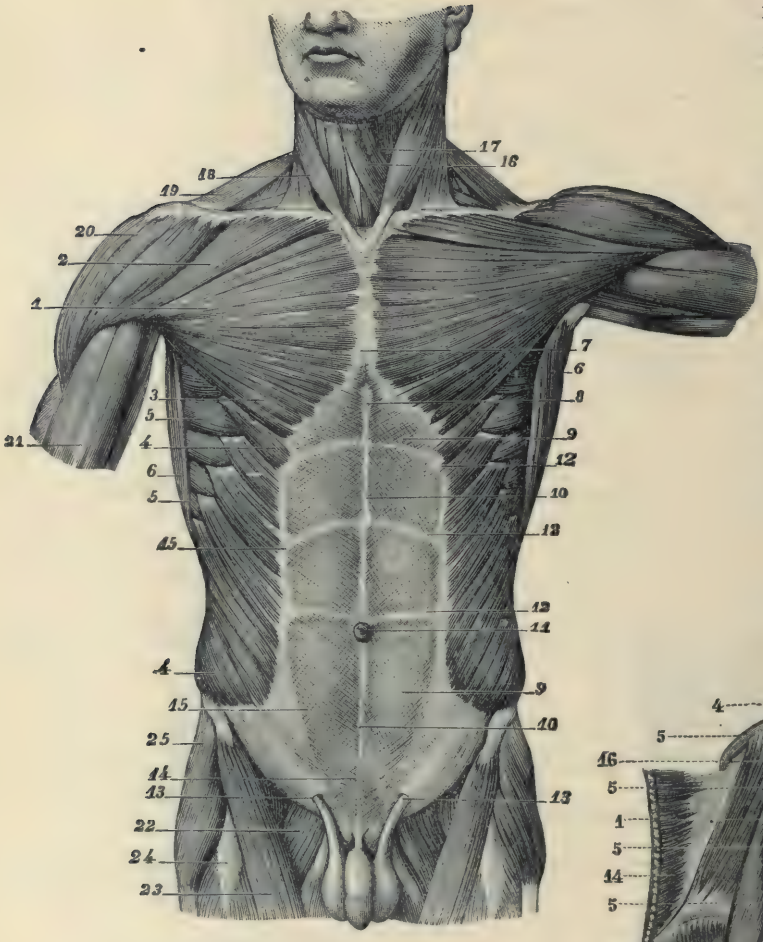


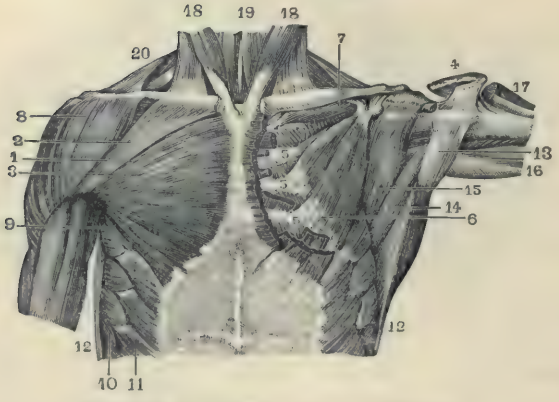
Superficial and Middle Muscular Layers of the Posterior Aspect of the Trunk.

1, 1. Trapezius. 2. Latissimus dorsi. 3, 3. Lumbo-sacral aponeurosis. 4, 4. Portion of this aponeurosis to which latissimus dorsi is attached. 5. Fasciculus by which latissimus dorsi is attached to crest of ilium. 6. External border of latissimus dorsi. 7. Teres major. 8. Superior border of latissimus dorsi, curving around teres major. 9. Rhomboideus major. 10. Rhomboideus minor. 11. Superior border of serratus posticus superioris. 12, 12, 12. Fasciculi of serratus posticus inferioris. 13. Sterno-mastoid. 14. Splenius. 15. Levator anguli scapulæ. 16. Infraspinatus. 17. Teres minor. 18. Teres major. 19. Divided latissimus dorsi. 20. Fasciculus of latissimus dorsi, arising from angle of scapuli. 21. Inferior portion of serratus magnus. 22, 22. Lower portion of internal oblique. 23. Posterior aponeurosis of internal oblique. 24. Gluteus maximus. 25. Divided gluteus maximus. 26. Gluteus medius. 27. Pyramidalis. 28. Tendon of obturator internus and gemelli. 29. Quadratus femoris. 30. Sacro-lumbalis and longissimus dorsi. 31. Deltoid. 32. Triceps.

Diaphragm, Inferior Aspect.

1. Middle or anterior leaflet of central tendon. 2. Right leaflet. 3. Left leaflet. 4. Right crus. 5. Left crus. 6, 6. Intervals for phrenic nerves. 7. Muscular fibers from which the ligamenta arcuata originate. 8, 8. Muscular fibers that arise from inner surface of six lower ribs. 9. Fibers that arise from ensiform cartilage. 10. Opening for inferior vena cava. 11. Opening for esophagus. 12. Aortic opening. 13, 13. Upper portion of transversalis abdominis, turned upward and outward. 14. Anterior leaflet of transversalis aponeurosis. 15, 15. Quadratus lumborum. 16, 16. Psoas magnus. 17. Third lumbar vertebra.



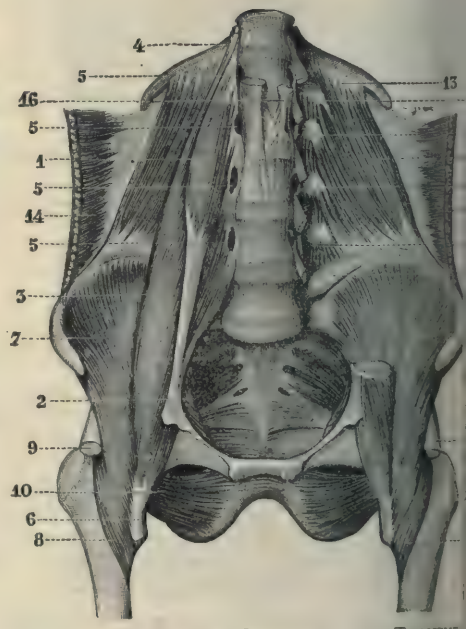


Internal Oblique and Transversalis abdominis Muscles.

1, 1. Rectus abdominis. 2, 2. Internal oblique. 3, 3. Anterior leaflet of aponeurosis of internal oblique. 4, 4. Divided external oblique. 5, 5. Spermatic cords. 6, 6. Inferior portion of aponeurosis of external oblique. 7. Lower portion of left rectus abdominis; upper portion removed. 8, 8. Muscular portion of transversalis abdominis. 9. Aponeurotic portion. 10. Umbilicus. 11. Supra-umbilical portion of linea alba. 12. Infra-umbilical portion. 13. Serratus magnus. 14. Divided right latissimus dorsi. 15. Divided left latissimus dorsi. 16. Divided serratus magnus. 17, 17. External intercostals 18, 18. Femoral aponeurosis. 19. Divided internal oblique.

TABLE OF MUSCLES.—*Continued.*

NAME.	ORIGIN.	INSERTION.	INNERVATION.	FUNCTION.
oraco-capsularis. (A name applied to the upper portion of the coraco-brachialis).	Coracoid process.	Below lesser tuberosity of humerus, or into capsule of shoulder-joint.		
orrugator cutis ani.	Submucous tissue on interior of anus.	Subcutaneous tissue on opposite side of anus.	Sympathetic.	Corrugates skin about anus.
orrugator supercilii.	Superciliary ridge of frontal bone.	Orbicularis palpebrarum.	Facial.	Draws eyebrow downward and inward.
osto-fascialis (*anomalous*).	Outer border of sterno-thyroid muscle.	Sheath of carotid vessels.		
rampton's.	See *Ciliary*.			
remaster.	Upper and deep surface of middle of Poupart's ligament.	Spine and crest of pubic bone and fascia propria.	Genital branch of genito-crural.	Elevates testicle.
remaster, internal, of Henle.	Fibers of the gubernaculum testis.	Elements of spermatic cord.		
rico-arytenoideus lateralis.	Side of cricoid cartilage.	Angle and external surface of arytenoid.	Recurrent laryngeal.	Closes glottis.
rico-arytenoideus posticus.	Back of cricoid cartilage.	Base of arytenoid cartilage.	Recurrent laryngeal.	Opens glottis.
rico-hyoid (*anomalous*).	Lower border of side of cricoid cartilage.	Lower border of hyoid bone.		
rico-thyroid.	Cricoid cartilage.	Thyroid cartilage (lower inner border).	Superior laryngeal.	Makes vocal bands tense.
ureus.	See *Vastus internus*.			
rvator coccygis (*anomalous*).	Anterior surface fifth segment of sacrum.	Anterior surface of coccyx.		Incurvates coccyx.
eltoid.	Clavicle, acromion, and spine of scapula.	Shaft of humerus.	Circumflex.	Abducts humerus.
epressor alæ nasi.	Incisive fossa of superior maxillary bone.	Septum and ala of nose.	Facial, buccal branch.	Contracts nostril.
epressor anguli oris.	External oblique line of inferior maxillary bone.	Angle of mouth.	Facial, supra-maxillary branch.	Depresses angle of mouth.
pressor epiglottidis.	Those fibers of the thyro-epiglottideus that are continued forward to the margin of the epiglottis.			
pressor labii inferioris.	External oblique line of the inferior maxillary bone.	Lower lip.	Facial, supra-maxillary branch.	Depresses lip.
pressor thyroidea (*anomalous*).	Lower border first tracheal ring, near middle line.	Lower border of thyroid cartilage.		Depresses trachea.
pressor urethræ.	Ramus of ischium near deep transversus perinei.	Fibers of constrictor vaginæ muscle.		
trusor urinæ.	Front of pubes.	Prostate (in male), vagina (in female).	Sympathetic.	Compresses bladder.
phragm.	Ensiform cart., 6 or 7 lower ribs, ligamenta arcuata, bodies of lumbar verteb.	Central tendon.	Phrenic and sympathetic.	Respiration and expulsion.
astric (anterior lly).	Inner surface of inferior maxillary bone, near symphysis.	Hyoid bone.	Inferior dental.	Elevates hyoid and tongue.
astric (posterior lly).	Digastric groove of mastoid process.	Hyoid bone.	Facial.	Elevates hyoid and tongue.
tor naris anterioris.	Alar cartilage.	Border of ala of nose.	Facial, infraorbital branch.	Dilates nostril.
tor naris posterioris.	Nasal notch of superior maxillary bone.	Skin at margin of nostril.	Facial, infraorbital branch.	Dilates nostril.
al interossei, 4.	Sides of metacarpal bones.	Bases of corresponding phalanges.	Ulnar.	Abduct fingers from median line.

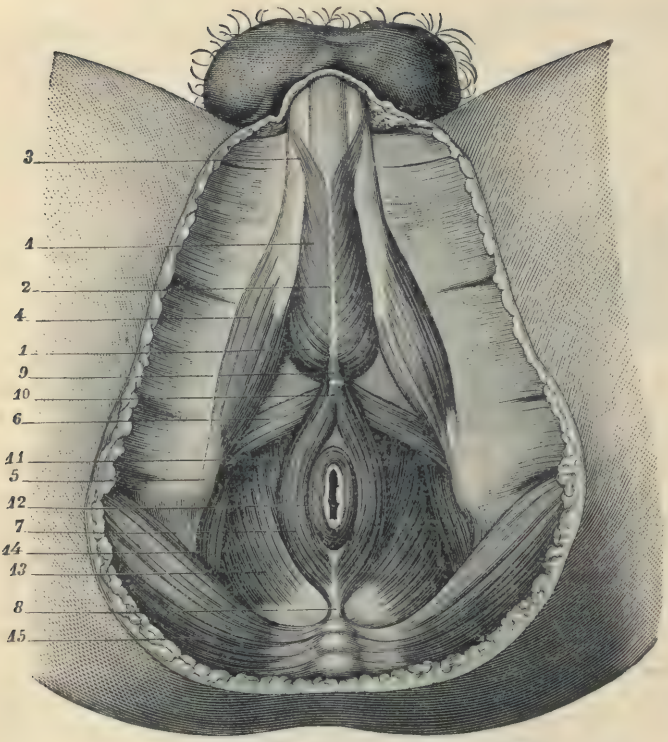


MUSCLES OF ANTERIOR ASPECT OF THORAX.

1. Pectoralis major. 2. Its clavicular portion. 3. Its sterno-costal portion. 4. Its humeral attachment, divided and displaced upward. 5, 5, 5. Its fasciculi of attachment to ribs. 6. Pectoralis minor. 7. Subclavius. 8. Deltoid. 9. Inferior border of pectoralis minor. 10. Digitations of serratus magnus. 11. Corresponding digitations of external oblique. 12, 12. Anterior border of latissimus dorsi. 13. Its tendon of attachment to humerus. 14. Teres major. 15. Subscapularis. 16. Long head of triceps. 17. Lower portion of deltoid. 18, 18. Sterno-mastoid. 19. Lower portion of sterno-hyoid. 20. Trapezius.

MUSCLES OF THE ANTERIOR ASPEC OF THE BODY.

1. Pectoralis major. 2. Its clavicul fasciculus. 3. Fasciculus attache to abdominal aponeurosis. 4, External oblique. 5, 5. Serrat magnus. 6, 6. Anterior border latissimus dorsi. 7. Decussation tendinous fibers of pectorales m jores. 8. Ensiform cartilage. 9, Abdominal aponeurosis. 10, 1 Linea alba. 11. Umbilicus. 12, 1 12. Tendinous intersections of re tus abdominis. 13, 13. External a dominal ring. 14. Pyramidalis. 1 15. External border of rectus a dominis. 16. Sterno-hyoid. 17. Om hyoid. 18. Sterno-mastoid. 19. Ce vical portion of trapezius. 20. De toid. 21. Biceps brachialis. 2 Pectineus. 23. Sartorius. 24. Re tus femoris. 25. Tensor vagin femoris.



PSOAS, ILIAC, QUADRATUS LUMBORUM, AND TRANSVE SALIS MUSCLES.

1. Psoas parvus. 2. Its divided tendon. 3. Psoas magn 4. Its attachment to 12th dorsal vertebra. 5, 5, 5, 5 attachment to bodies of first four lumbar vertebrae. tendon of attachment to lesser trochanter. 7, 7. Il muscle. 8, 8. Inferior and external fibers of iliac mus 9, 9. Rectus femoris. 10, 10. Obturator externus. Quadratus lumborum. 12, 12, 12, 12. Posterior portion quadratus lumborum. 13. External portion. 14. Tra versalis abdominis. 15. Ilio-lumbar ligament. 16. Cr of diaphragm.

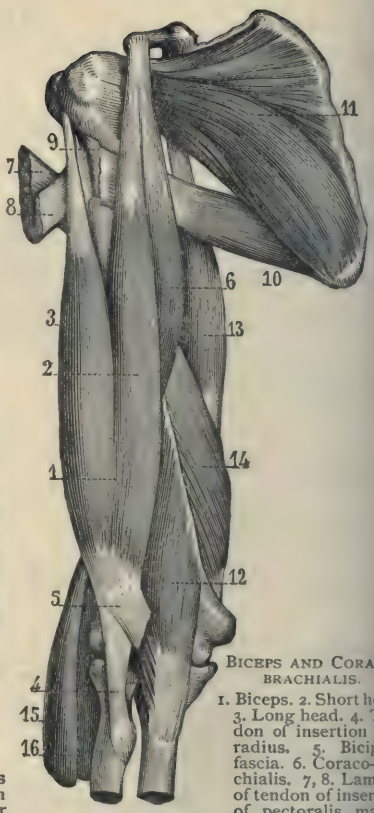


TABLE OF MUSCLES.—*Continued.*

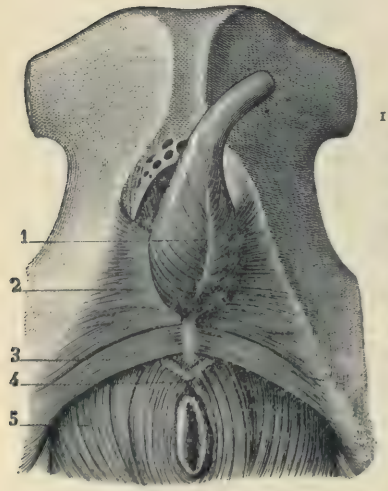
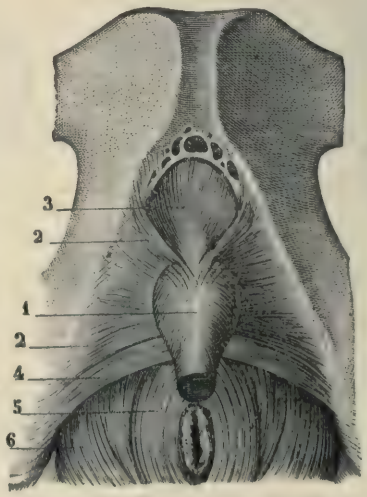
NAME.	ORIGIN.	INSERTION.	INNERVATION.	FUNCTION.
Dorsal interossei, 4.	Sides of metatarsal bones.	Base of first phalanx of corresponding toe.	External plantar.	Abduct toes.
Dorso-epitrochlearis (*anomalous*).	Tendon of latissimus dorsi.	Long head of triceps, or fascia of arm.		Aids in climbing.
Epitrochleo-anconeus (*anomalous*).	Back of internal condyles of humerus.	Inner side of olecranon.		
Erector clitoridis.	Tuberosity of ischium.	Each side of crus of clitoris.		Erects clitoris.
Erector penis.	Ischial tuberosity, crus penis, and pubic ramus.	Tunica albuginea of corpus cavernosum.	Perineal.	To maintain erection.
Erector pili.	See *Arrectores pili.*			
Erector spinæ.	Iliac crest, back of sacrum, lumbar, and three lower dorsal spines.	Divides into sacro-lumbalis, longissimus dorsi, and spinalis dorsi.	Lumbar nerves, posterior division.	Extension of lumbar spines on pelvis.
Extensor annularis (*anomalous*).	Posterior surface of shaft of ulna.	Tendon of ring-finger.		
Extensor brevis digitorum manus (*anomalous*).	Ligamentous tissues on back of carpus.	Tendons of third, fourth, and fifth fingers.		
Extensor brevis digitorum pedis.	Os calcis, externally.	First phalanx of great toe and tendons of extensor longus.	Anterior tibial.	Extends toes.
Extensor brevis hallucis.	A name applied to that portion of the extensor brevis digitorum that goes to the great toe.			
Extensor brevis pollicis.	See *Extensor primi inter*	*nodii pollicis.*		
Extensor carpi radialis accessorius (*anomalous*).	Shaft of humerus.	Metacarpal bone of thumb.		
Extensor carpi radialis brevior.	External condyloid ridge of humerus.	Base second and third metacarpal.	Posterior interosseous.	Extends wrist.
Extensor carpi radialis longior.	Lower ⅓ external condyloid ridge of humerus	Base of second metacarpal.	Musculo-spiral.	Extends wrist.
Extensor carpi ulnaris.	*1st head*, external condyle of humerus. *2d head*, posterior border of ulna.	Base of fifth metacarpal.	Posterior interosseous.	Extends wrist.
Extensor coccygis.	Last bone of sacrum or first of coccyx.	Lower part of coccyx.	Sacral branches.	Extends coccyx.
Extensor communis digitorum.	External condyle of humerus.	All of the second and third phalanges.	Posterior interosseous.	Extends fingers.
Extensor hallucis longus tricaudatus.	The name sometimes applied to the extensor proprius hallucis, when its tendon is divided into three portions.			
Extensor indicis.	Back of ulna.	Second and third phalanges of index finger.	Posterior interosseous.	Extends index.
Extensor longus digitorum pedis.	Outer tuberosity of tibia and shaft of fibula.	Second and third phalanges of toes.	Anterior tibial.	Extends toes.
Extensor longus pollicis.	See *Extensor secundi in*	*ternodii pollicis.*		
Extensor medii digiti (*anomalous*).	Back of shaft of ulna.	Tendon of common extensor.		
Extensor minimi digiti.	External condyle of humerus.	Second and third phalanges of little finger.	Posterior interosseous.	Extensor of little finger.
Extensor ossis metacarpi pollicis.	Back of radius and ulna and interosseous membrane.	Base of metacarpal of thumb and fascia.	Posterior interosseous.	Extends thumb.
Extensor ossis metatarsi hallucis (*anomalous*).	Extensor proprius hallucis, or extensor communis digitorum, or tibialis anticus.	Metatarsal bone of hallux.		



MUSCLES OF ANAL AND PERINEAL REGION.

1, 1. Bulbo-cavernosus muscle (accelerator urinæ). 2. Its fibrous raphe. 3. Its anterior termination. 4. Ischio-cavernosus (erector penis) muscle. 5. Tendon of attachment to tuber ischii. 6. Transversus perinei. 7. External sphincter ani. 8. Aponeurotic insertion into apex of coccyx. 9. Attachment to bulbo-cavernous raphe. 10. Fibers of insertion into perineum, divided. 11. Upper layer of external sphincter. 12. Internal sphincter. 13. Levator ani. 14. Obturator internus. 15. Internal border of gluteus maximus.

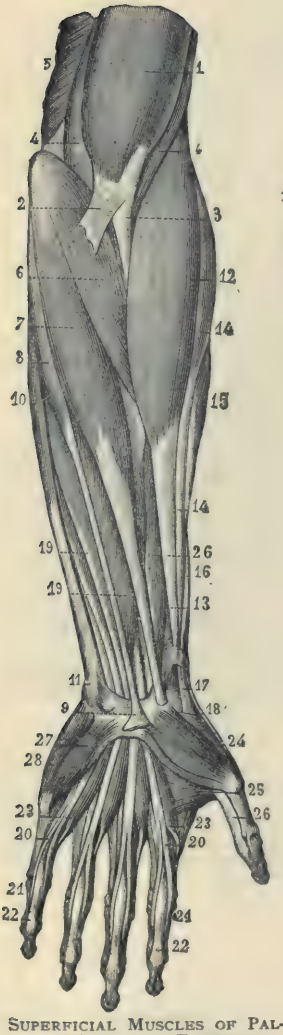


BICEPS AND CORACO-BRACHIALIS.

1. Biceps. 2. Short head. 3. Long head. 4. Tendon of insertion into radius. 5. Bicipital fascia. 6. Coraco-brachialis. 7, 8. Laminæ of tendon of insertion of pectoralis major. 9. Attachment of latissimus dorsi. 10. Teres major. 11. Subscapularis. 12. Brachialis anticus. 13. Long, middle, or scapular head of triceps. 14. Internal or short humeral head. 15. Supinator longus. 16. Extensor carpi radialis longior.

MUSCLE OF GUTHRIE.

1. Bulbo-cavernosus (erector penis) muscle. 2. Muscle of Guthrie (transversus perinei profundus). 3. Superficial transverse muscle. 4. External sphincter ani. 5. Levator ani.



MUSCLE OF GUTHRIE AND WILSON.

1. Bulb of urethra. 2, 2. Muscle of Guthrie (transversus perinei profundus). 3. Muscle of Wilson. 4. Transversus perinei superficialis. 5. External sphincter ani. 6. Levator ani.

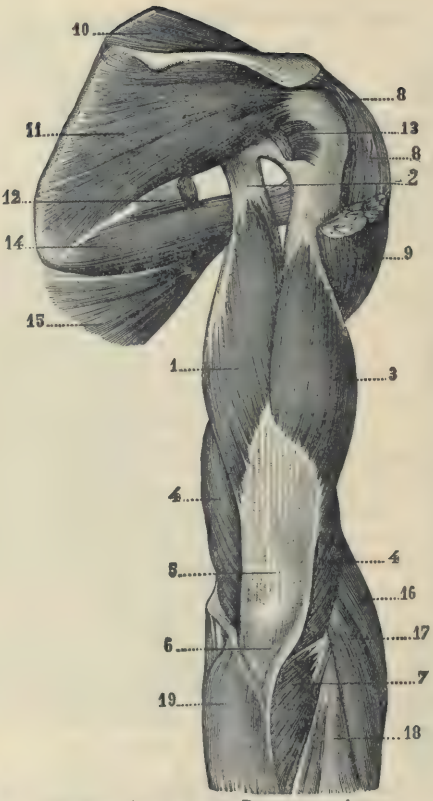


TABLE OF MUSCLES.—*Continued.*

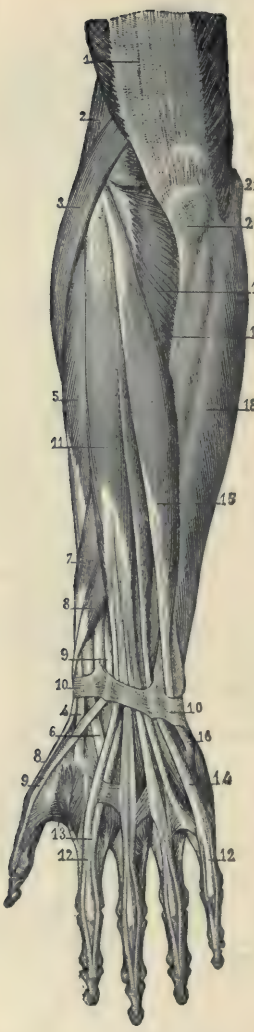
NAME.	ORIGIN.	INSERTION.	INNERVATION.	FUNCTION.
Extensor primi internodii hallucis longus (*anomalous*).	Fibula and interosseous membrane.	Inner part of base of first phalanx of hallux.		
Extensor primi internodii pollicis.	Back of radius.	Base of first phalanx of thumb.	Posterior interosseous.	Extends thumb.
Extensor primi internodii pollicis et indicis (*anomalous*).	Between extensor indicis and extensor secundi internodii pollicis.	First phalanges of thumb and index finger.		
Extensor proprius digiti minimi.	Lower part of ulna, or posterior ligament of wrist-joint.	Base of first phalanx of little finger.		
Extensor proprius hallucis.	Middle of fibula.	Base of last phalanx of great toe.	Anterior tibial.	Extends great toe.
Extensor secundi internodii pollicis.	Back of ulna.	Base of last phalanx of thumb.	Posterior interosseous.	Extends thumb.
Flexor accessorius digitorum pedis (*2 heads*).	1. Inner; 2. Outer surface of os calcis.	Tendon of flexor longus digitorum.	External plantar.	Accessory flexor of toes.
Flexor accessorius longus (*anomalous*).	Fascia over flexor longus hallucis.	Sesamoid bone in tendon of peroneus longus.		
Flexor accessorius longus digitorum pedis.	Shaft of tibia or fibula.	Tubercle of os calcis, and joins tendon of long flexor.	External plantar.	Assists in flexing toes.
Flexor brevis digitorum pedis.	Inner tuberosity of os calcis and plantar fascia.	Second phalanges of the lesser toes.	Internal plantar.	Flexes lesser toes.
Flexor brevis hallucis.	Under surface of cuboid, plantar ligaments, and external cuneiform.	Base of first phalanx of great toe.	Internal plantar.	Flexes and slightly adducts first phalanx of great toe.
Flexor brevis minimi digiti manus.	Unciform bone and annular ligament.	First phalanx of little finger.	Ulnar.	Flexes little finger.
Flexor brevis minimi digiti pedis.	Base of fifth metatarsal.	Base of first phalanx of little toe.	External plantar.	Flexes little toe.
Flexor brevis pollicis manus.	2 heads—*outer:* lower border of anterior annular ligament; ridge of trapezium; *inner:* os magnum, and bases of first, second, and third metacarpal bones.	Base of first phalanx of thumb.	*Outer head*—median, palmar branch. *Inner head*—deep ulnar.	Flexes metacarpal bone of thumb.
Flexor brevis pollicis pedis.	See *Flexor brevis hallucis.*			
Flexor carpi radialis.	Internal condyle of humerus.	Metacarpal bone of index finger.	Median.	Flexes wrist.
Flexor carpi radialis vel profundus (*anomalous*).	Anterior surface of radius, above the pronator quadratus.	Annular ligament or trapezium, magnum or base of second or third metacarpal bone.		
Flexor carpi ulnaris (*2 heads*).	1. Internal condyle. 2. Olecranon and ulna.	5th metacarpal, annular lig. and pisiform bone.	Ulnar.	Flexes wrist.
Flexor cruris.	See *Biceps femoris.*			
Flexor indicis.	The name given to the indicial portion of the flexor profundus digitorum, when it is distinct.			
Flexor longus digitorum pedis.	Shaft of tibia.	Last phalanges of toes.	Posterior tibial.	Flexes phalanges and extends ankle.
Flexor longus hallucis.	Lower two-thirds of shaft of fibula.	Last phalanx of great toe.	Posterior tibial.	Flexes great toe.
Flexor longus pollicis.	Shaft of radius and coronoid process of ulna.	Last phalanx of thumb.	Anterior interosseous.	Flexes the phalanx.
Flexor ossis metacarpi pollicis.	See *Opponens pollicis.*			
Flexor perforatus.	See *Flexor brevis digitorum pedis.*			

SUPERFICIAL MUSCLES OF PALMAR ASPECT OF FOREARM.

1. Lower portion of biceps. 2. Bicipital fascia. 3. Tendon of insertion into radius. 4, 4. Brachialis anticus. 5. Internal head of triceps. 6. Pronator radii teres. 7. Flexor carpi radialis. 8. Palmaris longus. 9. Its termination in palmar ligament. 10. Flexor carpi ulnaris. 11. Its attachment to pisiform bone. 12. Supinator longus. 13. Its attachment to styloid process of radius. 14, 14. Extensor carpi radialis longior. 15. Extensor carpi radialis brevior. 16. Extensor ossis metacarpi pollicis. 17. Its tendon of insertion into base of first metacarpal bone. 18. Tendon of extensor secundi internodii pollicis. 19, 19. Flexor sublimis digitorum. 20, 20. Tendons of this muscle. 21, 21. Their attachment to second phalanges of fingers. 22, 22. Attachment of tendons of flexor profundus digitorum to last phalanges of fingers. 23, 23. Lumbricales. 24. Abductor pollicis. 25. Its insertion into first phalanx of thumb. 26, 26. Flexor longus pollicis. 27. Flexor brevis minimi digiti. 28. Abductor minimi digiti.

TRICEPS BRACHIALIS, POSTERIOR ASPECT.

1. Long, middle, or scapular head. 2. Its tendon of origin from scapula. 3. External, or long humeral head. 4. Internal, or short humeral head. 5. Common tendon. 6. Attachment to olecranon. 7. Anconeus. 8, 8. Upper portion of deltoid, posterior half removed. 9. Lower portion. 10 Supraspinatus. 11. Infraspinatus. 12. Teres minor, middle portion removed. 13. Insertion of teres minor into humerus. 14. Teres major. 15. Upper extremity of latissimus dorsi. 16 Supinator longus. 17. Extensor carpi radialis longior. 18. Extensor carpi ulnaris. 19. Flexor carpi ulnaris.



FLEXOR SUBLIMIS DIGITORUM.

1. Flexor sublimis digitorum. 2. Its origin from the epitrochlea. 3. Its origin from coronoid process of ulna 4, 4. Its aponeurosis of attachment to radius. 5, 5. Superficial tendons, for middle and ring fingers. 6, 6. Deep tendons, for little and index fingers. 7. Flexor longus pollicis. 8. Its tendon. 9, 9. Bifurcation of tendons of flexor sublimis. 10. Intervals between divisions. 11, 11. Tendons of flexor profundus. 12. Tendon of brachialis anticus. 13. Common tendon of origin of superficial epitrochlear muscles. 14. Tendon of biceps. 15. Supinator longus. 16. Its attachment to styloid process of radius. 17. Extensor carpi radialis longior. 18, 18. Tendon of attachment of pronator radii teres, divided. 19. Tendon of extensor carpi radialis. 21. Triceps. 21. Flexor carpi ulnaris. 22. Its attachment to pisiform bone. 23. Adductor minimi digiti. 24. Flexor brevis minimi digiti. 25. Adductor brevis pollicis.

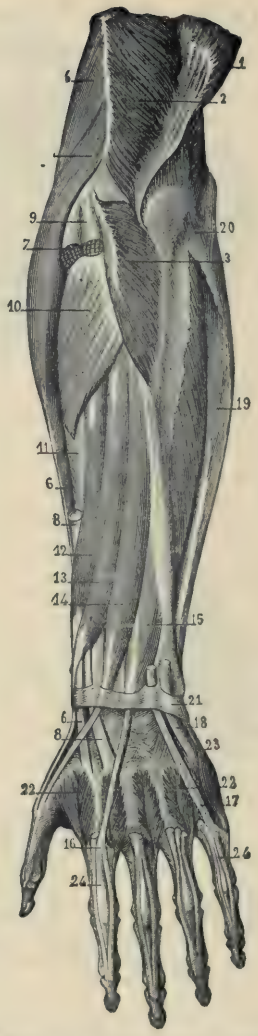


TABLE OF MUSCLES.—*Continued.*

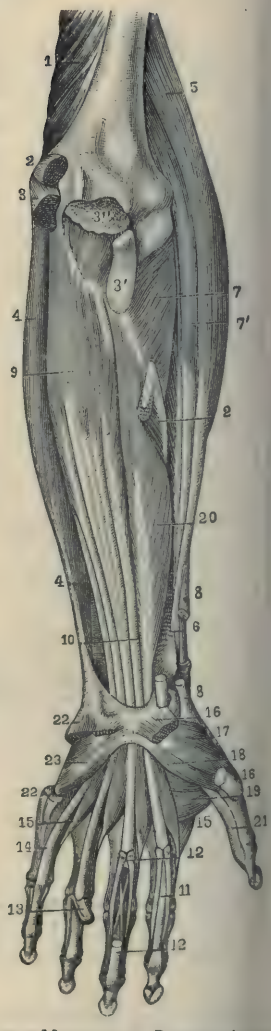
NAME.	ORIGIN.	INSERTION.	INNERVATION.	FUNCTION.
Flexor profundus digitorum.	Shaft of ulna.	Last phalanges by four tendons.	Ulnar and anterior interosseous.	Flexes the phalanges.
Flexor proprius digiti secundi (*anomalous*).	Shaft of tibia.	Base of phalanges of second toe.		
Flexor sublimis digitorum (*3 heads*).	1. Inner condyle. 2. Coronoid process. 3. Oblique line of radius.	Second phalanges by four tendons.	Median.	Flexes second phalanges.
Frontalis.	See *Occipito-frontalis.*			
Gastrocnemius (*2 heads*).	Condyles of femur.	Os calcis by tendo Achillis.	Internal popliteal.	Extends foot.
Gavard's.	The oblique muscular fibers of the wall of the stomach.			
Gemellus inferior.	Tuberosity of ischium and lesser sacro-sciatic notch.	Great trochanter.	Sacral.	External rotator of thigh.
Gemellus superior.	Ischial spine and lesser sacro-sciatic notch.	Great trochanter.	Sacral.	External rotator of thigh.
Genio-hyo-glossus.	Superior genial tubercle of inferior maxillary bone.	Hyoid and inferior surface of tongue.	Hypoglossal.	Retracts and protrudes tongue.
Genio-hyoid.	Inferior genial tubercle of inferior maxillary bone.	Body of hyoid.	Hypoglossal.	Elevates and advances hyoid.
Gluteus maximus.	Sup. curved iliac line and crest, sacrum, and coccyx.	Fascia and femur below great trochanter.	Inferior gluteal and sacral plexus.	Extends, abducts, and rotates thigh outward.
Gluteus medius.	Ilium between superior and middle curved lines.	Oblique line of great trochanter.	Superior gluteal.	Rotates, abducts, and advances thigh.
Gluteus minimus.	Ilium between middle and inferior curved lines.	Great trochanter.	Superior gluteal.	Rotates, abducts, and draws thigh forward.
Gluteus quartus.	See *Accessory gluteus minimus.*			
Gracilis.	Rami of pubes and ischium.	Tibia, upper and inner part.	Obturator.	Flexes and abducts leg.
Grinning.	See *Levator anguli oris.*			
Gubernaculum testis.	See *Cremaster.*			
Guthrie's.	See *Transversus perinei, deep.*			
Helicis major et minor.	Tubercle on helix.	Rim of helix near summit.	Auriculo-temporal and posterior auricular.	
Henle's.	See *Prerectalis.*			
Hepatico-diaphragmatic (*anomalous*).	Left side of central tendon of diaphragm.	Under surface of liver and obliterated ductus venosus and peritoneum.		
Hilton's	See *Compressor sacculi laryngis.*			
Horner's.	See *Ciliary* and *Tensor tarsi.*			
Houston's.	See *Compressor venæ dor salis penis.*			
Hyo-epiglottideus (*anomalous*).	Middle of ridge on lingual aspect of epiglottis.	Median tubercle on body of hyoid.		
Hyo-facialis.	A name applied to the anterior portion of the omo-hyoid, when the posterior belly is absent.			
Hyo-glossus.	Cornua of hyoid.	Side of tongue.	Hypoglossal.	Depresses side of tongue and retracts tongue.
Hyo-maxillaris (*anomaly of Stylo-hyoid*).	Lower jaw.	Hyoid bone.		
Hyo-pharyngeus.	See *Constrictor of pharynx, middle.*			



MUSCLES OF DORSAL ASPECT OF FOREARM, SUPERFICIAL LAYER.

1. Tendon of triceps. 2. Upper extremity of supinator longus. 3. Extensor carpi radialis longior. 4. Its attachment to second metacarpal bone. 5. Extensor carpi radialis brevior. 6. Its attachment to third metacarpal bone. 7. Extensor ossis metacarpi pollicis. 8, 8. Extensor primi internodii pollicis. 9, 9. Extensor secundi internodii pollicis. 10, 10. Annular ligament. 11. Extensor communis digitorum. 12, 12. Attachment of its four tendons to the second and third phalanges. 13. Tendon of the extensor indicis. 14. Tendon of extensor minimi digiti. 15. Extensor carpi ulnaris. 16. Its attachment to fifth metacarpal bone. 17. Anconeus. 18. Flexor carpi ulnaris. 19. Posterior border of ulna. 20. Olecranon. 21. Internal condyle of humerus.

MUSCLES OF DORSAL ASPECT OF FOREARM, DEEP LAYER.

1. Tendon of triceps. 2. Internal head of triceps. 3. Anconeus. 4. Humeral attachment of supinator longus. 5. Humeral attachment of extensor carpi radialis longior. 6, 6. Tendon of insertion into second metacarpal bone. 7. Upper extremity of extensor carpi radialis brevior. 8, 8. Its tendon of insertion into third metacarpal bone. 9. Common tendon of the superficial and deep muscles. 10. Supinator brevis. 11. Radial insertion of pronator radii teres. 12. Extensor ossis metacarpi pollicis. 13. Extensor primi internodii pollicis. 14. Extensor secundi internodii pollicis. 15. Extensor indicis. 16. Its tendon, uniting with corresponding tendon of common extensor. 17. Tendon of extensor minimi digiti. 18. Tendon of extensor carpi ulnaris. 19. Flexor carpi ulnaris, displaced to show flexor profundus digitorum. 20. Fibrous arch extending from epitrochlea to olecranon and forming the upper portion of the deep flexor. 21. Annular ligament. 22, 22. Dorsal interossei. 23. Abductor minimi digiti. 24, 24. Tendons of extensor communis digitorum.

DEEP MUSCLES OF PALMAR ASPECT OF FOREARM.

1. Lower portion of triceps. 2, 2. A tachments of pronator radii teres. Attachment of flexor carpi radiali palmaris longus, and flexor sublim digitorum. 3′. Tendon of biceps. 3 Tendon of brachialis anticus. 4, Flexor carpi ulnaris. 5. Supinat longus. 6. Its distal attachment. Supinator brevis. 7′. Extensor ca radialis longior. 8, 8. Extensor oss metacarpi pollicis. 9. Flexor protu dus digitorum. 10. Its four tendon 11. Tendon for index finger. 12, Tendon for middle finger. 13. Te don of flexor sublimis. 14 Tend of flexor profundus for little finge 15, 15. Lumbricales 16, 16 Attac ments of abductor brevis. 17. Oppo nens pollicis. 18. Flexor brevis po licis. 19. Adductor pollicis. 20. Flex longus pollicis. 21. Its tendon. 22. Attachments of flexor brevis an adductor minimi digiti. 23. Oppo nens minimi digiti.

TABLE OF MUSCLES.—*Continued.*

NAME.	ORIGIN.	INSERTION.	INNERVATION.	FUNCTION.
Iliacus.	Iliac fossa, crest, base of sacrum.	Lesser trochanter, upper part shaft femur.	Anterior crural.	Flexes and rotates femur outward.
Iliacus minor (*anomalous*).	Anterior inferior spine of ilium.	Inferior part anterior intertrochanteric line.		
Iliacus, superficial (*anomalous*).	Crest of ilium, last lumbar vertebra or upper border of sacrum.	Iliacus below Poupart's ligament.		
Ilio-capsularis (*anomalous*).	See *Iliacus minor*.			
Ilio-costal.	See *Sacro-lumbar*.			
Incisuræ Santorini.	See *Intertragicus*.			
Infracostals, 10.	Inner surface of ribs.	Inner surface of two or three ribs above.	Intercostal.	Expiration, by depressing ribs.
Infra-spinatus.	Infra-spinous fossa.	Great tuberosity of humerus.	Supra-scapular.	Rotates humerus outward.
Inter-arytenoid.	One arytenoid cartilage.	The other arytenoid cartilage.	Recurrent laryngeal.	Approximates arytenoid cartilages.
Interclavicular (*anomalous*).	Clavicle, anterior to rhomboid ligament.	Corresponding point on opposite clavicle.		
Intercostals, external, 11.	Outer lip of inferior costal border.	Superior border of ribs above.	Intercostal.	Raise ribs in inspiration.
Intercostals, internal, 11.	Inner lip of inferior costal border.	Superior border of ribs below.	Intercostal.	Depress ribs in expiration.
Interossei of foot, dorsal (4).	Adjacent surfaces of metatarsal bones.	Bases of first phalanges.	External plantar.	Flex first phalanges and extend 2d and 3d, also abduct 2d, 3d, and 4th toes.
Interossei of foot, plantar (3).	Inner lower surface of 3 outer metatarsal bones.	Bases of first phalanges of three outer toes.	External plantar.	Abduct first phalanges of three outer toes.
Interossei of hand, dorsal (4).	Five metacarpal bones.	Sides of aponeurosis of extensor communis and adjacent parts of first phalanges.	Ulnar.	Abduct index, middle, and ring fingers, aid in flexing first phalanges and extending second and third.
Interossei of hand, palmar (3).	Sides of metacarpal bones.	Aponeurosis of extensor tendons, adjacent part of first phalanges.	Ulnar.	Adduct index, ring, and little fingers, aid in flexing first phalanges and in extending second and third.
Interosseus primus volaris (*anomalous*).	Ulnar side of base of first metacarpal.	Base of first phalanx of thumb.		
Inter-spinales.	Upper surface of spines of vertebra, near tip.	Posterior part of lower surface of spine above.	Internal divisions of posterior branches of spinal nerves.	Extend the vertebræ next above.
Intertragicus.	Anterior wall cartilaginous canal of ear.	Opposite side of larger fissure of ear.	Posterior auricular.	Dilates concha.
Inter-transversales.	Between transverse proc. of contiguous vertebræ.		Spinal nerves.	Flex laterally the spinal column.
Ischio-calcaneus (*anomalous*).	Long head of biceps flexor cruris.	Gastrocnemius, external tuberosity of tibia, femoral aponeurosis or tendo Achillis.		
Ischio-cavernosus.	See *Erector penis*.			
Ischio-condyloid.	A name given to the portion of the adductor magnus inserted into the internal condyle of femur.			
Ischio-femoral (*anomalous*).	Inner edge of great tuberosity of ischium.	Lower end of gluteal ridge of femur.		
Jarjavay's.	See *Depressor urethræ*.			
Kerato-cricoid (*anomalous*).	Cricoid cartilage near its lower border.	Inferior cornu of thyroid cartilage.		

GLUTEUS MAXIMUS MUSCLE.

1. Gluteus maximus. 2. Its inferior portion. 3. Fibers of attachment to linea aspera. 4. Superior portion. 5, 5. Tendinous fibers of insertion into linea aspera. 6. Upper portion of femoral aponeurosis. 7. Duplicature of this aponeurosis at superior level of gluteus maximus. 8. Portion of its superficial layer attached to tendinous bands. 9. Lower extremity of tensor vaginæ femoris. 10, 10. Portion of femoral aponeurosis continuous with tendinous fibers of gluteus maximus. 11. Upper portion of biceps femoris. 12. Upper portion of semitendinosus. 13. Upper portion of semimembranosus. 14. Gracilis.

GLUTEUS MEDIUS MUSCLE.

1. Inner extremity of gluteus maximus. 2. Attachment of gluteus maximus to linea aspera. 3, 3. Triangular aponeurosis formed by convergence of tendinous fibers of upper half of gluteus maximus. 4. Gluteus medius. 5. Its tendon of insertion into great trochanter. 6. Upper portion of femoral aponeurosis. 7. Pyramidalis. 8. Obturator internus. 9. Superior gemellus. 10. Inferior gemellus. 11. Quadratus femoris. 12. Semi-tendinosus. 13. Upper portion of long head of biceps. 14. Adductor magnus. 15. Gracilis. 16. Vastus externus.

PECTINEUS AND ADDUCTOR LONGUS.

1. Femur. 2. Ilium. 3. Pubis. 4. Pectineus. 5. Adductor longus. 6. Lower portion of adductor magnus. 7. Tendon of rectus femoris. 8. 8. Orifices for vessels. 9. Orifices for femoral vessels.

ADDUCTOR BREVIS AND ADDUCTOR MAGNUS.

1. Femur. 2. Ilium 3. Pubis. 4. Obturator externus. 5 Upper portion of adductor magnus. 6. Upper portion of adductor brevis. 7. Inferior portion of adductor brevis. 8. Middle portion of adductor magnus. 9. Inferior portion. 10. Tendon of insertion into internal condyle of femur. 11. Orifice for femoral vessels. 12. Orifice for internal circumflex artery and veins.

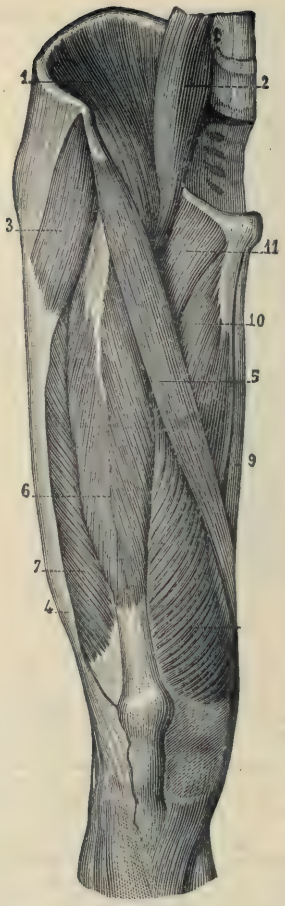


TABLE OF MUSCLES.—*Continued.*

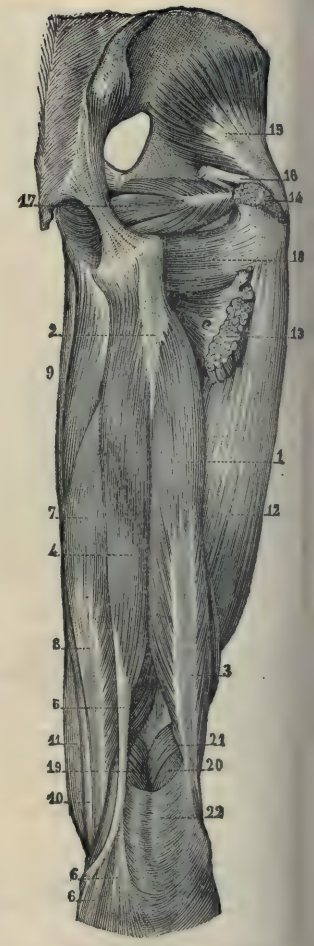
NAME.	ORIGIN.	INSERTION.	INNERVATION.	FUNCTION.
Kerato-glossus.	Those fibers of the hyoglossus that arise from the greater cornu of the hyoid bone. See *Hyoglossus.*			
Kerato-thyroid (*anomalous*).	Lower border of cricoid cartilage.	Inferior cornu of thyroid cartilage.		
Kissing.	See *Orbicularis oris.*			
Laryngo-pharyngeus.	See *Constrictor of pharynx, inferior.*			
Lateralis abdominis.	See *Accessory abdominal oblique.*			
Latissimus dorsi.	Spines of 6 lower dorsal and lumbar and sacral vertebræ, crest of ilium, and 3 or 4 lower ribs.	Bicipital groove of humerus.	Long subscapular.	Draws arm backward and downward and rotates it inward.
Laxator tympani major.	Spinous process sphenoid and Eustachian tube.	Neck of malleus.	Facial.	Relaxes membrana tympani.
Levator anguli oris.	Canine fossa of superior maxillary bone.	Angle of mouth.	Facial, infraorbital branch.	Elevates angle of mouth.
Levator anguli scapulæ.	Transverse processes of four upper cervical vert.	Posterior border of scapula.	Fifth cervical and cervical plexus.	Elevates upper angle of scapula.
Levator ani.	Posterior portion of body and ramus of pubes, pelvic fascia, ischial spine.	Rectum, coccyx, and fibrous raphe.	Sacral and perineal.	Supports rectum and vagina.
Levator claviculæ (*anomalous*).	Transverse processes first and second cervical vertebræ.	Outer half of clavicle.		
Levator glandulæ thyroidea (*anomalous*).	Isthmus or pyramidal process of thyroid body.	Anterior surface of body of hyoid.		
Levator labii inferioris.	Incisive fossa of inferior maxillary bone.	Skin of lower lip.	Facial, supra-maxillary branch.	Elevates lower lip.
Levator labii superioris.	Lower margin of orbit.	Upper lip.	Facial, infraorbital branch.	Elevates upper lip.
Levator labii superioris alæque nasi.	Nasal process of superior maxillary bone.	Alar cartilage and upper lip.	Facial, infraorbital branch.	Elevates upper lip, dilates nostril.
Levator menti.	See *Levator labii inferioris.*			
Levator palati.	Petrous portion of temporal bone.	Soft palate.	Spheno-palatine ganglion (facial).	Elevates soft palate.
Levator palpebræ sup.	Lesser wing of sphenoid.	Upper tarsal cartilage.	Third.	Lifts upper lid.
Levator pharyngis.	See *Stylo-pharyngeus.*			
Levator prostatæ.	A name given to the anterior portion of the levator ani muscle.			
Levator thyroideæ (*anomalous*).	Hyoid bone.	Left lateral lobe of thyroid body.		
Levatores costarum, 12.	Transv. proc. of last cervical and dorsal vertebræ	Each to the rib below.	Intercostal.	Raise ribs.
Lingualis.	Under surface of tongue.		Chorda tympani and hypoglossal.	Elevates middle of tongue.
Longissimus dorsi.	Erector spinæ.	Transverse processes of lumbar and dorsal vertebræ and 7th–11th ribs.	Branches of lumbar and dorsal.	Erects spine and bends trunk backward.
Longus colli:—				
1. Superior oblique portion.	Transverse processes 3d–5th cervical.	Anterior tubercle of atlas.		
2. Inferior oblique portion.	Bodies of 1st–3d dorsal.	Transverse processes 5th–6th cervical.	Lower cervical.	Flexes cervical vertebræ.
3. Vertical portion.	Bodies of three dorsal and two cervical.	Bodies of 2d–4th cervical.		
Lumbricales, 4, of foot.	Tendons of flexor longus digitorum.	First phalanges of the lesser toes.	Internal and external plantar.	Accessory flexors.

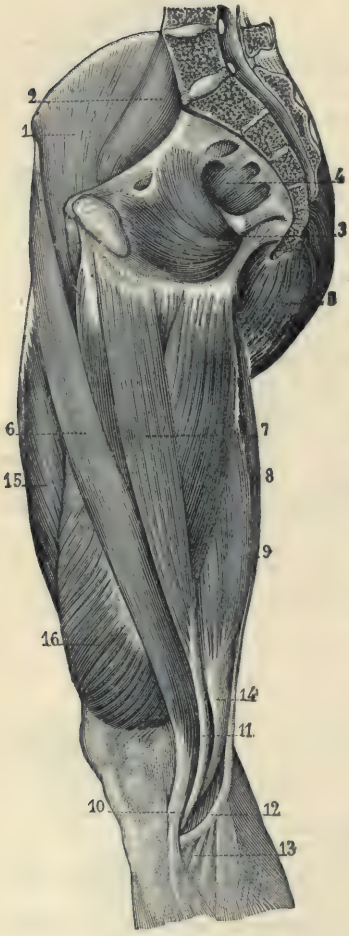


SHORT HEAD OF BICEPS AND SEMIMEMBRANOSUS.

1. Attachment to ischium of long head of biceps and semitendinosus: 2. Semimembranosus. 3. Its superior tendon. 4. Its inferior tendon. 5. Middle portion of tendon. 6. Its anterior portion. 7. Its posterior portion. 8. Section of long head of biceps. 9. Its short head. 10. Its attachment to head of fibula. 11, 11, 11. Adductor magnus. 12, 12. Orifices for passage of perforating arteries and veins. 13. Vastus externus. 14, 14. Insertion of gluteus maximus. 15. Divided expansion of tendon of this muscle, continuous with the aponeurosis of the vastus externus. 16. Attachment of quadratus femoris. 17. Tendon of obturator externus. 18. Attachment of gluteus medius. 19. Obturator internus. 20. Tendon of pyramidalis. 21. Gluteus minimus. 22. Divided inner head of gastrocnemius. 23. Outer head. 24. Plantaris. 25. Popliteus. 26. Soleus. 27. Fibrous ring for artery, vein and nerve.

MUSCLES OF ANTERIOR ASPECT OF THIGH.

1. Iliacus. 2. Psoas magnus. 3. Tensor vaginæ femoris. 4. Fibrous band by which this muscle is attached to external tuberosity of tibia. 5. Sartorius. 6. Rectus femoris. 7. Vastus externus. 8. Vastus internus. 9. Gracilis. 10. Adductor longus. 11. Pectineus.



LONG HEAD OF BICEPS AND SEMITENDINOSUS.

1. Long head of biceps. 2. Common tendon of long head of biceps and semitendinosus. 3. Inferior tendon of biceps. 4. Semitendinosus. 5. Its tendon. 6, 6. Its tendinous expansions, continuous with aponeurosis of leg. 7. Semimembranosus. 8. Its inferior tendon. 9. Gracilis. 10. Its tendon. 11. Sartorius. 12. Vastus externus. 13. Femoral attachment of gluteus maximus. 14. Insertion of gluteus medius. 15. Gluteus minimus. 16. Tendon of pyriformis. 17. Obturator internus. 18. Quadratus femoris. 19. Inner head of gastrocnemius. 20. Outer head of gastrocnemius. 21. Plantaris. 22. Popliteal aponeurosis.

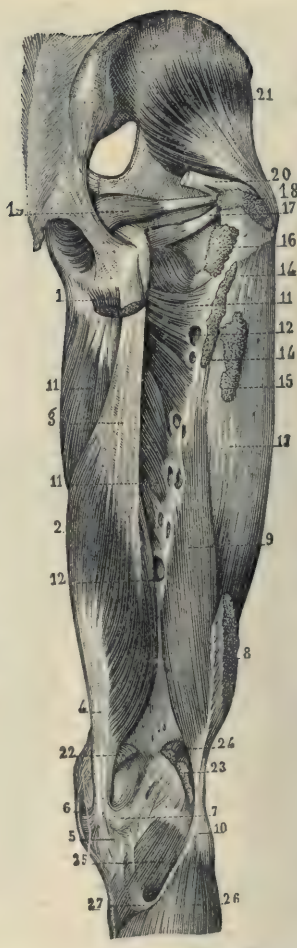


TABLE OF MUSCLES.—*Continued.*

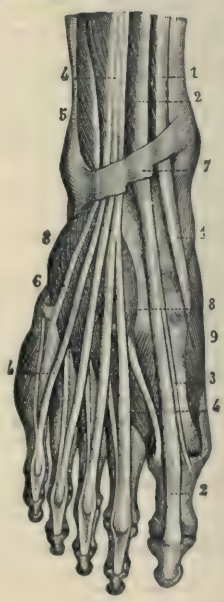
NAME.	ORIGIN.	INSERTION.	INNERVATION.	FUNCTION.
Lumbricales, 4, of hand.	Tendons of flexor profundus digitorum.	Tendons of common extensor.	Median and ulnar.	Flex first phalanges.
Masseter.	Zygomatic arch.	Angle and ramus of jaw.	Inferior maxillary.	Muscle of mastication.
Mento-hyoideus (*anomalous*).	Body of hyoid bone.	Symphysis of chin, superficial to mylo-hyoid muscle.		
Merkel's.	See *Kerato-cricoid.*			
Midriff.	See *Diaphragm.*			
Müller's.	See *Ciliary.*			
Müller's (*orbital*).	Connected with the orbital periosteum; it crosses the spheno-maxillary fissure.		Sympathetic.	
Müller's (*superior palpebral*).	Connected with the levator palpebræ superioris.	Along the upper border of the tarsus.	Sympathetic.	Helps raise upper lid.
Multifidus spinæ.	Sacrum, iliac spine, articular processes lumbar and cervical vertebræ, and transverse proc. of dorsal and 7th cervical.	Laminæ and spines from last lumbar to second cervical vertebræ.	Posterior spinal branches.	Erects and rotates spinal column.
Musculus accessorius ad sacro-lumbalem.	Angles of six lower ribs.	Angles of six upper ribs.	Branches of dorsal.	Erects spine and bends trunk backward.
Mylo-glossus (*anomalous*).	Angle of lower jaw, or stylo-maxillary ligament.	Side of tongue between stylo-glossus and hyo-glossus.		
Mylo-hyoid.	Mylo-hyoid ridge of inferior maxillary bone.	Body of hyoid and raphe.	Inferior dental.	Elevates and advances hyoid. Forms the floor of the mouth.
Naso-labialis.	Nasal septum.	Upper lip.		
Obliquus auris.	Concha of ear.	Fossa of anti-helix.	Temporal and posterior annular.	
Obliquus capitis inferioris.	Spinous process of axis.	Transverse process of atlas.	Sub-occipital and great occipital.	Rotates atlas and cranium.
Obliquus capitis superioris.	Transverse process of atlas.	Occipital bone.	Sub-occipital and great occipital.	Draws head backward.
Obliquus externus.	Eight lower ribs.	Middle line, iliac crest, Poupart's ligament.	Intercostal, ilio-hypogastric, ilio-inguinal.	Compresses viscera and flexes thorax.
Obliquus inferioris.	Orbital plate of superior maxillary bone.	Sclerotic.	Third.	Rotates eyeball upward and outward.
Obliquus internus.	Lumbar fascia, iliac crest, Poupart's ligament.	Three lower ribs, linea alba, pubic crest, pectineal line.	Intercostal, ilio-hypogastric, ilio-inguinal.	Compresses viscera, flexes thorax, and assists in expiration.
Obliquus superior.	Above optic foramen, through pulley.	Sclerotic.	Fourth.	Rotates eyeball downward and inward.
Obturator externus.	Obturator foramen and membrane.	Digital fossa, base of great trochanter.	Obturator.	External rotator of thigh.
Obturator internus.	Obturator foramen and membrane.	Great trochanter.	Sacral.	External rotator of thigh.
Occipitalis.	See *Occipito-frontalis.*			
Occipitalis minor (*anomalous*).	Fascia over upper end of trapezius.	Fascia over upper end of sterno-mastoid.	Small occipital.	
Occipito-frontalis.	Superior curved line of occiput and angular process of frontal.	Aponeurosis.	Posterior auricular, small occipital, facial.	Moves scalp. Facial expression.
Occipito-hyoid (*anomalous*).	Mastoid process and adjacent portion of superior oblique line of occiput.	Hyoid bone near insertion of posterior belly of digastric.		
Occipito-pharyngeus (*anomalous*).	Basilar process of occiput.	Constrictor of pharynx.		

MUSCLES OF INNER ASPECT OF THIGH.

1. Iliacus. 2. Psoas magnus. 3. Obturator internus. 4. Pyriformis. 5. Gluteus maximus. 6. Sartorius. 7. Gracilis. 8. Semitendinosus. 9. Semimembranosus. 10. Tendon of sartorius. 11. Tendon of gracilis. 12. Tendon of semitendinosus. 13. Its expansions. 14. Tendon of semimembranosus. 15. Rectus femoris. 16. Vastus internus.

SHORT PORTION OF BICEPS AND SEMIMEMBRANOSUS.

1. Attachment to ischium of long portion of biceps and semitendinosus. 2. Semimembranosus. 3. Its superior tendon. 4. Its inferior tendon. 5. Middle portion of this tendon. 6. Its anterior portion. 7. Its posterior portion. 8. Section of long portion of biceps. 9. Its short portion. 10. Its attachment to the head of fibula. 11, 11, 11. Adductor magnus. 12, 12. Series of perforations for the passage of arteries and veins. 13. Vastus externus. 14, 14. Insertion of gluteus maximus. 15. Section of expansion by which the tendon of this muscle is continuous with the aponeurosis of the vastus externus. 16. Attachment of quadratus femoris. 17. Tendon of obturator externus. 18. Attachment of gluteus medius. 19. Obturator internus. 20. Tendon of pyriformis. 21. Gluteus minimus. 22. Inner head of gastrocnemius. 23. Outer head. 24. Divided plantaris. 25. Popliteus. 26. Soleus. 27. Tendinous ring in soleus.



MUSCLES OF THE SOLE OF FOOT, MIDDLE LAYER.

1. Flexor accessorius. 2. Tendon of flexor longus digitorum. 3. Tendon of flexor longus pollicis. 4. First lumbricalis. 5. Tendon of flexor brevis digitorum. 6. Flexor brevis minimi digiti. 7. Inner fasciculus of flexor brevis pollicis. 8. Outer fasciculus. 9. Tuberosity of fifth metatarsal bone. 10. Fibrous sheath of peroneus longus. 11. Os calcis.

MUSCLES OF THE SOLE OF FOOT, DEEP LAYER.

1. Os calcis. 2. 2. Fibrous sheath of flexor longus pollicis. 3. Fibrous sheath of flexor longus digitorum. 4. Inferior calcaneocuboid ligament. 5. Flexor brevis pollicis. 6. Adductor pollicis. 7. Flexor brevis minimi digiti. 8. Transversus pedis. 9. Plantar interosseous. 10 Sheath of tendon of peroneus longus.

EXTENSOR TENDONS OF TOES.

1, 1. Tendon of tibialis anticus. 2, 2. Tendon of extensor proprius pollicis. 3. Delicate division of this tendon, inserted into first phalanx of great toe. 4, 4. Tendons of extensor longus digitorum. 5. Peroneus tertius. 6. Its attachment to fifth metatarsal bone. 7. Annular ligament. 8, 8. Extensor brevis digitorum. 9. Adductor pollicis.

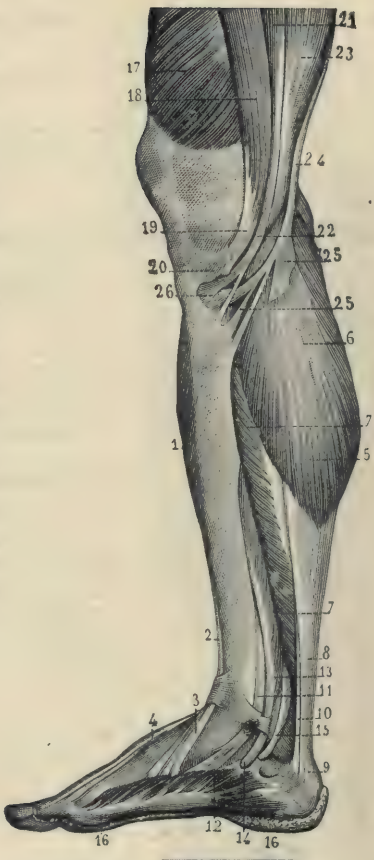


TABLE OF MUSCLES.—*Continued.*

NAME.	ORIGIN.	INSERTION.	INNERVATION.	FUNCTION.
Occipito-scapular (*anomalous*).	Occipital bone near splenius capitis muscle.	Dorsal border of scapula at base of spine.		
Omo-hyoid.	Upper border of scapula.	Body of hyoid.	Descendens and communicans noni (hypoglossi).	Depresses and retracts hyoid.
Opponens hallucis (*anomalous*).	Tendon of adductor hallucis muscle.	Base of metatarsal bone of great toe.		
Opponens minimi digiti.	Unciform bone.	Fifth metacarpal.	Ulnar.	Flexes little finger.
Opponens minimi digiti pedis.	See *Flexor brevis minimi digiti.*			
Opponens pollicis.	Trapezium, anterior annular ligament.	Metacarpal bone of thumb.	Median, palmar division.	Flexes thumb.
Orbicularis oris.	Nasal septum and canine fossa of inferior maxilla, by accessory fibers.	Forms lips and sphincter of mouth.	Facial, buccal and supramaxillary branches.	Closes mouth.
Orbicularis palpebrarum.	Mesal margin of orbit.	Lateral margin of orbit.	Facial.	Closes eyelids.
Orbital.	See *Müller's.*			
Orbito-palpebral.	See *Palpebral, superior* (*Müller's*).			
Palato-glossus.	Soft palate.	Side and dorsum of tongue.	Spheno-palatine ganglion.	Constricts the fauces.
Palato-pharyngeus.	Soft palate.	Thyroid cartilage and pharynx.	Spheno-palatine ganglion.	Closes posterior nares.
Palmaris brevis.	Annular ligament and palmar fascia.	Skin of palm of hand.	Ulnar.	Corrugates skin of palm.
Palmaris interossei.	Palmar surfaces second, fourth, and fifth metacarpals.	Bases of first phalanges of corresponding fingers.	Ulnar.	Adductors of fingers.
Palmaris longus.	Internal condyle.	Annular ligament and palmar fascia.	Median.	Tenses palmar fascia.
Palpebral, superior.	See *Müller's.*			
Pectineus.	Ilio-pectineal line and pubes.	Femur below lesser trochanter.	Anterior crural, obturator.	Flexes and rotates outward the thigh.
Pectoralis major.	Clavicle, sternum, and costal cartilages.	External bicipital ridge of humerus.	Anterior thoracic, external and internal.	Draws arm downward and forward.
Pectoralis minimus.	First piece of sternum, and cartilage of first rib.	Coracoid process.	Anterior thoracic.	Depresses point of shoulder.
Pectoralis minor.	Third, fourth, and fifth ribs.	Coracoid process.	Anterior thoracic.	Depresses point of shoulder.
Peripenial.	A thin layer of unstriped muscular tissue forming the frenum of the penis.		Sympathetic.	
Peroneo-calcaneus internus (*anomalous*).	Lower part of posterior surface of fibula.	Front part, inner surface of calcaneum.		
Peroneo-tibialis (*anomalous*).	Inner side of head of fibula.	Upper end of oblique line of tibia.		
Peroneus accessorius.	Fibula between peronei longus and brevis.	With the peroneus longus.		
Peroneus brevis.	Middle third of shaft of fibula, externally.	Base of fifth metatarsal.	Musculo-cutaneous.	Extends foot.
Peroneus longus.	Head and shaft of fibula.	First metatarsal of great toe.	Musculo-cutaneous.	Extends and everts foot.
Peroneus quartus (*anomalous*).	Flexor surface of fibula near peroneus brevis.	Ridge of cuboid or peroneal tubercle of calcaneum.		
Peroneus quinti digiti (*anomalous*).	Lower fourth of fibula.	Aponeurosis on extensor surface of little toe.		
Peroneus tertius.	Lower fourth of fibula.	Fifth metatarsal bone.	Anterior tibial.	Flexes tarsus.

MUSCLES OF THE LEG, EXTERNAL ASPECT.

1. Tibialis anticus. 2, 2. Tendon of extensor proprius pollicis. 3, 3. Extensor longus digitorum. 4. Its tendons for four last toes. 5. Peroneus tertius. 6. Its attachment to last two metacarpal bones. 7. peroneus longus. 8. Its tendon. 9. Peroneus brevis. 10. Its tendon. 11. Outer head of gastrocnemius. 12, 12. Soleus. 13. Tendo Achillis. 14. Extensor brevis digitorum. 15, 15. Abductor minimi digiti. 16. Rectus femoris. 17. Vastus externus. 18. Its inferior fibers. 19. Tendon of biceps femoris. 20. External lateral ligament of knee. 21. Tendon of popliteus.

MUSCLES OF THE LEG, INTERNAL ASPECT.

1. Tibialis anticus. 2, 3. Its tendon. 4. Tendons of extensor communis digitorum. 5. Inner head of gastrocnemius. 6. Its aponeurosis of origin. 7. Soleus. 8. Tendo Achillis. 9. Its attachment to os calcis. 10. Tendon of plantaris. 11. Tendon of tibialis posticus. 12. Its attachment to scaphoid bone. 13, 14. Tendon of flexor longus digitorum. 15. Tendon of flexor longus pollicis. 16, 16. Adductor pollicis. 17. Vastus internus. 18. Sartorius. 19. Its tendon. 20. Its expansion, largely removed. 21. Gracilis. 22. Its tendon. 23. Tendon of semimembranosus. 24. Tendon of semitendinosus. 25, 25. Its fibrous expansions. 26. Common tendon of gracilis and semitendinosus.

MUSCLES OF EXTERNAL ASPECT OF LEG.

1. Tibialis anticus. 2. Extensor longus digitorum. 3. Tendon of extensor proprius pollicis. 4. Peroneus tertius. 5. Peroneus brevis. 6. Peroneus longus. 7. Soleus. 8. Outer head of gastrocnemius. 9. Head of fibula. 10. Tendon of biceps femoris. 11. Semimembranosus. 12. Tendon of rectus femoris. 13. Tendo Achillis. 14. External malleolus. 15. Annular ligament. 16. Insertion of peroneus tertius. 17. Insertion of peroneus brevis. 18. Extensor brevis digitorum. 19. Abductor minimi digiti. 20. Patella.

MUSCLES OF ANTERIOR ASPECT OF LEG.

1. Tendon of rectus femoris. 2. Tibia. 3. Tibialis anticus. 4. Extensor longus digitorum. 5. Extensor proprius pollicis. 6. Peroneus tertius. 7. Peroneus longus. 8. Peroneus brevis. 9. Outer head of gastrocnemius. 10. Inner head. 11. Extensor brevis digitorum. 12. Annular ligament.

TABLE OF MUSCLES.—*Continued.*

NAME.	ORIGIN.	INSERTION.	INNERVATION.	FUNCTION.
Petro-pharyngeus (*anomalous*).	Petrous portion of temporal bone.	Constrictors of pharynx.		
Petro-salpingo-staphylinus.	See *Levator palati.*			
Phillips'.	External superior tuberosity of radius, and external lateral ligament of ulnar articulation.	Proximal portions of phalanges.	Ulnar.	
Pisi-uncinatus (*anomalous*).	Pisiform bone.	Unciform process of unciform bone.		
Plantaris.	Outer bifurcation of linea aspera and posterior ligament of knee-joint.	Os calcis by means of the tendo Achillis.	Internal popliteal.	Extends foot.
Plantaris interossei.	Shafts of 3d, 4th, and 5th metatarsal bones.	Bases of first phalanges of corresponding toes.	External plantar.	Adducts toes.
Platysma myoides.	Clavicle, acromion, and fascia.	Inferior maxillary bone, angle of mouth.	Facial and superficial cervical.	Wrinkles skin and depresses mouth.
Popliteus.	External condyle of femur.	Shaft of tibia above oblique line.	Internal popliteal.	Flexes leg.
Popliteus minor (*anomalous*).	Femur at inner side of plantaris.	Posterior ligament of knee-joint.		
Prerectalis (of Henle) (*anomalous*).	Recto-vesical prolongation.	Prolongation of recto-vesical fascia into perineum.		Sympathetic.
Presternal.	See *Sternalis.*			
Pronator pedis.	See *Flexor accessorius longus digitorum pedis.*			
Pronator quadratus.	Lower fourth of ulna.	Lower ¼ shaft of radius.	Anterior interosseous.	Pronates hand.
Pronator radii teres.	Internal condyle and coronoid process	Outer side of shaft of radius.	Median.	Pronates hand.
Psoas magnus.	Bodies and transverse processes of last dorsal and all lumbar vertebræ.	Lesser trochanter.	Lumbar.	Flexes and rotates thigh outward, and flexes trunk on pelvis.
Psoas parvus.	Bodies of last dorsal and first lumbar vertebræ.	Ilio-pectineal eminence and iliac fascia.	Lumbar.	Flexes pelvis upon abdomen.
Pterygoid (external).	Two heads: 1, external pterygoid plate of sphenoid bone; 2, great wing.	Neck of condyle.	Inferior maxillary.	Draws inferior maxillary bone forward.
Pterygoid (internal).	Pterygoid fossa of sphenoid bone.	Inner surface of angle of jaw.	Inferior maxillary.	Raises and draws inferior maxilla forward.
Pterygoideus proprius (*anomalous*).	Crest on great wing of sphenoid.	Posterior border of external pterygoid plate, occasionally the tuberosity of superior maxilla.		
Pterygo-pharyngeus (*anomalous*).	Hamular process of sphenoid bone.	Constrictors of pharynx.		
Pterygo-spinous (*anomalous*).	Alar spine of sphenoid bone.	Posterior margin of the external pterygoid.		
Pyramidalis.	Pubes.	Linea alba.	Ilio-hypogastric.	Tenses linea alba.
Pyramidalis nasi.	Occipito-frontalis.	Compressor naris.	Facial nerve, infraorbital branch.	Depresses eyebrow.
Pyriformis.	Front of sacrum, through great sciatic foramen.	Great trochanter.	Sacral branch.	External rotator of thigh.
Quadratus femoris.	Tuberosity of the ischium.	Quadrate line of femur.	First sacral and fifth lumbar.	External rotator of thigh.
Quadratus lumborum.	Crest of ilium, transverse processes of lower three lumbar vertebræ.	Last rib, transverse processes of upper three lumbar vertebræ.	Upper lumbar and twelfth thoracic.	Flexes thorax laterally.
Quadratus menti.	See *Depressor labii inferiorus.*			
Quadriceps extensor femoris.	Includes the rectus, vastus internus and externus, and crureus muscles. Their common tendon surrounds the patella.			

TABLE OF MUSCLES.—*Continued.*

NAME.	ORIGIN.	INSERTION.	INNERVATION.	FUNCTION.
Quadrigeminus capitis.	See *Sterno-cleido-mastoid*	*eus.*		
Radio-carpus.	See *Flexor carpi radialis*	*brevis.*		
Rectus abdominis.	Pubic crest and fibrous tissues in front of symphysis.	Cartilages of the fifth to seventh ribs.	Intercostal, ilio-hypogastric, ilio-inguinal.	Compresses viscera and flexes thorax.
Rectus capitis anticus major.	Transverse processes 3d–6th cervical vertebræ.	Basilar process.	First and second cervical.	Flexes head and slightly rotates it.
Rectus capitis anticus medius (*anomalous*).	Middle of anterior surface of body of axis.	Basilar process of occipital bone.		
Rectus capitis anticus minor.	Transverse process and lateral mass of atlas.	Basilar process of occipital bone.	First cervical.	Flexes head.
Rectus capitis lateralis.	Ventral cephalic surface of lateral mass of atlas.	Jugular process of occipital bone.	First cervical.	Flexes head laterally.
Rectus capitis posticus major.	Spine of axis.	Inferior curved line of occipital bone.	Sub-occipital and great occipital.	Rotates head.
Rectus capitis posticus minor.	Dorsal arch of atlas.	Below inferior curved line of occipital bone.	Sub-occipital and great occipital.	Draws head backward.
Rectus externus.	Two heads, outer margin of optic foramen.	Sclera.	Sixth.	Rotates eyeball outward.
Rectus femoris.	Anterior inferior iliac spine, brim acetabulum.	Proximal border of patella.	Anterior crural.	Extends leg.
Rectus inferioris.	Lower margin of optic foramen.	Sclera.	Third.	Rotates eyeball downward.
Rectus internus.	Inner margin of optic foramen.	Sclera.	Third.	Rotates eyeball inward.
Rectus sternalis (or sternalis) (*anomalous*).	Sheath of rectus abdominis.	Fascia over origin of sterno-mastoid, or into aponeurosis of pectoralis major.		
Rectus superioris.	Upper margin of optic foramen.	Sclera.	Third.	Rotates eyeball upward.
Rectus thoracis.	See *Supra-costalis.*			
Retractores uteri.	A name sometimes given to the sacro-uterine ligaments.			
Retrahens aurem.	Mastoid process.	Concha.	Posterior auricular.	Retracts pinna.
Rhombo-atloid (*anomalous*).	Sixth and seventh cervical and first thoracic spinous processes.	Transverse process of atlas.		
Rhomboideus major.	Spines of first five thoracic vertebræ.	Root of spine of scapula.	Fifth cervical.	Elevates and retracts scapula.
Rhomboideus minor.	Spines of seventh cervical and first dorsal vertebræ.	Root of spine of scapula.	Fifth cervical.	Retracts and elevates scapula.
Rhombo-occipital.	See *Occipito-scapular.*			
Riolan's.	The ciliary portion of the orbicularis palpebrarum.			
Risorius.	Fascia over masseter.	Angle of mouth.	Facial, buccal branch.	Draws angle laterad.
Rotator humeri (*anomalous*).	Under surface and external border of coracoid process of scapula.	Neck of humerus below lesser tuberosity.		
Rotatores spinæ.	Transverse processes of from second to twelfth thoracic vertebræ.	Lamina of next vertebra above.	Dorsal branches.	Rotate spinal column.
Sacro-coccygeus anticus.	See *Curvator coccygis.*			
Sacro-coccygeus posticus.	See *Extensor coccygis.*			
Sacro-lumbalis.	Erector spinæ.	Angle of six lower ribs.	Branches of dorsal.	Erects spine and bends trunk backward.

TABLE OF MUSCLES.—*Continued.*

NAME.	ORIGIN.	INSERTION.	INNERVATION.	FUNCTION.
Salpingo-pharyngeus.	A portion of the palato-pharyngeus, *q. v.*			
Santorini's.	See *Risorius.*			
Sartorius.	Anterior superior spine of ilium.	Upper internal portion of shaft of tibia.	Anterior crural.	Flexes and crosses legs.
Scalenus anticus.	Scalene tubercle on first rib.	Transverse processes 3d –6th cervical vertebræ.	Lower cervical.	Flexes neck laterally.
Scalenus medius.	First rib.	Transverse processes of six lower cervical vertebræ.	Lower cervical.	Flexes neck laterally.
Scalenus minimus (*anomalous*).	Transverse processes of lower cervical vertebræ.	First rib, behind subclavian artery.		
Scalenus posticus.	Second rib.	Transverse processes of three lower cervical vertebræ.	Lower cervical.	Bends neck laterally.
Scansorius.	See *Accessory gluteus*	*minimus.*		
Scapulo-costalis minor.	See *Sterno-chondro-scapu*	*lar.*		
Semi-membranosus.	Tuberosity of ischium.	Inner tuberosity of tibia.	Great sciatic.	Flexes leg and rotates it inward.
Semispinalis capitis.	See *Complexus.*			
Semispinalis colli.	Transverse processes four upper dorsal and articular processes four lower cervical vertebræ.	Spines of second to fifth cervical vertebræ.	Cervical branches.	Erects spinal column.
Semispinalis dorsi.	Transverse processes 6th to 10th dorsal vertebræ.	Spines last two cervical and first four thoracic.	Branches of dorsal.	Erects spinal column.
Semi-tendinosus.	Tuberosity of ischium.	Upper and inner surface of tibia.	Great sciatic.	Flexes leg on thigh.
Serratus magnus.	Eight upper ribs.	Inner margin of dorsal border of scapula.	Posterior thoracic.	Elevates ribs in inspiration.
Serratus posticus inferioris.	Spines of last two thoracic and first three lumbar.	Four lower ribs.	Tenth and eleventh intercostal.	Depresses ribs in expiration.
Serratus posticus superioris.	Spines of seventh cervical and first two thoracic vertebræ.	Second, third, fourth, and fifth ribs.	Second and third intercostal.	Raises ribs in inspiration.
Snarling.	See *Levator labii supe*	*rioris.*		
Sneering.	See *Levator labii supe*	*rioris alaquæ nasi.*		
Soleus.	Shaft of fibula, oblique line of tibia.	Os calcis by tendo Achillis.	Internal popliteal and posterior tibial.	Extends foot.
Spheno-pharyngeus (*anomalous*).	Spine of sphenoid bone.	Constrictors of pharynx.		
Spheno-salpingo-staphylinus.	See *Circumflexus palati.*			
Sphincter ani, external.	Tip of coccyx.	Tendinous center of perineum.	Perineal, pudic, and fourth sacral.	Closes anus.
Sphincter ani, internal.	A thickening of the circular fibers of the intestine one inch above the anus.		Hemorrhoidal nerves.	Constricts rectum.
Sphincter vaginæ.	Central tendon of perineum.	Corpora cavernosa and clitoris.	Homologue of accelerator urinæ in male.	
Sphincter vesicæ internus.	Near the urethral orifice of the bladder.		Vesical nerves.	Constricts internal orifice of urethra.
Spinalis cervicis (*normal, but inconstant*).	Spines 5th, 6th, and 7th cervical and first two thoracic vertebræ.	Spine of axis, sometimes spines of 3d and 4th cervical vertebræ.		
Spinalis colli.	Spines of fifth and sixth cervical vertebræ.	Spine of axis, or third and fourth cervical spines.	Cervical branches.	Steadies neck.
Spinalis dorsi.	Last two thoracic and first two lumbar spines.	Remaining thoracic spines.	Dorsal branches.	Erects spinal column.

TABLE OF MUSCLES.—*Continued.*

NAME.	ORIGIN.	INSERTION.	INNERVATION.	FUNCTION.
Splenius accessorius.	See *Rhombo-atloid.*			
Splenius capitis.	Lower two-thirds ligamentum nuchæ, spines of seventh cervical and first two thoracic vertebræ.	Outer third of middle oblique line of occiput and outer surface of mastoid process.	Middle cervical, posterior branches.	Extends head and neck and rotates and flexes laterally.
Splenius colli.	Spines of third to sixth thoracic vertebræ.	Dorsal tubercles of transverse processes of upper three or four cervical vertebræ.	Posterior divisions of lower cervical.	Extends, flexes laterally, and rotates neck.
Stapedius.	Interior of pyramid.	Neck of stapes.	Facial.	Depresses base of stapes.
Sternalis.	See *Rectus sternalis.*			
Sterno-chondro-scapular (*anomalous*).	Root of coracoid process, or cephalic border of scapula.	Costal cartilage of first rib, first piece of sternum, or both.		
Sterno-clavicularis, anterior.	See *Sterno-chondro-scapular.*			
Sterno-cleido-mastoid.	Two heads, sternum and clavicle.	Mastoid process and outer half of superior oblique line of occiput.	Spinal accessory and cervical plexus.	Depresses and rotates head.
Sterno-facialis (*anomalous*).	First piece of sternum, behind sterno-mastoid.	Fascia of subclavian triangle.		
Sterno-hyoid.	Sternum and clavicle.	Hyoid bone.	Descending and communicating branches of the hypoglossal.	Depresses hyoid.
Sterno-scapular.	See *Sterno-chondro-scapular.*			
Sterno-thyroid.	Sternum and cartilage of first rib.	Side of thyroid cartilage.	Descendens and communicans hypoglossi.	Depresses larynx.
Stylo-auricularis.	A name given to the stylo-glossus, when it arises from the external auditory meatus.			
Stylo-chondro-hyoideus (*anomalous*).	Styloid process.	Lesser cornu of hyoid.		
Stylo-glossus.	Styloid process.	Side of tongue.	Hypoglossal.	Elevates and retracts tongue.
Stylo-hyoid.	Styloid process.	Body of hyoid.	Facial.	Draws hyoid upward and backward.
Stylo-hyoideus alter.	See *Stylo-chondro-hyoideus.*			
Stylo-hyo-thyroideus (*anomalous*).	Styloid process.	Hyoid bone and tip of superior cornu of thyroid cartilage.		
Stylo-maxillaris (*anomalous*).	The stylo-hyoideus, when it extends from the styloid process to the angle of the lower jaw.			
Stylo-pharyngeus.	Styloid process.	Thyroid cartilage.	Glosso-pharyngeal, and pharyngeal plexus.	Elevates pharynx.
Subanconeus.	Humerus above olecranon fossa	Posterior ligament of elbow.	Musculo-spiral.	Tensor of ligament.
Subclavius.	Cartilage of first rib.	Inferior surface of clavicle.	Fifth and sixth cervical.	Draws clavicle downward.
Subclavius posticus.	See *Sterno-chondro-scapular.*			
Subcostals.	See *Infracostals.*			
Subcrureus.	Anterior distal part of femur.	Synovial sac behind patella.	Anterior crural.	Draws sac up.
Subscapularis.	Ental surface of scapula.	Humerus, lesser tuberosity, and shaft.	Subscapular.	Chief internal rotator of humerus.
Subscapularis minor (*anomalous*).	Axillary border of scapula.	Capsule of shoulder-joint or humerus.		
Subscapulo-capsularis.	See *Subscapularis minor.*			

TABLE OF MUSCLES.—*Continued.*

NAME.	ORIGIN.	INSERTION.	INNERVATION.	FUNCTION.
Supinator longus.	External condyloid ridge of humerus.	Styloid process of radius.	Musculo-spiral.	Flexes forearm.
Supinator radii brevis.	External condyle of humerus, oblique line of ulna.	Neck of radius and its bicipital tuberosity.	Posterior interosseous.	Supinates hand.
Supra-clavicularis (*anomalous*).	Manubrium sterni.	Clavicle.		
Supra-costalis (*anomalous*).	First rib.	Fourth rib.		
Supra-spinales.	Lie on spinous processes in cervical region.			
Supra-spinatus.	Supra-spinous fossa.	Great tuberosity of humerus.	Supra-scapular.	Supports shoulder-joint, raises arm.
Tailors'.	See *Sartorius*.			
Temporal.	Temporal fossa and fascia.	Coronoid process of mandible.	Inferior maxillary.	Closes mandible.
Temporalis minor (*anomalous*).	Interarticular fibro-cartilages of mandible, front and back borders.	Bottom of sigmoid notch of lower jaw.		
Tensor fasciæ colli.	See *Sterno-facialis*.			
Tensor fasciæ plantaris (*anomalous*).	Plantaris.	Plantar fascia.		
Tensor palati.	Scaphoid fossa and alar spine of sphenoid.	About hamular process into soft palate.	Otic ganglion.	Renders palate tense.
Tensor tarsi.	Crest of lacrymal bone.	Tarsal cartilages.	Facial, infraorbital branch.	Compresses puncta and lacrymal sac.
Tensor trochleæ (*anomalous*).	Levator palpebræ.	Trochlea.		
Tensor tympani.	Temporal bone, Eustachian tube and canal, sphenoid bone.	Handle of malleus.	Otic ganglion.	Renders tense the membrana tympani.
Tensor vaginæ femoris.	Iliac crest and anterior superior spinous process.	Fascia lata.	Superior gluteal.	Tensor of fascia.
Teres major.	Inferior angle of scapula.	Internal bicipital ridge of humerus.	Subscapular.	Draws arm downward and backward.
Teres minor.	Axillary border of scapula.	Great tuberosity of humerus.	Circumflex.	Rotates humerus outward and adducts it.
Thyro-arytenoideus.	Thyroid cartilage and crico-thyroid membrane.	Arytenoid, inferior and anterior surface.	Recurrent laryngeal.	Relaxes vocal bands.
Thyro-epiglottideus.	Inner surface of thyroid cartilage.	Epiglottis and arytenoepiglottidean fold.	Recurrent laryngeal.	Depresses epiglottis.
Thyro-hyoid.	Side of thyroid cartilage.	Body and greater cornu of hyoid bone.	Hypoglossal.	Elevates larynx.
Tibialis anticus.	Outer tuberosity and upper part of shaft of tibia.	Internal cuneiform and first metatarsal bone.	Anterior tibial.	Flexes tarsus and elevates inner border of foot.
Tibialis posticus.	Shaft of fibula and tibia, interosseous membrane.	Tuberosity of scaphoid, internal cuneiform, and bases of second to fourth metatarsal.	Posterior tibial.	Extends tarsus and inverts foot.
Tibialis secundus (*anomalous*).	Back of tibia below flexor digitorum longus.	Posterior part of capsule of ankle-joint, or annular ligament.		
Tibio-accessorius.	See *Flexor accessorius longus digitorum pedis*.			
Tibio-astragalus anticus (*anomalous*).	Tibia and interosseous membrane behind tibialis anticus.	Neck of astragalus.		
Tibio-fascialis anticus (*anomalous*).	Lower third of anterior border of tibia.	Annular ligament and deep fascia.		
Trachealis.	A transverse layer of unstriped muscular fibers at the dorsal part of the trachea.		Sympathetic.	

TABLE OF MUSCLES.—*Continued.*

NAME.	ORIGIN.	INSERTION.	INNERVATION.	FUNCTION.
Trachelo-mastoid.	Transverse processes of 3d–6th thoracic, and articular processes of last 3 or 4 cervical vertebræ.	Mastoid process.	Branches of cervical.	Steadies head.
Tragicus.	Tragus.	Tragus.	Temporal and posterior auricular.	
Transversalis abdominis.	Poupart's ligament, iliac crest, six lower ribs, lumbar vertebræ.	Linea alba, pubic crest, pectineal line.	Intercostal, ilio-hypogastric, ilio-inguinal.	Compresses viscera and flexes thorax.
Transversalis cervicis anticus (*anomalous*).	Anterior tubercles of transverse processes of the four lower cervical vertebræ.	Base of transverse process of atlas and body of axis.		
Transversalis cervicis medius (*anomalous*).	Transverse processes of second, third, and fourth cervical vertebræ.	Sixth and seventh cervical transverse processes.		
Transversalis colli.	Transverse processes of third to sixth thoracic vertebræ.	Transverse processes of five lower cervical vertebræ.	Cervical branches.	Keeps neck erect.
Transversus auris.	Convexity of concha.	Convexity over groove of helix.	Retracts helix.	Temporal and posterior auricular.
Transversus menti (*anomalous*).	Inner border of depressor anguli oris.	Corresponding part of opposite side of chin.		
Transversus nuchæ (*anomalous*).	External occipital protuberance.	Aponeurosis of sterno-mastoid.		
Transversus orbitæ (*anomalous*).	Orbital plate of ethmoid.	Lateral wall of orbit.		
Transversus pedis.	Head 5th metatarsal and plantar ligaments of metatarso-phalangeal joints.	First phalanx of great toe.	External plantar.	Adducts great toe.
Transversus pedis, superficial (*anomalous*).	Bases of first phalanges of 2d, 3d, and 5th toes.	Base of first phalanx of great toe.		
Transversus perinei.	Ramus of ischium.	Central tendon.	Perineal.	Tensor of central tendon.
Transversus perinei, deep.	See *Compressor urethræ*.			
Trapezius.	Superior curved line of occipital bone, spinous processes of last cervical and all the dorsal vertebræ.	Clavicle and spine of scapula, and acromion.	Spinal accessory and cervical plexus.	Draws head backward.
Triangularis menti.	See *Depressor anguli oris*.			
Triangularis sterni.	Ensiform cartilage, costal cartilages of 3 or 4 lower true ribs, and sternum.	Border of inner surfaces 2d, 3d, 4th, and 5th costal cartilages.	Intercostal.	Expiration.
Triceps (*3 heads*) extensor cubiti.	*External* and *internal* near musculo-spiral groove, shaft of humerus; *middle* or *long*, lower margin of glenoid cavity.	Olecranon process of ulna.	Musculo-spiral.	Extends forearm.
Triticeo-glossus (*anomalous*).	Cartilago-triticea in the thyro-hyoid ligament.	Side of tongue.		
Ulnaris quinti (*anomalous*).	Prolongation of tendon of extensor carpi ulnaris to 1st phalanx of little finger.			
Ulno-carpus (*anomalous*).	Lower surface of ulna.	Annular ligament or one of the carpal bones.		
Vastus externus.	Anterior border great trochanter and linea aspera.	Tuberosity of tibia.	Anterior crural.	Extends leg.
Vastus internus and crureus.	Inner lip of linea aspera of femur.	Tuberosity of tibia.	Anterior crural.	Extends leg.
Vesico-pubic.	Urachus.	Back of pubic bones.	Compresses vesical wall.	Sympathetic.
Wilson's.	A portion of the constrictor urethræ, *q. v.*			
Zygomaticus major et minor.	Malar bone.	Angle of mouth.	Facial, infraorbital branch.	Elevates lip outward.

Muscular (*mus'-ku-ler*) [*muscularis*, of a muscle]. Pertaining to, resembling, composed of, or having well-developed, muscles. **M. Fiber**, a fiber of muscular tissue. It exists in two varieties, striped and unstriped, the latter being associated with involuntary, the former with voluntary motion. **M. Force**, the energy produced in muscular motion. It is thought to be derived from the oxidation of the fats or carbohydrates of muscular tissue. **M. Hypertrophy.** See *Paralysis*, *Pseudo-hypertrophic*. **M. Motion**, the phenomena attending a self-produced change of position of the body or of any of its parts. It includes voluntary, involuntary, and mixed movements. See *Motion*. **M. Plate.** Same as *Muscle-plate*. **M. Rheumatism**, rheumatism affecting the muscles. Synonym of *Myalgia*. **M. Sensations**, the feelings that accompany the action of muscles. **M. Sense**, the sense of motion, weight, and position upon which the adjustment of the body to its surroundings depends. Sensory-nerve fibrils probably exist in muscles that convey these sensations. The capacity of experiencing muscular sensations. **M. System**, all the muscles of the body correlated. The totality of the muscular tissue of the body. **M. Tissue**, the substance of muscle; this appears in two principal varieties—the striped, striated, or voluntary, and the unstriped, non-striated, or involuntary. The *striped* muscular tissue is composed of muscle-fibers, the unstriped of elongated, spindle-shaped cells. A muscle-fiber consists: (1) of sarcolemma; (2) of muscle-nuclei; (3) of muscle-substance. The sarcolemma is an elastic, homogeneous connective-tissue sheath which lightly invests the muscle-fiber. The nuclei are fusiform in shape, are situated immediately beneath the sarcolemma, and run parallel with the axis of the fiber. The muscle-fiber itself consists of two substances—a dark, doubly refracting, or anisotropic *contractile substance*, and a lighter, semi-fluid, isotropic substance termed *sarcoplasm*. The contractile substance consists of delicate spindles, the apposition of whose thicker portions produces the dark *transverse disc*. The spindles terminate in minute beads, the juxtaposition of which gives rise to the *intermediate disc* or membrane of Krause. The neutral sarcoplasm fills out the spaces left between the spindles, and, as ordinarily the tapering ends of the spindles are too delicate to be seen, the space between the intermediate and transverse discs—the *lateral disc*—looks homogeneous. The contractile fibrillæ into which the contractile substance is divided, formed by the end-to-end union of the spindles, is aggregated into bundles—the *muscle-columns*—surrounded by a layer of sarcolemma. On transverse section these muscle-columns give rise to the appearance known as *Cohnheim's fields*. The muscle-fibers are held together by delicate areolar tissue, the *endomysium*. Several grouped together form a *primary bundle*. Primary bundles are surrounded by a sheath termed *the endomysium*. *Fasciculi* are aggregations of primary bundles, and are the units of which the complete muscle is composed, the latter being surrounded by the perimysium. **M. Tumor.** See *Myoma*.

Muscularis (*mus-ku-la'-ris*) [*musculus*, a muscle]. The muscular coat of an organ. **M. mucosæ**, the layer of unstriped muscular tissue separating the mucosa (of mucous membranes) from the submucosa.

Muscularity (*mus-ku-lar'-it-e*) [*musculus*, a muscle]. The quality of being muscular.

Musculation (*mus-ku-la'-shun*) [*musculus*, a muscle]. The muscular endowment of the body or a part; also the action of the muscles of the body.

Musculature (*mus'-ku-la-tūr*) [*musculus*, muscle]. The muscular system of the body, an organ, or part.

Musculi (*mus'-ku-li*) [L.]. Plural of *musculus*, a muscle. **M. codonoides**, the middle bell-muscles of a medusa. **M. papillaris.** See *Muscles*, *Papillary*. **M. pectinati** [*pecten*, a comb], small, muscular columns traversing the inner surface of the appendix auriculæ and the adjoining portion of the wall of the auricle. **M. proboscidalis**, the proboscidal muscles of the Medusæ.

Musculin (*mus'-ku-lin*) [*musculus*, a muscle]. Extract of muscle-tissue. See *Organotherapy*.

Musculinteger (*mus-ku-lin'-te-jer*) [*musculus*, muscle; *integer*, whole]. A combination of several muscles functionally connected and acting as a single muscle.

Musculo- (*mus'-ku-lo*) [*musculus*, a muscle]. A prefix to denote connection with or relation to muscular tissue. **M.-aponeurotic**, composed of muscle and of fibrous connective tissue in the form of a membrane. **M.-cutaneous.** See *Nerves*, *Table of*. **M.-membranous**, membranous and muscular in character. **M.-phrenic**, pertaining to the muscular portion of the diaphragm; as the musculo-phrenic artery. See *Arteries*, *Table of*. **M.-spiral.** See *Nerves*, *Table of*.

Musculous (*mus'-ku-lus*) [*musculus*, muscle]. Containing or composed of muscle-fibers.

Musculus (*mus'-ku-lus*). See *Muscle*.

Muscus (*mus'-kus*) [L.]. Moss; lichen.

Musenin (*mus'-en-in*). See *Moussenin*.

Museum (*mu-se'-um*) [Μοῦσα, a muse]. Formerly, any library or place devoted to the arts and sciences, because these were supposed to be presided over by the Muses. Any systematic collection of objects of nature or of art.

Mush. A thick porridge, or boiled pudding, usually of maize meal, used as an article of diet, and also as a poultice.

Mushroom (*mush'-rūm*). See *Agaric* and *Fungus*.

Musicians' Cramp. See *Cramp*.

Musicomania (*mu-zik-o-ma'-ne-ah*) [μουσική, music; μανία, mania]. Monomania for, or insane devotion to, music.

Musicotherapy (*mu-zik-o-ther'-ap-e*) [μουσική, music; θεραπεία, treatment]. The use of music in the treatment of disease, chiefly mental and nervous diseases, and in convalescence.

Musk [ME., *musk*, musk]. See *Moschus*. **M. Root.** See *Sumbul*.

Muskardine (*mus'-kar-din*) [*F. muscardine*, the name of a fungus]. A disease very destructive to silkworms in Europe during the early part of the 19th century, practically disappearing among cultivated worms after 1855; it was caused by the fungus *Botrytis bassiana*, popularly called *Muskardine*.

Muskeg Moss (*mus'-keg*) [Chippewa, *maskey*, swamp]. A plant of the Northwestern United States, recommended as a cheap and excellent absorbent material for surgical dressings. Under this name various species of *Sphagnum* and *Hydnum* are confounded.

Musomania (*mu-so-ma'-ne-ah*). See *Musicomania*.

Mussanin (*mus'-an-in*). See *Moussenin*.

Mussel-poisoning (*mus'-l-poiz'-n-ing*). The toxic effects in man sometimes resulting from eating mussels, especially the *Mytilus edulis*. See *Mytilotoxin*, and *Poisons*, *Table of*.

Mussitation (*mus-it-a'-shun*) [*mussitatio*; *mussitare*, to mutter]. The muttering frequently observed in severe illness, consisting of the movement of the lips without the production of articulate speech.

Must [*mustum*, new wine]. The juice freshly expressed from grapes by a mechanical process. This must is submitted to the process of spontaneous fermentation, following exposure to the air.

Mustache, Moustache (*mus-tash'*) [Fr., from *μύσταξ*, mustache]. The beard worn on the upper lip of men.

Mustard (*mus'-tera*) [ME., *mustarde*, mustard]. See *Sinapis*. **M.-bath.** See *Bath*. **M.-plaster**, a powerful counter-irritant plaster, usually made of equal parts of ground mustard and linseed meal. See *Sinapis*. **M.-poultice.** Same as *M.-plaster*.

Mutacism (*mu'-tas-izm*) [*μυτακισμός*, mutacism]. Mytacism; faulty speech; utterance characterized by the too frequent use of the *m* sound, and its substitution for other sounds.

Mutant (*mu'-tant*) [*mutare*, to change]. In biology, applied to any upright part the tip of which is bent over.

Mutation (*mu-ta'-shun*) [*mutare*, to change]. Change; in obstetrics, a pronounced change in the presentation of the fetus.

Mute (*mūt*) [*mutus*, dumb]. Dumb. Unable to use articulate speech.

Muticous (*mu'-tik-us*) [*muticus*, curtailed]. In biology, unarmed; not provided with a spine, spur, or claw; the autonym of *mucronate*, *cuspidate*, *aristate*, *unguiculate*, *calcarate*, *dentate*.

Mutilation (*mu-til-a'-shun*) [*mutilatio; mutilare*, to cut]. The act of being cut or disfigured. Also, the condition of the parts remaining after the excision or amputation of a member or part.

Mutinus (*mu-tin'-us*) [L.]. An old name for penis.

Mutisia (*mu-tiz'-e-ah*) [after José Celestino *Mutis*, a S. American botanist]. The seeds of *M. viciæfolia*, a composite-flowered plant native to Andean regions. Among the natives it has reputed qualities as a cardiac tonic, and is also used in various affections of the respiratory organs. Unof.

Mutisin (*mu'-tis-in*) [after J. C. *Mutis*, a S. A. botanist]. The active principle of *Mutisia viciæfolia*.

Mutism (*mu'-tizm*) [*mutus*, dumb]. Dumbness. See *Mutitas*.

Mutitas (*mu'-tit-as*) [*mutus*, mute]. Dumbness. **M. atonica**, dumbness arising from disorder of the nerves of the tongue. **M. organica**, that from loss of the tongue. **M. pathematica**, dumbness caused by fright or passion. **M. spasmodica**, spasmodic dumbness. **M. surdorum**, dumbness consequent upon congenital deafness.

Mutton (*mut'-n*) [*montonus*, a sheep]. The flesh of sheep.

Mutualism (*mu'-chu-al-izm*) [*mutuus*, reciprocal]. A form of commensalism; the living together of two organisms of different species for the sake of the advantage that each one derives from the presence of the other. See *Symbiosis*.

Mutualist (*mu'-chu-al-ist*) [*mutuus*, reciprocal]. An organism living with another in a state of mutualism.

Muzzle (*muz'-l*) [ME., *muzle*, muzzle]. The projecting jaws and nose of an animal; a snout.

Muzzling (*muz'-ling*). Same as *Infibulation*.

Myalgia (*mi-al'-je-ah*) [*μῦς*, muscle; *ἄλγος*, pain]. Any pain of the muscles; muscular rheumatism. **M. rheumatica.** Synonym of *Myalgia* or *Muscular Rheumatism*.

Myalgic (*mi-al'-jik*) [*μῦς*, muscle; *ἄλγος*, pain]. Pertaining to or affected with myalgia.

Myameba (*mi-am-e'-bah*) [*μῦς*, muscle; *amœba*, a unicellular organism]. In biology, a muscle-cell regarded as an organism. Cf. *Neurameba*, *Osteameba*.

Myasis (*mi-a'-sis*). See *Myiosis*.

Myasthenia (*mi-as-thē'-neiah*) [*μῦς*, muscle; *ἀσθένεια*, weakness]. Muscular debility.

Myasthenic (*mi-as-then'-ik*) [*μῦς*, muscle; *ἀσθένεια*, weakness]. Characterized by myasthenia.

Mycele (*mi-sēl'*). Same as *Mycelium*.

Mycelial (*mi-sē'-le-al*) [*μύκης*, fungus; *ἦλος*, nail, wart]. Pertaining to mycelium.

Mycelium (*mi-se'-le-um*) [*μύκης*, a fungus; *ἦλος*, nail, wart, excrescence]. In biology, a collective term for the vegetative hyphæ of fungi, usually forming interwoven masses.

Mycetes (*mi-se'-tēz*) [*μύκης*, fungus]. The fungi.

Mycetogenesis (*mi-set-o-jen'-es-is*) [*μύκης*, fungus; *γένεσις*, genesis]. Development of fungi.

Mycetogenetic (*mi-set-o-jen-et'-ik*) [*μύκης*: *pl.*, *μύκητες*, a fungus; *γένησις*, genesis]. Produced or caused by the growth of fungi.

Mycetogenous (*mi-set-oj'-en-us*) [*μύκης*, a fungus: *γενής*, producing]. Same as *Mycetogenetic*.

Mycetography (*mi-set-og'-ra-fe*). Synonym of *Mycology*.

Mycetoid (*mi'-set-oid*) [*μύκης*, fungus; *εἶδος*, like]. Resembling a fungus.

Mycetology (*mi-set-ol'-o-je*) [*μύκης*, a fungus; *λόγος*, science]. Same as *Mycology*.

Mycetoma (*mi-set-o'-mah*). See *Fungus Foot*.

Mycetophagous (*mi-set-off'-ag-us*) [*μύκης*,, a fungus; *φαγεῖν*, eat]. In biology, feeding upon fungi; fungivorous.

Mycetozoa (*mi-set-o-zo'-ah*) [*μύκης*, fungus; *ζῷον*, animal]. A group of fungus-like saprophytic organisms, the slime-fungi or slime-molds. Most naturalists class them as fungi or as plant-growths of low type; but by E. R. Lankester and his followers they are grouped with the protozoa or lowest animal forms; while according to a third view they are reckoned as *protists* or living organisms not decisively classifiable as either plants or animals.

Mycetozoic (*mi-set-o-zo'-ik*) [*μύκης*, fungus; *ζῷον*, animal]. Of the nature of a slime-fungus or mycetozoön.

Mycetozoön (*mi-set-o-zo'-on*) [*μύκης*, fungus; *ζῷον*, animal]. Any organism belonging to the class mycetozoa.

Mychmus, Mychthismus (*mik'-mus, mik-thiz'-mus*) [*μυχμός*, *μυχθισμός*, from *μύζειν*, to moan]. Sighing.

Mycocellulose (*mi-ko-sel'-u-lōz*) [*μῦκης*, fungus; *cellula*, a little cell]. Fungin; a variety of cellulose forming the basis of *Fungi*. See *Fungin*.

Mycoderm (*mi'-ko-derm*) [*μῦκος*, mucus; *δέρμα*, skin]. The mucous membrane.

Mycoderma (*mi-ko-der'-mah*) [*μύκης*, fungus; *δέρμα*, skin]. A genus of fungi forming like a membrane upon or in fermenting liquors. **M. aceti**, the microorganism of acetous fermentation, constituting the *mother of vinegar*. **M. albicans**, Saccharomyces albicans, *q. v.* **M. of Beer**, acetic skin; a pellicle composed of fungi found on the surface of beer and other liquids deficient in fruit acids. **M. sacchari** and **M. vini**, alcoholic ferments. See under *Bacteria*, *Synonymatic Table of*.

Mycodermis (*mi-ko-der'-mis*) [*μύκης*, fungus; *δέρμα*, skin]. A genus of microbic or fungoid organisms, species of which have been reported as found in the squamæ of certain skin-diseases, especially favus.

Mycodermitis (*mi-ko-der-mi'-tis*) [*μῦκος*, mucus; *δέρμα*, skin; *ιτις*, inflammation]. Inflammation of a mucous surface.

Mycodermosphacelus (*mi-ko-der-mo-sfas'-el-us*) [*μῦκος*, mucus; *δέρμα*, skin; *σφάκελος*, gangrene]. A gangrenous affection of the mucous membrane of any part.

Mycodesmoids (*mi-ko-dez'-moids*) [*μύκης*, fungus; *δέσμη*, a bundle; *εἶδος*, like]. A disease of horses characterized by circumscribed growths in the connective tissue. See *Micrococcus botryogenus*, Rabe under *Bacteria*, *Synonymatic Table of*.

Mycodiarrhea (*mi-ko-di-ar-e'-ah*) [*μύκος*, fungus; *διά*, through; *ῥοία*, a flow]. 1. A mycotic diarrhea. 2. A mucous diarrhea.

Mycodysenteria (*mi-ko-dis-en-te'-re-ah*) [*μύκος*, mucus; *δυσεντερία*, dysentery]. Catarrhal dysentery.

Mycodyspnea (*mi-ko-disp-ne'-ah*) [*μύκος*, mucus; *δυς-*, difficult; *πνέειν*, to breathe]. Dyspnea due to accumulations of mucus in the air-passages.

Mycogastritis (*mi-ko-gas-tri'-tis*) [*μύκος*, mucus; *γαστήρ*, stomach; *ιτις*, inflammation]. Catarrhal gastritis.

Mycography (*mi-kog'-ra-fe*). Synonym of *Mycology*.

Mycohemia (*mi-ko-hem'-e-ah*) [*μύκης*, fungus; *αἷμα*, blood]. A generic name for affections caused by the presence of microōrganisms in the blood.

Mycoid (*mi'-koid*) [*μύκης*, fungus; *εἶδος*, form]. Resembling, or appearing like, a fungus; fungoid.

Mycology (*mi-kol'-o-je*) [*μύκης*, a fungus; *λόγος*, science]. In biology, the science of fungi.

Mycomycetes (*mi-ko-mi-se'-tēz*) [*μύκης*, fungus]. Fungi reproducing by oōspores or zygospores.

Myconostoc [*mi-ko-nos'-tok*) [*μύκης*, fungus; *nostoc*]. A genus of schizomycetes. **M. gregarium**, a species of microōrganisms arranged in interlacing threads and surrounded by a gelatinous capsule; it is probably identical with *Cladothrix dichotoma*. See *Bacteria, Synonymatic Table of*.

Mycophagy (*mi-koff'-aj-e*) [*μύκης*, a fungus; *φαγία*, from *φαγεῖν*, to eat]. In biology, the eating of fungi.

Mycophlyzacium (*mi-ko-flis-a'-se-um*) [*μύκος*, mucus; *ὀλυζάκιον*, a small blister]. A blister or pustule upon a mucous surface.

Mycophthalmia (*mi-koff-thal'-me-ah*) [*μύκης*, fungus; *ὀφθαλμία*, ophthalmia]. Ophthalmia due to a fungus.

Mycophthisis (*mi-koff'-this-is*). Synonym of *Bronchorrhea*.

Mycophylaxin (*mi-ko-fil-aks'-in*) [*μύκης*, a fungus; *φύλαξ*, a protector]. Any microbicidal phylaxin. See *Proteids, Defensive*.

Mycopneumonypostasis (*mi-ko-nu-mon-ip-os'-tas-is*) [*μύκος*, mucus; *πνεύμων*, lung; *ὑπόστασις*, settling]. The settling of the mucus in the dependent portions of the lungs.

Mycoprotein (*mi-ko-pro'-te-in*) [*μύκης*, a fungus; *protein* (from *πρῶτος*, first); Mulder's term for the hypothetic substance common to all albuminous bodies], C, 52.32 per cent.; H, 7.55 per cent.; N, 14.75 per cent. In biology, the vegetable albuminoid or protoplasmic substance of bacteria, first analyzed and described by Nencki; fungus-protein. It contains no sulphur and no phosphorus, and is not precipitated by alcohol.

Mycorthopnea (*mik-or-thop-ne'-ah*) [*μύκος*, mucus; *ὀρθός*, straight; *πνοία*, breathing]. Orthopnea caused by excessive secretion of mucus in the bronchial tubes.

Mycose (*mi'-kōz*) [*μύκης*, fungus], $C_{12}H_{22}O_{11} + 2H_2O$. *Trehalose*, a substance that occurs in several species of fungi, in ergot of rye, and in the oriental *Trehala*. It is distinguished from cane-sugar by its ready solubility in alcohol, greater stability, and stronger rotatory power. It does not reduce copper-solutions. See *Carbohydrates, Table of*.

Mycosis (*mi-ko'-sis*) [*μύκης*, fungus]. Granuloma fungoides; Eczema hypertrophicum; Inflammatory fungoid neoplasm; Lymphoderma perniciosa; Ulcerative scrofuloderma; Fibroma fungoides. 1. Any disease of the skin characterized by soft mammillated tumors, showing an abnormal growth of lymphatic glands, which frequently develop into fungous ulcers. 2. A mucous tumor or polypoid growth. 3. The influence of microphytes upon the health or disease of the body. 4. Any disease caused by the presence of pathogenic microbes in the organism. **M., Acute, of the Blood**, a name proposed by Neelsen for septic intoxication from the presence of microbes in the blood. **M. fungoides**. See *Granuloma fungoides*. **M. furfuracea**. Synonym of *Pityriasis versicolor*. **M. intestinalis**. Synonym of *Anthrax*. **M. microsporina**. Synonym of *Tinea versicolor*. **M. oris**, the disease caused by *Oïdium albicans* or *Leptothrix buccalis*, consisting of grayish or black deposits on the tongue and buccal mucosa, usually with constitutional symptoms. **M. pulmonum**. See *Pneumonomycosis*. **M. pustulosa**, parasitic sycosis; also impetigo. **M. tonsillaris benigna**, the name applied by Frānkel to a peculiar form of pharyngeal disease induced by the undue accumulation of leptothrix upon the pharyngeal structures. The condition is also called by Heryng "*Pharyngomykosis leptothricia*." **M., Toxic, of the Blood**, putrid intoxication or sapremia, death being due to poisoning by ptomains.

Mycosozin (*mi-ko-so'-zin*) [*μύκης*, a fungus; *σώζειν*, to save]. Any sozin that acts by the destruction of microbes. See *Proteids, Defensive*.

Mycothrix (*mi-koth'-riks*) [*μύκης*, fungus; *θρίξ*, hair]. The thread-like element in the structure of a micrococcus.

Mycotic (*mi-kot'-ik*) [*μύκης*, fungus]. Characterized by mycosis; due to the presence of some pathogenic microōrganism. **M. Endocarditis**, that due to microōrganismal infection. A synonym of ulcerative or malignant endocarditis.

Mycterophonia (*mik-ter-o-fo'-ne-ah*) [*μυκτήρ*, nose; *φωνή*, voice]. A nasal quality of the voice.

Mydalein (*mi-da'-le-in*) [*μυδαλέος*, putrid]. A ptomain obtained from putrefying cadaveric organs. It is present in liver, spleen, etc., after some days of putrefaction, but it is not obtainable before the third or fourth week. It has a specific action as a poison, producing maximum dilatation of the pupil, injection of the ear-vessels, elevation of temperature, peristaltic action of the intestines. Post-mortem examination shows contraction of the bladder and intestines, and the stopping of the heart in diastole. Animals recover from small doses. See *Ptomains, Table of*.

Mydatoxin (*mi-dat-oks'-in*) [*μυδάειν*, to be wet; *τοξικόν*, poison], $C_8H_{13}NO_2$. A ptomain obtained from horse-flesh and human flesh after four months of decomposition. It is toxic, producing lacrymation, diarrhea, and dyspnea in animals, but is not an active poison. A base, $C_7H_{17}NO_2$, with which it is associated, is, however, a very violent poison, producing effects partly like those of cūrara and partly like those of mussel-poisoning—paralysis a few minutes after injection, with preservation of certain reflexes while the animal cannot move from its place. The same effects are produced by mydatoxin, but more slowly. See *Ptomains, Table of*.

Mydesis (*mi-de'-sis*) [*μυδᾶν*, to be damp]. Putrefaction; also, a discharge of pus from the eyelids.

Mydin (*mi'-din*) [*μύδος*, damp, decay], $C_8H_{11}NO$. A non-poisonous ptomain obtained by Brieger from the putrefaction of human internal organs. The free base is strongly alkaline, has an ammoniacal odor, and is characterized by its strong reducing-properties. See *Ptomains, Table of*.

Mydriasis (*mid-ri'-as-is*) [*μυδρίασις*, mydriasis]. Abnormal dilatation of the pupil of the eye. The word is also used to denote paralysis of the accommodation, an effect resulting from the use of most mydriatics. **M., Paralytic**, that due to paralysis of the oculo-motor nerve. **M., Spasmodic, M., Spastic**, that form caused by over-action of the sympathetic or dilator nerve of the iris. **M., Spinal**, that produced by irritation of the cilio-spinal center of the cord.

Mydriatic (*mid-re-at'-ik*) [*μυδρίασις*, dilatation of the pupil]. 1. Causing mydriasis, or paralysis of the ciliary muscle. 2. A medicine or agent that causes mydriasis, or dilatation of the pupil.

Myectopy (*mi-ek'-to-pe*) [*μῦς*, muscle; *ἔκτοπος*, displaced]. The abnormal placement of a muscle.

Myedema (*mi-e-de'-mah*). Synonym of *Myoidema*.

Myel (*mi'-el*) [*μυελός*, marrow]. The spinal cord.

Myelalgia (*mi-el-al'-je-ah*) [*μυελός*, marrow; *ἄλγος*, pain]. Any pain in the spinal cord.

Myelalgic (*mi-el-al'-jik*) [*μυελός*, marrow; *ἄλγος*, pain]. Pertaining to or characterized by myelalgia.

Myelanalosis (*mi-el-an-al-o'-sis*) [*μυελός*, marrow; *ἀνάλωσις*, wasting]. Same as *Myelatrophy*; tabes dorsalis.

Myelapoplexy (*mi-el-ap'-o-pleks-e*) [*μυελός*, myelon; *ἀποπληξία*, a stupor]. Hemorrhage into the spinal cord.

Myelasthenia (*mi-el-as-the'-ne-ah*) [*μυελός*, myelon; *ἀσθένεια*, weakness]. Spinal neurasthenia.

Myelatelia (*mi-el-at-e'-le-ah*) [*μυελός*, myelon; *ἀ* priv.; *τέλος*, completion]. Imperfect development of spinal marrow or of bone-marrow.

Myelatrophia, Myelatrophy (*mi-el-at-ro'-fe-ah, mi-el-at'-ro-fe*) [*μυελός*, marrow; *ἀτροφία*, wasting]. Any wasting or atrophy of the spinal cord due to spinal disease.

Myelauxe (*mi-el-awks'-e*) [*μυελός*, marrow; *αὔξη*, increase]. Morbid enlargement of the myel.

Myelaxis (*mi-el-aks'-is*) [*μυελός*, myelon; *axis*, axis]. The neural, or cerebro-spinal, axis.

Myelemia (*mi-el-e'-me-ah*). Synonym of *Myelogenic Leukemia*.

Myelencephal (*mi-el-en-sef'-al*). Same as *Myelencephalon*.

Myelencephalic (*mi-el-en-sef-al'-ik*) [*μυελός*, myelon; *ἐγκέφαλος*, brain]. Relating to the myelencephalon.

Myelencephalon (*mi-el-en-sef'-al-on*). 1. The cerebro-spinal axis. 2. See *Metencephalon*.

Myeleterosis (*mi-el-et-er-o'-sis*) [*μυελός*, marrow; *ἑτέρωσις*, alteration]. Any morbid alteration of the spinal cord.

Myelic (*mi-el'-ik*) [*μυελός*, marrow]. Pertaining to the myel.

Myelin (*mi'-el-in*) [*μυελός*, marrow], $C_{40}H_{75}NPO_{10}$. A name given by Thudichum to a substance obtained from the white matter of the brain. It occurs usually as a white, amorphous, ivory-like mass, but crystallizes from an ethereal or alcoholic solution. In a wider sense, any member of the myelin group may be called a myelin. *Upomyelin*, *Paromyelin*, *Amido-myelin*, and *Sphingo-myelin* differ from myelin mainly in containing one or more additional nitrogenous radicles. The "white substance of Schwann" and the ordinary brain-juice are also called *myelin*. See *Organotherapy*.

Myelinic (*mi-el-in'-ik*) [*μυελός*, marrow]. Relating to myelin. **M. Nerve-fiber**, the medullated nerve-fiber.

Myelitic (*mi-el-it'-ik*) [*μυελός*, marrow; *ιτις*, inflammation]. Pertaining to or affected with myelitis.

Myelitis (*mi-el-i'-tis*) [*μυελός*, marrow; *ιτις*, inflammation]. 1. Inflammation of the spinal cord. 2. Inflammation of bone-marrow; osteomyelitis. See also *Poliomyelitis*, *Leuko-myelitis*, and *Meningo-myelitis*. **M., Acute**, that due to exposure to cold, injuries, or to acute general diseases; it is attended with sensory disturbances and motor paralysis, complete or incomplete, according to the part of the cord involved and the degree of the inflammation. **M., Ascending**, a form in which the inflammation travels up the cord. **M., Bulbar**, that affecting the medulla and manifesting itself in disturbances of the cardio-respiratory apparatus, dysphagia, vomiting, and other symptoms. **M., Central**, myelitis limited chiefly to the gray matter of the cord. **M., Chronic**, a slowly advancing myelitis, presenting generally the same features as acute myelitis, but extended over a longer period. **M., Compression**, the term applied to inflammation of the spinal cord secondary to compressing lesions outside of the cord (caries, carcinoma, or exostosis of the vertebræ, aneurysm) or to tumors of the cord itself. **M., Concussion**, that due to concussion, direct or indirect. **M. convulsiva**. See *Dubini's Disease*. **M., Cornual**, inflammation affecting the anterior or posterior cornua. **M., Descending**, a form in which the inflammation extends downward, following the pyramidal pathways. **M., Diffuse**, widely distributed inflammation of the cord involving large areas. **M., Disseminated**, when there are several foci. **M., Focal**, when a small area is affected. **M., Hemorrhagic**, myelitis associated with or dependent upon hemorrhage. **M., Meningo-**, a combination of meningitis and myelitis. **M., Pressure**. See *M., Compression*. **M. Sclerotic**, a form characterized by overgrowth of the interstitial tissue, which undergoes contraction, producing an increase of hardness of the cord. **M., Systemic**, a variety in which the inflammation is confined to distinct systems or tracts of the cord. **M., Transverse**, a form in which the inflammatory area extends through a transverse section of the cord. **M., Traumatic**, myelitis following direct injury. **M., Unilateral**, a form in which the lesions are confined to one side of the cord.

Myelo- (*mi'-el-o-*) [*μυελός*, marrow]. A prefix denoting reference to or connection with the spinal cord, or, more rarely, with some other medullary substance.

Myelocele (*mi'-el-o-sēl*) [*μυελός*, marrow; *κοιλία*, cavity]. 1. The central canal of the spinal cord. 2. [*κήλη*, tumor]. See *Spina bifida*.

Myelocerebellar (*mi-el-o-ser-e-bel'-ar*) [*μυελός*, marrow; *cerebellum*, cerebellum]. Relating to the spinal cord and the cerebellum.

Myelochysis (*mi-el-ok'-is-is*) [*μυελός*, marrow; *χύσις*, a pouring]. Hydrorrhachis. Protrusion of the spinal marrow.

Myelocœlia (*mi-el-o-se'-le-ah*). See *Myelocele*.

Myelocystic (*mi-el-o-sis'-tik*) [*μυελός*, marrow; *κύστις*, cyst]. Both myeloid and cystic.

Myelocystocele (*mi-el-o-sis'-to-sēl*) [*μυελός*, marrow; *κύστις*, cyst; *κήλη*, tumor]. A cystic tumor of the myelon.

Myelocystomeningocele (*mi-el-o-sis-to-men-in'-go-sēl*) [*μυελός*, marrow; *κύστις*, cyst; *μῆνιγξ*, membrane; *κήλη*, tumor]. Spina bifida in which the tumor contains myelic substance, membranes, and fluid.

Myelocyte (*mi'-el-o-sīt*) [*μυελός*, marrow; *κύτος*, cell]. 1. Properly, a marrow-cell. 2. Any free nucleus of a central or ganglionic nerve-cell.

Myelodiastasis (*mi-el-o-di-as'-tas-is*) [*μυελός*, marrow; *διάστασις*, separation]. Severance or disintegration of the spinal cord.

Myelodiastema (*mi-el-o-di-as-te'-mah*). Synonym of *Myelodiastasis*.

Myelogenic (*mi-el-o-jen'-ik*) [*μυελός*, marrow; *γεννᾶν*, to produce]. Originating in marrow; producing a marrow-like substance. **M. Leukemia**, leukemia due to disease of the marrow of bones.

Myelogenous (*mi-el-oj'-en-us*) [*μυελός* marrow; *γεννᾶν*, to produce]. Originating in marrow. **M. Ossification**, ossification taking place from the marrow of bone.

Myelohyphæ (*mi-el-o-hi'-fe*) [*μυελός*, marrow; *ὑφή*, web; *prop. myelyphæ*]. In biology, applied to the hyphæ of lichens which differ from those of ordin

ary fungi in being rigid, elastic, in containing lichenin, in not becoming putrid by maceration, and in lacking the faculty of penetrating.

Myeloid (*mi'-el-oid*) [*μυελός*, marrow; *εἶδος*, like]. Resembling marrow in structure or appearance. Also applied to a form of sarcoma distinguished by the presence of multinucleated cells.

Myeloidin (*mi-el-oid'-in*) [*μυελός*, marrow; *εἶδος*, like]. A nitrogenous substance containing phosphorus, found in brain-matter.

Myeloma (*mi-el-o'-mah*) [*μυελός*, marrow; *ὄμα*, tumor: *pl.*, *Myelomata*]. 1. A tumor or enlargement of the medullary substance of the brain or cord. 2. A giant-celled sarcoma.

Myelomalacia (*mi-el-o-mal-a'-se-ah*) [*μυελός*, marrow; *μαλακία*, softening]. A softening of the spinal cord.

Myelomalacosis, Myelomalaxis (*mi-el-o-mal-ak-o'-sis*, *mi-el-o-mal-aks'-is*). Synonym of *Myelomalacia*.

Myelomargarin (*mi-el-o-mar'-gar-in*) [*μυελός*, marrow; *μάργαρος*, the pearl-oyster], $C_{11}H_{68}O_5$. A body found in the so-called cerebrin of brain-substance. It is soluble in hot water, in ether, and in alcohol.

Myelomeningitis (*mi-el-o-men-in-ji'-tis*) [*μυελός*, marrow; *μῆνιγξ*, a membrane; *ιτις*, inflammation]. Inflammation of the membranes investing the spinal cord; spinal meningitis.

Myelo-meningocele (*mi'-el-o-men-in'-go-sēl*). Synonym of *Spina bifida*.

Myelomyces (*mi-el-om'-is-ēz*) [*μυελός*, marrow; *μύκης*, fungus]. A fungoid growth of the spinal cord.

Myelon (*mi'-el-on*) [*μυελός*, marrow]. The spinal cord, or *Medulla spinalis*.

Myelonal, Myelonic (*mi-el'-on-al, mi-el-on'-ik*) [*μυελός*, marrow]. Pertaining to the myelon.

Myeloparalysis (*mi-el-o-par-al'-is-is*) [*μυελός*, marrow; *παράλυσις*, paralysis]. Spinal paralysis.

Myelopathic (*mi-el-o-path'-ik*) [*μυελός*, marrow; *πάθος*, disease]. Relating to a myelopathy.

Myelopathy (*mi-el-op'-ath-e*) [*μυελός*, marrow; *πάθος*, disease]. Any disease of the spinal cord.

Myelophthisis (*mi-el-off'-this-is*). Synonym of *Tabes dorsalis*.

Myelophyma (*mi-el-o-fi'-mah*) [*μυελός*, marrow; *φῦμα*, a growth]. A tuberculous growth in the meninges of the spinal cord.

Myeloplacque (*mi'-el-o-plak*) [*μυελός*, marrow; *πλάξ*, plate]. A giant-cell of the spinal marrow; an osteoclast; a myeloplax.

Myeloplast (*mi'-el-o-plast*) [*μυελός*, marrow; *πλαστός*, shaped]. Any giant-cell of the marrow. The myeloplasts are regarded by some as the main seat of the formation of red blood-discs.

Myeloplax (*mi'-el-o-plaks*) [*μυελός*, marrow; *πλάξ*, a placque: *pl.*, *Myeloplaxes*]. In histology, one of the large multinucleated cells frequently found upon the inner surface of bone, and concerned in its destruction; they are the *myeloplacques* of Robin and other French histologists, and the *osteoclasts* (bone-destroyers) of Kölliker. Cf. *Myeloplacque*.

Myeloplaxoma (*mi-el-o-plaks-o'-mah*) [*μυελός*, marrow; *πλάξ*, plate; *ὄμα*, tumor]. A tumor containing myeloplaxes.

Myeloplegia (*mi-el-o-ple'-je-ah*) [*μυελός*, marrow; *πληγή*, a stroke]. Paralysis of spinal origin.

Myelorrhagia (*mi-el-or-a'-je-ah*) [*μυελός*, marrow; *ῥηγνύναι*, to burst forth]. Hemorrhage into the spinal cord.

Myelosarcoma (*mi-el-o-sar-ko'-mah*). Same as *Osteosarcoma*.

Myelosclerosis (*mi-el-o-skle-ro'-sis*) [*μυελός*, marrow; *σκληρός*, hard]. Sclerosis of the spinal cord or of the marrow of bones.

Myelosis (*mi-el-o'-sis*) [*μυελός*, marrow]. The growth or existence of a myeloma.

Myelospongium (*mi-el-o-spun'-je-um*) [*μυελός*, marrow; *σπόγγος*, sponge]. A network in the wall of the neural canal of the embryo, composed of processes given off by the outer extremities of the columnar cells called spongioblasts.

Myelospongus (*mi-el-o-spun'-gus*) [*μυελός*, marrow; *σπόγγος*, a fungus]. An encephaloid growth.

Myelosyringosis (*mi'-el-o-si-rin-go'-sis*). Synonym of *Syringomyelia*.

Myelovaricosis (*mi-el-o-var-ik-o'-sis*) [*μυελός*, marrow; *varix*, varix]. A varicosity of the myelin-sheath of a nerve-fiber, or the formation of one.

Myelozoön (*mi-el-o-zo'-on* [*μυελός*, marrow; *ζῷον*, life]. A vertebrate possessing a spinal cord, but no brain.

Myelyperemia (*mi-el-ip-er-e'-me-ah*) [*μυελός*, marrow; *ὑπέρ* above; *αἷμα*, blood]. Hyperemia of the spinal cord.

Myenergia (*mi-en-er'-je-ah*) [*μῦς*, muscle; *ἐνέργεια*, energy]. Muscular energy.

Myenergic [*mi-en-er'-jik*) [*μῦς*, muscle; *ἐνέργεια*, energy]. Relating to myenergia.

Myentasis (*mi-en'-tas-is*) [*μῦς*, muscle; *ἔντασις*, stretch]. The extension or stretching of a muscle.

Myenteric (*mi-en-ter'-ik*) [*μῦς*, muscle; *ἔντερον*, intestine]. Relating to the muscular coat of the intestine.

Myiasis (*mi-i'-as-is*) [*μυῖα*, fly]. See *Myiosis*.

Myiocephalon (*mi-i-o-sef'-al-on*) [*μυῖα*, fly; *κεφαλή*, head]. A minute prolapse of the iris through a corneal perforation, so called from its resemblance to the head of a fly.

Myiodeopsia (*mi-i-o-de-op'-se-ah*), **Myiodesopsia** (*mi-i-o-des-op'-se-ah*) [*μυιώδης*, fly-like; *ὄψις*, vision]. The subjective appearance of muscæ volitantes.

Myiosis (*mi'-i-o-sis*) [*μυῖα*, a fly]. Hugo Summa's term for the diseased condition produced by the presence of parasitic dipterous larvæ, and incorrectly called *Myasis* by Hope, and *Myiasis* by Joseph. The presence of larvæ of flies, or maggots, in or on the body, as in the nose or ear, in a wound, or upon mucous membranes. **M. aurium, M. narium, M. vulnerum**, the presence of maggots in the ears, nose and wounds respectively. The disease is known in the East as Peenash.

Myistos, Myistus (*mi-is'-tos, mi-is'-tus*) [*μῦς*, muscle; *ἱστός*, tissue]. Muscular tissue.

Myitis (*mi-i'-tis*) [*μῦς*, muscle; *ιτις*, inflammation]. Inflammation of a muscle.

Mykosis (*mi-ko'-sis*). See *Mycosis*.

Mylabris (*mil-ab'-ris*) [*μυλαβρίς*, from *μύλη*, mill]. A genus of old-world blister-flies, some of which are used like cantharides. Unof.

Mylacephalus (*mi-las-ef'-al-us*) [*μυελός*, massive; *ἀ* priv.; *κεφαλή*, head]. The lowest variety of the acephalous species of omphalositic monsters. There is such imperfect development of the fetus that the condition is but a degree above that of *fœtus amorphus* or *fœtus anideus*.

Mylacri (*mil'-ak-ri*) [*μυλακρίς*, mill-stone]. The molar teeth.

Mylacris (*mil'-ak-ris*) [*μυλακρίς*]. The patella.

Myle (*mi'-le*) [*μύλη*, mill]. 1. Uterine mole. 2. Patella. 3. Maxilla.

Mylic (*mil'-ik*) [*μύλη*, mill]. Pertaining to the molar teeth; relating to a uterine mole.

Mylo- (*mi'-lo-*) [*μυλός*, mill]. A prefix denoting connection with the lower jaw or the molar teeth.

Mylodus (*mi-lo'-dus*) [*μύλη*, mill; *ὀδούς*, tooth: *pl.*, *Mylodontes*]. A molar tooth.

Myloglossus (*mi-lo-glos'-us*) [*μύλη*, mill; *γλῶσσα*, tongue]. A portion of the superior constrictor of the

pharynx—that which arises from the mylo-hyoid ridge of the lower jaw. Also, an anomalous slip joining the styloglossus.

Mylohyoid, Mylohyoidean (*mi-lo-hi'-oid, mi-lo-hi-oid-e'-an*) [*μύλη*, mill; *ὑοειδής*, hyoid]. Pertaining to the lower molar teeth and the hyoid bone. **M. Muscle.** See *Muscles, Table of.*

Mynsicht's Elixir. Aromatic sulphuric acid.

Myo- (*mi'-o-*) [*μῦς*, a muscle]. A prefix signifying muscle. **M.-albuminose,** one of the proteids of muscle-plasma, closely associated with the myosin-ferment. See *Muscle-plasma.* **M.-albumose,** *Myoproteose;* a proteid substance of muscle-plasma closely connected, or identical, with the myosin-ferment, and having the general properties of deutero-albumose. **M.-globulin,** a substance obtained from muscle, closely resembling serum-globulin in its properties. Its coagulation-temperature is 63° C., however, while that of serum-globulin is 75° C.

Myoatrophy (*mi-o-at'-ro-fe*) [*μῦς*, muscle; *ἀτροφία*, atrophy]. Atrophy of a muscle.

Myoblast (*mi'-o-blast*) [*μῦς*, muscle; *βλαστός*, germ]. In biology, a muscle-forming cell; a descendant of the cells which at an early stage of the metazoan embryo sink below the level of the epithelium to which they belonged. **M. epitheliales,** epithelial muscular cells, neuro-muscular cells, *tela muscularis epithelialis.* **M. mesodermales,** mesodermal muscular cells, *tela muscularis mesodermalis.*

Myoblastic (*mi-o-blas'-tik*) [*μῦς*, muscle; *βλαστός*, germ]. Relating to or of the nature of a myoblast.

Myocarditis (*mi-o-kar-di'-tis*) [*μῦς*, muscle; *καρδία*, heart; *ιτις*, inflammation]. Inflammation of the muscular tissue of the heart; it may be parenchymatous or interstitial. **M., Segmenting,** a form characterized by separation of the muscle-cells from softening of the cement-substance.

Myocardium (*mi-o-kar'-de-um*) [*μῦς*, muscle; *καρδία*, heart]. The muscular structure of the heart.

Myocele (*mi'-o-sēl*) [*μῦς*, muscle; *κήλη*, tumor]. The protrusion of a muscle through its ruptured sheath.

Myocelialgia (*mi-o-se-le-al'-je-ah*) [*μῦς*, muscle; *κοιλία*, cavity; *ἄλγος*, pain]. Pain in the muscles of the abdomen.

Myocelitis (*mi-o-se-li'-tis*) [*μῦς*, muscle; *κοιλία*, cavity; *ιτις*, inflammation]. Inflammation of the abdominal muscles.

Myocelome (*mi-o-se'-lōm*) [*μῦς*, muscle; *κοιλία*, cavity]. The cavity of a protovertebra or myotome.

Myocephalon (*mi-o-sef'-al-on*). Synonym of *Myiocephalon.*

Myochorditis (*mi-o-kor-di'-tis*) [*μῦς*, muscle; *χορδή*, cord; *ιτις*, inflammation]. Inflammation of the muscles of the larynx and the vocal bands.

Myochrome (*mi'-o-krōm*) [*μῦς*, muscle; *χρῶμα*, color]. Myohematin, *q. v.*

Myochronoscope (*mi-o-kro'-no-skōp*) [*μῦς*, muscle; *χρόνος*, time; *σκοπεῖν*, to examine]. An instrument for measuring the rapidity of muscular contraction or the propagation of a nerve-stimulus through a muscle.

Myoclonia (*mi-o-klo'-ne-ah*) [*μῦς*, muscle; *κλόνος*, spasm]. Clonic spasm of the muscles.

Myoclonus (*mi-ok'-lo-nus*) [*μῦς*, muscle; *κλόνος*, clonus]. Clonic spasm of a muscle, or of various muscles. **M. multiplex.** See *Paramyoclonus multiplex.*

Myocœle (*mi'-o-sēl*) [*μῦς* (*μυός*), a muscle; *κοιλία*, a cavity]. Hatschek's term for the thick epithelium of the ental wall of the dorsal segments of the amphioxus larva, which produces the muscles of the entodermal side of the cavity of the segments.

Myocolpitis (*mi-o-kol-pi'-tis*) [*μῦς*, muscle; *κόλπος*, vagina; *ιτις*, inflammation]. Inflammation of the muscular coat of the vagina.

Myocomma (*mi-o-kom'-ah*) [*μῦς*, muscle; *κόμμα*, segment: *pl., Myocommata*]. Any one of the transverse segments into which embryonic muscle-tissue is divided. In adult man, some of the muscles exhibit traces of these primitive myocommata. A myotome, or muscular metamere, a segment of the *grand muscle lateral* of Cuvier.

Myocrismus (*mi-o-kriz'-mus*) [*μῦς*, muscle; *κρίζειν*, to creak]. A creaking sound heard over muscles during contraction.

Myoctonin (*mi-ok'-to-nin*) [*μῦς*, mouse; *κτείνειν*, to kill]. A bitter extractive of *Aconitum lycoctonum,* a powerful poison resembling curare in action. Unof.

Myocyst (*mi'-o-sist*) [*μῦς*, muscle; *κύστις*, cyst]. A cystic tumor of a muscle.

Myocyte (*mi'-o-sīt*) [*μῦς*, muscle; *κύτος*, cell]. A muscle-cell; a structural element conspicuous in the histology of certain of the lower animals.

Myodemia (*mi-o-de'-me-ah*) [*μῦς*, muscle; *δημός*, fat]. The fatty degeneration of muscle.

Myoderma (*mi-o-der'-mah*) [*μῦς* (*μυός*), a muscle; *δέρμα*, the skin]. In biology, the muscular layer or "lamina muscularis" of the invertebrate ectoplasm. Cf. *Myophan.*

Myodes (*mi-o'-dēz*) [*μῦς*, muscle; *εἶδος*, like]. 1. Resembling muscle; muscular. 2. The platysma, or fleshy expansion of the neck. See *Muscles, Table of.*

Myodesopsia (*mi-o-dez-ops'-e-ah*) See *Myiodesopsia.*

Myodiastasis (*mi-o-di-as'-tas-is*) [*μῦς*, muscle; *διά*, a part; *στάσις*, a standing]. 1. The separation that takes place between the ends of a cut muscle. 2. The traumatic injury of a muscle by straining or stretching.

Myodopsia (*mi-o-dop'-se-ah*). Synonym of *Myiodesopsia.*

Myodynamia (*mi-o-di-na'-me-ah*) [*μῦς*, muscle; *δύναμις*, force]. Muscular power or strength.

Myodynamic (*mi-o-di-nam'-ik*) [*μῦς*, muscle; *δύναμις*, power]. Pertaining to the force of muscular contraction.

Myodynamics (*mi-o-di-nam'-iks*) [*μῦς*, muscle; *δύναμις*, power]. The mechanics of muscular action.

Myodynamometer (*mi-o-di-nam-om'-et-er*) [*μῦς*, muscle; *δύναμις*, power; *μέτρον*, measure] An instrument for measuring muscular strength.

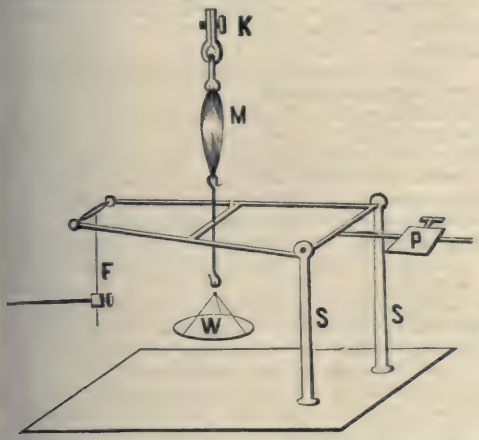
Myodynia (*mi-o-din'-e-ah*) [*μῦς*, muscle; *ὀδύνη*, pain]. Pain in the muscles.

Myoendocarditis [*mi-o-en-do-kar-di'-tis*) [*μῦς*, muscle; *ἔνδος*, within; *καρδία*, heart; *ιτις*, inflammation]. Simultaneous inflammation of the endocardium and the myocardium.

Myofibroma (*mi-o-fi-bro'-mah*) [*μῦς*, muscle; *fibra*, fiber; *ὄμα*, tumor: *pl., Myofibromata*]. A muscular tumor containing fibrous elements. Such tumors are common in the walls of the uterus.

Myogaster (*mi'-o-gas-ter*) [*μῦς*, muscle; *γαστήρ*, belly]. The belly of a muscle.

Myogenesis (*mi-o-jen'-es-is*) [*μῦς*, muscle; *γένεσις*, genesis]. The development of muscular tissue.



Myogenic (*mi-o-jen'-ik*) [*μῦς*, muscle; *γεννᾶν*, to produce]. Of muscular origin.

Myognathus (*mi-og'-na-thus*) [*μῦς*, muscle; *γνάθος*, jaw]. A form of double monstrosity in which the accessory head is joined to the autosite by means of muscle and integument only.

Myogonic (*mi-o-gon'-ik*) [*μῦς*, muscle; *γίγνεσθαι*, to be born]. Inherent in muscle, as contractile power.

Myogram (*mi'-o-gram*) [*μῦς*, muscle; *γράμμα*, a marking]. The muscle-curve as inscribed by the myograph.

Myograph (*mi'-o-graf*) [μῦς, muscle; γράφειν, to write]. An instrument for determining the duration of each phase of a muscular contraction. **M., Cardiac,** the cardiograph, *q. v.* **M., Palate,** an instrument that records the movements of the uvula and soft palate during speaking and swallowing. It consists of a rod which is introduced through the nose and rests against the soft palate, while the other end records the movements on a drum.

SCHEME OF V. HELMHOLTZ'S MYOGRAPH.

M. Muscle fixed in a clamp, K. F. Writing style. P. Weight or counterpoise for the lever. W. Scale-pan for weights. S, S. Supports for the lever.

Myographer (*mi-og'-ra-fer*) [μῦς, muscle; γράφειν, to write]. One versed in myography.

Myographic (*mi-o-graf'-ik*) [μῦς, muscle; γράφειν, to write]. Pertaining to a myograph.

Myographion (*mi-o-graf'-e-on*) [μῦς, muscle; γράφειν, to write]. A myograph.

Myographist (*mi-og'-ra-fist*) [μῦς, muscle; γράφειν, to write]. A myographer.

Myography (*mi-og'-ra-fe*) [μῦς, muscle; γράφειν, to write]. 1. A description of the muscles. 2. The employment of the myograph.

Myohematin (*mi-o-hem'-at-in*) [μῦς, muscle; αἷμα, blood]. A nitrogenous coloring-matter of muscles; the true intrinsic coloring-matter of red muscle, including the *histohematin* characteristic of invertebrate muscle. It yields a four-banded spectrum. Its solutions when weak are of a reddish-yellow color, but if strong they are pure red.

Myoid (*mi'-oid*) [μῦς, muscle; εἶδος, form]. Having a resemblance to muscular tissue.

Myoidema (*mi-oid-e'-mah*) [μῦς, muscle; οἴδημα, a swelling]. The wheal brought out by a sharp tap on a muscle in certain conditions of exhaustion.

Myoides (*mi-oi'-dez*) [μῦς, muscle; εἶδος, like]. The platysma. See *Muscles, Table of.*

Myolemma (*mi-o-lem'-ah*) [μῦς, muscle; λέμμα, covering]. The thin membrane enveloping the fibrillæ of muscle. Same as *Sarcolemma.*

Myolemmatic (*mi-o-lem-at'-ik*) [μῦς, muscle; λέμμα, covering]. Pertaining to the myolemma.

Myolin (*mi'-o-lin*). See *Myosin.*

Myolipoma (*mi-o-lip-o'-mah*) [μῦς, muscle; λίπος, fat; ὄμα, tumor: *pl.*, *Myolipomata*]. A myoma with lipomatous elements.

Myologic (*mi-o-loj'-ik*) [μῦς, muscle; λόγος, science]. Pertaining to myology.

Myologist (*mi-ol'-o-jist*) [μῦς, muscle; λόγος, science]. One versed in myology.

Myology (*mi-ol'-o-je*) [μῦς, muscle; λόγος, science]. The science of the nature, structure, functions, and diseases, of muscles.

Myoma (*mi-o'-mah*) [μῦς, muscle; ὄμα, tumor: *pl.*, *Myomata*]. A muscular tumor. Also, an affection marked by the growth in the skin of small, sessile, freely movable, isolated, reddish tumors consisting of involuntary muscular fibers. If small and multiple, they are called *leio-myomata;* if there is but a single large tumor, it is called a *dartoïc myoma;* if the tumors contain much fibrous tissue, they are called *fibro-myomata;* if vascular and erectile, *angio-myomata;* if the lymphatics are involved, *lymphangio-myomata.* **M., Fibro-.** See *Myofibroma.* **M., Lio-.** See *Leiomyoma.* **M., Rhabdo-.** See *Rhabdomyoma.*

Myomalacia (*mi-o-mal-a'-se-ah*) [μῦς, muscle; μαλακία, softening]. An abnormal softening of the muscles. **M. cordis,** fatty degeneration and softening of a portion of the heart-muscle, resulting from thrombosis or embolism.

Myomatous (*mi-o'-mat-us*) [μῦς, muscle; ὄμα, tumor]. Of the nature of a myoma.

Myomectomy (*mi-o-mek'-to-me*) [μῦς, muscle; ὄμα, tumor; ἐκτομή, excision]. Surgical removal of a uterine or other myoma.

Myomelanosis (*mi-o-mel-an-o'-sis*) [μῦς, muscle; μελάνωσις, a becoming black]. The presence of a blackish coloration in muscular tissue.

Myomere (*mi'-o-mēr*) [μῦς, a muscle; μέρος, a part]. In biology, a muscular flake or metamere; a myocomma or myotome.

Myometer (*mi-om'-et-er*) [μῦς, muscle; μέτρον, measure]. An instrument for measuring the shortening of a muscle in contracting.

Myometritis (*mi-o-met-ri'-tis*) [μῦς, muscle; μήτρα, uterus; ιτις, inflammation]. Inflammation of the uterine muscular tissue.

Myomotomy (*mi-o-mot'-o-me*) [μῦς, muscle; ὄμα, tumor; τομή, a cutting]. The operation of excising fibro-myomata of the uterus.

Myon (*mi'-on*) [μυών, a cluster of muscles]. A unit of musculation; a group of muscles viewed as an integer.

Myonarcosis (*mi-o-nar-ko'-sis*) [μῦς, muscle; νάρκωσις, numbness]. Numbness of the muscles.

Myoneoplasma (*mi-o-ne-o-plaz'-mah*) [μῦς, muscle; νέος, new; πλάσμα, formation: *pl.*, *Myoneoplasmata*]. A myoma or muscular neoplasm.

Myoneuralgia (*mi-o-nu-ral'-je-ah*) [μῦς, muscle; νεῦρον, nerve; ἄλγος, pain]. Neuralgic muscular pain.

Myonicity (*mi-o-nis'-it-e*) [μῦς, muscle]. The power of living muscle to contract and to relax.

Myonitis (*mi-on-i'-tis*) [μῦς, muscle; ιτις, inflammation]. Synonym of *Myositis.*

Myonosus (*mi-on'-o-sus*) [μῦς, muscle; νόσος, disease]. A disease of the muscles.

Myopachynsis (*mi-o-pak-in'-sis*) [μῦς, muscle; πάχυνσις, thickening]. Muscular hypertrophy. **M. lipomatosa.** See *Paralysis, Pseudo-hypertrophic.*

Myopalmus (*mi-o-pal'-mus*) [μῦς, muscle; παλμός, a twitch]. A twitching of the muscles.

Myoparalysis (*mi-o-par-al'-is-is*) [μῦς, muscle; παράλυσις, paralysis]. Paralysis resulting from muscular abnormality, without affection of the nervous centers or nerves.

Myopathic (*mi-o-path'-ik*) [μῦς, muscle; πάθος, disease]. Relating to or of the nature of a myopathy. **M. Muscular Atrophy;** Erb includes under this head pseudo-hypertrophic muscular paralysis, juvenile muscular atrophy, and infantile paralysis. The three are classed together as *Dystrophia muscularis pro-*

gressiva. **M. Facies**, "facies myopathique;" a peculiar form of expression seen in infantile forms of myopathic muscular atrophy. It is characterized by imperfect movement of the facial muscles, sinking in of the cheeks, and drooping of the lower lip.

Myopathy (*mi-op'-ath-e*) [*μῦς*, muscle; *πάθος*, suffering]. Any disease of a muscle or of the muscular system.

Myope (*mi'-ōp*) [*μύωψ*, short-sighted]. A person affected with myopia.

Myopericarditis (*mi-o-per-ik-ar-di'-tis*) [*μῦς*, muscle; *περί*, around; *καρδία*, heart; *ιτις*, inflammation]. A combination of pericarditis with myocarditis.

Myophagocyte (*mi-o-fag'-o-sīt*) [*μῦς*, muscle; *φαγεῖν*, to eat; *κύτος*, cell]. Metschnikoff's term for a phagocyte produced from muscular tissue.

Myophan (*mi'-o-fan*) [*μῦς*, muscle; *φαίνειν*, to appear]. In biology, an ectoplasmic layer containing muscle-fibrillæ, found in many invertebrates (Infusoria). Cf. *Myoderma*.

Myophone (*mi'-o-fōn*) [*μῦς*, muscle; *φωνή*, sound]. An instrument for hearing the sounds produced during the contraction of a muscle.

Myophonia (*mi-o-fo'-ne-ah*) [*μῦς*, muscle; *φωνή*, sound]. Muscle-sound.

Myophore (*mi'-o-for*) [*μῦς*, muscle; *φέρειν*, to bear]. In biology, any specialized apparatus for the attachment of a muscle.

Myophorous (*mi-off'-or-us*) [*μῦς*, muscle; *φέρειν*, to bear]. Relating to or connected with a muscle, as a myophore.

Myophrisc (*mi'-o-frisk*) [*μῦς*, a muscle; *φρίσσειν*, to ruffle or throw into ripples]. In biology, contractile, filamentous processes supposed to perform hydrostatic functions, found arranged on the sarcodyctium in a circle around each skeletal spine of the *Acanthometridæ* among the *Protozoa*.

Myophysical (*mi-o-fiz'-ik-al*) [*μῦς*, muscle; *φυσική*, physics]. Appertaining to the physics of muscular action.

Myophysics (*mi-o-fiz'-iks*) [*μῦς*, muscle; *φυσική*, physics]. The physics of muscular action.

Myopia (*mi-o'-pe-ah*) [*μύειν*, to close; *ὤψ*, eye; myopes having the habit of partially closing the lids to avoid spheric aberration]. Near-sightedness; an optic defect, usually due to too great length of the antero-posterior diameter of the globe, whereby the focal image is formed in front of the retina. **M., High**, a degree of

THE FORMATION OF THE IMAGE IN A MYOPIC EYE, IN FRONT OF THE RETINA.

myopia greater than 6.5 diopters. **M., Low**, one less than two diopters. **M., Malignant**, rapidly progressing myopia. **M., Progressive**, continuous increase of myopia, due to increasing elongation of the eyeball.

Myopic (*mi-op'-ik*) [*μύειν*, to close; *ὤψ*, eye]. Pertaining to or having the nature of myopia. Near-sighted. **M. Crescent**, a yellowish-white, crescentic area about the papilla, due to atrophy or breaking away of the choroid, and exposure of the sclerotic; it is seen in myopia, but often, also, in other refractive derangements.

Myopiesis (*mi-o-pi'-es-is*) [*μῦς*, muscle; *πίεσις*, pressure]. The squeezing or kneading of a muscle as a therapeutic measure.

Myopiosis (*mi-o-pi-o'-sis*). Synonym of *Myopia*.

Myoplast (*mi'-o-plast*) [*μῦς*, muscle; *πλάσσειν*, to mold]. A muscle-producing cell.

Myoplastic (*mi-o-plas'-tik*) [*μῦς*, muscle; *πλάσσειν*, to mold]. Producing muscle; pertaining to a myoplast. **M. Bodies**, the embryonic cells from which muscular fibers are developed.

Myoplegia (*mi-o-ple'-je-ah*) [*μῦς*, muscle; *πληγή*, a stroke]. A condition of diminished muscular power, or of muscular paresis.

Myopodiorthosis (*mi-o-po-di-or-tho'-sis*). Synonym of *Myoporthosis*.

Myopolar (*mi-o-po'-lar*) [*μῦς*, muscle; *πόλος*, pole]. Pertaining to muscular polarity, electric or other.

Myoporthosis (*mi-o-por-tho'-sis*) [*μύωψ*, near-sighted; *ὀρθός*, straight]. The correction of myopia.

Myopresbytia (*mi-o-pres-bish'-e-ah*) [*μύωψ*, near-sighted; *πρεσβύτης*, old-sighted]. Combined myopia and presbyopia.

Myoproteose (*mi-o-pro'-te-ōz*). See *Myoalbumose*.

Myopsia (*mi-ops'-e-ah*). Synonym of *Myiodesopsia*.

Myopsin (*mi-ops'-in*). A powerful proteolytic substance said by Defresne to occur in pancreatic juice.

Myopy (*mi'-o-pe*). Synonym of *Myopia*.

Myorrheuma (*mi-or-u'-mah*) [*μῦς*, a muscle; *ῥεῦμα*, a flow]. A synonym of *Muscular Rheumatism* or *Myalgia*.

Myorrhexia, Myorrhexis (*mi-or-eks'-e-ah, mi-or-eks'-is*) [*μῦς*, muscle; *ῥῆξις*, a tearing]. Laceration or rupture of a muscle.

Myosalgia (*mi-o-sal'-je-ah*). See *Myalgia*.

Myosarcoma (*mi-o-sar-ko'-mah*) [*μῦς*, muscle; *σάρξ*, flesh; *ὄμα*, tumor, *pl.*, *Myosarcomata*]. A sarcoma with myomatous elements, or one that has originated in a myoma.

Myosarcomatous (*mi-o-sar-ko'-mat-us*) [*μῦς*, muscle; *σάρξ*, flesh; *ὄμα*, tumor]. Affected with, or of the nature of, myosarcoma.

Myosclerosis (*mi-o-skle-ro'-sis*) [*μῦς*, muscle; *σκληρός*, hard]. A temporary hardening of a muscle, often of the sterno-cleido-mastoid, sometimes seen in young infants.

Myosclerotic (*mi-o-skle-rot'-ik*) [*μῦς*, muscle; *σκληρός*, hard]. Pertaining to the hardening of muscles, especially from connective-tissue overgrowth. **M. Paralysis**. See *Paralysis, Pseudo-hypertrophic*.

Myoscope (*mi'-o-skōp*) [*μῦς*, muscle; *σκοπεῖν* to inspect]. An apparatus used in observing the contraction-phenomena of muscles.

Myoseism (*mi-o-se'-izm*), **Myoseismia** (*mi-o-se-iz'-me-ah*) [*μῦς*, muscle; *σεισμός*, a shake]. A symptom that consists in repeated stops in the course of muscular contractions by which the whole movement is rendered jerky. When this jerky movement affects the ocular muscles, it causes an irregularity that may be mistaken for nystagmus. A similar irregularity renders speech and writing jerky and the gait staggering. The patient is unable to maintain his equilibrium with his eyes shut.

Myoseptum (*mi-o-sep'-tum*) [*μῦς*, muscle; *septum*, septum]. The intermuscular septum between the metameres of muscles of certain animals, as of fishes.

Myosin (*mi'-o-sin*) [*μύων*, muscle]. A proteid of the globulin class, the chief proteid of muscle. Its coagulation in muscle after death causes rigor mortis. Hydrochloric acid converts it into syntonin. It is soluble in dilute saline and dilute alkaline solutions, and in acids; it is insoluble in water and is precipitated by alcohol. **M., Peptone**. Synonym of *Myosinose*. **M., Vegetable**, a substance resembling myosin, found in almonds, maize, peas, and other vegetables.

Myosinogen (*mi-o-sin'-o-jen*) [*μύων*, muscle; *γεννᾶν*, to beget]. One of the proteids of muscle-plasma,

coagulated at 56° C. It is the antecedent of myosin, into which it is converted by a suitable stimulus. See *Muscle-plasma*.

Myosinose (*mi-o-sin-ōz'*) [*μύων*, muscle]. The substance produced by the peptonization of myosin. Two varieties have been found, protomyosinose and deuteromyosinose.

Myosis (*mi-o'-sis*) [*μύειν*, to close, or *μῦς*, muscle]. 1. Abnormal smallness of the pupil of the eye; the same as *Miosis*. 2. Myopathy. **M., Paralytic,** that form due to paralysis of the sympathetic or dilator nerve. **M., Spastic,** that produced by stimulation of the oculomotor or constrictor nerve. **M., Spinal,** that dependent on disease of the spinal cord.

Myositic (*mi-o-sit'-ik*) [*μύειν*, to close; *μῦς*, muscle; *ιτις*, inflammation]. Pertaining to, or affected with, myosis, or with myositis.

Myositis (*mi-o-si'-tis*) [*μῦς*, muscle; *ιτις*, inflammation]. Inflammation of muscular tissue, more especially of the connective tissue of muscles. **M., Fibrous, M., Interstitial,** an inflammation of the connective tissue of muscle. **M. interstitialis lipomatosa progressiva paralytica.** Synonym of *Pseudo-hypertrophic Muscular Paralysis*. **M. ossificans,** is characterized by the formation of osseous deposits in the muscles. **M., Specific, M., Syphilitic,** that due to syphilis. There may be a deposit of gummata in the muscles. **M. trichinosa,** that due to the presence of *trichina spiralis* in the muscles.

Myosome (*mi'-o-sōm*) [*μῦς*, muscle; *σῶμα*, body]. The contractile substance of muscle.

Myospasis (*mi-os'-pas-is*) [*μῦς*, muscle; *σπάσις*, a drawing: *pl., Myospases*]. A muscular contraction.

Myospasm (*mi'-o-spazm*) [*μῦς*, muscle; *σπασμός*, spasm]. A spasmodic contraction of a muscle. A cramp.

Myospectroscope (*mi-o-spek'-tro-skōp*) [*μῦς*, muscle; *spectrum*, spectrum; *σκοπεῖν*, to see]. An instrument for examining the spectroscopic image of a muscle.

Myostypsis (*mi-o-stip'-sis*) [*μῦς*, muscle; *στῦψις*, a contracting]. Muscular contraction; also any interference with functional movement.

Myosuture (*mi-o-su'-tūr*) [*μῦς*, muscle; *sutura*, a suture]. Suture of a muscle.

Myosystema (*mi-o-sis-te'-mah*) [*μῦς*, muscle; *σύστημα*, system]. A system of muscles. **M. circulare,** the circular muscle of the sub-umbrella of medusæ. **M. radiale,** the radial muscles of the sub-umbrella of medusæ.

Myotalgia (*mi-o-tal'-je-ah*). Synonym of *Myalgia*.

Myotasis (*mi-ot'-as-is*) [*μῦς*, muscle; *τάσις*, a stretching]. Passive tension of a muscle.

Myotatic (*mi-o-tat'-ik*) [*μῦς*, muscle; *τάσις*, a stretching]. Pertaining to the deep reflexes or contractions of the muscles dependent upon passive tension for their elicitation. **M. Irritability,** a term suggested by Gowers to replace the inaccurate one, tendon-reflexes, the tendons not being etiologically connected with the phenomenon. "The irritability on which they depend is due to and demonstrative of a muscle reflex action which depends on the spinal cord."

Myotenotomy (*mi-o-ten-ot'-o-me*) [*μῦς*, muscle; *τένων*, tendon; *τομή*, a cutting]. The division of a tendon, when the muscle is able to retract.

Myothelium (*mi-o-the'-le-um*) [*μῦς*, muscle; *θηλή*, nipple]. The cellular elements composing a myotome or protovertebra.

Myothermic (*mi-o-ther'-mik*) [*μῦς*, muscle; *θέρμη*, heat]. Pertaining to heat-development in a muscle.

Myotic (*mi-ot'-ik*) [*μύειν*, to close]. 1. Pertaining to, or causing, myosis. 2. An agent causing myosis, or contraction of the pupil. The one most used by ophthalmologists is eserin. Morphin, pilocarpin, muscarin and other drugs also cause contraction of the pupil.

Myotility (*mi-o-til'-it-e*) [*μῦς*, muscle]. Muscular contractility, or tonicity.

Myotome (*mi'-o-tōm*) [*μῦς*, muscle; *τομή*, a cutting]. 1. A cutting instrument used in myotomy. 2. The same as *Myocomma*.

Myotomy (*mi-ot'-o-me*) [*μῦς*, muscle; *τομή*, a cutting]. 1. Surgical division of a muscle. 2. The incision or dissection of muscles. See *Tenotomy*.

Myotonia (*mi-o-to'-ne-ah*) [*μῦς*, muscle; *τόνος*, tension]. 1. Muscular spasm. 2. The stretching of a muscle. **M. congenita, M. hereditaria.** Thomsen's disease; an hereditary neurosis characterized by tonic spasms in the voluntarily moved muscles. See *Diseases, Table of*.

Myotonic (*mi-o-ton'-ik*) [*μῦς*, muscle; *τόνος*, tension]. Pertaining to myotonia, or to myotonus. **M. Reaction.** See *Thomsen's Disease*.

Myotonus (*mi-ot'-o-nus*) [*μῦς*, muscle; *τόνος*, stretching]. 1. Muscular tone, quality, or tension. 2. Tonic muscular spasm.

Myotyrbe (*mi-o-ter'-be*) [*μῦς*, muscle; *τύρβη*, disorder]. Chorea; incoördinate muscular movements.

Myrabolan (*mi-rab'-o-lan*). See *Myrobalan*.

Myriachit (*mir'-e-ak-it*). See *Palmus*.

Myriagram (*mir'-e-ag-ram*) [*μυρίοι*, ten thousand; *γράμμα*, gram]. Ten thousand grams.

Myriakit (*mir'-e-ak-it*). See *Palmus*.

Myrialiter (*me-re-al-e'-ter*) [*μυρίοι*, ten thousand; *λίτρα*, liter]. Ten thousand liters.

Myriameter (*me-re-am-e'-ter*) [*μυρίοι*, ten thousand; *μέτρον*, a measure]. Ten thousand meters.

Myrica (*mi-rik'-ah*) [*μυρίκη*, the tamarisk]. A genus of aromatic shrubs of some 35 known species. **M. cerifera,** of N. America, **M. californica,** of the Pacific States, **M. cordifolia, M. laciniata,** and **M. æthiopica,** of Africa, **M. carcasana,** and **M. microcarpa,** of tropical America, are among the wax-bearing species. The species last named has useful medicinal qualities. See *Myricin, Gale,* and *Myrtle-wax*. **M., Oleum,** Oil of Myrica; Oil of Bay is the volatile oil of the Bayberry, or West Indian bay-leaf. It is an aromatic, pungent liquid, used chiefly as a perfume and in cosmetics. It is somewhat refreshing in faintness and headaches. **M., Spiritus,** "bay rum," contains: oil of bay 16, oil of orange-peel 1, oil of pimento 1, alcohol 1000, water 782 parts, mixed and filtered through carbonate of magnesia.

Myricin (*mi'-ris-in*) [*μυρίκη*, the tamarisk]. A precipitate from a tincture of the root-bark of *Myrica cerifera;* it is astringent, stimulant, anti-spasmodic, and anti-syphilitic. Dose from 1 to 3 grains. Unof.

Myricyl (*mi-ris'-il*) [*μυρίκη*, the tamarisk; *ὕλη*, matter]. See *Melissyl*. **M. alcohol,** $C_{30}H_{62}O$. A monatomic alcohol derived from beeswax.

Myringa, Myrinx (*mi-rin'-gah, mi'-ringks*) [L.]. The membrana tympani.

Myringitis (*mi-rin-ji'-tis*) [*myringa, myrinx*, membrana tympani; *ιτις*, inflammation]. Inflammation of the membrana tympani.

Myringodectomy (*mi-rin-go-dek'-to-me*) [*myringa*, myringa; *ἐκτομή*, excision]. Excision of a part or of the whole of the membrana tympani.

Myringomycosis (*mi-rin'-go-mi-ko'-sis*) [*myringa*, membrana tympani; *μύκης*, fungus]. A fungous growth within the meatus, or on the myringa; also the diseased condition in which such a growth is seen. **M. aspergillina,** Wreden's term for *Otomycosis, q. v.*

Myringoplastic (*mi-rin'-go-plas'-tik*) [*myringa*, membrana tympani; *πλαστικός*, formed]. Pertaining to myringoplasty. **M. Method,** a method for the cure of

dry perforation of the ear-membrane, recommended by Berthold, and attended with some success. A piece of sticking-plaster is first laid over the perforation and then pulled off in order to cause irritation of the margins. After this a piece of skin from the arm or elsewhere, or the skin of a hen's egg, is applied to the orifice and the ear carefully plugged.

Myringoplasty (*mi-rin'-go-plas-te*) [*myringa*, tympanic membrane; *πλάσσειν*, to shape]. Plastic surgery of the membrana tympani.

Myringotome (*mi-rin'-go-tōm*) [*myringa*, myringa; *τομή*, a cutting]. A knife-like instrument used in incision or removal of the membrana tympani.

Myringotomy (*mi-rin-got'-o-me*) [*myringa*, tympanic membrane; *τομή*, a cutting]. Incision of the tympanic membrane.

Myriosporous (*mir-e-os'-po-rus*) [*μυρίος*, numberless; *σπόρος*, seed]. In biology, producing many spores.

Myrisma (*mi-riz'-mah*) [*μύρισμα*]. An anointing.

Myristate (*mi'-ris-tāt*) [*μυριστικός*, fit for anointing]. A salt of myristic acid.

Myristic Acid (*mi-ris'-tik*) [*μυριστικός*, fit for anointing], $C_{14}H_{28}O_2$. A monobasic acid found in *Myristica fragrans*, in cocoanut oil, in spermaceti, etc.

Myristica (*mi-ris'-tik-ah*) [*μυριστικός*, fit for anointing]. Nutmeg. The kernel of the seed of *M. fragrans*, indigenous to the East Indies. Also, the fleshy covering of the fruit called mace. Its properties are due mainly to the volatile oil. It is an aromatic stomachic and tonic, and in large doses a powerful narcotic. The oil is sometimes employed as a rubefacient in paralysis and rheumatism, and is much used as a condiment. Dose gr. v–xx. **M., Oleum**, the volatile oil. Dose ♏j–v. **M., Spiritus**, a three per cent. solution in alcohol. Dose ʒj–ij.

Myristicated Liver (*mi-ris'-tik-a-ted*). Nutmeg liver, *q. v.*

Myristication (*mi-ris-tik-a'-shun*) [*μυρίζειν*, to anoint]. The development of a nutmeg condition of the liver.

Myristicin (*mi-ris'-tis-in*) [*μυρίζειν*, to anoint]. A peculiar fatty body contained in nutmeg.

Myristicol (*mi-ris'-tik-ol* [*μυρίζειν*, to anoint; *oleum*, oil], $C_{10}H_{16}O$. An oily substance extracted from oil of nutmeg.

Myristin (*mi-ris'-tin*) [*μυρίζειν*, to anoint]. A compound of glycerin and myristic acid.

Myristone (*mi-ris'-tōn*) [*μυρίζειν*, to anoint]. The ketone of myristic acid.

Myrmecia (*mur-me'-se-ah*) [*μυρμηκιά*, ants' nest; *μύρμηξ*, ant]. A warty growth on the palm or sole.

Myrmeciasis (*mur-me-si'-as-is*) [*μύρμηξ*, ant]. Formication.

Myrmecismus, Myrmecium (*mur-me-siz'-mus, mur-me'-se-um*). Synonym of *Myrmeciasis*.

Myrmecology (*mur-me-kol'-o-je*) [*μύρμηξ*, an ant; *λόγος*, science]. That department of biologic science which treats of ants.

Myrmecophilous (*mur-me-koff'-il-us*) [*μύρμηξ*, ant; *φίλος*, loving]. In biology, ant-loving. Applied to such plants as are cross-fertilized by means of ants, or to such insects as live in ant-hills.

Myrmecosis (*mur-me-ko'-sis*). Synonym of *Myrmeciasis*.

Myrobalan (*mi-rob'-al-an*) [*μύρον*, ointment; *βάλανος*, nut]. Also *Myrabolan*. The fruit of several species of *Terminalia* found in India, and other eastern countries, and used in leather-manufactures. The tannin occurs in the pulp that surrounds the kernel. It is generally used in combination with other tanning materials, to modify the objectionable color which some of the latter impart to the leather. By itself it produces a soft and porous tannage. See *Myrobalanus*. Myrobalan was formerly, and is still locally, much used in medicine. Commercially it is divided into several sorts, citrine, emblic, belleric, etc. Unof.

Myrobalanus (*mi-ro-bal'-an-us*) [*μύρον*, ointment; *βάλανος*, nut]. The emblic myrobalan; the fruit of *Phyllanthus emblica*, of Southern Asia. It has a slight laxative followed by an astringent effect, and is highly recommended in dysentery and chronic diarrhea. Botanically, this is not a true myrobalan. Dose ʒ ij–ʒ j. Unof.

Myronate (*mi'-ron-āt*) [*μύρον*, an ointment]. A salt of myronic acid.

Myronic Acid (*mi-ron'-ik*). See *Acid*.

Myrophorum (*mi-roff'-or-um*) [*μύρον*, ointment; *φέρειν*, to carry]. An instrument for applying ointments to narrow openings or parts of the body difficult of access.

Myrosin (*mi-ro'-sin*) [*μύρον*, ointment]. An albuminous ferment obtainable from mustard-seed, which liberates the oil of mustard from potassium myronate.

Myroxylon (*mi-roks'-il-on*) [*μύρον*, balsam; *ξύλον*, wood]. A genus of tropical leguminous trees. **M. pereiræ** yields balsam of Peru, and **M. toluiferum** affords the balsam of tolu.

Myrrh (*mur*) [*μύρρα*, myrrh]. The resinous substance obtained from *Commiphora myrrha*, indigenous to Arabia. In small doses it is a stimulant, in large doses an irritant, to the gastro-intestinal membrane. It is valuable in amenorrhea and bronchial catarrh, and makes an excellent mouth-wash and lotion for spongy gums. It is used chiefly in dentifrices. Dose gr. x–xxx. **M., Tinct.**, 20 per cent. Dose ♏x–xxx.

Myrrhic Acid (*mur'-ik*) [*μύρρα*, myrrh], $C_{24}H_{32}O_4$. A liquid substance obtained from myrrhin.

Myrrhin (*mur'-in*) [*μύρρα*, myrrh], $C_{24}H_{32}O_5$. A resin contained in myrrh.

Myrrhol (*mur'-ōl*) [*μύρρα*, myrrh; *oleum*, oil], $C_{22}H_{32}O_2$. A yellow volatile oil derived from myrrh.

Myrtiform (*mur'-tif-orm*) [*myrtum*, a myrtle-berry; *forma*, form]. Shaped like a myrtle-berry or myrtle-leaf. **M. Caruncles.** See *Caruncula*. **M. Fossa**, a shallow pit between the edge of the pyriform aperture of the superior maxilla above, and the sockets of the front teeth of the upper jaw below.

Myrtillus (*mur-til'-us*) [*myrtus*, *μύρτος*, the myrtle]. The juice of the common bilberry (*Vaccinium myrtillus*), used for staining histologic sections.

Myrtle (*mur'-tl*) [*myrtus*, *μύρτος*, the myrtle]. A popular name for several plants of the genera *Myrtus*, *q. v.*, and *Myrica*, *q. v.* The wax-myrtles belong to the genus *Myrica*. **M.-wax**, a solid fat obtained by pressure from the berries of *Myrica cerifera*, having a specific gravity of 1.005 at 15° C., and fusing at from 45° to 46°C. It is used as a substitute for beeswax in pharmacy and particularly in candle-making. Several other species of this genus (see *Myrica*) afford myrtle-wax.

Myrtol (*mur'-tol*) [*myrtus*, *μύρτος*, myrtle; *oleum*, oil]. A constituent of the essential oil of *Myrtus communis* (see *Myrtus*); it is useful in bronchitis, vaginitis, and urethritis, and as a sedative and antiseptic. Dose gtt. iv–xvj, in capsules. Unof.

Myrtus (*mur'-tus*) [*myrtus*, *μύρτος*, myrtle]. A genus of trees, shrubs, and vines, found in various parts of the world. **M. communis**, classic myrtle, which has leaves that afford myrtol, *q. v.* The plant was formerly much used as an astringent. Unof.

Mysiology (*mis-e-ol'-o-je*). Synonym of *Myology*.

Mysophobia (*mi-so-fo'-be-ah*) [*μύσος*, filth; *φόβος*, dread]. A form of insanity characterized by a dread of contact, or of dirt; rupophobia.

Mystax (*mis'-taks*) [*μύσταξ*, the upper lip]. The upper lip. Also, the moustache. In biology, applied to

the conspicuous tuft of hairs immediately over the mouth in certain diptera (*Asilidæ*).

Mytacism (*mit'-as-izm*). See *Mutacism*.

Mytilotoxin (*mit-il-o-toks'-in*) [μυτίλος, mussel; τοξικόν, poison]. $C_6H_{15}NO_2$. A poisonous ptomain that has been prepared from the common mussel; it is similar to curara. See *Ichthysmus*, and *Ptomains, Table of*.

Mytilus (*mit'-il-us*) [μυτίλος, a sea-mussel]. Mussel, a lamellibranchiate mollusc. **M. edulis**, the edible mussel. Under certain conditions, mussels are very poisonous, either because of some change in their juices, induced by modification of their environment, or because a poisonous species is mixed with a non-poisonous one. Edible mussels become poisonous in filthy water, while poisonous ones are deprived of their toxicity after a prolonged sojourn in good water.

Mytome (*mi'-tōm*). See *Chromatin* and *Mitome*.

Myurous (*mi-u'-rus*) [μῦς, mouse; οὐρά, a tail]. Tapering like the tail of the mouse; a qualification applied to the pulse when it is progressively growing feeble.

Myxa (*miks'-ah*) [μύξα, mucus]. Mucus.

Myxadenitis (*miks-ad-en-i'-tis*) [μύξα, mucus; ἀδήν, gland; ιτις, inflammation]. Inflammation of a mucous gland.

Myxadenoma (*miks-ad-en-o'-mah*). Synonym of *Myxoadenoma*.

Myxangitis (*miks-an-ji'-tis*) [μύξα, mucus; ἀγγεῖον, vessel; ιτις, inflammation]. Inflammation of the duct of a mucous gland.

Myxedema (*miks-e-de'-mah*) [μύξα, mucus; οἴδημα, edema]. *Adult Sporadic Cretinism; Pachydermic Cachexia; Cachexia strumipriva;* a disease characterized by the collection of a mucus-like substance in and about the connective tissue of the body, and by atrophy of the thyroid gland. There is a characteristic cretinoid physiognomy; the body is bulky and unwieldy; the skin dry, scaly, and thickened. Speech is slow, monotonous, and guttural; there is marked intellectual torpor, and insanity is likely to develop. The disease is a chronic one, and the tendency is from bad to worse; it is more common in women than in men, and usually occurs between the ages of thirty and sixty-five. Nothing is known positively as to the etiology. It is sometimes induced by surgical interference with or by ablation of the thyroid gland. A similar state has been produced in animals by extirpation of the thyroid gland. Improvement, and, in some cases, cure has been achieved by the therapeutic administration of sheep's thyroids or their extracts.

Myxedematoid (*miks-e-de'-mat-oid'*) [μύξα, mucus; οἴδημα, edema; εἶδος, like]. Resembling myxedema.

Myxedematous (*miks-e-de'-mat-us*) [μύξα, mucus; οἴδημα, edema]. Pertaining to, affected with, or of the nature of, myxedema.

Myxemia (*miks-e'-me-ah*) [μύξα, mucus; αἷμα, blood]. An accumulation of mucin in the blood.

Myxeurysma (*miks-u-riz'-mah*) [μύξα, mucus; εὐρύνειν, to widen). Cavernous lymphangioma.

Myxiosis (*miks-e-o'-sis*) [μύξα, mucus]. A mucous discharge.

Myxoadenoma (*miks-o-ad-en-o'-mah*) [μύξα, mucus; ἀδήν, gland; ὄμα, tumor]. An adenoma that has in part undergone myxomatous degeneration; an adenoma of a mucous gland.

Myxochondroma (*miks-o-kon-dro'-mah*) [μύξα, mucus; χόνδρος, cartilage; ὄμα, tumor: *pl.*, *Myxochondromata*]. A tumor containing mucous and cartilaginous elements.

Myxochondrosarcoma (*miks-o-kon-dro-sar-ko'-mah*) [μύξα, mucus; χόνδρος, cartilage; σάρξ, flesh; ὄμα, tumor]. A mixed tumor containing myxomatous and cartilaginous tissue and embryonal connective tissue.

Myxocylindroma (*miks-o-sil-in-dro'-mah*) [μύξα, mucus; κύλινδρος, cylinder; ὄμα, tumor]. A myxomatous sarcoma in which the myxomatous tissue is disposed in the meshes of the sarcoma.

Myxocystitis (*miks-o-sis-ti'-tis*) [μύξα, mucus; κύστις, bladder; ιτις, inflammation]. Inflammation of the mucous membrane of the bladder.

Myxodes (*miks-o'-dēz*) [μύξα, mucus; εἶδος, like]. Resembling mucus.

Myxoendothelioma (*miks-o-en-do-the-le-o'-mah*) [μύξα, mucus; ἐνδον, within; θηλή, a nipple; ὄμα, tumor: *pl.*, *Myxoendotheliomata*]. An endothelioma that contains myxomatous tissue.

Myxofibroma (*miks-o-fi-bro'-mah*) [μύξα, mucus; *fibra*, fiber; ὄμα, tumor: *pl.*, *Myxofibromata*]. A fibroma that has in part undergone myxomatous degeneration.

Myxoglioma (*miks-o-gli-o'-mah*) [μύξα, mucus; γλία, glue; ὄμα, tumor: *pl.*, *Myxogliomata*]. A glioma with myxomatous elements.

Myxoid (*miks'-oid*) [μύξα, mucus; εἶδος, like]. Like mucus.

Myxoinoma (*miks-o-in-o'-mah*) [μύξα, mucus; ἶς, a fiber; ὄμα, a tumor]. A benign form of inoma, with myxomatous elements.

Myxolipoma (*miks-o-lip-o'-mah*) [μύξα, mucus; λίπος, fat; ὄμα, tumor: *pl.*, *Myxolipomata*]. A fatty tumor that has in part undergone myxomatous change.

Myxoma (*miks-o'-mah*) [μύξα, mucus; ὄμα, tumor: *pl. Myxomata*]. A connective-tissue tumor the consistency of which is similar to the jelly of Wharton of the umbilical cord. It consists of a gelatinous, mucin-containing intercellular substance, in which are scattered peculiar branched or stellate cells.

Myxomatodes (*miks-o-mat-o'-dēz*) [μύξα, mucus; ὄμα, tumor]. Characterized by myxomatous degeneration.

Myxomatous (*miks-o'-mat-us*) [μύξα, mucus; ὄμα, tumor]. Of the nature of, or pertaining to, myxoma. **M. Degeneration**, the same as mucoid degeneration. It attacks epithelium and connective tissue, giving rise to the production of a gelatinous substance containing mucin. In epithelial tissue the cells only are affected; in connective tissue the intercellular substance. **M. Degeneration of the Placenta.** See *Mole*.

Myxomycetes (*miks-o-mi-se'-tēz*) [μύξα, mucus; μύκης, fungus]. A genus of slime-fungi found in decaying wood and moss.

Myxoneuroma (*miks-o-nu-ro'-mah*) [μύξα, mucus; νεῦρον, nerve; ὄμα, tumor: *pl.*, *Myxoneuromata*]. 1. A glioma. 2. A neuroma with mucous elements.

Myxopodia (*miks-o-po'-de-ah*) [μύξα, mucus; πούς, (ποδ-) a foot]. In biology, a form of pseudopod, protrusible, retractile, soft, fusing with neighboring pseudopodia into a network, and, in many *Rhizopoda*, often collecting by flowing together outside the body, into small masses at the points where they meet with food. They are characteristic of the *Rhizopoda* and most *Radiolaria*, and are to be distinguished from *Axopodia*.

Myxorrhea (*miks-or-e'-ah*) [μύξα, mucus; ῥοία, a flow]. A copious mucous discharge.

Myxosarcoma (*miks-o-sar-ko'-mah*) [μύξα, mucus; σάρξ, flesh; ὄμα, tumor]. A sarcoma that has in part undergone myxomatous degeneration.

Myxospore (*miks'-o-spor*) [μύξα, mucus; σπόρος, seed]. In biology, a spore produced in the midst of a gelatinous mass without a distinct ascus or basidium.

Myxosporidia (*miks-o-spor-id'-e-ah*) [μύξα, mucus;

σπόρος, seed]. A group or order of *Sporozoa*, found as parasitic bodies in the muscles and epithelia of fishes; they produce a psorospermosis which is frequently wide-spread and destructive.

Myxotheca (*miks-o-the'-kah*) [μύξα, mucus; θήκη, a sheath: *pl.*, *Myxothecæ*]. In biology, the horny sheath of the tip of the lower mandible of a bird.

Myzesis (*mi-ze'-sis*) [μύζειν, to suck]. Synonym of sucking.

N

N. The symbol of nitrogen; also, the sign of the index of refraction.

N. A. Abbreviation for numerical aperture.

N. F. National Formulary; a collection of formulas issued by the American Pharmaceutical Association as a kind of supplement to the U. S. Pharmacopeia.

Na. Symbol of natrium or sodium.

Ni. The symbol for nickel.

Nabalus (*nab'-al-us*) [*νάβλα*, a harp]. A genus of composite-flowered plants; by some considered a section of *Prenanthes*. There are many American species, called *drop-flower* and *rattlesnake-root*. A poultice of the pounded fresh leaves of *N. altissimus*, or "white lettuce," of N. America, has been used as an application to ulcers, gangrenous sores, etc. Unof.

Naboth, Cysts of, N., Glands of. See *Gland*. **N.'s Menorrhagia**, a serous discharge from the vagina in pregnant women.

Nabothian Ovule (*na-bo'-the-an*). See *Ovule*.

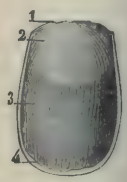
Nacre (*na'-ker*) [Ar., *nakīr*, hollowed out]. Mother-of-pearl.

Nacreus (*na'-kre-us*) [Ar., *nakīr*, hollowed out]. Resembling nacre or mother-of-pearl.

Naegele's Fluids. Fluid culture-media. 1. Water 100 c.c., ammonium tartrate 1 gm., potassium biphosphate 0.1 gm., magnesium sulphate 0.02 gm., calcium chlorid 0.01 gm. 2. Water 100 c.c., albumin-peptone 1 gm., potassium biphosphate 0.2 gm., magnesium sulphate 0.04 gm., calcium chlorid 0.02 gm. 3. Water 100 c.c., cane-sugar 3 gm., ammonium tartrate 1 gm., potassium bitartrate 0.21 gm., magnesium sulphate 0.04 gm., calcium chlorid 0.02 gm. Filter and sterilize. **N.'s Obliquity of the Head**, lateral flexion of the fetal head toward the mother's sacral bone, the left ear approaching the left shoulder, and the right parietal bone presenting in a left occipito-anterior position. It is the third step in the mechanism of delivery. See *Obliquity*. **N.'s Rule**, for predicting the date of confinement: "Count back three months from the date of *cessation* of the last menstrual flow, and add seven days." Hirst modifies this by counting from the date of *appearance*, believing that the result will be more accurate. **N.'s Pelvis.** See *Pelvis*, *Female*, *Deformities of*. **N.'s Theory.** See *Heredity*.

Nævoid (*ne'-void*). See *Nevoid*.

Nævose (*ne'-vōs*). See *Nevose*.



Nævus (*ne'-vus*). See *Nevus*.

Nail (*nāl*) [ME., *naile*, a nail]. The horny lamina covering the dorsal aspect of the end of each finger and toe. **N.-area**, a thickening of the epitrichium over the end of the digit, marked out quite definitely by a limiting groove that persists more or less distinctly throughout life. It first appears in the human embryo about the beginning of the third month. **N.-bed**, the depression in which the nail rests. **N.-bone**, the lacrymal bone or os unguis. **N.-brush**, a hand brush for cleaning the finger-nails. **N.-culture**, a term applied in bacteriology to a stab-culture showing a growth along the needle-track, and on the surface a button-like projection, giving the appearance of a nail driven into the gelatin. **N.-file**, a small single-cut file for trimming the finger-nails. **N.-fold**, the portion of epi-

UNGUAL EXTREMITY OF FINGER, SHOWING NAIL.

1. Fold of skin covering root of nail. 2. Incised and turned back. 3. Semilunar portion of subungual skin. 4. Portion corresponding to body of nail.

CONCAVE ASPECT OF NAIL.

1. Its proximal border. 2. Portion corresponding to lunula. 3. Body. 4. Free distal border.

LONGITUDINAL SECTION OF UNGUAL EXTREMITY OF FINGER, SHOWING NAIL.

1. Corneous layer of epidermis of dorsal aspect. 2. Reflection of this layer upon nail. 3. Superficial layer of nail. 4. Corneous layer of epiderm of pulp of finger. 5. Rete Malpighii of dorsal aspect. 6. Reflection of the layer. 7. Second reflection. 8. Rete Malpighii of pulp of finger. 9. Derma of dorsal aspect. 10. Reflection of derma. 11. Second reflection of derma. 12. Derma of palmar aspect of finger. 13. Ungual phalanx.

dermis that covers the root and edges of the nail. **N.-groove**, the depression for the insertion of the nail. **N., Hang**, a little shred of skin hanging from the finger at the side of the nail. Hang-nails are sometimes quite painful, and the little wounds offer entrance to septic matter. **N., Infleshed, Ingrowing**, or **Ingrown**, an overlapping of the nail by the flesh, from pressure, attended with ulceration. **N.-matrix**, the proximal end of the *N.-bed*; the structure from which the nail grows. **N.-pad.** The same as *N.-rampart*. **N.-plate**, the volar side of a claw. **N.-rampart**, the epidermic border against which the margin of the nail rests. **N., Reedy, N., Striated**, a nail presenting longitudinal furrows. **N.-root**, the portion of the nail attached to the *N.-matrix*. **N. Spring.** Same as *Hang-nail*. **N., Turtle-back,**

name given by S. Weir Mitchell to a nail curved in all directions; it is a condition seen in certain trophic disturbances. **N.-wall.** The same as *N.-rampart*.

Nailers' Consumption. See *Siderosis*.

Nail-smiths' Cramp. See *Cramp*.

Naked (*na'-ked*) [ME., *naked*, naked]. Unclothed; nude. **N. Broomrape.** See *Aphyllon*. **N. Eye,** the eye unaided by a magnifying instrument.

Nakra (*na'-krah*) [Beng.]. A Bengalese disease resembling influenza.

Nalardofi (*nal-ar-do'-fe*) [native Iceland]. In Iceland, an endemic numbness of the hands, probably caused by the milking of ewes.

Namangitis (*nam-an-ji'-tis*). Synonym of *Lymphangitis*.

Nameless Crime. The name given to perversion of the genetic instinct, by which sexual gratification is secured in other than the normal way, as by buccal or anal coitus, etc.

Nanander (*nan-an'-der*) [*νᾶνος*, a dwarf; *ἀνήρ*, male]. Same as *Micrander*.

Nancy Method. See *Hypnotism*.

Nanism (*nan'-izm*) [*νᾶνος*, dwarf]. Abnormal smallness of size from arrested development. Dwarfishness.

Nanization (*nan-iz-a'-shun*) [*νᾶνος*, a dwarf]. In biology, artificial dwarfing, as practised by the Japanese on certain trees.

Nanocephalia (*nan-o-sef-a'-le-ah*) [*νᾶνος*, dwarf; *κεφαλή*, head]. The condition of being nanocephalous.

Nanocephalism (*nan-o-sef'-al-izm*). See *Nanocephalia*.

Nanocephalous (*nan-o-sef'-al-us*) [*νᾶνος*, dwarf; *κεφαλή*, head]. Possessing a dwarfed or diminutive head.

Nanocephaly (*nan-o-sef'-al-e*). See *Nanocephalia*.

Nanocormia, Nanocormus, (*nan-o-kor'-me-ah, nan-o-kor'-mus*) [*νᾶνος*, dwarf; *κορμός*, trunk]. 1. A monstrosity possessing a dwarfed trunk. 2. A dwarfed condition of the trunk.

Nanoid (*nan'-oid*) [*νᾶνος*, dwarf; *εἶδος*, like]. Dwarflike.

Nanomelia, Nanomelus (*nan-o-me'-le-ah, nan-om'-el-us*) [*νᾶνος*, dwarf; *μέλος*, limb]. A fetal monstrosity characterized by undersized limbs.

Nanophyes (*nan-off'-e-ēz*) [*νᾶνος*, dwarf; *φύειν*, to grow]. Dwarfish.

Nanosomia (*nan-o-so'-me-ah*). See *Microsomia*.

Nanosomus (*nan-o-so'-mus*) [*νᾶνος*, dwarf; *σῶμα*, body]. One dwarfed in body.

Nanus (*nan'-us*) [*νᾶνος*, a dwarf]. 1. A dwarf. One of less than ordinary stature. 2. Dwarfish; stunted; very small.

Nape (*nāp*) [ME., *nape*, nape]. The back part of the neck; the nucha.

Napellin (*na-pel'-in*) [*napellus*, dim. of *napus*, a turnip], $C_{28}H_{39}NO_{11}$. An alkaloid from *Aconitum napellus*. It is an anodyne and antineuralgic. Dose, gr. $\frac{1}{60}$–$\frac{1}{30}$. See *Aconite*.

Napellus (*na-pel'-us*) [L., dim. of *napus*, a turnip]. Aconitum napellus, *q. v.*

Naphtha (*naf'-thah*) [*ἄφθα*, asphaltum]. Danforth's oil; a product obtained from petroleum, boiling at 80° to 110° C.; specific gravity .690 to .700 or 76° to 70° B. It is used for burning in vapor-stoves and street-lamps, as a solvent for resins in making varnishes, and in the manufacture of oilcloths.

Naphthalene (*naf'-thal-ēn*) [*ἄφθα*, asphaltum], $C_{10}H_8$. One of the principal constituents of coal-tar, occurring in it in various proportions of from five to ten per cent.; it is also formed when the vapors of organic substances are passed through tubes heated to redness. The specific gravity of naphthalene when solid is 1.158; at its melting-point (79.2° C.) the specific gravity is 0.978; it boils at 216.6° C. The odor is pleasant, though characteristic: Naphthalene crystallizes in large, silvery, brilliant, thin, rhombic plates, that are feebly soluble in hot, but insoluble in cold water, though easily soluble in methyl and ethyl alcohols, chloroform, ether, and benzene. It is employed in the manufacture of a large series of coloring-matters; as an enricher of illuminating gas; and when specially refined, as a substitute for ordinary camphor in preventing the ravages of insects in woollen goods. It is an antiseptic, and, internally, an active expectorant; it is useful as a dressing for indolent sores, and, internally, in pulmonary catarrh. Dose, gr. ij–x in emulsion, or in pill, gr. $\frac{2}{3}$, given every hour. In large doses it is toxic, causing emesis and purgation. Unof. **N.-red,** $C_{30}H_{21}N_4Cl$; magdala-red; a safranin of naphthalene. It is a dark-brown powder that dissolves very readily in alcohol with a bluish-red coloration. It imparts a beautiful rose-red color to silk. **N.-yellow.** See *Pigments, Conspectus of*.

Naphthalidin (*naf-thal'-id-in*) [*ἄφθα* asphaltum], $C_{10}H_9N$. An amin derivative of naphthalene, occurring in two isomeric forms.

Naphthalin (*naf'-thal-in*) [*ἄφθα*, asphaltum]. Same as *Naphthalene*. **N. Dye-stuffs.** See *Pigments, Conspectus of*. **N.-red, N.-scarlet, N.-violet.** See *Pigments, Conspectus of*.

Naphthalol (*naf'-thal-ol*) [*ἄφθα*, asphaltum; *oleum*, oil], $C_6H_4OH.COOC_{10}H_7$. A salicylic-acid derivative of β-naphthol.

Naphthamein (*naf-tham-e'-in*). See *Pigments, Conspectus of*.

Naphthene (*naf'-thēn*) [*ἄφθα*, asphaltum], $C_{20}O_6$. A hypothetic substance existing in many naphthalin compounds. The naphthenes are hydrocarbons present in German oils, and are also contained in Caucasian petroleum; they are insoluble in sulphuric acid; octo-naphthene, C_8H_{16}, and nono-naphthene, C_9H_{18}, are well known; the naphthenes are considered identical with the benzene hexa-hydrids.

Naphthylamin (*naf-thil'-am-in*). Same as *Naphthalidin*.

Naphthylcarbamid (*naf-thil-kar'-bam-id*). See *Naphthylurea*.

Naphthylene (*naf'-thil-ēn*) [*ἄφθα*, asphaltum]. Synonym of *Naphthene*. **N.-blue.** See *Pigments, Conspectus of*.

Naphthylurea (*naf-thil-u'-re-ah*) (*ἄφθα*, asphaltum; *οὖρον*, urine]. A substance that appears in the urine after free administration of naphthalin; it colors the excretion brown. With acetic acid it gives a rose color; with sulphuric acid it has a green reaction.

Naphtol, or **Alpha-naphtol** (*naf'-tol*) [*ἄφθα*, asphaltum], $C_{10}H_7.OH$. A substance that results from *a*-naphthylamin by means of the diazo-compound. It is soluble with difficulty in hot water, readily in alcohol and ether, erystallizes in shining needles, and has the odor of phenol. It melts at 95° C., and boils at 278°–280° C. It is used in the preparation of alpha-oxynaphtoic acid. **N.,** β-, or **Beta-naphtol,** $C_{10}H_7.OH$, is formed from β-naphthylamin. It is readily soluble in hot water: it crystallizes in leaflets, melting at 122° C., and boiling at 286° C. **N.-blue.** See *Pigments, Conspectus of*. **N.-camphor,** a mixture of β-naphtol one part, with camphor two parts. It is antiseptic, and is used in diphtheria and pulmonary tuberculosis. Unof. **N.-green, N.-violet, N.-yellow.** See *Pigments, Conspectus of*.

Napifolious (*na-pif-o'-le-us*) [*napus*, a turnip; *folium*, a leaf]. In biology, having leaves like those of the turnip.

Napiform (*na'-pif-orm*) [*napus*, a turnip; *forma*, form]. Turnip-shaped.

Napkin (*nap′-kin*) [ME., *napkyn*, a napkin]. 1. A handkerchief. 2. A diaper. 3. A cloth used by menstruating women. **N.-holder**, an instrument used by dentists for holding a napkin in position within the mouth while a filling is being inserted in a tooth.

Naples (*na′-plz*) [Ital.]. A city of southern Italy. **N. Fever.** A synonym of *Fever, Typhoid.* **N. Green.** See *Pigments, Conspectus of.* **N. Red.** Same as *Ocher.* **N. Yellow.** See *Pigments, Conspectus of.*

Napoleon Blue. See *Pigments, Conspectus of.*

Narceia (*nar-se′-yah*). Same as *Narceïn.*

Narceïn (*nar′-se-in*) [*νάρκη*, numbness], $C_{23}H_{29}NO_9$. An alkaloid contained in opium. It is sparingly soluble in water and alcohol, and forms fine, silky, inodorous, bitter crystals. It is sometimes used in medicine as a substitute for morphin. Dose gr. ¼. Unof.

Narceïnic Acid (*nar-se-in′-ik*) [*νάρκη*, numbness], $C_{15}H_{15}NO_8 + 3H_2O$. An oxidation-product of narceïn; it is a tribasic acid.

Narcema (*nar-se′-mah*). Synonym of *Narcosis.*

Narcesis (*nar-se′-sis*). Synonym of *Narcosis.*

Narcissus (*nar-sis′-us*) [*νάρκισσος*, narcissus, so called from its narcotic qualities]. A genus of monocotyledonous plants. **N. pseudo-narcissus** Linn, common daffodil or chalice-flower, used as a diuretic. Unof.

Narcitin (*nar′-sit-in*). Synonym of *Pseudo-narcissin.*

Narcohypnia (*nar-ko-hip′-ne-ah*) [*νάρκη*, stupor; *ἀφυπνοῦν*, to awake]. Waking numbness; a peculiar state in which the patient has a sense of numbness on awaking.

Narcolepsy (*nar′-ko-lep-se*) [*νάρκη*, stupor; *λαμβάνειν*, to seize]. A term applied to the sudden but short attacks of deep sleep occasionally accompanying epilepsy, gouty, diabetic, and other affections. See also *Nelavan* and *Filariasis.*

Narcoleptic (*nar-ko-lep′-tik*) [*νάρκη*, stupor; *λαμβάνειν*, to seize]. Affected with narcolepsy.

Narcoma (*nar-ko′-mah*) [*νάρκη*, stupor]. The stupor produced by the use of a narcotic.

Narcomania (*nar-ko-ma′-ne-ah*) [*νάρκη*, stupor; *μανία*, mania]. Insanity characterized by stupor.

Narcomatous (*nar-ko′-mat-us*) [*νάρκη*, stupor]. Pertaining to, affected with, or of the nature of, narcoma.

Narcopepsia, Narcopepsis (*nar-ko-pep′-se-ah, nar-ko-pep′-sis*) [*νάρκη*, stupor; *πέψις*, digestion]. Slow or torpid digestion.

Narcorthopnea (*nar-kor-thop-ne′-ah*) [*νάρκη*, stupor; *ὀρθός*, straight; *πνοία*, breathing]. Orthopnea accompanied by stupor.

Narcose (*nar′-kōz*) [*νάρκη*, stupor]. In a condition of stupor.

Narcosis (*nar-ko′-sis*) [*νάρκωσις*, numbness]. The deadening of pain, or the production of incomplete or complete anesthesia by the use of narcotic agents, such as the anesthetics, opium, and other drugs.

Narcospasmos (*nar-ko-spaz′-mos*) [*νάρκη*, stupor; *σπασμός*, spasm]. Spasm accompanied by stupor.

Narcotic (*nar-kot′-ik*) [*ναρκωτικός*, from *ναρκοῦν*, to benumb]. 1. Producing stupor. 2. A drug that produces narcosis.

Narcotin (*nar′-kot-in*) [*ναρκωτικός*, narcotic], $C_{22}H_{23}NO_7$. An alkaloid of opium, separated from morphin by potassium hydroxid. It crystallizes from alcohol in shining prisms, and melts at 176° C. It is said to be sudorific and antipyretic, but has no narcotic or hypnotic effects. Dose, gr. j–ij. Unof.

Narcotism (*nar′-kot-izm*) [*ναρκωτικός*, narcotic; from *νάρκη*, stupor]. The condition resulting from the continued use of a narcotic.

Narcurethritis (*nar-ku-re-thri′-tis*). Synonym of *Gleet.*

Nard [*νάρδος*, nard]. See *Spikenard.*

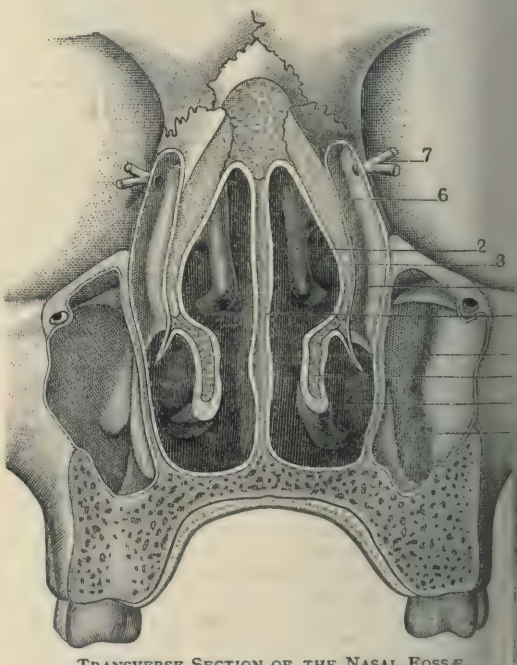
Nardine, Nardy (*nar′-din, nar′-de*) [*νάρδος*, nard]. Pertaining to, or redolent of, nard.

Naregamia (*nar-eg-a′-me-ah*) [E. Ind.]. Goanese Ipecacuanha; the bark of *N. alata*, having properties due to an alkaloid, *naregamin*. It is useful in bilious disorders and rheumatism. The alkaloid has proved valuable in dysentery. Dose gr. xv. Dose of the tincture (1 to 4) as an alterative ♏v–x; as an emetic ♏xv-xxx. Unof.

Naregamin (*nar-eg′-am-in*) [*naregamia*]. An alkaloid contained in *Naregamia alata.*

Narial (*na′-re-al*). Synonym of *Nasal.*

Naricorn (*na′-rik-orn*) [*naris*, nostril; *cornu*, horn]. In biology, the horny nasal case or rhinotheca of certain birds.



Nariform (*na′-rif-orm*) [*naris*, nostril; *forma*, form]. Shaped like a nostril.

Narine (*na′-rin*) [*naris*, a nostril]. Narial; pertaining to the nostrils.

Naris (*na′-ris*) [L.: *pl.*, *Nares*]. The nostril. See *Nasal Fossæ.* **N., Anterior,** the nostrils. **N., Internal, N. Posterior,** the posterior openings of the nasal cavities, through which they connect with the pharyngeal cavity.

Narthex (*nar′-theks*) [*νάρθηξ*, narthex]. The genus *Terula*; also a splint for the leg.

Nasal (*na′-zal*) [*nasus*, the nose]. Pertaining to the nose. **N. Angle.** See *Angle.* **N. Artery.** See *Arteries, Table of.* **N. Bones,** the two small bones forming the arch of the nose. See *Bones, Table of*

TRANSVERSE SECTION OF THE NASAL FOSSÆ.

1. Nasal septum. 2. Anterior extremity of middle turbinate bone. 3. Middle meatus. 4. Section of inferior turbinate bone. 5. Inferior meatus. 6. Lacrymal canal. 7. Canal uli. 8. Nasal canal. 9. Section of reflected mucous membrane. 10. Maxillary sinus or antrum of Highmore.

N. Canal. See *Canal.* **N. Cartilage.** See *Cartilage.* **N. Catarrh,** catarrh of the nasal cavities; cold in the head; coryza. **N. Cavities,** the nasal fossæ, *q.* **N. Cough,** a reflex cough, due to irritation of the mucous membrane of the nasal fossæ. **N. Cres**

See *Crest*. **N. Diplopia**. Same as *Crossed Diplopia*. **N. Duct**. See *Lacrymal Duct*. **N. Eminence**. See *Eminence*. **N. Floor**, the floor of the nasal fossæ. **N. Fossæ**, the nostrils; the cavities in the middle of the face leading to the internal surfaces of the nose. **N. Ganglion**, the spheno-palatine ganglion. See *Ganglia, Table of*. **N. Groove**. See *Groove*. **N. Index**. See *Index*. **N. Labyrinth**, the irregular cavity formed by the turbinal bones in the nasal passages. **N. Line**. See *Lines, Table of*. **N. Meatus**, one of the nostrils. **N. Membrane**, the Schneiderian membrane. **N. Nerve**. See *Nerves, Table of*. **N. Notch**. See *Notch*. **N. Passages**, the meatuses of the nose. **N. Point**. See *Craniometric Points*. **N. Process**. See *Process*. **N. Reflex**. See *Reflexes, Table of*. **N. Septum**. See *Septum of the Nose*. **N. Spine**. See *Spine*. **N. Voice**, a peculiar muffled twang of the voice, especially marked in cases of perforation of the palate. See *Dead Voice*.

NASAL BONES, EXTERNAL ASPECT.

1, 1. The two nasal bones. 2, 2. Superior extremity. 3, 3. Inferior border. 4, 4. Internal border. 5, 5, 5, 5. External border.

asarium (*na-za'-re-um*) [*nasus*, nose]. Nasal mucus.

ascal (*nas'-kl*) [*nascale*]. A pledget or dossil of lint, cotton, or wool, used in the treatment of uterine or vaginal disease.

ascent (*nas'-ent*) [*nascor, nasci*, to be born]. A term applied to gaseous substances at the moment of their liberation from chemic union.

asen (*na'-zen*) [*nasus*, a nose]. Belonging to the nasal bone in itself.

asethmoid (*na-zeth'-moid*) [*nasus*, nose; *ἠθμός*, a sieve; *εἶδος*, like]. Pertaining to the nasal and ethmoid bones.

asiform (*na'-zif-orm*) [*nasus*, nose; *forma*, form]. Shaped like the nose.

asilabial (*na-zil-a'-be-al*). See *Nasolabial*.

asio-alveolar (*na'-ze-o-al-ve'-o-lar*) [*nasus*, nose; *alveolus*, socket]. Relating to or connecting the nasion and the alveolar point.

asio-bregmatic (*na'-ze-o-breg-mat'-ik*) [*nasus*, nose; *βρέγμα*, bregma]. Pertaining to the nasion and the bregma.

asio-inial (*na'-ze-o-in'-e-al*) [*nasus*, nose; *ἰνίον*, occiput]. Pertaining to the nasion and the inion.

asio-mental (*na'-ze-o-men'-tal*) [*nasus*, nose; *mentum*, chin]. Pertaining to or connecting the nasion and the mentum.

asion (*na'-ze-on*) [*nasus*, nose]. The median point of the naso-frontal suture. See *Craniometric Points*.

asitis (*na-zi'-tis*). See *Rhinitis*.

asmyth's Membrane. The epithelial membrane enveloping the enamel of the teeth during their development and sometimes also for a short time after birth; cuticula dentis.

aso- (*na'-zo-*) [*nasus*, nose]. A prefix to denote connection with or relation to the nose. **N.-alveolar**. Same as *Nasio-alveolar*. **N.-basal**, pertaining to the nose and the base of the skull. **N.-basilar**, pertaining to the nasal point and the basion. **N.-frontal**, pertaining to the nasal and frontal bones. **N.-labial**, pertaining conjointly to the nose and the lips; applied to certain muscles. **N.-lacrymal**, pertaining to the nose and to the lacrymal apparatus, as the naso-lacrymal duct. **N.-maxillary**, pertaining to the nasal bone and the upper jaw-bone. **N.-opisthiac**, pertaining to the nasion and the opisthion. **N.-palatal, N.-palatine**, pertaining to both nose and palate. Also, the name of the nerve entering the nasal fossa and passing across the roof of the nose to the roof of the mouth, supplying that part of the mucosa behind the incisor teeth. See *Nerves, Table of*. **N.-pharyngeal**, pertaining conjointly to the nose and the pharynx. **N.-pharyngitis**, inflammation of the mucosa lining the naso-pharynx. **N.-pharynx**, the arching space between the posterior nares and a horizontal plane through the lower margin of the soft palate. **N.-subnasal**, in craniometry, applied to a line connecting the nasal and the subnasal points.

Nasocular (*na-zok'-u-lar*) [*nasus*, nose; *oculus*, eye]. Pertaining to the nose and the eye; nasorbital.

Nasology (*na-zol'-o-je*) [*nasus*, nose; *λόγος*, science]. The study of noses.

Nasorbital (*na-zor'-bit-al*) [*nasus*, nose; *orbitalis*, orbital]. Nasal and orbital.

Nasta (*nas'-tah*) [*ναστός*, solid]. A fleshy tumor of the neck about the shoulders.

Nasus (*na'-zus*) [L.]. The nose.

Nasute (*na'-sūt*) [*nasus*, nose]. Large-nosed.

Nasutiform (*na-su'-tif-orm*) [*nasutus*, long-nosed; *forma*, form]. In biology, applied to nose-like processes of the heads of insects.

Natal (*na'-tl*) [*natalis*, from *nasci*, to be born]. Native; connected with one's birth.

Natal (*na'-tl*) [*natis*, rump]. Gluteal; pertaining to the nates.

Natal Sore. See *Furunculus orientalis*.

Natalitial (*na-tal-ish'-al*) [*natalis*, from *nasci*, to be born]. Pertaining to one's birth.

Natality (*na-tal'-it-e*) [*natalis*, of birth]. In State medicine and statistics, the birth-rate.

Nataloin (*nat-al'-o-in*) [*Natal*; *ἀλόη*, the aloe], $C_{25}H_{28}O_{11}$. The aloin derived from *Natal aloes*.

Natant (*na'-tant*) [*natare*, to swim]. Swimming or floating on the surface of a liquid.

Nates (*na'-tēz*) [*natis*, the buttock: *pl.*, *Nates*]. The buttocks. **N. of Brain**, the anterior pair of the *Corpora quadrigemina*.

Natiform (*nat'-if-orm*) [*nates*, buttocks; *forma*, form]. Buttock-shaped.

Native (*na'-tiv*) [*nativus*, born]. Coming into existence by birth; of indigenous origin or growth. **N. Albumins**, a class of animal proteids occurring in a natural condition in animal solids and fluids. They are soluble in water, and are not precipitated by alkaline carbonates, sodium chlorid, or very dilute acids. Their solutions are coagulated by heat at 65° to 73° C. Dried at 40° C. they yield a clear, yellow or amber-colored, friable mass soluble in water, called *soluble albumin*. The two chief varieties of native albumins are serum-albumin and egg-albumin.

Nativism (*na'-tiv-izm*) [*nativus*, born]. The psychologic theory that assumes that our ideas of form, space, and distance are, at least in part, due to the make-up of the organism or to some native power or endowment, and not entirely to experience.

Nativistic (*na-tiv-is'-tik*) [*nativus*, native]. Pertaining to nativism.

Natrium (*na'-tre-um*). See *Sodium*.

Natron (*na'-tron*) [Ar., *natrūn*, native carbonate of sodium]. Native sodium carbonate. Also, sodium or potassium nitrate. This was formerly the exclusive meaning of the word.

Natta (*nat'-ah*). An old name for a wen, fleshy excrescence, or tumor. [Obs.]

Natural (*nat'-u-ral*) [*natura*, nature]. 1. Pertaining to nature. 2. An idiot. **N. Gas**, the mixture of

inflammable gases that is found issuing from the earth in various localities. It consists essentially of methane, with small quantities of hydrogen, carbon monoxid and dioxid, and some nitrogen. **N. History,** a term including a description of all the products and phenomena of nature, but now usually restricted to the sciences of zoölogy and botany. **N. Order,** one of the divisions in the classification of both animals and plants, varying in its technical meaning according to the system of classification. **N. Philosophy,** the science treating of the physical properties of matter at rest and in motion. It is now usually called *Physics.* **N. Selection.** See *Evolution.*

Naturalia (*nat-u-ra'-le-ah*) [*natura*, nature]. The genitalia.

Naturalism (*nat'-u-ral-izm*) [*natura*, nature]. The expectant method of treating disease.

Naturalization (*nat-u-ral-iz-a'-shun*) [*natura*, nature]. The process by which a plant or an animal transferred from its natural habitat adapts itself to its new surroundings.

Naturalized (*nat'-u-ral-izd'*) [*natura*, nature]. Relating to naturalization.

Nature (*na'-tūr*) [*natura*, birth, origin]. The aggregate action and product of many natural laws (Darwin). The energy by which the innumerable phenomena that fall daily under observation are produced. The word is loosely used as covering indiscriminately both biologic and non-living phenomena.

Naturism (*na'-tūr-izm*). Synonym of *Naturalism.*

Naupathia (*naw-pa'-the-ah*) [*ναῦς*, ship; *πάθος*, sickness]. Seasickness.

Nauplius (*naw'-ple-us*) [*ναῦς*, a ship; *πλεῖν*, to sail]. In biology, the earliest recognizable form of the crustacean larva, having an unsegmented ovate body, a median frontal eye, and three pairs of natatory feet, of which the anterior are simple and the other two biramose. **N. Eye,** the unpaired eye of all larval *Crustaceans,* and retained in the adult *Entomostraca.*

Nausea (*naw'-ze-ah*) [*nausea*, *ναυσία*, seasickness]. Sickness at the stomach, with inclination to vomit. **N. marina, N. navalis,** seasickness.

Nauseant (*naw'-ze-ant*) [*ναυσία*, seasickness]. 1. Nauseating; producing nausea. 2. Any agent that produces nausea.

Nauseating (*naw'-ze-a-ting*). Synonym of *Nauseous.*

Nauseous (*naw'-ze-us*, or *naw'-yus*) [*ναυσία*, seasickness]. Producing nausea, or loathing.

Nautomania (*naw-to-ma'-ne-ah*) [*ναύτης*, sailor; *μανία*, madness]. A kind of homicidal madness said by some writers to exist among sailors.

Navel (*na'-vl*) [ME., *navel*, navel]. See *Umbilicus.* **N.-ill,** a disease of calves, in which the navel becomes inflamed and the adjacent parts red and swollen. **N.-string,** the umbilical cord.

Navicula (*na-vik'-u-lah*) [dim. of *navis*, ship]. A genus of diatoms of many species, some of which have the frustules marked with very minute striæ, the definition of which is sometimes taken as a test of the power of microscopes.

Navicular (*na-vik'-u-lar*) [*navicula*, a little ship]. Boat-shaped. **N. Bone.** See *Scaphoid.* **N. Fossa,** applied to several cavities, especially to a depression between the vaginal aperture and the fourchet, and to a dilatation of the urethra near the glans penis. **N. Sheath,** the synovial membrane covering the navicular bone in ungulates, as in the horse.

Naviculoid (*nav-ik'-u-loid*) [*navicula*, a small boat; *εἶδος*, like]. Scaphoid.

Naviform (*na'-vif-orm*) [*navis*, ship; *forma*, form]. Boat-shaped; scaphoid.

Navis (*na'-vis*) [*navis*, ship]. The vulva.

Navy-blue. Same as *Prussian Blue* and *Soluble Blu*

Neale's Lung. An apparatus devised for the purpo of removing the carbon dioxid and ammonia fr the vitiated atmosphere of a room. It is also call *Neale's Chemical Lung.*

Nealogy (*ne-al'-o-je*) [*νεαλής*, young, fresh; *λόγ* science]. In biology, the doctrine of the morpholog correlations of a young organism.

Neanderthaloid (*na-ahn'-der-tahl-oid'*) [from *Neand thal* in Rhenish Prussia]. Resembling the (preh toric) Neanderthal skull, a noted skull found ne Bonn, in Germany. A term used in craniology a anthropology.

Neapolitan Fever. See *Mediterranean Fever.* **Ointment,** blue ointment; mercurial ointment.

Near (*nēr*) [ME., *nere*, near]. 1. Being close by, n distant. 2. Closely akin. 3. The left side of animal as distinguished from the "off," or the rig side. **N. Point.** See *Punctum proximum.* **N.-sigh N.-sightedness.** See *Myopia.*

Nearthrosis (*ne-ar-thro'-sis*) [*νέος*, new; *ἄρθρωσ* joint]. A new and abnormally-produced articulatio in the sequence of a fracture, dislocation, or disea of the bone.

Neat (*nēt*) [ME., *neet*, an ox or cow]. Cattle of t bovine genus. **N.'s-foot Oil,** *Oleum bubulum,* prepared from ox-feet collected from the slaughte houses. It is a clear, yellowish oil of specific gravi .916 at 15° C. It does not congeal until below 32° F and is not liable to become rancid. It is of gre value as a lubricant, and is used for softening leath and in the grinding of metals. It is recommended as substitute for cod-liver oil. Unof.

Nebula (*neb'-u-lah*) [L., a cloud]. A faint, grayi opacity of the cornea. When more pronounced, it called *Leukoma.*

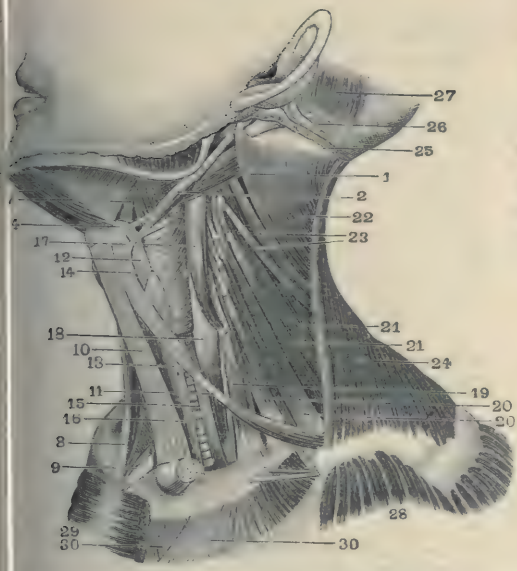
Nebulization (*neb-u-liz-a'-shun*). Synonym of *Atomiz tion.*

Nebulizer (*neb'-u-li-zer*) [*nebula*, a cloud]. An instr ment intended to produce a spray, and then to bre this up into a veritable nebula by impact against t wall of the containing vessel or other conveni obstacle. It is a valuable form of inhaler in tube culosis. See *Atomizer.*

Nebulose (*neb'-u-lōz*) [*nebula*, a mist, a cloud]. In bio ogy, having cloudy markings.

Necessity, Triangle of. See *Triangle, Carotid, I ferior,* in *Triangles, Table of.*

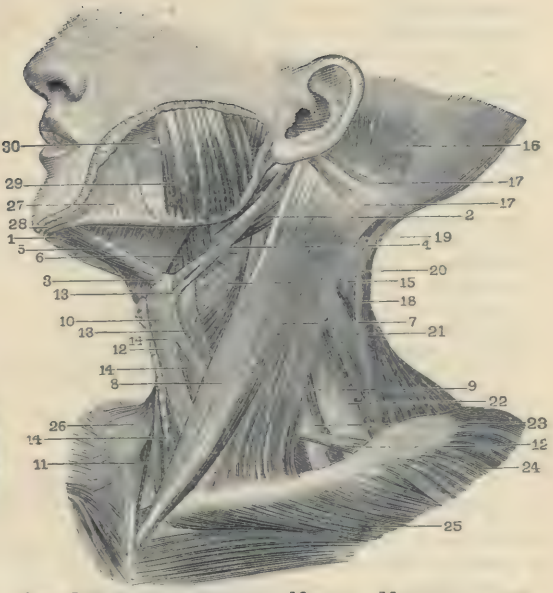
Neck (*nek*) [ME., *necke*, neck]. The constrict portion of the body connecting the head with t trunk; also, the narrow portion of any structu serving to join its parts. See *Cervix.* **N., An tomic,** the constricted portion of the humerus, ju below the articular surface, serving for the attachme of the capsular ligament. **N., Derbyshire.** Synony of *Goiter.* **N., Nithsdale.** Synonym of *Goiter.* N **rest,** in *massage*, having the hands joined behind t neck. **N., Surgical,** the constricted part of t humerus just below the condyles. **N., Wry-.** Synony of *Torticollis.*



Necrectomy (*nek-rek'-to-me*) [*νεκρός*, dead; *ἐκτομή* ex sion]. The excision of the necrotic conductors of sou in chronic purulent otitis media; in a more general sen any removal of necrosed material by a cutting operati

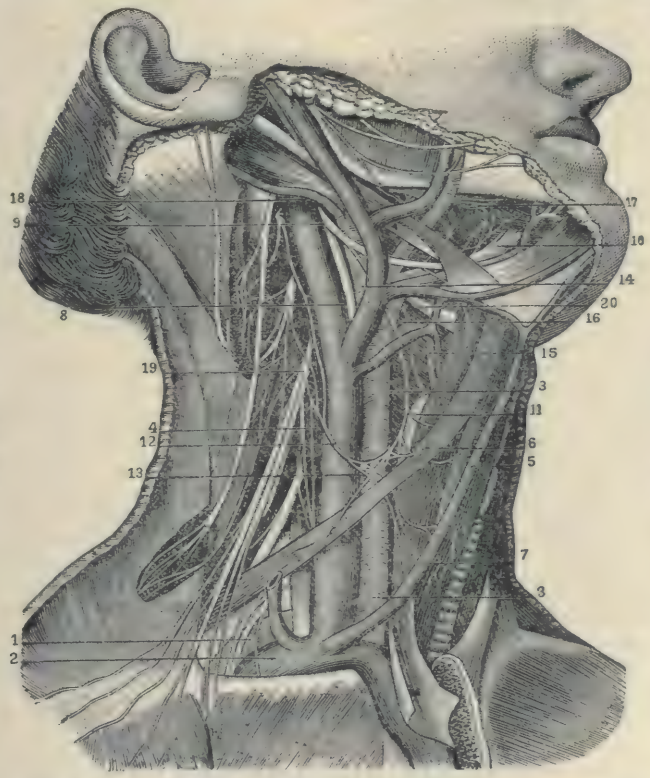
Necrencephalus (*nek-ren-sef'-al-us*) [*νεκρός*, dea *ἐγκέφαλος*, brain]. Softening of the brain.

Necrobiosis (*nek-ro-bi-o'-sis*) [*νεκρός*, dead; *βίος*, lif Molecular death of a tissue.



Necrobiotic (*nek-ro-bi-ot'-ik*) [*νεκρός*, dead; *βίος*, lif Pertaining to or causing necrobiosis.

Necrocedia (*nek-ro-se'-de-ah*) [*νεκρός*, corpse; *κῆ* care]. The process of embalming.



Muscles of Supra-hyoid and Infra-hyoid Regions.

Posterior belly of digastric. 2. Stylo-hyoid. 3. Anterior belly of digastric. 4. Tendon and pulley of digastric. 5. Anterior belly of right digastric. 6. Mylo-hyoid. 7. Hyoglossus. 8. Sternal fibers of right sterno-mastoid. 9. Sternal fibers of left sterno-mastoid. 10. Cleido-hyoid. 11. Tendon of omo-hyoid. 12. Thyro-hyoid. 13. Sterno-thyroid. 14. Inferior constrictor of pharynx. 15. Trachea. 16. Esophagus. 17. Rectus capitis anticus major. 18. Longus colli. 19. Scalenus anticus. 20, 20. Scalenus posticus. 21, 21. Levator anguli scapulæ. 22. Splenius capitis. 23, 23. Splenius colli. 24. Trapezius. 25. Attachment of sterno-mastoid. 26. Retrahens aurem. 27. Occipital portion of occipito-frontal. 28. Deltoid. 29. Attachment of pectorales majores to sternum. 30. External intercostal. 31. Internal intercostal

The Sterno-cleido-mastoid Muscle. Muscles of the Supra-hyoid and Infra-hyoid Regions.

1. Anterior belly of digastric. 2. Posterior belly. 3. Tendon and pulley for tendon. 4. Stylo-hyoid. 5. Mylo-hyoid. 6. Hyo-glossus. 7. Sterno-cleido-mastoid. 8. Anterior or sternal portion. 9. Posterior or clavicular portion. 10. Left sterno-hyoid. 11. Right sterno-hyoid. 12, 12. Omo-hyoid. 13. Thyro-hyoid 14, 14. Sterno-thyroid. 15. Anterior portion of inferior constrictor of pharynx. 16. Occipital muscle. 17, 17. Retrahens aurem. 18. Trapezius. 19. Splenius capitis. 20. Splenius colli. 21. Levator anguli scapulæ. 22. Scalenus posticus. 23. Scalenus anticus. 24. Superior portion of deltoid. 25. Superior portion of pectoralis major. 26. Inferior and anterior portion of right platysma myoides. 27. Depressor anguli oris. 28. Depressor labii inferioris. 29. Masseter. 30. Buccinator.

Vessels and Nerves of the Neck.

Subclavian artery. 2. Subclavian vein. 3, 3. Common carotid artery. 4. Internal jugular vein. 5. Anterior jugular vein. 6. Omo-hyoid muscle. 7. Sterno-hyoid muscle. 8. Trunk of pneumogastric nerve. 9. Hypoglossal nerve. 10. Its terminal portion. 11. Its descending branch. 12. Internal descending branch of cervical plexus. 13. Plexus formed by last two branches. 14. External carotid artery. 15. Superior thyroid artery and vein. 16. Lingual and facial arteries. 17. Facial artery and vein. 18. Occipital artery. 19. Anterior branches of the first four cervical nerves. 20. Superior laryngeal nerve.

Necrocomium (*nek-ro-ko'-me-um*). See *Morgue.*

Necrodermitis (*nek-ro-der-mi'-tis*)[νεκρός, dead; δέρμα, skin; ιτις, inflammation]. A gangrenous inflammation of the skin.

Necrodochium (*nek-ro-do'-ke-um*). See *Morgue.*

Necrogenic (*nek-ro-jen'-ik*) [νεκρός, dead; γεννᾶν, to beget]. Originating from dead substances.

Necrology (*nek-rol'-o-je*) [νεκρός, dead; λόγος, science]. A register containing the statistics concerning the causes and rate of mortality.

Necromania (*nek-ro-ma'-ne-ah*) [νεκρός, corpse; μανία, madness]. See *Necrophilism.*

Necrometer (*nek-rom'-et-er*) [νεκρός, dead; μέτρον, measure]. An instrument for weighing organs at an autopsy.

Necromimesis (*nek-ro-mim-e'-sis*) [νεκρός, dead; μίμησις, mimicry]. 1. The insane delusion of one who believes himself to be dead. 2. Simulation of death by a deluded person.

Necronarcema (*nek-ro-nar-se'-mah*) [νεκρός, corpse; νάρκημα, numbness]. Synonym of *Rigor mortis.*

Necronectomy (*nek-ron-ek'-to-me*) [νεκρός, dead; ἐκ, out; τέμνειν, to cut]. The excision of a necrotic part —applied especially to the excision of the necrotic ossicles of the ear.

Necronium (*nek-ro'-ne-um*) [νεκρός, dead]. A substance said to be found in the dead body in cases of saponification.

Necropathy (*nek-rop'-ath-e*) [νεκρός, dead; πάθος, illness]. Any gangrenous or necrotic disease.

Necrophagous (*nek-roff'-ag-us*) [νεκρός, dead; φαγεῖν, to eat]. A term applied to those animals that feed on dead or putrid flesh. Carrion-eaters.

Necrophile (*nek'-ro-fil*)[νεκρός, dead; φιλεῖν, to love]. One who violates dead bodies.

Necrophilia (*nek-ro-fil'-e-ah*). See *Necrophilism.*

Necrophilism (*nek-roff'-il-izm*) [νεκρός, a corpse; φιλεῖν, to love]. A form of sexual perversion in which dead bodies are dug up and violated; insane sexual desire for a corpse.

Necrophobia (*nek-ro-fo'-be-ah*) [νεκρός, corpse; φόβος, fear]. 1. Insane dread of dead bodies, or of phantoms. 2. Thanatophobia; extreme dread of death.

Necropneumonia (*nek-ro-nu-mo'-ne-ah*) [νεκρός, dead; πνευμονία, pneumonia]. Gangrene of the lung.

Necropsic (*nek-rop'-sik*) [νεκρός, dead; ὄψις, seeing]. Pertaining to a post-mortem examination.

Necropsy (*nek'-rop-se*) [νεκρός, corpse; ὄψις, seeing]. The examination of a dead body.

Necroscopic (*nek-ro-skop'-ik*) [νεκρός, dead; σκοπεῖν, to view]. Pertaining to necroscopy.

Necroscopy (*nek-ros'-ko-pe*) [νεκρός, corpse; σκοπεῖν, to inspect]. Post-mortem examination of the body.

Necrose (*nek-rōz'*)[νεκρός, dead]. To become affected with necrosis; to cause necrosis.

Necrosemiotic (*nek-ro-sem-e-ot'-ik*) [νεκρός, corpse; σημεῖον, sign]. Serving as a sign of death.

Necrosis (*nek-ro'-sis*) [νέκρωσις, from νεκρός, dead]. The death of cells surrounded by living tissue. Necrosis proper refers to death in mass, necrobiosis to death of individual cells. Among the causes of necrosis are: (1) direct injury; (2) obstruction of the circulation; (3) loss of trophic influence. The varieties of necrosis are: (1) coagulative necrosis; (2) liquefactive necrosis; (3) cheesy necrosis; (4) dry and moist gangrene. See *Gangrene.* Necrosed tissues may be absorbed, retained, or thrown off. The dead tissue is called *sequestrum* in case of bone, and *sphacelus* in case of soft parts. In surgery the term necrosis is often applied specifically to the death of bone. **N., Anemic.** See *Infarct, Anemic.* **N., Caseous.** See *Cheesy.* **N., Balser's Fatty,** the occurrence of areas of opaque whitish tissue often seen surrounding the lobules of the pancreas in acute pancreatitis, and also occurring in the omentum and mesentery and in the abdominal fatty tissue generally. They are usually about the size of a pin's head, but may reach the size of a hen's egg. On section they have a soft, tallowy consistence. They are constituted of a combination of lime with certain fatty acids, and may be encrusted with lime. They may occur independently of disease of the pancreas. See *Diseases, Table of.* **N., Cheesy,** necrosis characterized by the formation of a cheese-like material. Dry and moist cheesy necrosis are the two varieties described. It is usually due to the presence of the tubercle-bacillus, and is most often seen in the lungs. **N., Coagulative,** a variety characterized by the formation of fibrin. Its most common seat is the blood in thrombi. It also occurs on mucous membranes, where it produces false membrane, chiefly under the influence of the bacillus of diphtheria, but also of other irritant agents. Occasionally it occurs in the interior of organs as the result of embolism or thrombosis, leading to the formation of an anemic infarct *q. v.* **N., Colliquative.** See *N., Liquefactive.* **N., Embolic,** coagulative necrosis in an anemic infarct following embolism. **N., Hyaline,** coagulative necrosis; also a synonym of hyaline degeneration. **N. infantilis.** Synonym of *Cancrum oris.* **N. laryngis.** Synonym of *Perichondritis of the Larynx.* **N., Liquefactive,** a process analogous to coagulative necrosis, but instead of fibrin the peculiar reaction of fluids and cells gives rise to the formation of a liquid. Blisters and vesicles, softening of the brain subsequent to embolism, and suppuration are the results of liquefactive necrosis. It may also be the terminal stage of all other forms of necrosis. **N., Mercurial,** a necrosis of bones due to chronic poisoning with mercury. **N., Phosphorus,** a necrosis of bone, especially of the lower jaw, occurring in those exposed to the fumes of phosphorus. **N. of the Teeth,** odonto-necrosis. By the term necrosis, when applied to the teeth, is meant the entire death of the pulp and the loss of vitality of the peridental membrane. **N. ustilaginea,** dry gangrene from ergotism.

Necrosozoic (*nek-ro-so-zo'-ik*) [νεκρός, dead; σώζειν, to preserve]. Having power to preserve or to embalm.

Necrosteon (*nek-ros'-te-on*) [νεκρός, dead; ὀστέον, bone]. Necrosis of bone.

Necrotic (*nek-rot'-ik*) [νεκρός, dead]. Pertaining to or characterized by necrosis. **N. Pneumonia.** See *Pneumonia.*

Necrotomic (*nek-ro-tom'-ik*) [νεκρός, dead; τομή, a cutting]. Pertaining to necrotomy.

Necrotomy (*nek-rot'-o-me*) [νεκρός, a corpse; τομή, a cutting]. The dissection of a dead body.

Necrotype (*nek'-ro-tīp*) [νεκρός, a corpse; τύπος, a type]. In biology, applied to types of organisms as regards any special region, in which, after having existed, they became extinct.

Nectandra (*nek-tan'-drah*) [νέκταρ, nectar; ἀνήρ, male]. A genus of lauraceous tropical American trees, of some 70 species, of which Bebeeru bark, the bark of *N. rodiæi*, the green heart, a large tree of S. America, is commercially the most important, its timber being of great value. It contains an alkaloid, *bebeerin*, or *buxin*, $C_{20}H_{23}NO_4$, and is a bitter tonic and febrifuge. Dose of the sulphate of the alkaloid, gr. ij–v. Unof.

Nectandrin (*nek-tan'-drin*). Same as *Buxin.*

Nectar (*nek'-tar*) [νέκταρ, the drink of the gods]. In biology, nectar, the sweet liquid in flowers from which

the bees make honey. It is secreted by certain specialized organs known as nectar-glands. **N.-gland,** a gland secreting nectar or honey. **N.-spots, N.-guides,** Sprengel's name for the contrasted colors often seen in a single flower and so disposed in spots or lines as to suggest that they bear a direct relation to the point where the nectar is secreted.

Nectariferous (*nek-tar-if'-er-us*) [*νέκταρ*, nectar; *ferre*, to bear]. In biology, honey-bearing, or having a nectary.

Nectarilyma (*nek-tar-il-i'-mah*) [*nectarium*, nectary; *luere*, to wash]. In biology, a collection of long hairs found on the inner surface of some flowers.

Nectary (*nek'-tar-e*) [*νέκταρ*, nectar: *pl.*, *Nectaries*]. In biology, that part of a flower which secretes nectar.

Necteric. See *Nekteric*.

Nectocalycine (*nek-to-kal'-is-in*) [*νηκτός*, swimming; *κάλυξ*, a cup]. In biology, resembling or pertaining to a nectocalyx or swimming-bell.

Nectocalyx (*nek-to-ka'-liks*) [*νηκτός*, swimming; *κάλυξ*, a cup: *pl.*, *Nectocalyxes*, *Nectocalices*]. In biology, the swimming-bell or locomotive organ of certain *Hydrozoa*, which, however modified, may be reduced to a simple type—that of a cup lined by a muscular membrane, by whose contractions the water is expelled, the animal being consequently urged by its reaction in the opposite direction; a nectophore.

Nectocyst (*nek'-to-sist*) [*νηκτός*, swimming; *κύστις*, a bag]. Same as *Nectosac*.

Nectophore (*nek'-to-for*) [*νηκτός*, swimming; *φέρειν*, to bear]. In biology, a swimming-bell, or nectocalyx.

Nectosac (*nek'-to-sak*) [*νηκτός*, swimming; *σάκκος*, a bag or sack]. In biology, the interior of the swimming-bell; the *nectocyst*, or *nectophore*, of a hydrozoan.

Nectosome (*nek'-to-sōm*) [*νηκτός*, swimming; *σῶμα*, body]. In biology, the upper locomotor portion of a siphonophorous stock, as distinguished from the *siphosome* or nutrient portion.

Nectozoöid (*nek-to-zo'-oid*) [*νηκτός*, swimming; *ζῷον*, animal; *εἶδος*, form]. In biology, the swimming-bell, or nectocalyx, considered as a specialized zoöid.

Necusia (*nek-u'-se-ah*) [*νέκυς*, corpse]. Poisoning by a dissection-wound.

Necusin (*nek'-u-sin*) [*νέκυς*, corpse]. The supposed septic principle in necusia.

Needham's Bodies or Filaments. The spermatophores of the cephalopoda. **N.'s Receptacle,** a cyst-like annex of the excretory duct of the seminal vesicle of the cephalopoda.

Needle (*ne'-dl*) [ME., *nedle*, needle]. An instrument used in surgery for suturing tissues, ligating vessels, and for other purposes. **N., Aneurysm,** one with a handle, and with the eye at the point, especially adapted for ligating vessels. **N., Cataract,** one for operating upon the cataractous lens or its capsule. **N., Deschamp's,** a needle with the eye at the point, and with a handle, for ligating arteries. **N., Discission,** one for insertion through the cornea, and breaking the capsule and substance of the crystalline lens. **N., Exploring,** an eyeless needle, grooved to bring away a few drops of the contents of a cavity, a tumor, or an abscess. **N.-forceps,** a forceps for seizing needles in surgery. **N., Hagedorn's,** a flat suture-needle curved on its edge, with the eye perforating the side. **N., Hare-lip,** one provided with a small canula to be left *in situ* after withdrawal of the needle. **N.-holder,** a handle for clasping a needle. Also, an insulated handle for holding the needles employed in certain forms of electro-cautery. **N., Hutchinson's,** a needle for the ligation of hemorrhoids; it is fixed on a handle and has the eye at the point. **N., Hypodermatic,** the fine needle-pointed metallic tube attached to the barrel of the hypodermatic syringe. **N., Knife,** one that has a sharp cutting edge; it is used in the discission of cataracts. **N., Ligature.** Synonym of *N., Aneurysm*. **N., Open-eyed,** one in which the eye is not completely closed but is in the form of a hook. **N.-operation.** See *Extraction of Cataract*. See also *Acupuncture* and *Acupressure*. **N., Spanish.** See *Spanish Needle*. **N., Startin's Wire,** a hollow needle for carrying silver wire. **N., Suture,** a needle used for suturing. **N., Whitehead's Spiral,** a spiral needle with a terminal eye for use in staphylorrhaphy.

Needling (*ne'-dling*) [ME., *nedle*, needle]. 1. See *Extraction of Cataract* and *Discission*. 2. A procedure sometimes employed for the detection of calculi in the biliary passages, gall-bladder, and kidney.

Neef's Hammer. An automatic arrangement for opening and breaking the current in an inductorium.

Neelsen's Carbolic-acid Solution. See *Stains, Table of*.

Neftgil (*neft'-jil*). A solid paraffin found free in Baku.

Negative (*neg'-at-iv*) [*negare*, to deny]. A qualification the opposite of positive; not affirmative. **N. Chemotaxis,** the absence of the power of attracting leukocytes and wandering cells, or their repulsion. See *Chemotaxis*. **N. Ocular.** See *Ocular*. **N. Pole,** that pole of a galvanic cell connected with the carbon or least oxidizable plate. Also, that pole of an electric generator toward which the assumed electric current flows.

Negativism (*neg'-at-iv-izm*) [*negare*, to deny]. A symptom observed in some cases of so-called *Catatonia attonita*, in which the patient exhibits no spontaneous movements, although his muscles spontaneously and powerfully antagonize any passive motion.

Negro (*ne'-gro*) [*niger*, black]. A race of people distinguished mainly by woolly hair, black skin, thick, protruding lips, and flattened nose. The melanochroi of Huxley's classification. Also, an individual of the race. See *Mulatto*. **N.-cachexy, N.-cachexia, N.-lethargy.** See *African Lethargy* and *Cachexia*. **N.-type of Idiocy.** See *Idiocy, Ethnic*.

Neisser's Method. A method of double-staining of spore-bearing bacilli. Cover-glass preparations are immersed for twenty minutes in fuchsin-anilin-water at 80° or 90° C., then rinsed in water or alcohol, and counterstained with an aqueous solution of methylene-blue, rinsed in water, dried, and mounted in balsam; the spores are stained red, other objects blue. **N.'s Micrococcus.** See *Bacteria, Synonymatic Table of*. **N.'s Oil,** a modification of Lang's oil. It consists of mercury, 20 parts; ethereal tincture of benzoin, 5 parts; liquid vaselin, 40 parts; it is used by injection in the treatment of syphilis.

Neisseria (*nī'-se-re-ah*) [after *Neisser*, a German physician]. A generic term for a group of schizomycetes. The majority are micrococci. They will be found described under *Bacteria, Synonymatic Table of*.

Nekteric (*nek-ter'-ik*) [*νηκτής*, swimming]. In biology, applied by Hæckel to the voluntarily swimming organisms of the ocean, as distinguished from the drifting or *ploteric* forms.

Nekton (*nek'-ton*) [*νηκτής*, swimming]. In biology, the nekteric or actively swimming portion of the organic life of the ocean (*plankton*), taken as a whole.

Nelaton's Catheter, the soft rubber catheter. **N.'s Dislocation,** a form of dislocation of the ankle-joint in which there is a displacement of the astragalus between the lower extremities of the tibia and fibula. **N.'s Fibers,** the circular muscular fibers of the rectum. **N.'s Line.** See *Lines, Table of*. **N.'s Method.** See *Treatment, Methods of*. **N.'s Operation.** See *Operations, Table of*. **N.'s Probe.** See *Probe*.

Nelavan (*nel'-av-an*). See *African Lethargy.*

Nematachometer (*nem-at-ak-om'-et-er*) [*νῆμα*, thread; *τάχος*, rapidity; *μέτρον*, measure]. An instrument for measuring the rapidity of transmission of nervous impulses in peripheral nerves.

Nemathece (*nem'-ath-ēs*). Same as *Nemathecium.*

Nemathecium (*nem-ath-e'-se-um*) [*νῆμα*, a thread; *θηκίον*, dim. of *θήκη*, a case or receptacle: *pl.*, *Nemathecia*]. In biology, a wart-like growth of tetraspores of the thallus of one of the higher algæ (*Florideæ*).

Nemathelminth (*nem-ath-el'-minth*) [*νῆμα*, thread; *ἕλμινς*, worm]. Any nematode worm. The *Nemathelminthes* (the round-worms, or thread-worms), form a class of *Vermes*, many of which are endoparasitic.

Nematilla (*nem-at-il'-ah*) [*νῆμα* (*νηματ-*), a thread: *pl.*, *Nematillæ*]. In biology, one of the urticating-organs of a cœlenterate; a nematophore, or *Organa urticantia.*

Nematoblast (*nem'-at-o-blast*) [*νῆμα*, thread; *βλαστός*, germ]. A spermatoblast. See also *Spermatogonia.*

Nematocalyx (*nem-at-o-ka'-liks*) [*νῆμα*, thread; *κάλυξ*, calyx: *pl.*, *Nematocalyxes*, *Nematocalices*]. In biology, a hydrozoan calyx containing nematocysts.

Nematocyst (*nem'-at-o-sist*) [*νῆμα*, a thread; *κύστις*, bladder]. In biology, one of the stinging-cells characteristic of the *Cnidaria;* a thread-cell, lasso-cell, snidocell, cnida, nemocyst.

Nematode (*nem'-at-ōd'*) [*νηματώδης*, thread-like]. In biology, filiform, thread-like; resembling a thread; it is applied to thread-worms, hair-worms, round-worms, pin-worms.

Nematodes (*nem-at-o'-dēz*). Synonym of *Nematoidea.*

Nematogen (*nem-at'-o-jen*) [*νῆμα*, thread; *γενής*, producing]. In biology, the vermiform embryo of a nematode worm. Cf. *Rhombogen.*

Nematoid (*nem'-at-oid'*) [*νῆμα*, thread; *εἶδος*, form]. Same as *Nematode.*

Nematoidea (*nem-at-oi'-de-ah*) [*νῆμα*, thread; *εἶδος*, like]. Thread-worms; nemathelminths. The most important nematoidea parasitic upon man and the lower animals belong to the following genera, arranged alphabetically: Anguillula, Ankylostoma, Ascaris, Eustrongylus, Filaria, Nematodium, Oxyuris, Strongylus, Trichina, Trichocephalus. See *Parasites* (*Animal*), *Table of.*

Nematophore (*nem'-at-o-for*) [*νῆμα*, a thread; *φόρος*, bear]. In biology, a cecal process of the cenosarc of hydrozoans, invested by a continuation of the hard cuticular layer, so as to be quite firm and inflexible, and containing thread-cells. Lendenfeld considers that the expression nematophore should be reserved for the chitinous envelop of the guard-polyp (*Machopolyp*); a nematilla, or urticating organ.

Nematozoöid (*nem-at-o-zo'-oid'*) [*νῆμα*, thread; *ζῷον*, animal; *εἶδος*, form]. In biology, one of the stinging tentacles of a siphonophore regarded as a zoöid.

Nemocyst (*nem'-o-sist*). Same as *Nematocyst.*

Nemophilous (*nem-off'-il-us*) [*νέμος*, a wooded pasture, *φίλος*, loving]. In biology, fond of or inhabiting the woods; nemorose.

Nemorose (*nem'-or-ōz*) [*nemus*, a grove]. In biology, growing in groves or woodland.

Nemours-blue. See *Pigments, Conspectus of.*

Neo- (*ne'-o-*) [*νέος*, new]. A prefix signifying new.

Neoarthrosis (*ne-o-arth-ro'-sis*) [*νέος*, new; *ἄρθρον*, a joint]. A new or false joint.

Neoblastic (*ne-o-blas'-tik*) [*νέος*, new; *βλαστός*, a germ]. Originating, or of the nature of, new tissue.

Neochmosis (*ne-ok-mo'-sis*) [*νεοχμός*, new]. A relapse or recurrent attack of a disease.

Neo-Darwinism, Neo-Lamarckism (*ne-o-dar'-win-izm, ne-o-lam-ark'-izm*) [*νέος*, new; *Darwin; Lamarck*]. In biology, the doctrines of Darwin and Lamarck concerning evolution as modified by recent advocates.

Neoëmbryo (*ne-o-em'-bre-o*) [*νέος*, new; *ἔμβρυον*, embryo]. In biology, the earliest ciliated stage in the embryonic development of a metazoan.

Neogala (*ne-og'-al-ah*) [*νέος*, new; *γάλα*, milk]. Same as *Colostrum.*

Neohymen (*ne-o-hi'-men*) [*νέος*, new; *ὑμήν*, membrane]. A new or false membrane.

Neo-Lamarckism (*ne-o-lam-ark'-izm*) [*νέος*, new; *Lamarck*]. See *Neo-Darwinism.*

Neomembrane (*ne-o-mem'-brān*). See *Neohymen.*

Neomorphism (*ne-o-mor'-fizm*) [*νέος*, new; *μορφή*, form]. In biology, the development of a new form.

Neonatus (*ne-on-a'-tus*) [*νέος*, new; *natus*, born: *gen. pl.*, *Neonatorum*]. One newly born. **Neonatorum, Melæna.** See *Melena.* **Neonatorum, Ophthalmia.** See *Ophthalmia.* **Neonatorum, Trismus.** See *Trismus.*

Neonomous (*ne-on'-o-mus*) [*νέος*, new; *νόμος*, law]. In biology, recently specialized or adapted to modified environment.

Neontology (*ne-on-tol'-o-je*) [*νέος*, new; *ὤν*, being; *λόγος*, science]. In biology, Flourens' term for the study of existing organisms, as opposed to *paleontology* or the study of fossils.

Neopathy (*ne-op'-ath-e*) [*νέος*, new; *πάθος*, illness]. 1. A new or newly-discovered form of disease. 2. A recent complication or new condition of disease in a patient.

Neophilism (*ne-off'-il-izm*) [*νέος*, new; *φιλέειν*, to love]. Morbid or undue love of novelty.

Neophobia (*ne-o-fo'-be-ah*) [*νέος*, new; *φόβος*, fear]. Insane dread of new scenes or of novelties.

Neophrenia (*ne-o-frēn'-e-ah*) [*νέος*, new; *φρήν*, mind]. Mental deterioration in early youth.

Neoplasia (*ne-o-pla'-ze-ah*) [*νέος*, new; *πλάσσειν*, to mold]. The formation of new tissue or of a tumor.

Neoplasm, Neoplasma (*ne'-o-plazm, ne-o-plaz'-mah*) [*νέος*, new; *πλάσμα*, growth]. A new growth of tissue marked by histologic difference from its matrix; a tumor. See *Tumors, Table of.* **N., Inflammatory Fungoid.** Synonym of *Granuloma fungoides.*

Neoplasmatic (*ne-o-plaz-mat'-ik*) [*νέος*, new; *πλάσσειν*, to mold]. Of the nature of neoplasm; neoplastic.

Neoplastic (*ne-o-plas'-tik*) [*νέος*, new; *πλάσσειν*, to mold]. Pertaining to, or of the nature of, a neoplasm. Applied, also, to plastic operations for restoring lost tissue. See *Autoplasty.*

Neoplasty (*ne'-o-plas-te*) [*νέος*, new; *πλάσσειν*, to mold]. An operation for the restoration of lost tissue.

Neoscytechos, Neoscytechus (*ne-os-kit'-ek-os, ne-os-kit'-ek-us*) [*νέος*, new; *σκῦτος*, skin; *ἦχος*, echo]. See *Murmur, New Leather,* and *Bruit de cuir neuf.*

Neosote (*ne'-o-sōt*) [*νέος*, new]. A derivative of coal-tar having antiseptic properties.

Neossin (*ne-os'-in*) [*νεοσσιά*, a nest], $C_{22}H_{17}N_3O_6$. Mulder's term for an insoluble material, the chief component of the edible birdsnest.

Neossology (*ne-os-ol'-o-je*) [*νεοσσός*, a young bird; *λόγος*, science]. In biology, the study of the incubation and rearing of young birds.

Neotenia (*ne-o-te'-ne-ah*) [*νεώτερος*, an innovation or revolutionary movement]. In biology, Kollmann's term for the lengthening (for an indefinite time) of the period during which amphibians are gill-breathers.

Neotocicterus (*ne-ot-o-sik'-ter-us*) [*νεότοκος*, new-born; *ἴκτερος*, jaundice]. Icterus neonatorum.

Neotocogalactozemia (*ne-ot-ok-o-gal-ak-to-ze'-me-ah*) [*νεος*, new; *τόκος*, birth; *γάλα*, milk; *ζημία*, loss]. A flow of milk from the breast of a new-born child.

Neotocophthalmia (*ne-ot-ok-off-thal'-me-ah*) [*νεότοκος*, new-born; *ὀφθαλμία*, ophthalmia]. Ophthalmia neonatorum, *q. v.*

Nep [*nepeta*, catmint]. The catnip, *Nepeta cataria*.

Nepal or Nepaul Tumor. A pendulous tumor of the ear, at times reaching the size of a child's head. It is endemic in Nepal, India.

Nepalin (*nep'-al-in*). Synonym of *Pseudaconitin*.

Nepenthe (*ne-pan'-the*) [*νηπενθής*, banishing pain]. An old name for an Egyptian anodyne, probably opium.

Nepenthes (*ne-pen'-thēs*) [*νηπενθής*, banishing pain]. A genus of some 37 recognized species of tropical climbing pitcher-plants. The pitchers contain droserin, *q. v.* and azerin, *q. v.*, and have the power of digesting insects that are drowned in their watery secretion.

Nepeta (*nep'-et-ah*). See *Catnip*.

Nephablepsia (*nef-ab-lep'-se-ah*). See *Niphablepsia*.

Nephalism (*nef'-al-izm*) [*νηφαλισμός*, soberness]. Total abstinence from spirituous liquors.

Nephela (*nef'-el-ah*) [*νεφέλη*, cloud]. Leukoma; also cloudiness of the urine.

Nephelium (*nef-el'-e-um*). See *Nebula*.

Nepheloid (*nef'-el-oid*) [*νεφέλη*, cloud; *εἶδος*, like]. Cloudy or turbid, as the urine under certain conditions.

Nephelopia (*nef-el-o'-pe-ah*) [*νεφέλη*, cloud; *ὤψ*, eye]. Cloudy or dim vision, due to some diminution of the transparency of the ocular media.

Nephradenoma (*nef-rad-en-o'-mah*) [*νεφρός*, kidney; *ἀδήν*, gland; *ὄμα*, tumor: *pl.*, *Nephradenomata*]. Adenoma of the kidney.

Nephralgia, Nephralgy (*nef-ral'-je-ah, nef-ral'-je*) [*νεφρός*, kidney; *ἄλγος*, a pain]. Pain referred to the kidney; renal colic.

Nephranuria (*nef-ran-u'-re-ah*) [*νεφρός*, kidney; *ἀν*, priv.; *οὖρον*, urine]. Suppression of the renal secretion.

Nephrapostasis (*nef-rap-os'-tas-is*) [*νεφρός*, kidney; *ἀπόστασις*, suppurative inflammation]. Abscess, or suppurative inflammation, of the kidneys.

Nephrapragmonia (*nef-rap-rag-mo'-ne-ah*) [*νεφρός*, kidney; *ἀ*, priv.; *πράγμων*, work]. Inactivity or torpidity of the kidneys.

Nephrarctia (*nef-rark'-te-ah*) [*νεφρός*, kidney; *arctus*, from *arcere*, to find]. Contraction of the kidney.

Nephrastoma (*nef-ras'-to-mah*) [*νεφρός*, kidney; *στόμα* (*στόματα*), the mouth: *pl.*, *Nephrastomata*]. In biology, one of the ciliated funnels of the primitive kidney.

Nephratonia (*nef-rat-o'-ne-ah*), **Nephratony** (*nef-rat'-on-e*) [*νεφρός*, kidney; *ἀ*, priv.; *τόνος*, tone]. Atony or paralysis of the kidneys.

Nephrauxe (*nef-rawks'-e*) [*νεφρός*, kidney; *αὔξη*, increase]. Enlargement of the kidney.

Nephrectasia (*nef-rek-ta'-ze-ah*) [*νεφρός*, kidney; *ἔκτασις*, dilatation]. Dilatation of a kidney.

Nephrectomy (*nef-rek'-to-me*) [*νεφρός*, kidney; *ἐκτομή*, excision]. Excision of the kidney. **N., Abdominal,** nephrectomy through an abdominal incision. **N., Lumbar,** removal of the kidney through an incision in the loin.

Nephredema (*nef-re-de'-mah*) [*νεφρός*, kidney; *οἴδημα*, edema]. Edema of the kidneys.

Nephrelcosis (*nef-rel-ko'-sis*) [*νεφρός*, kidney; *ἕλκωσις*, ulceration]. Ulceration of the kidney.

Nephrelcus (*nef-rel'-kus*) [*νεφρός*, kidney; *ἕλκος*, an ulcer]. An ulcer of the kidney.

Nephremorrhagia (*nef-rem-or-a'-je-ah*) [*νεφρός*, kidney; *αἷμα*, blood; *ῥηγνύναι*, to burst forth]. Hemorrhage from the kidney.

Nephremphraxis (*nef-rem-fraks'-is*) [*νεφρός*, kidney; *ἔμφραξις*, obstruction]. Obstruction of the vessels of the kidneys.

Nephresia (*nef-re'-ze-ah*) [*νεφρός*, kidney]. Disease of the kidney.

Nephretic (*nef-ret'-ik*) [*νεφρός*, kidney]. Affected with nephresia.

Nephria (*nef'-re-ah*). See *Bright's Disease*.

Nephric (*nef'-rik*) [*νεφρός*, kidney]. Pertaining to the kidney.

Nephridia (*nef-rid'-e-ah*). Plural of *Nephridium*.

Nephridial (*nef-rid'-e-al*) [*νεφρός*, a kidney]. Of or pertaining to a nephridium. **N. Ridge,** the larger of the two ridges on the dorsal aspect of the body-cavity of a vertebrate embryo. It contains the transverse excretory tubules (segmental tubules, nephridia) which are developed from the nephrotomes. It is also called the *Wolffian ridge*. **N. Row,** one of the single or double cell-rows which lie near the neural rows, developed from the polar cells (or *nephroblasts*) in the embryos of certain worms.

Nephridium, Nephridion (*nef-rid'-e-um, nef-rid'-e-on*) [dim. of *νεφρός*, kidney: *pl.*, *Nephridia*]. In biology: 1. The fat about the kidneys. 2. The renal-sexual organ (*organ of Bojanus*) in certain invertebrate animals. Much convoluted cellular tubes functioning as kidneys in the *annelida* and certain *moliusca*. They occasionally act as ducts for the transmission of the sexual products. Cf. *Nephrogonaduct*. I. **Provisional** or **Embryonic Nephridia,** those that temporarily appear in the ontogenetic development; (*a*) those that appear in that region of the embryo or larva that corresponds with the subsequent head-segment and which lie at the anterior extremity of the cell-mass (mesoderm streaks) are called *embryonic head nephridia* or *head kidneys*; (*b*) those that appear in the trunk-segments are called *embryonic* or *provisiona trunk nephridia* or kidneys. II. **Permanent Nephridia,** on account of their frequently strict segmental arrangement, are often called *segmental organs*, or on account of their looped or winding course (in *Oligochæta* and *Hirudinea*) *looped canals*. The anal tubes of the *Echiuridæ* are sometimes called nephridia.

Nephrism (*nef'-rizm*) [*νεφρός*, kidney]. The grave condition of patients suffering from pronounced or advanced disease of the kidney.

Nephritic (*nef-rit'-ik*) [*νεφριτικός*, from *νεφρός*, kidney]. Pertaining to nephritis, or to the kidney.

Nephritis (*nef-ri'-tis*) [*νεφρός*, the kidney; *ιτις*, inflammation]. Inflammation of the kidneys. It occurs in various forms designated as *acute*, *chronic*, *desquamative*, *glomerular*, *interstitial*, *parenchymatous*, and *tubal*. See *Bright's Disease*. **N., Acute Albuminous.** See *N., Acute Desquamative*. **N. apostomatosa,** suppurative inflammation of the kidney. **N., Cachectic,** a synonym of Bright's disease in general. **N., Clostridial,** a form of chronic nephritis believed by Hopkins (F. V.) to be due to a peculiar microörganism, the "*Clostridium renale*." The symptoms are nervousness, sleeplessness, flatulent dyspepsia, albuminuria, dropsy, dyspnea, heart-failure, and the presence of the clostridia in the urine, free and attached to casts. **N., Consecutive,** an inflammatory affection of the kidney secondary to disease of th lower portions of the urinary tract. **N., Glomerular** See *Glomerulo-nephritis*. **N., Interstitial,** renal inflammation affecting the connective tissue mainly. **N., Intertubular.** Same as *N., Interstitial*. **N., Lardaceous,** nephritis associated with amyloid degeneration of the kidney. **N., Metastatic,** that secondary to disease of another organ. **N., Mycotic,** that accompanying any form of mycosis. **N., Parasitic,** that dependent upon the presence of renal parasites. **N., Parenchymatous,** that involving the true renal parenchyma. See *Bright's Disease*. **N., Puerperal,** the congested

kidney of the puerperium, associated with albuminuria. **N., Saturnine,** that due to chronic lead-poisoning. **N., Septic,** that caused by germs. **N., Toxic,** that consequent upon the presence of irritant poisons in the blood. **N., Traumatic,** that following traumatism of the kidney. **N., Tubal.** Same as *N., Parenchymatous.* **N., Tuberculous,** that due to the presence of tubercle-bacilli. **N., Tubular.** Same as *N., Parenchymatous.*

Nephroabdominal (*nef-ro-ab-dom'-in-al*) [νεφρός, kidney; *abdomen,* abdomen]. Pertaining to the kidneys and the abdomen.

Nephroblast (*nef'-ro-blast*) [νεφρός, a kidney; βλαστός, a germ]. In biology, one of the polar cells in embryos of certain worms, that give rise to the *nephridial rows.*

Nephrocele (*nef'-ro-sēl*) [νεφρός, kidney; κήλη, tumor]. Hernia of the kidney.

Nephrochalazosis (*nef-ro-kal-az-o'-sis*) [νεφρός, kidney; χαλάζων, nodule]. Granular kidney.

Nephrococcosis (*nef-ro-kok-o'-sis*), Synonym of *Nephrochalazosis.*

Nephrocolica (*nef-ro-kol'-ik-ah*) [νεφρός, kidney; κωλικός, colic]. Renal colic.

Nephrocystitis (*nef-ro-sis-ti'-tis*) [νεφρός, kidney; κύστις, bladder; ιτις, inflammation]. Inflammation of both bladder and kidneys.

Nephrocystosis (*nef-ro-sis-to'-sis*) [νεφρός, kidney; κύστις, cyst]. The condition of cystic kidney, or its formation.

Nephrodinic (*nef-ro-din'-ik*) [νεφρός, kidney; δῖνος, a rotation, a round area]. In biology, discharging the genital products by nephridia or nephrogonaducts.

Nephrodysneuria (*nef-ro-dis-nu'-re-ah*) [νεφρός, kidney; δύς, difficult; νεῦρον, nerve]. A morbid state of the renal nerves.

Nephrogenous (*nef-roj'-en-us*) [νεφρός, kidney; γεννᾶν, to beget]. Of renal origin.

Nephrogonaduct (*nef-ro-gon'-ad-ukt*) [νεφρός, kidney; *gonaduct,* from γονή, seed; *ductus,* a duct]. In biology, a nephridium specialized to act as a gonaduct, as in certain molluscs.

Nephrography (*nef-rog'-ra-fe*) [νεφρός, kidney; γράφειν, to write]. A description of the kidneys.

Nephrohydrops (*nef-ro-hi'-drops*), **Nephrydrosis** (*nef-rid-ro'-sis*). See *Hydronephrosis.*

Nephrohypertrophy (*nef-ro-hi-pur'-tro-fe*) [νεφρός kidney; ὑπέρ, over; τροφή, nourishment]. Hypertrophy of the kidney.

Nephroid (*nef'-roid*) [νεφρός, a kidney; εἶδος, form]. Kidney-shaped; reniform; resembling a kidney.

Nephrolith (*nef'-ro-lith*) [νεφρος, kidney; λίθος, stone]. Calculus of the kidney.

Nephrolithiasis (*nef-ro-lith-i'-as-is*) [νεφρός, kidney; λιθίασις, lithiasis]. The formation of renal calculi, or the diseased state that leads to their formation.

Nephrolithic (*nef-ro-lith'-ik*) [νεφρός, kidney; λίθος, stone]. Pertaining to, or affected with, a nephrolith.

Nephrolithocolica (*nef-ro-lith-o-kol'-ik-ah,* [νεφρός, kidney; λίθος, stone; κωλικός, colic]. Renal colic due to stone.

Nephrolithotomy (*nef-ro-lith-ot'-o-me*) [νεφρός, kidney; λίθος, stone; τομή, a cutting]. An operation for calculus of the kidney.

Nephrology (*nef-rol'-o-je*) [νεφρός, kidney; λόγος, science]. The science of the anatomy, physiology, and diseases of the kidney.

Nephromalacia (*nef-ro-mal-a'-se-ah*) [νεφρός, kidney; μαλακία, softness]. Softening, or abnormal softness, of the kidney.

Nephromegalia (*nef-ro-meg-a'-le-ah*) [νεφρός, kidney; μέγας, large]. Same as *Nephrauxe.*

Nephromere (*nef'-ro-mēr*) [νεφρός, kidney; μέρος, part]. The part of the mesoblast from which the kidney is developed.

Nephromiosis, Nephromeiosis (*nef-ro-mi-o'-sis*) [νεφρός, kidney; μείων, less]. Contraction of the kidney.

Nephroncus (*nef-rong'-kus*) [νεφρός, kindey; ὄγκος, tumor]. Tumor of the kidney.

Nephroparalysis (*nef-ro-par-al'-is-is*) [νεφρός, kidney, παράλυσις, palsy]. Paralysis of the kidney.

Nephroparesis (*nef-ro-par'-es-is*) [νεφρός, kidney; πάρεσις, paresis]. Same as *Nephroparalysis.*

Nephropathy (*nef-rop'-ath-e*) [νεφρός, kidney; πάθος, disease]. Any disease of the kidney.

Nephropexy (*nef'-ro-peks-e*) [νεφρός, kidney; πῆξις, fixation]. Surgical fixation of a floating kidney.

Nephrophlegmasia (*nef-ro-fleg-ma'-ze-ah*) [νεφρός, kidney; φλεγμασία, inflammation]. Any inflammation of the kidney.

Nephrophlegmatic (*nef-ro-fleg-mat'-ik*) [νεφρός, kidney; φλεγμασία, inflammation]. Of the nature of or due to nephrophlegmasia.

Nephrophthisis (*nef-roff'-this-is*) [νεφρός, kidney; φθίσις, a wasting]. A cheesy inflammation of the kidney, the process often beginning in the mucous membrane of the bladder, or in the prostate, and extending to the kidney. The urine is generally acid, and small cheesy masses, elastic fibers, and shreds of cast-off connective tissue may be found in it. The disease is most frequent in males, and is due to the presence of the tubercle-bacillus.

Nephroplegia (*nef-ro-ple'-je-ah*) [νεφρός, kidney; πληγή, stroke]. Paralysis of the kidney.

Nephroptosis (*nef-rop-to'-sis*) [νεφρός, kidney; πτῶσις, fall]. Downward displacement of the kidney. See *Floating Kidney.*

Nephropyelitis (*nef-ro-pi-el-i'-tis*) [νεφρός, kidney; πύελος, pelvis; ιτις, inflammation]. Inflammation of the pelvis of the kidney; pyelonephritis.

Nephropyic (*nef-ro-pi'-ik*) [νεφρός, kidney; πύον, pus]. Relating to suppuration of the kidney.

Nephropyosis (*nef-ro-pi-o'-sis*). Same as *Pyonephrosis.*

Nephrorrhagia (*nef-ror-a'-je-ah*) [νεφρός, kidney; ῥεγνύναι, to burst forth]. Renal hemorrhage.

Nephrorrhaphy (*nef-ror'-af-e*) [νεφρός, kidney; ῥαφή, suture]. Suture of a floating kidney to the posterior wall of the abdomen or to the loins. The stitches may be introduced through the capsule or even through the substance of the kidney.

Nephros (*nef'-ros*) [νεφρός, kidney]. The kidney.

Nephrosclerosis (*nef-ro-skle-ro'-sis*) [νεφρός, kidney; σκληρός, hard]. Induration of the kidney.

Nephrospastic (*nef-ro-spas'-tik*) [νεφρός, kidney; σπάειν, to wrench]. Pertaining to spasm of the kidney.

Nephrostegnosis (*nef-ro-steg-no'-sis*) [νεφρός, kidney; στεγνοῦν, to cover]. A cirrhotic condition of the kidney.

Nephrotome (*nef'-ro-tōm*) [νεφρός, kidney; τόμος, cut]. In embryology, one of the two divisions of the primitive segments of the celum in vertebrate embryos; it lies next to the lateral plates or mesothelium of the splanchnocele. It is also called the *intermediate mass,* Mittelplatte (Kölliker).

Nephrotomy (*nef-rot'-o-me*) [νεφρός, kidney; τομή, a cutting]. Incision of the kidney. **N., Abdominal,** nephrotomy through an abdominal incision. **N., Lumbar,** nephrotomy through an incision in the loin.

Nephro-typhoid, Nephro-typhus (*nef-ro-ti'-foid, nef-ro-ti'-fus*) [νεφρός, kidney; τῦφος, stupor]. Enteric fever with renal complications.

Nephrozymose (*nef-ro-zi'-mōz*) [*νεφρός*, kidney; *ζύμη*, leaven]. A gum resembling diastase sometimes found in urine.

Neptune's Cingulum or Girdle. *Cingulum neptuni*, a folded sheet, the end of which has been soaked in hot water, wrung out and applied to the abdomen, the larger and dry portion being utilized as a bandage. See *Girdle*.

Neptunium (*nep-tu'-ne-um*) [*Neptunus*, a sea-god]. A doubtful new element obtained from columbite. Atomic weight, 118.

Nérac, Pian of. An herpetic form of syphilis.

Neritic (*ne-rit'-ik*) [*Νηρίτης*, son of Nereus]. In biology, a term applied to the swimming faunas and floras (*plankton*) of the coast regions of the continents as well as the archipelagoes and islands. Their composition is essentially different from that of the *oceanic* plankton, and they are quantitatively as well as qualitatively richer.

Nerium (*ne'-re-um*) [*νήριον*, the oleander]. The leaves and root of *N. odorum*, the common oleander. The extractive principles exert a marked effect on the motor centers, in lethal doses producing paralysis and death from heart-failure. In small doses they act as a cardiac tonic resembling digitalis. Dose of the extract gr. $\frac{1}{6}$–$\frac{3}{4}$. The tincture may be given cautiously, in one-drop doses, gradually increased. Unof.

Neroli, Oil of. See *Aurantium*.

Neronian Phlebotomy. Venesection in which several veins are opened simultaneously.

Nerval (*ner'-val*) [*nervus*, a nerve]. Pertaining to a nerve or nerves.

Nervate (*ner'-vāt*) [*nervus*, a nerve]. In biology, having nerves, as a leaf.

Nervation (*ner-va'-shun*) [*nervus*, a sinew or nerve]. In biology, the arrangement or disposition of the fibro-vascular bundles in the blades of leaves, or of the nerves or veins of an insect's wing; innervation.

Nervature (*ner'-vat-ūr*). Same as *Nervation*.

Nervaura (*ner-vaw'-rah*) [*nervus*, nerve; *aura*, air]. A subtle hypothetic essence emanating from the nervous system, and enveloping the body in a kind of sphere.

Nerve (*nerv*) [*nervus*, nerve]. A nerve is an elongated cord or tract of protoplasm made up of aggregations of nerve-fibers and having the property of transmitting impulses. **N., Accelerator.** Synonym of *N., Augmentor*. **N., Afferent,** one that transmits impulses from the periphery to the central nervous system. **N., Anabolic,** one directly or indirectly bringing about constructive metabolism. **N., Arresting.** Same as *N., Inhibitory*. **N., Augmentor,** the cardiac sympathetic nerves, stimulation of which causes acceleration of the heart's action. **N.-aura.** Same, as *Nervaura*. **N.-axis,** the axis-cylinder. See *N.-fiber*. **N.-bristles,** fine broaches barbed on one side, or with the end bent at right angles, employed for removing devitalized pulps from the canals of the teeth. **N.-broach,** a wire instrument for extracting the nerve of a tooth. **N., Calorific,** a nerve, stimulation of which increases the heat of the parts to which it is distributed. The term is applied to the dilator nerves and to those stimulating functional activity of organs. **N.-canal,** the pulp-cavity of a tooth. **N.-canal Reamer,** an instrument for enlarging the pulp-canal of a tooth, prior to the filling of the canal. **N.-capping,** a cap placed over a tooth to protect an exposed nerve. **N., Catabolic.** See *N., Katabolic*. **N.-cell,** a mass of protoplasm containing a large vesicular nucleus within which lies a well-marked nucleolus. Nerve-cells have one or more elongated processes, and in accordance with the number of these are designated unipolar, bipolar, or multipolar. The processes are of two kinds: the *axis-cylinder* process and the *protoplasmic* process. The axis-cylinder (Deiter's) process either becomes continuous with the axis-cylinder of a nerve-fiber, or divides within the gray matter into minute branches forming a delicate network. **N.-cement,** neuroglia. **N.-center,** a group of ganglion-cells acting together in the performance of some function. **N., Centrifugal.** Synonym of *N., Efferent*. **N., Centripetal.** Synonym of *N., Afferent*. **N., Cerebral,** a cranial nerve, *q.v.* **N.-chord.** Same as *N.-cord*. **N.-cord,** a nerve; a cord composed of nervous tissue. **N.-corpuscles,** nucleated corpuscles lying between the neurilemma and the medullary sheath of medullated nerve-fibers; they are stained by methyl-anilin. **N., Cranial,** a nerve arising directly from the brain, the oblongata or the cervical part of the cord, and making its exit through one of the foramina in the skull. **N.-current,** a current, by some thought to pass through the nerves and muscles. **N., Depressor,** an afferent nerve, irritation of which depresses or inhibits the vaso-motor center. **N.-drill,** an instrument for enlarging the pulp-cavity of a tooth. **N., Efferent,** one carrying impulses from the central nervous system to the periphery. **N.-eminence.** Same as *N.-hill*. **N.-endings,** the terminations of nerves at the periphery or in the nerve-centers. **N. of Expression,** the facial nerve. **N.-fat.** Same as *Protagon*. **N.-fiber,** a fiber having the property of conducting invisible or molecular waves of stimulation from one part of an organism to another, and so establishing physiologic continuity between such parts, without the necessary passage of waves of contraction (Romanes). There are two kinds of nerve-fibers: the *medullated* and the *non-medullated*. A typical medullated fiber consists of: (*a*) the *axis-cylinder*, which may be surrounded by a sheath, the *axilemma;* (*b*) the *medullary sheath*, or white substance of Schwann; (*c*) the *neurilemma*, or sheath of Schwann. The axis-cylinder consists of fine fibrillæ cemented together by a granular interstitial substance, the *neuroplasm*. The *medullary sheath* consists of a reticulated framework composed of a material resembling neuro-keratin, and a semifluid substance filling the interstices, called *myelin*. At regular intervals the medullated sheath is marked by interruptions, the *nodes of Ranvier*. Each *internode*, as the portions of fiber included between two Ranvier's nodes are termed, possesses a *nerve-corpuscle*. Under certain conditions the white substance of Schwann is seen to be composed of elongated pieces, the so-called Schmidt-Lantermann segments. These may be artifacts. The neurilemma, sheath of Schwann, or primitive sheath, is a delicate elastic membrane, closely investing the medullary substance. On its inner surface are placed the *nerve-corpuscles*. The *non-medullated*, pale, or Remak's fibers, do not possess a medullary sheath, but consist only of axis-cylinder and neurilemma. The nerve-corpuscles are more abundant than in medullated nerve-fibers. Medullated nerve-fibers are found in the cerebro-spinal nerves, while non-medullated fibers occur in the sympathetic nerves and tend to form plexuses. Nerve-fibers are aggregated into *fasciculi;* these in turn unite to form *nerve-trunks*. The nerve-fibers in a fasciculus are held together by the *endoneurium;* while each fasciculus is surrounded by a sheath termed the *perineurium*. The epineurium holds together the several fasciculi composing a nerve-trunk. **N.-fiber, Amyelinic.** A synonym of non-medullated nerve-fiber. See *N.-fiber*. **N.-fiber, Myelinic.** A synonym of medullated nerve-fiber. See *N.-fiber*. **N.-fiber, Organic.** A synonym of non-medullated nerve-fiber. See *N.-fiber*. **N.-fiber,**

White. A synonym of medullated nerve-fiber. See *N.-fiber*. **N-fibril,** a very fine filament of nerve-tissue entering into the formation of the axis-cylinder. **N.-force,** the energy of the nervous system. See *Isomeric Theory of*. **N., Forty-fourth,** the sympathetic nerve. **N., Frenator,** an inhibitory nerve. **N., Frigorific,** a sympathetic nerve, so-called because its stimulation causes a fall of temperature; the vaso-constrictor nerves are frigorific nerves. **N., Ganglionic.** A synonym of *N., Sympathetic*. **N.-grafting,** the transplanting of a portion of healthy nerve from an animal to man, after surgical operations necessitating the removal of a portion of a nerve. **N.-head,** the optic disc or papilla. **N.-hill, N.-hillock,** the motor end-plate of a nerve. **N., Incident.** A synonym of *N., Afferent*. **N., Katabolic,** one giving rise to chemic and destructive changes in a muscle or other tissue. **N., Krause's Ulnar Collateral,** a branch of the musculo-spiral, which accompanies the ulnar nerve for some distance and ends in the lower part of the inner

GANGLIONIC CELL, SHOWING A SPIRAL AND A STRAIGHT PROCESS.

head of the triceps. **N.-less,** without a nerve. **N.-like,** resembling a nerve. **N.-loop,** an arched connection between two or more nerves. **N.-medulla,** the axis-cylinder of a nerve. **N., Medullated.** See *N.-fiber.* **N.-mimicry.** Same as *Neuromimesis.* **N., Mixed,** one made up of both afferent and efferent fibers. **N.-motion,** the condition of excitement of nerves in the normal, intact body, due to physiologic or normal stimulus; its nature is unknown. **N., Motor,** one containing only or chiefly motor fibers. **N.-needle,** in dentistry, an instrument used for broaching out a pulp-cavity. **N., Non-medullated.** See *N.-fiber.* **N.-paste,** a preparation for destroying the nerves of teeth, for the composition of which different formulæ are given. Some are composed of arsenious acid and creasote, others of arsenious acid, creasote, and sulphate of morphin. **N.-path,** the course pursued by a nervous impulse. **N.-plate,** a layer of nervous tissue, which may develop into a nerve-tube or nerve-cord. **N.-plexus,** a grouping of nerves. **N.-power,** the nervous energy of the body. **N., Pressor,** an afferent nerve, irritation of which stimulates the vaso-motor center. **N.-ring,** the ring of nerve-fibers surrounding a hair-follicle below the orifice of the sebaceous glands. **N.-root:** 1. The root of a nerve; the nerve or one of its constituent parts, as it emerges from a central organ. 2. The plant *Cypripedium pubescens.* **N.-rudiment,** the rudiment of a nerve. **N., Secretory,** an efferent nerve, stimulation of which causes increased activity of the gland to which it is distributed. **N.-section,** the division of a nerve for the relief of neuralgia. **N.-shaken,** having the nervous system shattered. **N., Spinal,** one of those arising from the spinal cord and making its exit through an intervertebral foramen. There are 31 pairs of spinal nerves. **N.-storm,** a sudden outburst or paroxysm of neurotic disturbance. **N.-stretching,** mechanical elongation or tension of a nerve, for neuralgia, spasmodic contraction, and other pathologic conditions. **N.-substance,** the substance of a nerve-cell. **N., Sympathetic,** one of a system of nerves distributed chiefly to the blood-vessels and to the viscera. They are so-called because they were thought to establish a communication or sympathy between distant organs of the body, especially in diseased states. See *Sympathetic.* **N., Thermic.** A synonym of *N., Calorific.* **N.-tire,** neurasthenia. **N.-tissue,** the intrinsic substance of a nerve or nerve-fiber. **N.-track,** same as *N.-path.* **N., Trophic,** a nerve, the function of which is to preside over the nutrition of the part to which it is distributed. **N.-trunk,** the main division or stem of a nerve. **N.-tube,** a nerve-fiber; also a hollow cord of embryonic nervous tissue. **N.-tuft,** a minute plexus of nerve-fibers. **N.-tumor.** See *Neuroma* and *Tumors, Table of.* **N.-tunic,** an investiture by nervous tissue. **N.-twig,** a minute ramification of a nerve. **N., Ulnar Collateral.** See *N., Krause's.* **N., Vaso-constrictor.** See *N., Vaso-motor.* **N., Vaso-dilator.** See *N., Vaso-motor.* **N., Vaso-hypertonic.** A synonym of *N., Vaso-constrictor.* **N., Vaso-inhibitory.** A synonym of *N., Vaso-dilator.* **N., Vaso-motor;** vaso-motor nerves are of two kinds—those, stimulation of which causes contraction of the vessels, *vaso-constrictor* nerves, and those, stimulation of which causes active dilatation, *vaso-dilator* nerves. Ordinarily vaso-motor is synonymous with vaso-constrictor. **N.-wave,** a wave-motion in a nerve.

Nerved (*nervd*) [*nervus*, a fiber]. Having nerves; nervose; innervated.

Nervelessness (*nerv'-les-nes*) [*nervus*, a nerve]. Lack of vigor; a nerveless state.

Nervi (*ner'-vi*) [L.]. Plural of *Nervus*, a nerve. Nerves. **N. nervorum,** a term applied to the small nerves distributed to the nerve-sheaths.

Nerviduct (*ner'-vid-ukt*) [*nervus*, nerve; *ductus*, duct]. The channel by which a nerve passes through a bone.

Nerville (*ner'-vil*) [*nervillus*, dim. of *nervus*, nerve]. In biology, a very fine nerve in the blade of a leaf.

Nervimotion (*ner'-vim-o-shun*) [*nervus*, a nerve; *motio*, motion]. In biology, the reflex action of the nervous system, or the power of self-motion, as in leaves.

Nervimotor (*ner'-vim-o-tor*) [*nervus*, a nerve; *motor*, a mover]. 1. Pertaining to or causing nervimotion. 2. That which causes nervimotion.

Nervine (*ner'-vin*) [*nervus*, nerve]. 1. Pertaining to the nerves. 2. Acting favorably, or decidedly, upon the nerves. 3. A remedy that calms nervous excitement or acts favorably on nervous diseases. 4. The plant *Cypripedium pubescens.*

Nervose (*ner'-vōz*) [*nervosus*, full of fibers]. Nerved; conspicuously nerved.

Nervosism (*ner'-vo-sizm*) [Fr. *nervosisme; nervus*, a nerve]. 1. Neurasthenia or nervousness. 2. The doctrine that all morbid phenomena are caused by alterations of nerve-force.

Nervous (*ner'-vus*) [*nervus*, a nerve]. Pertaining to nerves. Applied to conditions of hyperesthesia and neurasthenia. **N. Bladder.** See *Bladder.* **N. Breakdown.** See *Neurasthenia.* **N. Cough,** an hysteric disturbance of the motor functions of the larynx, manifesting itself as an almost constant cough, unassociated with disease of the laryngeal mucosa. **N. Fluid,** a hypothetic fluid supposed to traverse the nerves from the nerve-centers to the periphery. **N. Impulse,** the impulse propagated along a stimulated nerve. **N. Influence.** Same as *Nerve-power.* **N. Irritability,** a morbid condition of excitability of the nervous system. **N. Quinsy.** A synonym of *Globus hystericus.* **N. Shock,** a functional disturbance of the central nervous system, following fright or other violent emotion. **N. System.** See *Cerebro-spinal.* **N. Temperament.** See *Temperament.* **N. Vomiting,** a condition not associated with anatomic changes in the stomach or with any morbid state of its contents, but due to nervous influences acting either directly or indirectly upon the centers presiding over the act of vomiting. It usually occurs in brunet women, and is, as a rule, not of much gravity, although death has occurred.

Nervousness (*ner'-vus-nes*) [*nervus*, nerve]. A condition of over-excitability of the nervous system, characterized by great unrest, mental and physical.

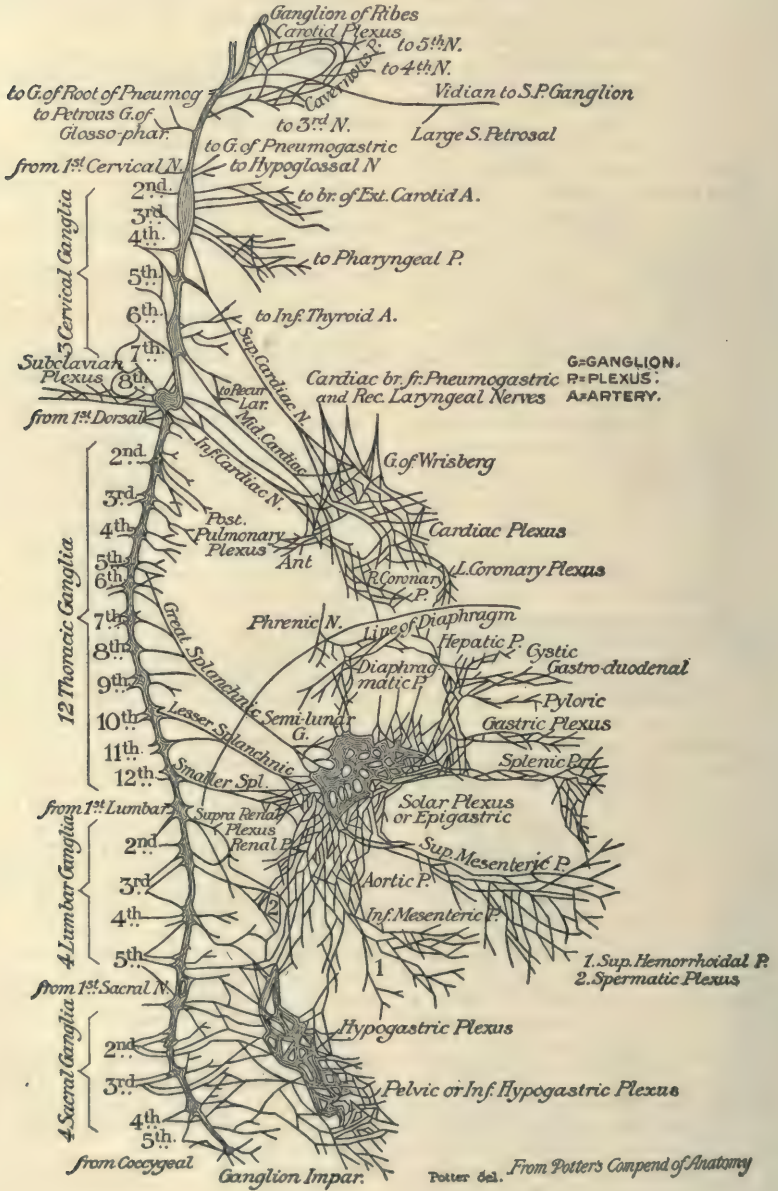
Nervule, Nervulet (*ner'-vūl, ner'-vu-let*) [dim. of *nervus*, nerve]. A small nerve.

Nervulose (*ner'-vu-lōz*) [*nervulus*, dim. of *nervus*, a nerve]. In biology, minutely nervose.

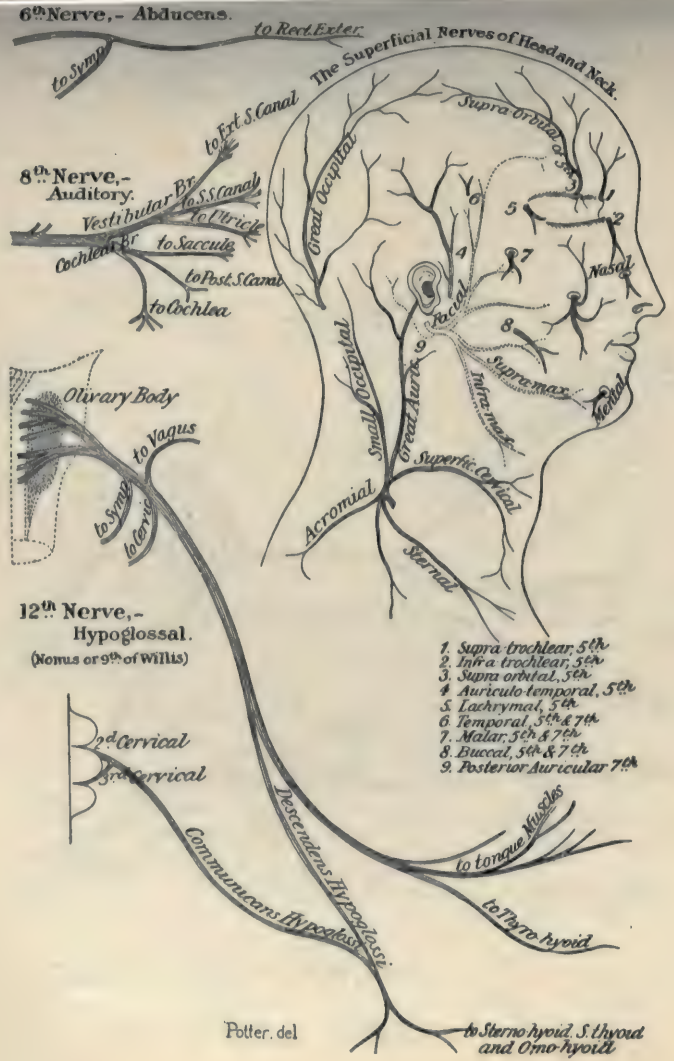
Nervure (*ner'-vūr*) [*nervus*, a sinew]. In biology, one of the veins or nerves of a leaf or an insect's wing.

Nesis (*ne'-sis*) [*νῆσις*, suture]. Suture.

Nessler's Reagent and Test. A solution of potassium iodid, mercuric chlorid, and sodium hydroxid, used in estimating the amount of ammonia in water. See *Tests, Table of.*

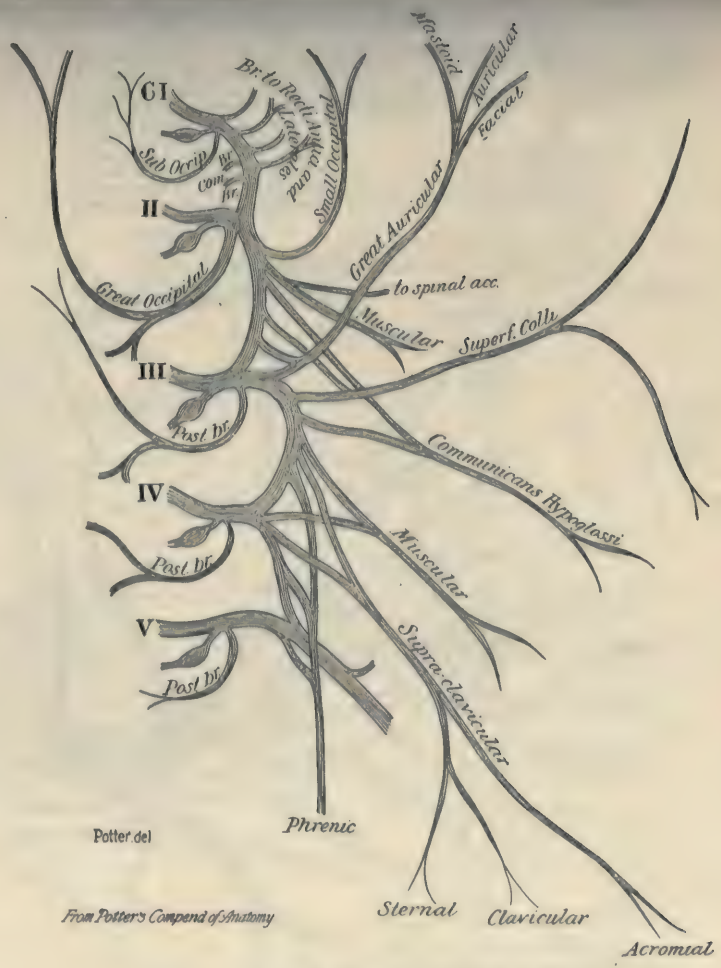


Nesslerizing (*nes'-ler-ī-zing*) [after *Nessler*, a chemist]. The process of using Nessler's reagent.



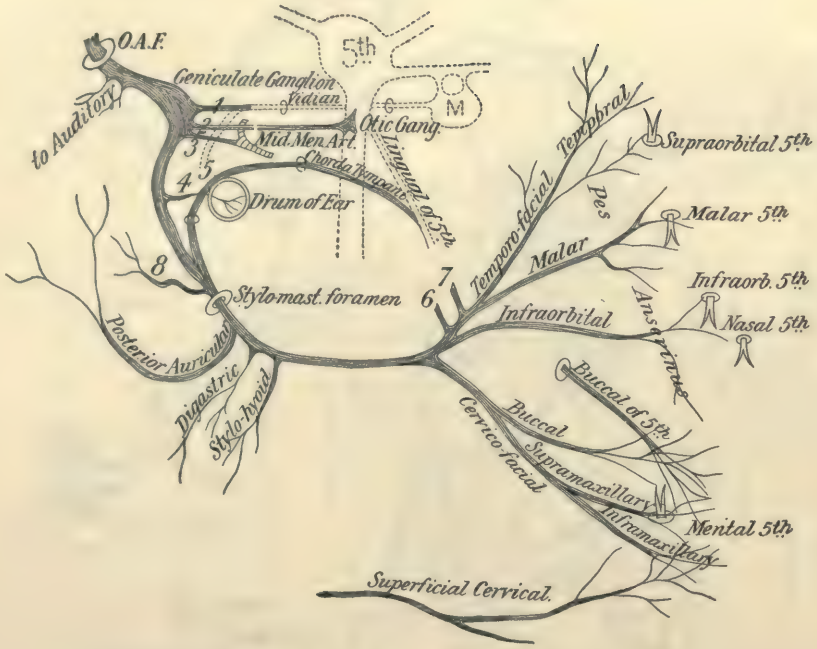
Nest [ME., *nest*, a nest]. The home of a bird; the place where its eggs are laid. **N.-cell,** an aggregation or cluster of cells, as in carcinoma.

Nesteia (*nes-ti'-ah*) [*νηστεία*, fasting]. 1. Fasting. 2. The jejunum.



Nestiatria (*nes-te-a'-tre-ah*) [*νηστεία*, a fast; *ἰατρεία*, treatment]. Hunger-cure; treatment by fasting.

THE SYMPATHETIC SYSTEM OF NERVES.



Cervical Plexus.

The Cervical Plexus { lies upon the { Scalenus Medius and Levator anguli Scapulae } Muscles. is covered by the Sterno-Cleido-Mastoid Muscle

The Cranial Nerves.

7th Nerve - Facial, or Portia Dura.

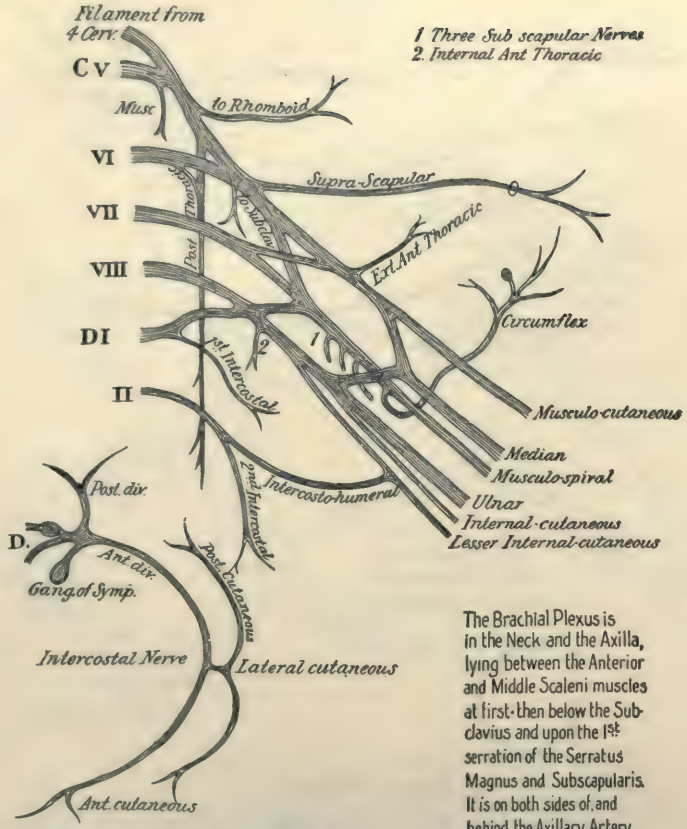
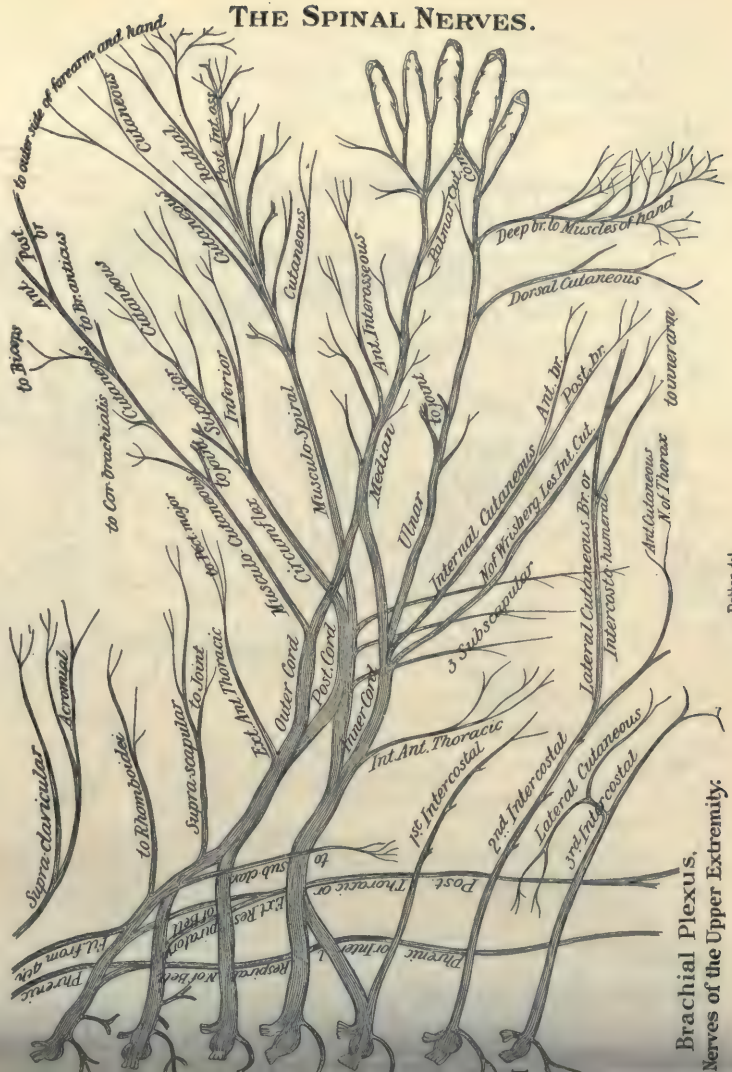
THE CRANIAL NERVES.



5th Nerve,-Trigeminus.

THE SPINAL NERVES

Brachial Plexus



The Brachial Plexus is in the Neck and the Axilla, lying between the Anterior and Middle Scaleni muscles at first, then below the Subclavius and upon the 1st serration of the Serratus Magnus and Subscapularis. It is on both sides of, and behind the Axillary Artery in its 2nd Portion, external thereto in its 1st Portion.

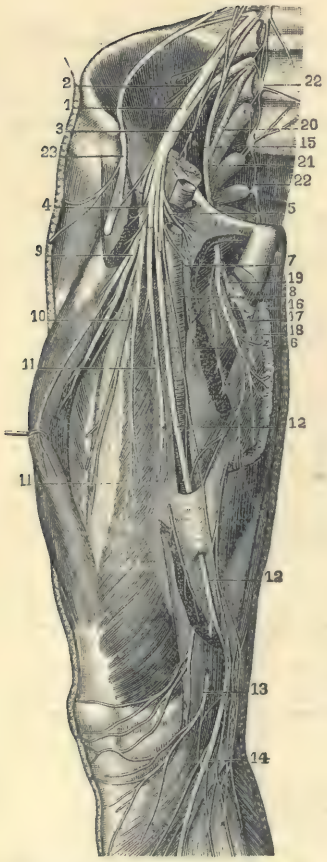
TABLE OF NERVES (ALPHABETIC).

Name.	Function.	Origin.	Distribution.	Branches.
bdominal.	Sensation and motion.	Vagus.	Surface of stomach.	Filaments.
bducens (sixth cranial).	Motion.	Fourth ventricle.	External rectus of eye.	Filaments.
iveolar.	Sensation.	Inferior dental.	Molar and bicuspid teeth, and adjacent gums.	Gingivales.
rnold's.	See *Auricular*.			
rticular.	Trophic, sensory (?).	Anterior crural.	Knee-joint.	Capsular, synovial.
rticular, 2.	Trophic, sensory (?).	Ulnar.	Elbow-joint.	Filaments.
rticular, recurrent.	Motion.	External popliteal.	Knee-joint and anterior tibial muscle.	Filaments.
uditory (eighth cranial, portio mollis of 7th).	Hearing.	Restiform body.	Internal ear.	Vestibular, cochlear.
uricular.	Sensation.	Lesser occipital.	Integument of post. and upper portion of pinna.	Filaments.
uricular (*anterior*).	Sensation.	Inferior maxillary.	Integument of external ear.	Filaments.
uricular (Arnold's).	Sensation.	Vagus.	External ear.	Filaments.
uricular (*posterior*).	Motion.	Facial.	Retrahens aurem, attollens aurem, occipito-frontalis.	Auricular, occipital.
uricularis magnus.	Sensation.	Cervical plexus, 2d and 3d cervical.	Parotid gland, face, ear.	Facial, mastoid and auricular.
uriculo-temporal.	Sensation.	Inferior maxillary.	Pinna and temple.	Articular, two branches to meatus, parotid, anterior auricular, superficial temporal.
f Bock.	See *Pharyngeal*.			
ccal.	Motion.	Facial.	Buccinator and orbicularis oris muscles.	Filaments.
ccal, long.	Sensation, motion?	Inferior maxillary.	Cheek.	Superior and inferior buccinator and external pterygoid.
lcanean, internal.	Sensation.	Posterior tibial.	Fascia and integument of heel and sole.	Several small filaments.
lcaneo-plantar, cutaneous.	See *Calcanean, internal*.			
rdiac (cervical and horacic).	Inhibition.	Vagus.	Heart.	Branches to cardiac plexuses.
Casser.	See *Perforating*, and	*Musculo-cutaneous*.		
vernous.	Sensation.	Prostatic plexus.	Erectile structures of penis.	Filaments.
rvical, eight.	Motion and sensation.	Cord.	Trunk and upper extremities.	Ventral and dorsal divisions. See *Plexus*.
rvical, first (anterior ivision).	Motion and sensation.	Cord.	Rectus lateralis and two anterior recti.	Filaments and communicating to vagus, hypoglossal, sympathetic.
rvical, first (posterior ivision).	Motion and sensation.	Cord.	Recti, obliqui, complexus.	Communicating and cutaneous filaments.
rvical, fourth (anteor division).	Motion and sensation.	Cord.	Shoulder and communicating.	Communicating filaments, muscular, etc.
rvical, second (anteor division).	Motion and sensation.	Cord.	Communicating.	Ascending, descending, communicating and filaments.
rvical, second (posteor division).	Motion and sensation.	Cord.	Obliquus inferioris, scalp, ear, complexus, splenius, trachelo-mastoid.	Internal or occipitalis major, and external.
rvical, third (anteor division).	Motion and sensation.	Cord.	Communicating.	Ascending, descending, and communicating filaments.

BRACHIAL PORTION OF MUSCULO-CUTANEOUS, MEDIAN AND ULNAR NERVES.

TERMINAL PORTION OF MEDIAN NERVE AND OF ULNAR NERVE.

1. Musculo-cutaneous nerve. 2. Branch to coraco-brachialis. 3. Branch to biceps. 4. Branch to brachialis anticus. 5. Anastomotic branch from median. 6. Division of musculo-cutaneous. 7. Radial nerve. 8. Its external cutaneous branch. 9. Internal cutaneous. 10. Its anterior, or ulnar branch. 11. Upper portion of median and ulnar nerves. 12. Their middle portion. 13. Branch to pronator radii teres. 14. Trunk giving rise to anterior muscular branches. 15. Branches to flexor profundus digitorum. 16. Branch to flexor longus proprius pollicis. 17. Interosseous branches. 18. Palmar cutaneous branch. 19. Branch for muscles of thenar eminence. 20. External collateral branch to thumb. 21. Internal collateral branch. 22. External collateral branch to index finger. 23. Common trunk of internal collateral branch to index finger and external collateral branch to middle finger. 24. Trunk of internal collateral to middle finger and external collateral branch to ring finger. 25. Branch of ulnar nerve to flexor carpi ulnaris. 26. Branches to two inner fasciculi of flexor profundus digitorum. 27. Cutaneous and anastomotic filament. 28. Dorsal branch. 29. Superficial palmar branch. 30. Common trunk of internal collateral branch to ring finger and external collateral branch to little finger. 31. Internal collateral branch to little finger. 32. Deep palmar branch. 33. Branch of the latter to hypothenar muscles. 34. Branches to muscles of fourth interosseous and to fourth lumbricalis. 35. Branches to muscles of third interosseous space and to third lumbricalis. 36. Branches to the adductor of the thumb and to the muscles of the first two interosseous spaces.



TERMINAL BRANCHES OF THE RADIAL NERVE.

1. Trunk of radial nerve. 2. Branch to supinator longus. 3. Branch to extensor carpi radialis longior. 4. Branch to extensor carpi radialis brevior. 5. Bifurcation. 6. Posterior, or muscular division. 7. This division traversing the supinator brevis, to which it furnishes several branches. 8. Its terminal branches. 9, 9. Anterior, or cutaneous division. 10. Terminal branches of this division. 11 Musculo-cutaneous nerve. 12, 12, 12. Its terminal branches. 13. One of its branches descending to the wrist and anastomosing with the cutaneous branch of the radial.

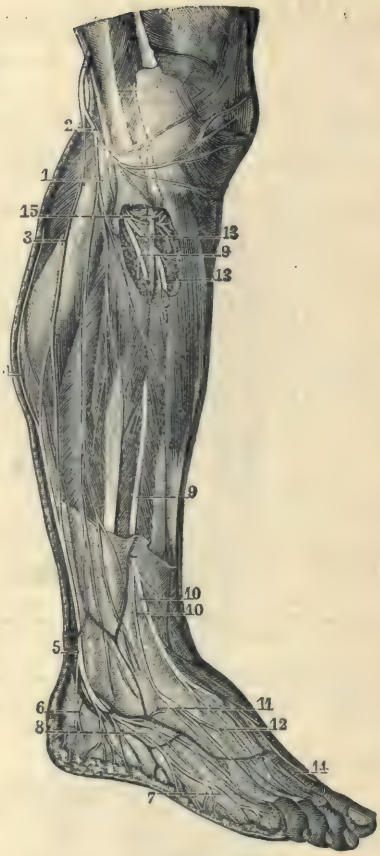


TABLE OF NERVES.—*Continued.*

NAME.	FUNCTION.	ORIGIN.	DISTRIBUTION.	BRANCHES.
Cervical, third (posterior division).	Motion and sensation.	Cord.	Occiput, splenius, complexus.	Internal, external, and filaments.
Cervicals, 5th to 8th (anterior divisions).	Motion and sensation.	Cord.	Brachial plexus.	Communicating.
Cervicals, 4th to 8th (posterior divisions).	Motion and sensation.	Cord.	Muscles and skin of neck.	Internal and external branches.
Cervico-facial.	Motion.	Facial.	Lower part of face and part of neck.	Buccal, supra-maxillary, infra-maxillary.
Chorda tympani.	Motion.	Facial.	Tongue, tympanum, submaxillary gland.	Filaments.
Ciliary.	Sensation, nutrition, motion.	Ciliary ganglion.	Eye-ball.	Filaments.
Circumflex.	Motion and sensation.	Brachial plexus.	Teres minor, deltoid and skin.	Anterior, posterior and articular.
Coccygeal.	Motion.	Coccygeal plexus.	Coccygeus and gluteus maximus.	Filaments.
Cochlear.	Hearing.	Auditory.	Cochlea.	Filaments.
Colli, superficialis.	Sensation.	Cervical plexus.	Platysma myoides and ventro-lateral parts of neck.	Ascending and descending branches, filaments.
Communicans hypoglossi.	See *Communicans noni.*			
Communicans noni.	Motion and sensation.	Second cervical, third cervical.	Descendens noni, depressor muscles of hyoid bone.	Omo-hyoid and filaments, ansa hypoglossi.
Communicating.	Motion and sensation.	Cervical plexus.	Spinal accessory.	Branches.
Communicating.	Sensation and motion.	First and second cervical.	Vagus, hypoglossal, sympathetic.	Three branches and filaments.
Of Cotunnius.	See *Naso-palatine*	*nerve.*		
Crural.	Sensation.	Genito-crural.	Skin, upper and central part ant. aspect of thigh.	Filaments.
Crural, anterior.	Motion and sensation.	Lumbar plexus, second, third and fourth lumbar nerves.	Thigh.	Middle and internal cutaneous, long saphenous, muscular, articular.
Cutaneous.	Sensation.	Musculo-spiral.	Skin of arm, radial side of forearm.	One internal, two external.
Cutaneous.	Sensation.	Ulnar.	Wrist and palm.	1st and palmar cutaneous.
Cutaneous (*dorsal*).	Sensation.	Ulnar.	Little and ring fingers.	Filaments and communicating branches.
Cutaneous (external).	Sensation.	2d and 3d lumbar.	Skin of thigh.	Anterior, posterior.
Cutaneous (internal).	Sensation.	Brachial plexus.	Forearm.	Anterior and posterior branches and filaments.
Cutaneous (lesser internal) (*of Wrisberg*).	Sensation.	Brachial plexus.	Inner side of arm.	Filaments.
Cutaneous (middle and internal).	Sensation. Motion?	Anterior crural.	Thigh and communicating.	Communicating and filaments.
Cutaneous, perforating.	Sensation.	Fourth sacral.	Integument covering gluteus maximus.	Filaments.
Cyon's.	See *Depressor.*			
Dental (inferior or mandibular).	Sensation.	Inferior maxillary.	Teeth, muscles.	Mylo-hyoid, incisor, mental, dental.
Dental, superior.	See *Dentals* (*posterior*	and *anterior*).		
Dentals (post. and ant.).	Sensation.	Superior maxillary.	Teeth.	Filaments.
Depressor.	Lowering of the blood-pressure.	In the rabbit, from the vagus.	Heart.	Filaments.
Descendens hypoglossi.	Motor.	Cervical plexus.	Omo-hyoid, sterno-hyoid, sterno-thyroid, thyro-hyoid, genio-hyoid, hyoglossus and muscles of tongue.	Muscular, tongue.

MUSCULAR NERVES OF THE ANTERO-INTERNAL ASPECT OF THE THIGH.

1. Anterior crural nerve. 2. Branches to iliacus muscle. 3. Branch to inner part of psoas. 4. Large cutaneous branch. 5, 6. Muscular filaments of small musculo-cutaneous branch. 7. Cutaneous branches. 8. Deep, or anastomotic filament of internal cutaneous branch. 9. Branches to rectus femoris. 10. Branches to vastus externus. 11, 11. Branches to vastus internus. 12, 12. Internal saphenous nerve. 13. Its patellar branch. 14. Vertical, or tibial branch. 15. Obturator nerve. 16. Branch to adductor longus. 17. Branch to adductor brevis. 18. Branch to gracilis. 19. Branch to adductor magnus. 20. Lumbo-sacral trunk. 21. Union of this trunk and the first sacral nerve. 22, 22. Lumbar and sacral portions of sympathetic. 23. External inguino-cutaneous branch.

EXTERNAL POPLITEAL, OR PERONEAL NERVE.

1. External popliteal nerve. 2. Fibular cutaneous branch. 3. Communicans peronei. 4. External saphenous nerve. 5. Trunk formed by the union of the last two. 6. Calcanean branches. 7. External terminal branch. 8. Internal branch. 9, 9. Musculo-cutaneous nerve. 10, 10. Its terminal branches. 11. Anastomosis of its external terminal branch with internal saphenous. 12. Anastomosis of internal terminal branch with external. 13. Anterior tibial nerve. 14. Its terminal portion, anastomosing with the musculo-cutaneous and dividing to form the deep dorsal internal collateral branch to the great toe, and the external collateral branch to the second toe.

THE GREAT SCIATIC NERVE.

1. Superior gluteal nerve. 2. Inferior gluteal, or small sciatic nerve. 3, 3, 3. Branches to gluteus maximus. 4. Branch to pyriformis. 5. Genital branch of small sciatic. 6. Femoro-popliteal branch. 7, 7. Trunk of great sciatic. 8. Branch to long head of biceps. 9. Branch to short head. 10, 10. Branches to semitendinosus. 11, 11. Branches to semimembranosus. 12, 12. Branches to adductor magnus. 13. External popliteal. 14. Internal popliteal. 15. Filament to plantaris. 16, 16. Branches to gastrocnemius. 17. Origin of external saphenous.

TABLE OF NERVES.—*Continued.*

NAME.	FUNCTION.	ORIGIN.	DISTRIBUTION.	BRANCHES.
Descendens noni.	See *Descendens hypoglossi.*			
Digastric.	Motion.	Facial.	Posterior belly of digastric.	Filaments.
Dorsal, 12 (anterior and posterior divisions).	Motion and sensation.	Cord.	Muscles and skin of chest and trunk.	External, internal, cutaneous.
Dorsal (of clitoris).	Homologue of dorsal of penis.			Filaments.
Dorsal (of penis).	Sensation.	Pudic.	Penis.	Filaments.
Esophageal.	Motion.	Vagus.	Mucous and muscular coats of esophagus.	Esophageal plexus.
Facial.	Sensation.	Great auricular.	Skin over parotid.	Filaments.
Facial (seventh cranial, portio dura).	Motion.	Floor of fourth ventricle.	Face, ear, palate, tongue.	Petrosals, tympanic, chorda tympani, communicating, post. auricular, digastric, stylo-hyoid, lingual, temporal, malar, infra-orbital, buccal, superior and inferior maxillary.
Frontal.	Sensation.	Ophthalmic.	Forehead and eyelids.	Supra-orbital, supra-trochlear.
Gastric.	Motion.	Vagus.	Stomach.	Filaments.
Genital.	Motion and sensation.	Genito-crural.	Cremaster muscle.	Filaments.
Genito-crural.	Motion and sensation.	First and second lumbar.	Cremaster and thigh.	Genital, crural, communicating.
Glosso-pharyngeal (ninth cranial).	Sensation and taste.	Fourth ventricle.	Tongue, middle ear, tonsils, pharynx, meninges.	Tympanic, carotid, pharyngeal, muscular, tonsillar, lingual.
Gluteal (inferior).	Motion.	Sacral plexus (2d and 3d sacral nerves).	Gluteus maximus.	Filaments.
Gluteal (superior).	Motion.	Sacral plexus.	Glutei, tensor vaginæ fem.	Filaments.
Gustatory.	See *Lingual.*			
Hemorrhoidal (inferior).	Sensation and motion.	Pudic.	External sphincter ani, and adjacent integument.	Filaments.
Hepatic.	(?)	Vagus.	Liver.	Hepatic plexus.
Hirschfeld's.	Motion.	Facial.	Styloglossus and palato-glossus.	Filaments.
Hypogastric.	Sensation.	Ilio-hypogastric.	Skin about external abdominal ring.	Filaments.
Hypoglossal (twelfth cranial).	Motion.	Floor of fourth ventricle.	Hyo-glossus and hyoid muscles.	Descendens noni or hypoglossi, muscular, thyro-hyoid, genio-hyoid and meningeal.
Iliac.	Sensation.	Ilio-hypogastric.	Integument covering fore part of gluteal region.	Filaments.
Iliac.	Sensation.	Last dorsal.	Integument covering fore part of gluteal region.	Filaments.
Ilio-hypogastric.	Motion and sensation.	First lumbar.	Abdominal and gluteal regions.	Iliac, hypogastric, communicating.
Ilio-inguinal.	Motion and sensation.	First lumbar.	Inguinal region and scrotum.	Muscular, cutaneous and communicating.
Incisive.	Sensation.	Inferior dental.	Canine and incisor teeth and corresponding gums.	Filaments.
Infra-mandibular.	See *Infra-maxillary.*			
Infra-maxillary.	Motion.	Facial.	Platysma myoides.	Filaments.
Infra-orbital.	Sensation and motion.	Facial.	Nose and lip.	Palpebral, nasal, labial.
Infra-trochlear.	Sensation.	Nasal.	Skin and conjunctiva of inner part of eye, lacrymal sac.	Filaments.
Intercostal.	Motion and sensation.	Spinal cord.	Muscles and integument of thorax.	Muscular, anterior and lateral cutaneous.

TABLE OF NERVES.—*Continued.*

NAME.	FUNCTION.	ORIGIN.	DISTRIBUTION.	BRANCHES.
Intercosto-humeral.	Sensation.	Second intercostal.	Integument of upper two-thirds of inner and posterior part of arm.	Filaments.
Interosseous (anterior).	Motion.	Median.	Deep muscles of forearm.	Filaments.
Interosseous (posterior).	Motion and sensation.	Musculo-spiral.	Carpus and radial and posterior brachial regions.	Filaments.
Jacobson's.	See *Tympanic, of the*	*glosso-pharyngeal.*		
Labial.	Motion and sensation.	Superior maxillary.	Muscles and mucous membrane of lips.	Filaments.
Lacrymal.	Sensation.	Ophthalmic.	Gland and conjunctiva.	Filaments.
Of Lancisi.	Longitudinal striations on upper surface of corpus callosum.			
Laryngeal (recurrent or inferior).	Motion.	Vagus.	Larynx.	Branches to all laryngeal mus. except crico-thyroid.
Laryngeal (superior).	Sensation and motion.	Vagus.	Larynx.	External—crico-thyroid muscle and thyroid gland. Internal—mucous membrane of larynx.
Lingual.	Motion and sensation.	Facial.	Mucous membrane of tongue, palato-glossus and stylo-glossus muscles.	Filaments.
Lingual.	Sensation.	Glosso-pharyngeal.	Circumvallate papillæ and glands of tongue.	Filaments.
Lingual.	Taste and sensation.	Inferior maxillary.	Tongue and mouth.	Filaments.
Lumbar (5).	Motion and sensation.	Cord.	Lumbar and genital tissues.	Anterior and posterior divisions, lumbar plexus.
Malar.	Motion.	Facial.	Lower part of orbicularis palpebrarum, and eyelids.	Filaments.
Malar.	Sensation.	Orbital.	Skin over malar bone.	Filaments.
Mandibular.	See *Maxillary, inferior.*			
Masseteric.	Motor.	Inferior maxillary.	Masseter muscle (and temporal?)	Filaments.
Mastoid.	Sensation.	Great auricular.	Skin over mastoid process.	Filaments.
Mastoid.	Motion.	Lesser occipital.	Skin over mastoid process.	Filaments.
Maxillary (inferior).	Sensation, motion, and taste.	Trigeminus.	Muscles of mastication, ear, cheek, tongue, teeth.	Masseteric, auriculo-temporal, buccal, gustatory, inferior dental.
Maxillary (superior).	Sensation.	Trigeminus.	Cheek, face, teeth.	Orbital, spheno-palatine, dentals, infra-orbital.
Median.	Motion and sensation.	Brachial plexus.	Pronator radii teres, flexors, two lumbricales, fingers, palms.	Muscular, anterior interosseous, palmar cutaneous.
Meningeal.	Sensation.	Glosso-pharyngeal.	Pia and arachnoid.	Filaments.
Meningeal.	Sensation.	Hypoglossal.	Dura mater.	Filaments.
Meningeal.	Sensation.	Vagus.	Dura around lateral sinus.	Filaments.
Meningeal, recurrent.	Sensation.	Inferior maxillary.	Dura and mastoid cells.	Filaments.
Mental.	Motion and sensation.	Inferior maxillary.	Mucous membrane of lower lip and chin.	Filaments.
Motor oculi (third cranial).	Motion.	Floor of aqueduct of Sylvius.	All muscles of the eye, except external rectus, superior oblique, and orbicularis palpebrarum.	Filaments.
Muscular.	Motion and sensation.	First and second cervical.	Rec. cap. lat., rec. anterior major et minor.	Filaments.
Muscular.	Motion and sensation.	Cervical plexus.	Sterno-mastoid, lev. ang. scap., scal. med., trapez.	Filaments.

TABLE OF NERVES.—*Continued.*

NAME.	FUNCTION.	ORIGIN.	DISTRIBUTION.	BRANCHES.
Muscular.	Motion.	Brachial plexus.	Longus colli, scaleni, rhomboidei, subclavius.	Filaments.
Muscular.	Motion.	Musculo-spiral.	Triceps, anconeus, supinat. long., extens. carpi rad. long., brach. antic.	Internal, posterior, external.
Muscular.	Motion.	Median.	Superficial muscles of forearm.	Filaments.
Muscular.	Motion.	Ulnar.	Flexor carpi ulnaris, flexor profundus digitorum.	Two branches.
Muscular.	Motion.	Great sciatic.	Biceps, semimembranosus, semitendinosus, adductor magnus.	Filaments.
Muscular.	Motion.	Sacral plexus.	Pyriformis, obturator int., gemelli, quad. femoris.	Filaments.
Muscular.	Motion.	Anterior crural.	Pectineus and muscles of thigh.	Filaments.
Musculo-cutaneous.	Motion and sensation.	Brachial plexus.	Coraco-brach., biceps, brach. anticus, forearm.	Anterior and posterior.
Musculo-cutaneous.	Motion and sensation.	External popliteal.	Muscles of fibular side of leg, skin of dorsum of foot.	Internal, external.
Musculo-spiral.	Motion and sensation.	Brachial plexus.	Back of arm and forearm, skin of back of hand.	Musculo-cutaneous, radial, posterior interosseous.
Mylo-hyoid.	Motion.	Inferior maxillary.	Mylo-hyoid and digastric muscles.	Filaments.
Nasal.	Sensation.	Dental, anterior.	Mucous membrane of inferior meatus.	Filaments.
Nasal.	Sensation.	Maxillary, superior.	Integument of lateral aspect of nose.	Filaments.
Nasal.	Sensation.	Ophthalmic.	Iris, ciliary ganglion, nose.	Ganglionic, ciliary, infratrochlear.
Nasal, inferior.	Sensation.	Anterior palatine.	Mucous membrane of nose.	Filaments.
Nasal, superior.	Sensation.	Meckel's ganglion.	Mucous membrane of nose and post. ethmoid cells.	Filaments.
Naso-palatine (of Cotunnius).	Sensation.	Meckel's ganglion.	Nasal septum.	Filaments.
Obturator.	Motion and sensation.	Lumbar plexus, third and fourth nerves.	Obturator externus, adductors, joint and skin.	Ant. and post. articulating and communicating.
Obturator (accessory).	Motion and sensation.	Lumbar plexus.	Pectineus and hip-joint.	Filaments.
Occipital, smallest or 3d.	Sensation.	Third cervical.	Integument of occiput.	Filaments.
Occipitalis, lesser or minor.	Sensation.	Second cervical.	Occipito-frontalis, ear, etc.	Communicating, auricular, filaments.
Occipitalis magnus.	Motion and sensation.	Second cervical.	Complexus, trap. and scalp.	Filaments.
Oculo-motor.	See *Motor oculi*.			
Olfactory (first cranial).	Smell.	Frontal lobe, optic thalamus and insula.	Schneiderian membrane of nose.	Twenty branches.
Ophthalmic.	Sensation.	Trigeminus.	Forehead, eyes, nose.	Frontal, lacrymal, nasal.
Optic (second cranial).	Sight.	Cortical center in occipital lobe.	Retina.	None.
Orbital.	Sensation.	Meckel's ganglion.	Mucosa of posterior ethmoid cells, and sphenoid sinus.	Filaments.
Orbital.	Sensation.	Superior maxillary.	Temple and cheek.	Temporal and malar.
Orbito-temporal.	See *Orbital* (*of superior maxillary*).			
Palatine, anterior or great.	Sensation.	Meckel's ganglion.	Hard palate, gums and nose.	Two inferior nasal.
Palatine, external.	Sensation.	Meckel's ganglion.	Tonsil and soft palate.	Filaments.
Palatine, posterior or small.	Motor.	Meckel's ganglion.	Levator palati and azygos uvulæ.	Filaments.
Palmar cutaneous.	Sensation.	Median.	Thumb and palm.	Outer and inner.

TABLE OF NERVES.—*Continued.*

NAME.	FUNCTION.	ORIGIN.	DISTRIBUTION.	BRANCHES.
Palmar (deep).	Motion.	Ulnar.	Little finger, dorsal and palmar interosseous, two inner lumbricales, abductor pollicis.	Filaments.
Palmar (superficial).	Sensation and motion.	Ulnar.	Palmaris brevis, inner side of hand and little finger.	Filaments and two digital branches.
Palpebral.	Motor.	Superior maxillary.	Integument of lower lid.	Filaments.
Parotid.	Sensation.	Auriculo-temporal.	Parotid gland.	Filaments.
Patellar.	Sensation.	Long saphenous.	Integument over patella and plexus patellæ.	Filaments.
Patheticus (4th cranial).	Motion.	Valve of Vieussens.	Superior oblique of eye.	None.
Pectineus.	Motion.	Anterior crural.	Pectineus muscle.	Filaments.
Perforating (of Casser).	See *Musculo-cutaneous.*			
Perineal.	Motion and sensation.	Pudic.	Perineum, genitalia and skin of perineal region.	Cutaneous and muscular.
Perineal.	Motion and sensation.	Fourth sacral.	External sphincter ani and integument of anus.	Filaments.
Petrosals.	Motion.	Facial.	Ganglia and plexus.	Great, small, external to Meckel's ganglion, otic ganglion, and meningeal plexus, respectively.
Pharyngeal.	Motion and sensation.	Glosso-pharyngeal.	Pharynx.	Enters into formation of pharyngeal plexus.
Pharyngeal.	Sensation.	Meckel's ganglion.	Upper part of pharynx, posterior nares and sphenoid sinus.	Filaments.
Pharyngeal.	Motion.	Vagus.	Pharynx.	Pharyngeal plexus, muscles and mucosa.
Pharyngeal.	Sensation.	Sympathetic.	Pharynx.	Helps to form the pharyngeal plexus.
Phrenic.	Motion and sensation.	Third, fourth, and fifth cervical.	Diaphragm, pericardium, pleura.	Filaments.
Plantar (external).	Motion and sensation.	Posterior tibial.	Little toe and deep muscles of foot.	Superficial and deep.
Plantar (internal).	Sensation and motion.	Posterior tibial.	Sole of foot, adduct. pollic., flexor brev. dig., toes.	Cutaneous, muscular, articular, digital.
Pneumogastric (tenth cranial, "par vagum").	Sensation and motion.	Floor of fourth ventricle.	Ear, pharynx, larynx, heart, lungs, esophagus, stomach.	Auricular, pharyngeal, superior and inferior laryngeal, recurrent laryngeal, cardiac, pulmonary, esophageal, gastric, hepatic, communicating, meningeal.
Popliteal (external).	Sensation and motion.	Great sciatic.	Extensors of foot, skin, and fascia.	Anterior tibial, musculo-cutaneous, articular, cutaneous.
Popliteal (internal).	Motion and sensation.	Great sciatic.	Knee, gastrocnemius, tibialis posticus, plantaris, soleus, popliteus, skin of foot.	Articular, muscular, cutaneous, external saphenous, plantar, external or short saphenous.
Pterygoid, external.	Motion.	Inferior maxillary.	External pterygoid muscle.	Filaments.
Pterygoid, internal.	Motion.	Inferior maxillary.	Internal pterygoid muscle.	Filaments.
Pudendal, long (nerve of Sœmmering).	Sensation.	Small sciatic.	Integument of genitalia and inner and proximal part of thigh.	Filaments.
Pudic.	Motion and sensation.	Sacral plexus.	Perineum, anus, genitalia.	Inferior hemorrhoidal, perineal, cutaneous, dorsal of penis.
Pulmonary (anterior and posterior).	(?).	Vagus.	Lungs.	Branches to pulmonary plexuses.

TABLE OF NERVES.—*Continued.*

NAME.	FUNCTION.	ORIGIN.	DISTRIBUTION.	BRANCHES.
Radial.	Sensation.	Musculo-cutaneous.	Thumb and three fingers.	External and internal.
Sacral (five).	Motion and sensation.	Cord.	Multifidus spinæ, skin, gluteal region.	Filaments and sacral plexus.
Saphenous (external or short).	Sensation.	Internal popliteal.	Integument of foot and little toe.	Filaments.
Saphenous (long or internal).	Sensation.	Anterior crural.	Knee, ankle.	Cutaneous, patellar, communicating, filaments.
Of Scarpa.	See *Naso-palatine.*			
Sciatic (great).	Motion and sensation.	Sacral plexus.	Skin of leg, muscles of back of thigh and those of leg and foot.	Articular, muscular, popliteals.
Sciatic (small).	Sensation and motion.	Sacral plexus.	Perineum, back of thigh and leg, gluteus maximus.	Muscular, cutaneous, long pudendal.
Septal.	Sensation.	Meckel's ganglion.	Back part of nasal septum.	Filaments.
Of Sœmmering.	See *Pudendal, Long.*			
Spheno-palatine.	Sensation.	Superior maxillary.	Meckel's ganglion.	See *Ganglion.*
Spinal.	Motion and sensation.	Spinal cord.	Trunk.	Filaments.
Spinal accessory (eleventh cranial).	Motion.	Floor of fourth ventricle.	Sterno-cleido-mastoid, trapezius.	Filaments.
Splanchnic (great).	Sympathetic.	Thoracic ganglia.	Semilunar ganglion, renal and supra-renal plexuses.	Communicating and filaments.
Splanchnic (lesser).	Sympathetic.	Tenth and eleventh thoracic ganglia, great splanchnic.	Celiac plexus and great splanchnic.	Communicating and filaments.
Splanchnic (renal or smallest).	Sympathetic.	Last thoracic ganglion.	Renal and celiac plexus.	Communicating and filaments.
Stapedial.	Motion.	Facial.	Stapedius muscle.	Filaments.
Stylo-hyoid.	Motion.	Facial.	Stylo-hyoid muscle.	Filaments.
Subscapular (three).	Motion.	Brachial plexus.	Subscapular, teres major, and latissimus dorsi.	Filaments.
Supra-acromial.	Sensation.	Cervical plexus.	Skin over deltoid.	Filaments.
Supra-clavicular (descending).	Sensation.	Third and fourth cervical.	Skin of neck, breast and shoulder.	Sternal, clavicular, acromial.
Supra-mandibular.	See *Maxillary, superior.*			
Supra-maxillary.	See *Maxillary, superior.*			
Supra-orbital.	Sensation.	Ophthalmic.	Upper lid, forehead.	Muscular, cutaneous and pericranial branches.
Supra-scapular.	Motion and sensation.	Brachial plexus.	Scapular muscles.	Filaments.
Supra-sternal.	Sensation.	Cervical plexus.	Integument over upper part of sternum.	Filaments.
Supra-trochlear.	Sensation.	Ophthalmic.	Forehead and upper eyelid.	Muscular and cutaneous.
Sympathetic.	See *Sympathetic, Ganglion*, and *Plexus.*			
Temporal.	Motion.	Inferior maxillary.	Temporal muscle.	Filaments.
Temporal.	Sensation.	Orbital.	Integument over temporal muscle.	Filaments.
Temporal.	Motion.	Temporo-facial.	Orbicularis palpebrarum, occipito-frontalis, attrahens and attollens aurem, corrugator supercilii.	Muscular.
Temporal, superficial.	Sensation.	Auriculo-temporal.	Integument over temporal fascia.	Filaments.
Temporo-facial.	Motion.	Facial.	Upper part of face.	Temporal, malar, infra-orbital.
Temporo-malar.	See *Orbital.*			

TABLE OF NERVES.—*Continued.*

Name.	Function.	Origin.	Distribution.	Branches.
Thoracic (posterior or long). External respiratory nerve of Bell.	Motion.	Brachial plexus.	Serratus magnus.	Filaments.
Thoracic, spinal.	Motion and sensation.	Cord.	Muscles of skin of thorax.	Filaments.
Thoracics (ant. and ext.).	Motion.	Brachial plexus.	Pectoralis major et minor.	Filaments.
Tibial (anterior).	Motion and sensation.	External popliteal.	Tibialis antic., extensor long. digit., peroneus ter., joints of foot, skin of great toe.	Muscular, external, internal.
Tibial (posterior).	Motion and sensation.	Internal popliteal.	Tibialis post., flexor long. digit., flexor long. pollic., skin of heel and sole, knee-joint.	Plantars, muscular, calcaneo-plantar, cutaneous or internal calcanean, articular.
Tonsillar.	Sensation.	Glosso-pharyngeal.	Tonsil, soft palate, and fauces.	Filaments.
Trigeminus or trifacial (fifth cranial).	Motion and sensation (taste).	Medulla and floor of fourth ventricle.	Skin and structures of face, tongue and teeth.	Ophthalmic, superior and inferior max. divisions.
Trochlear.	See *Patheticus.*			
Tympanic.	Motion.	Facial.	Stapedius and laxator tympani muscles.	Filaments.
Tympanic.	Sensation.	Sympathetic.	Tympanum.	Filaments.
Tympanic (*Jacobson's nerve*).	Motion.	Glosso-pharyngeal.	Tympanum.	Tympanic plexus, communicating, and filaments.
Ulnar.	Motion and sensation.	Brachial plexus.	Muscles, shoulder-joint and wrist-joint, and skin of little finger.	Two articular, muscular, palmar cutaneous, dorsal, superior palmar, deep palmar.
Vagus.	See *Pneumogastric.*			
Vestibular.	Sensation.	Auditory.	Utricle and ampullæ of the semicircular canals.	Filaments.
Vidian.	Sensation.	Union of large superficial and deep petrosal.	Spheno-maxillary fossa, and posterior part of upper nasal meatus.	Filaments, nasal.
Of Willis.	See *Spinal accessory.*			
Wrisberg's.	See *Cutaneous, lesser internal.*			

Nestis (*nes'-tis*) [*νῆστις*, fasting]. Fasting.

Nestitherapy (*nes-tith-er'-ap-e*). See *Nestiatria.*

Nestle's Food. A variety of milk-food for infants. Its composition is: Water, 4.72; fat, 1.91; grape-sugar and milk-sugar, 6.02; cane-sugar, 32.93; starch, 40.10; soluble carbohydrates, 44.88; albuminoids, 8.23; ash, 1.59.

Nestoposia (*nes-top-o'-ze-ah*) [*νῆστις*, fasting; *πόσις*, drinking]. Drinking on an empty stomach.

Net [ME., *net*, net]. A reticulation or cancellation; a web or mesh; a rete; anything formed with interstices or meshes, like a net. **N., Bathygraphic,** or **N., Bathographic Zone,** a deep-sea closable net employed in the study of the many different faunal belts overlying one another in the great deep-sea zones, designed by Palumbo, Petersen, Chun, etc. **N., Müller's,** the "fine pelagic net" of Johannes Müller, a round bag of Müller gauze or silk mull, the mouth of which is kept open by a circular metallic ring. In ordinary pelagic fishing this ring is fastened to a handle from six to twelve feet long (like the ordinary butterfly net). While the boat moves along the opening of this net is held at the surface in such a way that swimming animals are caught in the bag, in the bottom of which they remain hanging, while the water passes through the narrow meshes of the net. After a time the net is carefully inverted and the tow-stuff (*Auftrieb*) is emptied into a glass vessel filled with sea-water. If one wishes to fish below the surface, the ring of the net is fastened by means of three strings equally distant from one another, which at a point (about three feet from the opening of the net) are joined to a longer line which is sunk by weights to a definite distance corresponding to the desired depth. (*E. Hæckel.*) **N., Palumbo's.** See *N., Bathygraphic.* **N.-work,** the arrangement of fibers in a reticulum. **Network, Gerlach's,** a network of processes of nerve-cells found in the gray matter of the spinal cord. **Network, Haller's,** the rete testis.

Netraneurysm (*net-ran'-u-rism*) [*νῆτρον*, spindle; *ἀνεύρυσμα*, aneurysm]. A fusiform aneurysm.

Nettle (*net'-l*) [ME., *nettle*, nettle]. The root of *Urtica dioica*, the common stinging-nettle, a common domestic remedy for renal complaints and hemorrhages. It is astringent, diuretic, and antiscorbutic. Dose of the fld. ext. ♏xx–xl. Unof. **N.-fever,** urticaria, *q. v.* **N.-fiber,** one of the bast-fibers of the common nettle (*Urtica dioica*). When cleaned these fibers are soft, of good length and strength, and quite lustrous and white. **N.-rash.** See *Urticaria.*

ettling-cell (*net'-ling-sel*). See *Lasso-cell.*

ettorrhynchus (*net-or-in'-kus*) [νῆττα, duck; ῥύγχος, bill, snout]. A pseudoparasite present in human feces. See *Parasites* (*Animal*), *Table of.*

eubauer's Artery. See *Arteries, Table of.* **N.'s Test.** See *Tests, Table of.*

eubauer and Vogel's Reagent and Test. See *Tests, Table of.*

euber's Tubes. Decalcified bone drainage-tubes.

eufchâtel Cheese. See *Cheese.*

eugebauer's Operation. See *Le Fort's Operation,* under *Operations, Table of.*

eumann, Corpuscles of. See *Corpuscle.* **N.'s Dentinal Sheath,** an elastic homogeneous membrane between Tomes' fibers and the ivory of the dentinal canals. **N.'s Hematoblasts.** Same as *N.'s Corpuscles.* **N.'s Membrane.** Same as *N.'s Dentinal Sheath.* **N.'s Sheath.** See *N.'s Dentinal Sheath.*

eurad (*nu'-rad*) [νεῦρον, a nerve; *ad*, to]. Toward the neural aspect or axis.

euradynamia (*nu-rad-in-a'-me-ah*). See *Neurasthenia.*

euradynamic (*nu-rad-in-am'-ik*). See *Neurasthenic.*

euræmia (*nu-re'-me-ah*). See *Neuremia.*

euragmia (*nu-rag'-me-ah*) [νεῦρον, nerve; ἀγμός, a breaking]. The bruising or tearing of a nerve-trunk above or below its ganglion for the purpose of studying the trophic changes that will follow. Also called the *Neuragmic Method.*

euragmic (*nu-rag'-mik*) [νεῦρον, a nerve; ἀγμός, a breaking]. Pertaining to neuragmia. **N. Method.** See *Neuragmia.*

ural (*nu'-rel*) [νεῦρον, nerve]. 1. Pertaining to nerves. 2. Richard Owen's term for that surface or aspect of the body which in progressive motion is carried upright and directed backward in man, and homologous surfaces indicated by the position of the nervous and vascular centers, which surfaces are horizontal and carried respectively upward and downward in vertebrates below mankind, but are carried downward and upward respectively in the invertebrates. See *Dorsal.* **N. Arch,** the arch formed by the two neurapophyses, and forming the dorsal cover of each section of the spinal canal. **N. Axis,** the spinal cord. **N. Canal,** the dorsal tube of the embryo, formed by the union of the dorsal folds of the lateral tract above the line of the embryonic axis. **N. Crest.** See *Crest.* **N. Foramen,** the vertebral foramen. See *Foramina, Table of.* **N. Furrow,** a furrow of the blastoderm giving rise to a part of the nervous system in insects. It is an invagination occurring later than the gastrula mouth, and exactly in the location from which the latter disappeared, but having no connection with it whatever. **N. Groove,** the same as the *Medullary Groove, q. v.* **N. Lamina,** the lateral portion of the neural arch of a vertebra. **N. Metamere,** a segment of the vertebral column and spinal cord. **N. Plate,** the structure formed by the paired cerebral rudiments in the embryos of certain worms, arising as products of the ectoderm, sinking below the surface and becoming mesodermal. It is the same as *Medullary Plate.* **N. Rows,** two rows of cells that develop anteriorly from the neuroblasts, in the embryo of worms, and form the rudiments of the ventral cord. **N. Tube,** the closed medullary groove of the epiblast.

euralgia (*nu-ral'-je-ah*) [νεῦρον, nerve; ἄλγος, pain]. A severe paroxysmal pain in the area of distribution of a nerve or along its course. Age, sex, heredity, and anemia are important predisposing causes. The true nature of neuralgia is obscure; it is possible that in many cases the cause is an inflammatory or circulatory disturbance in the nerve-trunk. Among exciting causes cold and traumatism play an important rôle. Certain disease-poisons, as those of typhoid fever, variola, malaria, and *metallic* poisons, such as lead, arsenic, copper, mercury, in addition to alcohol and nicotin, are sometimes causative agents of neuralgia. Gout and diabetes also occasionally give rise to neuralgia. Finally, there is a class of so-called reflex neuralgias met with in connection with uterine and ovarian disease and occurring in remote organs. Lesions of the central nervous system also give rise to attacks of neuralgic pain. According to their anatomic situation the following forms of neuralgia are described: trigeminal, tic douloureux or prosopalgia, the most frequent variety; cervico-occipital; cervico-brachial and brachial; intercostal; sciatica or ischias; coccygodynia; visceral neuralgias. **N. cerebralis.** A synonym of *Hemicrania.* **N. dentalis.** See *Odontalgia.* **N., False,** nerve-pains due to mechanical compression of a nerve. **N. mesenterica.** A synonym of *Enteralgia.* **N., Red.** See *Erythromelalgia.*

Neuralgic (*nu-ral'-jik*) [νεῦρον, nerve; ἄλγος, pain]. Pertaining to, or affected with, neuralgia.

Neurameba (*nu-ram-e'-bah*) [νεῦρον, nerve; ἀμοιβή, change]. In biology, a nerve-cell regarded as an organism. Cf. *Myameba, Osteameba.*

Neuramebimeter (*nu-ram-eb-im'-et-er*) [νεῦρον, nerve; ἀμοιβή, return; -μέτρον, measure]. The nerve-reply measurer; an instrument devised by Exner and used in psycho-physics to obtain the reaction-time of nervous impressions.

Neuranagenesis (*nu-ran-aj-en'-es-is*) [νεῦρον, nerve; ἀναγεννάειν, to renew]. Regeneration or renewal of nerve-tissue.

Neuranagennema (*nu-ran-aj-en'-em-ah*) [νεῦρον, nerve; ἀναγέννημα, that which is renewed]. The regenerated part of a nerve.

Neuranaphysis (*nu-ran-af'-is-is*) [νεῦρον, nerve; ἀναφύειν, to grow again]. The renewal, or renewed growth of the nerve-elements.

Neurapophysis (*nu-rap-off'-is-is*) [νεῦρον, nerve; ἀπόφυσις, offshoot]. Either one of the two apophyses on each vertebra which blend and form the neural arch, or the dorsal wall of the spinal foramen.

Neurasthenia (*nu-ras-then-i'-ah*) [νεῦρον, nerve; ἀσθένεια, weakness]. A group of symptoms resulting from debility or exhaustion of the nerve-centers. Among the more common symptoms are a lack of energy, undue readiness of fatigue, disinclination to activity, a sense of fulness or pressure at the top of the head; pain in the back, impaired memory, and disturbed sleep; gastro-intestinal symptoms, such as anorexia, constipation, fulness after eating, are common; and amenorrhea and dysmenorrhea in females, and spermatorrhea and impotence in the male, are frequent accompaniments. **N., Cerebral,** is marked by depression, inability to concentrate the mind, insomnia, irritability, headache, visual disturbances, etc. **N. gastrica,** feeble digestion of a purely nervous origin. **N., Spinal,** commonly known as *spinal irritation,* is characterized by pain in the back, tender points along the spine, weakness of the extremities, great prostration on slight exertion, neuralgic pains, and other nervous manifestations.

Neurasthenic (*nu-ras-then'-ik*) [νεῦρον, nerve; ἀσθένεια, weakness]. Relating to, or characterized by, neurasthenia.

Neuration (*nu-ra'-shun*). Same as *Nervation.*

Neuratrophia (*nu-rat-ro'-fe-ah*) [νεῦρον, nerve; ἀτροφία, atrophy]. Atrophy, or impaired nutrition, of a nerve, or nerves.

Neuraxis (*nu-raks'-is*) [*νεῦρον*, nerve; *axis*, axis]. The neural axis; neuron.

Neure (*nūr*) [*νεῦρον*, nerve]. A nerve-cell including all its processes.

Neurectasis, Neurectasy (*nu-rek'-tas-is, nu-rek'-tas-e*) [*νεῦρον*, nerve; *ἔκτασις*, stretching]. Nerve-stretching.

Neurectomy (*nu-rek'-to-me*) [*νεῦρον*, nerve; *ἐκτομή*, excision]. The operation of excising part of a nerve.

Neurectopia (*nu-rek-to'-pe-ah*) [*νεῦρον*, nerve; *ἔκτοπος*, out of place]. Displacement, or other abnormity of the distribution of a nerve.

Neuremia (*nu-re'-me-ah*) [*νεῦρον*, nerve; *αἷμα*, blood]. A purely functional nervous disorder.

Neurempodism (*nu-rem'-po-dizm*) [*νεῦρον*, nerve; *ἐμποδισμός*, hindrance]. Interference with nervous action.

Neurenteric (*nu-ren-ter'-ik*) [*νεῦρον*, nerve; *ἔντερον*, intestine]. Pertaining to the embryonic neural canal and the intestinal tube. **N. Canal,** the temporary communication existing between the neural canal and the intestinal tube in Tunicates and Vertebrates. It was discovered by Kowalevsky in Ascidians and Amphioxus, and is called also *Kowalevsky's Canal.* See *Canal.*

Neurepithelium (*nu-rep-ith-e'-le-um*). See *Neuro-epithelium.*

Neuria (*nu'-re-ah*) [*νεῦρον*, nerve]. Nervous tissue; a delicate layer of nerve-substance.

Neuriasis (*nu-ri'-as-is*) [*νεῦρον*, nerve]. Hysteric hypochondriasis.

Neuriatry (*nu-ri'-at-re*) [*νεῦρον*, nerve; *ἰατρεία*, therapy]. The study and treatment of nervous diseases.

Neuric (*nu'-rik*) [*νεῦρον* nerve]. Pertaining to a nerve or to nerves.

Neuricity (*nu-ris'-it-e*) [Fr., *neuricité*, from *νεῦρον*, nerve]. Nerve-force; nervous quality, or function.

Neuridin (*nu'-rid-in*) [*νεῦρον*, a nerve], $C_5H_{14}N_2$. A ptomain, the first diamin isolated from animal tissues by Brieger in 1884. It is one of the most common products of putrefaction; it has been obtained from putrid human flesh, horseflesh, fish, gelatin and cheese. It can be obtained in the preparation of cholin by heating fresh eggs with baryta, and by heating fresh brain with a two per cent. solution of hydrochloric acid. It is almost invariably associated with cholin in the process of putrefaction; according to the duration of putrefaction, the amount of cholin decreases, with a corresponding increase in the amount of trimethylamin, while the amount of neuridin increases in quantity according to the nature of the decomposing organ. The greatest yield is from gelatinous tissue, such as the intestines; tissues like those of the liver and spleen yield little. Neuridin is isomeric with cadaverin. The free base has an excessively repulsive seminal odor. It is soluble in water, but not in ether and alcohol. Pure neuridin is not poisonous, but when mixed with the products of putrefaction, it has a toxic effect like peptotoxin. This holds true of other non-poisonous bases. See *Ptomains, Table of.*

Neurilemma (*nu-ril-em'-ah*) [*νεῦρον*, nerve; *λέμμα*, bark]. The sheath encasing a nerve-fiber; the sheath of Schwann. See *Nerve-fiber.*

Neurilemmatic (*nu-ril-em-at'-ik*) [*νεῦρον*, nerve; *λέμμα*, bark]. Pertaining to the neurilemma.

Neurilemmitis (*nu-ril-em-i'-tis*) [*νεῦρον*, nerve; *λέμμα*, bark; *ιτις*, inflammation]. Inflammation of the neurilemma.

Neurility (*nu-ril'-it-e*) [Fr. *nevrilité*, from *νεῦρον*, nerve]. The stimulus or power possessed by a nerve-fiber to cause contraction of a muscle; neuricity.

Neurilyma (*nu-ril-i'-mah*). Synonym of *Neurilemma.*

Neurin (*nu'-rin*) [*νεῦρον*, nerve]. 1. The albuminous basis forming the substance of nerve-tissue. 2. $C_5H_{13}NO$; a toxic body, one of the ptomains, the product of decomposition of protagon by caustic baryta. It is a syrupy fluid, with a strongly alkaline reaction, and is extremely soluble in water. See *Ptomains, Table of.* 3. An extract of nerve-tissue employed therapeutically. See *Organotherapy.*

Neuriorhabdium (*nu-re-or-ab'-de-um*) [*νευρίον*, nerve; *ῥάβδιον*, rod; pl. *Neuriorhabdia*]. Any one of the rods of the rod-and-cone layer of the retina.

Neurischias (*nu-ris'-ke-as*) [*νεῦρον*, nerve; *ἰσχιάς*, pain in the loins]. Neuralgia in the loins.

Neurism (*nu'-rizm*) [*νεῦρον*, nerve]. 1. Nerve-force; neurility; neuricity. 2. Nervousness.

Neuristos (*nu-ris'-tos*) [*νεῦρον*, nerve; *ἱστός* tissue]. Nerve-tissue.

Neuritic (*nu-rit'-ik*) [*νεῦρον* nerve; *ιτις*, inflammation]. Pertaining to neuritis.

Neuritides (*nu-rit-i'-dēz*). Same as *Neuroses.*

Neuritis (*nu-ri'-tis*) [*νεῦρον*, nerve; *ιτις*, inflammation]. Inflammation of a nerve, especially of a nerve-trunk. The nerve-structure itself is said to be little subject to inflammation, which is usually confined to the coverings, and therefore the condition is more properly termed *perineuritis.* **N., Acute,** an acute inflammation of a nerve. **N., Adventitial,** inflammation affecting especially the connective-tissue sheath of a nerve. **N., Alcoholic.** See *N., Multiple,* and *Polyneuritis potatorum.* **N., Ascending,** inflammation extending from the periphery of a nerve centrad to the spinal cord or brain. **N., Carcinomatous,** infiltration of a nerve with carcinomatous tissue. **N., Chronic,** a form pursuing a protracted course, and with symptoms not actively manifested. **N., Degenerative,** neuritis in which the nerve-substance proper degenerates. It is the same as *N., Parenchymatous.* **N., Descending,** neuritis, the result of extension of disease from the spinal cord or the brain toward the periphery. **N., Diabetic,** a polyneuritis sometimes seen in diabetes, and probably the result of autointoxication with the products of faulty metabolism. **N., Eichhorst's.** See *N. fascians.* **N., Endemic.** A synonym of *Beri-beri.* **N. fascians,** that form of neuritis in which the change in the nerve-sheath appears to extend directly to the interstitial tissue of the muscles. It is also called *Eichhorst's Neuritis.* **N., Interstitial,** inflammation of the interstitial connective tissue of a nerve-trunk. **N., Leprous,** a neuritis or perineuritis due to the *Bacillus lepræ* or a toxin produced by it. **N., Lipomatous,** that form in which the nerve-fibers are completely destroyed and replaced by a fibrous connective tissue in which much fat is sometimes deposited. It is also called *Leyden's Neuritis.* **N., Malarial,** neuritis, sometimes multiple, due to the malarial poison. **N., Migrant, Migratory or Wandering,** one that changes its position from place to place. **N., Multiple,** the simultaneous inflammation of several nerve-trunks, usually symmetrically situated on both sides of the body. Its most common cause is alcoholic poisoning; it may be due to arsenic, malaria, mercury, lead; to diphtheria, pneumonia, typhoid fever, and other infectious diseases. Beri-beri is a form of multiple neuritis. **N., Optic,** inflammation of the optic nerve. See *Papillitis.* **N., Parenchymatous,** a form in which the medullary substance and the axis-cylinders are chiefly involved, the interstitial tissue being but little altered or only affected secondarily. It is also called degenerative neuritis. **N., Peripheral,** a form confined to the terminal filaments of nerves. **N., Pressure,** inflammation of a nerve as a

result of compression. **N., Pressure, Musculo-spiral,** inflammation of the musculo-spiral nerve from pressure usually by the head on the arm rested upon a sharp edge during alcoholic intoxication. **N., Rheumatic,** that due to rheumatism. **N., Terminal.** See *Erythromelalgia*. **N., Wandering.** See *N., Migrant.*

Neuro- (*nu'-ro-*) [νεῦρον, nerve]. A prefix signifying connection with or relation to a nerve.

Neuro-anatomy (*nu-ro-an-at'-o-me*) [νεῦρον, nerve; ἀνά, apart; τέμνειν, to cut]. The anatomy of the nervous system.

Neuroasthenia (*nu-ro-as-the'-ne-ah*). Same as *Neurasthenia.*

Neuroasthenic (*nu-ro-as-then'-ik*). Same as *Neurasthenic.*

Neuroblacia (*nu-ro-bla-se'-ah*) [νεῦρον, nerve; βλακεία, dulness; βλάξ, dull]. Paresis; obtundity of nervous sensibility.

Neuroblast (*nu'-ro-blast*) [νεῦρον, nerve; βλαστός, germ]. Any segmentation-sphere whose division gives origin to cells that belong to the nervous system exclusively; a mesodermal nerve-cell or ganglion-cell.

Neurocanal (*nu-ro-kan-al'*) [νεῦρον, nerve; *canalis*, canal]. The central canal of the spinal axis.

Neurocardiac (*nu-ro-kar'-de-ak*) [νεῦρον, nerve; καρδία, heart]. Pertaining to the nervous system and the heart. **N.-c. Disease.** Synonym of *Exophthalmic Goiter.*

Neurocele (*nu'-ro-sēl*) [νεῦρον, nerve; κοίλια, hollow]. The system of cavities and ventricles in the cerebro-spinal axis.

Neurocentral (*nu-ro-sen'-tral*) [νεῦρον, nerve; κέντρον, center]. Relating to the neural arch and the centrum of a vertebra.

Neurochondrous (*nu-ro-kon'-drus*) [νεῦρον, cord; χόνδρος, cartilage]. Fibro-cartilaginous.

Neurochord (*nu'-ro-kord*) [νεῦρον, nerve; χορδή, chord or string]. The nerve-chord. **N. Strands, or Giant Nerve-tubes,** tubes with a wide lumen and wall formed of neurilemma, which run back in varying but always small numbers on the dorsal side of the ventral chord of the *Annulata* and *Thoracostraca.*

Neurocrane (*nu'-ro-krān*) [νεῦρον, nerve; κρανίον, skull]. The brain-case, or cranial portion of the head.

Neurocranial (*nu-ro-kra'-ne-al*) [νεῦρον, nerve; κρανίον, skull]. Pertaining to the neurocrane.

Neurocyte (*nu'-ro-sīt*) [νεῦρον, nerve; κύτος, cell]. A nerve-cell; the essential element of nervous structures.

Neurodealgia (*nu-ro-de-al'-je-ah*) [νευρώδης, nerve-like; the retina; ἄλγος, pain]. Retinal pain.

Neurodeatrophia (*nu-ro-de-at-ro'-fe-ah*) [νευρώδης, retina; ἀτροφία, atrophy]. Atrophy of the retina.

Neurodermatosis (*nu-ro-der-mat-o'-sis*) [νεῦρον, nerve; δέρμα, skin; νόσος, disease]. A neurotic skin-affection.

Neurodermatrophia (*nu-ro-der-mat-ro'-fe-ah*) [νεῦρον, nerve; δέρμα, skin; ἀτροφία, atrophy]. Atrophy of the skin from nervous disturbance.

Neurodes (*nu-ro'-dēz*) [νευρώδης, nerve-like]. The retina, as being made up of nerve-elements.

Neurodiastasis (*nu-ro-di-as'-tas-is*) [νεῦρον, nerve; διάστασις, separation]. Separation of nerves; neurectasis.

Neurodictyitis (*nu-ro-dik-te-i'-tis*). Synonym of *Neuroretinitis.*

Neurodynamia (*nu-ro-di-nam'-e-ah*) [νεῦρον, nerve; δύναμις, strength]. Nervous strength or energy.

Neurodynamic (*nu-ro-di-nam'-ik*) [νεῦρον, nerve; δύναμις, strength]. Pertaining to the power of a nerve-current or of the nervous forces of the system.

Neurodynia (*nu-ro-din'-e-ah*) [νεῦρον, nerve; ὀδύνη, pain]. See *Neuralgia.*

Neurodysentery (*nu-ro-dis'-en-ter-e*) [νεῦρον, nerve; δυσεντερία, dysentery]. Dysentery with typhoid symptoms.

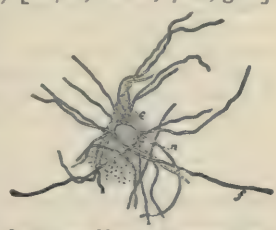
Neuro-enteric (*nu-ro-en-ter'-ik*). Same as *Neurenteric.*

Neuro-epiblastic (*nu-ro-ep-ib-las'-tik*) [νεῦρον, nerve; ἐπί, upon; βλαστός, germ]. Pertaining to the neural epiblast, *i. e.*, that which enters into the formation of the nervous system.

Neuro-epithelial (*nu-ro-ep-ith-e'-le-al*) [νεῦρον, nerve; ἐπί, upon; θῆλη, nipple]. Pertaining to or of the nature of neuro-epithelium.

Neuro-epithelium (*nu-ro-ep-ith-e'-le-um*) [νεῦρον, nerve; ἐπι, upon; θῆλη, nipple]. The retinal layer of rods and cones. In a wider sense, that part of any epithelial structure that contains nerve-endings is called by this name. See *Epithelium.*

Neurofibroma (*nu-ro-fi-bro'-mah*) [νεῦρον, nerve; *fibra*, fiber; ὄμα, tumor]. A tumor of the connective tissue of a nerve, composed of fibrous tissue.



Neurofrontal (*nu-ro-frun'-tal*) [νεῦρον, nerve; *frons, frontis*, the forehead]. Pertaining to the brain and the frontal bone.

Neurogamia (*nu-ro-ga'-me-ah*) [νεῦρον, nerve; γάμος, marriage]. The alleged condition of rapport between the animal magnetizer and the mesmerized person, or between the hypnotizer and the hypnotized.

Neurogangleitis (*nu-ro-gang-le-i'-tis*) [νεῦρον, nerve; γάγγλιον, tumor; ιτις, inflammation]. Inflammation of a ganglion of the nervous system.

Neurogenesis (*nu-ro-jen'-es-is*) [νεῦρον, nerve; γένεσις, genesis]. The formation of nerves.

Neuroglia (*nu-rog'-le-ah*) [νεῦρον, nerve; γλία, glue]. The reticulated framework or skeleton-work of the substance of the brain and spinal cord. The term is sometimes abbreviated to *Glia.*

Isolated Neuroglia-cell of Spinal Cord of Ox.

n. Nucleus. *c.* Granular protoplasm. *f.* Fibers of neuroglia. (*Stirling*)

Neurogliac, Neurogliar (*nu-rog'-le-ak, nu-rog'-le-ar*) [νεῦρον, nerve; γλία, glue]. Pertaining to or resembling neuroglia.

Neuroglioma (*nu-ro-gli-o'-mah*) [νεῦρον, nerve; γλία, glue; ὄμα, tumor: *pl.*, *Neurogliomata*]. A tumor composed essentially of neurogliar elements; glioma. **N., Ganglionar,** a tumor developing in the central nervous system and consisting of hyperplastic neuroglia, ganglion-cells, and nerve-fibers.

Neurography (*nu-rog'-ra-fe*) [νεῦρον, nerve; γράφειν, to write]. Descriptive anatomy of the nerves.

Neuro-humeral (*nu-ro-hu'-mer-al*) [νεῦρον, nerve; *humor*, moisture]. Pertaining to the nervous system and to the fluids of the body. **N.-h. Theory.** See *Duckworth's Theory.*

Neurohypnologist (*nu-ro-hip-nol'-o-jist*) [νεῦρον, nerve; ὕπνος, sleep; λόγος, science]. One skilled in neurohypnology.

Neurohypnology (*nu-ro-hip-nol'-o-je*) [νεῦρον, nerve; ὕπνος, sleep; λόγος, science]. The science or study of hypnotism.

Neurohypnotism (*nu-ro-hip'-not-izm*). Synonym of *Hypnotism.*

Neuroid (*nu'-roid*) [νεῦρον, nerve; εἶδος, like]. Resembling a nerve or nerve-substance.

Neuro-keratin (*nu-ro-ker'-at-in*) [νεῦρον, nerve; κέρας, horn]. The form of keratin found in nerve-sheaths and the white substance of Schwann. See *Keratin.*

Neurokinesis (*nu-ro-kin-e'-sis*). A synonym of *Nerve-stretching.*

Neurolemma (*nu-ro-lem'-ah*). Synonym of *Retina.*

Neurolemmatitis (*nu-ro-lem-at-i'-tis*). A synonym of *Retinitis.*

Neurologist (*nu-rol'-o-jist*) [νεῦρον, nerve; λόγος, science]. One versed in neurology.

Neurology (*nu-rol'-o-je*) [νεῦρον, nerve; λόγος, science]. The anatomy, physiology and pathology of the nervous system.

Neurolymph (*nu'-ro-limf*) [νεῦρον, nerve; λύμφα, lymph]. The cerebro-spinal fluid.

Neurolysis (*nu-rol'-is-is*) [νεῦρον, nerve; λύσις a loosing]. 1. Relaxation of a nerve. 2. A change in the relation of nerves following the operation of nerve-stretching.

Neurolytic (*nu-ro-lit'-ik*) [νεῦρον, nerve; λύσις, a loosing]. Pertaining to neurolysis.

Neuroma (*nu-ro'-mah*) [νεῦρον, nerve; ὄμα, tumor: *pl.*, *Neuromata*]. A tumor of or on a nerve. Most neuromata are really fibromata. **N., Amputation,** the neuroma of a stump, forming at the end of a divided nerve. **N., Amyelinic,** a neuroma made up of non-medullated nerve-fibers. **N., Cellular.** See *N., Ganglionic.* **N. cutis,** a tumor of the skin, resembling a myoma, and consisting mainly of firm connective tissue, originating from the neurilemma. It is pathologically considered as a *fibro-neuro-myoma.* **N., Diffuse,** a condition characterized by the existence of multiple neuromatous tumors. **N., False,** a fibromatous tumor forming on a nerve. **N., Ganglionic, N., Ganglionated,** a neuroma made up of nerve-cells. **N., Gliomatous.** Synonym of *Neuroglioma.* **N., Medullated,** one made up of medullated nerve-fibers. **N., Myelinic.** Synonym of *N., Medullated.* **N., Myxomatous,** a tumor composed of nervous and myxomatous tissues. **N., Peripheral, N., Peripheric,** one formed near the peripheral termination of a nerve. **N., Plexiform,** the development of multiple fibromatous tumors along the course of one or more nerves. There is in these cases, however, some hyperplasia of the nerve-fibers, constituting a true neuroma.

Neuromalacia, Neuromalaxis (*nu-ro-mal-a'-se-ah, nu-ro-mal-aks'-is*) [νεῦρον, nerve; μαλακία, a softening]. A softening of nerve-tissue.

Neuromast (*nu'-ro-mast*) [νεῦρον, nerve; μαστός, a hillock]. In biology, R. Ramsay Wright's term for the "nerve-hillock" and other sense-organs of the same character, whatever their shape; any neuro-epithelial sense-organ. This name is seldom given to the sense-organs of man, or of the higher vertebrate animals.

Neuromation (*nu-ro-ma'-te-on*) [νεῦρον, nerve; ὄμα, tumor; dim. of *neuroma*]. A small neuromatous tumor.

Neuromatoid (*nu-ro'-mat-oid*) [νεῦρον, nerve; ὄμα, tumor; εἶδος, like]. Resembling a neuroma.

Neuromatosis (*nu-ro-mat-o'-sis*) [νεῦρον, nerve; ὄμα, tumor; νόσος, disease]. A morbid tendency to the formation of neuromata.

Neuromatous (*nu-ro'-mat-us*) [νεῦρον, nerve; ὄμα, tumor]. Of the nature of a neuroma.

Neuromeninx (*nu-ro-men'-inks*) [νεῦρον, nerve; μῆνιγξ, a membrane]. A nervous expansion, such as the retina.

Neuromere (*nu'-ro-mēr*) [νεῦρον, nerve; μέρος, part]. A natural segment of the neuron.

Neuromerism (*nu-rom'-er-ism*) [νεῦρον, nerve; μέρος, a part]. In biology, neural segmentation.

Neurometabolic (*nu-ro-met-ab-ol'-ik*) [νεῦρον, nerve; μεταβολικός, changeable, metabolic]. Relating to metabolic changes in the nervous system.

Neurometadrasis (*nu-ro-met-ad-ra'-sis*) [νεῦρον, nerve; μέτα, with; δρᾶσις, efficacy]. The influence of one person, or will, over another, as seen in hypnotism.

Neurometastasis (*nu-ro-met-as'-tas-is*) [νεῦρον, nerve; μετάστασις, metastasis]. Metastasis to the nervous system.

Neuromimesis (*nu-ro-mi-me'-sis*) [νεῦρον, nerve; μίμησις, imitation]. Paget's term for hysteric mimicry of organic disease.

Neuromuscular (*nu-ro-mus'-ku-lar*) [νεῦρον, nerve; *musculus*, a muscle]. Pertaining conjointly to nerves and muscles.

Neuromyalgia (*nu-ro-mi-al'-je-ah*) [νεῦρον, nerve; μῦς, muscle; ἄλγος, pain]. Neuralgia of a muscle; an association of myalgia and neuralgia.

Neuromyelitis (*nu-ro-mi-el-i'-tis*) [νεῦρον, nerve; μυελός, marrow; ιτις, inflammation]. Inflammation of myelonic substance, or of the medulla spinalis.

Neuromyeloid (*nu-ro-mi'-el-oid*) [νεῦρον, nerve; μυελός, marrow; εἶδος, like]. Resembling nervous or myelonic substance.

Neuromyelous (*nu-ro-mi'-el-us*) [νεῦρον, nerve; μυελός, marrow]. Pertaining to or of the nature of nervous or myelonic substance.

Neuromyopathic (*nu-ro-mi-o-path'-ik*) [νεῦρον, nerve; μῦς, muscle; πάθος, disease]. Relating to disease of both muscles and nerves.

Neuromyopathy (*nu-ro-mi-op'-ath-e*) [νεῦρον, nerve; μῦς, muscle; πάθος, disease]. A neuralgic disease of a muscle.

Neuromyxoma (*nu-ro-miks-o'-mah*). Synonym of *Neuroma, Myxomatous.*

Neuron (*nu'-ron*) [νεῦρον, nerve: *pl.*, *Neura*]. In biology; (*a*) the cerebrospinal cord taken as a whole; (*b*) a vein or costa of an insect's wing; (*c*) same as *Neuri.*

Neuronasal (*nu-ro-na'-zal*) [νεῦρον, nerve; *nasis*, nose]. Relating to the brain and the nasal bone.

Neuroneoplasm (*nu-ro-ne'-o-plazm*) [νεῦρον, nerve; νέος, new; πλάσσειν, to mold]. A neoplasm made up of or containing nerve-elements; a neuroma.

Neuronosus (*nu-ron'-o-sus*) [νεῦρον, nerve; νόσος, disease]. Synonym of *Neurosis.* **N. of the Skin,** neurotic skin-disease.

Neuronyctic (*nu-ro-nik'-tik*) [νεῦρον, nerve; νύγμα, a prick, from νύσσειν, to prick]. Pertaining to *Neuronyxis.*

Neuronygmus (*nu-ro-nig'-mus*) [νεῦρον, nerve; νυγμός, a puncture]. A punctured wound of a nerve.

Neuronymic (*nu-ro-nim'-ik*) [νεῦρον, nerve; ὄνυμα, name]. Pertaining to neurologic nomenclature.

Neuronyxis (*nu-ro-niks'-is*) [νεῦρον, nerve; νύσσειν, to prick]. The puncturing of nerves.

Neuroparalysis (*nu-ro-par-al'-is-is*) [νεῦρον, nerve; παράλυσις, paralysis]. Paralysis due to disease of a nerve.

Neuroparietal (*nu-ro-par-i'-et-al*) [νεῦρον, nerve; *paries*, wall]. Relating to the brain and the parietal bones.

Neuropath (*nu'-ro-path*) [νεῦρον, nerve; πάθος, disease]. One who ascribes a nervous origin to disease.

Neuropathic (*nu-ro-path'-ik*) [νεῦρον, nerve; πάθος, disease]. Pertaining to nervous diseases. **N. Eschar,** a bedsore following disease of the spinal cord.

Neuropathologist (*nu-ro-path-ol'-o-jist*) [νεῦρον, nerve; πάθος, disease; λόγος, science]. One versed in neuropathology.

Neuropathology (*nu-ro-path-ol'-o-je*) [νεῦρον, nerve; πάθος, disease; λόγος, science]. The pathology of diseases of the nervous system.

Neuropathy, Neuropathia (*nu-rop'-ath-e, nu-ro-pa'-the-ah*) [νεῦρον, nerve; πάθος, disease]. Any nervous disease.

Neurophlogosis (*nu-ro-flo-go'-sis*). Synonym of *Neuritis*.

Neurophonia (*nu-ro-fo'-ne-ah*) [νεῦρον, nerve; φωνή, voice]. A rare choreic disease of the larynx and muscles of expiration characterized by the utterance of sharp spasmodic cries resembling the barking of a dog.

Neurophthalmia (*nu-roff-thal'-me-ah*) [νεῦρον, nerve; ὀφθαλμός, the eye]. Nervous ophthalmia.

Neurophthisic (*nu-rof-thiz'-ik*) [νεῦρον, nerve; φθίσις, wasting]. Pertaining to *Neurophthisis*.

Neurophthisis (*nu-roff'-this-is*) [νεῦρον, nerve; φθίσις, wasting]. Wasting of the nerves or nervous tissue.

Neuro-physiology (*nu-ro-fiz-e-ol'-o-je*) [νεῦρον, nerve; φύσις, nature; λόγος, science]. The physiology of the nervous system.

Neuroplasia (*nu-ro-pla'-ze-ah*) [νεῦρον, nerve; πλάσσειν, to mold]. The tendency to the formation of neuromata.

Neuroplasm (*nu'-ro-plazm*) [νεῦρον, nerve; πλάσσειν, to mold]. That form of bioplasm exhibited in living brain-tissue.

Neuroplasma of Küpffer (*nu-ro-plaz'-mah*) [νεῦρον, nerve; πλάσμα, a figure formed or molded]. In biology, a fluid lying between the fibrils of the axis-cylinders of medullated nerve-fibers.

Neuroplastin (*nu-ro-plas'-tin*) [νεῦρον, nerve; πλάσσειν, to mold]. A variety of plastin found in the brain and in nerve-tissue.

Neuroplasty (*nu'-ro-plas-te*) [νεῦρον, nerve; πλάσσειν, to mold]. Plastic surgery of the nerves.

Neuroploca (*nu-rop'-lo-kah*) [νεῦρον, nerve; πλοκή, a twisting]. A ganglion of the nervous system.

Neuroploconarcosis (*nu-ro-plo-ko-nar-ko'-sis*) [νεῦρον, nerve; πλοκή, a twining; νάρκωσις, a benumbing]. Insensibility of a ganglion of the nervous system.

Neuropodium (*nu-ro-po'-de-um*) [νεῦρον, a nerve; πόυς, foot: *pl.*, *Neuropodia*]. In biology, one of the ventral foot-stumps of a worm.

Neuropore (*nu'-ro-por*) [νεῦρον, nerve; πόρος, pore]. In biology, a pore between the neural canal and the exterior in certain embryos.

Neuro-prosopalgia (*nu-ro-pros-o-pal'-je-ah*). Synonym of *Prosopalgia*.

Neuro-psychology (*nu-ro-si-kol'-o-je*) [νεῦρον, nerve; ψυχή, mind; λόγος, science]. A system of psychology based upon neurology.

Neuro-psychopathy (*nu-ro-si-kop'-ath-e*) [νεῦρον, nerve; ψυχή, mind; πάθος, disease]. A mental disease based upon, or manifesting itself in, nervous disorders or symptoms.

Neuro-psychosis (*nu-ro-si-ko'-sis*) [νεῦρον, nerve; ψυχή, mind; νόσος, disease]. Any psychosis or mental disorder complicated with a nerve-disease; a nerve-disease manifesting itself in association with some mental disorder; an association of a neurosis and a psychosis.

Neuro-purpuric (*nu-ro-pur-pu'-rik*) [νεῦρον, nerve; *purpura*, purple]. Pertaining to purpura developed in association with disease of the nervous system. **N. Fever.** Synonym of *Cerebro-spinal Fever*.

Neuropyra (*nu-ro-pi'-rah*) [νεῦρον, nerve; πῦρ, fire]. Nervous fever.

Neuropyretic (*nu-ro-pi-ret'-ik*) [νεῦρον, nerve; πῦρ, fever]. Pertaining to *Neuropyra*.

Neuro-retinitis (*nu-ro-ret-in-i'-tis*) [νεῦρον, nerve; *retina*, retina; ιτις, inflammation]. Inflammation of both the optic nerve and the retina.

Neurorrhaphy (*nu-ror'-af-e*) [νεῦρον, nerve; ῥαφή, suture]. The operation of uniting a divided nerve by sutures.

Neurorrheuma (*nu-ror-ru'-mah*) [νεῦρον, nerve; ῥεῦμα, flow]. Nervous force.

Neurosal (*nu-ro'-zal*) [νεῦρον, nerve]. Pertaining to, or of the nature of, a neurosis.

Neuro-scirrhus (*nu-ro-skir'-us*). Synonym of *Neuroma*.

Neuro-sclerosis (*nu-ro-skle-ro'-sis*) [νεῦρον, nerve; σκληρός, hard]. Sclerosis of nervous tissue.

Neurose (*nu'-rōz*) [νεῦρον, nerve]. In biology, nerved.

Neurosis (*nu-ro'-sis*) [νεῦρον, nerve; νόσος, disease]. An abnormal nervous action or an affection of the nerves or nerve-centers of a functional nature. In biology, one of two sets of successive changes incident to all intellectual operations; a change in the physical basis of consciousness. (Huxley.) Cf. *Psychosis*. **N., Acro-,** a neurosis of an extremity. **N., Cutaneous,** a term used to express abnormal functional conditions of the cutaneous nerves. **N., Occupation,** See *N., Professional*. **N., Professional,** one of a class of spasmodic and coördinative disturbances, mainly of functional origin, affecting groups of muscles used in the performance of special movements. **N., Psycho-.** See *Psychoneurosis*. **N., Reflex,** a functional nervous disease whose origin resides in some irritation or part distant from that in which the affection is manifested. Such a neurosis may be succeeded by the development of organic lesions. **N., Spasmodic.** Maudsley's term for *Epilepsy*. **N., Thyro-exophthalmic.** A synonym of *Graves' Disease*. **N., Vascular,** a neurosis of the blood-vessels or of their nerves. **N., Vasomotor,** a neuropathy of the vasomotor nerves.

Neurosism (*nu'-ro-sizm*). Same as *Neurasthenia*.

Neurosity (*nu-ros'-it-e*). A synonym of *Neuricity*.

Neuro-skeletal (*nu-ro-skel'-et-al*) [νεῦρον, nerve; σκελετόν, skeleton]. Pertaining to the neuro-skeleton.

Neuro-skeleton (*nu-ro-skel'-et-on*) [νεῦρον, nerve; σκελετόν, skeleton]. Carus's term for the vertebrate endo-skeleton, or true skeleton; so called from being made up of parts that correspond with and largely serve to protect portions of the central nervous system.

Neurospasmos (*nu-ro-spaz'-mos*) [νεῦρον, nerve; σπασμός, spasm]. Nervous spasm or twitching.

Neurospongium (*nu-ro-spun'-je-um*) [νεῦρον, nerve; σπογγίον, dim. of σπόγγος, sponge]. In biology, a granular matrix in the periopticon of insects' eyes.

Neuro-stearic (*nu-ro-ste-ar'-ik*) [νεῦρον, nerve; στέαρ, fat]. Pertaining to nervous tissue and fat. **N.-s. Acid,** an acid isomeric with stearic acid, occurring in the brain. **N.-s. Ether,** a substance formed by treating phrenosin, an element of brain-tissue, with sulphuric acid and alcohol.

Neurosthenia (*nu-ro-sthe'-ne-ah*) [νεῦρον, nerve; σθένος, power]. Great nervous power, or abnormal excitation of the nervous centers.

Neurostremma (*nu-ro-strem'-ah*) [νεῦρον, nerve; στρέμμα, a twist, or knot: *pl.*, *Neurostremmata*]. A nerve-ganglion.

Neurotabes (*nu-ro-ta'-bēz*) [νεῦρον, nerve; *tabes*, wasting]. A complex of symptoms, resembling those of posterior sclerosis, but due to multiple neuritis. **N., Peripheric Multiple,** peripheral neuritis simulating tabes dorsalis.

Neurothele (*nu-ro-the'-le*) [νεῦρον, nerve; θήλη, nipple]. A nervous papilla.

Neurothelic (*nu-ro-the'-lik*) [νεῦρον, nerve; θήλη, nipple]. Pertaining to a neurothele; applied to the skin considered as the organ of tactile sense.

Neurotherapy (*nu-ro-ther'-ap-e*) [νεῦρον, nerve; θεραπεία, treatment]. The treatment of nervous diseases.

Neurothlipsis (*nu-ro-thlip'-sis*) [νεῦρον, nerve; θλίβειν, to press]. Pressure on a nerve.

Neurotic (*nu-rot'-ik*) [νεῦρον, nerve]. Pertaining to

the nerves; nervous; also, pertaining to neuroses. In therapeutics, neurotics are such drugs as have a special influence upon the nervous centers and functions. **N. Albuminuria,** albuminuria due to nervous disturbance. **N. Atrophy,** atrophy dependent upon changes in some part of the nervous system. **N. Dyspepsia.** See *Dyspepsia.* **N. Fever,** fever following traumatism of the central nervous system. **N. Hypertrophy,** hypertrophy resulting from excessive nutrition or other trophic abnormality.

Neurotome (*nu'-ro-tōm*) [*νεῦρον*, nerve; *τομή*, a cutting]. A small knife for the division of a nerve, especially subcutaneously.

Neurotomy (*nu-rot'-o-me*) [*νεῦρον*, nerve; *τέμνειν*, to cut]. The division of a nerve.

Neuro-toxicology (*nu-ro-toks-ik-ol'-o-je*) [*νεῦρον*, nerve; *τοξικόν*, poison; *λόγος*, science]. The toxicology of the nerves; the science of the nervous disorders of toxic origin.

Neurotripsy (*nu'-ro-trip-se*) [*νεῦρον*, nerve; *τρίβειν*, to rub]. The crushing of a nerve..

Neurotroma (*nu-ro-tro'-mah*) [*νεῦρον*, nerve; *τρῶμα*, wound]. The wound of a nerve.

Neurotrophic (*nu-ro-tro'-fik*) [*νεῦρον*, nerve; *τροφή*, nourishment]. Depending on or attained through the trophic influence exercised by the nerves.

Neurotrophy (*nu-rot'-ro-fe*) [*νεῦρον*, nerve; *τροφή*, nourishment]. The nourishment of a nerve.

Neurotrosis, Neurotrosmus (*nu-rot'-ro-sis, nu-ro-troz'-mus*) [*νεῦρον*, nerve; *τρῶσις*, a wounding]. The wounding of a nerve.

Neuro-varicosis (*nu-ro-var-ik-o'-sis*) [*νεῦρον*, nerve; *varix*, varix]. A varicosity on a nerve-fiber, or the formation of one.

Neurymen (*nu-ri'-men*). Synonym of *Neurilemma.*

Neurymenitis (*nu-ri-men-i'-tis*). Synonym of *Neurilemmatitis.*

Neurypnology (*nu-rip-nol'-o-je*). See *Neurohypnology.*

Neuter (*nu'-ter*) [L.]. Sexually not properly developed; an organism of neither sex.

Neutral (*nu'-tral*) [*neuter*, neither]. Neither alkaline nor acid; bland and soothing; having no active effect upon a tissue. **N. Blue.** See *Pigments, Conspectus of.* **N. Mixture,** liquor potassii citratis. See *Potassium.* **N. Oils.** See *Lubricating Oils.* **N. Red.** See *Toluylene-red,* and *Pigments, Conspectus of.* **N. Violet.** See *Pigments, Conspectus of.*

Neutraline (*nu'-tral-in*) [*neuter*, neither]. A commercial or proprietary name given to a brand of *Petrolatum, q. v.*

Neutralization (*nu-tral-iz-a'-shun*) [*neuter*, neither]. That process or operation that precisely counterbalances or cancels the action of an agent. In medicine, the process of checking the operation of any agent that produces a morbid effect. In chemistry, a change of reaction to that which is neither alkaline nor acid.

Neutralize (*nu'-tral-īz*) [*neuter*, neither]. To render neutral; to render inert.

Neutrophile (*nu'-tro-fil*) [*neuter*, neither; *φίλος*, loving]. Stained readily by neutral dyes; applied to certain bacteria and tissue-elements, especially leukocytes. **N. Leukocytes,** small colorless cells in normal human blood, containing several much-contorted nuclei that are readily stained. The protoplasm of these cells usually contains granules colorable by neutral stains, hence their name. See *Leukocyte.*

Neuwied-green. Same as *Schweinfurth-green.*

Nevoid (*ne'-void*) [*nævus*, birth-mark; *εἶδος*, like]. Resembling a nevus. **N. Elephantiasis.** See *Lymphscrotum.*

Nevose (*ne'-vōz*) [*nævus*, a birth-mark]. Freckled; having nevi.

Nevus, Nævus (*ne'-vus*) [L.: plural *Nevi*]. A mark or blemish due to the dilatation of the blood-vessels near the surface of the skin or within its texture. **N. araneus.** See *Acne rosacea.* **N., Capillary,** one that involves the capillaries of the skin. **N. cerasus,** a slightly elevated vascular nevus resembling somewhat the appearance of a cherry. **N., Cutaneous,** a nevus of the skin. **N. flammeus.** See *N. maternus.* **N. fragarius,** the strawberry mark. **N. lipomatodes,** a large mole, soft and lax, containing a quantity of fat and loose connective tissue. **N. lupus.** See *Angioma serpiginosum.* **N. maternus,** *Mother's mark;* the patch of congenital discoloration of the skin due to a dilated condition of the capillaries. If this is diffuse, very slightly, if at all, raised, red, or purplish-red, and on some part of the face, often involving the whole of one side, it is called *N. flammeus,* or "*port-wine mark.*" This is a relatively common condition. **N. morus,** the mulberry nevus; a vascular nevus somewhat elevated and with an irregular surface. **N. nativus,** birth-mark. **N. neuroticus,** a minor degree of *Ichthyosis hystrix.* **N. papillaris,** a minor degree of *Ichthyosis hystrix.* **N. papillomatosus,** a mole covered with soft, papillary growths. **N. pigmentosus,** *pigmentary mole; nævus verrucosus; nævus sigilum; nævus pilosus; nævus spilus;* a circumscribed, congenital pigmentary deposit in the skin, varying in color from a light-fawn to a blackish tint, and often associated with hypertrophy of the hairs as to number, size, and color-elements. It varies in size from a pinhead discoloration to bean-sized or larger flattened and warty elevations, or it may reach the size of a cocoanut or fetal head. **N. pilaris, N. pilosus.** See *N. pigmentosus.* **N. planus,** a non-elevated pigmentary nevus. **N. sanguineus.** See *N. vascularis.* **N. sigilum.** Synonym of *N. pigmentosus.* **N., Spider.** Synonym of *N. araneus.* **N. spilus.** See *N. pigmentosus.* **N. tuberculosus.** Synonym of *N. verrucosus.* **N., Varicose.** See *N., Venous.* **N. vascularis,** *N. vasculosus; N. sanguineus;* a congenital overgrowth of cutaneous vascular tissue forming the so-called *nevi.* These may be capillary or cutaneous, and venous or subcutaneous. The former vary in size from a mere point up to large areas, standing on a level with the skin or raised more or less above it, of a bright-red color or of a more or less purplish hue. The venous nevus is generally more raised than the capillary; it is convex, smooth, or lobulated, and of a dark-purple color, compressible, but rapidly filling after the compression has been removed. **N. vasculosus.** See *N. vascularis.* **N. verrucosus.** See *N. pigmentosus.* **N., Venous,** a raised, convex, and sometimes lobulated form, consisting of thin-walled veins and sinuses bound together by connective tissue.

New (*nu*) [ME., *newe*, new]. Not old; freshly produced; recent. **N. Blue.** Same as *French Blue.* See *Pigments, Conspectus of.* **N.-born,** a designation applied to the child for a short period after birth. **N. Coccin.** See *Pigments, Conspectus of.* **N. Fast Violet.** Same as *Gallocyanin.* **N.-formation.** See *Neoplasm.* **N. Jersey Tea.** See *Ceanothus.* **N. Red.** Same as *Fuchsin.* **N. Victoria Green.** Same as *Brilliant Green.* **N. White.** See *Pigments, Conspectus of.* **N. Yellow.** Same as *Flavaurin.* **N. Zealand Flax.** See *Flax.*

Newman's Treatment. See *Treatment, Methods of.*

Newton's Color-rings. The colorings produced when a cover-glass is pressed upon the slide. They are the result of chromatic aberration. **N.'s Disc,** a circular

card colored in triangular areas with the colors of the spectrum. On being rapidly revolved it appears white. **N.'s Law.** See *Law*. **N.'s Metal,** a term for *Bismuth*. **N.'s Theory,** the *Emission* theory of light. See *Light*.

Ngai Camphor. A camphor, $C_{10}H_{18}O$, derived from *Blumea balsamifera*, a tree of S. E. Asia.

Niata (*ni-a'-tah*) [deriv. obscure]. A breed of small "bull-dog" oxen, produced by a sudden variation, in South America, between the sixteenth and eighteenth centuries.

Niatism (*ni'-at-izm*) [*niata*, a breed of bull-dog "oxen"]. In biology, a form of sudden variation characterized by dwarfing, at times occurring among animals.

Nibble (*nib'-l*) [LG., *nibbeln*, to nibble]. To gnaw; to eat in small bits.

Nickel (*nik'-el*) [G., *nickel*, nickel]. Ni = 58; quantivalence II, IV. A metal of silver-white luster, resembling iron in physical properties. In 1889 it was asserted by Krauss, of Munich, to be a compound body. It is much used for plating metallic surgical appliances. See *Elements, Table of*. **N. Bromid,** recommended for epilepsy. Dose gr. v–x. **N. Chlorid,** a tonic in anemia. **N. Sulphate,** has been used as a nerve-tonic in tabes dorsalis. Dose gr. iij–v. All unof.

Nicking (*nik'-ing*) [origin obscure]. The incising of a horse's tail near the root, to cause it to be carried higher.

Nickles' Test. See *Tests, Table of*.

Nicol (*nik'-el*) [after William *Nicol*, of Edinburgh]. An abbreviation for Nicol's prism.

Nicol's Prism (*nik-el*) [after William *Nicol*, of Edinburgh]. A polished prism of Iceland spar, cut diagonally across the principal axis, the sections being joined together by means of Canada balsam. It has the property of reflecting the ordinary ray of light out of the field, while the so-called polarized ray is transmitted. See *Prism*.

Nicomorrhuin (*nik-o-mor'-u-in*), $C_{20}H_{28}N_4$. One of the alkaloids of cod-liver oil. See *Morrhuolins*.

Nicotia (*nik-o'-she-ah*). Synonym of *Nicotin*.

Nicotian (*nik-o'-she-an*) [after Jean *Nicot*]. 1. Tobacco. 2. One who uses tobacco. 3. Pertaining to, or derived from, tobacco.

Nicotiana (*nik-o-she-a'-nah*). See *Tabacum*.

Nicotianic Acid (*nik-o-she-an'-ik*). Synonym of *Nicotinic Acid*.

Nicotianin (*nik-o'-she-an-in*) [after Jean *Nicot*, a French ambassador to Portugal]. The solid volatile principle to which tobacco owes its flavor.

Nicotic Acid (*nik-ot'-ik*). Same as *Malonic Acid*.

Nicotin (*nik'-o-tin*) [after Jean *Nicot*, a French Ambassador to Portugal], $C_{10}H_{14}N_2$. A poisonous alkaloid found in the leaves of the tobacco-plant; it may be obtained by distilling the residue from the aqueous extract with lime. It is an oil, readily soluble in water and alcohol. Its odor is very penetrating. It becomes brown on exposure to the air; its specific gravity at 15° C. is 1.011; it boils at 241° C.

Nicotinic Acid (*nik-o-tin'-ik*) [after Jean *Nicot*], $C_6H_5NO_2$. An oxidation-product of nicotin.

Nicotinism (*nik'-o-tin-ism*) [after Jean *Nicot*]. The constitutional effects of the continued or excessive use of tobacco.

Nicotism (*nik'-o-tizm*). Synonym of *Nicotinism*.

Nictating (*nik-ta'-ting*) [*nictare*, to wink]. Winking.

Nictation (*nik-ta'-shun*). Same as *Nictitation*.

Nictitating (*nik'-tit-a-ting*) [*nictitare*, to wink]. Winking. **N. Membrane.** See *Membrane*. **N. Spasm,** blepharospasm.

Nictitation (*nik-tit-a'-shun*) [*nictitare*, to wink]. Abnormal frequency of winking.

Nidamentum (*nid-am-en'-tum*) [*nidus*, nest]. The decidua; also any covering of the developing ovum; an egg-case.

Nidation (*ni-da'-shun*) [*nidus*, nest]. The development of an endometrial epithelium in an inter-menstrual period.

Nidulant (*nid'-u-lant*) [*nidulari*, to build a nest]. In biology, lying loose in a nest-like receptacle or pulp, like the seeds or sporangia of certain plants.

Nidularium (*nid-u-la'-re-um*) [dim. of *nidus*, nest]. The mycelium of fungi.

Nidus (*ni'-dus*) [L., nest]. 1. A central point or focus of infection; a place in which an organism finds conditions suitable for growth and development. 2. A collection of ganglion-cells at the deep origin of a cranial nerve; a nucleus. **N. hirundinis,** a deep fossa in the cerebellum situated between the velum medullare posterius in front, and the nodulus and uvula behind.

Niemeyer's Pill. A pill of quinin, grain 1, digitalis, grain one-half, and opium, grain one-quarter. It is used in pulmonary tuberculosis, and is taken every six hours.

Niepa (*ne'-pah*) [E. Ind.]. The bark of *Samadera indica*, a simarubaceous tree of S. Asia; it is intensely bitter, and a good tonic. Unof.

Nigella (*ni-jel'-ah*) [*nigellus*, dark]. A ranunculaceous genus of plants represented by several species having medicinal properties. **N. sativa,** fennel-flower, is diaphoretic and emmenagogue. Unof.

Nigellin (*ni-jel'-in*) [*nigellus*, dark]. A bitter extractive of *Nigella sativa*.

Niggl's Test. See *Tests, Table of*.

Night (*nīt*) [ME., *night*, night]. The portion of the day during which the sun is below the horizon. **N.-blindness.** See *Hemeralopia*. **N.-blooming Cereus,** the flowers of *Cereus grandiflorus*, a sedative and diuretic plant, useful in functional ailments of the heart, palpitation and angina pectoris. Dose of the fld. ext. (alcoholic) ♏x–xxx. Unof. **N. Blue.** See *Pigments, Conspectus of*. **N.-cries,** a symptom of nervous or physical disorders of children, and especially of the early stage of hip-disease. The child cries out in its sleep from pain produced by reflex spasmodic twitching of the muscles already abnormally irritable. **N. Green.** See *Pigments, Conspectus of*. **N.-mare,** a feeling of distress or suffocation during sleep, attended with fright, hideous dreams and often with inability to stimulate muscular contraction except in a very slight degree. **N.-pain,** a symptom of hip-disease; pain in the hip or knee occurring during muscular relaxation of the limb in sleep. **N.-palsy,** a nervous manifestation of no especial significance, consisting simply of a feeling of numbness in one or more extremities of the body when the sleeping patient awakes; the so-called "*dead fingers*." It principally attacks women at the menopause. **N.-shade,** a popular name for plants of the genus *Solanum*, and also the genus *Atropa*. **N.-shade, Bittersweet.** See *Solanum dulcamara*. **N.-shade, Deadly.** See *Atropa belladonna*. **N.-sight.** Synonym of *Nyctalopia*. **N.-soil,** the contents of privy-vaults (often removed in the night). This material is largely employed as manure. **N.-soil Fever,** a synonym of *Typhoid Fever*. **N.-starting,** a jerking of the lower extremity occurring at night in children with hip-disease. **N.-sweat,** the profuse nocturnal sweating often observed in pulmonary tuberculosis and other wasting disorders. **N.-terrors,** *Pavor nocturnus; consternatio;* a sudden terror that attacks young

children during sleep. **N.-walker,** a somnambulist. **N.-walking,** somnambulism.

Nightingale (*nīt'-in-gāl*) [after Florence *Nightingale*]. A sleeved scarf used in the hospital-treatment of the sick and wounded, to protect the shoulders and parts liable to become uncovered in bed.

Nigredo (*ni-gre'-do*) [*niger*, black]. A black color; melasma. **N. a sole,** *sunburn*. **N. nativa,** a natural dark coloring of the skin. **N. necrotica,** the blackness of parts that are becoming gangrenous. **N. sordida,** dark pigmentation from dirt.

Nigrescent (*ni-gres'-ent*) [*nigrescere*, to become black]. Turning black; blackish, dusky.

Nigric Acid (*ni'-grik*) [*niger*, black], $C_7H_8O_4$. A black powder obtained when ethyl oxalate is treated with potassium.

Nigricant (*ni'-grik-ant*). Same as *Nigrescent*.

Nigrismus (*ni-griz'-mus*) [L.]. Synonym of *Nigredo*. **N. linguæ,** black tongue.

Nigritia, Nigrities (*ni-grish'-e-ah, ni'-grit-ēz*). Same as *Nigrismus*, and *Glossophytia*.

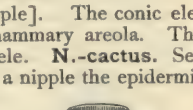
Nigritudo (*nig-rit-u'-do*). Synonym of *Melanosis*.

Nigrosin (*ni'-gro-sin*) [*niger*, black]. A blue-black anilin-dye, useful in staining sections of brain-tissue. For the nigrosins see *Indulins*. See also *Pigments, Conspectus of*.

Nile-blue (*nil'-blu*). See *Pigments, Conspectus of*.

Nine (*nin*) [ME., *nine*, nine]. Thrice three. **N.-bark.** 1. The plant *Neillia opulifolia*, of N. America; it is astringent, tonic, and vulnerary. Unof. 2. The same as *Seven-bark*. **N.-day Fits.** Synonym of *Tetanus neonatorum*.

Niobium (*ni-o'-be-um*) [Νιόβη, the daughter of Tantalus]. A rare metal, akin to bismuth and to antimony; symbol Nb; atomic weight 94. It is also known as *Columbium*. Its medicinal properties are little known. See *Elements, Table of*.



Niphablepsia (*nif-ab-lep'-se-ah*) [*νίφα*, snow; *ἀβλεψία*, blindness]. See *Snow-blindness*.

Niphlotyphlotes (*nif-lo-tif-lo'-tēz*) [*νίφα*, snow; *τυφλώτης*, blindness]. Snow-blindness.

Niphotyphlosis (*nif-o-tif-lo'-sis*) [*νίφα*, snow; *τύφλωσις*. blindness]. Snow-blindness.

Nippers (*nip'-erz*) [ME., *nippen*, to nip]. An instrument for seizing small bodies. **N., Bone,** an instrument for grasping small bits of bone.

Nipple (*nip'-l*) [ME., *neple*, nipple]. The conic elevation in the center of the mammary areola. The mammilla, acromastium, or thele. **N.-cactus.** See *Mammillaria*. **N., Cracked,** a nipple the epidermis of which is broken in places. **N.-line,** in physical diagnosis, a vertical line drawn on the surface of the chest through the nipple. **N.-protector,** a device worn by nursing women to protect the nipple. It is called also a *Nipple-shield*. **N., Retracted,** a nipple drawn below the surrounding level. **N.-shield.** See *N.-protector*.

NIPPLE-PROTECTOR. (*From Fullerton's "Obst. Nursing".*)

Nirls, Nirles (*nerlz*) [origin obscure]. A variety of herpes.

Nirlus (*nir'-lus*) [origin obscure]. An ephemeral papular eruption sometimes following measles or scarlet fever.

Nisbet's Chancre. A lymphatic abscess on the dorsum of the penis proceeding to the formation of a chancre.

Nisus (*ni'-sus*) [*nisus*, effort, from *niti*, to endeavor]. The periodic desire for procreation manifested in the spring season by certain species of animals. Also, the contraction of the diaphragm and abdominal muscles, for the expulsion of the feces or the urine. **N.-formations, Blumenbach's,** the force of an aggregate organism which constrains the newly-integrated atoms to take a definite form; the "*spiritus rector*." According to Weismann, this is located in an "accessory idioplasm," consisting of the determinants of the parts to be regenerated.

Nit [ME., *nitte*, a nit]. A popular name for the larva of several species of *pediculus;* during incubation it is attached to the hair.

Niter (*ni'-ter*) [*νίτρον*, natron]. Potassium nitrate. **N., Cubic,** Sodium nitrate. **N., Spirit of,** *Spiritus ætheris nitrosi*, sweet spirit of niter.

Nitid (*nit'-id*) [*nitere*. to shine]. Shining.

Nitidous (*nit'-id-us*) [*nitidus*, shining]. Same as *Nitid*.

Nitor (*ni'-tor*) [*nitere*, to shine]. Synonym of *Enamel*.

Nitrate (*ni'-trāt*) [*νίτρον*, natron]. Any salt of nitric acid. All nitrates are soluble in water. **N. Test Reagent.** See *Acid Phenyl Sulphate*.

Nitrated (*ni'-tra-ted*) [*νίτρον*, natron]. Combined with nitric acid.

Nitration (*ni-tra'-shun*) [*νίτρον*, natron]. The process of combining or treating with nitric acid.

Nitre (*ni'-ter*). See *Niter*.

Nitric (*ni'-trik*) [*νίτρον*, natron]. Pertaining to or containing niter. **N. Acid.** See *Acid, Nitric*. **N. Acid Test.** See *Tests, Table of*. **N. Magnesian Reagent.** See *Roberts' Reagent*.

Nitrification (*ni-trif-ik-a'-shun*) [*νίτρον*, natron; *ficare* (*facere*), to make]. In biology, the oxidation of the nitrogen of organic matter by means of microörganisms. Cf. *Bacterioid*, and *Nitrifying Bacillus of Winogradsky*, under *Bacteria, Synonymatic Table of*.

Nitrify (*nīt'-rif-i*) [*νίτρον*, natron; *facere*, to make]. To convert into niter.

Nitriles (*ni'-trils*) [*νίτρον*, natron]. Those derivatives of the alcoholic radicles with the cyanogen group, CN, in which the fourth affinity of carbon is limited to the alcohol radicles. They are liquids usually insoluble in water, possessing an ethereal odor, and readily decomposed on heating with acids or alkalies.

Nitrite (*ni'-trīt*) [*νίτρον*, natron]. A salt of nitrous acid, HNO_2. Also applied to certain combinations with organic radicles, as nitroglycerin, $C_2H_5(NO_2)_3$, nitrobenzol, amylic nitrite, and other compounds. **N., Amyl,** $C_5H_{11}NO_2$, possesses a fruity odor. Inhaled it causes tumultuous action of the heart and a slowing of the respiration. It is useful in angina pectoris, asthma, and occasionally in sea-sickness. Dose, internally, ♏¼–j, dissolved in alcohol; by inhalation, ♏ij–v. **N., Ethyl,** $C_2H_5NO_2$, used to make sweet spirit of niter. **N., Sodium,** $NaNO_2$, acts like amyl nitrite, but is less prompt. It is employed in desquamative nephritis when accompanied by weak action of the heart. Dose, gr. ½–v.

Nitro- (*ni'-tro-*) [*νίτρον*, natron]. A prefix denoting combination with nitrogen. Also, denoting combination with the radicle NO_2. **N.-amins,** a group of chemic compounds containing the nitro-group in union with nitrogen. **N.-bacteria,** a term given by Winogradsky to those bacteria that convert ammonia into nitrous and nitric acids. **N.-benzene** ($C_6H_5NO_2$), *Nitrobenzol;* a liquid prepared by adding benzol drop by drop to HNO_3. It closely resembles oil of bitter almonds in flavor, and is important as a source of anilin in the manufacture of dyes. It is actively poisonous, with the general effects of hydrocyanic acid. **N.-benzol.** See *N.-benzene*. **N.-benzol-red.** Same as *Nitranilin*. **N.-cellulin, N.-cellulose,** a substitution compound of cellulose, NO_2 replacing H. *Mononitrocellulose*, $C_6H_9(NO_2)O_5$; *Dinitrocellulose*, $C_6H_8(NO_2)_2O_5$; or *pyroxylin; Trinitrocellulose*, $C_6H_7(NO_2)_3O_5$, or gun-

cotton. **N.-compound,** a carbon compound that is formed from another by the substitution of the monatomic radicle NO_2 for hydrogen, and in which the nitrogen atom is regarded as directly joined to a carbon atom.

Nitroform (*ni'-tro-form*) [*νίτρον*, natron; *forma*, form], $CH(NO_2)_3$. An oily acid compound, chemically analogous to chloroform. It is usually obtained by treating biliary acids with nitric acid.

Nitrogen (*ni'-tro-jen*) [*νίτρον*, natron; *γεννᾶν*, to beget]. N = 14; quantivalence I, III, V. One of the non-metallic elements, gaseous at ordinary temperatures. It is a component element of albumins, proteids, urea, and other organic substances, of alkaloids, ammonia, and its derivatives, and many other inorganic substances. It forms about 79 per cent. of the air, and is most active in combination with oxygen. The French call it *azote*. The salts of nitric acid are called *nitrates*, those of nitrous acid *nitrites*. See *Elements, Table of*. A description of various methods for detecting nitrogen is appended: **Kjeldahl's Method**; the substance is dissolved by heating it with concentrated sulphuric acid. Potassium permanganate (pulverized, or dissolved in sulphuric acid) is then added until a distinctly green color appears. The liquid is diluted with water and the ammonia is expelled by boiling with sodium hydroxid. **Limprecht's Method,** a method of determining the nitrogen of nitro-compounds and nitroso-compounds indirectly by means of a titrated solution of stannous chlorid. **Will and Varrentrap's Method**; two parts of calcium hydrate are added to one part of an aqueous solution of pure sodium hydroxid; the mixture is evaporated and gently ignited. The weighed, finely-pulverized substance is mixed with soda-lime (about ten parts) and the mixture is placed in a combustion-tube, about 30 cm. long, which is filled in with soda-lime. In the open extremity of the tube is placed a rubber stopper bearing a bulb-apparatus containing dilute hydrochloric acid. The anterior portion of the bulb is first heated in the furnace; then, that containing the mixture. That all of the ammonia may be carried into the bulb, air is conducted through the tube, after breaking off the point. The ammonium chlorid in the hydrochloric acid is precipitated as ammonio-platinum chlorid by means of platinic chlorid, and the residual platinum is weighed. One atom of platinum corresponds to two molecules of NH_3 or two atoms of nitrogen. **N., Gaseous Oxid of.** See *Nitrous Oxid*.

Nitrogenized (*ni-troj'-en-izd*) [*νίτρον*, natron; *γεννᾶν*, to produce]. Containing nitrogen.

Nitrogenous (*ni-troj'-en-us*) [*νίτρον*, natron; *γεννᾶν*, to produce]. Containing nitrogen.

Nitroglycerin (*ni-tro-glis'-er-in*) [*νίτρον*, natron; *γλυκύς*, sweet], $C_3H_5N_3O_9$. *Glonoin, Trinitrin, Trinitrite of Glyceryl; Glycerol Nitric Ester;* a substance produced by the action of a mixture of sulphuric and nitric acids upon glycerol. It is a colorless oil, with a sweet taste, and is poisonous when taken internally. It is insoluble in water. Heated quickly, or upon percussion, it explodes very violently. Mixed with *Kieselguhr* it forms dynamite. Therapeutically, it acts like amyl nitrite. Dose gr. $\frac{1}{200}$–$\frac{1}{50}$. Dose of the tincture, one per cent. in alcohol, ♏ ½–x. **N., Liquor** (B.P.), contains pure nitroglycerin one part by weight, rectified spirit *q. s.* to produce 100 fluid parts. Dose ♏ ½–ij. **N., Tabellæ** (B.P.), tablets of chocolate each containing gr. $\frac{1}{100}$ of pure nitroglycerin. Dose j–ij. **Spiritus glonoini** (spirit of nitroglycerin); an alcoholic solution containing one per cent. by weight of glonoin.

Nitroleum (*ni-tro'-le-um*). Synonym of *Nitroglycerin*.

Nitrolin (*ni'-tro-lin*) [*νίτρον*, natron; *oleum*, oil]. An explosive compound consisting of a mixture of cellulose, niter, and nitrosaccharose.

Nitrometer (*ni-trom'-et-er*) [*νίτρον*, natron; *μέτρον*, measure]. An apparatus for collecting and measuring nitrogen gas, or for decomposing nitrogen oxids and estimating the resulting gases.

Nitromuriatic Acid (*ni-tro-mu-re-at'-ik*). See *Acid, Nitrohydrochloric*.

Nitrosaccharose (*ni-tro-sak'-ar-ōz*) [*νίτρον*, natron; *σάκχαρον*, sugar]. An unstable, resinous, explosive compound produced by treating saccharose with nitric acid.

Nitrosate (*ni'-tro-sāt*) [*νίτρον*, natron]. One of a class of carbon compounds resulting from the action of nitrogen tetroxid upon the alkylenes.

Nitroso- (*ni-tro'-so-*) [*νίτρον*, natron]. In chemistry, a prefix signifying combination with nitrosyl, the univalent compound radicle, NO. **N.-amins,** a class of nitroso-compounds in which the nitroso-group is linked to nitrogen. They are mostly oily, yellow liquids, insoluble in water, and may be distilled without suffering decomposition. **N.-compounds,** a class of chemic compounds containing the group NO attached to carbon. **N.-phenol.** See *Quinoxim*.

Nitrous (*ni'-trus*) [*νίτρον*, natron]. In chemistry, pertaining to or derived from niter. *Nitrous* compounds contain less oxygen than do *nitric* compounds. **N. Acid.** See *Acid, Nitrous*. **N. Ether,** $C_2H_5NO_2$; a very volatile liquid, with properties very similar to those of amyl nitrite. **N. Oxid,** *Laughing gas;* a gaseous compound, having the structure N_2O_2. Inhaled, it produces cerebral excitement, followed by anesthesia. It is much used in dentistry. *See Anesthetic*.

Nival (*ni'-val*) [*nivalis*, snowy]. Living in or near snow.

Njinio-wood [African]. A remedy used in West Africa in the treatment of gastric pains and loss of appetite. Its effects are similar to those of coca. Unof.

Noasthenia (*no-as-the'-ne-ah*) [*νόος*, mind; *ἀσθένεια*, weakness]. Mental feebleness.

Nocard, Bacillus of. See *Bacteria, Synonymatic Table of*.

Nocarodes (*no-kar-o'-dēz*) [*νῶκαρ*, lethargy; *εἶδος*, like]. Lethargic.

Nocent (*no'-sent*) [*nocens*, from *nocere*, to harm]. Harmful; injurious.

Noctambulation (*nok-tam-bu-la'-shun*) [*noctambulatio; nox*, night; *ambulare*, to walk]. Same as *Somnambulism*.

Noctambulatory (*nok-tam'-bu-la-tor-e*) [*nox*, night; *ambulare*, to walk]. In biology, wandering at night, as many predatory mammals.

Noctambulism (*nok-tam'-bu-lizm*). See *Somnambulism*.

Noctidial (*nok-tid'-e-al*) [*nox*, night; *dies*, day]. Lasting for a day and a night, or for twenty-four hours.

Noctisurgium (*nok-tis-ur'-je-um*). Synonym of *Somnambulism*.

Nocturnal (*nok-tur'-nal*) [*nocturnus*, of the night]. Pertaining to the night-time. **N. Blindness.** See *Hemeralopia*. **N. Crisis,** the nightly exacerbation of symptoms. **N. Emission** and **N. Pollution.** See *Spermatorrhea*. **N. Enuresis,** incontinence of urine at night during sleep. **N. Epilepsy,** epilepsy in which the convulsions occur at night. **N. Sight.** Same as *Hemeralopia*.

Nocuity (*nok-u'-it-e*) [*nocuus*, injurious]. Injuriousness; harmfulness; the quality of being noxious.

Nocuous (*nok'-u-us*) [*nocuus*, injurious]. Noxious; hurtful; venomous. **N. Meat,** meat from animals

affected with diseases that may be transmitted to man.

Nod [ME., *nodden*, to shake]. 1. To drop the head forward with a quick, involuntary motion. 2. The motion so made.

Nodal (*no'-del*) [*nodus*, a node]. Nodated; pertaining to a node. **N. Point**, the point of intersection of convergent rays of light with the visual axis of the eye. The *First N. P.* is 6.9685 mm. behind the summit of the cornea. The *Second N. P.* is 7.3254 mm. behind the summit of the cornea, or 0.1254 mm. behind the lens.

Nodated (*no-da'-ted*) [*nodus*, a node]. Knotted; having nodes.

Nodding (*nod'-ing*) [ME., *nodden*, to shake]. 1. The act of inclining the head forward. 2. Having a drooping position, as a flower-head. **N. Spasm**, spasmus nutans; salaam convulsions. See *Eclampsia nutans*.

Node (*nōd*) [*nodus*, a swelling, or node]. A knot or protuberance; an oblong, indurated swelling or tumor that forms upon bones in some forms of periostitis and osteitis. **Ns., Heberden's**, overgrowths of the natural tubercles of the digital phalangeal bones in rheumatoid arthritis. **Ns., Parrot's**, bosses of bone on the outer table of the skull, the result of syphilitic periostitis. **Ns., Ranvier's**, certain constrictions occurring in the course of medullated nerve-fibers, so that the sheath of Schwann lies upon the axis-cylinder. The part of the nerve between the nodes is called an interannular or internodal segment. See *Nerve-fiber*. **Ns., Schmidt's**, a term for the medullated interannular segments of a nerve-fiber. **N., Syphilitic**, the localized swellings on bones due to syphilitic periostitis.

Nodicorn (*nod'-ik-orn*) [*nodus*, a knot; *cornu*, a horn]. In biology, having nodose antennæ.

Nodiferous [*no-dif'-er-us*) [*nodus*, a node; *ferre*, to bear]. In biology, bearing nodes.

Nodose (*no'-dos*) [*nodus*, node]. Characterized by nodes or nodosities; jointed or swollen at intervals.

Nodosis (*no-do'-sis*) [*nodus*, node]. The condition of having or forming nodes.

Nodosity (*no-dos'-it-e*). See *Node*. **N., Bouchard's**, a nodose condition of the second joints of the fingers, supposed to be indicative of gastrectasis. See *Signs and Symptoms, Table of*.

Nodous (*no'-dus*) [νωδός, from νη, negative; ὀδούς, tooth]. Toothless.

Nodular (*nod'-u-lar*). Synonym of *Nodose*.

Nodule (*nod'-ūl*) [*nodulus*, dim. of *nodus*, a node]. A little knot or excrescence; a tubercle; in dermatology, an elevation of the skin varying in size from a split pea to a hazelnut, and due to a cellular infiltration (*granuloma* of Virchow). **N. of Aurantius**. See *Corpus*. **N. of Cerebellum**, the termination of the inferior vermiform process of the cerebellum situated in front of the uvula. **N. of Morgagni**. Same as *N. of Aurantius*.

Noduliferous (*nod-u-lif'-er-us*) [*nodulus*, a little knot; *ferre*, to bear]. Having nodules.

Noduliform (*nod-u'-lif-orm*) [*nodulus*, a little knot; *forma*, form]. In the form of a nodule.

Nodulo-dermitis (*nod'-u-lo-der-mi'-tis*) [*nodulus*, small node; δέρμα, skin; ιτις, inflammation]. An inflammatory nodular skin-affection, such as Madura foot, leprosy, and other skin-diseases.

Nodulose, Nodulous (*nod'-u-lōs, nod'-u-lus*) [*nodulus*, a little node]. In biology, having little knobs.

Nodulus (*nod'-u-lus*) [L.: *pl.*, *Noduli*]. 1. See *Nodule*. 2. The nodule of the cerebellum. **N. hystericus**. Same as *Globus hystericus*. **Noduli albini**, a term given to certain small pathologic knots occasionally found on the free border of the auriculoventricular valves.

Nodus (*no'-dus*) [L.: *pl.*, *Nodi*]. See *Node*.

Noeggerath's Method. See *Treatment, Methods of*.

Noematachograph (*no-e-mat-ak'-o-graf*) [νόημα, thought; ταχύς, swift; γράφειν, to write]. An instrument for recording the time of mental operations.

Noematachometer. Same as *Noematachograph*.

Nœud vital (*nu(r)d-ve-tahl'*) [Fr.]. See *Center, Respiratory*.

Noisome (*noi'-sum*) [ME., *noysome*, hurtful]. Hurtful; noxious.

Noli-me-tangere (*no'-li-me-tan'-jer-e*) [L.]. 1. See *Rodent Ulcer*. 2. *Ecballium officinarum*, the squirting cucumber. 3. *Impatiens noli-me-tangere*, the touch-me-not, an animal of the Balsam family.

Noma (*no'-mah*) [νομή; νεμείν, to eat]. Synonyms: Cancrum oris, Gangræna oris, Gangrenous stomatitis. A grave form of stomatitis, gangrenous in type, and either secondary to ulcerative stomatitis or primary. The process is rapidly progressive, usually fatal, but recovery with great deformity of the face may occur. It is most common between the second and twelfth years. The disease is probably due to microörganisms; many have been found, but their relations have not been determined.

Nomarthral (*nom-ar'-thral*) [νόμος, law; ἄρθρον, a joint]. In biology, normally articulated or jointed; the opposite of *xenarthral*.

Nome (*no'-me*). Same as *Noma*.

Nomenclature (*no-men'-kla-tūr*) [*nomen*, a name; *calare*, to call]. A systematic application and arrangement of the distinctive names employed in any science. Cf. *Onym, Onymy*.

Nomogeny (*no-moj'-en-e*) [νόμος, law; γενής, producing]. In biology, Richard Owen's term for the origin of life through the operation of existing natural law.

Nomology (*no-mol'-o-je*) [νόμος, law; λόγος, science]. In biology, that department of botany devoted to a study of the laws of variation.

Nomopelmous (*nom-o-pel'-mus*) [νόμος, law; πέλμα, sole]. In biology, applied to birds having the normal arrangement of the flexor tendons of the foot. Cf. *antiopelmous, heteropelmous, schizopelmous, sympelmous*.

Non- [*non*, not]. A prefix denoting negation. **N. compos mentis** [L.]. A legal term denoting an acquired unsoundness of mind, of such character that one is incapable of conducting his own affairs.

Nona (*no'-nah*) [L.]. A name given in Italy, Bavaria, and Russia to a supposed new disease, which, however, in all probability is not new, but is typhoid fever with coma, a severe influenza, or a grave form of smallpox.

Non-access (*non-ak'-ses*) [*non*, not; *accessus*, an approach]. In medical jurisprudence, the failure to cohabit. The reverse of *access*, *q. v.* A child born under such circumstances is a bastard.

Non-achromatic (*non-ak-ro-mat'-ik*). See *Objective*.

Non-adjustable (*non-ad-jus'-ta-bl*). See *Objective*.

Nonan (*no'-nan*) [*nonus*, ninth]. Applied to a fever that has an exacerbation every ninth day.

Nondecatoic Acid (*non-dek-at-o'-ik*) [*nonus*, ninth; δέκα, ten], $C_{19}H_{38}O_2$. A monobasic acid, the nineteenth member of the fatty acid series.

Non-electric (*non-e-lek'-trik*) [*non*, not; ἤλεκτρον, amber]. A term applied to those substances that permit electricity excited in them by friction to escape as fast as it is formed.

Non-identist (*non-i-den'-tist*) [*non*, not; *identicus*, the same]. A designation applied to a person who believes in the non-identity of certain diseases, such as

typhus and typhoid, chancre and chancroid, membranous croup and laryngeal diphtheria.

Non-medullated (*non-med'-ul-la-ted*) [*non*, not; *medulla*, marrow]. Without marrow. **N.-m. Nerve-fibers.** See *Nerve-fiber*.

Non-motile (*non-mo'-til*) [*non*, not; *motilis*, moving]. Not having the power of spontaneous motion.

Non-naturals, The Six. In the old hygiene, this term designated air, food, exercise, sleep, secretion (and excretion), and mental activity.

Nonose (*non'-ōz*) [*nonus*, nine]. One of a group of the glucoses, with the formula $C_9H_{18}O_9$. See *Carbohydrates, Table of*.

Non-parous (*non-par'-us*). Same as *Nulliparous*.

Non-restraint (*non-re-strānt'*) [*non*, not; Fr., *restraindre*, to restrain]. The treatment of insanity without any possible means of compulsion.

Non-sexual (*non-seks'-u-al*) [*non*, not; *sexus*, sex]. Same as *Asexual*.

Noölogy (*no-ol'-o-je*) [*νόος*, mind; *λόγος*, science]. The science of mind, including that of mental disorders.

Noösphales (*no-os'-fal-ēz*) [*νόος*, mind; *φάλλειν*, to overthrow]. Demented.

Noösteresis (*no-os-ter-e'-sis*) [*νόος*, mind; *στέρησις*, privation]. Dementia; loss of reason.

Nooth's Apparatus. An apparatus for saturating water with carbon dioxid; it consists of three glass vessels united by tubes. The gas is generated in the first, washed in the next, and stored in the third.

Norm [*norma*, a rule]. Standard.

Norma (*nor'-mah*) [L., a measure]. In anatomy, a view or aspect—essentially of the skull. **N. basilaris**, a view or aspect of the skull looking toward the inferior aspect. **N. facialis**, the aspect looking toward the face. **N. lateralis**, the aspect looking toward either half; a profile view. **N. occipitalis**, the aspect looking toward the back of the skull. **N. verticalis**, the aspect viewed from above, or that directed toward the top of the skull.

Normal (*nor'-mal*) [*norma*, rule]. Conforming to natural order or law. **N. Position**, the typical position to which all vertebrates, especially, are most easily referred for comparison. In it the body axis is straight, the limbs project directly to the right and left; the radius and ulna, tibia and fibula, are parallel with the thumb and great toe on the cephalic (upper) aspect or edge. **N. Salt Solution** or **N. Saline Solution**, an aqueous solution of sodium chlorid of a strength similar to that of the body-fluids—usually 0.6–0.75 per cent. **N.-sightedness.** See *Emmetropia*. **N. Solution**, in chemistry a solution of a salt or an acid containing in 1000 grains of the solvent a quantity of the salt or acid equal in grams to the molecular weight. A *decinormal* solution is one of one-tenth the strength, and a *centinormal* solution one of one-hundredth the strength of the normal solution. **N. Structure**, in organic chemistry, the union of carbon atoms in a simple, open chain.

Normality (*nor-mal'-it-e*) [*norma*, rule]. Normal quality; the normal state.

Normalization (*nor-mal-iz-a'-shun*) [*norma*, rule]. In biology, a term used to include all processes by which modified or morphologically abnormal forms and relations may be reduced, either actually or ideally, to their known primitive and presumed normal conditions.

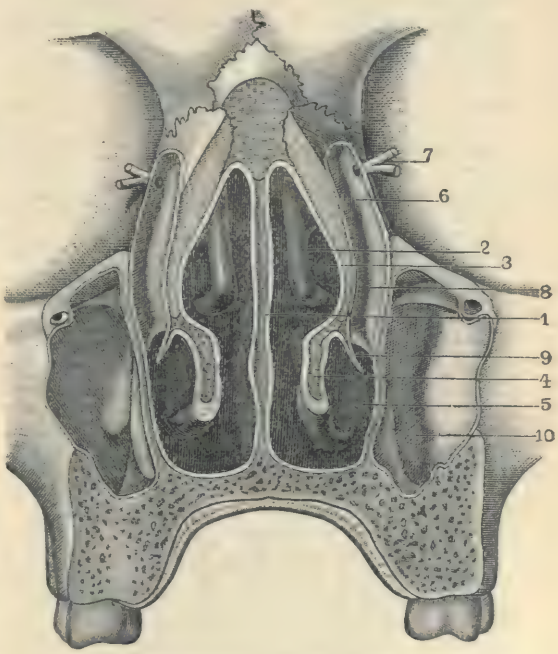
Normandy Colic. See *Colic*.

Normoblast (*nor'-mo-blast*). See *Corpuscle*.

Noropianic Acid (*nor-o-pe-an'-ik*). See *Acid*.

Norris's Invisible Corpuscles. See *Corpuscle*.

Norton's Abyssinian Tube-well. A tube or tubes driven into the soil, tapping the subsoil water.



Norway Itch. See *Itch, Norway*. **N. Spruce.** See *Abies*.

Norwegian Itch. A variety of aggravated scabies seen mainly in lepers. See *Itch, Norway*.

Nosacerus (*nōz-as'-er-us*) [*νοσακερός*, from *νόσος*, illness]. Diseased.

Nosazontology (*nos-az-on-tol'-o-je*) [*νοσάζεσθαι*, to fall ill; *λόγος*, science]. The science of the etiology of diseases.

Nose (*nōz*) [ME., *nose*, nose]. The special organ of the sense of smell. It is also associated in the performance of phonation and respiration. The anterior or external entrance is termed the anterior nares, and comprises the nostrils. It is lined throughout by a delicate mucosa termed the Schneiderian membrane, in the upper portion of which the terminations of the olfactory nerves are distributed. **N.-bleed.** See *Epistaxis*. **N., Bottle**, an hypertrophied condition of the nose with a varicose condition of its veins, usually associated with alcoholism. **N.-brain**, the olfactory lobes of the brain; the rhinencephalon.

TRANSVERSE SECTION OF THE NASAL FOSSÆ.

1. Nasal septum. 2. Anterior extremity of middle turbinated bone. 3. Middle meatus. 4. Section of inferior turbinated bone. 5. Inferior meatus. 6. Lacrymal canal. 7. Canaliculi. 8. Nasal canal. 9. Section of reflected mucous membrane. 10. Maxillary sinus or antrum of Highmore.

N., Bridge of, the prominence formed by the junction of the nasal bones. **N.-cavities**, the nasal fossæ. **N.-cough**, a reflex trigeminal cough due to irritation of the nasal mucosa. **N.-glasses**, eye-glasses held on the nose by a spring; a pince-nez. **N.-hole**, a nostril. **N.-piece**, a mechanical device to be attached to a microscope for holding two, three, or four objectives. It is screwed into the object-end of the tube of the microscope. **N., Tench's**, a name for the external os uteri. **N.-truss**, an instrument for keeping the nasal bones in place after dislocation. **N., Wings of**, the bulging borders of the nostril, formed by folds of skin enclosing adipose and fibro-connective tissue.

Nosegay, Riolan's. The entire group of muscles arising from the styloid process of the temporal bone.

Noselia (*nos-e'-li-ah*) [νοσηλεύειν, to attend the sick]. Nursing of the sick.

Nosema (*nos-e'-mah*) [νόσημα]. Illness, disease. Also a genus of *Schizomycetes*.

Nosencephalon (*nos-en-sef'-al-on*). See *Notencephalus*.

Nosencephalus (*nos-en-sef'-al-us*). Same as *Notencephalus*.

Nosephorous (*nos-ef'-or-us*) [νόσος, disease; φορός, bearing]. Producing disease.

Nosesesthesia (*nos-es-es-the'-ze-ah*) [νοσηρος, diseased; αἴσθησις, perception]. Perverted sensibility.

Nosistoria (*nos-is-to'-re-ah*) [νόσος, disease; ἱστορία, history]. The history of disease or of a disease.

Nosocephalus (*no-so-sef'-al-us*). See *Notencephalus*.

Nosocome (*nos'-o-kōm*). Same as *Nosocomium*.

Nosocomial (*nos-o-ko'-me-al*) [νόσος, disease; κομεῖν, to take care of]. Pertaining to a hospital, or a nosocomium. **N. Gangrene.** Synonym of hospital gangrene.

Nosocomium (*nos-o-ko'-me-um*)[νόσος, disease; κομεῖν, to take care of]. A place designed for the care of the sick. A hospital.

Nosocratic (*nos-o-krat'-ik*) [νόσος, illness; κρατεῖν, to be strong]. Specific (applied to disease).

Nosode (*nos'-ōd*) [νοσώδης, like a disease]. A homeopathic or isopathic remedy.

Nosodochium (*nos-o-do'-ke-um*). Synonym of *Nosocomium*.

Nosogenesis (*nos-o-jen'-es-is*). Synonym of *Nosogeny*.

Nosogenetic (*nos-o-jen-et'-ik*) [νόσος, disease; γένεσις, genesis]. Pertaining to nosogenesis.

Nosogeny (*nos-oj'-en-e*) [νόσος, disease; γεννᾶν, to beget]. The development and progress of diseases.

Nosographic (*nos-o-graf'-ik*) [νόσος, disease; γράφειν, to write]. Pertaining to nosography.

Nosography (*nos-og'-ra-fe*) [νόσος, disease; γράφειν, to write]. A descriptive treatise on the character and nature of diseases.

Nosologic (*nos-o-log'-ik*) [νόσος, disease; λόγος, science]. Pertaining to nosology.

Nosologist (*nos-ol'-o-jist*) [νόσος, disease; λόγος, science]. One versed in nosology.

Nosology (*nos-ol'-o-je*) [νόσος, disease; λόγος, science]. The scientific classification of diseases.

Nosomania (*nos-o-ma'-ne-ah*) [νόσος, disease; μανία, mania]. The insane or hypochondriac delusion of a patient that he is suffering from some disease, from which, in point of fact, he may not be entirely free.

Nosomycosis (*nos-o-mi-ko'-sis*) [νόσος, disease; μύκης, fungus]. Any disease due to the presence of a parasitic fungus, or schizomycete.

Nosonomy (*nos-on'-o-me*) [νόσος, disease; ὄνομα, name]. The nomenclature of diseases.

Nosonomy (*nos-on'-o-me*) [νόσος, disease; νόμος, law]. The study, or science, of the laws of disease.

Nosophobia (*nos-o-fo'-be-ah*) [νόσος, disease; φόβος, fear]. The insane, or exaggerated, fear of disease; pathophobia.

Nosophthoria (*nos-off-thor'-e-ah*) [νόσος, disease; φθόρα, destruction]. The eradication of diseases by prophylactic measures.

Nosophyte (*nos'-o-fīt*) [νόσος, disease; φυτόν, plant]. Any pathogenic vegetable microörganism.

Nosopoietic (*nos-o-poi-et'-ik*) [νόσος, disease; ποιητικός, making]. Causing disease.

Nosotaxy (*nos'-o-taks-e*) [νόσος, disease; τάξις, arrangement]. The classification of diseases.

Nosotrophe (*nos-ot'-ro-fe*) [νόσος, disease; τροφή, sustenance]. 1. The nourishment of disease. 2. The care of the sick.

Nosotrophic, Nosotrophous (*nos-o-tro'-fik, nos-ot'-ro-fus*) [νόσος, disease; τροφή, sustenance]. Maintaining disease.

Nostalgia (*nos-tal'-je-ah*) [νόστος, return; ἄλγος, pain]. Homesickness.

Nostalgic (*nos-tal'-jik*) [νόστος, return; ἄλγος, pain]. Affected with nostalgia.

Nostoc (*nos'-tok*) [Ger., *nostoch*, nostoc]. A genus of algous plants, often of a gelatinous nature, such as *witches'-butter* and *star-spittle*. Some of the species are edible, *e. g.*, *N. edule*, being used in soups. Unof.

Nostologic (*nos-to-loj'-ik*) [νόστος, return; λόγος, science]. Pertaining to nostology, or to second childhood; extremely senile.

Nostology (*nos-tol'-o-je*)[νόστος, return; λόγος, science]. In biology, the department devoted to the study of senility.

Nostomania (*nos-to-ma'-ne-ah*) [νόστος, return; μανία, madness]. Nostalgia amounting to monomania.

Nostrasia (*nos-tra'-ze-ah*) [*nostras*, of our country]. Nostalgia.

Nostril (*nos'-tril*) [A. S. *nosu*, nose; *thyrl*, to drill]. One of the external orifices of the nose. **N., False,** a conic, curved diverticulum or blind pouch, from two to three inches in depth, leaving the nostril of the horse immediately within the opening, and lying in the notch formed between the nasal and premaxillary bones.

Nostromania (*nos-tro-ma'-ne-ah*). Same as *Nostomania*.

Nostrum (*nos'-trum*) [*noster*, ours]. Any quack medicine or cure-all; any proprietary medicine.

Notacanthous (*no-tak-an'-thus*) [νῶτος, the back; ἄκανθά, a spine]. In biology, having dorsal spines.

Notal (*no'-tal*) [νῶτος, back]. Dorsal, or tergal; pertaining to the back.

Notalgia (*no-tal'-je-ah*) [νῶτος, back; ἄλγος, pain]. Any pain in the back.

Notanencephalia (*no-tan-en-sef-a'-le-ah*) [νῶτος, back; ἀ priv.; ἐγκέφαλος, brain]. Congenital absence of the dorsal part of the cranium.

Notaspis (*no-tas'-pis*) [νῶτος, the back; ἀσπίς, shield]. In embryology, the germ-shield or dorsal area of the embryo, in which appears the primitive furrow.

Notate (*no'-tāt*) [*notatus*, p.p. of *notare*, to mark]. In biology, marked, spotted, variegated.

Notch [an assibilated form of *nock*]. An indentation, especially on the circumferential edge of a bone. **N., Acetabular.** See *Cotyloid*. **N. of the Cerebellum,** the depression between the two hemispheres of the cerebellum, anteriorly and posteriorly. **N., Coraco-scapular.** See *N., Supra-scapular*. **N., Cotyloid.** See *Cotyloid*. **N., Ethmoid,** the notch separating the two orbital plates of the frontal bone. It is occupied by the cribriform plate of the ethmoid. **N., Great Sciatic.** See *N., Ischiatic*. **N., Interclavicular.** Synonym of *N., Suprasternal*. **N., Intercondyloid.** See *Intercondyloid Fossa*. **N., Intervertebral,** any one of the depressions on the vertebral pedicles, either on the upper or lower surface. The apposition of two notches of contiguous vertebræ forms the intervertebral foramen. **N., Ischiatic,** the notch in the ischium that is converted into a foramen by the ischiatic ligaments. **N., Jugular,** a notch forming the posterior boundary of the jugular foramen. **N., Lantermann's,** the appearance of the internodal segments of the nerve-sheath under the influence of certain reagents, dividing the same into strips obliquely cut at the ends. **N., Lesser Sciatic,** a notch below the spine of the ischium over which the tendon of the obturator internus muscle passes. **N., Nasal,** an uneven interval between the internal angular processes of the frontal bone, which articulates with the nasal

bone and the nasal process of the superior maxillary bone. **N., Popliteal,** the depression on the posterior surface of the head of the tibia, separating the two tuberosities. **N., Pterygoid.** Same as *Fossa, Pterygoid.* **N. of Rivinus,** the deficiency in the osseous tympanic ring filled by Shrapnell's membrane, *q. v.* **N., Sacro-sciatic.** See *N., Ischiatic.* **N., Sigmoid,** a deep semilunar depression separating the coronoid and condyloid processes of the inferior maxillary bone. **N., Spheno-palatine,** the notch that separates the orbital and sphenoid processes of the palate bone. **N., Supraorbital.** See *Supraorbital.* **N., Suprascapular,** a notch on the superior border of the scapula at the base of the coracoid process, for the passage of the suprascapular nerve. **N., Suprasternal,** the depression at the top of the manubrium, between the two sterno-clavicular articulations.

ote (*not*) [*nota*, a mark]. A sound. **N., Percussion,** the sound elicited on percussion.

otencephalia (*nōt-en-sef-a'-le-ah*). See *Notencephalus.*

otencephalocele (*no-ten-sef'-al-o-sēl*) [νῶτον, back; ἐγκέφαλος, brain; κήλη, hernia]. Tumor of the brain in a notencephalus.

otencephalus (*nōt-en-sef'-al-us*) [νῶτον, back; ἐγκέφαλος, brain]. A variety of single autositic monsters of the species exencephalus, in which the cranial contents are in large part outside of the skull, resting upon the back of the neck like a huge "waterfall," but not adherent. Hydrocephalus, to some degree, is almost always present. The cranium is misshapen, the forehead sloping backward, and the eyes are directed upward and stand out prominently.

oteum (*no-te'-um*) [νῶτος, the back: *pl.*, *Notea*]. In biology, the dorsal surface of the body of an animal.

othros (*no'-thros*) [νωθρός]. Drowsy, torpid.

otochord (*no'-to-kord*) [νῶτον, back; χορδή, a cord]. A cellular cord inclosed in a structureless sheath, which in the embryo represents the vertebral column, the chorda dorsalis, or primitive backbone. Also, incorrectly the spinal cord.

otomelus (*no-tom'-el-us*) [νῶτον, back; μέλος, limb]. A form of double monster in which the rudimentary limbs are attached to the back.

otomyelitis (*no-to-mi-el-i'-tis*) [νῶτος, back; μυελός, marrow; ιτις, inflammation]. Inflammation of the myelon, or spinal cord.

otomyelus (*no-to-mi'-el-us*) [νῶτος, back; μυελός, marrow]. The spinal marrow; the myelon.

otopodium (*no-to-po'-de-um*) [νῶτος, the back; πούς, foot]. In biology, one of the dorsal oars or double foot-stumps of certain worms. See *Parapodium.*

otopsyche (*no-top-si'-ke*) [νῶτος, back; ψυχή, soul]. Haeckel's term for the spinal cord, or myelon.

otorhizal (*no-to-ri'-zal*) [νῶτος, the back; ῥίζα, root]. In biology, having the radicle applied to the dorsal part of the cotyledons: incumbent.

ototribe (*no'-to-trīb*) [νῶτος, back; τρίβειν, to rub]. In biology, applied to flowers so arranged that the pollen comes in contact with the back of a visiting insect. Cf. *Pleurotribe, Sternotribe.*

ototrocha (*no-to-tro'-kah*) [νῶτος, the back; τροχός, wheel]. In embryology, a form of segmented hæmatopod larva in which the segments of the body bear half-rings of cilia on the dorsal surface.

ottingham System. See *Sewage, Disposal of.*

otum (*no'-tum*) [νῶτον, νῶτος, the back: *pl.*, *Nota*]. In biology, the dorsal aspect of the thorax of an insect. Cf. *Pronotum, Mesonotum, Metanotum.*

umbrella (*nōt'-um-brel-ah*) [νῶτος, the back; *umbra*, shade]. In biology, the dorsal ectoderm or parietal epithelium of medusæ.

Novacula (*no-vak'-u-lah*) [*novare*, to make new]. A razor; a surgeon's knife.

Noxa (*noks'-ah*) [L.]. An injurious principle; especially a pathogenic microörganism, or other *materies morbi.*

Noxious (*noks'-yus*) [*noxius*, harmful]. Harmful; poisonous or deleterious. **"N. Thing,"** in forensic medicine anything administered to a person that is harmful in its effects; especially applied to the production of abortion.

Noyes' Method. See *Treatment, Methods of.*

Nubecula (*nu-bek'-u-lah*) [dim. of *nubes*, a cloud]. 1. The cloudiness caused by the suspension of insoluble matter in the urine. 2. A cloudiness of the cornea.

Nubile (*nu'-bil*) [*nubilis; nubere*, to marry]. Marriageable. Of an age at which there exists the possibility of procreation or child-bearing.

Nubility (*nu-bil'-it-e*) [*nubilitas*, from *nubere*, to marry]. The state of development marked by ability to consummate marriage.

Nucament (*nu'-kam-ent*) [*nucamentum*, anything shaped like a nut]. In biology, an ament or catkin.

Nucellus (*nu-sel'-us*) [*nucella*, a little nut: *pl.*, *Nucelli*]. In biology, that part of the ovule in which the embryo-sac arises; the equivalent of the macrosporangium of cryptogams.

Nuces (*nu'-sēz*). Plural of *Nux, q. v.*

Nucha (*nu'-kah*) [L.]. The nape of the neck.

Nuchal (*nu'-kal*) [*nucha*, nape of neck]. Pertaining to the nucha, or nape.

Nuchalalgia (*nu-kal-al'-je-ah*). Synonym of *Nuchalgia.*

Nuchalgia (*nu-kal'-je-ah*) [*nucha*, nape; ἄλγος, pain]. Pain at the back of the neck.

Nuciform (*nu'-sif-orm*) [*nux*, a nut; *forma*, form]. In biology, nut-shaped.

Nucite (*nu'-sīt*), $C_6H_{12}O_6 + 4H_2O$. A carbohydrate resembling inosite, found in the leaves of *Juglans regia.*

Nuck, Canal of. See *Canal.* **N.'s Diverticulum.** Same as *N., Canal of.* **N.'s Glands.** See *Gland.*

Nucleal, Nuclear (*nu'-kle-al, nu'-kle-ar*) [*nucleus*, a cell]. Pertaining to or resembling a nucleus; endoplastic. **N. Figures,** the peculiar arrangement of the mitome during karyokinesis. **N. Layer,** a stratum of gray matter in the cortex of the brain. **N. Paralysis,** paralysis from lesions of nuclei or centers. **N. Spindle,** delicate striæ appearing in the nucleus undergoing mitosis and arranged in the shape of a double crux with the apices pointing toward the poles of the future nuclei. Its function probably is to guide the movements of the mitome threads. **N. Stain,** a pigment showing a relatively strong affinity for nuclei. A **Direct Nuclear Stain** is one that colors nuclei so quickly as to require no subsequent treatment to differentiate them from the plasma. An **Indirect Nuclear Stain** is one that colors the entire tissue, but in order that the nuclei may be differentiated, the color must be removed from the plasma. The more important nuclear stains are:—Bismarck Brown, Carmin, Cochineal, Fuchsin, Gentian-violet, Hematoxylin, Hoffman's Blue, Methylene-blue, Methyl-green. See *Stain, Plasmatic Stain, Specific Stain, Stains, Table of,* and *Pigments, Conspectus of.* **N. Substance.** See *Heredity.*

Nucleate, Nucleated (*nu'-kle-āt, nu'-kle-a-ted*) [*nucleus*, nucleus]. Having a nucleus.

Nuclei (*nu'-kle-i*) [L.]. Plural of *Nucleus, q. v.* **N. of the Thalamus,** the three portions into which the cinerea of the thalamus is separated. They are called the anterior, internal, and external nuclei.

Nucleic Acid. Altmann's name for an organic phos-

phorus-containing acid, the chief product obtained by analysis of nuclein. Kossel's formula is $C_{30}H_{52}N_9P_3O_{17}$. Nucleic acid occurs free in the heads of the spermatozoa and contains no sulphur.

Nucleiform (*nu'-kle-if-orm*) [*nucleus*, nucleus; *forma*, form]. Resembling a nucleus.

Nuclein (*nu'-kle-in*) [*nucleus*, nucleus]. A compound of proteid substances with nucleic acid, obtained by means of artificial digestion, by Horbaczewski, Miescher, Plosz, Geohegen, Hoppe-Seyler, Lubavin, von Jaksch, Vaughan, and others, from pus-corpuscles, the spermatozoa of various animals, testicles, and thyroid gland, the yolk of hens' eggs, yeast, liver, brain, cows' milk, etc. The results of the analysis of nuclein from different sources are discordant.

	From Pus. (Hoppe-Seyler.)	*From the Spermatozoa of Salmon. (Miescher.)*	*From the Human Brain. (v. Jaksch.)*

P,	2.28	9.59	1.89

Hoppe-Seyler's classification of nucleins, as modified by Halliburton, is: (1) Nucleins that contain no proteid. They are synonymous with *Nucleic acid*, *q. v.* (2) Nucleins rich in nucleic acid and in reaction very similar to that substance; they occur in nature in the chromatic fibers of the nucleus. (3) Nucleins that are poorer in nucleic acid; these form numerous links in a chain, which pass insensibly into those of the next group; they occur in nature in the nucleoli (*pyrenin*) and constitute the chief bulk of the substance called *plastin*. (4) Nucleins that contain very little nucleic acid; they are chiefly proteid in nature, and pass gradually toward proteids which contain no phosphorus whatever. They occur in the nuclei of cells; it is difficult to be positive whether the nuclear matrix is composed chiefly of these or of phosphorus-free proteids; probably both are present. They occur in milk (*caseinogen*), in egg-yolk (*vitellin*, *icthulin*, etc.), in aleurone-grains of plants (*plant vitellin*), and in cell protoplasm generally (*cell nucleo-albumin*). The great insolubility in alkalies that characterizes nucleins of the third group is not seen in those of the fourth. According to Horbaczewski, nuclein is the source of uric acid. Nuclein has also been proved to possess germicidal properties.

Nucleo-albumin (*nu'-kle-o-al'-bu-min*) [*nucleus*, nucleus; *albumen*, albumin]. One of the series of nucleins obtainable from cell-protoplasm, poorer in nucleic acid than the plastins of the nucleus. It appears to be the most constant of the proteids obtainable from cell-protoplasm, but is not confined to cells, being the chief constituent of tissue-fibrinogen. The chief proteid of milk (*caseinogen*), the so-called mucin of bile, and the mucinoid substance in the mucus of urine, are nucleo-albumins. Nucleo-albumin is insoluble in acetic acid, precipitable by magnesium sulphate, not reducible by prolonged heat in the presence of an acid; it is formed by the combination of nuclein and albumin in the process of digestion. It contains phosphorus. The presence of nucleo-albumin in the urine has been observed in cases of leukemia, icterus, diphtheria, and in scarlatinal and other varieties of nephritis.

Nucleochylema (*nu-kle-o-ki-le'-mah*) [*nucleus*, nucleus; *χυλός*, juice]. The fluid filling the interstices of the nucleohyaloplasm.

Nucleochyme (*nu'-kle-o-kim*). See *Nucleochylema*.

Nucleohiston (*nu-kle-o-his'-ton*) [*nucleus*, nucleus; *ἱστός*, tissue]. A substance found by Lilienfeld in the leukocytes of the blood. It is a combination of nuclein and histon. Nuclein induces coagulation of the blood; histon prevents it. The liquid state of the blood is dependent on the integrity of the compound formed by these two bodies. Liquidity, then, is due to the leukocytes by virtue of the histon contained in them; as is also coagulation, by reason of the contained nuclein.

Nucleohyaloplasm (*nu-kle-o-hi'-al-o-plazm*) [*nucleus*, nucleus; *ὑαλος*, transparent substance; *πλάσσειν*, to mold]. A scarcely tangible substance, which, with chromatin, makes up the threads or mitoma of the cell-nucleus. See *Linin*.

Nucleoid (*nu'-kle-oid*) [*nucleus*, nucleus; *εἶδος*, like]. Shaped like a nucleus.

Nucleoidioplasm (*nu-kle-o-id'-e-o-plazm*) [*nucleus*, nucleus; *ἴδιος*, special; *πλάσσειν*, to mold]. The idioplasm of the nucleus.

Nucleolar (*nu-kle'-o-lar*) [*nucleolus*, dim. of *nucleus*, a nucleus]. Pertaining to the nucleolus.

Nucleolid (*nu-kle'-o-lid*) [*nucleolus*, a little nucleus; *εἶδος*, like]. A corpuscle resembling a nucleolus.

Nucleolin (*nu-kle'-o-lin*) [*nucleolinus*]. The nucleus of a nucleolus.

Nucleolinus (*nu-kle-o-li'-nus*) [*nucleolus*, dim. of *nucleus*, a little nut: *pl.*, *Nucleolini*]. In biology, the germinal point within the germinal spot of the nuclei of certain egg-cells.

Nucleolus (*nu-kle'-o-lus*) [dim. of *nucleus*, a nucleus]. The small spheric body within the cell-nucleus. It probably plays but a subordinate part in the life-activity of the cell, although its true function has not as yet been established.

Nucleomicrosoma (*nu-kle-o-mi-kro-so'-mah*) [*nucleus*, nucleus; *μικρός*, small; *σῶμα*, body: *pl.*, *Nucleomicrosomata*]. Any one of the many minute tangible bodies that make up each fiber of the nucleoplasm.

Nucleopetal (*nu-kle-o-pet'-al*) [*nucleus*, nucleus; *petere*, to seek]. Seeking the nucleus (said of the movement of the male pronucleus toward the female pronucleus).

Nucleoplasm (*nu'-kle-o-plazm*) [*nucleus*, nucleus; *πλάσσειν*, to mold]. The formative hyaloplasm of the nucleus; chromatin. E. van Beneden describes the nucleus of the ovum as composed of a membrane within which is a network of chromatin, containing in its meshes a fluid substance. The whole of this mass he calls the *nucleoplasm*, composed of: 1. An achromatic substance in fine moniliform filaments. 2. A chromatic substance permeating the whole. He supposes each fiber to consist of minute bodies, readily stained, called *Nucleomicrosomata*. Strasburger describes a nucleus as consisting of *Nucleoplasm* (or *Karyoplasma*) in which there are two matters, the nucleomicrosomata, taking up pigment, and the nucleohyaloplasm, not stained.

Nucleoplasmatic, Nucleoplasmic (*nu-kle-o-plaz-mat'-ik*, *nu-kle-o-plaz'-mik*) [*nucleus*, nucleus; *πλάσσειν*, to mold]. Relating to nucleoplasm.

Nucleoplastic (*nu-kle-o-plas'-tik*). Synonym of *Nucleoplasmatic*.

Nucleus (*nu'-kle-us*) [*nucleus*, from *nux*, nut]. The essential part of a typical cell, usually round in outline, and situated near the center. The center around which the mass of a crystal aggregates; also, the central element in a compound, as the carbon in hydrocarbons. In physiology, the controlling or motor center of a muscle or organ; also, the deep origin (nidus or nidulus) of a nerve. **N. ambiguus**, **N. Anterior**, a center near that of the vagus. **N. amygdalæ**, an irregular aggregation of cinerea situated at the apex of the temporal lobe of the brain, between it and the apex of the middle ventricular horn; it lies ventrad of the lenticula. **N., Amygdaloid.**

See *N. amygdalæ*. **N., Anterior** (*of the thalamus*). See *Nuclei*. **N., Arciform**, an aggregation of nerve-cells in the oblongata between the pyramidal tracts and the arciform fibers. **N., Arcuate**, the largest of the collections of gray matter in the arciform fibers of the pyramidal tracts. **N., Balbiani's**, a nucleus supposed to be present in all ova, in addition to the germinal vesicle. Its function is to be the separation of the contents of the ovum into a germinal part and a nutritive portion. **N. of Bechterew**, an ill-defined group of ganglion-cells lying dorsad of Deiters' nucleus, and supposed to give origin to some of the fibers of the middle root of the auditory nerve. It is also called the *nucleus vestibularis*. **N., Burdach's.** See *N. funiculi cuneati*. **N., Caudal.** See *N., Oculo-motor*. **N., Caudate.** See *Caudatum*. **N., Caudo-ventral.** See *N., Oculo-motor*. **N. cerebelli**, the corpus dentatum, *q. v.* **N., Cervical**, an accumulation of nerve-cells in the upper part of the spinal cord, opposite the third and fourth cervical nerves. **N. cinereus**, a term sometimes used to designate the gray substance of the restiform bodies. **N., Cleavage.** Synonym of *N., Segmentation*. **N., Daughter.** See *Mitosis*. **N., Deiters'.** See *N. magno-cellularis*. **N., Dental**, the dental papilla. **N. dentatus**, a nucleus located in the mesal part of the corresponding cerebellar hemisphere, in the direct prolongation of the prepeduncle which enters it, and very close to the roof of the fourth ventricle. It is composed of a folded lamina of cinerea, convoluted like the similar nucleus of the olive, and is open cephalo-mesad. **N. de reliquat**, a granular body associated with the sickle-shaped rods in coccidia. **N. emboliformis**, a small mass of gray matter situated in the interval between the *N. dentatus* and *N. fastigii*, and lying nearer the former. It is elongated cephalo-caudad, and is probably an accessory detachment of the *N. dentatus*. **N. fastigii**, the *Fastigatum;* a flat expanse of gray matter on each side of the inferior vermis cerebelli, directly over the roof of the fourth ventricle. **N. fimbriatus.** Synonym of *Corpus dentatum*. **N. funiculi cuneati**, a mass of gray matter in the posterior column of the oblongata, lying beneath the funiculus cuneatus. **N. funiculi gracilis**, an elongated club-shaped mass of gray matter in the mesal portion of the posterior column of the oblongata. **N. funiculi teretes**, a distinct accumulation of small nerve-elements, closely crowded, found on either side of the sulcus ventriculi of the oblongata. Its relations are unknown. **N., Germinal**, the nucleus resulting from the union of the male and female pronuclei. **N., Gingival**, a part of the cerebellum in the fetus (between the third and fourth months), which bears some resemblance to the gums. **N., Globic, N. globosus**, the globulus, a number of small round or oval masses of cinerea situated in the interval between the *N. dentatus* and *N. fastigii*, lying near to and probably an accessory detachment of the latter. **N. gracilis**, a column of cinerea in the clava or posterior pyramid of the medulla oblongata. **N., Gray**, the cinerea of the spinal cord. **N., Intraventricular**, the caudatum. **N., Kölliker's**, the cinerea surrounding the canal of the myel (spinal cord). **N., Laryngeal**, the nucleus of origin of the nerve-fibers of the larynx. **N. of Laura**, the external auditory nucleus of nerve-cells. **N., Lenticular, N. lentiformis**, a cluster of cinerea of the striatum. **N. of Luys**, an almond-shaped mass of cinerea with pigmented ganglion-cells in the regio subthalamica. **N. magno-cellularis**, *Deiters' Nucleus;* a nucleus of cinerea in the oblongata, situated mesad of the rostiform column at the level entry of the auditory nerve-roots. It is probably a station for a spinal tract. **N., Medullary**, any circumscribed collection of white matter in the central nervous system. **N., Mother.** See *Mother-star*, under *Karyokinesis*. **N., Motor**, a collection of nerve-cells in the central nervous system giving origin to a motor nerve. **N., Oculo-motor**, the nucleus of the oculo-motor nerve, lying dorsad of the posterior longitudinal bundle, under the aqueduct of Sylvius. **N., Olivary.** See *Dentoliva*. **N. of Origin**, the collection of ganglion-cells in the central nervous system giving origin to a nerve. **N. of Pander**, the upper expanded end of the flask-shaped mass of white yolk in the hen's egg. **N., Post-pyramidal.** See *N. funiculi gracilis*. **N. pulposus**, the pulpy substance in the center of the intervertebral discs, the remains of the notochord. **N. pyramidalis**, the inner accessory olivary nucleus. **N. quintus**, the nucleus of the fifth or trigeminal nerve. **N., Red.** See *N. tegmenti*. **N., Restiform**, the gray matter of the restiform body. **N., Roof.** Synonym of *N. tegmenti*. **N. ruber.** See *N. tegmenti*. **N., Segmentation**, the nucleus that appears shortly after the fusion of the male and female pronuclei, the last step in the process of fertilization; it is so called because within it cleavage is first established. **N., Spermatic.** Synonym of the male pronucleus. **N., Stilling's.** Synonym of *N. tegmenti*. **N., Subependymal**, the internal nucleus of the eighth or auditory nerve, lying just beneath the ependyma of the metacele. **N., Tectorial Cerebellar.** Synonym of *N. tegmenti*. **N., Tegmental, N. tegmenti**, *Red Nucleus;* a nucleus with a reddish tinge and a round or oval outline, situated in the isthmus at those section-levels where the ganglion of Soemmering has its greatest extent. **N., Vesicular**, a rather large nucleus, the membrane of which stains deeply, while the central portion remains relatively pale. **N. vestibularis.** See *N. of Bechterew*. **N., Vitelline**, a nucleus resulting from the fusion of the male and female pronuclei within the vitellus. **N., Westphal's**, the nucleus of origin of a part of the trochlear fibers; it is situated posteriorly to the trochlear nucleus proper. **N., White**, the white substance of the dentate body of the olive.

Nuculanium (*nu-ku-la'-ne-um*) [*nucula*, a little nut: *pl., Nuculania*]. In biology, a fruit like the medlar, containing several nut-like seeds or carpels.

Nucule (*nu'-kūl*) [*nucula*, a little nut]. In biology, the female organ of *Characeæ*.

Nude (*nūd*) [*nudus*, naked]. Naked; bare. In biology, destitute of hairs, leaves, feathers, and similar dermal appendages.

Nudibrachiate (*nu-de-bra'-ke-āt*) [*nudus*, naked; *brachium*, the forearm]. In biology, having naked arms, or non-ciliated tentacles.

Nudibranchiate (*nu-de-brang'-ke-āt*) [*nudus*, naked; *branchiæ*, gills]. See *Gymnobranchiate*.

Nudicaudate (*nu-dik-awd'-dāt*) [*nudus*, naked; *cauda*, a tail]. In biology, having a hairless tail.

Nudicaul (*nu'-dik-awl*) [*nudus*, naked; *caulis*, stem]. In biology, having leafless stems.

Nudiflorous (*nu-dif-lo'-rus*) [*nudus*, bare; *flos*, a flower]. In biology, having flowers destitute of hairs, glands, etc.

Nudifolious (*nu-dif-o'-le-us*) [*nudus*, bare; *folium*, a leaf]. Having smooth leaves.

Nudil (*nu'-dil*) [origin obscure]. An old name for a medicated pledget, or dossil of wool, lint, or cotton.

Nudiped (*nu'-dip-ed*) [*nudus*, naked; *pes*, foot]. In biology, having naked feet.

Nudirostrate (*nu-de-ros'-trāt*) [*nudus*, naked; *rostrum*, beak]. In biology, having a naked rostrum, as a hemipterous insect.

Nudiscutate (*nu-dis-ku'-tāt*) [*nudus*, naked; *scutum* a shield]. In biology, having a naked scutellum.

Nuel's Space. In the ear, a triangular space lying between the outer hair-cells and the slanting outer rods of Corti. It is roofed over by the lamina reticulata.

Nuhn's Glands. See *Gland*.

Nuisance (*nu'-sans*) [ME., *nuisance*, nuisance]. In medical jurisprudence, that which is noxious, offensive, or troublesome; applied to persons or things.

Nuke (*nūk*) [Fr., *nuque*, the neck]. The nape of the neck. **N.-bone,** the basi-occipital bone.

Nullipara (*nul-ip'-ar-ah*) [*nullus*, none; *parere*, to bring forth]. A woman who has never borne a child.

Nulliparity (*nul-ip-ar'-it-e*) [*nullus*, none; *parere*, to bring forth]. The condition of being nulliparous.

Nulliparous (*nul-ip'-ar-us*) [*nullus*, none; *parere*, to bring forth]. Applied to a woman who has not borne a child.

Numb (*num*) [ME., *nome*, taken]. Having impaired sensibility.

Number Six. See *Hot Drops*.

Numbering of Teeth; Fingers and Toes; Series. See *Teeth; Fingers and Toes; Series, Numbering of*.

Numbness (*num'-nes*) [ME., *nome*, taken]. Partial, or local anesthesia with torpor; deficiency of sensation; obdormition.

Nummiform (*num'-if-orm*) [*nummus*, a coin; *forma*, form]. Having the form of a coin; nummular.

Nummular (*num'-u-lar*) [*nummus*, coin]. Resembling a small coin in form; also, resembling rouleaux, or rolls of coins; applied to the red globules of the blood; or the rounded clots of sputum sometimes observed in pulmonary tuberculosis.

Nuptiality (*nup-she-al'-it-e*) [*nuptial*, nuptial]. The proportion of marriages to the population.

Nurse (*ners*) [Fr. *nourrice*, nurse]. The caretaker of an infant. Also, a person caring for the sick. **N., Dry,** one who does not suckle the infant. **N., Hospital,** one who cares for the sick in a hospital. **N., Monthly,** one who attends a woman in confinement. **N., Probationer,** in hospitals a probationer is one who has entered upon her career as a nurse, and is under observation to determine her fitness for the profession. **N., Professional,** one who devotes himself or herself to the care of the sick as a life-work or profession. **N., Wet,** one who suckles the infant. **N.'s Contracture,** Trousseau's term for tetany found in association with debility following lactation.

Nursing (*ners'-ing*) [Fr., *nourrice*, a nurse]. A term applied to the babe's taking the breast, and also to the mother's giving the breast. Also, caring for the sick. **N.-bottle,** a bottle fitted with a rubber tip or nipple for feeding infants not nursed from the breast.

Nursling (*ners'-ling*) [Fr., *nourrice*, a nurse]. An infant that is nursed.

Nurture (*ner-tūr*) [ME., *norture*, nurture]. 1. Nourishment; food. 2. The act of supplying with nourishment. 3. To feed or nourish.

Nussbaum's Method. See *Anesthetic*. **N.'s Mixture.** See *Anesthetic*. **N.'s Narcosis,** the condition of prolonged anesthesia induced when the administration of chloroform is preceded a few minutes by the hypodermatic injection of a full dose of morphin. **N.'s Theory of Germinal Continuity,** the hypothesis that some of the germ-substance is directly abstracted from the developing ovum and preserved without essential alteration, to become, by giving rise to the sexual elements, the germ-substance of another generation. See *Heredity*.

Nut [ME., *nutte*, nut]. See *Nux*. **N.-bone,** a sesamoid bone in the foot of a horse. **N.-gall.** See *Galla*. **N.-meg.** See *Myristica*. **N.-meg Liver,** a mottled appearance of the liver, the center of the acini being dark, while the periphery is lighter in color. The condition is seen especially in passive congestion and in fatty infiltration.

Nutant (*nu'-tant*) [*nutare*, to nod with the head]. In biology, drooping, or sloping.

Nutation (*nu-ta'-shun*) [*nutare*, to nod]. Nodding or oscillation. In biology, the same as *Circumnutation*. **N. of Sacrum,** a partial rotation of the sacrum on its transverse axis, whereby the distance between the upper extremity or the lower extremity and the anterior pelvic wall is increased.

Nutator (*nu-ta'-tor*) [*nutare*, to nod]. A muscle causing anterior flexion of the head.

Nutatory (*nu'-tat-or-e*) [*nutare*, to nod]. In biology, nodding.

Nutriant (*nu'-tre-ant*) [*nutrire*, to nourish]. A medicine or agent that modifies nutritive processes.

Nutrient (*nu'-tre-ent*) [*nutrire*, to nourish]. 1. Affording nutrition. 2. A substance that nourishes; a food.

Nutrility (*nu-tril'-it-e*) [*nutrire*, to nourish]. The power of a cell or an organism to take part in the function of nutrition; metabolism.

Nutriment (*nu'-trim-ent*) [*nutrimentum*, from *nutrire*, to nourish]. Anything that nourishes or enters into the formation of living tissue.

Nutrition (*nu-trish'-un*) [*nutrire*, to suckle]. The most important of the vital functions, the anabolic process, or the molecular renovation of living protoplasm. **N., Centers of,** points held by Goodsir to exist in the basement-membrane of mucous membranes.

Nutritious (*nu-trish'-us*). Synonym of *Nutritive*.

Nutritive (*nu'-trit-iv*) [*nutrire*, to nourish]. Possessing the quality of affording nutrition.

Nutritorium (*nu-trit-o'-re-um*) [*nutrire*, to nourish]. The nutritive apparatus, or that part of the organism that is directly concerned with anabolic changes.

Nutritory (*nu'-trit-o-re*) [*nutrire*, to nourish]. Concerned in the processes of nutrition.

Nutrix (*nu'-triks*) [L.: *pl.*, *Nutrices*]. A female nurse, especially a wet-nurse.

Nuttall's Method. See *Sputum, Methods of Examination*.

Nux (*nuks*) [L.]. A nut. **N. moschata** [L., "musky nut"]. The nutmeg: myristica. **N. vomica,** dog-button; the seed of *Strychnos nux vomica*. Its properties are due mainly to two alkaloids, *strychnin* and *brucin*, and with the properties of which its own properties are identical. In small doses it is a bitter tonic, exciting the secretions and stimulating the functions of the body. In larger doses it exalts the function of the spinal cord, causing tetanic spasms of the extensor muscles. In toxic doses it paralyzes the functions of the spinal cord, arrests respiration and causes death by suffocation. It is valuable as a general tonic in cardiac failure, in hemiplegia, dyspnea and in certain forms of amblyopia. The proportion of strychnin in nux vomica varies from ¼–½ per cent. **N. v., Abstractum.** Dose gr. ½, gradually increased. Unof. **N. v., Ext.** Dose gr. ⅛–j. **N. v., Ext., Fld.** Dose ♏j–v. **N. v., Tinct.,** 2 per cent. of the drug. Dose ♏v–xx. **Brucina,** $C_{23}H_{26}N_2O_4$, ½ the strength of strychnin and in action one-third as rapid. Dose gr. $\frac{1}{10}$–⅛. (Unof.) **Liquor brucinæ,** 1 per cent. Dose ♏x. **Strychnina,** strychnin, $C_{21}H_{22}N_2O_2$, the alkaloid, exceedingly bitter; chloroform is its best solvent. Dose gr. $\frac{1}{60}$–$\frac{1}{20}$. **S. Sulphate** $(C_{21}H_{22}N_2O_2)_2\ H_2SO_4\ 7H_2O$,

soluble in water. Dose gr. $\frac{1}{60}$—$\frac{1}{20}$. **Liq. s. hydrochlorat.** (B. P.) Dose ♏v–x.

Nychthemeron (*nik-them'-er-on*) [*νύξ*, night; *ἡμέρα*, day]. A day and a night.

Nychthemerous (*nik-them'-er-us*) [*νύξ*, night; *ἡμέρα*, day]. Pertaining to night and day; ephemeral.

Nyctalopia (*nik-tal-o'-pe-ah*) [*νύξ*, night; *ὤψ*, the eye]. Night-vision; the condition in which the sight is better by night or in semi-darkness than by daylight. It is a symptom of central scotoma, the more dilated pupil at night allowing a better illumination of the peripheral portions of the retina. Dr. Greenhill and Mr. Tweedy have shown that according to the quite universal usage of modern times, the definitions of the words, *nyctalopia* and *hemeralopia*, have been the reverse of that of the early Greek and Latin writers. The proper derivation therefore of *nyctalopia* would be from *νύξ*, night, *ἀλαός*, blind, *ὤψ*, eye, the word meaning night-blindness. *Hemeralopia* was likewise derived from *ἡμέρα*, day, *ἀλαός*, blind, *ὤψ*, eye, and meant day-blindness. The attempt to reinstate the ancient usage can only result in utter confusion, and the words should therefore never be used. See *Hemeralopia*.

Nyctamblyopia (*nik-tam-ble-o'pe-ah*) [*νύξ*, night; *ἀμβλύωπία*, dim-sightedness]. Imperfect vision at night.

Nyctegersia (*nik-tej-er'-se-ah*) [*νύξ*, night; *ἐγερσις*, a rousing]. Nocturnal excitement.

Nyctipelagic (*nik-tip-el-aj'-ik*) [*νύξ*, night; *πέλαγος*, the sea]. In biology, pertaining to marine animals that remain in the depths during the day and arise to the surface only at night. See under *Plankton*.

Nyctipolus, Nyctiporus (*nik-tip'-o-lus, nik-tip'-or-us*). Synonyms of *Somnambulist*.

Nyctitropic (*nik-tit-rop'-ik*) [*νύξ*, night; *τρόπος*, a turn]. In biology, applied to movements connected with the phenomenon called the "sleep of plants."

Nyctitropism (*nik'-tit-ro-pizm*) [*νύξ*, night; *τρόπος*, a turn]. In biology, the "sleep of plants."

Nyctobadia, Nyctobatesis (*nik-to-ba'-de-ah, nik-to-bat-e'-sis*). Synonyms of *Somnambulism*.

Nyctophobia (*nik-to-fo'-be-ah*) [*νύξ*, night; *φόβος*, fear]. Insane dread of the night.

Nyctophonia (*nik-to-fo'-ne-ah*) [*νύξ*, night; *φωνή*, voice]. The hysteric loss of the voice during the day.

Nyctotyphlosis (*nik-to-tif-lo'-sis*) [*νύξ*, night; *τύφλωσις*, blindness]. Night-blindness.

Nygma (*nig'-mah*) [*νύγμα*]. A punctured wound.

Nylander's Solution and Test. See *Tests, Table of*.

Nymph (*nimf*) [*νύμφη*, a nymph]. In biology, the chrysalis or pupa of an insect.

Nympha (*nim'-fah*) [*νύμφη*, nymph: *pl.*, *Nymphæ*]. A labium minus the vulva. See *Labium*.

Nymphæa (*nim-fe'-ah*) [*νύμφη*, a nymph]. A genus of plants including the water-lilies. **N. odorata**, sweet-scented water-lily; the root of the well-known plant. It contains gallic and tannic acids, to which its properties are due. It is bitter and astringent. A decoction of ℥j–Oj may be used. Dose ℥ ss–j, or a fluid extract in doses of ℥ ss–j. The roots are employed in domestic practice in making poultices. Unof.

Nymphitis (*nim-fi'-tis*) [*νύμφα*, nymph; *ιτις*, inflammation]. Inflammation of the nymphæ.

Nymphochrysalis (*nim-fo-kris'-al-is*) [*νύμφη*, a nymph; *χρυσαλίς*, the gold sheath of butterflies]. In biology, the egg-like stage from which the nymphæ of certain mites are developed.

Nympholepsy (*nim'-fo-lep-se*) [*νύμφη*, nymph; *ληπτός*, inspired, seized]. An exaltation, or ecstatic trance; a religious frenzy. [Old.]

Nymphomania (*nim-fo-ma'-ne-ah*) [*νύμφη*, nymph; *μανία*, madness]. Excessive or furious sexual desire on the part of a woman. It is called, also, *Hystero-mania*, and *Furor uterinus*.

Nymphomaniac (*nim-fo-ma'-ne-ak*) [*νύμφη*, nymph; *μανία*, madness]. One affected with nymphomania.

Nymphoncus (*nim-fong'-kus*) [*νύμφη*, nymph; *ὄγκος*, tumor]. Tumor of the nympha.

Nymphosis (*nim-fo'-sis*) [*νύμφη*, a nymph; specifically the pupa of an insect]. In biology, the process of changing into the nymph stage.

Nymphotomy (*nim-fot'-o-me*) [*νύμφη*, nymph; *τομή*, a cutting]. The surgical removal of one or both nymphæ.

Nyssa (*nis'-ah*) [*Νῦσα*, the nurse of Bacchus]. A genus of cornaceous trees; gum trees; tupelo or pepperidge. **N. candicans, N. capitata, N. grandidentata**, and **N. uniflora**, are species of the U. S., whose roots are used in making tupelo-tents. See *Tents* and *Tupelo*.

Nystagmus (*nis-tag'-mus*) [*νυσταγμός*, nodding of the head]. An oscillatory movement of the eyeballs, generally horizontal, inherited, and associated with some other ocular abnormality, with albinism, or depending on intracranial disease, especially meningitis or multiple sclerosis. **N., Lateral**, oscillation of the eyes in the horizontal meridian. **N., Miner's**, a variety of nystagmus occurring in miners, due to the irregular action of the ocular muscles as the eyes follow the flickering light of candle or lamp, the miner lying in an unnatural position. **N., Rotatory**, a partial rolling of the eyeball around the visual axis. **N., Vertical**, oscillatory movement in the vertical meridian.

Nystaxis (*nis-taks'-is*). Synonym of *Nystagmus*.

Nyxis (*niks'-is*) [*νύξις*, puncture]. Pertaining to surgical puncture.

O

O. The chemic symbol of *Oxygen*. The symbol of *Oculus*, eye. It is also used in prescriptions as the abbreviation of *Octarius*, a pint.

O. D. Abbreviation for oculus dexter, right eye.

Oph. An abbreviation sometimes employed for ophthalmia, ophthalmoscope, and ophthalmoscopy.

Oaf (*ōf*) [AS., *ælf*, elf]. An idiot, or underwitted person.

Oak (*ōk*) [ME., *oke*, oak]. A tree or shrub of the genus *Quercus*, *q. v.* **O.-bark**, an important tannin-containing material used in leather-manufactures. It is taken from the common English oak (*Quercus robur*), and contains from twelve to fifteen per cent. of tannic acid. It produces an excellent quality of leather. Other varieties in use are *Q. coccifera*, of which the bark, known as *coppice-oak*, is yellowish-brown in hue and very rich in tannin; *Q. suber* (or cork-oak), and *Q. ilex* (or evergreen-oak). The tannin of the several varieties of oak is known as *quercitannic acid*, $C_{17}H_{16}O_9$. In addition to this acid the main constituents of oak-bark are: the first anhydrid of this acid, *phlobaphene*, $C_{34}H_{30}O_{17}$; its second anhydrid, $C_{34}H_{28}O_{16}$; its third anhydrid, *Oser's oak-red*, $C_{34}H_{26}O_{15}$; and its fourth anhydrid, *Löwe's oak-red*, $C_{34}H_{24}O_{14}$. Of these, the quercitannic acid and the phlobaphene are especially concerned in the tanning process. **O.-bark** (*Quercus alba*, U. S. P., *Quercus cortex*, B.P.) is an astringent tonic mostly employed in washes and decoctions for external use. The official species in the U. S. is *Q. alba;* in Gr. Britain, *Q. robur*.

Oakum (*o'-kum*) [ME., *ocumbe*, tow]. The fiber obtained by picking old rope into pieces. Oakum, variously medicated, is used to some extent in surgical dressings.

Oamma (*o-am'-ah*) [ὠαμμα, from οὖς, ear]. Hearing; ear.

Oaralgia (*o-a-ral'-jē-ah*) [ὠάριον, ovule; ἄλγος, pain]. Ovarian neuralgia.

Oaria (*o-a'-re-ah*). Plural of *Oarium*, *q. v.*

Oaric (*o-ar'-ik*) [ὠάριον, ovule]. Ovarian; relating to the oaria.

Oariocele (*o-a'-re-o-sēl*) [ὠάριον, ovule; κήλη, tumor]. Hernia involving an ovary.

Oariocyesis (*o-a'-re-o-si-e'-sis*) [ὠάριον, ovule; κύησις, pregnancy]. Ovarian pregnancy.

Oarioncus (*o-a-re-ong'-kus*) [ὠάριον, ovule; ὄγκος, tumor]. An ovarian tumor.

Oariopathy (*o-a-re-op'-ath-e*) [ὠάριον, ovule; πάθος disease]. Any ovarian disease.

Oariophyma (*o-a-re-o-fī'-mah*) [ὠάριον, ovule; φῦμα, tumor]. Same as *Oarioncus*.

Oariorrhexia (*o-a-re-or-eks'-e-ah*) [ὠάριον, ovule; ῥέξις, rupture]. Rupture of the ovary.

Oarioscirrhus (*o-a-re-o-skir'-us*) [ὠάριον, ovule; σκίρρος, hard]. Scirrhus of the ovary.

Oariosteresis (*o-a-re-o-ster-e'-sis*) [ὠάριον, ovule; στέρησις, privation]. Same as *Oariotomy*.

Oariotomy (*o-a-re-ot'-o-me*) [ὠάριον, ovule; τομή, a cutting]. Surgical removal of an ovary.

Oaritis (*o-a-rī'-tis*) [ὠάριον, ovule; ιτις, inflammation]. Inflammation of an ovary.

Oariule (*o-a'-re-ūl*) [ὠάριον, ovary; οὐλή, scar]. A corpus luteum.

Oarium (*o-a'-re-um*) [ὠάριον, ovule: *pl.*, *Oaria*]. See *Ovarium*.

Oasis (*o-a'-sis*) [δασις, a dry spot: *pl.*, *Oases*]. In surgery, an isolated spot of healthy tissue surrounde by diseased tissue.

Oat (*ōt*) [ME., *ote*, oat]. A cereal plant, *Avena sativ* and *A. orientalis*, or its seed. Oats are used main as food for horses, although they are being large used as food by man in the United States and othe countries. See *Avena*. **O.-malt**, malt made fro oats. **O.-meal**, the meal made from oats. Th proximate analysis of oat-meal gives fat, 7.74; starch 59.88; sugar, 1.27; albumin insoluble in alcoho 15.66; albumin soluble in alcohol, 4.21; cellulose 2.05; mineral matter, 1.94; moisture, 7.25. **O.-m pyrosis**, a condition of fermentative dyspepsia, a tended with acidity, related to the eating of oat-meal

Ob- [*ob*, on, against, towards]. A prefix signifyin on, against, or towards.

Obalinski's Method. See *Anesthetic*.

Obconic, Obconical (*ob-kon'-ik, ob-kon'-ik-al*) [*ob* reversed; κωνικός, pertaining to a cone]. Conic, bu with the point of attachment at the apex.

Obcordate (*ob-kor'-dāt*) [*ob*, reversed; *corda*, a heart] In biology, inversely heart-shaped.

Obdeltoid (*ob-del'-toid*) [*ob*, reversed; *deltoides*, delta shaped]. In biology, triangular, with the apex down ward.

Obdormition (*ob-dor-mish'-un*) [*obdormitio; obdormire* to fall asleep]. The phenomenon known as "sleep" of the limbs; the benumbing of a part due to inter ference with nervous function.

Obduction (*ob-duk'-shun*) [*ob*, against; *ducere*, t lead]. Post-mortem examination. Necropsy.

O'Beirne's Tube. A long flexible tube used in makin rectal injections in cases of obstinate constipation.

Obeliac (*o-be'-le-ak*) [ὀβελός, a spit]. Pertaining t or situated near, the obelion.

Obelion (*o-be'-le-on*) [ὀβελός, a spit]. See *Craniometr Points*.

Oberst Method of Inducing Local Anesthesia. I jection of a 1 per cent. solution of cocain over the cours of a nerve-trunk supplying the area to be attacked.

Obese (*o-bēs'*) [*obedere*, to eat]. Extremely fat; corpu lent.

Obesity (*o-bēs'-it-e*) [*obesitas*, from *obedere*, to eat] Corpulence; polysarcia. An excessive developmer of fat throughout the body. Usually it occurs afte the prime of life, but it may be congenital or may occ at any period of life. *Ebstein's Treatment* consists i reducing the quantity of food ingested, and in selec ing a diet that the patient may adhere to for th remainder of life. Carbohydrates, including suga sweets, and potatoes, are absolutely forbidden. Brea is limited to the smallest possible quantity. All kinc of meat and vegetables are allowed, especially th leguminous vegetables, with tea, coffee, and ligh wines. *Banting's Cure* excludes almost all fats, b permits a much larger allowance of albuminous food

Obex (*o'-beks*) [L., a barrier: *pl.*, *Obices*]. A ban of white nervous matter at the point of the calamu scriptorius.

Obfuscation (*ob-fus-ka'-shun*) [*obfuscare*, to mak black]. The act of darkening or of producing b wilderment of sight.

Obituary (*o-bit'-u-a-re*) [*obitus*, death]. Pertaining death. A notice or account of one who has recent died.

Object (*ob'-jekt*) [*objectus*, a casting before; fro *jicere*, to cast before]. 1. Anything that is perceive

known, thought of, or signified. 2. A purpose, aim, or end. **O.-blindness.** See *Apraxia.*

Objective (*ob-jek'-tiv*) [*objicere*, to throw against]. In medicine, a qualification applied to the symptoms observed by the physician, in distinction from those felt only by the patient. In psychology, pertaining to all things lying external to one's self, in contradistinction to *subjective*, pertaining to the essential ego, or observer. The lens of a compound microscope nearest the object viewed. **O., Achromatic,** the objective of a microscope in which the lenses, formed of crown-glass and flint-glass, tend to eliminate the color, or chromatic aberration. **O., Adjustable,** in microscopy, one in which the distance between the systems of lenses may be changed at the will of the observer. **O., Aplanatic** [*ἀ* priv.; *πλανητός*, wandering], in the microscope, an objective in which both chromatic and spheric aberration are avoided. **O., Apochromatic,** one in which the lenses, made of a peculiar kind of glass, admit of the combination of the rays from three spectral colors at one focus, instead of two colors, as in the ordinary achromatic objective. **O., Dry,** in the microscope, one in which the medium between the objective and the cover-glass consists of air. **O., Endomersion,** a form of objective, devised by Zeuger, in which the chromatic aberration is removed by the employment of a liquid (as a mixture of ethereal and fatty oils) placed between the separate lenses. **O., Homogeneous Immersion,** one between which and the cover-glass a fluid of the same refractive index as glass is placed. Cedar-oil is such a fluid. **O., Immersion,** one in which some fluid is placed between the front of the objective and the cover-glass. **O., Microscopic,** the systems of lenses at the lower end of the tube near the object, giving an enlarged and inverted real image. These objectives are of two classes, *Dry* and *Immersion.* **O., Non-achromatic,** an objective which produces an image with a colored border. It also permits spheric aberration. **O., Non-adjustable,** an objective in which the relative positions of the lenses or lens-systems are fixed. **O., Oil-immersion,** an objective between which and the object a drop of oil is placed. Cedar-oil is most commonly employed. **O., Unadjustable.** See *O., Non-adjustable.* **O., Water-immersion,** an objective between which and the cover-glass water is placed as a medium.

Lanceolate (*ob-lan'-se-o-lāt*) [*ob*, reversed; *lanceola*, a little lance]. In biology, lanceolate, with the apex downward.

Obligate (*ob'-lig-āt*) [*obligatus*, *obligare*, to oblige]. In biology, necessary, essential, constrained, bound. **O. Aërobic,** See *Aërobic.* **O. Anaërobic.** See *Aërobic.* **O. Parasite,** an organism which is constrained to a parasitic life for the attainment of its development.

Obligatory (*ob-lig'-at-or-e*) [*obligare*, to bind]. Compelling; binding. **O. Aërobes.** See *Aërobic.*

Oblique (*ob-lēk'* or *ob-līk'*) [*obliquus*, oblique, slanting]. Not direct; aslant; slanting. In botany, unequal-sided. In anatomy, an oblique muscle, as the external or internal oblique of the abdomen, or the superior or inferior oblique of the eye.

Obliquity (*ob-lik'-wit-e*) [*obliquitas*, obliqueness]. The state of being oblique. **O., Naegele's,** in obstetrics the lateral inclination of the fetal head, in consequence of which the sagittal suture is directed more posteriorly. **O., Rœderer's,** in obstetrics, the extremely flexed position of the fetal head on the body. **O., Solayres's,** in obstetrics, the entrance of the fetal head into the pelvic inlet in an oblique diameter.

Obliquus (*ob-li'-kwus*) [L., slanting]. Slanting; oblique. A term applied to various muscles. **O. Muscle.** See *Muscles, Table of.* **O. Reflex.** See *Reflexes, Table of.*

Obliterate (*ob-lit'-er-āt*) [*obliterare*, to erase]. To wipe out. In biology, indistinct; applied to marks, spots, punctures, and striæ, in animals.

Obliteration (*ob-lit-er-a'-shun*) [*obliteratio; obliterare*, to efface]. Extinction of a part; closure, as of the lumen of a passage.

Oblivion (*ob-liv'-e-on*) [*oblivio*, lethargy]. Forgetfulness; lethargy.

Oblongata (*ob-long-gah'-tah*) [L.]. The medulla oblongata.

Oblongatal (*ob-long-ga'-tal*) [*oblongata*, the medulla]. Pertaining to the oblongata.

Obmutescence (*ob-mu-tes'-ens*) [*obmutescere*, to become dumb]. Aphonia; loss of voice.

Obnubilation (*ob-nu-bil-a'-shun*) [*obnubilare*, to becloud]. A beclouded state of the mind or spirit.

Obovate (*ob-o'-vāt*) [*ob*, reversed; *ovatus*, egg-shaped]. In biology, inversely ovate.

Obovatifolious (*ob-o-va-tif-o'-le-us*) [*ob*, reversed; *ovatus*, egg-shaped; *folium*, a leaf]. In biology, having inversely ovate leaves.

Obovoid (*ob-o'-void*) [*ob*, reversed; *ovum*, an egg]. In biology, solidly obovate.

Observation (*ob-zer-va'-shun*) [*observatio*]. The examination of a thing; a systematic study of phenomena.

Obsession (*ob-sesh'-un*) [*obsessire*, to beset]. Besetment. Possession as by evil spirits; an imperative idea; a dominant delusion.

Obsolescence (*ob-so-les'-ens*) [*obsolescere*, to grow old]. The state of becoming old or going out of use. Also, the cessation of growth.

Obsolete (*ob'-so-lēt*) [*obsoletus*, p. p. of *obsolescere*, to wear out]. In biology, indistinct, imperfectly developed or rudimentary.

Obstetric (*ob-stet'-rik*) [*obstare*, to stand before]. Pertaining to the practice of obstetrics. **O. Position.** See *Postures, Table of.*

Obstetrician (*ob-stet-rish'-an*) [*obstare*, to stand before]. One who practises obstetrics.

Obstetrics (*ob-stet'-riks*) [*obstare*, to stand before]. The care of women in pregnancy, childbirth and the puerperal state.

Obstetrix (*ob-stet'-riks*) [*obstare*, to stand before]. A midwife.

Obstipation (*ob-stip-a'-shun*) [*obstipatio; obstipare*, to close tightly]. Constipation.

Obstipitas (*ob-stip'-it-as*) [*obstipus*, awry, stiff-necked; *stipes*, a stick]. Wry-neck; torticollis.

Obstruction (*ob-struk'-shun*) [*obstructio; obstruere*, to stop up]. Stoppage or blocking up of a canal or opening of the body. See *Imperforation, Occlusion.*

Obstruent (*ob'-stru-ent*) [*obstruere*, to close up]. 1. Obstructive; tending to obstruct. 2. In therapeutics or pathology, any remedy or agent closing the lumen or orifice of vessels or ducts.

Obstupefacient (*ob-stu-pe-fa'-she-ent*) [*obstupefacere*, to stupefy]. Narcotic or stupefying.

Obstupescentia (*ob-stu-pes-en'-she-ah*) [L.]. A state of stupefaction, with a look as of astonishment.

Obtected (*ob-tek'-ted*) [*ob*, over; *tegere*, p. p., *tectus*, to cover]. In biology, concealed under a neighboring part.

Obtund (*ob-tund'*) [*obtundere*, to dull]. To blunt or dull; to lessen, as pain.

Obtundent (*ob-tun'-dent*) [*obtundere*, to make dull]. Soothing; quieting. In therapeutics, any remedy that relieves or overcomes irritation or pain.

Obtundity (*ob-tun'-dit-e*) [*obtundere*, to make dull].

The state of being obtunded, or dulled; diminished sensibility.

Obturator (*ob′-tu-ra-tor*) [*obturator; obturare*, to stop up]. That which closes a cavity. In surgery, an instrument for closing an opening caused by a wound or by disease. **O. Artery.** See *Arteries, Table of.* **O., Dental,** an instrument used in the treatment of palatine defect when operative surgical means are not applicable. **O. Foramen,** a foramen in the anterior part of the os innominatum. See *Foramina, Table of.* **O. Muscle.** See *Muscles, Table of.* **O. Nerve.** See *Nerves, Table of.*

Obturbinate (*ob-ter′-bin-āt*) [*ob*, reversed; *turbo*, a top]. In biology, top-shaped, with the apex or peg-end up.

Obtuse (*ob-tūs′*) [*obtusus*, p. p. of *obtundere*, to blunt, dull]. Blunt.

Obtusifolious (*ob-tu-sif-o′-le-us*) [*obtusus*, blunted; *folium*, leaf]. In biology, having blunt leaves.

Obtusilobous (*ob-tu-sil-o′-bus*) [*obtusus*, blunted; *lobus*, a lobe]. In biology, having leaves with obtuse lobes.

Obtusion (*ob-tu′-zhun*) [*obtundere*, to blunt]. The blunting or weakening of the normal sharpness or strength of sensation; a symptom of certain diseases.

Obumbrant (*ob-um′-brant*) [*ob*, over; *umbrare*, to shadow, shade]. In biology, overhanging.

Obumbrate (*ob-um′-brāt*) [*ob*, over; *umbrare*, to shadow]. In biology, situated under an overhanging part.

Obuncous (*ob-ung′-kus*) [*ob*, against; *uncus*, bent in, hooked]. In biology, very crooked or hooked.

Obvallate (*ob-val′-āt*) [*obvallare*, to surround with a wall]. In biology, walled in.

Obvolute (*ob′-vo-lūt*) [*obvolvere*, to wrap]. In biology, the term applied to that form of vernation in which half of one leaf covers half of another; half-equitant.

Obvolvent (*ob-vol′-vent*) [*obvolvere*, to wrap]. In biology, curved downward or inward.

Occipital (*ok-sip′-it-al*) [*occipitalis*, occipital]. Pertaining to the occiput. **O. Artery.** See *Arteries, Table of.* **O. Bone,** the bone of the skull situated at its posterior, middle, and inferior part. See *Bones, Table of.* **O. Crest.** See *Crest.* **O. Fossa.** See *Fossa.* **O. Lobe.** See *Lobe.* **O. Nerve.** See *Nerves, Table of.* **O. Points.** See *Craniometric Points.* **O. Protuberance,** the prominence on the inner surface (*internal*) or on the outer surface (*external*) of the occipital bone. **O. Sinus.** See *Sinus.* **O. Triangle.** See *Triangles, Table of.* **O. Vertebra,** the occipital bone, in the vertebral theory of the skull.

Occipiten (*ok-sip′-it-en*) [*occiput*, occiput]. Belonging to the occipital bone in itself.

Occipito- (*ok-sip′-it-o-*) [*occiput*, occiput]. A prefix to denote connection with or relation to the occipital bone. **O.-atloidean,** pertaining conjointly to the occipital bone and the atlas. **O.-axoid,** or **O.-axial,** pertaining to both the occipital bone and the axis, or second vertebra. **O.-bregmatic,** pertaining conjointly to the occipital bone and the bregma. **O.-cotyloid,** in obstetrics, a term applied to a condition in which the fetus has the occiput directed toward the acetabulum of the mother. **O.-frontal,** both occipital and frontal. **O.-frontal Triangle.** See *Triangle.* **O.-frontalis.** See *Muscles, Table of.* **O.-mastoid,** relating to the occiput and the mastoid process. **O.-mental,** pertaining to chin and occiput. **O.-odontoid,** pertaining to the occipital bone and the odontoid process of the axis. **O.-parietal,** pertaining conjointly to the occipital and parietal bones of the head. **O.-posterior,** in obstetrics, a term applied to the condition in which the fetus has the head directed toward the mother's sacrum. **O.-sacral.** Synonym of *O.-posterior.* **O.-sternal Triangle.** See *Triangle.* **O.-temporal,** pertaining to the occiput and the temples.

Occiput (*ok′-sip-ut*) [*ob*, against; *caput*, the head: *gen. Occipitis: pl., Occipita*]. The back part of the head.

Occludent (*ok-lu′-dent*) [*occludere*, to shut up]. In biology, applied to parts that shut up or close.

Occlusio (*ok-lu′-ze-o*) [L.]. Closure. **O. pupillæ,** obliteration of the pupil. **O. pupillæ lymphatica,** obliteration of the pupil by a false membrane.

Occlusion (*ok-lu′ zhun*) [*occlusio; occludere*, to shut up]. 1. A closure, blocking or shutting up of a normally patent aperture, as of the anus or ear. A synonym of *Imperforation* and *Obstruction.* 2. In chemistry, the absorption by a metal, of gas in large quantities, as of hydrogen by platinum. 3. The full meeting of the masticating surfaces of the upper and lower teeth, in the position of rest.

Occlusive (*ok-lu′-siv*) [*occludere*, to shut up]. Effecting an occlusion, as an occlusive dressing, in surgery.

Occlusor (*ok-lu′-zor*) [*occludere*, p. p. *occlusus*, to close up: *pl.*, *Occlusores*]. In biology, an organ that closes an opening; or draws parts together.

Occult (*ok-kult′*) [*occultus*, hidden]. Hidden; concealed; not evident. **O. disease,** any disease the nature of which is not readily determined.

Occupation-diseases. Those caused by or connected with the occupation of the patient, divisible into:—*a. Irritant,* mechanic or chemic effects of materials: *b. Toxic,* from poisonous matter absorbed into the blood: and *c. Fatigue,* as in scrivener's palsy. **O. neurosis,** a neurosis occasioned by one's employment or trade, as writer's cramp. See, also, *Anapeiratic.*

Ocellar (*o-sel′-ar*) [*ocellus*, a little eye]. In biology, pertaining to ocelli.

Ocellatæ (*os-el-at′-e*) [*ocellus*, a little eye]. In biology, the marginal vesicles in the *Leptomedusæ.* Cf. *Ocellicyst.*

Ocellate (*os′-el-āt*) [*ocellatus*, having little eyes]. In biology, same as *ocellated;* having a colored patch like an eye, *e. g.*, certain feathers, flowers, butterflies' wings, or fishes' fins.

Ocellated (*os′-el-a-ted*) [*ocellus*, a little eye]. Resembling or having eyes.

Ocelli (*o-sel′-i*) [*ocellus*, dim. of *oculus*, an eye]. The simple eyes of insects.

Ocelliferous (*os-el-if′-er-us*) [*ocellus*, a little eye; *ferre*, to bear]. Same as *Ocellate.*

Ocelligerous (*os-el-ij′-er-us*) [*ocellus*, little eyes; *gerere*, to carry]. Same as *Ocellate.*

Ocellus (*o-sel′-us*) [a little eye: *pl.*, *Ocelli*]. In biology: (*a*) one of the simple eyes or pigment-spots of invertebrate animals. Cf. *Stemmatus;* (*b*) one of the elements of a compound eye; (*c*) one of the colored spots on many feathers, flowers, etc.

Ochema (*ok-e′-mah*) [ὄχημα, from ὀχεῖν, to carry]. A vehicle for medicines.

Ocher, Ochre (*o′-ker*) [ὠχρός, pale yellow]. A name given to clay variously colored by the oxids of iron. See *Pigments, Conspectus of.* **O.-colored Stools** a descriptive term applied to the dejecta of typhoid fever patients.

Ocherous, Ochreous (*o′-ker-us, o′-kre-us*) [ὠχρός, pale, wan]. In biology, brownish-yellow.

Ocheus (*ok′-e-us*) [ὀχεῖν, to carry]. The scrotum.

Ochlesis (*ok-le′-sis*) [ὄχλος, crowd]. Crowd-poisoning; disease due to over-crowding, and lack of ventilation.

Ochletic (*ok-let′-ik*) [ὄχλος, crowd]. Pertaining to, or of the nature of, ochlesis.

Ochlophobia (*ok-lo-fo′-be-ah*) [ὄχλος, crowd; φόβος, fear]. Morbid dread of crowds.

Ochlotic (*ok-lot'-ik*) [ὄχλος, crowd]. Same as *Ochletic*.

O. Fever. Synonym of *Typhus Fever*.

Ochopetalous (*ok-o-pet'-al-us*) [ὄχος, anything that holds; πέταλον, a petal]. In biology, having capacious petals.

Ochraceous (*o-kra'-se-us*) [ὠχρα, ocher]. Ocher-colored; yellowish-brown.

Ochre (*o'-ker*). See *Ocher*.

Ochriasis (*o-kri'-as-is*) [ὠχρός, yellow]. Sallowness of complexion.

Ochrocarpous (*o-kro-kar'-pus*) [ὠχρός, pale-yellow; καρπός, fruit]. In biology, having yellowish fruit.

Ochroid (*o'-kroid*) [ὠχρα, ocher; εἶδος, form]. Like ocher in color.

Ochroleukous (*o-kro-lu'-kus*) [ὠχρός, pale-yellow; λευκός, white]. In biology, yellowish-white.

Ochronosis (*o-kron'-o-sis*) [ὠχρός, yellow; νόσος, disease]. A brownish or blackish discoloration of cartilage and allied structures; it is probably an intensification of the pigmentation normally present in these structures, occurring in advanced life.

Ochropyra (*o-kro-pi'-rah*) [ὠχρός, yellow; πῦρ, fire]. Yellow fever.

Ochthe (*ok'-the*) [ὄχθη, a bank]. The edges of an ulcer.

Ochthiasis (*ok-thi'-as-is*). Synonym of *Molluscum*.

Ocrea (*ok'-re-ah*) [L., a greave: *pl.*, *Ocreæ*]. In biology, a sheath formed about the stem by one or both stipules.

Ocreate (*ōk'-re-āt*) [*ocrea*, a greave]. In biology, having a stipular sheath.

Ocreous (*o'-kre-us*) [ὠχρός, pale]. Resembling ocher.

Octagonal (*ok-tag'-o-nal*) [ὀκτώ, eight; γωνία, an angle]. Having eight sides and angles.

Octamerous (*ok-tam'-er-us*) [ὀκτώ, eight; μέρος, part]. In biology, having the parts in eights.

Octan (*ok'-tan*) [ὀκτώ, eight]. Returning every eighth day, as an *octan* fever.

Octandrous (*ok-tan'-drus*) [ὀκτώ, eight; ἀνήρ, a male]. In biology, having eight stamens.

Octane (*ok'-tān*) [ὀκτώ, eight], C_8H_{18}. The eighth member of the paraffin or marsh-gas series. See *Hydrocarbons, Table of*.

Octarius (*ok-ta'-re-us*) [ὀκτώ, eight]. An eighth part of a gallon. One pint. Symbol O.

Octavus humeri (*ok-ta'-vus-hu'-mer-i*). Synonym of *Teres minor*. See *Muscles, Table of*.

Octo- (*ok'-to-*) [ὀκτώ, eight]. A prefix denoting reference to the number eight.

Octoblast (*ok'-to-blast*) [ὀκτώ, eight; βλαστός, germ]. In biology, the eight-celled stage of a segmenting ovum.

Octobrachiate (*ok-to-bra'-ke-āt*) [ὀκτώ, eight; βραχίων, the arm]. In biology, having eight tentacles, rays, arms or brachia.

Octocerous (*ok-tos'-er-us*) [ὀκτώ, eight; κέρας, a horn]. In biology, having eight horns, tentacles, rays or arms.

Octocotyloid (*ok-to-kot'-il-oid*) [ὀκτώ, eight; κοτύλη, a hollow; εἶδος, form]. In biology, having eight fossettes or bothria.

Octogynous (*ok-toj'-in-us*) [ὀκτώ, eight; γυνή, a female]. In biology, having eight pistils.

Octolocular (*ok-to-lok'-u-lar*) [ὀκτώ, eight; *loculus*, dim. of *locus*, a place, cell]. In biology, having eight cells.

Octonemal, Octonematous (*ok-to-ne'-mal, ok-to-nem'-at-us*) [ὀκτώ, eight; νῆμα, thread]. In biology, having eight filamentous organs or appendages.

Octonocular (*ok-ton-ok'-u-lar*) [ὀκτώ, eight; *oculus*, eye]. In biology, eight-eyed.

Octoped, Octopede (*ok'-to-ped, ok'-to-pēd*) [ὀκτώ, eight; *pes*, foot]. In biology, an eight-footed creature.

Octopetalous (*ok-to-pet'-al-us*) [ὀκτώ, eight; πέταλον, a leaf]. In biology, having eight petals.

Octophthalmous (*ok-toff-thal'-mus*) [ὀκτώ, eight; ὀφθαλμός, eye]. In biology, having eight eyes.

Octophyllous (*ok-to-fil'-us*) [ὀκτώ, eight; φύλλον, a leaf]. In biology, having eight leaflets.

Octoradial (*ok-to-ra'-de-al*) [ὀκτώ, eight; *radius*, ray]. Same as *Octoradiate*.

Octoradiate (*ok-to-ra'-de-āt*) [ὀκτώ, eight; *radius*, ray]. In biology, having eight rays.

Octoroon (*ok-tor-oon'*) [ὀκτώ, eight]. The offspring of a white person and a quadroon.

Octosepalous (*ok-to-sep'-al-us*) [ὀκτώ, eight; *sepalum*, a sepal]. In biology, having eight sepals.

Octoses (*ok'-to-sēz*) [ὀκτώ, eight]. A group of the glucoses with the formula $C_8H_{16}O_8$. See *Carbohydrates, Table of*.

Octospermous (*ok-to-sper'-mus*) [ὀκτώ, eight; σπέρμα, seed]. In biology, producing eight seeds.

Octospore (*ok'-to-spōr*) [ὀκτώ, eight; σπόρος, seed]. In biology, a spore from many fungi and lichens, the asci of which produce eight spores each.

Octostichous (*ok-tos'-tik-us*) [ὀκτώ, eight; στίχος, line, row]. In biology, eight ranked.

Octylene (*ok'-til-ēn*) [ὀκτώ, eight], C_8H_{16}. A colorless liquid derived from octane.

Ocular (*ok'-u-lar*) [*oculus*, the eye]. 1. Pertaining to the eye. 2. An optic combination that refracts the diverging rays forming the real object-image so that they may pass through the pupil of the observer's eye; the eye-piece of a compound miscroscope. Like the simple microscope, it also forms a virtual or magnified image of the real image. **O., Campani's.** See *O., Huygenian*. **O. Cleft.** See *Cleft*. **O., Compensating,** an ocular specially constructed for use with the apochromatic objective. It serves to correct or compensate for aberrations in the objective outside the axis. **O. Cup.** See *Optic*. **O., Erecting,** one that is provided with an erecting prism and gives an erect image of the object. **O., Huygenian,** one that consists of two plano-convex lenses, the convexities being directed toward the objective. The lower and larger lens is the field-lens; the upper and smaller is the eye-lens. **O., Kellner's.** See *O., Orthoscopic*. **O., Micrometer,** is an ocular with which is connected a micrometer for the purpose of measuring the real image of the object. **O. Micrometer Ratio.** See *Ratio*. **O. Muscles, External,** the six muscles moving the globe of the eye. See *Muscles, Table of*. **O. Muscles, Internal,** the ciliary muscle and the iris. **O., Negative,** an ocular in which the real image formed by the objective lies somewhere between the two lenses or lens-systems forming the ocular. **O., Orthoscopic,** one that consists of a bi-convex field-glass and an achromatic double meniscus (bi-convex and bi-concave) eye-lens. **Os., Parfocal,** oculars of different powers which may be interchanged without putting the image wholly out of focus. **O., Periscopic** [περί, around; σκοπεῖν, to look]; a positive ocular devised by Gundlach; it has a double convex field-lens and a triplet eye-lens. **O., Positive,** one through which the real image is formed *outside* of the ocular, and is magnified by the entire system of ocular lenses like a simple microscope. **O., Projection,** an ocular especially designed for projecting the image formed by an objective on a screen for class-demonstration, or for photography. **O., Ramsden's,** an ocular consisting of two plano-convex lenses with their convex surfaces facing each other. It has been used in micrometry. **O., Searching,** an ocular of low power used for finding an object. It consists of a single

field-lens and a double eye-lens. **O. Sheath,** the loose sheath-like tissue extending from the apex of the orbit of the eye to the vertical diameter of the globe, the posterior part of which up to the passage of the tendons of the external ocular muscles is called *the Capsule of Bonnet,* and the anterior portion, *the Capsule of Tenon.* **O., Solid,** an eye-piece devised by Tolles. It consists of a solid piece of glass, with a moderate curvature at one end for a field-lens, and more greatly curved at the other end for use as an eye-lens. For a diaphragm a groove is cut transversely at the proper level and filled with black pigment. **O., Spectral,** an ocular with a direct-vision spectroscope connected with it. See *Micro-spectroscope.* **O., Spectroscopic.** See *O., Spectral* and *Micro-spectroscope.* **O. Spot,** a differentiated pigmented organ having the function of sight, found among the Protozoa, chiefly in the *Flagellata, e.g., Euglena* (pretty eye); the Colenterates (*Sarzia*); Actinozoa (*Actinia*), Asteridea, Echinidea, Rotifera, Trematoda, and Nematoda. **O. Vesicle.** See *Vesicle.* **O., Working,** an ocular used for ordinary microscopic observation, in contradistinction to one of very low power used for finding objects. There are both positive and negative forms.

Oculate (*ok'-u-lāt*) [*oculus,* an eye]. In biology, having eyes or eye-shaped markings.

Oculauditory (*ok-u-law'-dit-or-e*) [*oculus,* eye; *audire,* to hear]. In biology, combining the functions of eye and ear, as the marginal bodies or sense-organs of certain invertebrates.

Oculiferous (*ok-u-lif'-er-us*) [*oculus,* eye; *ferre,* to bear]. In biology, eye-bearing; applied to the eye-stalks of a crustacean or snail.

Oculiform (*ok'-u-lif-orm*) [*oculus,* eye; *forma,* shape]. In biology, resembling an eye.

Oculigerous (*ok-u-lij'-er-us*) [*oculus,* eye; *gerere,* to carry]. Same as *Oculiferous.*

Oculist (*ok'-u-list*). Synonym of *Ophthalmologist.*

Oculo- (*ok'-u-lo-*) [*oculus,* eye]. A prefix signifying relation with the eye. **O.-motor,** moving the eye. **O.-muscularis,** pertaining to the muscles of the eye. **O.-pupillary,** pertaining to the pupil of the eye. **O.-zygomatic,** pertaining to the eye and the zygoma. See *Jadelot's Lines.*

Oculomotorius (*ok'-u-lo-mo-to'-re-us*) [*oculus,* eye; *movere,* to move]. The third, or *motor oculi,* nerve. See *Nerves, Table of.*

Oculus (*ok'-u-lus*) [L., an eye: *pl., Oculi*]. In biology, an eye or leaf-bud, *e.g.,* in the potato. **O. bili.** See *Tabasheer.* **O. bovinus, O. bovis.** Synonym of *Hydrophthalmia.* **O. bubulus.** Synonym of *O. bovinus.* **O. cæsius,** glaucoma. **O. elephantinus.** Synonym of *Hydrophthalmia.* **O. lacrimans,** epiphora. **O. leporinus,** lagophthalmos. **O. mundi.** See *Tabasheer.*

Ocyodinic (*o-se-o-din'-ik*) [ὠκύς, swift; ὠδίς, to avail]. Oxytocic; hastening the delivery of the fetus.

Ocyphonic, Ocyphonous (*o-sif-on'-ik, o-sif'-on-us*) [ὠκύς, swift; φόνος, slaughter]. Killing quickly.

Ocytocic, Oxytoceous (*os-it-os'-ik, oks-it-os'-e-us*) [ὠκύς, swift; τόκος, birth; labor]. Hastening the process of childbirth; oxytocic.

Od (*ōd* or *od*) [an arbitrary name given by Baron von Reichenbach]. The supposititious force producing the phenomena of mesmerism.

Odaxesmus (*o-daks-es'-mus*) [ὀδαξησμός, a sharp biting]. The biting of the tongue, lip, or cheek, occurring during an epileptic fit.

Odaxetic (*o-daks-et'-ik*) [ὀδαξητικός, biting]. Giving rise to an itching or stinging sensation.

Odd-pinnate (*od-pin'-āt*) [ME., *od,* odd; *pinna,* a wing]. In biology, pinnate, with a terminal odd leaflet; imparipinnate.

-ode, -odes (*-ōd, -o'-dēz*) [ὠδε, like]. A suffix denoting likeness.

Odinagogue (*o-din'-ag-og*). Synonym of *Oxytocic.*

Odinolyontous (*o-din-ol-e-on'-tus*) [ὠδίς, pain; λύειν, to lose]. Soothing.

Odinopean (*o-din-o'-pe-an*) [ὠδίς, pain; ποιεῖν, to make]. Causing pain.

Odont- (*o'-dont-*). See *Odonto-.*

Odontagma (*o-don-tag'-mah*) [ὀδούς, tooth; ἀγνύναι, to break]. Same as *Odontoclasis.*

Odontagra (*o-don-ta'-grah*) [ὀδούς, tooth; ἄγρα, seizure]. Toothache; also, a kind of forceps for the surgical removal of teeth.

Odontalgia (*o-don-tal'-je-ah*) [ὀδούς, tooth; ἄλγος, pain]. Toothache. **O. nervosa,** neuralgic toothache.

Odontalgic (*o-don-tal'-jik*) [ὀδούς, tooth; ἄλγος, pain]. 1. Anti-odontalgic. 2. Relating to toothache. 3. A remedy for toothache.

Odontalgy (*o-don-tal'-je*). Same as *Odontalgia.*

Odontalite (*o-don'-tal-it*) [ὀδούς, a tooth; λίθος, a stone]. A petrified tooth.

Odontapotribe, Odontapotripsis (*o-don-tap'-o-trīb, o-don-tap-o-trip'-sis*) [ὀδούς, tooth; ἀπό, from; τρίβειν, to crush]. Wearing away of the surface of the teeth.

Odontatrophy (*o-don-tat'-ro-fe*) [ὀδούς, tooth; ἀτροφία, atrophy]. Atrophy of the teeth.

Odontelephas (*o-don-tel'-ef-as*). Synonym of *Dentine.*

Odonteuros (*o-don-tu'-ros*) [ὀδούς, tooth; εὐρώς, decay]. Dental caries.

Odontharpagra (*o-don-thar-pa'-grah*). Synonym of *Dentagra.*

Odonthercos (*o-don-ther'-kos*) [ὀδούς, tooth; ἕρκος, fence]. A set of teeth.

Odonthyalophthora (*o-dont-hi-al-off'-thor-ah*) [ὀδούς, tooth; ὕαλος, glass; φθείρειν, to destroy]. Destruction of the enamel of the teeth.

Odonthyalus (*o-dont-hi'-al-us*). Synonym of *Enamel.*

Odontia (*o-don'-she-ah*) [ὀδούς, tooth]. Odontalgia. **O. deformis,** deformity of the teeth, arising either from error of shape, position, or malformation of the jaws or alveolar border. **O. incrustans,** tartar of the teeth.

Odontiasis (*o-don-ti'-as-is*) [ὀδοντιᾶν, to cut teeth]. Dentition. The cutting of teeth.

Odontiater (*o-don-te-a'-ter*) [ὀδούς, tooth; ἰατρός, physician]. A dentist.

Odontiatria (*o-don-te-a-tre'-ah*) [ὀδούς, tooth; ἰατρεία, a healing]. Dental surgery.

Odontic (*o-don'-tik*) [ὀδούς, tooth]. Appertaining to the teeth.

Odontinoid (*o-don'-tin-oid*) [ὀδούς, ὀδόντος, tooth; εἶδος, resemblance]. Resembling or having the nature of teeth.

Odontitis (*o-don-ti'-tis*) [ὀδούς, tooth; ιτις, inflammation]. *Dentium inflammatio;* inflammation of the teeth. Formerly a synonym of dental caries, when this affection was supposed to be an inflammation of the dentine.

Odonto- (*o-don'-to-*) [ὀδούς, gen. ὀδόντος, a tooth]. A prefix that signifies resemblance to, connection with, or relation to a tooth.

Odontoblast (*o-don'-to-blast*) [ὀδούς, tooth; βλαστός, germ]. In biology, one of the formative cells of dentine; one of the columnar cells forming the outer layer of the pulp of teeth; they do not enter into the dentine which they have secreted (as do osteoblasts into bone), but they all remain at its base and send into it numerous finely-branched processes, which run parallel to each other in as many little channels of the

bony substances. The fibers are connected by fine anastomoses. (A. Lang.)

Odontoblastic (*o-don-to-blas'-tik*) [ὀδούς, tooth; βλαστός, germ]. Of the nature of, or pertaining to, an odontoblast.

Odontobothriitis (*o-don-to-both-re-i'-tis*) [ὀδούς, tooth; βοθρίον, a little cavity; ιτις, inflammation]. Inflammation of the socket of a tooth.

Odontobothrium (*o-don-to-both'-re-um*) [ὀδούς, tooth; βοθρίον, a little cavity]. The alveolus of a tooth.

Odontoceramic (*o-don-to-ser-am'-ik*) [ὀδούς, tooth; κεραμος, clay]. Pertaining to porcelain teeth.

Odontochalix (*o-don-tok'-al-iks*) [ὀδούς, tooth; χάλιξ, gravel]. Dental cement.

Odontochirurgical (*o-don-to-ki-rur'-jik-al*) [ὀδούς, tooth; χειρουργία, surgery]. Pertaining to dental surgery.

Odontoclasis (*o-don-tok'-las-is*) [ὀδούς, tooth; κλάειν, to break]. The breaking of a tooth.

Odontoclast (*o-don'-to-klast*) [ὀδούς, tooth; κλάειν, to break]. A multinuclear protoplasmic cell engaged in the process of absorbing the fang of a deciduous tooth. Numbers of these cells exist between the milk-tooth and the permanent tooth.

Odontocnesis (*o-don-tok-ne'-sis*) [ὀδούς, tooth; κνῆσις, itching]. A painful itching sensation in the gums.

Odontodesmium (*o-don-to-dez'-me-um*) [ὀδούς, tooth; δεσμός, bond]. A ligament described as holding the teeth in their sockets.

Odontodiarrhea (*o-don-to-di-ar-e'-ah*) [ὀδούς, tooth; διά, through; ῥοία, flow]. Diarrhea due to disturbances of dentition.

Odontodynia (*o-don-to-din'-e-ah*) [ὀδούς, tooth; ὀδύνη, pain]. Toothache.

Odontogen (*o-don'-to-jen*) [ὀδούς, tooth; γεννᾶν, to produce]. A material producing dentine.

Odontogenic (*o-don-to-jen'-ik*) [ὀδούς, tooth; γεννᾶν, to produce]. Pertaining to the origin and development of teeth.

Odontogeny (*o-don-toj'-en-e*) [ὀδούς, tooth; γενής, producing]. In biology, the origin and development of teeth.

Odontoglyph (*o-don'-to-glif*) [ὀδούς, tooth; γλύφειν, to carve]. An instrument used for scraping the teeth.

Odontoglyphous (*o-don-tog'-lif-us*) [ὀδούς, tooth; γλύφειν, to scrape]. In biology, having furrowed teeth.

Odontography (*o-don-tog'-ra-fe*) [ὀδούς, tooth; γράφειν, to write]. The descriptive anatomy of the teeth.

Odontoid (*o-don'-toid*) [ὀδούς, tooth; εἶδος, like]. Resembling a tooth. Serrated. **O. Ligament.** See *Ligament*. **O. Process,** the dentate process of the second cervical vertebra.

Odontolith (*o-don'-to-lith*) [ὀδούς, tooth; λίθος, a stone]. The calcareous stone-like accretion on the teeth popularly known as "tartar."

Odontologic (*o-don-to-loj'-ik*) [ὀδούς, tooth; λόγος, science]. Pertaining to odontology.

Odontologist (*o-don-tol'-o-jist*) [ὀδούς, tooth; λόγος, science]. One versed in odontology.

Odontology (*o-don-tol'-o-je*) [ὀδούς, tooth; λόγος, science]. The science of dentition, or of the teeth.

Odontoloxia, Odontoloxy (*o-don-to-loks'-e-ah, o-don'-to-loks-e*) [ὀδούς, a tooth; λοξός, slanting]. Irregularity or obliquity of the teeth.

Odontoma (*o-don-to'-mah*) [ὀδούς, tooth; ὄμα, tumor: *pl., Odontomata*]. A new formation arising in connection with the teeth and presenting the structure and appearance of teeth.

Odontome (*o-don'-tōm*). See *Odontoma*.

Odontomous (*o-don'-to-mus*) [ὀδούς, teeth; ὄμα, a tumor]. Pertaining to, of the nature of, or affected with, an odontoma.

Odontomys (*o-don'-to-mis*) [ὀδούς, tooth; μῦς, mouse]. The dental pulp.

Odontonecrosis (*o-don-to-ne-kro'-sis*) [ὀδούς, tooth; νέκρωσις, death]. Dissolution or decay of the tissues of the teeth. See *Necrosis of the Teeth*.

Odontonosology (*o-don-to-nos-ol'-o-je*) [ὀδούς, tooth; νόσος, disease; λόγος, science]. A treatise on diseases of the teeth; also that branch of medicine that treats of diseases of the teeth.

Odontoparallaxis (*o-don-to-par-al-aks'-is*) [ὀδούς, tooth; παράλλαξις, deviation]. Irregularity of the teeth; deviation of one or more of the teeth from the natural position.

Odontopathology (*o-don-to-path-ol'-o-je*) [ὀδούς, tooth; πάθος, a disease; λόγος, science]. The science of diseases of the teeth.

Odontopathy (*o-don-top'-ath-e*) [ὀδούς, tooth; πάθος, suffering]. An abnormal or pathologic condition of the teeth, or of the organs connected with them; dental disease.

Odontoperiosteum (*o-don'-to-per-e-os'-te-um*). Synonym of *Periodonteum*.

Odontophatne (*o-don-to-fat'-ne*). Synonym of *Alveolus*.

Odontophatnitis (*o-don-to-fat-ni'-tis*). Synonym of *Odontobothriitis*.

Odontophore (*o-don'-to-for*) [ὀδούς, tooth; φέρειν, to bear]. In biology, a comprehensive name for those mouth-parts of a mollusc known as *rasp, radula, radular apparatus, buccal mass, lingual ribbon,* or *tongue*.

Odontophorous (*o-don-toff'-or-us*) [ὀδούς, tooth; φέρειν, to bear]. Bearing or having teeth.

Odontophyia (*o-don-to-fi'-e-ah*) [ὀδούς, tooth; φύειν, to grow]. Dentition.

Odontopiester (*o-don-to-pi-es'-ter*) [ὀδούς, tooth; πιεστήρ, squeezer]. An instrument for exerting pressure on the teeth; it is used to relieve odontalgia.

Odontoplerosis (*o-don-to-ple-ro'-sis*) [ὀδούς, tooth; πλήρωσις, filling]. The filling of teeth.

Odontoprisis (*o-don-to-pri'-sis*) [ὀδούς, tooth; πρίσις, a sawing]. Stridor dentium, or grinding of the teeth.

Odontorine, Odontorrhine (*o-don-to-rin'*) [ὀδούς, tooth; ῥίνη, file]. A tooth-file. See *File, Dental*.

Odontorrhagia (*o-don-tor-a'-je-ah*) [ὀδούς, tooth; ῥηγνύναι, to burst forth]. Hemorrhage from the socket of a tooth.

Odontorrheumalgia (*o-don-to-ru-mal'-je-ah*) [ὀδούς, tooth; ῥεῦμα, flow; ἄλγος, pain]. Rheumatic toothache.

Odontorrhizophthisis (*o-don-tor-iz-off'-this-is*) [ὀδούς, tooth; ῥίζα, root; φθίσις, wasting]. Caries of the root of a tooth.

Odontorthosia (*o-don-tor-tho'-ze-ah*) [ὀδούς, tooth; ὀρθωσις, a straightening]. That part of dental surgery concerned in the straightening of irregularly growing teeth.

Odontoschisis (*o-don-tos'-kis-is*) [ὀδούς, tooth; σχίζειν, to split]. Splitting of a tooth.

Odontoschism (*o-don'-to-skizm*) [ὀδούς, tooth; σχίζειν, to split]. A fissure in a tooth.

Odontoseisis (*o-don-to-si'-sis*) [ὀδούς, tooth; σεῖσις, a shaking; agitation]. Looseness of the teeth, arising from partial or total destruction of the alveolar processes, caused most frequently by disease of the gums. See *Looseness of the Teeth*.

Odontosis (*o-don-to'-sis*) [ὀδούς, tooth]. The formation and development of teeth; dentition.

Odontosisimus (*o-don-to-siz'-im-us*). See *Looseness of the Teeth*.

Odontosmegma (*o-don-to-smeg'-mah*) [ὀδούς, tooth;

σμέχειν, to cleanse]. Anything employed for cleaning teeth; a tooth-powder or tooth-brush.

Odontospasmos (*o-don-to-spaz'-mos*) [*ὀδούς*, tooth; *σπασμός*, spasm]. Convulsions from difficult dentition.

Odontosphacelis, Odontosphacelismus (*o-don-to-sfas'-el-is, o-den-to-sfas-el-iz'-mus*). Synonyms of *Dental Caries*.

Odontosteophyte, Odontosteophyton (*o-don-tos'-te-o-fit, o-don-tos-te-off'-it-on*) [*ὀδούς*, tooth; *ὀστέον*, bone; *φύειν*, to grow]. A bony outgrowth from a tooth.

Odontosteresis (*o-don-to-ster-e'-sis*) [*ὀδούς*, tooth; *στέρησις*, privation]. Loss of the teeth.

Odontostomatous (*o-don-to-sto'-mat-us*) [*ὀδούς*, tooth; *στόμα*, mouth]. In biology, applied to animals having jaws that bite like teeth.

Odontostomous (*o-don-tos'-to-mus*). Same as *Odontostomatous*.

Odontosynerismus (*o-don-to-sin-er-iz'-mus*) [*ὀδούς*, tooth; *συνερίζειν*, to strike together]. Chattering of the teeth.

Odontotechny (*o-don'-to-tek-ne*) [*ὀδούς*, tooth; *τέχνη*, art]. Dental surgery.

Odontotheca (*o-don-to-the'-kah*) [*ὀδούς*, tooth; *θήκη*, case]. The follicle of a tooth.

Odontotherapeia (*o-don-to-ther-ap-i'-ah*) [*ὀδούς*; tooth, *θεραπεύειν*, to heal]. See *Odontotherapy*.

Odontotherapy (*o-don-to-ther'-ap-e*). Dental therapeutics; the treatment or care of the teeth.

Odontothrypsis (*o-don-to-thrip'-sis*). See *Odontotripsis*.

Odontotrimma (*o-don-to-trim'-ah*) [*ὀδούς*, tooth; *τρίμμα*, a pulverized substance: *pl.*, *Odontotrimmata*]. A tooth-powder.

Odontotripsis (*o-don-to-trip'-sis*)[*ὀδούς*, tooth; *τρίβειν*, to rub]. The natural abrasion or wearing away of the teeth. See *Abrasion of the Teeth*.

Odontotryphy, Odontotrypy (*o-don-tot'-rif-e, o-don-tot'-rip-e*) [*ὀδούς*, tooth; *τρυπάειν*, to perforate]. The perforation of a tooth for the purpose of removing pus, or diseased pulp.

Odophone (*o'-do-fōn*) [*odor*, smell, scent, odor]. A scale or gamut of odors arranged by the French chemist, Septimus Piesse.

Odor (*o'-dor*) [L.]. A scent, smell or perfume. Fragrance.

Odoramentum (*o-dor-am-en'-tum*) [*odoramentum*, a perfume; from *odorare*, to perfume]. A remedy used on account of its odor.

Odoration (*o-dor-a'-shun*) [*odoratio*, a smelling]. 1. The act of smelling. 2. The sense of smell.

Odoriferous (*o-dor-if'-er-us*) [*odor*, odor; *ferre*, to carry]. Bearing odor or scent. Fragrant.

Odoroscope, Odorscope (*o'-dor-o-skōp, o'-dor-skōp*) [*odor*, odor; *σκοπεῖν*, to examine]. An instrument for testing odors.

Odous (*o'-dus*) [*ὀδούς*, a tooth]. A tooth.

O'Dwyer's Method. See *Treatment, Methods of*.

O'D.'s Tubes, peculiar tubes used for intubation of the larynx.

-odyne, -odynia (*-o-dīn, -o-din'-e-ah*) [*ὀδύνη*, pain]. A suffix denoting pain.

Odynephatous (*o-din-ef'-at-us*). Synonym of *Anodyne*.

Odynephobia (*o-din-ef-o'-be-ah*) [*ὀδύνη*, pain; *φόβος*, fear]. Morbid dread of pain; algophobia.

Odynephorous (*o-din-ef'-or-us*) [*ὀδύνη*, pain; *φορεῖν*, to bear]. Producing pain.

Odynphagia (*o-din-fa'-je-ah*) [*ὀδύνη*, pain; *φαγεῖν*, to eat]. Painful deglutition.

Odynuria (*o-din-u'-re-ah*) [*ὀδύνη*, pain; *οὖρον*, urine]. The painful passage of urine.

Œciomania (*e-ke-o-ma'-ne-ah*). See *Oikiomania*.

Œcium (*e'-se-um*) [*οἰκίον*, a house: *pl.*, *Œcia*]. In biology, the special receptacle, attached to the zoœcium, in which the ova complete their development into larvæ, in many of the *Cheilostomata* among Polyzoa. The *ovicell*.

Œcoid (*e'-koid*). See *Ecoid*.

Œcology (*e-kol-o'-je*) [*οἶκος*, a house, family; *λόγος*, science]. In biology, the science of vegetable and animal economy and activity as shown by their modes of life, *e. g.*, socialism, parasitism. "The terms biology and œcology are not interchangeable, because the latter only forms part of physiology." (Hæckel.)

Œcophobia (*e-ko-fo'-be-ah*). See *Oikophobia*.

Œdema, Œdematous (*e-de'-mah, e-dem'-at-us*). See *Edema, Edematous*.

Œleoblast (*e'-le-o-blast*) [*ἔλαιον*, oil; *βλαστός*, germ]. In biology, a mass of large, irregular, non-nucleated, polygonal bodies situated near the cloacal opening of Salpa and other compound Ascidians. The bodies are opaque, coarsely granular and consist of a sort of yolk-material. The function of the œleoblast is undetermined. Vogt called it the *statoblast*; it is also spelled *elœoblast*.

Œnanthylic (*e-nan-thil'-ik*). See *Enanthylic*.

Œnomania (*e-no-ma'-ne-ah*). See *Enomania*.

Oertel's Method. See *Treatment, Methods of*.

Oese [Ger.]. In biology, a platinum-wire needle, looped, with a glass handle, employed in bacteriologic investigation.

Œsophagism (*e-sof'-aj-izm*). See *Esophagismus*.

Œsophagitis (*e-sof-aj-i'-tis*). See *Esophagitis*.

Œsophagus (*e-sof'-ag-us*). See *Esophagus*.

Œstromania (*es-tro-ma'-ne-ah*). See *Estromania*.

Œstruation (*es-tru-a'-shun*). See *Estruation*.

Œstrum (*es'-trum*). See *Estrum*.

Off [ME., *off*, of; same as preposition *of*]. The name commonly applied to the animal on the right hand side of a yoke of oxen or a team of horses, or to the right side and the right fore-foot and hind-foot of a single animal; the antonym of *near*. **O.-set**, a short, rooting branch. A short stolon.

Offal (*off'-awl*) [ME., *offal*, fallen remnants]. Refuse of any kind.

Official (*off-ish'-al*) [*officium*, an office]. In pharmacy and materia medica, a medicine or preparation emanating from and sanctioned by the pharmacopeia.

Officinal (*of-is'-in-al*) [*officina*, a workshop]. For sale in the shops; kept on sale in apothecaries' shops; authorized in pharmacy. **O. Preparations**, those that are kept for sale in apothecary stores.

Offspring (*off'-spring*) [ME., *ofspring*, progeny]. Descent; family; progeny.

Ogmomele (*og-mo-me'-le*) [*ὀγμος*, furrow; *μήλη*, probe]. A grooved probe.

Ogston's Line. See *Lines, Table of*. **O.'s Operation.** See *Operations, Table of*.

Ohio Scratches. Same as *Army Itch*.

Ohm (*ōm*) [after Dr. G. S. *Ohm*, an electrician]. In electricity, the unit of resistance. Practically, it is the resistance of a pure silver wire, one meter in length and one millimeter in diameter. The theoretic or absolute unit is $\frac{1}{1000000000}$ part of the unit practically used. See *Electric Units*. **O.'s Law.** See *Law*.

Ohmad (*o'-mad*) [after Dr. G. S. *Ohm*, an electrician]. Same as *Ohm*.

Ohmic (*o'-mik*) [after Dr. G. S. *Ohm*, an electrician]. Pertaining to an ohm.

-oid (*-oid*) [*εἶδος*, like]. A suffix signifying likeness or resemblance.

Oïdium (*o-id'-e-um*) [dim. of *ᾠόν*, egg]. A genus of parasitic fungi, *Oïdium*, or *Erysiphe tuckeri*: the disease of the vine it causes is called *white disease* or

Meunier. **O. albicans** is found in thrush, upon the tongue. **O. lactis**, the white mold found on milk, bread, etc. **O. tuckeri**, the conidian stage of *Erysyphe tuckeri*. See *Mildew*.

Oidtmann's Purgative. The rectal injection of glycerin, two grams.

Oigopsid (*oi-gop'-sid*) [*οἰγειν* for *ἀνοίγειν*, to open; *ὄψις*, vision]. In biology, applied to such cephalopods as have an opening in the fibrous capsule of the eye, through which the lens projects (*Loligophes*, *Ommastrephes*); or, the lens being absent, the capsule of the eye becomes an open cup (*Nautilus*). The opposite of *Myopsid*.

Oikiomania (*oi-ke-o-ma'-ne-ah*) [*οἰκεῖος*, domestic; *μανία*, mania]. Domestic perversity; shrewishness manifested specially in one's own home.

Oikoid (*oi'-koid*) [*οἶκος*, house; *εἶδος*, like]. The stroma of red corpuscles, so called by Brücke.

Oikophobia (*oi-ko-fo'-be-ah*) [*οἶκος*, house; *φόβος*, dread]. Morbid dread, or dislike of home, or of a house.

Oil [ME., *oile*, oil]. A greasy liquid not miscible with water, and usually of lighter specific gravity, composed of glyceryl and a fatty acid. In a wider sense the word is applied also to mineral hydrocarbons and to solid fats. The oils are liquid or solid substances characterized by unctuousness to the touch, and inflammability. They may be volatile or they may be non-volatile or fixed. The term is also applied to any oily substance, as oil of vitriol, *q. v.* See also *Oleum*. **O. of Allspice**, an aromatic oil, and a constituent of bay-rum. Dose ♏ij–vj. See *Pimenta*. **O. of Almond**, an essential volatile oil from almond kernels, used as a perfume in dermatology, and in making *Unguentum aquæ rosæ*. See *Amygdala*. Dose ♏¼–j. **O. of Amber**, an essential oil. It is a stimulant, antispasmodic, and diuretic internally, and externally an irritant and rubefacient. Dose gtt. v–x. See *Succinum*. **O. of American Wormwood.** See *O. of Chenopodium*. **O. of Anda**, an essential oil from *Joannesia princeps*. It is a purgative. Dose gtt. l–lxx. **O. of Anise**, a volatile oil; it is an ingredient of paregoric. Dose ♏j–v. **O. of Asafetida**, a volatile oil; a carminative and antispasmodic. Dose gtt. j–ij. **O.-bag**, in biology, a bag or cyst containing oil. **O., Banks**, an unrefined cod-liver oil obtained from the livers which are allowed to putrefy in barrels on the ships. It is darker and more offensive than the better oils. **O. of Basil**, a flavoring agent. **O. of Bay**, a narcotic volatile oil from the berries of *Laurus nobilis*. **O. of Bayberry**, an oil from the leaves of *Myrica acris*, used in the manufacture of bay-rum. **O. of Ben**, a fixed oil from the seeds of *Moringa pterygosperma*; it is used internally as a purgative, and externally in gout and rheumatism. **O. of Benzoin**, an essential oil used in perfumery. **O. of Bergamot**, a volatile oil from the fruit of *Citrus bergamia*, used in the manufacture of perfumes. **O. of Black Mustard**, a fixed oil from the seeds of *Sinapis nigra*. It is used in pharmacy and as a carminative. Dose ♏⅛–¼. See *Sinapis*. **O. of Black Pepper**, a volatile oil from the unripe fruit of *Piper nigrum*. Externally it is an irritant; internally, a carminative. Dose ♏¼–j. See *Piper*. **O.-blue.** See *Pigments, Conspectus of*. **O., Bone**, a volatile product obtained by the dry distillation of bones. **O., British**, a rubefacient liniment. It is a variety of petroleum. **O. of Cade**, an oil derived from the wood of *Juniperus communis*, and used in dermatology. See *Juniper*. **O. of Cajuput**, a volatile oil distilled from the leaves of *Leukadendron cajuputi*. Its actions are similar to those of *O. of Turpentine*. Dose ♏j–v. **O.-cake**, a side-product obtained in the manufacture of oils. It is a compacted mass of crushed seeds or nuts, from which the oil has been expressed or extracted. It contains all of the woody fiber and mineral matter of the seed or nut the residue of oil or fatty matter not extracted, and, that which gives it special value, the proteids or nitrogenous constituents. It is a most valuable cattle-food and is used as a basis for artificial fertilizers. The following table gives the composition of a number of the most important oil-cakes (*Sadtler's Industrial Organic Chemistry*).

	Water.	Fat.	Non-nitrogenous Materials Woody Fiber.	Ash.	Proteid Material.	Nitrogen, Per cent.
Earth-nut cake,	11.50	8.80	31.10	7.25	41.35	6.80
Cotton-seed cake,	13.00	7.50	51.00	8.50	20.00	2.90
Rape-oil cake,	10.12	9.23	41.93	6.48	31.88	5.00
Colza-oil cake,	11.35	9.00	42.82	6.28	30.55	4 50
Sesame-oil cake,	10.35	10.10	38.80	9.80	31.93	5.00
Beech-nut cake,	11.40	8.50	49.80	5.30	24 00	3.20
Linseed cake,	10.56	9.83	44.61	6.50	28.50	4.25
Camelina cake,	9.60	9.20	50.90	7.00	23.30	3.60
Poppy-oil cake,	9.50	8.90	37.67	11.43	32.50	5.00
Sunflower-oil cake,	10.20	8.50	48.90	11.40	21 00	2.40
Hempseed cake,	10.00	8.26	48.00	12.24	21.50	3.30
Palm-nut cake,	9.50	8.43	40.95	10.62	30.40	4.50
Cocoa-nut cake,	10.00	9.20	40.50	10.50	30.00	4.50

O. of Calamus, a volatile oil from the root of *Acorus calamus*. It is a stomachic. **O. of Camomile**, from the flowers of *Anthemis nobilis*. It is a stomachic. **O., Camphorated**, one impregnated with camphor; a solution of camphor in olive-oil. See *Camphor*. **O. of Camphorwood**, an essential oil from *Dryobalanops aromatica*. Its properties are similar to those of camphor. **O., Canadian**, oil of winter-green. **O. of Cananga**, an essential oil from the flowers of *Cananga odorata*, used in the manufacture of perfumery. **O. of Caraway**, a volatile oil from the fruit of *Carum carvi*. It is a carminative and flavoring agent. Dose ♏j–v. See *Carum*. **O. of Cardamom**, a volatile oil from the seeds of *Elettaria cardamomum*. It is a carminative. **O. of Carmaru**, a fixed oil from the fruit of *Dipteryx eboënsis*. It is used in manufacturing perfumes. **O., Carron**, a useful application to burns, consisting of equal or nearly equal parts of linseed-oil and lime-water. It is named after the Carron iron-works in Scotland, where it was first employed. **O. of Cassia**, an essential oil from the bark and buds of *Cassia lignea*, used in making perfumery. **O. of Castonha**, a fixed oil from *Brazil-nuts*, used in making perfumery. **O., Castor**, a fixed oil from the seeds of *Ricinus communis*, used as a purgative. Dose ʒss. See *Ricinus*. **O. of Celery**, an essential oil from the fruit and leaves of *Apium graveolens*. It has emmenagogic properties. See *Apium*. **O., Cedar**, a fragrant oil obtained from the red Virginia cedar, used in microscopy as a clarifying agent. **O., Chabert**, an oil consisting of

3 parts of oil of turpentine and 1 of animal oil. It is used as is *O. of Turpentine.* **O. of Chaulmoogra,** a fixed oil expressed from the seeds of *Gynocardia odorata.* It is used in dermatology and rheumatism. Dose gtt. v–x. **O. of Chenopodium,** a volatile oil derived from the fruit of *Chenopodium anthelminticum.* It is an efficient anthelmintic. Dose ♏v–xv. **O. of Cinnamon,** a volatile oil from the bark of *Cinnamomum zeylanicum.* It is used in medicine and perfumery. Dose gtt. j–v. **O. of Cloves,** an essential oil from cloves. It is used in histology, dentistry, and perfumery. **O., Cod-liver.** See *Morrhua.* **O. Color.** See *Pigments, Colors and Dyestuffs.* **O. of Copaiba,** a volatile oil from the *Balsamum copaibæ.* It is used as a diuretic. Dose ♏x–xv. **O. of Coriander,** a volatile oil from the fruit of *Coriandrum sativum.* It is a carminative. Dose ♏ij–v. **O., Croton,** a fixed oil from the seeds of *Croton tiglii.* It is a purgative. Dose ♏ ½–ij. **O. of Cubeb,** a volatile oil from the fruit of *Piper cubeba.* It is a stimulant diuretic. Dose ♏ v–xx. **O., Dead,** a heavy oil. **O., Drying,** one that on drying loses its oily properties and becomes a transparent flexible solid. Such oils are used as bases of paints and varnishes. **O., Dugong,** an oil from the blubber of dugongs, used sometimes as a substitute for cod-liver oil. **O.-emulsion,** an emulsion containing expressed oil of almonds 15 parts; acacia 15 parts, syrup of acacia 20 parts; orange-flower water 15 parts, and water 100 parts. **O. of Ergot,** a fixed oil from the ergot of rye. It is an ecbolic. See *Ergot.* **O. of Erigeron,** a volatile oil from the herb *Erigeron canadense.* Its action is the same as that of oil of turpentine. Dose ♏ x–ʒss. **O., Essential,** a volatile oil, so called because it contains the essence or active principle of the plant. **O., Ethereal,** heavy oil of wine, *q.v.;* also an essential oil. **O. of Eucalyptus,** a volatile oil from *E. globulus,* and other species of *Eucalyptus.* It is an antiseptic and stomachic. Dose ♏ v–xxx. **O. of Eulachon,** an oil from the blubber of candle-fish, used as a substitute for cod-liver oil. **O. of Euphorbia,** a cathartic oil from the seeds of *Euphorbia lathyris.* **O., Fatty,** a fixed oil. The fatty oils, as distinguished from the mineral oils and the volatile oils, belong to the class of compound ethers. They are salt-like bodies, composed of characteristic acids (oleic, palmitic, and stearic), known as fatty acids, in combination with an alcohol or base. In most cases the base is the triatomic alcohol, glycerin, so that the oils are said to be glycerids of the several fatty acids. Some few, known as waxes, do not contain glycerin, but, instead, a monatomic alcohol in combination with the fatty acid. Most of the animal and vegetable fats contain three proximate constituents, olein, palmitin and stearin, the combinations of oleic, palmitic, and stearic acids respectively with glycerin. In the more liquid oils the olein predominates, in the more solid, palmitin or stearin. The so-called "drying oils" contain a different acid—linoleic acid—in combination with glycerin. The fish-oils contain a variety of the lower fatty acids and some solid unsaponifiable alcohols like cholesterin. The most satisfactory classification of the oils and fats, is that of A. H. Allen, which is here given in abstract. I. *Olive-oil Group.*—Vegetable oleins. Vegetable non-drying oils. These are lighter than the oils of groups II, III, and IV, and yield solid elaidins with nitrous acid. The group includes olive, almond, earth-nut, ben, rape-seed, and mustard oils. II. *Cotton-seed-oil Group.*—Intermediate between drying and non-drying oils. These oils undergo more or less drying on exposure and yield little or no elaidin. This group includes cotton-seed, sesamé, sun-flower, hazel-nut, and beech-nut oils. III. *Linseed-oil Group.*—Vegetable drying oils that yield no elaidin. They are of less viscosity than the non-drying oils. This group includes linseed, hemp-seed, poppy-seed, niger-seed, and walnut oils. IV. *Castor-oil Group.*—Medicinal oils. These are very viscous and of high density. The group includes castor and croton oils. V. *Palm-oil Group.*—Solid vegetable fats, which do not contain notable quantities of glycerids of the lower fatty acids. The group includes palm-oil, cacao-butter, nutmeg-butter, and shea-butter. VI. *Cocoanut-oil Group.*—Solid vegetable fats, in part wax-like. Several of these oils contain notable proportions of the glycerids of the lower fatty acids. The group includes cocoanut-oil, palm-nut-oil, laurel-oil, Japan wax, and myrtle-wax. VII. *Lard-oil Group.*—Animal oleins, which do not dry notably on exposure, and which yield solid elaidins with nitrous acid. The group includes neat's-foot oil, bone-oil, lard-oil, and tallow-oil. VIII. *Tallow Group.*—Solid animal fats. These are predominantly glycerids of palmitic and stearic acids, although butter contains lower glycerids. The group includes tallow, lard, bone-fat, wool-fat, butter-fat, oleomargarin, and manufactured stearin. IX. *Whale-oil Group.*—Marine animal oils, characterized by offensive odor and a reddish-brown color when treated with caustic soda. The group includes whale, porpoise, seal, menhaden, cod-liver, and shark-liver oils. X. *Sperm-oil Group.*—Liquid waxes that are not glycerids but ethers of monatomic alcohols. They yield solid elaidins. The group includes sperm-oil, bottle-nose-oil, and dolphin-oil. XI. *Spermaceti Group.*—Waxes proper. These are compound ethers of the higher monatomic alcohols, with the higher fatty acids in a free state. The group includes spermaceti, beeswax, Chinese wax, and carnauba wax. **O. of Fennel,** a volatile oil from the fruit of *Fæniculum officinale.* It is a carminative, and is also used in perfumery. Dose ♏ij–v. **O., Fixed,** a fatty acid; one of certain bodies soluble in ether and chloroform, and obtained by expression from various organic substances. See *O., Fatty.* **O. of Galanga,** a volatile oil from the root of *Alpinia officinarum.* **O. of Garlic,** an essential oil formerly used in medicine. It is derived from the bulbs of *Allium sativum.* **O. of Geranium,** an essential oil from species of *Pelargonium,* used in the manufacture of perfumery. **O. of Ginger,** an essential oil from the roots of *Zingiber officinale.* It is a carminative and flavoring agent. Dose ♏ ½–j. **O.-gland,** the uropygial gland of birds, secreting the oil used in dressing their plumage. **O.-globules,** in microscopy, are prepared by beating a small drop of clove oil with mucilage. In focusing up with central light, the bright center of the globule is clearest last. With oblique light the bright spot will appear on the side toward the mirror. **O., Grain,** amyl alcohol. **O., Gray,** an oily substance or ointment made by triturating mercury with oil or liquid paraffin. The quantity of mercury varies from 1 to 33 per cent. **O. of Hazel,** a fixed oil from hazel-nuts used in the manufacture of perfumes. **O., Heavy,** the substances distilled from benzene at between 210° and 400° C. **O., Heavy** (*of wine*), the product obtained when alcohol is treated with an excess of sulphuric acid. It consists of several ethers and other compounds. **O. of Hedeoma,** oil of pennyroyal, a volatile oil from the leaves and tops of *Hedeoma pulegioides.* It is a carminative, and is used externally to drive away mosquitoes. Dose ♏ ij–x. **O.-immersion,** the use of oil as the medium between the objective and the cover-glass. **O., Infused,** a class of medicated oils,

(*olea infusa*, N. F.), prepared by digesting a drug in ammoniated oil and alcohol, the ammonia and alcohol being evaporated in the process. **O. of Jasmine**, an essential oil from *Jasminum odoratissimum*, used in perfumery. **O. of Jatropha**, a purgative oil derived from the seeds of *Jatropha purgans*. **O. of Jonquin**, an essential oil from the flowers of *Narcissus jonquilla*, used in perfumery. **O. of Juniper**, a volatile oil from the berries of *Juniperus communis*. It is a diuretic and diaphoretic. Dose ♏ v–xx. **O. of Lavender**, a volatile oil from species of *Lavandula* used as a carminative and flavoring agent. Dose ♏ j–v. **O. of Lemon**, a volatile oil from the rind of lemons. It is used in perfumery, and as a flavoring agent. Dose ♏ j–v. **O., Light**, the distillates of benzene at between 110° and 210° C. **O. of Lilies**, an essential oil from the flowers of *Lilium candidum*, used in perfumery. **O., Linseed.** See *Oleum lini*. **O. of Mace**, an essential oil from *Myristica officinalis*, used as a carminative and flavoring agent, and in perfumery. **O. of Marjoram**, an essential oil from *Origanum majorana* used in perfumery. **O., Menhaden**, an oil from the blubber of menhaden, used as a substitute for cod-liver oil. **O., Middle**, the distillation-products of benzene between 170° and 230° C. **O. of Mignonet**, an essential oil from the flowers of *Reseda odorata* used in perfumery. **O., Mineral**, refined petroleum. **O. of Mint**, an essential oil from *Mentha viridis*, used as a carminative, and in perfumery. Dose ♏ ij–v. **O. of Mirbane.** See *Mirbane*. **O. of Morrhua.** See *Morrhua*. **O. of Mustard.** See *Sinapis*. **O. of Myrrh**, an essential oil from gum myrrh. **O. of Myrtle**, an essential oil from *Myrtus communis*, used in perfumery. **O., Neatsfoot**, a lubricant oil from the feet of neat cattle. **O. of Neroli**, an essential oil from the flowers of bitter orange, used as a perfume. **O., Nobel's Explosive**, nitroglycerin. **O., Non-drying**, a non-oxidizing oil, such as almond oil. **O., Olive.** See *Olive*. **O. of Orange.** See *Orange*. **O. of Orris**, an essential oil from the roots of *Iris florentina*, used as a perfume and flavoring agent. **O., Ozonized**, an oil containing ozone. Ozonized oil of turpentine is an antidote in phosphorus-poisoning. **O., Palm.** See *Palm*. **O., Parsley.** See *Apiol*. **O. of Pennyroyal**, an essential oil from *Hedeoma pulegioides*. It is a stimulant, emmenagogue, and carminative, and is also used to keep away mosquitoes. Dose gtt. ij–x. **O. of Pepper**, the volatile oil from the seeds of *Piper nigrum*. **O. of Peppermint**, the volatile oil from *Mentha piperita*. It is a carminative, anodyne, and antiseptic. Dose gtt. j–iij. **O., Phosphorated**, an oil charged with phosphorus. **O. of Pimenta**, a volatile oil from the fruit of *Pimenta officinalis*. It is a carminative. Dose gtt. ij–vj. **O., Provence**, an olive-oil of superior quality. **O., Rock**, petroleum. See *Petrolatum*. **O. of Rose**, an essential oil from the fresh flowers of *Rosa damascena*. It is used as a perfume. See *Attar of Rose*. **O. of Rosemary**, the essential oil from the flowering tops of *Rosmarinus officinalis*. It is a carminative and anodyne. Dose gtt. j–ij. **O. of Rue**, the essential oil derived from *Ruta graveolens*. It is a vermifuge and emmenagogue. Dose gtt. j–v. **O. of Sage**, a volatile oil derived from *Salvia officinalis*. It is used as a mouth-wash in stomatitis. **O. of Sandalwood**, *Oleum santali*, distilled from the wood of *Santalum album*. It is used in gonorrhea. Dose gtt. x–xx. **O. of Sassafras**, a volatile oil from the wood of *Sassafras officinale*. It is a carminative. Dose gtt. ij–x. **O.-seed**, castor-bean; the seed of the *Ricinus communis*. **O., Shore**, cod-liver oil prepared on shore; it is the finest quality. **O. of Spearmint**, an essential oil from *Mentha viridis*. It is a carminative. Dose gtt. ij–v. **O., Sperm**, a yellowish oil derived from the *Physeter macrocephalus*. It is used as a lubricant. **O. of Spermaceti**, derived from spermaceti. **O., Straits**, the first oil obtained by the exposure of the livers of cod-fish to the sun in casks, on board the ships. **O., Sweet.** See *Oleum olivæ*. **O.-sugar.** See *Oleo-saccharum*. **O. of Tansy**, an essential oil derived from *Tanacetum vulgare*. It is used as an emmenagogue and oxytocic. **O. of Tar**, *Oleum picis liquidæ*, obtained from wood-tar. It has been largely used in dermatology. See *Pix*. **O. of Thyme**, a volatile oil from *Thymus vulgaris*. It yields *Thymol* on oxidation. **O. of Tobacco**, an empyreumatic oil from tobacco, formerly used as an application to ulcers. **O.-tube**, in biology, a longitudinal canal filled with aromatic oil, found in certain fruits. **O., Virgin**, the finest variety of olive-oil, made from olives that are not quite ripe. **O., Volatile**, or *essential oil*, is one characterized by a pungent, aromatic odor. These oils usually vaporize at ordinary temperatures, and leave no permanent stain on paper. **O., Whale.** See under *O., Fatty*. **O. of Wintergreen**, an essential oil from the leaves of *Gaultheria procumbens*. It is used in chronic cystitis and rheumatism. Dose gtt. v–x.

Oinomania (*oi-no-ma'-ne-ah*). See *Enomania* and *Methomania*.

Ointment (*oint'-ment*). See *Unguentum*. **O., Banyer's**, an ointment used in chronic eczema and favus. It is composed of calomel, 2 drams; burnt alum and carbonate of lead, each 4 drams; Venice turpentine, 6 drams; spermaceti ointment, 1½ ounces. **O., Cyrillo's**, used by inunction in syphilis. It consists of perchlorid of mercury, 4 parts; lard, 32 parts. **O., Maury's**, an ointment largely used as an application to chronic ulcers. It contains one dram of nitrate of mercury and half a dram each of powdered opium and rhubarb to an ounce of simple ointment.

Okada, Bacillus of. See *Bacteria*, *Synonymatic Table of*.

Okenian Bodies [after Lorenz *Oken*, the naturalist, Jena, 1779–1851]. *Oken'sche Körper*, a name applied by Rathke to the primitive kidneys or Wolffian bodies.

Old (*ōld*) [ME., *old*, old]. Advanced in life; having many years. **O. Age**, senility; senectus.

Olea (*o'-le-ah*) [ἔλαία, the olive-tree]. 1. A genus of trees. See *Olive*. 2. Plural of *Oleum*, *q. v.* **O. infusa**, infused oils.

Oleaginous (*o-le-aj'-in-us*) [*oleum*, oil]. Oily.

Oleamen (*o-le-a'-men*) [L.: *pl.*, *Oleamina*]. An oily, soft ointment or liniment.

Oleander (*o-le-an'-der*). See *Nerium*.

Oleandrin (*o-le-an'-drin*) [a corruption from *olea*, olive-tree; *laurus*, laurel]. A poisonous alkaloid from *Nerium oleander*.

Oleate (*o'-le-āt*) [*oleum*, oil: *pl.*, *Oleata*]. A salt formed from oleic acid. A mixture of oleic acid with certain medicinal principles. There are three official oleates in pharmacy, *oleatum hydrargyri*, *oleatum veratrinæ*, and *oleatum zinci*, neither of which is a definite chemic compound. The *oleatum aconitinæ*, *oleatum plumbi*, and *oleatum quininæ* are recognized in the National Formulary.

Olecranal, Olecranial (*o-lek'-ran-al*, *o-lek-ra'-ne-al*) [ὠλέκρανον, the head of the elbow]. Pertaining to the olecranon.

Olecranarthritis (*o-lek-ran-ar-thri'-tis*) [ὠλέκρανον, head of elbow; ἄρθρον, joint; ιτις, inflammation]. Inflammation of the elbow-joint.

Olecranarthrocace, Olecranocace (*o-lek-ran-arth-rok'-*

as-e, *o-lek-ran-ok'-as-e*) [*ὠλέκρανον*, the head of the elbow; *ἄρθρον*, joint; *κακός*, evil]. Inflammation of the elbow-joint.

Olecranoid (*o-lek'-ran-oid*) [*ὠλέκρανον*, head of the elbow; *εἶδος*, like]. Resembling the olecranon. **O. Fossa**, the fossa at the dorsal side of the distal end of the humerus for the reception of the olecranon.

Olecranon (*o-lek'-ran-on*) [*ὠλέκρανον*; *ὠλένη*, elbow; *κράνιον*, head]. The large process forming the head of the ulna.

Olefiant Gas (*o-lef'-e-ant*) [*oleum*, oil; *ficare*, to make]. Heavy oil of carbon. See *Ethylene*.

Olefin (*o'-lef-in*) [*oleum*, oil; *ficare*, to make]. The name of a series of unsaturated hydrocarbons containing two hydrogen atoms less than the paraffins or ethanes, C_nH_{2n}. They are produced with paraffins in the dry distillation of many complicated carbon compounds; hence their presence in illuminating gas and in tar-oils. The lower members of the series are gases; the intermediate members, ethereal liquids; the higher (from $C_{16}H_{32}$ up), solids. They boil at points a few degrees higher than the corresponding paraffins. For *Table of Olefins* see under *Hydrocarbon*.

Oleic Acid (*o'-le-ik*). See *Acid*.

Oleiferous (*o-le-if'-er-us*) [*oleum*, oil; *ferre*, to bear]. Producing oil.

Olein (*o'-le-in*) [*oleum*, oil], $C_{57}H_{104}O_6$. One of the most widely distributed of the natural fats; the trioleic ether of glyceryl. It is a colorless oil at ordinary temperatures, with little odor and a faint sweetish taste, insoluble in water, readily soluble in alcohol and ether.

Oleo- (*o'-le-o-*) [*oleum*, oil]. A prefix to denote connection with or relation to an oil.

Oleomargarin (*o-le-o-mar'-gar-in*) [*oleum*, oil; *μάργαρος*, the pearl oyster]. Butterin; an artificial butter made by removing the excess of stearin from tallow or suet (or from lard in winter seasons), and flavoring the residue with the natural flavoring-principle of butter. The fat is melted at a temperature not exceeding 110° F.—otherwise the product becomes granular and coarse—and in cooling, the excess of stearin is separated by crystallization; the remainder is oleomargarin. When prepared from pure materials, the artificial product is less liable to become rancid than ordinary dairy butter, being free from the bacteria frequently found in the latter. The following analysis of oleomargarin is given by Dr. Bell:—

ANALYSIS OF OLEOMARGARIN OR BUTTERIN.

Water.	Salt.	Curd.	Fat.	Specific Gravity at 100° F.	Percentage of Fixed Acids.	Percentage of Soluble Acids.	Melting-point, Fahrenheit.
14.30	3.81	0.48	81.41	903.84	94.34	. .	82°
11.21	1 70	1.73	85.36	902.34	94.83	0.66	78°
12.33	4.00	1.09	82.58	903.15	95.04	0.47	79°
5.32	1.09	0.67	92.92	903.79	96.29	0.23	81°
13.21	3.99	1.07	81.73	901.36	95.60	0.16	78°

Oleometer (*o-le-om'-et-er*) [*oleum*, oil; *μέτρον*, measure]. An instrument for ascertaining the weight and purity of oil.

Oleoresin (*o-le-o-rez'-in*) [*oleum*, oil: *resina*, resin; *pl.*, *Oleoresinæ*]. In pharmacy, a preparation consisting chiefly of a mixture of natural oils and resins extracted from vegetables by percolation with stronger ether. There are six official *oleoresinæ*.

Oleosaccharum (*o-le-o-sak-ar'-um*) [*oleum*, oil; *σάκχαρον*, sugar: *pl.*, *Oleosacchara*]. An oil-sugar; a preparation made by saturating thirty grains of sugar with one drop of volatile oil.

Oleose (*o'-le-ōz*) [*oleosus*, oily]. Oily.

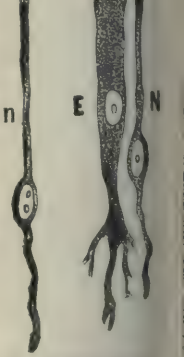
Oleosity (*o-le-os'-it-e*) [*oleosus*, oily]. The property of being oily or fatty.

Oleous (*o'-le-us*) [*oleosus*, oily]. Oily; having the character of oil.

Olera (*o-ler'-ah*) [*olus*, a pot-herb]. In biology, the name given by early botanists to the kitchen-herbs.

Oleraceous (*o-ler-a'-se-us*) [*olus*, a pot-herb; *oleraceus*, resembling herbs]. Esculent, as a pot-herb.

Oleum (*o'-le-um*) [L.: *pl.*, *Olea*]. See *Oil*. **O. æthereum**, ethereal oil, a volatile liquid consisting of equal volumes of heavy oil of wine, and ether. **O. catharticum**, oil of juniper. See *Juniper*. **O. cetaceum**, whale-oil. **O. cinereum.** See *Gray Oil*. **O. fagi**, the empyreumatic oil of beech, useful in various skin-diseases. Unof. **O. phosphoratum.** See *Oil*, *Phosphorated*, and *Phosphorus*. **O. rusci**, Russian oil; the empyreumatic oil of birch, useful in various skin-diseases. Unof. **O. terræ**, rock-oil.



Olfaction (*ol-fak'-shun*) [*olfacere*, to smell]. The function of smelling.

Olfactive (*ol-fak'-tiv*) [*olfacere*, to smell]. Synonym of *Olfactory*. **O. Angle**, the angle formed by the line of the olfactory fossa and the os planum of the sphenoid bone.

Olfactometer (*ol-fak-tom'-et-er*) [*olfactus*, smell; *μέτρον*, measure]. An instrument for measuring the power of smell in any given case.

Olfactor (*ol-fak'-tor*) [*olfacere*, to smell]. A unit of olfactory sensibility.

Olfactory (*ol-fak'-to-re*) [*olfacere*, to smell]. Pertaining to the sense or organ of smell. **O. Angle.** See *Olfactive Angle*. **O. Bulb.** See *Bulb*. **O. Cells.** The cells of the nasal fossæ forming the peripheral end-organs of the olfactory apparatus. **O. Center**, the cerebral center that appreciates smell, supposed by Munk to be in the hippocampal gyrus. **O. Cleft**, a slit between the tip of the middle turbinated bone and the nasal septum. **O. Clubs**, the *clavillæ marginales*, or *condyli marginales* of medusæ. **O. Foramina.** See *Foramina*, *Table of*. **O. Fossa.** See *Fossa*. **O. Ganglion**, the olfactory bulb. **O. Glomeruli.** See *Glomerulus*. **O. Groove.** See *O. Sulcus*. **O. Lobe**, the olfactory tubercle, tract, bulb, and roots, considered as a whole. **O. Membrane**, the mucous membrane of the nose. **O. Nerve** (*Stirling*). See *Nerves*, *Table of*. **O. Pit**, the primitive ectodermal invagination to become the nasal cavity. **O. Plate**, one of the two areas of thickened ectoderm immediately above the primitive oral cavity, and in contact with the wall of the fore-brain; it is the earliest indication of the nasal mucous membrane. **O. Region**, the area of distribution of the olfactory nerve. **O. Roots**, the regions connecting the olfactory tract with the cerebral hemispheres. **O. Sulcus**, the furrow for the olfactory tract

Olfactory Cells. N. From human being. n. From frog. E. Supporting cell

and bulb on the cribriform plate of the ethmoid, and on the orbital surface of the cerebral hemispheres. **O. Tract**, the central portion of the olfactory lobe, terminating anteriorly in the olfactory bulb, and posteriorly in the olfactory tubercle. **O. Trigone**, a triangular gray area forming the base of the *O. Tuber*. **O. Tuber, O. Tubercle.** See *Tuber*. **O. Ventricle**, a prolongation of the cavity of the lateral ventricle into the olfactory lobe. It is rarely found in the adult brain, though present in the fetus and in most animals.

Olibanum (*o-lib'-an-um*) [Ar., *al-lubān*, frankincense]. A gum-resin produced by various Asiatic and E. African trees, mainly of the genus *Boswellia;* true frankincense. It is now little used, except in certain plasters and as a fumigant. Unof.

Olibene (*ol'-ib-ēn*) [Ar., *al-lubān*, frankincense], $C_{10}H_{16}$. A hydrocarbon found in oil of olibanum.

Oligæmia (*ol-ig-e'-me-ah*). See *Oligemia*.

Oligandrous (*ol-ig-an'-drus*) [ὀλίγος, few; ἀνήρ, a male]. In biology, having few stamens.

Oliganthous (*ol-ig-an'-thus*) [ὀλίγος, few; ἄνθος, a flower]. In biology, having few flowers.

Oligarch (*ol'-ig-ark*) ['Ολῑγαρκεια, contentment with little]. In biology, containing few fibro-vascular bundles; applied also to fibro-vascular bundles that have few rays.

Oligemia (*ol-ig-e'-me-ah*) [ὀλίγος, scant; αἷμα, blood]. A diminished quantity of the blood. **O. hypalbuminosa**, diminution in the proteids of the blood. **O. sicca**, diminution in the volume of blood by loss of water. **O. vera**, diminution in the quantity of the blood, as a whole.

Oligemydria (*ol-ig-em-id'-re-ah*). Synonym of *Anhydremia*.

Oligohydria (*ol-ig-hi'-dre-ah*) [ὀλίγος, scanty; ὕδωρ, water]. Deficiency of the fluids of the body.

Oligo- (*ol'-ig-o-*)[ὀλίγος, few]. A prefix that signifies want or deficiency.

Oligoblennia (*ol-ig-o-blen'-e-ah*) [ὀλίγος, little; βλέννα, mucus]. A deficient secretion of mucus.

Oligocardia (*ol-ig-o-kar'-de-ah*) [ὀλίγος, few; καρδία, heart]. Abnormal smallness of the heart.

Oligocarpous (*ol-ig-o-kar'-pus*) [ὀλίγος, few; καρπός, fruit]. In biology, having few fruits.

Oligocatantes (*ol-ig-o-kat-an'-tēz*) [ὀλίγος, scant; κατάντης, steep]. Lissauer's term for a skull in which the angle formed between the radius fixus and the line joining the hormion and the staphylion is between 20° and 23°.

Oligocholia (*ol-ig-o-ko'-le-ah*) [ὀλίγος, few; χολή, bile]. A deficiency of bile.

Oligochromemia (*ol-ig-o-kro-me'-me-ah*) [ὀλίγος, few; χρῶμα, color; αἷμα, blood]. Deficiency of hemoglobin in the blood.

Oligochromemic (*ol-ig-o-kro-me'-mik*) [ὀλίγος, few; χρῶμα, color; αἷμα, blood]. Pertaining to, affected with, or of the nature of, oligochromemia.

Oligochrosis (*ol-ig-o-kro'-sis*) [ὀλίγος, few; χρῶσις, a coloring]. Deficiency of hemoglobin in the blood-corpuscles.

Oligochylia (*ol-ig-o-ki'-le-ah*) [ὀλίγος, scant; χυλός, chyle]. A deficiency of chyle.

Oligochymia (*ol-ig-o-ki'-me-ah*) [ὀλίγος, scant; χυμός, juice]. A deficiency of chyme.

Oligocopria (*ol-ig-o-kop'-re-ah*) [ὀλίγος, few; κόπρος, excrement]. Deficiency of excrement.

Oligocystic (*ol-ig-o-sis'-tik*) [ὀλίγος, few; κύστις, cyst]. Having few cysts or open spaces.

Oligocythemia (*ol-ig-o-si-the'-me-ah*) [ὀλίγος, few; κύτος, cell; αἷμα, blood]. A deficiency of red corpuscles in the blood; a symptom of nearly all forms of anemia, but especially of pernicious anemia.

Oligodacrya (*ol-ig-o-dak'-re-ah*) [ὀλίγος, few; δάκρυον, tear]. Deficiency of the tears.

Oligodactylia (*ol-ig-o-dak-til'-e-ah*) [ὀλίγος, few; δάκτυλος, finger]. A condition characterized by a deficiency of fingers.

Oligoerythrocythemia (*ol-ig-o-er-ith-ro-si-the'-me-ah*) [ὀλίγος, scanty; ἐρυθρός, red; κύτος, cell; αἷμα, blood]. Deficiency of the coloring-matter of the red corpuscles of the blood.

Oligogalactia (*ol-ig-o-gal-ak'-te-ah*) [ὀλίγος, scant; γάλα, milk]. Deficiency in the secretion of milk.

Oligohemia (*ol-ig-o-he'-me-ah*). See *Oligemia*.

Oligohydramnios (*ol-ig-o-hi-dram'-ne-os*) [ὀλίγος, scant; ὕδωρ, water; ἀμνίον, the amnion]. A deficiency in the quantity of the amniotic fluid. It is a rare condition, occurring once in 3000 or 4000 pregnancies.

Oligohydria (*ol-ig-o-hi'-dre-ah*). Same as *Oligohydria*.

Oligokatantes (*ol-ig-o-kat-an'-tēz*). See *Oligocatantes*.

Oligomania (*ol-ig-o-ma'-ne-ah*) [ὀλίγος, few; μανία, madness]. Insanity with delusions relating to a few subjects. Cf. *Oligopsychia*.

Oligomenorrhea (*ol-ig-o-men-or-e'-ah*) [ὀλίγος, few; μήν, month; ῥοία, flow]. Insufficiency of the menstrual flow.

Oligomerous (*ol-ig-om'-er-us*) [ὀλίγος, few; μέρος, part]. In biology, having few segments, somites, members, or metameres.

Oligopepsia (*ol-ig-o-pep'-se-ah*) [ὀλίγος, scant; πέψις, digestion]. Feebleness of digestion.

Oligopetalous (*ol-ig-o-pet'-al-us*) [ὀλίγος, few; πέταλον, a petal]. In biology, having only a few petals.

Oligophyllous (*ol-ig-off'-il-us*) [ὀλίγος, few; φύλλον, a leaf]. In biology, having few leaves.

Oligopionia (*ol-ig-o-pi-o'-ne-ah*) [ὀλίγος, scant; πίων, fat]. Wasting; emaciation.

Oligopodous (*ol-ig-op'-o-dus*) [ὀλίγος, few; πούς, a foot]. In biology having only a few feet.

Oligoposia (*ol-ig-o-po'-ze-ah*) [ὀλίγος, scanty; πόσις, drink]. Defective desire for drinking.

Oligopsychia (*ol-ig-op-si'-ke-ah*) [ὀλίγος, scant; ψυχή, mind]. Fatuity; imbecility.

Oligopyrenemia (*ol-ig-o-pi-ren-e'-me-ah*) [ὀλίγος, scanty; πυρήν, a fruit-stone; αἷμα, blood]. Deficiency of red corpuscles in the blood.

Oligoria (*ol-ig-o'-re-ah*) [ὀλίγος, few, scant; ὦρα, heed, notice]. Susceptibility to but few mental impressions; oligopsychia.

Oligosepalous (*ol-ig-o-sep'-al-us*) [ὀλίγος, few; *sepalum*, a sepal]. In biology, having only a few sepals.

Oligosialia (*ol-ig-o-si-a'-le-ah*) [ὀλίγος, scant; σιάλον, saliva]. Deficiency of saliva.

Oligospermatic (*ol-ig-o-sper-mat'-ik*) [ὀλίγος, scant; σπέρμα, seed]. Pertaining to oligospermia.

Oligospermia (*ol-ig-o-sper'-me-ah*) [ὀλίγος, scant; σπέρμα, seed]. A deficiency in the secretion of semen.

Oligospermism (*ol-ig-o-sperm'-izm*). See *Oligospermia*.

Oligospermous (*ol-ig-o-sper'-mus*)[ὀλίγος, few; σπέρμα, seed]. In biology, having few seeds.

Oligospondylous (*ol-ig-o-spon'-dil-us*) [ὀλίγος, few; σπόνδυλος, vertebra]. Having fewer vertebræ than normal.

Oligosteatosis (*ol-ig-o-ste-at-o'-sis*) [ὀλίγος, scant; στέαρ, tallow]. Deficiency of the sebaceous secretion.

Oligostemonous (*ol-ig-o-ste'-mon-us*) [ὀλίγος, few; στήμων, stamen]. Same as *Oligandrous*.

Oligotokous (*ol-ig-ot'-o-kus*) [ὀλίγος, few; τίκτειν, τεκεῖν, to bear.] In biology, producing few at a birth.

Oligotrichia (*ol-ig-o-trik'-e-ah*) [ὀλίγος, few, scant; θρίξ, hair]. Scantiness or thinness of the hair.

Oligotrophous (*ol-ig-ot'-ro-fus*) [ὀλίγος, scant; τροφή, nourishment]. Only slightly nutritious.

Oligotrophy (*ol-ig-ot'-ro-fe*) [ὀλίγος, few; τροφή, nourishment]. Defective or imperfect nutrition.

Oligozoöspermia (*ol-ig-o-zo-o-sper'-me-ah*) [ὀλίγος, few; ζῷον, animal; σπέρμα, seed]. Abnormal fewness of the spermatozoa.

Oliguresis (*ol-ig-u-re'-sis*). See *Oliguria.*

Oliguria (*ol-ig-u'-re-ah*) [ὀλίγος, scanty; οὖρον, urine]. A diminution in the quantity of urine excreted.

Oligydria (*ol-ig-id'-re-ah*) [ὀλίγος, scanty; ἱδρώς, sweat]. Ischidrosis; a deficiency in the sweat.

Olisthema (*ol-is-the'-mah*) [ὀλισθάνειν, to slip]. Dislocation.

Oliva (*o-le'-vah*) [L.]. The olivary body of the brain.

Olivaceous (*ol-iv-a'-se-us*) [*oliva*, olive]. In biology, olive-green.

Olivæ, Oleum (*o-le'-ve o'-le-um*). See *Olive-oil.*

Olivary (*ol''-iv-a-re*) [*oliva*, olive]. Pertaining to an olive; like an olive. In anatomy, pertaining to the oliva. **O. Bodies,** the olive-shaped bodies laterad of the anterior pyramids of the medulla oblongata. **O. Eminence,** the small, rounded, transverse prominence of the body of the sphenoid bone immediately cephalad of the pituitary fossa. **O. Fasciculus.** See *Fasciculus.* **O. Nucleus,** the corpus dentatum of the olivary body. **O. Peduncle,** the mass of fibers entering the hilum of the olivary body. **O. Process.** See *Process.*

Olive (*ol''-iv*) [*oliva*, an olive]. 1. The olive-tree. 2. The fruit of the olive-tree. 3. The Olivary Body, *q. v.* **O.-oil,** *Oleum olivaræ; Sweet Oil, Salad Oil;* the oil expressed from the fruit of *Olea europæa.* The purest oil is nearly inodorous, pale-yellow, with a pure oily taste, and a specific gravity of .918 at 15° C. It does not decompose or become rancid easily, and congeals at 32° F. to a granular solid mass. It is used extensively as an article of food or condiment, in pharmacy, as an illuminant and lubricant, in soap-making, and as a cathartic in the place of castor oil.

Oliver, Sign of. See *Signs and Symptoms, Table of.*

O.'s Test. See *Tests, Table of.*

Oliverin (*ol-iv'-er-in*) [*oliva*, olive]. A body obtained from *Olea europæa;* it has been used instead of quinin. Unof.

Oliviform (*ol-iv'-if-orm*) [*oliva*, an olive; *forma*, form]. In biology, olive-shaped.

Olivil (*ol''-iv-il*) [*oliva*, olive; ὕλη, matter], $C_{14}H_{18}O_5$. A crystalline body found in resin of wild olives.

Ollier's Layer. See *Layer, Osteogenetic.*

Olophlyctis (*ol-o-flik'-tis*) [ὀλοφλυκτίς, herpes]. Herpes; a dark vesicular skin-eruption. [Rare.]

Olophonia (*ol-o-fo'-ne-ah*) [ὅλος, whole; φωνή, voice]. The condition of having a loud and harsh voice.

-oma (*-o'-mah*) [ὄμα, tumor: *pl.*, *-omata*]. A termination signifying a neoplasm or tumor.

Omacephalus (*o-mas-ef'-al-us*) [ὦμος, shoulder; κεφαλή, head]. A variety of omphalositic monsters of the species paracephalus, in which there are present the characteristics of paracephalus except that there is more imperfect development, with absence of the upper extremities.

Omagra (*o-ma'-grah*) [ὦμος, shoulder; ἀγρα, seizure]. Gout in the shoulder.

Omalgia (*o-mal''-je-ah*) [ὦμος, shoulder; ἀλγος, pain]. Pain about the shoulder.

Omarthralgia (*o-mar-thral''-je-ah*) [ὦμος, shoulder; ἄρθρον, joint; ἄλγος, pain]. Pain in the shoulder-joint.

Omarthritis (*o-mar-thri'-tis*) [ὦμος, shoulder; ἄρθρον, joint; ιτις, inflammation]. Inflammation of the shoulder-joint.

Omarthrocace (*o-mar-throk'-as-e*) [ὦμος, shoulder; ἄρθρον, joint; κακός, evil]. Disease of the shoulder-joint.

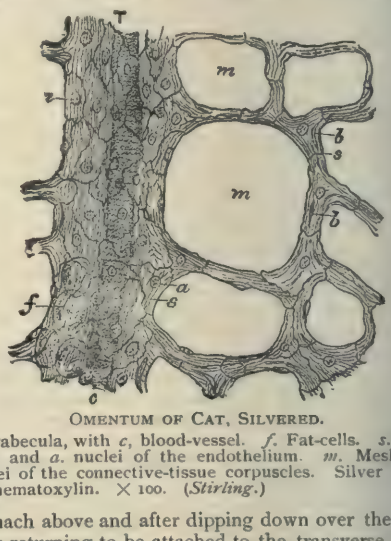
Omasal (*o-ma'-sal*) [*omasum*, a paunch]. Pertaining to the omasum.

Omasum (*o-ma'-sum*) [*omasum*, a paunch: *pl.*, *Omasa*]. The third stomach of a ruminant; it is also called the *psalterium*, and *manyplies.* Cf. *Abomasum; Reed.*

Omatocia (*o-mat-o'-se-ah*). See *Omotocia.*

Omeire (*o-mi'-ra*) [African]. A vinous and acetous fermented milk used in parts of Africa.

Omelysis (*o-me'-lis-is*) [ὠμήλυσις, bruised meal of raw corn]. Barley or wheat-meal used for poultices.



Omental (*o-men'-tal*) [*omentum*, the caul]. Pertaining to the omentum. **O. Foramen.** See *Foramina, Table of.* **O. Hernia.** See *Epiplocele.* **O. Sac.** See *Sac.*

Omentitis (*o-men-ti'-tis*) [*omentum*, omentum; ιτις, inflammation]. Inflammation of the omentum or caul.

Omentocele (*o-men'-to-sēl*) [*omentum*, omentum; κήλη, hernia]. Omental hernia.

Omentulum (*o-men'-tu-lum*) [dim. of *omentum*, omentum]. The smaller omentum.

Omentum (*o-men'-tum*) [L.]. A fold of the peritoneum connecting the abdominal viscera. **O. colicum,** the part of the great omentum of the fetus that in adult life becomes the hepato-colic ligament. **O., Gastric.** See *O., Greater.* **O., Gastro-colic,** the large peritoneal fold attached to the greater curvature of the stomach above and after dipping down over the intestines returning to be attached to the transverse colon. **O., Gastro-hepatic,** a double fold of peritoneum passing from the lesser curvature of the stomach to the transverse fissure of the liver. On the left side it includes the esophagus; on the right its edges are free and inclose all the structures issuing from or entering the transverse fissure of the liver, the hepatic vessels and nerves, and the bile-duct. Behind it is the foramen of Winslow. **O., Gastro-splenic,** the fold of peritoneum passing from the stomach to the spleen. **O., Greater.** See *O., Gastro-colic.* **O., Hepato-gastric.** See *O., Gastro-hepatic.* **O., Lesser.** Synonym of *O., Gastro-hepatic.* **O. majus,** the greater omentum. **O. minus,** the gastro-hepatic or lesser omentum.

OMENTUM OF CAT, SILVERED.

T = Trabecula, with *c*, blood-vessel. *f*. Fat-cells. *s*. Silver-lines, and *a*. nuclei of the endothelium. *m*. Meshes. *b*. Nuclei of the connective-tissue corpuscles. Silver nitrate and hematoxylin. × 100. (*Stirling.*)

Omichesis (*o-mik-e'-sis*) [ὀμιχεῖν, to urinate]. Urination.

Omichma (*o-mik'-mah*) [ὄμιχμα, urine]. Urine.

Omicholin (*o-mik'-o-lin*) [ὄμιχμα, urine], $C_{24}H_{39}NO_5$.

A resinous substance said to give the fetid odor to putrid urine.

Omission, Death of Children by. In medical jurisprudence, a form of child-murder from neglect or improper attendance at or shortly after birth.

Omitis (*o-mi'-tis*) [ὦμος, shoulder; ιτις, inflammation]. Inflammation of the shoulder.

Ommateal, Ommatidial (*om-at-e'-al, om-at-id'-e-al*) [ὄμμα (ὀμματ-), eye]. In biology, pertaining to the ommatidium or single eye of an arthropod. **O. Layer,** the inner layer of that part of the epidermis from which the optic ganglion originated in decapods, consisting of retinophoræ surrounded by their circles of retinulæ.

Ommatidium (*om-at-id'-e-um*) [ὀμματίδιον, dim. of ὄμμα, an eye: *pl.*, *Ommatidia*]. In biology, one of the closely-packed, radially-arranged single eyes composing the compound eye of an arthropod. Each ommatidium has three chief constituents, the *retinula*, the *crystal cone*, the *hypodermal elements* (cornea, etc.).

Ommatophore (*om-at'-o-for*) [ὄμμα, an eye; φέρειν, to bear]. In biology, one of the eye-stalks, ophthalmites, or eye-bearing tentacles of various invertebrates.

Omnivorous (*om-niv'-o-rus*) [*omnis*, all; *vorare*, to devour]. Subsisting on all kinds of food.

Omo- (*o'-mo-*) [ὠμός, raw]. A prefix signifying raw or crude.

Omo- (*o'-mo-*) [ὦμος, scapula]. A prefix that denotes connection with or relation to the scapula or shoulder.

Omo-atlanticus (*o-mo-at-lan'-tik-us*) [ὦμος, shoulder; ἄτλας, atlas]. Synonym of the *Levator anguli scapulæ*. See *Muscles, Table of.*

Omo-brachialis (*o-mo-bra-ke-a'-lis*) [ὦμος, shoulder; βραχίων, arm]. Synonym of *Coraco-brachialis*. See *Muscles, Table of.*

Omocace (*o-mok'-as-e*) [ὦμος, shoulder; κακός, evil]. Disease of the shoulder.

Omo-cervicalis (*o-mo-ser-vik-a'-lis*) [ὦμος, shoulder; *cervix*, neck]. Synonym of *Levator anguli scapulæ*. See *Muscles, Table of.*

Omo-clavicular (*o-mo-kla-vik'-u-lar*) [ὦμος, shoulder; *clavicula*, clavicle]. Pertaining to the shoulder and the clavicle.

Omocotyle (*o-mo-kot'-il-e*) [ὦμος, shoulder; κοτύλη, cup]. The glenoid cavity; also, the shoulder-joint.

Omodynia (*o-mo-din'-e-ah*) [ὦμος, shoulder; ὀδύνη, pain]. Pain in the shoulder. See *Dorsodynia*.

Omohyoid (*o-mo-hi'-oid*) [ὦμος, shoulder; ὑοειδής, like the Greek letter upsilon]. Pertaining conjointly to the scapula and the hyoid bone. **O. Muscle.** See *Muscles, Table of.*

Omoideum (*o-moi'-de-um*) [ὦμος, the shoulder; ειδος, form: *pl.*, *Omoidea*]. In biology, the true pterygoid bone of the skull of a bird.

Omophagia (*o-mo-fa'-je-ah*) [ὠμός, raw; φαγεῖν, to eat]. The practice of eating raw food.

Omophagous (*o-mof'-ag-us*) [ὠμός, raw; φαγεῖν, to eat]. Eating raw food.

Omoplate (*o'-mo-plāt*) [ὦμος, the shoulder; πλάτη, a plate]. See *Scapula*.

Omositia (*o-mo-sit'-e-ah*) [ὠμός, raw; σιτέειν, to feed]. The eating of raw flesh.

Omostegite (*o-mos'-tej-īt*) [ὦμος, the shoulder; στέγος, roof]. In biology, the thoracic portion proper of the carapace of a crustacean.

Omosternal (*o-mo-ster'-nal*) [ὦμος shoulder; στέρνον, sternum]. Pertaining to the shoulder and the sternum.

Omosternum (*o-mo-ster'-num*) [ὦμος, the shoulder; στέρνον, the sternum: *pl.*, *Omosterna*]. In biology, a superior median ossification in the pectoral arch of a batrachian; the homologue of the interclavicle.

Omostrophosis (*o-mos-trof-o'-sis*) [ὦμος, shoulder; στρέφειν, to turn about]. Dislocation of the shoulder.

Omotocia (*o-mo-to'-se-ah*) [ὠμός, untimely; τόκος, birth]. Premature birth.

Omotocous (*o-mot'-o-kus*) [ὠμότοκος; ὠμός, untimely; τόκος, birth]. Bearing young prematurely.

Omotrachelius (*o-mo-tra-ke'-le-us*) [ὦμος, shoulder; τράχηλος, the neck]. The muscle elevating the clavicle in certain animals.

Omozone (*o'-mo-zōn*) [ὦμος, the shoulder; ζώνη, a girdle]. A term proposed by Coues and Wilder, 1871, for the shoulder-girdle, including the scapula, clavicle, and coracoid process.

Omphacine (*om'-fas-in*) [ὀμφαξ, unripe fruit]. Pertaining to unripe fruit. **O. Oil,** the viscous brown juice expressed from unripe olives.

Omphacomel (*om-fak'-o-mel*) [ὀμφαξ, unripe fruit; μέλι, honey]. An ancient confection; a syrup prepared from unripe grapes and honey.

Omphalectomy (*om-fal-ek'-to-me*) [ὀμφαλός, navel; ἐκτομή, excision]. Excision of the navel.

Omphalelcosis (*om-fal-el-ko'-sis*) [ὀμφαλός, navel; ἕλκωσις, ulceration]. Ulceration of the navel.

Omphalexoche (*om-fal-eks'-o-ke*) [ὀμφαλός, navel; ἐξοχή, prominence]. Synonym of *Exomphalos*.

Omphalic (*om-fal'-ik*) [ὀμφαλικός, from ὀμφαλός, navel]. Pertaining to the navel or umbilicus. **O. Duct,** the *vitelline duct;* the duct connecting the umbilical vesicle with the fetal intestines during the first three months of intrauterine life.

Omphalitis (*om-fal-i'-tis*) [ὀμφαλός, navel; ιτις, inflammation]. Inflammation of the navel.

Omphalo- (*om-fal'-o-*) [ὀμφαλός, navel]. A prefix used to denote relation to the umbilicus or navel.

Omphalocele (*om-fal'-o-sēl*) [ὀμφαλός, navel; κήλη, tumor]. Umbilical hernia.

Omphalocraniodidymus (*om'-fal-o-kra-ne-o-did'-im-us*) [ὀμφαλός, navel; κρανίον, skull; δίδυμος, twin]. A form of double monstrosity in which the parasite is attached to the cranium of the autosite.

Omphalode (*om'-fal-ōd*) [ὀμφαλός, navel]. The same as *Omphalodium*.

Omphalodes (*om-fal-o'-dēz*) [ὀμφαλός, navel; ειδος, like]. Resembling the navel.

Omphalodium (*om-fal-o'-de-um*) [ὀμφαλός, a navel: *pl.*, *Omphalodia*]. In biology, the axial part of the hilum of a seed, containing the vessels that enter the raphe or chalaza.

Omphalo-enteric (*om'-fal-o-en-ter'-ik*) [ὀμφαλός, navel; ἔντερον, intestine]. Pertaining to the navel and the intestine.

Omphaloid (*om'-fal-oid*) [ὀμφαλός, a navel; ειδος, form]. Resembling the navel.

Omphalolysis (*om-fal-ol'-is-is*) [ὀμφαλός, navel; λύσις, loosing]. The dividing of the umbilical cord.

Omphalomesaraic (*om'-fal-o-mez-ar-a'-ik*). The same as *Omphalomesenteric*.

Omphalomesenteric (*om'-fal-o-mez'-en-ter-ik*) [ὀμφαλός, navel; μεσεντέριον, mesentery]. Pertaining conjointly to the navel and the mesentery. **O. Duct.** See *Duct*.

Omphalomonodidymi (*om-fal-o-mon-o-did'-im-i*) [ὀμφαλός, navel; μόνος, one; δίδυμος, twin]. A form of twin monstrosity in which the fetuses are joined at the umbilicus.

Omphaloncus (*om-fal-ong'-kus*) [ὀμφαλός, navel; ὄγκος, tumor]. A tumor or swelling at the navel.

Omphaloneuron (*om-fal-o-nu'-ron*) [ὀμφαλός, navel; νεῦρον, cord]. The umbilical cord.

Omphaloneurorrhexis (*om-fal-o-nu-ror-eks'-is*) [ὀμφα-

λός, navel; νεῦρον, cord; ῥῆξις, rupture]. Laceration of the umbilical cord.

Omphaloneurostrepsis (*om-fal-o-nu-ro-strep'-sis*) [ὀμφαλός, navel; νεῦρον, cord; στρέψις, a turning about]. Torsion of the umbilical cord.

Omphalopagus (*om-fal-op'-ag-us*) [ὀμφαλός, navel; πηγνύναι, to make fast]. A better term for the fetal monstrosity known as *Xiphopagus*, *q. v.*

Omphalophlebitis (*om-fal-o-fle-bi'-tis*) [ὀμφαλός, navel; φλέψ, vein; ιτις, inflammation]. Inflammation of the umbilical vein.

Omphalophyma (*om-fal-o-fi'-mah*). Synonym of *Omphaloncus*.

Omphaloproptosis (*om-fal-o-prop-to'-sis*) [ὀμφαλός, navel; πρόπτωσις, a falling forward]. Abnormal protrusion of the navel.

Omphalopter (*om-fal-op'-ter*) [ὀμφαλός, navel; ὀπτήρ, a viewer]. A double convex lens.

Omphaloptic (*om-fal-op'-tik*) [ὀμφαλός, navel; ὀπτικός, of seeing]. The same as *Omphalopter*.

Omphalorrhagia (*om-fal-or-a'-je-ah*) [ὀμφαλός, navel; ῥηγνύναι, to burst forth]. Hemorrhage from the umbilicus.

Omphalorrhea (*om-fal-or-e'-ah*) [ὀμφαλός, navel; ῥοία, a flow]. An effusion of lymph at the navel.

Omphalorrhexis (*om-fal-or-eks'-is*) [ὀμφαλός, navel; ῥῆξις, rupture]. Rupture of the navel, or of the navel-string.

Omphalos (*om'-fal-os*) [ὀμφαλός, navel]. The umbilicus.

Omphalosite (*om-fal'-o-sīt*) [ὀμφαλός, navel; σῖτος, nourishment]. An embryo or fetus dependent for its imperfect growth in the uterus upon another embryo or fetus, usually well-developed, that supplies the circulation of blood for both by means of extensive and intimate anastomoses of the umbilical and placental vessels.

Omphalosoter (*om-fal-o-so'-ter*) [ὀμφαλός, navel; σωτήρ, preserver]. An instrument for replacing a prolapsed funis.

Omphalotacterium (*om-fal-o-tak-te'-re-um*) [ὀμφαλός, navel; τάσσειν, to arrange]. An instrument for replacing a prolapsed umbilical cord.

Omphalotaxis (*om-fal-o-taks'-is*) [ὀμφαλός, navel; τάσσειν, to arrange]. Reposition of the prolapsed funis.

Omphalotome (*om'-fal-o-tōm*) [ὀμφαλός, navel; τομή, a cutting]. An instrument for dividing the umbilical cord.

Omphalotomist (*om-fal-ot'-o-mist*) [ὀμφαλός, navel; τομή, a cutting]. A midwife.

Omphalotomy (*om-fal-ot'-o-me*) [ὀμφαλός, navel; τομή, a cutting]. The obstetric separation of the cord at the umbilicus. Also, an obsolete term for obstetrics.

Omphalus (*om'-fal-us*) [ὀμφαλός, navel]. See *Omphalos*.

Onanism (*o'-nan-izm*) [from *Onan*, the son of Judah]. 1. Incomplete coitus. 2. Masturbation, or other perversion of the sexual instinct.

Onanist (*o'-nan-ist*) [from *Onan*, the son of Judah]. One who practises onanism.

Onchosphæra, Onchosphere (*ong'-kos-ef'-rah*, *ong'-kos-fēr*) [ὄγκος, bulk, mass; σφαῖρα, a sphere]. In biology, a stage in the development of certain platode worms.

Oncograph (*ong'-ko-graf*) [ὄγκος, swelling; γράφειν, to record]. The registering portion of an oncometer; a plethysmograph.

Oncology (*ong-kol'-o-je*) [ὄγκος, tumor; λόγος, science]. The science or study of tumors.

Oncome (*on'-kum*) [ME., *on*, on; ME., *cumen*, to come]. The oncoming, attack, or onset of a disease or illness.

Oncometer (*ong-kom'-et-er*) [ὄγκος, mass; μέτρον, measure]. An instrument for measuring the size of a tumor or the volume of an organ, especially for measuring the size of any variable organ, as the kidney.

Oncosis (*ong-ko'-sis*) [ὄγκος, tumor]. The presence of a tumor; the diseased state characterized by the growth of tumors.

Oncothlipsis (*ong-ko-thlip'-sis*) [ὄγκος, tumor; θλῖψις, pressure]. Pressure caused by a tumor.

Oncotomy (*ong-kot'-o-me*) [ὄγκος, tumor; τομή, a cutting]. The lancing or opening of a tumor or abscess.

One (*wun*) [ME., *one*, one]. A single unit or individual. **O.-eyed,** cyclopean, having but one eye. **O.-hundred Day Disease,** the Japanese term for whooping-cough. **O.-sided,** developed better upon one side than upon the other. **O.-year Ulcer,** the Arabic synonym of *Aleppo Boil*.

Oneirodynia (*o-ni-ro-din'-e-ah*) [ὄνειρος, a dream; ὀδύνη, pain]. Disquietude of the mind during sleep; painful dreaming; nightmare. **O. activa,** somnambulism.

Oneirogmus (*on-i-rog'-mus*) [ὀνειρωγμός, an effusion during sleep]. Emission of semen during sleep.

Oneirogonorrhea, Oneirogonos (*on-i-rog-on-or-e'-ah*, *on-i-rog'-on-os*). Synonyms of *Oneirogmus*.

Oneirology (*on-i-rol'-o-je*) [ὄνειρος, dream; λόγος, science]. The science or scientific view of dreams.

Oneironosus (*on-i-ron'-o-sus*) [ὄνειρος, dream; νόσος, disease]. Disorder manifesting itself in dreams; morbid dreaming.

Onion (*un'-yun*) [L., *unio*, an onion]. A garden plant, *Allium cepa*; also its esculent bulbous root. Onion-syrup and onion-poultices are much used in domestic medicine; the juice is stimulant, expectorant, and diuretic. Unof.

Onobaio (*on-o-ba'-yo*) [Nat. Obock]. An arrow-poison used by the natives of Obock.

Onomatology (*on-o-mat-ol'-o-je*) [ὄνομα, name; λόγος, science]. The science of nomenclature; the formation of names.

Onomatomania (*on-o-mat-o-ma'-ne-ah*) [ὄνομα, name; μανία, mania]. Functional derangement of speech, of which five varieties are described: 1. A powerful effort to recall some word. 2. An irresistible impulse continually to repeat a word, by which the patient seems perplexed. 3. The patient attaches some peculiar and dreadful meaning to a commonplace word. 4. The patient attaches talismanic significance to certain words, which he repeats as a safeguard. 5. The patient is impelled to spit out some word, like a disgusting morsel. A word is a complexus of images, localized in certain centers of the cerebral cortex, the images being partly auditive, partly visual, partly motor. "Onomatomania is characterized by irregular action of one or several verbal images, resulting from some functional disturbance of the corresponding center." In *simple onomatomania*, the patient is possessed with the idea of recovering a word that escapes him. The word is familiar; its significance can be given; the place where read or the time when heard can be given, but the word cannot be recalled. Articulate speech may be at fault. The patient knows the word, sees it written before him; but cannot articulate it. He may utter a synonym or a similar word. In *associated onomatomania*, words acquire a peculiar or preponderant meaning.

Onomatopoiesis (*on-o-mat-o-poi-e'-sis*) [ὄνομα, name; ποιέειν, to make]. The extemporaneous formation of words by the insane. Words so formed are generally meaningless, or incorrect, but are sometimes quite the reverse.

nosmodium (*on-oz-mo'-de-um*) [*ὄνος*, an ass; *ὀσμή*, smell; *εἶδος*, form]. A genus of boraginaceous plants. **O. hispidum, O. virginianum,** a plant of the genus of Boraginaceæ, growing in the Eastern and Middle States; it has been used in gonorrhea and diseases of the bladder. Unof.

ntogenesis (*on-to-jen'-es-is*) [*ὤν, ὄντος*, existing; *γένεσις*, birth]. The development of the individual cell into the mature being.

ntogenetic (*on-to-jen-et'-ik*) [*ὤν, ὄντος*, existing; *γενετός*, birth]. Pertaining to ontogenesis. See also *Evolution*.

ntogeny (*on-toj'-en-e*) [*ὤν*, being; *γενής*, producing]. In biology, the history of the development of the individual; it is a short recapitulation of the history of the race, or phylogeny, *q. v.*; that is, every animal passes in to its descendants by inheritance, not only its organization at an adult stage, but also its own course of development. (Lang.)

ntographic (*on-to-graf'-ik*) [*ὤν*, being; *γράφειν*, to write]. Of, or pertaining to, *Ontography*.

ntography (*on-tog'-ra-fe*) [*ὤν*, being; *γράφειν*, to write]. A description of beings, their nature and essence.

ntoïdic (*on-to-id'-ik*) [*ὤν, ὄντος*, being; *idus*, the dividing or division]. In biology, Weismann's term for the ontogenetic stages of the idioplasm from the hereditary substance or germ-plasm forming the first ontogenetic stage and preceding the division of the egg-cell to the natural death of the organism.

ntologic (*on-to-loj'-ik*) [*ὤν, ὄντος*, being; *λόγος*, science]. Pertaining to ontology.

ntology (*on-tol'-o-je*) [*ὤν, ὄντος*, being; *λόγος*, science]. The metaphysical inquiry into the nature and essential quality of beings, or of being in the abstract. According to Flourens, one of the divisions of physiology. *Biology*, the study of life proper. B. *Ontology*, the study of living beings, which he divides into *Neontology* and *Paleontology*. **O., Medical,** a view which regards diseases as distinct entities.

Onaphin (*on'-u-fin*), $C_{72}H_{43}NO_{18}$. A substance obtained from the rings of a species of worm, the *Onuphis tubicola*. It forms a white mass resembling pipe-clay, dissolving easily in water.

Onchatrophia (*on-ik-at-ro'-fe-ah*) [*ὄνυξ*, nail; *ἀτροφία*, atrophy]. Atrophy of the nails.

Onchauxe, Onychauxis (*on-ik-awks'-e, on-ik-awks'-is*) [*ὄνυξ*, the nail; *αὔξη*, increase]. Increased growth or hypertrophy of the nail, usually with alteration in texture, color, and shape.

Onychia (*o-nik'-e-ah*) [*ὄνυξ*, nail]. Inflammation of the matrix of the nail. See *Paronychia*. **O. aligna.** See *Onyxitis*. **O. simplex,** onychia without much ulceration, with loss of the nail and its displacement by a new one.

CHRONIC ONYCHIA.

Onychisterion (*on-ik-is-te'-on*) [*ὀνυχιστήριον*, a nail-knife]. An instrument used for cutting the nails.

Onychitis (*on-ik-i'-tis*) [*ὄνυξ*, nail; *ιτις*, inflammation]. Inflammation of the nail.

Onychium (*o-nik'-e-um*) [*ὀνύχιον*, a little claw; dim. of *ὄνυξ*, a nail, claw: *pl.*, *Onychia*]. In biology, a little claw; specifically the small terminal appendage of the tarsus of many insects, between the two claws proper.

Onycho- (*on'-ik-o-*) [*ὄνυξ*, nail]. A prefix denoting connection with, or relation to, the nails.

Onychoclasis (*on-ik-ok'-las-is*) [*ὄνυξ*, nail; *κλάσις*, a breaking]. Breaking of the nail.

Onychocline (*on-ik-ok'-lin-e*) [*ὄνυξ*, nail; *κλίνη*, a bed]. The bed of a nail.

Onychocryptosis (*on-ik-o-krip-to'-sis*) [*ὄνυξ*, nail; *κρυπτός*, hidden]. Ingrowing of a nail.

Onychogryposis (*on-ik-o-gri-po'-sis*) [*ὄνυξ*, nail; *γρύπωσις*, curvature]. A thickened, ridged, and curved condition of the nail. It sometimes takes the well-known form of ingrowing nail.

Onychohelcosis (*on-ik-o-hel-ko'-sis*) [*ὄνυξ*, nail; *ἕλκωσις*, ulceration]. Ulceration of the nail.

Onychoid (*on'-ik-oid*) [*ὄνυξ*, nail; *εἶδος* like]. Resembling a nail. Having a texture like that of the nails.

Onycholepra (*on-ik-o-lep'-rah*) [*ὄνυξ*, nail; *λέπρα*, leprosy]. Leprosy affecting the nails.

Onycholysis (*on-ik-ol'-is-is*) [*ὄνυξ*, nail; *λύσις*, a loosening]. Loosening of the nail.

Onychomycosis (*on-ik-o-mi-ko'-sis*) [*ὄνυξ*, nail; *μύκης*, fungus]. A parasitic disease of the nails of men and the hoofs of the horse, mule, etc. In man it is termed *dry caries*. It is caused by the fungus *Achorion keratophagus*, or other similar parasite. **O. circinata.** Same as *O. trichophytina*. **O. favosa,** favus of the nails. **O. tonsurans.** Same as *O. trichophytina*. **O. trichophytina,** ringworm of the nails, due to the parasite *Trichophyton tonsurans*.

Onychonosus (*on-ik-on'-o-sus*) [*ὄνυξ*, nail; *νόσος*, disease]. Any disease of the finger-nails or toe-nails.

Onychopathic (*on-ik-o-path'-ik*) [*ὄνυξ*, nail; *πάθος*, disease]. Pertaining to disease of the nails.

Onychophagy (*on-ik-off'-aj-e*) [*ὄνυξ*, nail; *φαγεῖν*, to eat]. The practice of biting the nails.

Onychophthora (*on-ik-off'-tho-rah*). Synonym of *Onychosis*.

Onychophyma (*on-ik-o-fi'-mah*) [*ὄνυξ*, nail; *φῦμα*, growth]. A morbid degeneration of the nails, sometimes observed in leprosy and in tertiary syphilis.

Onychophyton (*on-ik-off'-it-on*). Synonym of *Onychomycosis*.

Onychoptosis (*on-ik-op-to'-sis*) [*ὄνυξ*, nail; *πτῶσις*, a falling]. The falling off of the nails.

Onychorrhiza (*on-ik-or-i'-zah*) [*ὄνυξ*, nail; *ῥίζα*, root]. The root of the nail.

Onychosarcoma (*on-ik-o-sar-ko'-mah*) [*ὄνυξ*, nail; *σάρξ*, flesh; *ὄμα*, tumor]. A fleshy outgrowth from a nail.

Onychosarcosis (*on-ik-o-sar-ko'-sis*) [*ὄνυξ*, nail; *σάρκωσις*, the growth of flesh]. The development of an onychosarcoma; an onychosarcoma.

Onychosis (*on-ik-o'-sis*) [*ὄνυξ*, nail; *νόσος*, disease]. Any disease of the nails. **O. arctura,** ingrowing nail. **O. seline,** white spots on the nails. **O. tinea,** onychomycosis.

Onychostroma (*on-ik-os-tro'-mah*) [*ὄνυξ*, nail; *στρῶμα*, mattress]. The matrix or sensitive tissue of the finger, forming the bed of the nail.

Onychostromelcosis (*on-ik-os-trom-el-ko'-sis*). Synonym of *Onychohelcosis*.

Onychothlasis (*on-ik-oth'-las-is*) [*ὄνυξ*, nail; *θλάσις*, a crushing]. Crushing of the nails.

Onychyphosis (*on-ik-if-o'-sis*) [*ὄνυξ*, nail; *ὑφή*, web]. A disease of the toe-nails, consisting of thickened, horny layers of the epidermis accumulated beneath the nail, raising it from its bed, and sometimes altering its growth.

Onym (*on'-im*) [*ὄνομα*, a name]. In biology, the

technical name of a species or other taxonomic division.

Onymal (*on'-im-al*) [ὄνομα, a name]. In biology, of, or pertaining to, a technical name or technical nomenclature.

Onymatic (*on-im-at'-ik*) [ὄνομα, a name]. In biology, pertaining to technical nomenclature, or scientific taxonomy. Cf. *Synonymatic*.

Onymize (*on'-im-iz*) [ὄνομα, a name]. In biology, to employ onyms, technical names, or nomenclature.

Onymy (*on'-im-e*) [ὄνομα, a name]. In biology, the use of onyms; a system of nomenclature.

Onyx (*on'-iks*) [ὄνυξ, nail]. 1. A nail. 2. A collection of pus between the corneal lamellæ, at the most dependent part. See *Hypopyon*.

Onyxis (*on-iks'-is*) [ὄνυξ, nail]. An abnormal incurvation or ingrowing of the nails.

Onyxitis (*on-iks-i'-tis*) [ὄνυξ, nail; ιτις, inflammation]. Onychia maligna; an inflammation of the matrix of the nail, occurring most frequently in unhealthy children, after some traumatism.

Oöblast (*o'-o-blast*) [ᾠόν, an egg; βλαστός, a germ]. In biology, Ludwig Will's term for the unripe or primitive ovum, the central chromatin-body of which gives rise to the nuclei of the cells forming the egg-follicle by ejecting a large number of chromatin-pellets.

Oöblastema (*o-o-blas-te'-mah*) [ᾠόν, egg; βλάστημα, increase]. The protoplasm of an ovule.

Oöboo-waioo (*o'-o-boo-wa'-oo*) [Beng.]. A Bengalese term for *Beri-beri*.

Oöcyesis (*o-o-si-e'-sis*) [ᾠόν, egg; κύησις, pregnancy]. Ovarian pregnancy; oariocyesis.

Oöcyst (*o'-o-sist*) [ᾠόν, an egg; κύστις, bladder.] See *Ecium*.

Oödeocele (*o-o-de-o-sēl'*) [ᾠόν, egg; εἶδος, like; κήλη, tumor]. Obturator hernia.

Oögamous (*o-og'-am-us*) [ᾠόν, an egg; γάμος, marriage]. In biology, exhibiting or reproduced by the conjugation of dissimilar gametes.

Oögamy (*o-og'-am-e*) [ᾠόν, an egg; γάμος, marriage]. In biology, the conjugation of two dissimilar gametes, as distinguished from *isogamy*.

Oögenesis (*o-o-jen'-es-is*) [ᾠόν, egg; γένεσις, birth]. The process of the development of the ovum.

Oögenetic (*o-o-jen-et'-ik*) [ᾠόν, egg; γεννᾶν, to beget]. Relating to oögenesis.

Oöglea (*o-o'-gle-uh*) [ᾠόν, egg; γλοία, glue]. Egg-glue; a tough, viscid gelatinous substance enveloping the eggs of certain animals, as crustaceans.

Oögonium (*o-o-go'-ne-um*) [ᾠόν, an egg; γονή, generation: *pl.*, *Oögonia*]. In biology, the female sexual organ in the *Oösporeæ* before fertilization.

Oöid (*o'-oid*) [ᾠόν, egg; εἶδος, like]. Egg-shaped.

Oökinesis (*o-o-kin e'-sis*) [ᾠόν, egg; κίνησις, movement]. The changes occurring in the egg during maturation, fertilization and segmentation.

Oölecithymen (*o-o-les-ith-i'-men*) [ᾠόν, egg; λέκιθος, yolk of egg; ὑμήν, membrane]. In biology, the vitelline membrane.

Oölemma (*o-o-lem'-ah*) [ᾠόν, an egg; λέμμα, peel, skin]. In biology, the vitelline membrane of an egg.

Oöleukon (*o-o-lu'-kon*). Synonym of *Albumin*.

Oölogy (*o-ol'-o-je*) [ᾠόν, an egg; λόγος, science]. The study of eggs and nidification. Cf. *Caliology*.

Oölysis (*o-ol'-is-is*) [ᾠόν, egg; λύσις, a loosing]. In biology, a monstrous ovular development.

Oömetra (*o-o-me'-trah*) [ᾠόν, egg; μήτρα, uterus]. In biology, the ovary of phanerogamous plants.

Oömetry (*o-om'-et-re*) [ᾠόν, an egg; μέτρον, a measure]. In biology, the measurement of eggs.

Oöphoralgia (*o-off-or-al'-je-ah*) [ᾠόν, egg; φέρειν, to bear; ἄλγος, pain]. Neuralgia of the ovary.

Oöphorauxe (*o-off-or-awks'-e*) [ᾠόν, egg; φέρειν, to bear; αὔξη, growth]. Hypertrophy of the ovary.

Oöphore (*o'-o-for*) [ᾠόν, an egg; φόρος, bear]. In biology, the sexual stage in plants exhibiting alternat generation.

Oöphorectomy (*o-off-or-ek'-to-me*) [ᾠόν, egg; φέρειν, to bear; ἐκτομή, excision]. Excision of the ovary **Battey's Operation**, the removal of both ovarie to hasten the menopause.

Oöphoridium (*o-o-for-id'-e-um*) [ᾠόν, an egg; φόρος bear: *pl.*, *Oophoridia*]. See *Macrosporangium*.

Oöphoritis (*o-off-or-i'-tis*). See *Ovaritis*.

Oöphoro-epilepsy (*o'-off-or-o-ep'-il-ep-se*) [ᾠόν, egg φέρειν, to bear; ἐπιληψία, epilepsy]. Epileptiform disease due to an ovarian lesion.

Oöphoroma (*o-off-or-o'-mah*) [ᾠόν, egg; φέρειν, to bear ὄμα, a tumor: *pl.*, *Oöphoromata*]. A dermoid cyst o the ovary, characterized by metastasis.

Oöphoromalacia (*o-off-or-o-mal-a'-se-ah*) [ᾠόν, egg φέρειν, to bear; μαλακία, softness]. Softening of th ovary.

Oöphoromania (*o-off-or-o-ma'-ne-ah*) [ᾠόν, egg; φέρει to bear; μανία, mania]. Insanity due to ovarian dis order.

Oöphoromyeloma (*o-off-or-o-mi-el-o'-mah*) [ᾠόν, egg φέρειν, to bear; μυελός, marrow; ὄμα, tumor]. A ovarian encephaloma.

Oöphoron, Oöphorum, (*o-off'-or-on, o-off'-or-um* See *Oöphore*, *Ovarium*, *Ovary*.

Oöphoropathia (*o-off-or-o-pa'-the-ah*) [ᾠόν, egg φέρειν, to bear; πάθος, disease]. Any disease of th ovary.

Oöphoro-salpingectomy (*o'-off-or-o-sal-ping-gek'-to me*) [ᾠόν, egg; φέρειν, to bear; σάλπιγξ, tube; ἐκτομ excision]. Surgical removal of an ovary and oviduct

Oöphorrhapy (*o-off-or'-a-fe*) [ᾠόν, egg; φέρειν, to bear ῥαφή, suture]. The surgical fixation, by suture, of displaced ovary.

Oöphyte (*o'-o-fit*) [ᾠόν, an egg; φυτόν, a plant]. Sam as *Oöphore*.

Oöplasma (*o-o-plaz'-mah*) [ᾠόν, egg; πλάσσειν, to mold]. The vitellus.

Oöplasty (*o'-o-plas-te*) [ᾠόν, egg; πλάσσειν, to form] The process of fecundation.

Oöpoda (*o-op'-o-dah*) [ᾠόν, an egg; πούς, foot]. In biology, the three pairs of blade-like elements of th sting or modified ovipositor of insects.

Oösperm (*o'-o-sperm*) [ᾠόν, egg; σπέρμα, seed]. Th ovum after union with the male element.

Oöspermospore (*o-o-sper'-mo-spor*) [ᾠόν, an egg; σπέ μα, seed; σπόρος, seed]. See *Oöspore*.

Oösphere (*o'-o-sfēr*) [ᾠόν, an egg; σφαῖρα, a sphere] In biology, the unfertilized germ-cell in the oögonium the female reproductive cell.

Oösporangium (*o-o-spor-an'-je-um*) [ᾠόν, egg; σπόρο seed; ἀγγεῖον, vessel]. The sac enclosing the oöspores

Oöspore (*o'-o-spor*) [ᾠόν, an egg; σπόρος, seed]. I biology, a fertilized and matured oösphere.

Oöstegite (*o-os'-tej-it*) [ᾠόν, an egg; στέγειν, to cover] The laminar expansion of some of the limbs of certai crustaceans, beneath which the eggs are retained.

Oötheca (*o-o-the'-kah*) [ᾠόν, an egg; θήκη, a case: *pl.* *Oöthecæ*]. In biology, an egg-case or sporangium.

Oötocia (*o-o-to'-ke-ah*) [ᾠόν, an egg; τεκεῖν, to produce to lay]. In biology, ovulation; the discharge of th egg from the ovary. Cf. *Oviposition*.

Oötocous (*o-ot'-ok-us*) [ᾠόν, an egg; τεκεῖν, to lay] In biology, producing eggs; oviparous.

Oötype (*o'-o-tip*) [ᾠόν, an egg; τύπος, stamp, mo pattern]. In biology, the small part at the beginnin

of the egg-passage in platode worms, which receives the efferent ducts of the shell-glands.

Ooze (*ōz*) [ME., *wose*, mud]. The deposit of calcareous or siliceous shells or frustules, found making up extensive areas of the floor of the ocean and derived from the halobios (*benthos* and *plankton*), or organisms living in the sea, *i. e.*, *Diatom-ooze*, *Radiolaria-ooze* (about 1000 species are included, the richest regions being the tropical central Pacific), *Globigerina-ooze*, *Pteropod-ooze*.

Oözoa (*o-o-zo'-ah*) [ὠόν, an egg; ζῷον, an animal]. In biology, the onym proposed by Carus for unicellular animals, because of their resemblance to ova. Cf. *Protista*, *Protozoa*.

Opacity (*o-pas'-it-e*) [*opacus*, dull]. The condition of being impervious to light. Non-transparency. Also, an opaque spot, as opacity of the cornea. **O. of Lens.** See *Cataract*.

Opal (*o'-pal*) [ὀπάλλιος, an opal]. A mineral of a blue color, consisting of silicon. **O.-blue.** Same as *Spirit-blue*.

Opaline (*o'-pal-ēn*) [ὀπάλλιος, an opal]. Having the appearance of an opal. **O. Patch,** the mucous patch of syphilis, forming in the mouth a whitish pellicle.

Opaque (*o-pāk'*) [*opacus*, shaded]. Dark, obscure, not transparent. **O. Nerve-fibers,** persistence of the medullary sheaths of the optic-nerve fibers beyond the lamina cribrosa, forming brilliant white patches upon the retina as seen by the ophthalmoscope.

Open (*o'-pen*) [ME., *open*, open]. Unclosed, unfolded. **O. Method.** See *Anesthetic*.

Opening (*o'-pen-ing*) [ME., *openyng*, opening]. A mouth, or hole; a perforation. **O., Aortic.** See *Aortic*. **O., Caval,** the opening in the diaphragm for the passage of the vena cava. **O., Saphenous,** an oval opening in the fascia lata at the upper and inner part of the thigh below Poupart's ligament. It transmits the internal saphenous vein and is covered by the cribriform fascia.

Opeocele (*o'-pe-o-sēl*) [ὀπή, an opening; κήλη, a tumor]. Synonym of *Hernia*.

Operable (*op'-er-ab-l*) [*operari*, to labor]. Admitting of an operation.

Operating (*op'-er-a-ting*) [*operari*, to work]. Performing; acting; doing some surgical process. **O.-table,** the table on which a patient lies during a surgical operation.

Operation (*op-er-a'-shun*) [*operari*, to labor, to do]. An act; especially a surgical act upon the body. A table of many of the most important operations is appended. **O., Curative effect of,** *per se*; the improvement or disappearance of symptoms after a simple exploratory incision, with closure of the wound, the supposed condition not being found to exist, or not being amenable to interference. **O., Major,** a serious and important surgical operation. **O., Minor.** See *Surgery, Minor*. **O., Plastic.** See *Surgery*.

EPONYMIC TABLE OF OPERATIONS AND METHODS IN SURGERY.

Abé's: 1. *Lateral anastomosis* of the intestines with gut-gut rings. 2. For *varicocele*; resection of the scrotum, with ligation of the exposed veins. **Abernethy's,** *ligation of the external iliac artery*. In the earlier operation an incision was made in the line of the artery for about three inches, commencing nearly four inches above Poupart's ligament. Later the incision was less nearly vertical and more curved, with the convexity downward and outward, extending from about one inch within and one inch above the anterior superior spine to one and one-half inches above, and external to, the center of Poupart's ligament. **Adams':** 1. Osteotomy for *ankylosis of the hip-joint*, the neck of the femur being divided subcutaneously within the capsule. 2. *Corectomy*; the iris is drawn into a small, corneal incision, in order to change the position of the natural pupil. 3. For *deviated nasal septum*; the bent cartilaginous septum is forcibly straightened by means of special flat, parallel-bladed forceps. 4. For *Dupuytren's contraction*, when the bands extend far down the sides of the finger. It consists in multiple subcutaneous section of the palmar fascia from without inward. 5. For *entropion*; a triangular wedge is removed from the whole thickness of the lower lid, and the edges are united by sutures. 6. *Iliac colotomy*; a modification of *Hopps' operation*, in which a vertical incision is made external to the epigastric artery. 7. For *prolapsus ani*. See *O., Alexander's*. **Affleck's,** a method of performing *embryotomy*; also known as *Macdonald's method*; it consists in rachiotomy followed by forcible podalic version. **Agnew's** (*Cornelius R.*): 1. For *cataract*; it consists in the laceration or removal of the capsule in secondary cataract by means of a stop-needle and hook. 2. For *chalasion*; incision along the ciliary margin of the lid, followed by curettement or by compression. 3. For *destruction of the lacrymal sac*: consists in slitting the canaliculi, vertical incision of the sac, and cauterization of its interior. **Agnew's** (*D. Hayes*): 1. For *amputations*; it is a modification of *Vermale's operation* by which elliptic tegumentary flaps are made and allowed to retract before the muscles are cut through. 2. For *inguinal hernia*; a modification of *Wutzer's operation*, *q. v.* 3. For *salivary fistula*; after the introduction of a probe into the duct, a thread is passed from the inside of the mouth, around the duct, the probe is withdrawn, and the thread tied tightly. As it sloughs off, the natural orifice is reëstablished. The external opening may be closed subsequently by operation or caustics. 4. For *webbed fingers*; a dorsal flap, triangular in shape, is cut from the upper surface of the web. The apex corresponds to the free margin, the base to the interval between the proximal ends of the first phalanges; this is reflected back, and the web is divided as far as necessary; the flap is then folded between the fingers, and the wound closed with sutures. **Alanson's,** a method of performing *amputations*; it consists in division of the skin and muscles in the form of a hollow cone. **Albert's,** for *flail knee-joint*; excision of the knee to secure ankylosis. **Alexander's:** 1. For the relief of *epilepsy*; ligation of the vertebral artery to diminish the blood-supply to the brain. 2. For *prolapse and retroflexion of the uterus*; shortening of the round ligaments for the purpose of holding the uterus in its normal position. **Alexander-Adams'.** See *Alexander's*. **Allarton's,** for *lithotomy*; it is the modern median operation for stone in the bladder. **Allingham's** (**H.**), for *inguinal colotomy*; an incision, from one and one-half to three inches long, is made parallel with the outer third of Poupart's ligament, and about one-half inch above. The edges of the peritoneum, in most cases, are stitched to the cut muscles and skin; the intestine is stitched to the edges of the wound, and opening

of the bowel is deferred, if possible, until the third day. **Allingham's (W.):** 1. For *excision of the rectum;* the patient in the lithotomy position, an oval incision is made into both ischio-rectal fossæ, around the bowel, and prolonged backward to the coccyx; the bowel is isolated, and separated with the écraseur, scissors, or Paquelin cautery. 2. For *hemorrhoids;* the pile is dissected off from the muscular tissue with scissors, the pedicle ligated, and the mass cut off. **Alonette's,** for *amputation at the hip-joint;* a semicircular external flap is made, extending to the great trochanter, with disarticulation of the head of the femur, and the making of a large internal flap by cutting from within outward. **Alquié-Alexander's.** The same as *Alexander's.* **V. Ammon's:** 1. *Blepharoplasty;* removal of all cicatricial tissue and freeing of the remains of the lid, followed by transplantation of a flap from the cheek. 2. For *destruction of the lacrymal sac;* incision into, and excision of, a portion of the anterior wall of the sac; closure by adhesive inflammation. 3. For *ectropion* (from caries); an incision is made around the cicatrix, the tissues are dissected free, and after closing the lid the wound is closed over the cicatrix. 4. For *symblepharon;* the lid is divided, by two converging incisions, into three portions —two lateral and a central wedge-shaped portion; the former are united by sutures, and after union the central, wedge-shaped part is dissected out. **Amussat's:** 1. A method of arresting *hemorrhage* by torsion of the arteries by means of two forceps. 2. For *atresia vaginæ;* dilatation by the use of the finger or a dull instrument, without cutting. 3. For *castration;* by incision upon the posterior surface of the scrotum. 4. For *enterorrhaphy;* in cases of completely divided intestine, each end is invaginated and passed over a cork, with a groove at either end, and the intestine is tied in the grooves. 5. For *imperforate rectum;* the formation of an artificial anus in the perineum, with or without excision of the coccyx. 6. For *lumbar colotomy;* a transverse incision is made, crossing the outer border of the quadratus lumborum muscle. **Anagnostakis':** 1. For *entropion;* an incision is made parallel and close to the free margin of the upper lid, a horizontal fold of skin, with the underlying tissue, is excised, and the wound closed by sutures. 2. For *trichiasis;* the offending cilia are included between two perpendicular incisions and excised. **Anderson's,** for *lengthening tendons;* the tendon is split longitudinally, the cut surfaces slid along, and sutured. **Anel's:** 1. For *aneurysm;* ligation on the cardiac side close to the aneurysm. 2. For *stricture of the lacrymal duct;* dilatation by means of a gold probe, followed by the injection of an astringent fluid into the sac. **Anger's:** 1. For *hypospadias;* the formation of a urethra by superimposing a quadrilateral flap from one side and lower border of the penis, over another flap from the other side, which has been turned over a catheter. 2. For *ingrowing toe-nail;* the lateral-flap operation, with removal of the diseased portion of the matrix. 3. For *union of divided tendons;* the use of "distance-sutures," when the ends of the tendon are widely apart. **Annandale's:** 1. For *dislocated cartilages;* incision into the knee-joint and stitching of the dislocated cartilages into their proper position. 2. For *genu valgum;* partial excision of both condyles of the femur. 3. For *naso-pharyngeal polypus;* division of the alveolar margin and palatal portions of the upper jaw along their center, from before backward, and perforation of the bony septum of the nose, thus permitting separation of the two portions of the bone and exposure of the polypus. 4. For *varicocele;* a modification of *Lee's operation,* the veins only being excised, the scrotum being left intact. 5. For *webbed-fingers* the longitudinal incisions are made along the sides of each finger. **Antal's,** for *tumor of the bladder-wall* after a supra-pubic incision the tumor is removed with the portion of the bladder from which it springs, and the vesical wound is closed; the peritoneum is rolled up and not opened. **Antyllus',** for *aneurysm;* it consists in ligation above and below the sac, followed by opening of the aneurysm and evacuation of its contents. **Antyllus-Kuhnts',** for *paralytic ectropion* excision of a wedge-shaped portion of the conjunctiva and tarsus from the lid, in order to shorten the latter. The base of the wedge is on the free border of the lid. **Apostoli's,** electrolysis of a *uterine fibroid* when an electrode cannot be introduced into the womb. One broad abdominal electrode is used, and a spear-pointed electrode is thrust through the vaginal wall into the tumor. **Appolito's,** for *enterorrhaphy,* by means of a form of right-angle continuous suture. **Argyll Robertson's:** 1. For *entropion;* a piece of sheet-lead is fastened inside of the lid, so that the pressure will cause absorption of the hypertrophied tissue. 2. For *glaucoma;* trephining the sclerotic for the relief of pain. 3. For *pterygium;* the growth is separated and excised; the conjunctiva, previously dissected up, is brought over the wound and sutured. **Arlt's:** 1. For *blepharoplasty;* a modification of *Dieffenbach's operation,* with a downward inclination of the cantho-temporal incision, and a slight deviation of the tempero-genal incision. 2. For *cicatricial ectropion* a V-shaped incision is made, removing the cicatrix; the wound is closed by interrupted sutures. 3. For *entropion;* (*a*) a modification of *Gaillard's suture;* a thread with a needle at either end, is passed subcutaneously from the margin of the lid down to the cheek, and the two ends are tied; there results a puckering of the skin and thereby relief of the entropion; (*b*) a *flap-splitting operation* upon the lid, with the removal of an oval portion of the skin, and suturing of the latter. 4. For *enucleation of the eye;* Desmarre's retractors are introduced and the conjunctiva is divided all around the cornea junction; then the external rectus (if the left eye, the internal if the right eye) is caught by a blunt hook and divided behind it, leaving a stump; then the remaining ocular muscles and the optic nerve are divided by scissors. The internal rectus (if the left eye, the external if the right eye) and the two oblique muscles are divided after luxation of the ball in front of the lids; the conjunctiva is stitched in and out, so as to form a suture like the string of a tobacco-bag, and a pressure bandage is applied. 5. For *median tarsorrhaphy;* excision with scissors and forceps of a narrow strip of skin from both the upper and lower lids, close to their inner angle, meeting on the inner side of the inner commissure; they are then united by interrupted sutures. 6. For *stricture of the lacrymal duct;* incision of the anterior wall of the sac, evacuation of the pus and gradual dilatation of the duct. 7. For *symblepharon;* dissection of the symblepharon, and suturing of the flap on itself. 8. For *trichiasis;* known also as the *Jaesche-Arlt operation;* it is a modification of *Jaesche's operation,* in which the lid is separated into anterior and posterior flaps by *Flarer's incision.* **Arlt-Jaesche,** for *dystrichiasis;* the edge of the lid and the contained ciliary bulbs are dissected from the tarsus, a crescentic shaped piece of skin is removed from the lid above the flap, and the edges of the wound are united, thus transplanting the ciliary bulbs further away from the edge of the lids. **Armsby's,** for the *radical cure of inguinal hernia;* the integument is invaginated, and a single thread is introduced as a seton through the sac of the hernia and the inguinal canal. **Ashton's,** for *a cure*

gested and bleeding rectum, without distinct hemorrhoidal tumor; cauterize with fuming nitric acid. **Assalini's**, for *iridodialysis;* the iris is detached with eye-forceps through a large opening in the cornea. **Atlee's**, for *ovariotomy;* the écraseur is applied to the pedicle. **Aveling's**: 1. For *suture of the soft palate;* a double loop of suture is passed on one side and the loop drawn out of the mouth; a single suture is then passed through the opposite side and looped into the double one; by pulling the latter back, the single suture is drawn across the cleft. 2. *Transfusion* by the direct method; this permits measurement of the amount of blood transfused. **Avery's**, for *uranoplasty*. Same as *Langenbeck's operation*. **Ayres'**, for *ectopia vesicæ;* closure by means of a flap of skin turned down from the abdomen over the bladder. **Bader's**: 1. For *conical cornea;* an elliptic piece of the cornea is removed from the apex of the cone, and this is followed by the application of a tight bandage. 2. For the relief of pain in *glaucoma;* stretching or laceration of the infratrochlear nerve. 3. For *sclerotomy;* the incision is confined to the scleral margin, without division of the overlying conjunctiva. **Baer's** (*B. F.*): 1. For *perineorrhaphy;* the same denudation is made as in *Emmet's operation*. The needle is passed deeply on the outer side of the denuded sulcus, brought out at the bottom of the sulcus, again introduced on the rectal side and brought out at the top of the opposite side of the sulcus; the crest of the rectocele is then picked up at the upper border of the denudation, the needle is passed down the inner side of the left sulcus and up on the outer side, the entire sweep being made with one suture. The same process is repeated once or twice. 2. For *supravaginal hysterectomy;* median celiotomy, ligation of the ovarian arteries in the broad ligament; the clamp is applied close to the uterus and the ligament divided between the ligature and the clamp; ligation of the uterine arteries in the broad ligament; formation of anterior and posterior peritoneal flaps; division of the cervix; if necessary, suture of the flaps over the cervical stump. Neither ligature nor suture must pierce or embrace cervical tissue, and nothing whatever is done to the cervical canal. **Baker's** (*M.*): 1. To secure *union of bone;* the use of steel pins to keep the bones together after excision of the knee. 2. For *carcinoma of the cervix uteri;* the cervix is removed by means of a uterotome that makes a funnel-shaped excavation, the base of which is on a line with the internal os, and the apex approaches or meets the fundus. 3. For *excision of the tongue;* removal through the mouth with the use of the écraseur as a supplemental means. **Ball's**: 1. For *iliac colotomy;* a modification of *Cripps' operation*, in which the incision is made in the left linea semilunaris, and the bowel secured above and below the future artificial opening by means of two special clamps, which are removed after suturing and opening of the bowel. 2. For *inguinal hernia;* the sac is separated up to the abdominal portion of the neck and then twisted around its own axis, after which the fundus is cut away and the stump is secured in the ring. **Ballingall's**, for *excision of the upper jaw*. The same as *Velpeau's operation*. **Bandl's**, for *uretero-vaginal fistula;* a catheter is passed into the bladder, and through an artificial opening in the bladder into the ureter, and the original opening is closed over the catheter. **Banks'** (*M.*): 1. For *aneurysm of the third part of the subclavian artery:* ligation of the first part of the artery. 2. For the *radical cure of inguinal hernia;* the sac is exposed and separated from the surrounding parts; a ligature is then applied close to the ring, and the fundus of the sac is cut away, after which the inguinal ring is closed by sutures. 3. For *internal urethrotomy;* a special urethrotome is used to divide the stricture from within outward. 4. For *removal of the breast;* it consists in removal of the entire breast, the overlying skin, the fascia over the pectoral muscle, and (if suspicious-looking) the fibers of the muscle. The axilla is always to be cleaned out. 5. For *removal of nasal polypi;* avulsion with forceps, when the nostrils are in a dependent position, so as to prevent choking by the blood. **Bardeleben's**, for *double harelip;* the mucous membrane and periosteum are stripped up behind the pre-maxillary bone; the septum is then divided and the projection reduced, or grasped by forceps and twisted upon itself. **Barden's**, for *angular ankylosis of the knee;* removal of a wedge-shaped piece of bone from the shaft of the femur, and fracture of the remaining part. **Bardenheuer's**: 1. For *cholecystotomy;* performed in two stages: the first operation consists in fixing the gall-bladder to the abdominal incision. After adhesions have formed, the bladder is opened and the operation completed. 2. *Exploratory incision;* an extraperitoneal exploratory incision, to allow of the palpation of the contents of the abdomen through the parietal peritoneum. 3. For *resection of the sacrum;* the removal of the entire lower part of the bone at the third sacral foramen. 4. For *suprapubic cystotomy;* a skin-incision, about the length of a finger, in the middle line, close above, and parallel with, the upper border of the pubis. **Barker's** (*A. E.*): 1. For *excision of the astragalus;* the incision runs from just above the tip of the external malleolus forward and a little inward, curving toward the dorsum of the foot. 2. For *excision of the hip;* by an anterior incision, commencing on the front of the thigh, one-half inch below the anterior superior iliac spine, and running downward and inward for three inches. 3. For *gastro-enterostomy;* the visceral incision is made only through the serous and muscular coats, and the most important part of the suturing is done before the stomach or bowel is opened. 4. For the *radical cure of inguinal hernia;* a modification of *Banks' operation*, in which the neck of the sac is ligatured and the sac below the ligature divided, but not dissected out, being used to occlude the internal ring. 5. For *spinal abscess;* the abscess is opened and scraped, and the débris washed out by the use of the flushing-curet. 6. For *ununited fracture of the clavicle;* the false joint is exposed by an incision; the two ends of the bone are removed by oblique cuts in the same plane, and held together by silver wire. 7. For *varicocele;* the application of subcutaneous aseptic silk ligatures at one or two points. **Bartisch's**, for *entropion;* removal of the entire ciliary margin of the lid. **Barton's** (*J. Rhea*): 1. For *bony ankylosis of the knee;* the removal of a wedge-shaped piece of bone from the lower end of the femur, to allow of the correction of the deformity. 2. For *osteotomy;* division of the femur between the two trochanters. **Barwell's** (*R.*): 1. For *aneurysm;* (*a*) the use of ox aorta in the ligation of aneurysm; (*b*) passing a needle, armed with a silver wire, subcutaneously around *vascular tumors* to avoid scars. 2. For *aneurysm of the innominate or aorta;* ligation of the carotid and subclavian arteries. 3. For *ligation of the first part of the subclavian artery;* the formation of a triangular flap turned upward and outward, with division of both heads of the sterno-mastoid muscle and the sterno-thyroid muscle. 4. *Osteotomy for genu valgum;* division of the lower end of the femur and upper end of the tibia, above and below their respective epiphyses. 5. For *varicocele;* the subcutaneous applica-

tion of a silver wire, and twisting of the free ends from day to day. **Bassini's,** for the *radical cure of inguinal hernia;* the sac is exposed, twisted, and the neck ligated and removed; the spermatic cord is lifted, and the border of the rectus is stitched to the edge of the internal oblique, the transversalis muscle and the transversalis fascia to Poupart's ligament under the cord. The cord is placed upon this layer and the border of the external oblique is stitched to Poupart's ligament over the cord. **Bates',** for *internal urethrotomy;* a special urethrotome is used to divide the stricture from within outward. **Battey's** (*R.*), for *oöphorectomy;* also called "*normal ovariotomy;*" removal of the ovaries in order to eliminate their physiologic influence. **Bauden's:** 1. For *amputation through the foot;* it is made at the tarso-metatarsal joint, disarticulating the first metatarsal bone, and sawing through the remaining ones on a level with the internal cuneiform bone. 2. For *amputation at the knee-joint;* by oval anterior and posterior flaps. 3. For *excision of the shoulder;* by a single anterior vertical or oblique incision. **Baum's,** for *stretching the facial nerve;* an incision is made downward and forward from behind the ear, about opposite the meatus, to a point immediately below the lobule, and then prolonged nearly to the angle of the jaw, a small, transverse incision being also made below the pinna. **Baynton's,** a method of healing *leg-ulcers;* it is the original method of applying adhesive straps and a bandage in cases of indolent ulcers. **Beaufils',** for *uranoplasty;* a single flap is twisted on itself so as to fill up the aperture. **Béclard's,** for *amputation at the hip-joint;* a modification of *Liston's amputation*, by cutting the posterior flap first. **Beer's:** 1. For *cataract;* extraction by the flap-method. 2. For *iridectomy;* an incision is made near the margin of the cornea with a lance-knife entered perpendicularly, then made parallel with the plane of the iris, making a section concentric with the cornea, of the desired length. 3. For *iridodialysis.* The same as *Himly's operation.* **Bégin's,** for *excision of the knee.* Similar to *Textor's operation*, *q. v.* **Bell's** (*C.*): 1. For *gastrotomy;* a parietal incision is made in a line extending from the umbilicus toward the left false ribs. 2. For *ligation of the first part of the lingual artery;* the same incision is used as in the operation of election, its center being opposite the body of the hyoid bone. **Belmas'** (*M.*), for *the radical cure of inguinal hernia;* it consists in introducing gold-beaters' skin in the neck of the sac, to excite sufficient inflammation. **Benham's,** for *hemorrhoids;* the same as *Pollock's operation*, *q. v.* **Bennett's** (*W. H.*), for *varicocele;* a modification of *Howse's operation*, in which the elongated cord is shortened. **Benson's,** for *entropion;* a modification of *van Millingen's operation*, in which a flap of mucous membrane is taken from the lower lip. **Bent's,** for *excision of the shoulder;* a flap is taken from the deltoid region, with the base inward, by means of one vertical and two transverse incisions. **Bérard's** (*A.*), for *naso-pharyngeal tumor;* an incision is made either along the median line or the side of the nose, extending down through the upper lip; by means of the cutting-forceps the outer wall of the nasal cavity and of the antrum is removed. **Berger's** (*P.*), for *interscapulothoracic amputation;* it is made by two flaps—an antero-inferior or pectoro-axillary flap, and a postero-superior or cervico-scapular flap. **Von Bergmann's** (*E.*): 1. For *hydrocele;* excision of the parietal part of the sac. 2. For *mastoid and middle-ear disease;* it consists in making a long, crescentic incision from above and in front of the auricle, backward and downward, and then loosening the periosteum from the entire osseous auditory canal; the bony portion between the auditory canal and the middle cranial fossa is penetrated with a chisel as far as the bony annulus tympanicus, and the incision is then carried backward toward the mastoid process, avoiding injury of the facial canal; there is then inserted a tamponade of iodoform-gauze. 3. For *nephrectomy;* a lateral lumbar incision is made from the upper end of the twelfth rib obliquely toward the junction of the outer and middle thirds of Poupart's ligament. **Berlin's:** 1. For *entropion;* incision through the entire thickness of the lid, parallel to the ciliary margin, and excision of a portion of the tarsus and conjunctiva. 2. For *excision of the lacrymal sac;* the same as *Platner's operation*, *q. v.* **Berlinghieri's,** for *entropion and trichiasis;* a horizontal incision is made along the margin of the lid, a vertical incision from each end of this, away from the margin, followed by dissection up of the flap, and extirpation of the hair-bulbs; the flap is then replaced. **Bernays'** (*A. C.*), for *gastrotomy;* removal of the growths bulging into the cavity of the stomach by the curet or other instrument, after making an incision through the wall of the stomach. **Bernheim's,** for *circumcision;* the operation is performed with the galvano-cautery instead of the knife. **Berthold's.** See under *Myringoplastic.* **Bigelow's** (*H. J.*), for *vesical calculus;* the ordinary operation of litholapaxy, *q. v.* **Billroth's** (*T.*): 1. For *blepharoplasty;* a modification of *Dieffenbach's operation*, *q. v.* 2. For *ectopia vesicæ;* a modification of *Thiersch's operation*, in which two broad, lateral doubly-pedunculated flaps are dissected up. 3. For *excision of the tongue;* a curved, submental incision is carried backward along the lower border of the jaw on both sides; the bone is then divided in two places, and after excision of the tongue, is replaced. 4. For *genu valgum;* incomplete linear osteotomy of the tibia. 5. For *naso-pharyngeal tumor;* an incision from the root of the nose to the tip is carried into the nostril. An incision from either end of this is carried horizontally across the cheek. The nose is separated in the line of the first incision, and the superior maxilla is sawn through in the line of the second and third incisions, and the bone pried out of place, hinging upon the pterygoid process. 6. For *ovariotomy;* the pedicle is ligated between two forceps, and then divided with the thermo-cautery. 7. For *pylorectomy;* a parietal incision is made in almost a transverse direction; the divided walls of the stomach and bowel are brought together and united by sutures on the side of the greater curvature of the stomach. 8. For *resection of the intestine;* when the segments of the intestine are of unequal size, one end is closed by sutures and the other end implanted into a slit made in the long axis of the bowel. **Bird's** (*G.*): 1. For *excision of the knee;* the patella is sawn through transversely to reach the joint, and the two fragments are brought together afterward with sutures. 2. For *jejunostomy;* an oblique incision is made in the same position as in pylorectomy; the transverse colon is drawn upward and the omentum is pushed to the left and the bowel attached to the margin of the parietal wound, and opened after adhesions have formed. 3. *Osteotomy* for extreme *flat-foot;* resection of a wedge of bone (the scaphoid alone, or the scaphoid and the head of the astragalus from the inner side of the foot. 4. For the *removal of new-growths of the tonsil;* a modification of *Cheever's operation* in which the second incision is made through the cheek, from the angle of the mouth to that of the lower jaw. **Bischoff's,** for *laceration of the female perineum;* a denudation is made similar to that made in *Freund's operation*, except that the tongue of vaginal tissue left in the median line is narrower, and

the denuded strips on either side are wider and nearer together. The tongue of the posterior vaginal wall is dissected up and brought forward over the median raphe, stitched between the labia and lateral walls, and the perineum is united by deep external sutures beginning behind. **Bishop's** (*Stanmore*): 1. For the *radical cure of inguinal hernia;* a modification of *Marwen's operation* in which the thread is passed through the wall of the sac on each side, so that when drawn upon, the sac is thrown into folds like a purse; Bishop also cuts open the anterior wall of the inguinal canal. 2. For *suture of the intestine;* an interrupted shoemaker's stitch is introduced on the mucous aspect, each suture loop being tied on alternate sides of the line of junction. **Blandin's**: 1. For *deviated nasal septum;* the removal of discs from the septum by means of a special punch. 2. For *double harelip;* repression of the pre-maxillary bone after excision of a wedge-shaped piece of the vomerine plate immediately behind it. 3. For *excision of the upper jaw;* it is done by a median incision. The cheek flap is raised by means of two incisions—the first carried down from the inner canthus along the side of the nose and into the mouth through the median line of the lip; the other is carried along the lower margin of the orbit. 4. For *symblepharon;* dissection from above downward, and folding inward of the flap to form the palpebral conjunctiva. **Blasius'**: 1. For *blepharoplasty;* a flap is taken from the forehead to form a lower eyelid. 2. For *chiloplasty;* two curved incisions are made, each beginning at the center of the lower lip and extending outward and downward to the sides of the cheeks, for the purpose of forming a lower lip. 3. For *uranoplasty;* a flap is dissected from the forehead, and the long pedicle is twisted so that the flap (the nose being absent) can be brought through the nares into the cleft. **Bobbs'** (*J. S.*), for *cholecystotomy;* the gall-bladder is incised and, after removal of calculi, is closed by one suture. **Boeckel's** (*E.*): 1. For the removal of *tumors of the naso-pharynx;* an incision is made down to the bone across the bridge of the nose, from one lacrymal sac to the other, and is carried down one nasal furrow to the margin of the nostril, which it opens. The columna is also separated; the bones in the line of the incision are divided, and the septum is separated and the tumor removed; the parts are then to be restored. 2. For *excision of the wrist;* it is done by a single dorsal incision on the radial side, with division of the extensor tendons on the same side, and ending by the subperiosteal operation. **Boen's**, a method of performing *embryotomy:* it consists in the removal of all of the prolapsed portions of the fetus, followed by thoracic and abdominal evisceration, complete division of the fetus into two parts and separate extraction of the two. **Bogue's**, for *varicocele;* ligation with catgut of the veins at different points, after exposing them by means of an incision. **Bŏhm's**, for *tenotomy;* it is the modern method of performing tenotomy. **Bond's**, for *flat-foot;* it consists in making two transverse and two semicircular incisions across the side of the foot with a Paquelin cautery, beginning at the inner malleolus and extending one-third of the distance across the sole of the foot, the semicircular incisions crossing the transverse. The contraction following healing is said to restore the arch. **Bonnet's** (*M. A.*): 1. For *enucleation of the eye;* the conjunctiva is divided at the corneal border, and separated from the ball for some distance back; the tendons are next cut, and pressure backward on the lids will usually dislocate the ball forward, when it may be grasped and the enucleation completed. 2. For *the radical cure of hernia;* after reduction of the hernia, a fold of skin is tucked up, and three or four needles are passed through and allowed to remain; these set up inflammation, which closes the canal. The spermatic cord must be avoided. **Bonzel's**, for *iridodialysis;* the iris is detached with a small hook through a corneal incision. **Borelli's**, for *staphyloma;* the staphyloma is transfixed with two pins introduced at right angles to each other, and encircled behind the pins with a thread. **Bose's**, for *tracheotomy;* a vertical incision is made in the middle line for about one-and-a-half or two inches from the center of the thyroid cartilage; a transverse incision is then made along the upper border of the cricoid cartilage to divide the deep cervical fascia. **Bosworth's**, for *deviated nasal septum;* removal of the obstructing tissue by means of a delicate saw. **Botrel's**, for the *removal of naso-pharyngeal tumors;* in order to preserve the free border of the soft palate, *Maisonneuve's incision* is made, followed by *Nélaton's operation.* **Bottini's** (*E.*), for *enlarged prostate gland;* a fresh urethra is bored through the substance of the gland by means of the galvano-cautery. **Bouisson's** (*F.*), for *rhinoplasty;* this is very similar to *Thiersch's operation*, but the flaps are formed somewhat differently. **Boutonnière**: 1. For *external urethrotomy;* the stricture is divided through an opening made in the urethra just beyond it. 2. For the *removal of nasal poiypi;* extraction through an incision in the middle line of the soft palate. **Bowman's**: 1. For *conical cornea;* a circular portion of the apex is removed with a small trephine which is not allowed to penetrate the whole thickness of the cornea. 2. For *discission;* two needles are passed through the cornea at the same time, one near the inner and the other near the outer margin. The points of the needles are plunged into the center of the membrane and drawn apart by sweeping movements. 3. For *ectropion;* The same as *v. Ammon's operation.* 4. For *excision of the pupil;* the puncture and counter-puncture are made with Graefe's linear knife; the blades of fine scissors are introduced and a triangular piece of the iris, as well as the constrictor pupillæ, removed. 5. For *fistula of the lacrymal gland;* the establishment by means of a thread of a fistula on the conjunctival surface, to permit of the opening in the skin being permanently closed. 6. For *iridodesis;* radial incision of the iris from the pupillary margin. 7. For *lacrymal obstruction;* slitting of the canaliculi. 8. For *ptosis;* subcutaneous division of the tarsal portion of the orbicular muscle. **Boyer's**, for *excision of the tongue;* it is done through the mouth by two converging incisions and two lateral ones, meeting at the same point. **Bozeman's** (*N.*), for *vesico-vaginal fistula;* the edges of the fistula are pared and wire sutures are introduced in the usual manner, after which a lead plate or "button" is threaded on the sutures so as to cover the fistula. It is held in place by perforated shot. **Brainard's**: 1. For *angular ankylosis of the knee;* the shaft of the femur is drilled subcutaneously and then fractured. 2. For *ectropion;* a flap-transplanting operation. 3. For *ununited fracture;* drilling of the fragments to excite reparative action. **Brandt's**, for *uranoplasty;* in cases of a wide cleft and a deep palate, all the molars of the upper jaw are extracted some months before the operation to produce flattening of the palatal arch. **Brasdor's**, for *aneurysm;* ligation immediately beyond the aneurysm. **Braun's**, for *nephrectomy;* it is done by means of a transverse incision eight or ten cm. long, parallel with and one cm. below the arch of the ribs. **Bribosia's**, for *cataract;* the knife is passed across the anterior chamber and the iris is caused to prolapse upon the knife as the incision is made, so that iridectomy is simultaneously performed,

the capsule having previously been lacerated by a stop-needle. **Briggs'**: 1. For *traumatic epilepsy;* excision of the painful cicatrix. 2. For *varicocele;* ligation of the veins at two points with subcutaneous division. **Brinton's,** for *amputation through the knee-joint;* the same as *Stephen Smith's operation* with the exception that the semilunar cartilages are left *in situ.* **Brown's,** for *nymphomania;* amputation of the clitoris. **Browne's,** for *inversion of the uterus;* incision of the fundus, and dilatation of the inverted cervix through the incision. **Brüns'** (*V.*): 1. For *amputation through the foot;* a modification of *Pirogoff's amputation,* in which the sawn surface of the os calcis is made concave and the tibia convex. 2. For *arthrectomy;* the interior of the ankle-joint is exposed by two anterior and two posterior vertical incisions, and all diseased tissue, including the synovial membrane, ligaments, cartilage and bone, is removed by erasion. 3. *Plastic;* a quadrilateral gap is closed by displacing a rectangular flap from each side and uniting them in the median line. 4. For *removal of a naso-pharyngeal polypus;* it is done through the upper jaw by an osteoplastic operation, the whole nose being turned over to one side. 5. For *restoration of the lower lip;* two quadrilateral flaps are fashioned out of the whole thickness of the cheek and upper lip on each side of the mouth, and so turned downward that their upper borders can be sutured together in the median line. **Bryant's** (*T.*): 1. For *lumbar colotomy;* an oblique incision is made midway between the last rib and the iliac crest. The bowel is fixed in position and opened. 2. For *splenectomy;* the incision is made a little to the outer side of the linea semilunaris. 3. For *varicocele;* subcutaneous ligation of the veins at two points by means of two needles. **Buchanan's**: 1. For *lithotomy:* the medio-lateral operation, with the use of an angular staff. 2. For *restoration of the lower lip*; elevation of an oblique flap from each side of the chin and union of the two flaps in the middle line. 3. For *tenotomy for talipes varus* in children; division of the tendo Achillis and abductor pollicis muscle, together with the adjoining half of the flexor brevis digitorum muscle, and, in some cases, part of the deep plantar ligament. **Buck's**: 1. For *bone-suture;* the use of metallic sutures to keep the bones together after excision of the knee. 2. For *chiloplasty;* to form a lower lip. Pins are inserted into the skin to mark the points of the incisions, and a triangular flap is made from the cheek on either side of the mouth. 3. For *genu valgum;* a cuneiform osteotomy in which the tibia, fibula, and patella are included. 4. For *restoration of the upper lip;* (*a*) *for one-sided deficiency,* a quadrilateral flap from the lower lip is twisted upward and connected by sutures with the freshened edge of the upper lip; (*b*) *for contracted angle,* an incision is made along the red border of the lip skirting the deformed angle; a transverse cut is then made outward, and sutures are introduced. **Bumstead's**: 1. For *circumcision*; the method formerly employed of grasping the foreskin with forceps and snipping off with a bistoury. 2. For *internal urethrotomy;* done with a modification of *Maisonneuve's* or *Peter's* urethrotome. **Burckhardt's,** for *retropharyngeal abscess;* an opening is made on the outside of the neck. **Von Burow's**: 1. For *chiloplasty;* the large triangular gap is closed by raising flaps on each side after making lateral incisions. 2. For *entropion;* a deep groove is made parallel to and 3 mm. inside the ciliary margin, with excision of a narrow strip of skin, and closure by sutures. **Busch's**: 1. For *Dupuytren's contraction;* a triangular flap of skin and subcutaneous tissue is dissected over the palmar cord, the base of the flap being where the finger and palm join, and the apex at the proximal extremity. 2. For *entropion;* removal of a V-shaped piece of skin from the lower lid, followed by suturing. **Butcher's**: 1. For *dentigerous cysts;* cutting away of the expanded bone, followed by the use of the gouge. 2. For *double harelip;* cutting through the projecting pieces, without dividing the soft parts, or interfering with the vascular supply from behind, previous to bending them back. **Buzzi's,** for the *formation of an artificial pupil;* separation of the iris from its peripheral attachment by means of a needle inserted through the cornea. **Byrd's**: 1. For *closure of an artificial anus;* the same as *Dupuytren's operation.* 2. For *imperforate rectum;* the formation of an artificial anus in the perineum, after colotomy. **Calignani's,** for *neurectomy;* resection of the inferior dental nerve through an incision made between the lobe of the ear and the angle of the jaw. **Callisen's** for *lumbar colotomy;* a vertical incision is made following the line of the colon. **Carden's** (*R.*): 1. A method of performing *amputations;* the formation of a single anterior tegumentary flap. 2. For *amputation above the knee-joint;* a single rounded flap is removed from the front of the joint, and the operation is completed by a circular incision. **Carnochan's**: 1. For *elephantiasis;* ligation of the main artery of the limb. 2. For *neurectomy;* removal of the second division of the fifth nerve, together with the spheno-palatine ganglion as far back as the foramen rotundum. A horizontal incision is made just below the orbit, and this is joined in the middle by a vertical one running downward; this is followed by exposure of the spheno-maxillary fossa by trephining through the antrum. **Carpue's,** *rhinoplasty:* repair of the nose by taking a heart-shaped flap from the forehead. **Carter's,** for the formation of an *artificial pupil;* a small incision is made through the cornea, in front of the plane of the iris, followed by iridotomy. **Cassel's,** for *exostoses of the ear;* removal through the external orifice of the ear. **Celsus'**: 1. A method of performing *amputations;* division of the skin by the circular method, its retraction, and the cutting to the bone at the level of the retracted skin. 2. For *chiloplasty;* the removal of tumors of the lower lip by a V-shaped incision; horizontal incisions are carried out from the base to enable the wound to be approximated more easily. 3. A method of performing *embryotomy;* also called *cervical* embryotomy; it is the method of decapitation of the fetus. 4. For *lithotomy:* localization of the stone by finger in the rectum with perineal incision. 5. For *rhinoplasty;* flaps are secured from the cheeks, the septum being formed, if necessary, from the upper lip. **Cesarean,** in case of otherwise *impossible labor,* incision into the gravid uterus through the abdominal wall, and removal of the fetus. **Chalot's,** for the removal of *naso-pharyngeal polypi;* the nasal fossæ are opened by dividing the attachments of the upper lip to the bone. The two upper canine teeth are then removed, and the alveolus and hard palate divided from before backward from the starting-point. The piece of bone thus isolated is turned down into the mouth, and the polypus is exposed. **Chamberlaine's** (*K.*): 1. For *ligation of the first part of the axillary artery:* the vessel is exposed by means of a curved incision, having its convexity downward, across the supra clavicular fossa and extending ½ inch below the clavicle. 2. For *ligation of the brachial artery;* an incision is made along the lower margin of the clavicle, and this is joined near its middle by a second incision over the deltoid and pectoral muscles. **Championnière's,** a method of performing *embryotomy;* it consists in

evisceration followed by rachiotomy in two or three places and extraction of the fetus in two portions. **Charrière's,** *internal urethrotomy;* it is done with a modification of *Civiale's* urethrotome. **Chassaignac's:** 1. For *amputation of a finger;* it is done with a single dorsal or palmar flap. 2. For *excision of the elbow;* a longitudinal posterior incision is made along the outer side of the olecranon process. 3. For *excision of the rectum;* it is done by means of scissors, knife, and écraseur. 4. For *excision of the tongue:* it is done with the écraseur by the suprahyoid method. **Chauvel's,** for *restoration of the upper lip*; the same as *Dieffenbach's operation.* **Cheever's:** 1. For the removal of a *naso-pharyngeal tumor:* (*a*) *single operation:* a single incision is made from the inner canthus of the eye to the angle of the mouth on the side on which the tumor is situated; an incisor tooth is then extracted, and the superior maxilla is removed; (*b*) *double operation:* an osteoplastic operation is performed on both bones, the facial surfaces are divided by horizontal incisions from the middle meatus outward to a point below the zygoma. The septum and vomer are then divided, and the lower parts of the jaws are depressed. 2. For *removal of tonsillar tumors;* it is done by an incision through the neck, passing from the lobule of the ear, downward and forward, to the hyoid bone. A second incision is then made along the horizontal ramus of the lower jaw to form a flap. **Cheselden's:** 1. A method of performing *amputations;* it is the same as *Celsus' method*, except that the skin-flap is dissected loose from its subjacent attachments, and hence increased in length. 2. For *iridotomy;* a horizontal incision is made through the iris by means of a sickle-shaped needle introduced through the sclerotica. 3. For *lithotomy;* the lateral operation. See *Lithotomy.* **Cheyne's** (*W.*), for the radical cure of *femoral hernia;* after reducing the hernia, a flap of the pectineus muscle is raised and made to cover the hernial orifice. **Chibret's,** for *glaucoma;* the establishing of corneal drainage. **Chiene's,** for *genu valgum;* the removal of an oblique transverse wedge from the body of the condyle of the femur. **Chopart's:** 1. A method of *amputation through the foot;* the bony structure is divided at the articulation between the astragalus and the calcaneum behind, and the scaphoid and cuboid bones anteriorly. 2. For *restoration of the lower lip;* the elevation of a square flap from below. **Chrymar's,** for *ovariotomy;* the pedicle is tied in two portions and the ends are left outside. **Circular,** a method of *amputation* by a circular sweep of the knife, in contradistinction to the flap-operation. **Civiale's** (*J.*): 1. For *internal urethrotomy;* a special urethrotome is used to divide the stricture from within outward. 2. For *lithotomy;* the medio-bilateral operation. See *Lithotomy.* 3. For *lithotrity.* See *Lithotrity.* **Clark's,** for *urethroplasty for urethral fistula;* the edges of the fistula are pared; then a transverse incision is made through the integuments of the penis about an inch above and below it. The skin-flaps are dissected up and brought together by clamps or quill-suture. **Clemot's,** for *harelip;* flaps are turned down on either side, the incision stopping at the red margin of the lip. The cleft is then united from side to side. **Cleveland's,** for *lacerated perineum*; denudation of a triangular area, having for its base a line joining the bases of the labia majora and for its apex the crest of the rectocele. The sutures are introduced in loops, each suture having two points of entrance and two of emergence. **Cloquet's** (*J.G.*), a method of *circumcision;* it is done by means of an incision by the side of the frenum. **Coates',** for *internal hemorrhoids;* a pile is seized with forceps, Coates' clamp is applied to its base, a few fine catgut sutures are passed beneath the clamp, the pile is excised, bleeding is checked, the clamps are removed, and the sutures are tied. **Cock's,** a method of *external urethrotomy;* the urethra is opened behind the stricture without a guide, the knife being carried into the median line of the perineum and the incision extended vertically as far as is necessary. **Cohnstein's,** a method of performing *Cesarean section;* it is a modification of the usual operation, consisting in turning the whole uterus out of the abdominal wound and making the opening on its posterior aspect. **Colles',** for *single hare-lip;* the inner margin is incompletely pared and hinged backward on the mucous membrane, to which it is still attached; the outer margin is then transfixed and two flaps are cut, an upper and a lower, which are turned upward and downward respectively, and attached on the opposite side. **Colley's,** for *talipes.* See *Davies-Colley's operation.* **Collis',** for *excision of the tongue.* The same as *Jaeger's operation.* **Cooper's** (*Sir A.*): 1. For *ligation of the abdominal aorta;* the intraperitoneal operation. The abdomen is opened by an incision three or four inches in length, made in the linea alba, with the center corresponding to the umbilicus. 2. For *ligature of the external iliac artery;* an incision four or five inches long is made parallel with Poupart's ligament, and nearly an inch above it, commencing just outside the center of the ligament and extending outward and upward beyond the anterior superior iliac spine. 3. For *tinnitus and deafness in otitis media chronica;* excision of a portion of the membrana tympani. 4. For *varicocele;* excision of a part of the redundant scrotum. **Cornuan's,** for *amputation at the hip-joint;* disarticulation by a modified oval method, with the summit of the incision on the outer side. **Cotting's** (*B. E.*), for *ingrowing toe-nail;* all the overlying tissues, together with the sides of the toe, are sliced off freely. The contraction in healing produces a cure. **Courvoisier and von Hacker's,** a method of performing *gastro-enterostomy;* the jejunum is connected to the stomach directly after tearing or cutting a passage through the bloodless area of the transverse meso-colon, under the meso-colic arch of Riolan. **Cowell's,** for *glaucoma;* paracentesis of the vitreous chamber. **Crampton's:** 1. For *entropion;* incisions are made in the lid, and healing allowed to take place by granulation. 2. For *ligation of the common iliac artery;* the incision is commenced at the anterior extremity of the last false rib, and, proceeding directly downward to the ilium, follows the line of the crest to the anterior superior spine. The vessel is reached from behind. **Crédè's,** a method of performing *hysterectomy;* it is a modification of *Freund's operation*, and consists in making a resection of the pubes. **Crescent operation,** for *lacerated perineum*, involving the vaginal entrance only; a crescent-shaped denudation is made from the vulvo-vaginal entrance, the angles of which extend into the vulvo-vaginal sulci. **Cripps'** (*H.*): 1. For *excision of the rectum;* dissection of the rectum from the adjacent tissues and removal of the diseased portion, the wound being allowed to heal by granulation. 2. For *iliac colotomy;* an imaginary line from the anterior superior iliac spine to the umbilicus is crossed at right angles, 1½ inches from the superior spine, by an incision 2½ inches long. The bowel is fixed in position and opened. 3. A method of *transfusion:* it is the same as *Aveling's operation*, the instrument, however, being supplied with clips instead of taps. **Critchett's:** 1. For *cataract-extraction;* a slight modification of *Graefe's incision.* 2. For *evisceration of the eyeball;* a number of deep stitches are passed through the sclera before removing the staphyloma;

after the evisceration they are brought together and tied. 3. For *iridodesis;* drawing of the iris through a corneal incision and its ligation with silk. The ligatured loop sloughs off. 4. For *keratoconus;* excision of an elliptic portion by a two-edged knife. 5. For *staphyloma;* a method of carrying several curved needles through the ciliary region before abscinding the staphyloma. 6. For *stillicidium lacrimarum;* excision of a portion of the posterior wall of the canaliculus, thus forming a reservoir for the tears. 7. For *subconjunctival strabotomy;* a small incision is made at the lower edge of the insertion of the internal rectus, close to which the tendon is divided. A small counterpuncture may be made at the upper edge of the tendon for the escape of the effused blood. **Croft's:** 1. For *exposing the antrum;* an incision is made from the ala nasi to the nasal process of the superior maxillary bone, then along the margin of the orbit; the nasal process is cut through with forceps, the periosteum stripped off and a portion of bone removed. 2. *Plastic;* a bridge of sound skin is raised and separated from the subjacent tissues, except at the extremities, by means of oiled silk. After granulation has been established the adjoining contracted (cicatricial) structures are divided and the bridge of skin severed at one end, and made to occupy the gap. **Crosby's,** for *backward dislocation of the first phalanx of the thumb;* the phalangeal portion of the thumb is first raised to a right angle with the metacarpal bone; the proximal phalanx is then pressed from behind forward. (An old method, having been practised by Sir C. Bell and by Gerdy.) **Curling's,** for *varicocele;* a straight pin is passed between the vas deferens and the veins about two inches above the testicle, and another three-quarters of an inch below this point. A figure-of-eight ligature is then applied and the veins are divided subcutaneously between the pins. **Cusack's,** for *hemorrhoids;* removal by the clamp and cautery. **Cushing's** (*H. W.*), for *suture of the intestine;* a right-angled continuous suture is introduced, the needle passing through the serous and muscular coats of the bowel only. **Czerny's** (*V.*): 1. For the *radical cure of inguinal hernia;* the sac is exposed and isolated; the neck is tied with a strong catgut ligature, and amputated below this point; the stump is pushed into the abdominal cavity; the borders of the opening are freshened and united by continuous catgut sutures. 2. For the *removal of tonsillar tumors;* tracheotomy is performed and the larynx or fauces plugged. The growth is then exposed by cutting downward and outward from the angle of the mouth to the anterior border of the masseter, and sawing through the lower jaw, between the second and third molar teeth. 3. For *suture of the intestine;* a modification of *Lembert's suture*, in which there is inserted an inner row of interrupted sutures which unite the mucous membrane only. 4. For *vaginal hysterectomy;* the uterus is drawn down by Muzeux's forceps and the vaginal vault is completely opened around the cervix. The uterus is separated from the bladder with the finger. A free incision is next made in Douglas's cul-de-sac, when the uterus is turned backward, and brought through the vaginal incision. The peritoneum is now separated anteriorly and the broad ligaments are ligated in from three to six portions on each side. **Czerny-Schröder's,** *hysterectomy.* See *Czerny's hysterectomy.* **Dallas',** for the *radical cure of inguinal and femoral hernia;* after a transverse incision through the integument a special instrument is introduced to produce abrasion of the hernial canal; the instrument is then withdrawn, and the external wound sealed with iodoform-collodion, and a compress applied. The canal is obliterated by the resulting inflammatory action. **Davat's,** for *varicocele;* after separating the vas deferens from the veins, an acupressure pin is passed through the scrotum. By means of a perineum needle a thread is carried subcutaneously over the veins through the same skin-punctures as the needle has made. The loop is then slipped over the head of the pin and tied tightly over the needle. A cork is now placed on the point of the pin. **Daviel's,** for *cataract;* extraction through a large corneal incision downward, without an iridectomy. **Davies-Colley's:** 1. *Osteotomy for talipes;* resection of a wedge of bone from the outer side of the tarsus without regard to the articulation. It always includes portions of the os calcis, cuboid, astragalus and scaphoid bones. 2. For *uranoplasty;* a triangular muco-periosteal flap is dissected from one side of the cleft, while on the other side a raw surface is prepared by reflecting a longitudinal flap in such a way that it can be turned, as on a hinge, into the cleft. The first flap is then implanted upon the second. **Davy's,** for *osteotomy;* the same as the *Davies-Colley's operation.* **Decé's,** for *webbed fingers:* a fold of skin is pinched up near the base of the web, and dissected toward the commissure; the fingers are then kept apart. **Delagarde's,** *to improve a stump;* stitching of the extensor tendons into the tissues of the sole-flap in *Chopart's amputation*, to prevent tilting upward of the heel and downward of the scar. **Delore's.** See *Redressement forcé.* **Delpech's:** 1. For *ligation of the first part of the axillary artery:* an oblique incision is made downward along the gap that separates the pectoralis major from the deltoid, starting from the clavicle. 2. For *urethroplasty;* a single flap is raised and carried across the fistula to a new surface prepared for it. **Del Toro's,** for *conical cornea;* destroying the apex by means of a white-hot knife. **Demarquay's,** for *naso-pharyngeal tumor;* an incision is made from the internal angle of the eye along the nasal furrow to the free margin of the nose; it is then carried outward horizontally to the margin of the masseter muscles. Liston's forceps are used to remove sufficient bone to expose the tumor. **Denans',** for *enterorrhaphy;* the joining of the serous surfaces of the cut intestines by means of three metallic tubes. **Dennis',** for *ligation of the internal iliac artery;* it is done by a celiotomy, the abdomen being opened in the middle line by an incision extending from the symphysis pubis to the umbilicus. **Denonvillier's,** for *rhinoplasty;* a triangular flap is raised from the side of the nose above the defective ala, with its pedicle internal, and is then displaced downward into position. **Desault's** (*P. J.*): 1. For *double hare-lip;* gradual and continuous backward pressure of the pre-maxillary bone, by means of a bandage. 2. For a *preternatural anus:* a plug is placed in the two ends of the intestine so that its middle rests on the spur of mesentery; when the latter has been sufficiently obliterated, the plug is removed and an external obturator bandage is applied. 3. For *restoration of Stensen's duct;* a seton is passed through the cheek into the mouth in the course of the duct. When the patency of the new duct has been established, the seton is removed and the external aperture is closed. 4. For *stricture of the lacrymal duct;* the application of cauterants by means of threads passed through the duct. **Desmarres':** 1. *Iridectomy;* after incision of the cornea with eye-forceps, a fold of iris is drawn out and excised. 2. For *pterygium;* detachment and transplantation of the pterygium. **Desprez',** for *naso-pharyngeal polypus;* removal by an osteoplastic operation through the nose. The cartilaginous part of the nose is turned over to one side

after division of its connections on the opposite side. **Dezeanneau's,** for *naso-pharyngeal tumor:* the hard palate is divided in the middle line, from its junction with the soft palate, forward to or beyond the palato-maxillary suture; the section is then carried across at right angles until it approaches the alveolar process, when it is turned and carried backward to the soft palate. **Dianoux's,** for *entropion;* the formation of a ciliary and cutaneous flap; separation of the underlying muscle from the tarsus, and suture of both flaps to the margin of the latter. **Diday's,** for *webbed fingers;* two narrow longitudinal flaps are dissected up from the palmar and dorsal aspects of the fingers, and each flap is then folded round to cover the denuded surface of the finger to which it is attached. **Didot's,** for *webbed fingers;* the same as *Diday's operation.* **Dieffenbach's** (*J. F.*): 1. For *amputation at the hip-joint;* an elastic ligature is applied around the limb, a circular incision is made down to the bone, the vessels are secured and the ligature removed; a knife is inserted two inches above the greater trochanter and the incision is carried down the outer aspect of the bone to meet the circular incision; the joint is then disarticulated. 2. For *blepharoplasty;* a quadrangular flap is taken from the cheek. 3. For *chiloplasty;* the diseased portion of the lower lip is removed by a wedge-shaped incision; the gap is closed by making horizontal incisions on both sides, and then introducing sutures. 4. For *cicatricial entropion;* a triangular flap is removed and the gap is closed by displacing and transplanting a large quadrilateral flap and leaving the raw surface to close by granulation. 5. *To expose the whole of the upper jaw;* an incision is made through the center of the lip, around the ala, and up along the side of the nose to the inner canthus, and then outward just below the margin of the orbit, as far as the malar prominence. 6. For the removal of *naso-pharyngeal tumors;* an incision, beginning at the lower and outer angle of the nostril, is carried along the base of the nose in the naso-labial fold until the ala of that side can be easily turned upward and inward. If necessary the same can be done on the opposite side. 7. *Osteoplasty, for cleft in the hard palate;* the edges are pared and both soft tissues and bone divided on each side, the detached portions being prised toward the middle line. 8. For *restoration of the upper lip;* (*a*) the formation of a quadrangular flap, attached below, at the level of the mouth, which is turned horizontally inward to meet a similar one on the other side; this is the reverse of *Stédillot's operation;* (*b*) two curved incisions start from the apex of the partial central defect and are carried round the alæ of the nose; the flaps thus marked out are detached and brought together in the median line. 9. For *rhinoplasty;* (*a*) repair of the nose by taking a pyriform flap from the forehead; (*b*) three elongated flaps are raised from the sunken nose and then re-united with sutures, and made to project forward by drawing previously detached portions of the cheeks toward the median line. 10. For *single hare-lip;* a modification of *Stokes' operation* in which additional incisions are made skirting the ala nasi, with the object of securing more tissue. 11. For *symblepharon;* it consists in folding the lid inward and placing the skin against the eyeball. 12. For *tenotomy;* division of the belly of the muscle. **Dittel's,** for *enlarged prostate;* enucleation of the lateral lobes of the prostate by an external incision. **Dolbeau's,** for *lithotomy;* a median incision is made into the prostatic urethra, followed by dilatation of the wound by means of metallic dilators; the stone is then crushed and the débris evacuated. **Donegana's,** for *iridodialysis;* it is done by means of a special needle; the iris is detached and then incised from its circumference toward the center. **Dowell's** (*G.*), for *the radical cure of hernia;* plugging of the mouth of the sac with its invaginated fundus and securing the fundus to the surrounding tissues by sutures tied over a piece of cork. **Drausart's:** 1. For *ptosis;* the occipito-frontalis muscle is brought to act on the lid through the medium of cicatricial bands, by means of threads, which are allowed to ulcerate their way through the tracks along which they were passed. 2. For *retinal detachment;* iridectomy, the recumbent position, a pressure-bandage, and subcutaneous injection of small doses of pilocarpin. **Dubrueil's:** 1. For *amputation of the hand;* a single semilunar flap is formed from the dorsal surface of the metacarpal region of the thumb, and when raised, the two ends of its base are joined by a circular incision around the arm at the wrist, followed by disarticulation. 2. For *amputation of the toes;* disarticulation of the toes *en masse* at the metatarso-phalangeal joints by a more or less circular incision, a U-shaped flap being cut from the inner side of the great toe. **Dudley's,** for *retroversion of the uterus;* the abdomen is opened, and a strip is denuded from the anterior surface of the uterus, and likewise a strip along the inner side of each round ligament, followed by suturing of the three together. **Duncan's:** 1. For *lacerated perineum;* an incision is made in the median line on the posterior vaginal wall as far as the laceration extends. From the lower end of this an incision is made up along the vulval border of the laceration on either side. The flaps thus outlined are dissected up, and stitched together, and the labia brought together by deep cutaneous sutures. 2. A method of *transfusion;* re-infusion of the patient's own blood mixed with a solution of sodium phosphate. **Duplay's:** 1. For *epispadias;* the urethra is formed at the expense of the corpus spongiosum and corpora cavernosa instead of by flaps. 2. For *hypospadias;* it is performed in three stages; (1) straightening of the penis and the formation of a meatus; (2) the formation of a canal from the meatus to the hypospadiac opening; (3) junction of the old and new canals. **Dupuytren's** (*G.*): 1. Method of performing *amputations;* the double-flap method, the skin-incisions being made by cutting from without inward, and the flaps completed by transfixion. 2. For *amputation at the shoulder-joint;* two rounded flaps are taken from the outer and inner aspects of the arm; the outer flap is made first by transfixion from behind at a point two inches below the acromion; the bone is then disarticulated and a short inner flap cut from within outward. 3. For *atresia vaginæ;* combined incision and dilatation. 4. For *chiloplasty;* excision of the diseased tissue, the wound being allowed to heal by granulation. 5. For *closure of an artificial anus;* compression of the spur with the clamp, followed by a plastic operation on the skin. 6. For *division of contracted palmar fascia;* the open method, both skin and fascia being divided by a simple transverse incision. 7. For *excision of the elbow.* The same as *Moreau's operation.* 8. For *lithotomy;* the bilateral method. See *Lithotomy.* 9. For *stricture of the lacrymal duct;* incision of the anterior wall of the sac, and the passage of a fine gold or silver probe through the duct. 10. For *suture of the intestine;* the edges of the wound are turned inward and the opposed folds of serous membrane brought together by means of an ordinary continuous suture, without involvement of the mucous membrane. 11. For *wry-neck;* tenotomy of the sterno-mastoid muscle. **Duval's** (*M.*): 1. For *amputation of the leg;* an oblique elliptic incision is made around the limb above the malleoli and the bone divided higher than in *Guyon's operation.* 2. For *ligation of the*

common iliac artery; an incision about five inches in length is commenced one-and-one-quarter inches to the outer side of the spine of the pubes, just above Poupart's ligament; after running parallel with this ligament for one-and-a-half inches, the incision curves sharply upward and is directed toward a point one-and-one-quarter inches to the outer side of the umbilicus. **Ely's,** for *otitis media suppurativa chronica;* the grafting of small pieces of skin on the granulating surfaces. **Emmet's** (*T. A.*): 1. *Colporrhaphy;* a modification of *Sims' colporrhaphy;* the sutural approximation of three equidistant, transverse, infracervical denuded spots on the anterior wall of the vagina, and the apposition of the opposing edges of the folds thus formed after abrasion. 2. For *cystocele and urethrocele;* the *buttonhole operation;* the removal of a small circular portion of tissue, opening the bladder or urethra, to provide for drainage; this is afterward closed by operation. 3. For *lacerated perineum;* the crest of the rectocele and the two lower caruncles are drawn together by tenacula, and the tissue thus folded together is denuded as far into the sulci as the folds extend. The V-shaped stitches are passed from the center toward the circumference in the sulci, and the perineum is closed by two or three superficial sutures. 4. For *ovariotomy;* the pedicle is ligated with silver wire. 5. For *procidentia uteri;* freshening of the anterior vaginal wall in the middle line and on either side. The two lateral denudations together should correspond in size and shape to the one in the median line. The lateral fresh surfaces are then folded on the central one and stitched. See *Emmet's colporrhaphy.* 6. For *trachelorrhaphy;* the edges of the rent are pared and united by sutures. **Erichsen's:** 1. For *nevus;* ligation of the base with a double ligature which is tied in segments. 2. For *varicocele;* after separation of the vas deferens from the veins, an incision one-half inch long is made on the anterior and posterior aspects of the scrotum; the veins are then included in a loop of wire without implicating the scrotum. **Esmarch's:** 1. For *amputation through the foot;* a modification of *Pirogoff's amputation;* two incisions are made, one across the sole and the other across the dorsum of the foot. 2. For *amputation at the hip-joint;* the soft parts of the thigh are divided to the bone by a single sweep of the knife five inches below the tip of the trochanter; the bone is then sawn across and a second incision is made to join the first from a point two inches above the trochanter, when the bone is shelled out. 3. For *ankylosis of the lower jaw;* an incision about two inches long is made along the lower border of the jaw, and a wedge-shaped piece of bone is removed from the horizontal portion. **Estlander's:** 1. *Thoracoplasty for empyema;* resection of several ribs to allow the chest-wall to come in contact with the lung. 2. For *restoration of the lower lip;* a triangular flap is so fashioned from the upper lip that its base contains the coronary artery, while its apex is situated on the cheek; this flap is turned downward, with its apex occupying the lower angle of defect. **D'Etiolles'** (*Leroy*): 1. For *the radical cure of inguinal hernia;* a scrotal fold is passed in the inguinal canal and held by means of special forceps. 2. For *iridectomy;* removal of a portion of the iris by an instrument constructed like a tonsillotome. **Everbusch's,** for *ptosis;* it consists in shortening the tendinous attachment of the levator palpebræ to the tarsus. A horizontal incision is made in the center of the lid; threads armed at each end are used, and, after transfixing the tendon in the wound, the needles are brought out at the free margin of the lid, and the silk tied. **Farabeuf's** (*L. H.*): 1. For *amputation at the elbow-joint;* (*a*) an elliptic amputation with the highest point of the ellipse over the prominence of the olecranon; (*b*) a modification of *Guérin's operation* in which the single external flap is made longer. 2. For *amputation of the foot.* See *subastragaloid amputation* of the same surgeon, with which this is identical in all essential points. 3. For *amputation of the forefinger;* disarticulation at the metacarpo-phalangeal joint by an external palmar flap. 4. For *amputation of the great toe;* disarticulation at the metatarso-phalangeal joint by an internal plantar flap. 5. For *amputation above the knee-joint;* a modification of *Carden's amputation* in which two flaps are formed, the anterior being the longer one. 6. For *amputation of the leg;* it is done at the "place of election" by a large external flap, being a modification of *Sédillot's operation* in which the anterior tibial artery is preserved in the entire length of the flap. 7. For *amputation of the thigh;* a modification of *Spencer's amputation* in which slightly different flaps are used. 8. For *amputation of the thumb;* disarticulation at the metacarpo-phalangeal joint by an oblique palmar flap. 9. For *subastragaloid amputation;* by a large internal and plantar flap. 10. For otherwise *impossible labor.* See *Galbiati's Operation.* **Fenger's** (*C.*): 1. For *gastrostomy;* a parietal incision is made parallel with and near to the left costal margin. 2. For *traumatic cerebral abscess;* exploratory puncture and aspiration, in conjunction with trephining. **Fenwick's,** for *excision of the knee;* both femur and tibia are sawn in a curved line so as to make them fit together more accurately. **Fergusson's** (*Sir W.*): 1. For *amputation through the foot;* the same as *Pirogoff's operation,* except that the malleoli are not interfered with, unless diseased, the retained portion of os calcis being thrust up between them. 2. For *amputation at the hip-joint;* a modification of *Liston's amputation* in which the posterior flap is made longer than the anterior. 3. For *division of the levator palati muscle;* a triangular-bladed knife, set at right angles, is introduced behind the velum and the muscle divided close to its origin. 4. For *double hare-lip;* removal of the premaxillary bone. 5. For *excision of the upper jaw;* the same naso-labial incision is made as in *Liston's operation,* a second cut being made from the angle of the mouth to the malar bone, and, if needed, a third at right angles to the outer extremity of the buccal wound. 6. For *lithotomy;* lateral lithotomy with the curved staff. 7. *Osteoplasty* for a *cleft in the hard palate;* the same as *Dieffenbach's operation.* **Fischer's,** for *stricture of the lacrymal duct;* the same as *Schmalz's operation,* except that a loop of twilled silk is used on the end of a catgut string. **Flajani's,** for *iridodialysis;* the same as *Himly's operation.* **Flap-operation:** 1. A method of *amputation;* the formation of definite flaps, embracing the skin only, or all the soft parts. 2. For *cataract-extraction;* a curved section of the cornea of sufficient extent for the removal of large, hard cataracts. 3. For *cicatricial entropion.* See *Fricke's* and *Dieffenbach's operations.* **Flap-splitting.** See *Tait's Operation.* **Flarer's,** for *trichiasis and cicatricial entropion;* the lid is split into two portions as far back as the ends of the hair-bulbs of the cilia. The anterior flap, containing the bulbs, is then cut away by incision through the skin from above. **Forbes'** (*S. F.*), for *amputation through the foot;* a modification of *Chopart's operation,* the three cuneiform bones being disarticulated from the scaphoid and the cuboid bone sawn through in the same line. **Forbes'** (*W. S.*), the division of the accessory tendons of the extensor communis digitorum

muscle, in order to give the ring-finger of musicians (especially pianists) greater freedom of action. **Förster's**, for *a ripening cataract;* iridectomy, followed by circular rubbing of the cornea with a blunt instrument. **Forster's** (*C.*), for *gastrostomy;* a parietal incision is made in a vertical direction through the top of the linea semilunaris. **Foullioy's**, for *amputation at the hip-joint;* the same as *Ravaton's amputation*, the common femoral artery being ligated at the fold of the groin as a preliminary step. **Franco's**: 1. For *cystotomy;* the original supra-pubic method. See *Cystotomy*. 2. For *double hare-lip;* complete removal of the pre-maxillary bone as a preliminary step. **Frank's**, a method of performing *Cesarean section;* the uterus is turned out of the abdomen before incising; drainage is obtained by passing a tube through the wound and into the vagina; the round ligaments are brought together and sutured. **French's**, for *carbuncle;* subcutaneous incision. **Frère Côme's**, for *lithotomy;* the high operation. See *Lithotomy*. **Frère Jacques'**, for *lithotomy;* a long knife is thrust in the ischio-rectal fossa, penetrating the bladder behind the prostate, then cutting forward; a staff is used, which, however, is not grooved. **Freund's**: 1. For *hysterectomy;* by abdominal section. 2. For *laceration of the female perineum;* the bilateral method, with extension of the vaginal triangles or tongues along the cicatrices on either side, and leaving sound vaginal wall about the median line. **Fricke's**: 1. For *blepharoplasty;* a tongue-shaped flap is taken from the temple or cheek. 2. For *cicatricial entropion;* a flap-operation similar to *Dieffenbach's operation*. **Fritsch's**: 1. For *posterior colporrhaphy for extreme degrees of rectocele;* a modification of *Simon's operation;* denudation of the posterior vaginal wall, with a larger perineal denudation. The raw surfaces are closed by vaginal and perineal sutures. 2. For *vaginal hysterectomy;* the broad ligaments are first operated upon; lateral incisions are made in the vaginal vault, the tissues carefully separated, hemorrhage controlled by sutures, and the incisions united by anterior and posterior incisions; the uterus is turned forward and brought down. **Fritz's**, for *the radical cure of inguinal hernia;* after reduction, pins, protected at each end by ivory or bone discs, are passed in front of and behind the cord in the canal and allowed to remain ten days; ulceration results, which is intended to close the canal and consequently cure the hernia. **Fryer's**, a method of *transfusion;* the direct method, with the use of a modified Aveling instrument. **Fuchs'** (*E.*), for *tarsorrhaphy;* the lower lid is split into two laminæ to the desired extent by an intermarginal incision; this is converted into a flap by a short incision downward from the inner extremity of the first incision; the same incision as the first is made in the upper lid and then the zone of hair-follicles is ablated; the wound is then sutured. **Furnari's**: 1. For *iridectomy;* the same as *Physick's operation*. 2. For *pannus;* removal of a circular strip of conjunctiva at the circumference of the cornea. **Gagnele's**, for *varicocele;* subcutaneous ligation of the varicose veins by silver wire twisted on metal buttons. **Gaillard-Arlt's**, for *entropion*. See *Arlt's Operation*. **Galabin's**: 1. For *lacerated perineum;* the denudation follows the cicatrix, but extends a little beyond in all directions. 2. A method of *transfusion;* the direct method; a piece of elastic tubing, supplied at the extremities with cannulæ and spring-clips, is employed. **Galbiati's**, for otherwise *impossible labor due to contracted pelvis;* 1. Also called *bi-pubeotomy* and *ischio-pubeotomy;* it consists in the division of the ischiatic and horizontal branches of the pubes with the chain-saw, followed by the application of the obstetric forceps to the head of the fetus. 2. Symphysiotomy. **Galezowski's**: 1. For *cataract;* the incision is made as in *Wright's operation*, except that the point of the knife is made to divide the capsule. 2. For *pterygium;* turning of the apex under the base. 3. For *synectomy;* it is done by means of a needle with a cutting-edge. **Gant's**: 1. For *excision of the tongue;* a modification of *Jaeger's operation*. 2. For *ankylosis of the hip-joint;* division of the shaft of the femur just below the lesser trochanter. **Garretson's**, for *staphylorrhaphy;* the same as *Fergusson's operation*, except that the operator stands behind the patient. **Garrigues'**, a method of *transfusion;* the indirect method, the blood being defibrinated and filtered before being injected. **Gély's**, for *suture of the intestine;* two straight needles at the ends of a single thread are introduced behind and at the sides of the wound, and made to traverse the outer coats of the bowel in a direction parallel to the edge of the wound for a distance of four or five mm. The needles are then crossed and the procedure repeated as often as necessary. **Gensoul's**: 1. For *double hare-lip;* forcible repression of the pre-maxillary bone by seizing the projecting tubercle at its extremity and fracturing the bony processes that support it. 2. For *excision of the upper jaw;* one incision is carried vertically downward from the level of the inner canthus through the lip; a second is started at right angles to the first at the level of the floor of the nose; and a third is carried upward in front of the ear to the external angular process of the frontal bone. 3. For *stricture of the lacrymal duct*. See *Laforest's Operation*. **Gérardin's**, for *prolapse of the uterus;* denudation of the median portion of the ventral and dorsal vaginal walls, or of the ventral lip of the cervix and dorsal vaginal wall, and union by sutures. **Gerdy's** (*P. N.*): 1. For *entropion;* also called the *scalping operation;* removal of the entire margin of the lid. 2. For *the radical cure of inguinal hernia;* by invagination of the scrotum in the inguinal canal, and its retention there by means of a suture passed by a long needle. 3. For *stricture of the lacrymal duct;* by two vertical parallel incisions into the duct, with excision of a quadrilateral piece of bone from the inner wall. **Gibson's**: 1. For *the formation of an artificial pupil*. See *Beer's Operation*. 2. For *cataract;* removal of a soft lens through a small corneal incision. **Gillespie's**, for *excision of the wrist;* it is done by a single longitudinal dorsal incision between the extensor communis and extensor secundi muscles, without division of the tendons. **Gioppi's**, for *cataract;* the lens in its capsule is extracted with a spoon-like instrument through an incision similar to *Graefe's incision*. **Giraldès'**, for *single hare-lip;* the *mortise operation;* two flaps are made, the first with its base attached above to the root of the nose, the second attached below, on the opposite side of the cleft at the muco-cutaneous junction; an incision is then made outward from the ala and the surfaces are approximated by turning the first flap up and the second down. **Giraud's**, for *stricture of the lacrymal duct;* a modification of *Desault's operation*, in which a thread is passed through the duct. **Godlee's**, for *hepatotomy;* it is performed in two stages, as in *Volkmann's operation*, except that stitches are passed deeply into the substance of the liver, and in a double row. **Goodsall's**, for *horse-shoe fistula in ano;* a single division is made in the posterior median line, to avoid incontinence from repeated division of the sphincter. **Gould's** (*Pearce*): 1. For *amputation of the penis;* complete removal of the organ by dissecting off the crura. 2. For *varicocele;* the vas deferens is separated from the veins at the upper

part of the scrotum, and the skin is divided between the two by transfixion; the veins are then secured in a loop of platinum wire attached to a battery. **Gouley's:** (*J. W. S.*) 1. For *external urethrotomy;* a small conductor is passed through the stricture, and, guided by this, the stricture is divided and a catheter conducted into the bladder. 2. For *extirpation of the penis;* a curvilinear incision is made on either side of the root of the penis; the cavernous bodies and the urethra are transfixed with needles, and the organ is amputated ⅛ inch in front of these; a grooved staff is passed into the bladder; a sharp-pointed scalpel is carried through the perineum and lodged in the groove of the staff, and all the tissues are divided from behind forward; the urethra is stitched to the skin; the crura are removed. 3. For *hypospadias;* a flap is removed from either side of the normal site of the urethra, and the skin brought forward so that the denuded surfaces are doubled on themselves; they are then secured by stitches. 4. For *internal urethrotomy;* it is done with a special tunneled urethrotome after *Maisonneuve* and *Voillemièr;* or, with a special dilating instrument. **Goyrand's** (*N.*): 1. For *division of the contracted palmar fascia;* a longitudinal incision is made in the skin in the long axis of the contracted band, which, when exposed, is divided transversely. 2. For *ligation of the internal mammary artery;* an oblique incision two inches long is made at the end of the intercostal space near the edge of the sternum. **Von Graefe's:** 1. For *cataract;* extraction of the cataract through a scleral incision, with iridectomy and laceration of the capsule. 2. For *conical cornea;* (*a*) A small portion of the cornea is removed in the immediate vicinity of the apex of the cone, without perforation, in order to induce cicatricial contraction. (*b*) The production of an ulcer at the apex of the cornea to give rise to cicatricial contraction. 3. For *dacryops;* the introduction of a fine thread through the lacrymal duct and anterior wall of the cyst; the ends are tied and the ligature is allowed to slough through, or the tissue may be divided after a few days. 4. For *ectropion;* the denudation of a wedge-shaped portion of the lid, and the edges brought together by a hare-lip suture, after an incision in the cheek, parallel with the margin of the orbit. 5. For *entropion;* (*a*) two vertical incisions are made through the skin of the upper lid, which lid is split into an anterior and a posterior leaf, and the cutaneous margins are entered higher up along the vertical incisions. (*b*) A horizontal incision is made through the skin of the upper lid, and a triangular piece of skin, with its base downward, is removed; also a triangular portion of the tarsus, base upward, is removed; the wound is then sutured, 6. For *evisceration;* removal of the cornea and adjacent zone of the sclera; the contents of the eyeball are entirely scooped out with a spoon, and the opening is closed with sutures. 7. For *fistula of the lacrymal gland;* extirpation of the gland. 8. For *prolapse of the lower lids;* excision of a triangular portion of skin, and closure of the wound vertically. 9. For *ptosis;* excision of the fibers of the orbicularis muscle. 10. For *retinal detachment;* incision of the retina by a needle made to penetrate the vitreous chamber through the sclerotic, near the cornea. 11. For *rhinoplasty;* the same as the *Tagliacotian method, q. v.* 12. For *single hare-lip;* the edges are prepared by an arch-like incision and brought together with the muco-cutaneous margins even. 13. For *staphyloma;* the production of suppurative choroiditis, followed by natural atrophy of the globe of the eye. 14. For *strabotomy;* a small incision is made midway between the center and the lower edge of the muscle's insertion (internal rectus) near the edge of the cornea; a hook is introduced from below upward and the tendon is divided close to its insertion. 15. For *trichiasis;* a modification of *Arlt's operation;* the lid is split into two flaps, and the flap containing the hair-bulbs is transplanted away from the margin of the lid after two vertical incisions have been made on either side. **Graefe-Romberg,** for *blepharospasm;* division of the supraorbital nerve. **Green's:** 1. For *entropion;* an operation combining the essential features of the *Arlt-Jaesche* and *Anagnostakis' operations,* but the chief feature is that the sutures are made to include the upper border of the tarsus and the tendon of the levator. 2. For *readjustment of the levator palpebræ muscle;* dissection through the upper border of the upper lid to reach the eyeball, without opening the conjunctival sac, followed by suture of the tendon of the levator. **Gritti's** (*R.*), for *amputation above the knee-joint;* the patella is preserved in a long anterior flap, and, having had a thin slice removed from its deep surface, is secured in apposition with the femur, the latter having been deprived of its articular surface by being sawn through the condyles. **Gross'** (*S.D.*): 1. For *amputation of the foot;* a modification of *Syme's operation;* the plantar incision is made further anteriorly, thus affording greater chances of a good blood-supply. 2. For *amputation of the great toe;* the operation is performed through the continuity of the metatarsal bone, not at the articulation; there is a dorsal incision. 3. For *varicocele;* subcutaneous ligation with a stout cord or silver wire and a cork compress. **Gross'** (*S. W.*), for *internal urethrotomy;* a special exploratory urethrotome is used to divide the stricture from within outward. **Grossmann's,** for *retinal detachment;* aspiration of the effused sub-retinal fluid and slow injection of a warm saline solution into the vitreous. **Gruening's:** 1. For *pannus;* curetting of the cornea. 2. For *removing steel or iron from the eye;* by means of a magnet the foreign body is drawn out through the original wound, or extracted through an incision made in the sclera, when the particle can be drawn to a favorable site. **Guérin's:** 1. For *amputation at the elbow-joint;* by a single external flap. 2. For *carbuncle.* See *French's operation.* 3. For *excision of part of the upper jaw;* a curved incision, with its convexity outward, is made from the ala of the nose to the angle of the mouth; the soft parts are dissected up, the nostril opened, and the bone removed by dividing the hard palate in the middle line and its facial aspect outward to the maxillary tuberosity. 4. For *iridotomy;* a crucial incision of the iris through the cornea. 5. For the removal of a *naso-pharyngeal polypus;* by removal of part of the upper jaw. See *Guérin's excision of part of the upper jaw.* 6. For *subconjunctival strabotomy;* a Z-shaped tenotome, introduced between the muscle and the sclera, divides the former when the cutting-edge of the instrument is turned forward, and a slight sawing motion is applied. **Guérin and Brodhurst's,** for *congenital dislocation of the hip;* subcutaneous division of the stronger muscles connecting the femur and the pelvis, followed by continuous extension. **Guérin and Desmarre's,** for *corectopy;* by means of a punch-like knife a small portion of the cornea is removed, into which opening the iris falls, and is retained by adhesions. **Günther's,** for *amputation at the hip-joint;* disarticulation by a modified oval method, with the summit of the incision on the outer side. **Gussenbauer's:** 1. For *suture of the intestine;* it combines the *Czerny* and *Lembert sutures* in one, but does not traverse the mucosa. 2. For *tapping the pericardium;* resection of part of the fifth rib, followed by incision of the pericardium. **Guthrie's:** 1.

For *amputation at the hip-joint;* antero-posterior flaps are made by cutting from without inward. 2. For *amputation at the neck of the humerus;* it is done by the oval method, the incision being commenced beneath the acromion process and carried to the inner side of the arm, then beneath to the outside, where it is met by another incision begun at the same point as the first. 3. For *ligation of the first part of the axillary artery;* an incision is made in the course of the artery through the ventral fold of the armpit, with complete division of the soft parts. **Guyon's,** for *amputation of the leg;* supra-malleolar division of the bones and covering of the terminal part of the stump with the tissues of the back of the heel. **Hagedorn's:** 1. For *double hare-lip;* the soft parts covering the premaxillary bone are pared, also the margins of the cleft, and the parts are then brought together by sutures. 2. For *single hare-lip;* the margins of the gap are isolated by incisions and removed, and the raw surfaces are brought together. **Hahn's:** 1. For *gastrostomy;* the parietal incision is made parallel with the lowest rib, and the stomach is opened through the eighth intercostal space. 2. For *intubation of the pylorus;* gastrotomy is performed and the tube is carried through the stenosed pylorus into the duodenum and left there. 3. For *knock-knee;* osteotomy on the outer as well as on the inner side of the femur. 4. For *nephrorrhaphy;* the capsule of the kidney is exposed by an incision in the loin between the ilium and the last rib. In the first operation sutures were carried through the perinephric fat alone; later, they were placed in the capsule proper. **Halpin's,** for *extirpation of the lacrymal gland;* a curved incision is made through the middle of the eyebrow, with removal of the gland, and drainage. **Halsted's** (*W. S.*): 1. For the *radical cure of inguinal hernia;* the same as *Bassini's operation.* 2. For *suture of the intestine;* a modification of *Lembert's suture* in which each stitch includes not only the whole muscular coat, but also a little of the submucous coat. **Hancock's:** 1. For *amputation through the foot;* a modification of *Pirogoff's operation* in which the sawn surface of the os calcis is brought in contact with the transverse section of the astragalus. 2. For *glaucoma;* intraocular ciliary myotomy. **Handyside's,** a method of performing *ovariotomy;* the ligatures of the pedicle are carried through Douglas's pouch into the vagina. **Hardie's,** for *division of a contracted palmar fascia;* a modification of *Goyrand's open method,* in which an incision is made across the hand above the principal transverse fold of the palm and over the tense fascia. **Harrison's** (*R.*): 1. For *internal urethrotomy;* a special urethrotome is used to divide the stricture from without inward. 2. For *puncture of the bladder through the prostate gland;* a special straight trocar is introduced in the middle line ¾ of an inch in front of the anus, and pushed through the prostate into the bladder. **Hasner's,** for *blepharoplasty;* two tongue-like flaps are made, one above, and the other below the eye, to supply the deficiency in the lid. **Hawkins',** for *contraction of the palmar fascia;* one transverse incision in the palm, to divide the large fascial bands, and semicircular incisions at the base of the little and ring-fingers, to divide the digital prolongations of the fascia. **Hay's:** 1. For *stricture of the lacrymal duct;* the passage of a special probe, having a hook at one extremity. 2. For *strabismus;* conjunctival incision and tenotomy. **Heart's,** for *excision of the tongue;* the section through the tongue is made with an écraseur. **Heath's,** for *fixity of the lower jaw;* division of the ascending ramus beneath the masseter with a saw introduced through the mouth by means of a small incision above the last molar tooth. **Heaton's** (*S.*), for *the radical cure of inguinal hernia;* the subcutaneous injection of an astringent solution to produce irritation and contraction of the tissue about the rings. **Hegar's:** 1. For *Colporrhaphy for lacerated perineum;* also called the *median operation;* it consists in a triangular denudation upon the dorsal wall of the vagina, the base of the triangle being parallel with the lower margin of the vagina, and the apex reaching almost to the cervix, an oval denudation being made upon the skin-perineum. 2. For *oöphorectomy;* the same as *Battey's operation.* **Hegar-Tait's,** for *oöphorectomy;* a misnomer for *Tait's operation.* **Heineke's:** 1. For *exostosis of the external meatus of the ear;* removal by means of a mallet and gouge. 2. For *pyloric obstruction;* the ventral wall of the strictured pylorus is divided in the long axis of the canal, and the incision is carried for the distance of one inch into the healthy tissue; the incision is then sutured in a transverse direction by catching the center of the cut on either side and making traction. **Heineke-Mikulicz's,** for *pyloric obstruction;* the same as *Heineke's operation.* **Heisrath's,** for *trachoma;* the excision of a moderately broad piece of the transition-fold of the conjunctiva, the incision to include the subconjunctival tissue and a portion of the tarsus. **Heliodorus',** for the *radical cure of inguinal hernia;* after reduction of the hernia the sac is twisted and incised, gentle traction being made so that sufficient of the sac may be removed. **Henry's,** for *varicocele;* a modification of *Cooper's operation;* the application of a specially devised clamp, from above downward, in the line of the raphe, and removal of the redundant skin. **Herzenstein's,** for *trichiasis;* this is especially applicable in the partial forms; a ligature is passed subcutaneously around the roots of the offending cilia, and allowed to cut its way out. **Herzfeld's,** for *carcinoma of the uterus;* extirpation of the uterus through a sacral opening. **Heurteloup's,** for *varicocele;* a modification of *Cooper's operation;* it consists in resection of the redundant scrotum, together with a portion of the veins behind. **Hey's:** 1. For *amputation through the foot;* the same as *Lisfranc's operation,* except that the internal cuneiform bone is sawn through in a line with the articulation of the second metatarsal bone, instead of being disarticulated. 2. For *amputation of the leg;* the amputation is made in the middle of the leg by a long posterior flap, cut by transfixion, and a slightly shorter anterior one. **High Operation:** 1. Supra-pubic lithotomy. See *Lithotomy.* 2. *Delivery by forceps of a fetus,* the instrument being applied at the superior strait. **Hill's** (*B.*), for *internal urethrotomy;* it is done with a modification of *Maisonneuve's* urethrotome. **Hilton's:** 1. For *amputation of the penis;* the spongy body is divided about ½ inch in front of the cavernous portion, splitting it longitudinally and uniting the lateral flaps to the skin. 2. For opening an *axillary abscess;* an incision is made through the skin with a knife; then a grooved director is pushed into the deeper structures until pus escapes. 3. For *fissure of the anus;* an incision is made from without, a sharp-pointed bistoury being inserted beneath the base and the point made to protrude in the bowel. 4. For *obturator hernia;* it is done by abdominal section and withdrawing the intestinal loop from within. **Himly's:** 1. For *corectopy;* the same as *Adams' operation.* 2. For *iridodialysis;* the same as *Scarpa's operation,* except that the needle is introduced through the cornea. 3. For *symblepharon;* preliminary perforation of the adhesion along the fornix, and the passing of a lead wire along the canal so formed, thus converting a posterior into an anterior symblepharon,

which can then be operated upon by simply separating the adhesions. **Von Hippel's,** for *transplantation of the cornea;* a circular portion of the leukomatous cornea is removed by means of a trephine, the membrane of Descemet being left intact; a piece of the whole thickness of a rabbit's cornea is then excised with the same trephine and transplanted. **Hirschberg's,** for *detachment of the retina;* paracentesis of the sclera over the seat of the effusion. **Hodgson's:** 1. For *ligation of the axillary artery;* a semilunar incision is made just below the clavicle, terminating near the anterior margin of the deltoid muscle. 2. For *ligation of the femoral artery;* ligation at the apex of Scarpa's triangle. **Hoffa's,** for *congenital dislocation of the hip;* the head of the femur is reached through a 3-inch incision and freed from its attachments; the cotyloid cavity is then gouged out to receive it, and reduction is accomplished under extension. The dressing consists of a plaster-of-Paris bandage, with continuous extension. **Hoin's,** for *amputation at the knee-joint;* it is done by the posterior-flap method. **Holmes'** (*T.*): 1. For *ectopia vesicæ;* closure by means of reversed and superimposed flaps. 2. For *excision of the os calcis;* an incision is made from the inner edge of the tendo Achillis along the upper border of the os calcis and the outer border of the foot to the calcaneo-cuboid joint, and this is joined by another incision running across the sole, the peroneal tendons being divided. 3. For *varicocele;* a small incision is made in the scrotum, and the veins are ligated with kangaroo tendon. **Holt's,** for *internal urethrotomy;* rupture of the stricture by rapid dilatation. **Horn's,** for *chiloplasty;* removal of the diseased tissue by a V-shaped incision, and filling in of the gap by tissue from the maxillary bones. **Horner's:** 1. For *cicatricial ectropion;* the lid is dissected loose and a flap from the cheek is used to fill in the gap produced. 2. For *salivary fistula;* the diseased tissues are cut out with a punch, on a wooden spatula held in the mouth; the external wound is then closed. **Horsley's** (*V.*), for *craniectomy;* the skull is exposed by raising a flap, and the bone is removed with the trephine and bone-cutting forceps. **Hotz's:** 1. For *entropion;* it is on the same principle as *Anagnostakis' operation*, but more of the orbicularis muscle is removed, and the sutures are placed higher up. 2. For *trichiasis;* the skin above the lid-margin is united to the upper border of the tarsal cartilage. **Howse's:** 1. A method of performing *gastrostomy;* a vertical incision is made in the sheath of the rectus muscle, a little to the inner side of its outer border. 2. For *lumbar colotomy;* a modification of *Bryant's operation* in which the operation is carried out in two stages, two pairs of pressure-forceps being made to grasp the muscular coats of the colon, and to hold the bowel until the time for establishing the artificial anus. 3. For *nephro-lithotomy;* an incision is made in a vertical direction, and this is supplemented by a transverse one; the knife is entered close to the edge of the erector spinæ muscle, below the lower border of the twelfth rib, and is carried obliquely downward and forward toward the crest of the ilium. 4. For *varicocele;* after the vas deferens has been separated from the veins, an incision 1½ or 2 inches long is made over the varicocele; the veins are then ligated above and below, and the included bundle is excised. **Hue's,** for performing *circumcision;* an elastic ligature is made to transfix the dorsal aspect of the prepuce by means of a curved needle; the ligature is then tied in front and allowed to cut through. **Hueter's:** 1. For *excision of the elbow;* a modification of *Ollier's operation.* 2. For *excision of the facial nerve;* the incision is made in front of the ear, and one of the branches of the nerve is exposed in the parotid gland; this is to be followed back to the trunk. 3. For *excision of the shoulder;* it is done by a single anterior vertical or oblique incision. 4. For *chiloplasty* (*lower lip*); the margins of the defect are brought together and an incision is made in the cheek horizontally outward from the oral angle, involving the whole thickness on the distorted side; the mucosa on each side of the new wound is reflected a little and then united to the skin by sutures. 5. For *rhinoplasty;* a quadrilateral flap is taken from the dorsum of the nose to form a new columna. 6. For *stretching the facial nerve;* an incision two inches long is made in front of the ear, its center being opposite to the upper part of the lobule. **Huguier's:** 1. A method of performing *colotomy;* the right lumbar operation. 2. For *iridodialysis;* the iris is divided from the center to the circumference, and each lip is then detached. 3. For the removal of a *naso-pharyngeal tumor;* the same as *Bérard's operation*, except that a smaller fragment is removed; the bone is divided horizontally from the maxillary tuberosity to the anterior nares, and the base of the pterygoid process is cut through: the lower part of the jaw is then dislocated downward within the mouth. **Hulke's,** for *fistula of the lacrymal gland;* a silk thread armed with a needle at either end is passed from the orifice of the fistula through the conjunctiva and allowed to remain; a triangular portion of the upper lid is thus included in the thread. **Humphrey's:** 1. For *amputation of the penis;* a circular skin-flap is made, the urethra is dissected loose from its attachments to the stump of the corpora cavernosa, drawn through a slit made at the base of the scrotum on the under side and attached to the margins of the slit so as to make an artificial meatus in the perineum. 2. For *excision of the condyle of the lower jaw;* the condyle is exposed by reflecting a triangular flap upward, and the bone is sawn through the neck, all of the condyle and external pterygoid process being removed. **Hunter's** (*John*): 1. For *aneurysm;* ligation of the artery on the cardiac side of the aneurysm at some distance from it. 2. For *internal urethrotomy;* it is done with a special dilating urethrotome. 3. For *ligation of the femoral artery;* it is done in the aponeurotic canal. 4. For *trichiasis;* after puncturing the hair-bulb with a fine knife to the depth of ⅛ of an inch, a needle, dipped in some irritant, is introduced and the hair extracted. **Hutchinson's:** 1. A method of performing *ovariotomy;* application of a clamp to the pedicle. 2. A method of *transfusion:* the indirect method, with the use of a fountain-syringe devised for the purpose. 3. For *varicocele;* the open method of deligation. **Indian,** for *rhinoplasty;* a flap is taken from the forehead, with its pedicle at the root of the nose; hollow plugs are inserted into the nostrils, and the flap is secured. See *Keegan's operation.* **Invagination Method.** See *Jobert's operation.* **Italian Operation:** 1. For *cystotomy.* See *Allarton's operation.* 2. For *rhinoplasty;* the skin is taken from the arm over the biceps; the flap is cut on three sides, and after the skin has shrunk it is fitted to the fresh margins of the defect, the arm being bandaged in position for at least eight days. **Jaboulay's.** See *Exothyropexy.* **Jacobs',** for *trichiasis;* scalping of the edge of the lid, including the cilia and the hair bulbs. **Jacobson's:** 1. For *amputation of the penis;* it is done by the flap-method, the flap being taken from above. 2. For *cataract-extraction;* scleral section, the flap skirting the lower margin of the cornea; iridectomy. **Jacque's,** for *excision of the tongue;* it is done through an opening made in the cheek. **Jaeger's:** 1. For *cataract-extraction;* the incision is

made with a concave knife. 2. For *ectropion;* detachment of the everted lid, except at the angles, and its adaptation to the eyeball. 3. For *ectropion of the upper lid;* the incision is made parallel to the edge of the lid, with excision of a portion equal to the difference in the lengths of the lids; the wound is then sutured. 4. For *entropion;* excision of a portion of the lid with the cilia and hair-bulbs, and healing by granulation. 5. For *excision of the elbow;* a modification of *Moreau's incision*, in which the outer vertical limb of the H is omitted. 6. For *excision of the tongue;* excision through an opening made in the cheek by a curved incision extending from the angle of the mouth to the anterior edge of the masseter muscle. 7. For *trichiasis;* paring away of the edge of the lid; removal of the portion of skin over the hair-bulbs. **Jaesche's:** 1. For *distichiasis;* the margin of the lid is separated except at either end; an incision is made parallel to this, and the intermediate portion of skin is removed; the wound is then closed with sutures. See *Arlt's Operation.* 2. *Plastic;* the triangular gap is closed by displacing and transplanting a flap marked out by a curved lateral incision, and sutures are applied. **Janin's,** for *iridotomy;* a vertical incision of the iris is made on the inner side of the pupil by a knife or scissors introduced through the cornea. **Jeffray's,** for *excision of the knee;* it is done by two vertical lateral incisions. **Jenks',** for *lacerated perineum;* denudation of the surface by means of scissors introduced at the lower edge, close to the integument, and made to dissect up the lower surface without being withdrawn. **Jobert's** (*M.*): 1. For *castration;* a curved incision is made upon the scrotum, with its convexity turned downward and inward. 2. For *ligation of the upper part of the popliteal artery;* an incision, three inches in length, is made parallel with and just posterior to the tendon of the adductor magnus muscle, commencing at the junction of the middle with the lower third of the thigh. 3. For the *radical cure of hernia;* two cannulated needles are passed and the cannulæ allowed to remain until the requisite amount of inflammation has been produced. 4. For *suture of the intestine;* the *invagination method;* the upper segment is transfixed near the divided margin on two opposite sides by a needle and thread; the two ends of the thread hanging down on each side are both armed with needles, and, the intestinal wall of the lower segment being transfixed, the invagination is completed, partly by traction on the sutures, and partly by squeezing. **Jones'** (*P.*), for *lumbar colotomy;* a modification of *Bryant's operation* in which the lower end of the colon is closed by detaching the mucosa from the upper segment of the bowel and adjusting it by sutures. **Jones'** (*S.*), a method of performing *gastrostomy;* the parietal incision is made almost in a vertical direction, in a line drawn from the left nipple to the spine of the pubes. **Jones'** (*W.*), for *ectropion;* a V-shaped incision is made with its apex directed away from the margin of the lid; when this is united with sutures, after the skin has been freed from the underlying tissues, the wound is Y-shaped. **Jordan's,** for *resection of the nose for removal of polypi;* osteoplastic resection of the nose and splitting of the upper lip to give more room. **Jordan's** (*Tourneaux*): 1. For *amputation at the hip-joint;* the soft parts are divided down to the bone by the circular method, as low down as possible, and the femur is shelled out by a longitudinal incision along the outer side of the thigh. 2. For *amputation at the shoulder-joint;* the soft parts are divided down to the bone by the circular method, three or four inches below the axilla, and the humerus is shelled out by a longitudinal incision along the outer and posterior aspect of the limb, meeting the circular incision at right angles. 3. For *excision of the tongue;* division of the cheek back to the ramus of the jaw, and removal of the diseased part by two écraseurs, worked simultaneously. The same as *Jaeger's operation.* 4. For removal of a *tumor of the naso-pharynx;* an incision beginning at the gingivo-labial fold, just below the posterior margin of the nostril, is carried forward into the nasal cavity, on through the ala of the nose, and along the lateral aspect of the nose; the whole upper lip is then divided, the flaps turned aside, and the anterior nares exposed. **Jörg's,** for otherwise *impossible labor.* See *Laparo-elytrotomy.* **Jurine's,** for *iridotomy;* the needle is introduced through the sclerotic, and the iris is punctured from behind forward, and from before backward, and the punctures are united by an incision. **Kappeler's,** for *cholecystenterostomy;* it is performed in one stage; the distended gall-bladder is emptied by puncture with a trocar, and the margins of the wound, after being enlarged, are united, by means of a double row of sutures, to the highest part of the jejunum. **Keegan's,** a method of *rhinoplasty;* the *Indian method;* the flap being derived mainly from one side of the forehead. **Keen's** (*W. W.*): 1. For *linear craniotomy;* the skull is exposed through a slight flap, and the bone is divided by means of a special bone-cutting forceps. 2. For *prominent auricles;* a large oval piece of skin is removed from the back of the ear, and a V-shaped piece of cartilage is excised. 3. For *stretching the facial nerve;* the use of a weak faradic current to find the nerve, and stretching from the periphery toward the center; the remainder of the operation is the same as *Baum's operation.* **Keetley's** (*C. B.*), for *the radical cure of umbilical hernia;* after separation and torsion of the sac, it is drawn, by means of a ligature, into a prepared space between the linea alba and the peritoneum, above the umbilical ring. **Kehrer's:** 1. A method of performing *Cesarean section;* a modification of the usual operation, in which the uterus is opened at the level of the internal os by a transverse incision. 2. For *depressed nipple;* excision of a ring of skin around the nipple, and healing by granulation. **Keith's:** 1. A method of performing *hysterectomy for myoma;* either enucleation, or removal of the entire organ and its appendages, with the clamp-treatment of the pedicle. 2 A method of performing *ovariotomy;* treatment of the pedicle with the cautery and clamp. **Kelly's** (*H. A.*), for *retro-positions of the uterus;* median celiotomy, followed by stitching of the uterus to the ventral abdominal wall. **Kelsey's,** for *inguinal colotomy;* the incision is parallel to and half an inch above Poupart's ligament. **Kerr's,** for *amputation at the hip-joint;* the same as *Ravaton's amputation.* **Kessel's:** 1. For *establishing a permanent perforation in the ear-drum;* it consists in the removal of the tendinous ring that attaches the drum-membrane to the bone, and in chiseling away a portion of this bone along the posterior circumference. 2. For *the mobilization of the stapes,* in chronic non-suppurative middle-ear inflammation; it consists in separating the inflammatory adhesions. **Key's,** for *lithotomy;* the lateral operation with the straight staff. See *Lithotomy.* **Keyes'** (*E. L.*), for *varicocele;* subcutaneous ligation with a special needle, carrying two silk ligatures; it is best performed in the standing position under the use of cocain. **Kinloch's,** for *internal urethrotomy;* it is done with a special urethrotome used to divide the stricture from within outward. **Klineberger's,** for *lumbar nephrectomy;* a curved incision is made with its convexity upward and outward. **Knapp's** (*H.*): 1. For *blepharoplasty;* the formation

of a quadrangular flap from the cheek and nose, followed by the insertion of sutures. 2. For *cataract-extraction;* the formation of *de Wecker's corneal flap;* a broad iridectomy and peripheral opening of the capsule; the lens is expelled by gentle pressure on the lower part of the cornea. 3. For *cleft lobule of the ear;* denudation by transfixion, and cutting out and suturing. 4. For *coloboma palpebræ;* a combination of simple union and blepharoplasty. 5. For *divergent strabismus;* division of the external rectus; insertion of a double suture through the inner margin of the cornea and through the inner canthus. 6. For *evisceration;* a modification of *Critchett's method*, in which conjunctival instead of scleral sutures are used. 7. For *pterygium;* a modification of *Desmarre's operation;* the corneal portion is excised, and the remainder is divided into two parts, one being transplanted under the conjunctiva above the wound and the other below. 8. For *staphyloma;* a modification of *Critchett's method* of closing the wound after operation upon the staphyloma. Critchett inserted stitches in the sclera, Knapp only in the conjunctiva. 9. For *symblepharon;* a modification of *Teale's operation.* **Knox's,** for *excision of the tongue;* a vertical incision is made through the center of the lower lip, and the inferior maxilla is exposed and sawn through at the symphysis; the tongue is then dealt with as the case demands. **Kocher's:** 1. For *excision of the ankle-joint;* the incision is made beneath the external malleolus, and is followed by division of the peroneal tendons after being secured with threads, and opening of the joint with removal of the diseased parts; the foot is replaced and the tendons sutured. 2. For *excision of the thyroid gland;* an incision is made in the median line from the sternal notch to the upper limit of the bronchocele; from this point two lateral incisions are made upward and outward to a point a little below the angle of the jaw. 3. For *excision of the tongue;* preliminary tracheotomy and packing of the pharynx with sponges; the incision begins below the tip of the ear, extends along the anterior border of the sterno-mastoid muscle to about its middle, then forward to the body of the hyoid bone, then upward along the anterior belly of the digastric muscle to the symphysis menti; the tongue is then removed by the galvano-cautery or scissors through the incision. This operation was devised to avoid pneumonia and septicemia. 4. For *varicocele;* ligation of the veins at two points, and subcutaneous division. **Koeberle's:** 1. A method of performing *oöphorectomy;* the pedicle is grooved with a specially-devised wire constrictor prior to ligation. 2. For *retroflexion uteri;* abdominal fixation. **Kolomnin's,** for *hip-joint disease;* ignipuncture or cauterization of the diseased tissue. **König's:** 1. For *nephrectomy;* an incision is made vertically downward along the outer border of the erector spinæ muscle to just above the iliac crest, then curving anteriorly, and extending nearly, or quite, to the umbilicus. 2. For *single hare-lip;* both margins are pared, and two small prolabial flaps are formed by horizontal incisions parallel to the lip-margin. **Kraske's:** 1. For *carcinoma of the rectum;* resection of the coccyx and of a portion of the sacrum to give access to the rectum high up. 2. For *extirpation of the uterus;* the operation is made through the same sacral opening as in operating for carcinoma of the rectum. 3. For *meloplasty;* a flap is taken from the immediate neighborhood, and union follows, even if the pedicle consists of subcutaneous tissue only. **Krimer's,** for *urinoplasty;* muco-periosteal flaps are dissected up on either side of the cleft, then reversed from without inward, and united in the middle line by sutures. **Kückler's;** 1. For *cataract-extraction;* the incision passes through the center of the cornea. 2. For *splenectomy;* the incision is made through the linea semilunaris. **Kuhnt's:** 1. For *canthoplasty;* a flap of skin is cut from the upper or lower lid, and turned into a wound made at the outer canthus. 2. For *ectropion;* a modification of *Antyllus's operation.* 3. For *symblepharon;* the use of skin-flaps grafted upon the surface, or pedicellate flaps which are thrust in between the eyeball and eyelid through fenestra cut through the latter. **Küster's:** 1. For *performing gastrostomy;* the parietal incision is made in the linea alba. 2. For *mastoid and middle-ear disease;* it consists in making an opening in the posterior wall of the auditory canal as far away from the membrana tympani as possible in cases in which some of the membrana and the ossicles are still retained; if the drum-cavity is filled with granulations the incision should be carried through the bone into the drum-cavity, and the morbid material removed with a spoon. **Küster-Dolbeau's,** for *vesical exploration;* paraprostatic section of the urethra and subsequent dilatation to allow of the introduction of the fingers. **Labbe's,** for *gastrotomy;* the parietal incision is made parallel to the left costal margin. **Lacauchie's,** for *amputation at the hip-joint;* the same as *Esmarch's amputation.* **Lafage's,** for *castration;* by an elliptic incision in the scrotum. **Laforest's,** for *stricture of the lacrymal duct;* the injection of an astringent solution through an S-shaped hollow probe. **Lallemand's,** for *circumcision;* dorsal transfixion, followed by excision of the two lateral flaps. **Landolt's,** for *blepharoplasty;* a portion of the upper lid is taken to replace a lost lower lid. **Langenbeck's:** 1. A method of performing *amputations;* the making of musculo-tegumentary flaps by cutting from without inward. 2. For *cholecystectomy;* the entire gall-bladder is removed, after division of the cystic duct, between two ligatures. 3. For *double hare-lip;* the edges of the prominent tubercle and of the maxilla are pared, and, after replacement into position, the parts are transfixed with hare-lip pins. 4. For *duodenostomy;* the bowel is attached to the wound in the parietes and opened at a later stage of the operation. 5. For *ectropion;* the same as *v. Ammon's operation.* 6. For *excision of the ankle;* a modification of *Moreau's operation*, in which the outer incision follows the anterior portion of the fibula, curves around and below the malleolus and ascends about one inch along its posterior border. 7. For *excision of the elbow;* a longitudinal posterior incision is made along the inner side of the olecranon. 8. For *excision of the hip;* an external incision is made in the long axis of the limb over the outer surface of the great trochanter. 9. For *excision of the knee;* a vertical incision is made on the antero-internal aspect of the joint. 10. For *excision of the shoulder;* a single vertical incision is made, having for its starting-point the acromio-clavicular joint. 11. For *excision of the upper jaw;* a transverse curved incision, with its convexity downward, is carried from the junction of the nasal cartilage with the nasal bone to the middle of the malar bone. 12. For *excision of the wrist;* the same as *Bœckel's operation.* 13. For *iridodialysis;* impaction is united with detachment; the detached flap of the iris is drawn into the corneal wound, where it is retained by adhesions. 14. For *completely lacerated perineum;* the edge of the recto-vaginal septum is denuded and then split for some distance; a flap is cut out of the vaginal side, and, after closure of the rectum, is stitched forward over the new perineum by vaginal sutures; the external sutures are placed from before backward. 15. For the removal of a

pharyngeal polypus; (*a*) *nasal route*; the nasal bone and nasal process of the superior maxilla are exposed and forcibly displaced upward; (*b*) *maxillary route;* a tongue-shaped flap is marked out on the face, and a large part of the maxillary bone separated and temporarily displaced inward. 16. For *nephrectomy;* an incision is made through the abdominal wall at the outer edge of the rectus muscle, in the linea semilunaris, commencing just below the margin of the ribs. 17. For *neurectomy;* the division of the superior maxillary nerve in the spheno-maxillary fossa by means of a long tenotome passed into the fossa along the outer wall of the orbit. 18. For *osteotomy;* the subcutaneous method. 19. For *restoration of the lower lip;* (*a*) the lower horizontal margin of the defect is prolonged on either side by incisions, which pass along the remainder of the lower lip, around the angles of the mouth and into the upper lip; the portion of the lip is then mobilized and drawn together by sutures. (*b*) By a single flap derived from the chin. 20. For *rhinoplasty;* the *Indian method;* a single lateral flap is brought from the opposite side, the apex being left attached at the inner angle of the eye on the side of the deficiency, while the base comes from the ala of the sound side. 21. For *uranoplasty;* complete closure of the cleft in the palate by dissection of mucoperiosteal flaps obtained from either side, and suturing in the middle line. **Langier's,** for *stricture of the lacrymal duct;* perforation of the wall of the duct and the maxillary sinus, to drain the tears into the antrum. **Lannelongue's:** 1. For *craniectomy;* (*a*) The vertex of the skull is exposed by means of a single incision in its long axis and a narrow strip of parietal bone is removed close to the sagittal suture; (*b*) The bones of the skull are so cut as to produce osseous flaps of various shapes. 2. For *cleft-palate;* a rectangular flap of mucous membrane is brought down from the side of the septum of the nose; the upper edge of the cleft is then freshened and the two surfaces brought together. **Lariche's,** for removal of a *tumor of the naso-pharynx;* a V-shaped incision is made, the ends of which run into either nostril, and the apex is in the middle line one-fourth of an inch below the columna, which is then separated from the upper lip. **Larrey's:** 1. A method of performing *amputation;* the same as *Dupuytren's amputation* by the double-flap method. 2. For *amputation at the hip-joint;* lateral flaps are made by transfixion, the common femoral artery being tied as a preliminary step. 3. For *amputation at the shoulder-joint;* an incision is made from the acromion to a point 2¾ inches below, from which point anterior and posterior lateral incisions are carried down the arm, meeting on the inner aspect; after disarticulation of the bone the flap is brought up and secured in the space made by the gaping of the first incision. **Lateral operation,** a method of performing *cystotomy;* the lateral perineal operation. **Lauenstein's,** for *iliac colotomy;* the peritoneum is sutured to the skin; a loop of intestine is then drawn out and the parietal wound closed by sutures passed through the meso-colon of the excluded portion of gut; finally, the serous covering of each limb of the prolapsed loop is stitched to the parietal peritoneum, and the bowel is opened. **Lawrence's** (*Sir W.*): 1. For *extirpation of the lacrymal gland;* an incision is made over the outer third of the orbit, followed by division of the external commissure and extirpation of the gland. 2. For *removal of a naso-pharyngeal polypus;* the nasal bones and nasal processes of the superior maxillæ are cut through; the septum is then divided, and the nasal cavity exposed by turning up the nose. **Lawson's,** for *blepharoplasty;* separation of the adhesions and dissection up of the edges of the wound, followed by grafting. **Lebrun's:** 1. For *cataract-extraction;* the incision is made farther in the cornea than most operators make it. 2. For *entropion;* similar to that of *Anagnostakis' operation.* **Ledran's,** for *suturing the intestines.* See *Ledran's Suture.* **Lee's** (*Henry*): 1. For *amputation of the leg;* a modification of *Teale's operation,* in which the long flap is taken from the posterior aspect of the limb. 2. A method of performing *embryotomy;* brachiotomy, followed by perforation of the thorax and extraction by the crotchet. 3. For *traumatic cerebral abscess;* the same as *Fenger's operation.* 4. For *varicocele;* transfixion by two pins and figure-of-eight turns of a ligature, followed by subcutaneous division of the veins. **Le Fort's:** 1. For *amputation of the foot;* a modification of *Pirogoff's operation,* in that the section of the os calcis is more nearly horizontal, all the upper part of the bone being removed. 2. For *procidentia uteri;* denudation of the anterior and posterior walls of the vagina and the formation of a longitudinal septum. **Lembert's,** for *suture of the intestine;* the interrupted suture is used, and a fold of serous, or of serous and muscular, tissue is picked up on one side of the wound; the needle is then carried over to a corresponding point on the other side of the wound, where a similar fold is picked up. **Lenoir's,** for *amputation of the leg;* a modified circular operation; a circular incision is made above the malleoli and below the point at which the bones are to be sawn; this is joined by a vertical incision carried up along the inner side of the tibial crest; the skin-flaps are then dissected up and the remaining soft parts are divided down to the bone at the level of the saw-line. **Lente's,** for *stricture of the rectum;* incisions are made in the anterior and posterior median lines. **Letenneur's,** for *plastic purposes;* the quadrilateral gap is closed by a flap freed from below and displaced upward. **Leucke's,** a method of performing *gastro-enterostomy;* in order to expedite the operation the first presenting portion of the small intestine is attached to the stomach. **Leveillé's,** for *iridodialysis;* it differs from *Scarpa's method* only in the previous depression of the lens. **Levis's:** 1. For *the radical cure of hydrocele;* the injection of twenty drops of pure carbolic acid into the tunica vaginalis testis after withdrawing the fluid. 2. For *varicocele;* after ligation of the varicocele the ligature is tied over a piece of rubber tubing so as to maintain the tension of the thread. **Liebreich's:** 1. For *cataract-extraction;* the incision is carried farther into the cornea than usual. See also *Lebrun's Operation.* 2. For *strabotomy;* the incision is made at the lower edge of the muscle's insertion; the conjunctiva and capsule of Tenon are separated as far as the semilunar fold; the tendon is divided and the vertical incision is extended upward and downward to the necessary extent. **Lignerolle's:** 1. For *amputation of the foot;* the astragalus is preserved *in situ.* 2. For *subastragaloid disarticulation;* by a short external, and a long internal flap, taking in part of the sole of the foot. **Linhart's,** for *the removal of a tumor of the naso-pharynx;* an incision is made from the root of the nose to its tip, and is extended into the nostril of one side: the nasal bone is forcibly turned to one side after having been separated from its fellow. **Lisfranc's:** 1. For *amputation of the fingers at the metacarpo-phalangeal joints;* it is done by rounded lateral flaps of equal size, the base of each corresponding to the joint-line, and the free extremity to the level of the web. 2. For *amputation through the foot;* disarticulation through the tarso-metatarsal joints. 3. For *am-*

putation at the hip-joint; lateral flaps about four inches long are made by transfixion, the outer one being cut first. 4. For *amputation at the shoulder-joint;* external and internal flaps are made by transfixion; in operating on the left shoulder the knife is entered near the posterior fold of the axilla, and after passing close to the outer aspect of the joint, is made to emerge between the coracoid process and the clavicle; on the right side the direction of the transfixion is reversed. 5. For *excision of the hip;* it is done by raising the flap from over the great trochanter. **Lister's** (*Sir Joseph*): 1. A method of performing *amputations;* by double rectangular flaps, the difference in length not being so great as in *Teale's operation;* the angles of the flaps are rounded off, the posterior one consisting of skin and fascia only. 2. For *amputation at the hip-joint;* disarticulation through an external racket incision; after *Ravaton's* and *Furneaux Jordan's amputations.* 3. For *amputation above the knee;* a modification of *Carden's amputation,* in which a short posterior skin-flap is formed. 4. A method of *button suture;* oval perforated discs of lead are used which are threaded on the ends of wire. 5. For *excision of the wrist;* the open method, by two dorsal incisions, with division of the extensors of the carpus. 6. For *ununited fractures of short bones;* the fragments are wired together. **Liston's**: 1. A method of performing *amputations;* a combination of the double-flap and circular operations, by first dissecting up two semi-oval flaps to serve as covers for the flat-faced stump. 2. For *amputation at the hip-joint;* disarticulation by antero-posterior flaps, cut by transfixion; the anterior flap is the longer of the two and is made first; the disarticulation is effected before the posterior flap is cut. 3. For *chiloplasty;* removal of the diseased tissues, and transplantation of a flap from the chin or the cheek. 4. For *excision of the elbow;* a modification of *Moreau's incision,* in which the outer vertical limb of the H is omitted. 5. For *excision of the upper jaw;* it is done by three incisions: (*a*) an incision from the external angular process of the frontal bone through the cheek to the angle of the mouth; (*b*) a short incision along the zygoma to meet the first; (*c*) an incision along the side of the nose and through the center of the lip. **Littrè's**: 1. For *enterotomy;* occlusion of the lower end of the intestine, with the formation of an artificial anus. 2. For *inguinal colotomy;* it is performed on the left side for opening of the sigmoid flexure; an incision from 1½ to 3 inches long is made parallel with the outer part of Poupart's ligament, and about ½ inch above it. **Lizars'** (*J.*), a method of exposing the upper jaw by cutting through the cheek, from the angle of the mouth to the malar bone. **Loreta's**: 1. For *aneurysm;* the insertion of a small wire into the sac, and the use of electrolysis as well. 2. For *stenosis of the orifices of the stomach;* digital or instrumental divulsion of the pyloric or cardiac orifice, following gastrotomy. **Lossen's,** for *neurectomy;* a modification of *Lücke's operation* in which the masseter muscle is not divided. **Lowdham's,** a method of performing *amputations;* it is done by a single flap. **Lubbock's,** for *lacrymal fistula;* an incision is made into the anterior wall of the lacrymal sac, followed by the introduction of a grooved knife to the bottom of the duct, and the passage of a leaden style. **Lucæ's,** for *strabismus;* a semicircular incision is made in the conjunctiva near the cornea, followed by division of the tendon close to the sclerotic. **Lucas's**: 1. For *lumbar nephrectomy;* an oblique incision is made as for colotomy, supplemented by a vertical incision carried along the outer edge of the quadratus lumborum muscle from the last rib to the iliac crest. 2. For *umbilical hernia;* excision of the sac and redundant skin, with suture of the ring. **Lücke's**: 1. For *excision of the hip;* it is done by an anterior incision in the long axis of the femur, commencing ½ inch below and to the inner side of the anterior superior iliac spine. 2. For *neurectomy;* removal of the second division of the fifth nerve at the point of exit from the skull; the incision is made above the external canthus along the upper border of the zygoma, and the spheno-maxillary fossa is exposed by sawing and breaking through the arch. **Luke's**: 1. A method of performing *amputations;* the first flap is made by *Langenbeck's method,* and the second by *Vermale's method.* 2. For *iliac colotomy;* a modification of *Cripps' operation* in which the incision is made in a vertical direction and external to the epigastric artery. **Lund's,** for *talipes;* the removal of the astragalus. **Luzardi's,** for *iridodialysis;* by means of a special needle a portion of the iris is drawn out through either the cornea or sclerotica, and retained by adhesions. **Lydston's,** for *varicocele;* an incision one inch or more in length is made parallel with the spermatic cord and beginning just below the external abdominal ring; the cord and veins are exposed, separated, and the veins ligated with a single silk ligature; after closure of the wound a clamp is applied and the redundant scrotal tissue removed. **Mac Cormac's** (*Sir W.*): 1. For *excision of the shoulder;* by a posterior vertical incision starting from the angular projection on the inferior margin of the acromion. 2. For *genu valgum;* division of the femur from the outer side, above and parallel with the articular surface. 3. For *ligation of the popliteal artery;* it is done from the front at the inner side; the artery is exposed by an incision behind and parallel to the tendon of the adductor magnus. 4. For *rhinoplasty;* the *Italian* method, the flap being taken from the inner aspect of the arm. 5. For *suture of the intestine;* the same as *Lembert's method,* except that only an external line of sutures is used. **Macdonald's,** a method of performing *embryotomy.* See *Affleck's operation.* **Macewen's**: 1. For *aneurysm;* a long pin with a tapering point is passed into the aneurysm and the point is made to touch the opposite wall of the sac; the point is then to be moved over the inner surface of the aneurysm for ten minutes for the purpose of causing irritation; in this way each point accessible to the point of the needle is to be treated. 2. For *genu valgum;* a modification of *Chiene's operation,* the wedge being removed through the same line of incision as in *Ogston's operation.* 3. For *the radical cure of inguinal hernia;* the sac is dissected out and separated from its connections, and then so drawn upward by means of a suture as to form a pad upon the inner surface of the circumference of the ring; the ring and canal are then closed by means of sutures. 4. For *intubation of the larynx;* a long, cylindric tube, of the pattern of the gum-elastic catheters, is introduced from the mouth into the trachea through the larynx. 5. *Osteotomy* for *genu valgum;* supra-condyloid division of the femur from the inner side. **Mackenzie's**: 1. For *amputation of the foot;* the flap is taken from the inner and plantar surface of the foot and ankle in performing a *Syme amputation.* 2. For *excision of the knee;* by raising an anterior U-shaped flap. **Macleod's,** for *amputation at the ankle-joint;* a modification of *Syme's operation,* in which only the malleoli are removed, the cartilage on the under surface of the tibia being preserved. **MacNamara's,** for *cataract-extraction;* removal of the lens in its capsule without an iridectomy, through a large corneal incision extending outward

Madelung's, for *lumbar colotomy;* a modification of *Bryant's operation* in which the lower end of the colon, after being completely detached, is closed by invagination and two rows of sutures, and dropped back into the abdomen. **Maisonneuve's:** 1. A method of performing *amputations;* it is also called the *diaclastic* method, and was devised for the purpose of avoiding hemorrhage, infection, and other accidents; the bone is first broken with an osteoclast and the soft parts are divided by means of an écraseur. 2. For *excision of the elbow;* it is done through a posterior median incision. 3. For *excision of the rectum;* a circular incision is made around the anus, and several needles, armed with ligatures twelve inches long, are passed into the incision and through the bowel above the growth, and brought out of the anus and made to retrace their course—one free extremity of the thread presenting at the anus, and the other in the wound. A whip-cord is passed through the loops of thread in the anus, when traction on the ends in the wound draws the cord through the bowel after the ligatures. The bowel is divided by allotting each loop of cord to an écraseur. 4. For *excision of the tongue;* a modification of *Jaeger's operation, q. v.* 5. For *excision of part of the upper jaw; Guérin's operation,* slightly modified. 6. For *excision of the wrist;* it is done by a single median dorsal incision. 7. For *internal urethrotomy;* a special urethrotome is used to divide the stricture from without inward. 8. For *oöphorectomy;* the entire pedicle is twisted. 9. For the *removal of a naso-pharyngeal polyp;* a slight modification of *Guérin's operation;* an incision is made in the median line, from the junction of the hard palate down into the body of the uvula as far as is necessary, its free border being preserved. **Malgaigne's** (*J. F.*): 1. A *method of performing amputations;* it is a variety of oval amputation in which the spiral incisions are continuous above with a single longitudinal one, so that the gaping wound has the form of a racket. 2. For *amputation of the arm;* a single rounded flap is cut, usually from the flexor surface of the arm. 3. For *amputation through the foot;* subastragaloid disarticulation by a single, large, internal flap, the astragalus only being left. 4. For *amputation at the hip-joint;* a modification of *Ravaton's amputation,* in which the vertical incision is shorter and the circular incision more oblique. 5. For *chiloplasty;* two lateral incisions are made on either side of the lower lip to restore this portion by the sliding method. 6. For *excision of the shoulder;* it is done by a single anterior vertical or oblique incision. 7. For *hare-lip;* the same as *Clemot's operation.* **Manec's,** for *amputation at the hip-joint;* a single long anterior flap is made by transfixion; the joint is then disarticulated, and a circular incision made posteriorly. **Manne's,** for the *removal of a polyp from the naso-pharynx;* an incision is made through the soft palate with a bistoury, in the median line, from the tip of the uvula to its junction with the hard palate; after removal of the polyp, the parts are restored by one or more sutures. **Margary's,** for *congenital dislocation of the hip:* the formation of an acetabulum in the normal position, reduction of the femur, and the formation of a capsule from the periosteum. **Marian's,** for *lithotomy;* the old median perineal operation for stone in the bladder. See *Lithotomy.* **Markoe's,** for *varicocele;* a modification of *Vidal's method,* in which the pin is dispensed with, and a loop of silver wire is clamped to a lead plate; the wire is gradually tightened. **Martin's** (*A.*): 1. For *lacerated perineum;* a modification of *Freund's operation,* in which the vaginal tongues are denuded more deeply into the vagina, and the vulval denudations are carried higher up. 2. For the *radical cure of hydrocele;* the injection of tincture of iodin after aspiration. 3. For *vaginal hysterectomy;* an incision is made around the posterior margins of the cervix until the peritoneum is reached; the edges of the vaginal wound are then sewn parallel to the incision to bring the peritoneum and vaginal wall together and so arrest hemorrhage; the broad ligaments are ligated with silk ligatures in successive portions; the central fissure is now incised, the bladder separated, the cervix freed from the broad ligament on either side, the fundus retroflexed, and the remainder of the broad ligaments ligated and severed; a drainage-tube is inserted into Douglas's space. **Martino's,** for the remedy of a *large and prominent ear;* a V-shaped piece is removed and the wound closed by sutures. **Mason's:** 1. For *osteoplasty;* a modification of *Dieffenbach's operation* in which holes are punched, as a preliminary step, along the line the chisel is subsequently to take. 2. For *rhinoplasty;* it consists in bringing across the gap two lateral and one superior flap of integument as a base of support for the frontal flap. 3. For *uranoplasty;* perforation of the bone at several points in the line of the lateral incision before applying the chisel, to prevent comminution. **Masslorsky's,** a method of performing *oöphorectomy;* double flaps are made of the pedicle, and these are stitched together. **Mastin's,** for *internal urethrotomy;* it is done with a modification of *Maisonneuve's* urethrotome. **Mathews':** 1. For *fistula in ano;* after dilating the sinus with a laminaria tent, a urethrotome is introduced to the full depth of the sinus, the knife is protruded, and the instrument withdrawn; the operation is repeated with the knife in the opposite direction. Mathews has devised a special fistulatome for this purpose. 2. For *inguinal colotomy;* the incision is made two-thirds above and one-third below, and at right angles to a line drawn from the anterior superior spine of the ilium to the umbilicus, one and a half inches from the spine; when the bowel is brought out of the wound, two large pins are passed parallel and close together through one edge of the incision, through the mesentery near the bowel, and out at the other wound-margin; the operation is completed by stitching the bowel to the skin; the colon is incised at a later period. **Mathewson's,** for *exostosis of the external meatus;* removal by a drill. **Maunoir's,** for *iridotomy;* incision of the cornea and removal of a triangular flap of the iris, the apex of which is toward the pupil. **Maunsell's,** for *intestinal anastomosis;* after dividing the gut, circularly, at the proper points, a longitudinal incision about an inch and a half long is made in the larger segment opposite the mesenteric attachment; a long suture is then passed through all the coats of the two divided ends at the mesenteric attachment and one similarly directly opposite this point; the sutures are then passed in the lumen of the larger segment and out the longitudinal incision, the ends of the gut are invaginated and accurately coaptated by sutures, the invagination is reduced and the longitudinal incision closed by sutures. **Maury's** (*F.*): 1. For *ectopia vesicæ;* a modification of *Roux's colotomy,* in which one flap is taken from the perineum and the scrotum, the other from the abdomen. 2. For *gastrostomy;* a curved parietal incision is made with its convexity toward the middle line. **Maydl's,** for *iliac colotomy;* the peritoneal cavity is opened by *Littré's incision;* the loop of intestine is drawn out of the wound and held there by a hard rubber cylinder inserted through a slit made in the mesentry close to the gut; the latter is stitched in the abdominal incision,

and opened from four to six days later. **Maynard's**, for *suture of the bladder;* the sutures are placed in two double rows by a special needle before the bladder is opened. **McBurney's**, for the *radical cure of inguinal hernia;* after exposing the sac the anterior wall of the canal is incised and the sac ligated and excised at the internal ring; the skin is inverted and stitched to the ligamentous and tendinous structures, the wound healing by granulation. **McCreik's**, for *entropion;* the removal of a horizontal strip of the tarsus from the inner surface of the lid. **McCurdy's**, for *amputation at the hip-joint;* a modification of *Myles' operation*, a single needle being inserted at the most prominent point of the great trochanter, passing directly through the thigh in front of the femur to emerge just below the tuber ischii. **McDowell's** (*E.*), for *oöphorectomy;* the first complete operation; the pedicle was secured by a single ligature, the ends of which were brought out of the abdominal wound. **McGill's**, for *prostatectomy;* it is done by a supra-pubic incision, as in supra-pubic lithotomy. **McLeod's** (*K.*): 1. A method of performing *oöphorectomy;* torsion of the pedicle between two pairs of forceps. 2. For *prolapse of the rectum;* the upper part of the rectum is stitched to the anterior abdominal parietes, a wound being made through the abdominal wall for the purpose. **Mears'**, for *neurectomy;* removal of the inferior dental nerve from its canal by traction after exposing the outer surface of the jaw, trephining over the position of the inferior dental foramen, and loosening the nerve at the mental foramen. **Median Operation.** See *Hegar's operation*, and also *Lithotomy*. **Méjean's**, for *stricture of the lacrymal duct;* a thread is passed through the canaliculus and duct into the nose, and medicated cotton fibers are drawn through. **Mercier's**, for *prostatotomy;* an instrument shaped like a short-beaked lithotrite with sharp edges is used to punch out portions of the floor of the urethra. **Meyer's**: 1. For *genu valgum;* a cuneiform osteotomy of the tibia below the tuberosity. 2. For *hypertrophy of the pharyngeal tonsil;* a ring-knife is passed through the nose, and the manipulations are directed by the left forefinger passed into the vault of the pharynx. 3. For *sympathetic ophthalmia;* an incision is made over the painful portion of the ciliary region with division of the ciliary nerves. **Michaelis'**, a method of performing *embryotomy;* evisceration followed by rachiotomy and forced evolution. **Mika Operation.** See *Mika*. **Mikulicz's**: 1. For the *removal of tonsillar tumors;* it is done by an incision through the neck, the cut extending from the mastoid process downward and forward as far as the great cornu of the hyoid bone; the ascending ramus of the jaw is then resected and the wall of the pharynx is divided; a preliminary tracheotomy is performed. 2. For *tarsectomy;* the same as *Wladimiroff's operation*, but independently designed. **Miller's**, for *amputation of the penis;* the flap is cut from below. **Milne's**, for *internal urethrotomy;* it is done with a special dilating urethrotome. **Miner's**, for the *removal of an ovarian tumor;* enucleation when removal cannot be effected in the usual way, owing to absence or shortness of the pedicle, or to adhesions. **Miot's**, for *chronic non-suppurative middle-ear inflammation;* the stapes is exposed, either by excision of the upper posterior part of the membrane, or by the use of the electro-cautery, after which methodic mobilization of the exposed stapes is carried out by means of a probe or other instrument. **Mirault's**: 1. For *excision of the tongue;* excision after ligation of the lingual arteries as a preliminary measure. 2. For *hare-lip;* a flap is turned down on one side and brought across and attached to the pared opposite side. **Mollière's**: 1. For *amputation through the foot;* the foot is treated as though it contained but one bone; if necessary, bone is cut through rather than disarticulation being made. 2. For *infantile paralysis;* osteoclasis is performed, instead of resection. **Moore's**: 1. For *aneurysm;* the introduction of a fine wire into the sac through a cannula. 2. For *cataract-extraction;* extraction several weeks after the performance of a preliminary iridectomy. **Mooren's**, for *cataract;* an operation similar to *Jacobson's operation*, but the iridectomy is made several weeks before the extraction. **Moreau's**: 1. For *excision of the ankle;* by lateral incisions, the outer one following the posterior border of the fibula and bending forward beneath the malleolus; the inner one is along the inner surface of the tibia in the axis of that bone. 2. For *excision of the elbow;* a posterior H-shaped incision over the joint. 3. For *excision of the knee;* by an anterior H-shaped incision. 4. For *excision of the shoulder;* a flap with its base below is taken from the deltoid region. **Morel's**, for *excision of the shoulder;* a rounded flap with its base upward is taken from the deltoid region. **Morgan's**, for *chiloplasty;* after the removal of the entire lip, a curvilinear flap is made by an incision below and parallel to the first, allowing the ends to remain attached and securing the flap in the place of the diseased tissue. **De Morgan's**, *to reach the spinal accessory nerve;* an incision is made behind the sterno-mastoid muscle. **Morris'** (*H.*): 1. For *excision of the radius;* an incision is made parallel to the long axis of the bone between the supinator longus and extensor carpi radialis longior muscles. 2. For *lumbar nephrectomy;* a transverse or slightly oblique incision is made a short distance below the last rib, and this is joined by a vertical incision running downward from a point near the posterior extremity of the former. 3. For *nephrorrhaphy;* the sutures are passed through the entire thickness of one lip of the wound, then through the capsule and cortex of the kidney and finally through the other lip of the wound. **Mortise Operation.** See *Giraldès' Operation*. **Morton's**: 1. For *elephantiasis;* the excision of a portion of the nerve-trunk, supplying the affected member. 2. For *the reduction of club-foot;* tenotomy combined with forcible correction by "Morton's club-foot stretcher." **Mosetig Moorhof's**, for *staphyloplasty;* a modification of *Schönbein's operation*, in which the fistula is allowed to remain at the position of the anterior palatine canal. **Mott's**: 1. For *ligation of the common iliac artery;* an incision five to eight inches in length is commenced just outside the center of Poupart's ligament, and one and a half inches above it; curving upward and outward toward the ribs, it passes one and a half inches in front of the anterior superior spine of the ilium. 2. For the *ligation of the innominate artery;* a transverse incision is made above and parallel to the top of the sternum and inner end of the clavicle, and this is joined by another of the same length along the anterior border of the sterno-mastoid muscle. **Mulder's**, for *iridectomy;* a crucial incision is made into the iris, with removal of the flaps one by one. **Mule's**, for *evisceration of the eye-ball;* evisceration of the globe followed by the insertion of a silver or glass ball within the sclerotic, with the view of rendering the stump better suited to an artificial eye. **Müller's**: 1. For *Cesarean section;* a modification of *Porro's operation*, whereby the whole uterus is turned out of the abdomen before it is opened. 2. For *vaginal hysterectomy;* the uterus is divided into halves longitudinally; one part is brought down at a time, and the broad ligament is ligated in sections. **Murphy's**, for *intestinal anastomosis;* by

the use of a specially devised apparatus. See *Murphy's Button*. **Murray's,** for *ligation of the abdominal aorta;* the extra-peritoneal operation; a curved incision, with its concavity forward, and about six inches in length, is made upon the left side of the body, from the anterior extremity of the tenth rib to a point about one inch to the inner side of the anterior superior iliac spine. **Mütter's,** for *chiloplasty;* the formation of two quadrilateral flaps to fill the defect caused by removing the diseased tissue. **Myles',** for *amputation at the hip-joint;* a stout steel skewer is thrust through the thigh from before backward, the point entering an inch below Poupart's ligament and just to the outer edge of the femoral artery; it passes to the inner side of the neck of the femur and emerges a little above the gluteal fold; an india-rubber cord is passed around the ends in a figure-of-eight. **Nall's** (*B. R.*), for *internal urethrotomy;* it is done with a special dilating urethrotome. **Nassiloff's,** for *esophagostomy;* the formation of a fistulous opening between the esophagus and the surface of the neck in cases of stricture or tumor of the former. **Neal's,** for *gastrotomy;* a parietal incision is made in a line extending from the umbilicus toward the left false ribs. **Nélaton's:** 1. For *amputation through the foot;* subastragaloid disarticulation by dorsal and plantar flaps, larger on the inner than on the outer side. 2. For *enterotomy;* the abdomen is opened in the right iliac region by an incision parallel to and a little above the outer portion of Poupart's ligament; the first coil of intestine that presents is drawn into the wound. 3. For *epispadias;* it is done by reversed flaps, one being obtained from the median line of the anterior abdominal parietes, the other from the anterior surface of the scrotum. 4. For *hare-lip;* an incision is made around the upper angle of the cleft and the lower edge is turned downward, so that the wound becomes diamond-shaped; the sides are then brought together and sutured. 5. For *lithotomy;* the pre-rectal method, corresponding with the bilateral operation, with the addition of a careful dissection to obtain more space between the rectum and the bulb of the urethra, to avoid wounding the latter. See *Lithotomy*. 6. For the removal of a *naso-pharyngeal polypus;* it is done through the mouth, by exposing the hard palate and drilling two holes in it, so that the intervening bone can be removed. 7. For *proctotomy;* the *external* method; the left index finger is introduced as far as the stricture, and, with this as a guide, the soft parts below the stricture are divided in the median line by a blunt-pointed bistoury. 8. For *rhinoplasty;* two trapezoid flaps are taken from the cheeks, each flap being intended to form the corresponding half of the new nose. 9. For *urethroplasty;* the edges of the fistula having been pared, the surrounding skin, to the extent of about an inch, is dissected up subcutaneously, through an opening made below the fistula, and the fistula is closed by sutures. 10. For *webbed fingers;* the same as *Didot's operation*. **Neudörfer's:** 1. For *ectopia vesicæ;* a modification of *Trendelenburg's operation*, in which the sacro-iliac synchondroses are not separated, but approximation of the margins is made possible by two lateral incisions through the abdominal wall; the pubic bones are brought together by sutures. 2. For *excision of the shoulder;* it is done by a curved supra-acromial incision, the acromion being sawn through and the head of the bone thrust out. **Neugebauer's,** for *prolapsus uteri;* the same as that subsequently described by *Le Fort*, and best known by his name. **Newman's,** for *nephrorrhaphy;* in addition to stitching the kidney to the abdominal parietes, the fibrous capsule is split and separated from the surface of the kidney; the resulting adhesion thus aids in fixing the kidney. **Nicoladoni's,** for *talipes calcaneus;* in cases of paralysis of the calf-muscles, with the peroneal muscles intact, the tendo Achillis is cut and sewn to the peroneal tendons. **Norton's,** for *webbed fingers;* small triangular flaps are raised between the knuckles on the dorsal and palmar aspects; the webs are then cut through the bases of the flaps, which are stitched together. **Noyes':** 1. For *blepharoplasty;* (*a*) The formation of a bucco-temporal flap, sliding the whole cheek, with the shortened lid, inward and upward. (*b*) The formation of a naso-buccal flap. 2. For *inflammatory secondary cataract;* the formation of an artificial pupil; a hole is made in the obstructing membrane with a v. Graefe knife, and this is enlarged by tearing. 3. For *entropion;* cure by a plastic operation. 4. For *staphyloma;* incision of the limbus, followed by total avulsion of the iris. 5. For *strabismus;* advancement of the elongated tendon. **Nuël's,** for *corneo-scleral rupture;* the wound in the sclera is reopened by making a section with a knife, and the surrounding conjunctiva is drawn over the opening by means of a special suture. **Nunneley's,** for *excision of the tongue;* it is done by a suprahyoid incision and the use of the écraseur. **Nussbaum's,** a method of performing *ovariotomy;* the pedicle is tied in sections with catgut and dropped into the pelvic cavity. **Oberst's,** *stomatoplasty;* the defects of the mucous membrane of the cheek are covered with tissue removed from the upper or lower lip. **Obre's,** for *the radical cure of obturator hernia;* by cutting down on the sac as in other herniæ. **Odhelius's,** for *iridotomy;* the same as *Reichenbach's operation*. **O'Dwyer's,** for *intubation of the larynx;* the same as *Macewen's operation*, except that a shorter tube of metal is introduced into the larynx. **Oettinger's,** for *trichiasis;* an incision is made in the intermarginal space, and is carried to a point above the upper border of the tarsus, so that all the skin that covers the tarsus can be displaced upward. **Ogston's** (*Alexander*): 1. For *extreme flat-foot;* excision of the astragalo-scaphoid joint in a wedge-shaped piece, and the fixing of the astragalus and scaphoid together with pegs. 2. *Osteotomy* for *genu valgum;* division of the internal condyle of the femur obliquely, from before backward. 3. For *opening the frontal sinuses;* it is done by trephining in the middle line of the frontal bone. 4. For *varicocele;* subcutaneous ligation with silk; the same as *Keyes' operation*. **Ollier's:** 1. For *excision of the elbow;* by lateral incisions, the main one external and "bayonet"-shaped, the internal one short and vertical. 2. For *excision of joints;* the subperiosteal method, in which the whole of the periosteum of the involved district and the capsular ligament are preserved. 3. For *excision of the knee;* by *Moreau's incision* and the carrying out of the periosteal method. 4. For *excision of the scapula;* one incision along the spine, and a second along the internal border of the scapula, and the subperiosteal removal of the bone. 5. For *excision of the shoulder;* by a single anterior vertical or oblique incision and the carrying out of the periosteal method. 6. For *excision of the wrist;* the subperiosteal method by two dorsal incisions, after those made by *Bœckel* and *Lister*. 7. For *genu valgum;* section through the epiphyseal cartilage. 8. For the *removal of a naso-pharyngeal polypus;* it is done through the nose by an osteoplastic operation; the nasal bones are exposed and sawn through in the upper portion, so that the nose can be turned downward. 9. For *rhinoplasty;* two diverging incisions are commenced in the median line of the forehead and carried down-

ward along the border of the nose; the triangular flap is then drawn downward to supply the loss of the lower part of the nose. **Olshausen's,** for *vaginal hysterectomy;* a modification of *Czerny's operation;* the uterus is not turned backward, but the connections are gradually separated, as traction is made on the organ; the broad ligaments are tied with rubber ligatures. **Orred's,** for *excision of the shoulder;* it is done by a longitudinal incision from the socket of the shoulder to the insertion of the deltoid. **Otis'** (*F.N.*), for *internal urethrotomy,* it is done with a special dilating urethrotome. **Pagenstecher's:** 1. For *cataract-extraction;* extraction of the lens in the closed capsule; a scoop is inserted under the lens and gentle pressure is made on the cornea. 2. For *entropion;* division of the external canthus; stretching of the horizontal wound to a vertical one, and suture of the opposed surfaces. 3. For *iridodesis;* a modification of *Critchett's operation,* the incision being made with a broad needle or narrow knife. 4. For *obliteration of the lacrymal sac;* slitting of the canaliculi, and the introduction of zinc chlorid paste into the sac. 5. For *pterygium;* separation from the cornea and sclerotic and turning back; the edges of the conjunctival wound are brought together with sutures. 6. For *ptosis;* the fibers of the occipito-frontalis are made to act on the lid. 7. For *stricture of the lacrymal duct;* the introduction of Bowman's probe No. 3; slitting of the canaliculus and sac, and the daily passage of sounds. **Paget's,** for *excision of the tongue;* a modification of *Nunneley's operation,* the tongue being made free by incision of its attachments to the floor. **Palasciano's,** for *tumor of the naso-pharynx;* an incision is made through the skin over the lacrymal sac; this is partially dissected out and a puncture is made through the lacrymal bone, thus exposing the superior meatus. **Panas':** 1. For *proctotomy;* linear proctotomy. 2. For *ptosis;* the tarsal portion of the lid is raised by sutures and the occipito-frontalis muscle is caused to assume, to a great extent, the function of the levator palpebræ. **Pancoast's** (*Joseph*): 1. For *amputation at the knee-joint;* three flaps are made: a short, oval, anterior flap including the patella, and two latero-posterior flaps which join in the middle of the popliteal region. 2. For *ectopia vesicæ;* closure by means of two lateral flaps dissected up on either side of the defect, and reversed, but not superimposed. 3. For *hernia;* a method of operating by injections. 4. For *neurectomy;* the removal of the second division of the fifth nerve at its point of exit from the skull; a square-shaped flap is raised over the ramus of the jaw, and the masseter muscle is elevated; the coronoid process is then resected and the internal maxillary artery is ligated, after which the spheno-maxillary fissure is exposed by separating the two heads of the external pterygoid muscle. 5. For *rhinoplasty;* the subcutaneous division of the depressed tissues, so that they may be separated from their bony connections. 6. For *varicocele;* a modification of *Levis's operation;* a button is introduced between the skin and the rubber. **Paré's** (*A.*), for *hare-lip;* the edges are united by means of pins and figure-of-eight sutures. **Park's:** 1. For *excision of the elbow:* it is done through a posterior median incision. 2. For *excision of the knee;* it is done by an anterior crucial incision, with its convexity downward. **Parker's:** 1. For the relief of *chronic cystitis* in the male; perineal cystotomy. 2. For *perityphlitic abscess;* incision. 3. *Syndesmotomy* for *talipes varus* in children; division of the "astragalo-scaphoid capsule" and the anterior and posterior tibial tendons. **Parker's** (*R. Willard*) *incision, for excision of the hip;* employed originally by Dr. Hueter, and later and independently by Parker; the incision commences on the front of the thigh half an inch below the anterior superior spine of the ilium, and runs downward and a little inward for three inches. As the knife sinks into the limb, it passes between the tensor vaginæ femoris and the rectus on the inside, until it reaches the neck of the femur. **Pasquier and Le Fort's,** for *amputation through the foot;* a modification of *Pirogoff's operation;* the section of the os calcis is made horizontally, its upper part being removed. **Passavant's:** 1. For *synechia;* breaking up of the adhesions with forceps. 2. For *staphylo-pharyngorrhaphy;* the halves of the velum are stitched to the posterior pharyngeal wall in order to shut off the nose from the mouth. **Patruban's,** for *varicocele;* excision of the dilated veins. **Paul's,** for *iliac colotomy;* the bowel is divided and the distal end invaginated as in *Senn's method;* a glass tube is tied into the proximal end of the bowel, which is fixed into the parietal wound by sutures; after three days the projecting bowel is cut away. **Péan's:** 1. For *amputation at the hip-joint;* the vessels are caught as the operation proceeds. 2. For *hysterectomy for fibroid tumor;* the extraperitoneal method; after an abdominal incision, the uterus is brought out through the wound, and the stump is transfixed with long heavy needles placed at right angles to each other; beneath these a wire is passed and made tight by means of a serre-nœud; the tumor is amputated above the needles, and the abdominal wound is closed around the stump. 3. For the removal of a *naso-pharyngeal tumor;* an incision is made from the root of the nose down the median line to the lip, through the nostril, and through the median line of the upper lip, which is completely divided; the flaps are separated; a portion of the hard palate is removed after separating the periosteum; the second bicuspid tooth is extracted and the antrum is exposed by bone-forceps. 4. For *pylorectomy;* a vertical parietal incision is made in the middle line. 5. For *vaginal hysterectomy for carcinoma;* removal of the affected uterus *per vaginam* by *morcellement,* or bit by bit. **Peaslee's,** for *trachelotomy;* an incision of one or both ora uteri for stenosis by Peaslee's metrotome, followed by dilatation. **Percy's,** for *excision of the hip;* it is done by raising a flap from over the great trochanter. **Perièr's,** for *uterine inversion;* removal of the inverted uterus by the elastic ligature. **Perrin's** (*M.*), for *amputation through the foot;* sub-astragaloid disarticulation by the oval operation. **Peters',** for *internal urethrotomy;* a special urethrotome is used to divide the stricture from within outward. **Petersen's,** for *lithotomy;* the high operation. See *Lithotomy.* **Petit's:** 1. A method of performing *amputations;* the same as *Cheselden's method.* 2. For *amputation of the fingers;* lateral flaps are cut from within outward. 3. For *hernia:* the sac is not opened. 4. For *stricture of the lacrymal sac;* incision into the sac behind the internal canthal ligament. **Pétrequin's,** for *symblepharon,* gradual strangulation by means of a thread. **Phelps'** (*A. M.*): 1. For *club-foot;* a direct open incision is made through the inner and plantar surfaces of the foot. 2. For *hare-lip;* a loop is passed through the margin of the lip on either side of the cleft; the incision is curved on both sides, and a V-shaped flap is allowed to remain in the middle line, beneath the septum of the nose; the wound is closed with silk sutures. **Physick's,** for *iridectomy:* removal of a circular piece of the iris by the cutting forceps. **Pick's,** for *amputation at the knee-joint,* a modification of *Stephen Smith's operation* by com-

mencing the anterior incision higher, and removing the patella. **Pirogoff's**: 1. For *amputation through the foot;* an operation in which the os calcis is sawn through obliquely from above downward and forward, and the posterior portion is brought up and secured against the surface made by sawing off the lower ends of the tibia and fibula. 2. For *the radical cure of hernia;* after reduction, a bladder of gold-beater's skin is introduced into the canal through a small incision, inflated and allowed to remain. **Pitts'**, for *stretching the inferior dental nerve;* the nerve is found by a vertical incision within the mouth, along the inner border of the ascending ramus, and is stretched with a blunt hook. **Platner's**, for *excision of the lacrymal sac;* incision of the anterior wall, followed by removal of the sac-wall. **Poinsot's**, *cuneiform tarsotomy for talipes varus;* a T-shaped incision is made, the horizontal limb of which extends from the external malleolus to the head of the fifth metatarsal bone, while the vertical branch passes across the dorsum toward the scaphoid bone; the periosteum is similarly incised, and a wedge of bone removed. **Politzer's**: 1. Section of the anterior ligament of the malleus. 2. For *artificial aperture of the membrana tympani;* a crucial incision of the membrane is made, followed by the application of the galvano-cautery. 3. For *atrophied tympanic membrane with middle-ear catarrh;* incision of the membrane every two or three days with a paracentesis-needle. **Pollock's** (*G.*): 1. For *amputation at the knee-joint;* a long anterior and a short posterior skin-flap, somewhat rectangular in outline, the patella being left. 2. For *division of the levator palati muscle;* the knife is passed through the mucous membrane of the velum in front, and to the inner side of the hamular process, and the muscle is fully divided. 3. For *hemorrhoids;* crushing them with a special clamp, and excising or cauterizing the projecting portion. **Pope's**: 1. For the *formation of an artificial pupil;* incision at the sclero-corneal margin, with excision of a portion of the iris without dividing the sphincter pupillæ. 2. For *entropion;* extirpation of the tarsus. 3. For *trichiasis;* similar to the *Arlt-Jaesche operation*. **Porro's**, for *puerperal hysterectomy;* Cesarean section, followed by removal of the uterus at the cervical junction, together with the ovaries and oviducts. **Porro-Müller's**, for otherwise *impossible labor;* a modification of the *Porro operation* in which the uterus is brought out of the abdomen before extracting the fetus. **Porro-Veit's**, for otherwise *impossible labor;* a modification of the *Porro operation;* the stump is ligated and dropped. **Porta's**: 1. A method of performing *embryotomy;* perforation of the thorax in the axillary region, followed by evisceration and podalic version. 2. For *varicocele;* the injection of a saturated solution of chloral. **Post's**, for *rhinoplasty;* a modification of the *Tagliacotian operation*, the flaps being taken from the patient's finger. **Pott's** (*P.*), *for fistula in ano;* it consists in a simple incision. **Power's**, for *corneal leukoma;* removal of the opaque portion with a sharp punch, and transplantation of a healthy rabbit's cornea. **Pratt's**, dilatation of the lower orifices of the body, the anus and the urogenital canal, with the removal of any irritating conditions that may be present. It is based on the belief that many chronic diseases are due to morbid conditions of these orifices. **Prévôt's**, for *rupture of the gravid uterus;* removal of the uterus by abdominal incision. **Prince's**: 1. For *pterygium;* similar to *Knapp's* modification of *Desmarre's operation*. 2. For *strabismus;* advancement of the rectus muscle. **Pritchett's**, for *internal urethrotomy;* it is done with a modification of Maisonneuve's urethrotome. **Purse-string**, for *cystocele*. See *Stoltz's operation*. **Quaglins'**, for *sclerotomy;* incision of the sclera with a small knife, and the use of a small spatula to prevent prolapse, should it tend to occur. **Ramdohr's**, for *enterorrhaphy;* the insertion of the proximal within the distal end of the intestine, and suturing. **Ramsden's**, for *ligation of the third part of the subclavian artery;* a transverse incision three inches in length is made across the base of the posterior triangle of the neck, about one-half inch above the clavicle. **Rau's**, for the *formation of an artificial pupil;* perforation of the sclera and iris with a narrow knife, followed by iridectomy. **Ravaton's**: 1. A method of performing *amputations;* it is done by a circular incision through the soft parts of the bone, with two longitudinal cuts—one in front and the other behind—extending from the circular incision upward to the level at which the bone is to be sawn through. 2. For *amputation at the hip-joint;* disarticulation through an external racket-incision; a vertical cut is made on the outer side, and this is joined on each side by two oblique crescentic incisions which meet on the inner side of the thigh. **Récamier's**, for *extirpation of the uterus;* vaginal hysterectomy. **Reclus'**, for *iliac colotomy;* a modification of *Maydl's operation*, in which the sutures are omitted. **Reeves'** (*H. A.*): 1. For *inguinal colotomy;* the usual incision is made, and sutures are passed through the gut to fasten it to the skin. 2. For *knock-knee;* a modification of *Ogston's operation*, in which an effort is made not to open the joint. **Regnoli's**, for *excision of the tongue;* an incision is made in the median line of the neck from the lower margin of the symphysis to the center of the hyoid bone, and from the upper end of this cut two lateral incisions pass outward along the lower border of the jaw to the anterior borders of the masseter muscles. **Reichenbach's**, for *iridotomy;* incision of the cornea and division of the iris from before backward. **Reverdin's**: 1. For *blepharoplasty;* removal of the cicatricial tissue, suturing of the lid to the opposite one in its normal position, and skin-grafting of the raw surface. 2. For *skin-grafting;* a point of skin is raised on an ordinary sewing-needle, and shaved off with a scalpel or scissors; the graft is then transferred to the fresh surface next to the healthy granulations. 3. For *symblepharon;* detachment of the lid and transplantation of a small flap from the cheek. **Reybard's**, for *enterorrhaphy;* invagination of the upper extremity by passing two sutures through the wall and out of the lumen, and then in the lumen and through the wall of the lower extremity; traction now effects invagination, and sutures are applied. **Richard's**: 1. For *ectopia vesicæ;* the same as *Roux's operation*, following the lines of *Nélaton's operation* for epispadias. 2. For the *removal of naso-pharyngeal polypi;* an incision is made in the middle line, from the posterior border of the hard palate, forward to the alveolus; the periosteum is dissected up on either side, and as much of the hard palate as necessary is chiseled away. **Richet's**: 1. For *Dupuytren's contraction*, or *contraction of the palmar fascia;* a longitudinal incision is made over the bands and transverse incisions at either extremity of the first; the flaps are dissected back, the bands cut or excised, the wound united, and the finger fixed in extension. 2. For *ectropion;* the cicatrix (situated at the outer side of the lower lid) is excised, and, after the lids have been stitched together, the gap is filled, and the operation is completed by raising and transplanting two tongue-shaped flaps. 3. For *varicocele;* cauteriza-

tion of the scrotum by means of a special apparatus. **Richter's**: 1. For *iridotomy;* the same as *Reichenbach's operation.* 2. For *stricture of the lacrymal duct;* incision of the sac and dilatation of the duct by means of catgut strings. **Ricord's**: 1. For *circumcision;* the prepuce is grasped with fenestrated forceps corresponding with the direction of the corona, and the forceps is slid in advance of the glans; the prepuce is cut off in front of the forceps, which are then removed and the mucous membrane is trimmed off, leaving a short stump; stitches are next applied. 2. For *varicocele;* the introduction of two double ligatures through a single opening in the scrotum, one passing above and the other below the veins; the ends of the ligatures are attached to a yoke provided with a screw, which is tightened from day to day. **Riesel's,** for the *radical cure of inguinal hernia;* the external ring is exposed by an incision; the anterior wall of the canal is split up to the internal ring; the neck of the sac is tied as high as possible; part of the anterior wall of the canal is cut away, and deep transverse sutures are then introduced. **Rigaud's,** for *urethroplasty;* a quadrilateral flap with its base above is turned over the fistula, and lateral flaps are brought over the first and secured in position by sutures. **Riggs',** for the *radical cure of inguinal hernia;* a variety of seton-operation, the peculiarities of which consist in the use of a large-sized *mèche* and an ingenious stop-needle. **Rima's,** for *castration;* a U-shaped flap is cut by transfixion from the posterior wall of the scrotum. **Rizzoli's**: 1. For *ankylosis of the lower jaw;* a linear osteotomy through the mucous membrane, thus avoiding an external scar. 2. For *imperforate anus* (the rectum terminating in the vagina); an incision is made in the perineum, antero-posteriorly—if the anus is absent—followed by dissecting the rectum from the vagina, and after pulling the former down, it is stitched to the skin-incision. **Roberts'** (*J. B.*), for *deflected nasal septum;* a linear incision is made with a bistoury along a prominent line of the deflection, so as to enable it to be pressed into its proper position, after which a long steel pin is thrust into the septum in such a manner as to maintain this position. **Roberts'** (*M. J.*): 1. *Electro-osteotomy* in knock-knee, bow-legs, and anterior tibial deformities. 2. *Cuneiform osteotomy* for hallux valgus. **Robertson's** (*A.*), for *conjunctival entropion;* a modification of *Snellen's operation,* in which the threads are passed through the conjunctiva at the bottom of the fold, between its palpebral and outer portions. **Robson's** (*Mayo*), for *ectopia vesicæ;* a modification of *Wood's operation,* in which, in female subjects, the folds of integument following the labia majora are detached and displaced upward. **Rodger's,** for *ankylosis of the hip;* the cuneiform method of osteotomy. **Rogers',** for *internal urethrotomy;* it is performed with a special dilating urethrotome. **Roonhuysen's,** for *chiloplasty.* See *Horn's operation.* **Rose's**: 1. For *double hare-lip;* the central tubercle is pared in a V-shaped manner, and the lateral segments by curved incisions from above downward to the muco-cutaneous junction, and then obliquely upward and inward. 2. For *single hare-lip;* a semilunar incision is made as far as the red margin of the lip, and an oblique upward cut is made on either side to form the prolabium; the flaps are held in position by means of wire and catgut sutures. 3. For the *relief of neuralgia of the fifth nerve;* removal of the Gasserian ganglion. **Rossbach's,** for *tumor of the larynx;* this consists in introducing a thin knife antero-posteriorly into the median line of the larynx from without, and amputating the tumor while the operation is watched in the laryngeal mirror, held in the usual position. **Rotter's,** for *uranoplasty;* a modification of *Blasius' operation,* in which a long cutaneo-periosteal flap is taken from the forehead, passed through the unclosed hare-lip, and grafted into the cleft of the palate. **Rouge's,** for *access to the nasal cavities;* the upper lip is freed from the jaw by an incision through the mucous membrane; the cartilaginous septum and lower lateral cartilages are then detached so that the nose and lips can be raised to the necessary extent. **Rouse's,** for *proctotomy;* the making of a deep incision in the fossa beside the sphincter without severing the latter; through this incision the diseased portion of the rectum is pressed out and excised. **Routh's,** for *pyosalpinx;* aspiration of the contents of the diseased Fallopian tube. **Roux's**: 1. For *amputation of the foot;* a modification of *Syme's operation,* in which the flap is made chiefly from the inner side of the foot. 2. For *chiloplasty;* after removing the diseased parts and the formation of suitable flaps, the prominent portions of the superior maxillary bones are removed to permit of better adjustment of the flaps. 3. For *ectopia vesicæ;* closure by means of flaps, one being dissected from the abdomen above, and another from the scrotum below. 4. For *excision of the elbow;* a modification of *Moreau's incision,* in which the inner line of the H is omitted. 5. For *excision of the hip;* it is done by raising a flap from over the great trochanter. 6. For *excision of the tongue;* division of the symphysis menti and removal of the entire tongue. 7. For *hysterectomy;* temporary resection of the sacrum. 8. For *ligation of the axillary artery;* the incision is made through the delto-pectoral interval. 9. For *removal of a naso-pharyngeal polypus;* it is done through the upper jaw by an osteoplastic operation, the whole jaw and malar bone with the soft parts being turned upward and outward upon the temple. 10. *Plastic;* a flap is transferred from a distant part by successive migration. **Roux-Sèdillot's,** for *excision of the tongue.* See *Roux's operation.* **Rudtorffer's,** for *webbed fingers;* division of the web after a cicatricial hole has been established through it, at the root of the fingers. **Ruysch's,** for *amputation at the wrist-joint;* a semilunar incision is made over the dorsum of the hand; the articulation is opened, and the anterior flap is cut from within outward. **Rydygier's,** for *pylorectomy;* a vertical parietal incision is made a little to the right of the middle line. **Sabatier's**: 1. For *excision of the shoulder;* a V-shaped flap is raised from the deltoid region. 2. For *iridectomy;* excision through a corneal incision as in cataract-extraction. **Sæmisch's,** for *hypopyon ulcer;* the cornea is transfixed and the intervening tissue, including the base of the ulcer, is divided by cutting outward. **Saint Germain's**: 1. For *phimosis;* dilatation of the foreskin. 2. For *tracheotomy for stenosis of the larynx;* rapid laryngotracheotomy; the single stroke method; the larynx is fixed between the thumb and finger of the left hand, and a straight sharp-pointed bistoury is thrust through the crico-thyroid membrane. **Salmon's,** for *fistula in ano;* in cases in which there is much induration an incision from one-eighth to one-fourth of an inch deep is made along the track. This is the well-known "*backcut;*" it is said to greatly promote healing. **Sänger's,** a method of performing *Cesarean section;* a modification of the usual operation in which the uterus is delivered through a long abdominal incision before extraction of the fetus. **Sänger-Leopold's,** for *Cesarean section;* improved suture of the uterine wound, a deep and a

superficial row being introduced, two of the superficial alternating with one of the deep. **Sänger-Tait's.** See *Tait's operation.* **Sanson's,** for *excision of the knee;* similar to *Textor's operation.* **Sauter's,** for *colpo-hysterectomy;* vaginal hysterectomy, the ovaries and tubes being left *in situ.* **Sauter-Recamièr,** for *hysterectomy;* the same as *Sauter's operation.* **Sayre's:** 1. For *ankylosis of the hip;* section of the femur above the lesser trochanter, with removal of a semicircular piece of bone and rounding of the upper shaft-end so as to facilitate the formation of a false joint. 2. For *excision of the hip-joint;* the subperiosteal method; the incision is made down to the bone, the periosteum is peeled off and the bone is divided above the trochanter minor. 3. *Intertrochanteric osteotomy* for the *formation of a false joint in ankylosis;* removal of a disc of bone from between the trochanters, having its upper surface convex and its lower surface flat. **Scalping Operation.** See *Gerdy's operation.* **Scarpa's:** 1. For *iridodialysis;* a needle is plunged through the sclerotica, the point passed through the superior internal border of the iris from behind forward, and with a see-saw motion the iris is detached in one-third of its circumference. 2. For *ligation of the femoral artery;* it is done at the middle of Scarpa's triangle. 3. For *stricture of the lacrymal duct;* incision of the anterior wall of the sac and the introduction of a leaden style into the duct. **Schäfer's,** a method of *arterial transfusion;* the dorsalis pedis artery is exposed in each subject and the distal ends are ligated; glass cannulæ attached to rubber tubing are then tied into the arteries, both ends being directed toward the heart. **Schede's:** 1. For *carcinoma of the rectum;* a modification of *Kraske's operation* in which the free edge of the peritoneum is secured to the serous surface of the gut; a preliminary inguinal colotomy is performed to avoid the fecal fistula and protracted healing. 2. For *genu valgum;* osteëctomy of the tibia and a linear complex osteotomy of the fibula. **Schmalz's,** for *stricture of the lacrymal duct;* the introduction of a thread through the sac, and as far into the duct as possible. **Schmidt's,** for *iridodialysis;* the same as *Scarpa's operation.* **Schmitz's,** for *genu valgum;* the same as *Ogston's operation,* except that it is done through a larger wound. **Schönbein's,** for *staphyloplasty;* a flap of mucous membrane is taken from the posterior pharyngeal wall and is stitched to the velum in order to shut off the nose from the mouth. **Schramm's,** for *carcinoma of the cervix uteri;* the injection of antiseptic fluids directly into the carcinomatous tissues; he employs a solution of corrosive sublimate. **Schroeder's:** 1. *Colporrhaphy;* the removal of a single long and broad strip of the vaginal wall and the approximation of the cut edges by sutures. 2. *Hysterectomy;* celiotomy and removal of the entire body of the uterus, with intra-peritoneal treatment of the pedicle. 3. *Trachelorrhaphy;* the whole of the erosion is exsected, and stitches introduced. **Schroeder and Löhlein's,** for *pruritus vulvæ;* excision of the diseased skin. **Schücking's,** for *prolapse of the uterus;* vaginal hysteropexia by means of a special needle, the thread being passed through the uterine cavity, out at the fundus, and through the anterior vaginal vault; the two ends are tied together and allowed to slough out. **Schueller's,** for *entropion;* two elliptic skin-incisions are made, united at their ends, and the distal margins are sutured together, over the included portion of attached skin. **Schultze's,** for *retrodisplacements of the uterus;* it consists in carefully tearing the adhesions from the uterine surface while replacing the uterus. **Schwalbe's,** for *reducible hernia;* it consists in the subcutaneous injection of alcohol (from 20 to 70 per cent.), by means of a Pravaz syringe, into the ring as near as possible to the hernial sac; the amount injected is two or three grams; these injections are repeated in from four to fourteen days, according to the sensitiveness of the patient and the amount of reaction; they are then omitted, and recommenced after a pause of from eight to fourteen days; the ring is eventually closed by fibrous thickening and contraction; the duration of treatment varies from one month to two-and-a-half years or more. **Schwartze's,** for *mastoid and middle-ear disease;* opening of the mastoid cells by the use of the hammer and chisel. **Schweigger's,** for *advancement of a rectus muscle;* the muscle is transfixed by catgut sutures, a portion of the tendon is removed and the ends are approximated by passing the sutures that have been placed in the muscle. **Scoutetten's:** 1. A *method of performing amputation;* the oval operation in which a single flap is made on one side of the limb to be received into a corresponding space on the opposite side. 2. For *amputation at the hip-joint;* disarticulation by the modified oval method, with the summit of the incision on the outer side. **Sédillot's:** 1. A *method of performing amputation;* the combination of the flap and circular methods; the superficial flaps are formed from within outward, and the deep muscles are divided circularly. 2. For *amputation at the ankle-joint;* this method resembles *Syme's operation,* except that the flap is made from the inner and plantar surfaces of the foot and ankle. 3. For *amputation of the leg;* it is done at the "place of election" by a large external flap cut by transfixion. 4. For *amputation of the thigh;* it is done by a single long anterior flap, the structures at the back of the limb being divided to the bone by one transverse incision. 5. *Chiloplasty* for *restoration of the lower lip;* vertical flaps are taken from either cheek, and brought together in the median line, to form the lip. 6. *Chiloplasty* for *restoration of the upper lip;* the formation of quadrangular flaps extending below the level of the mouth and attached above; it is the reverse of *Dieffenbach's operation.* 7. For *double hare-lip;* flaps consisting of the outer margins of the clefts are turned down to form the red border of the completed lip, and are united in the middle line, oblique incisions being made upward and outward to free the outer segments; the central tubercle is then pared, and the raw surfaces are brought together. 8. For *excision of the hip;* it is done by raising a flap from over the great trochanter. 9. For *excision of the knee;* it is done by two lateral vertical incisions. 10. For *excision of the tongue;* a modification of *Roux's operation, q.v.* 11. For *gastrostomy;* a transverse incision is made below the xiphoid cartilage. 12. For *ligation of the innominate artery;* an incision is made between the heads of the sternomastoid muscle. 13. For the *removal of a naso-pharyngeal polyp;* a linear incision is made through the soft palate, and extended as far up on the hard palate as the palato-maxillary suture; by means of the periosteal elevator, the palatal processes are denuded first on the oval surfaces, then on the nasal; the horizontal plate of the palatal bone is then exsected by scissors or forceps, and the edges of the wound are to be united by sutures. 14. For *staphylorrhaphy;* liberating incisions are made on each side of the suture. 15. For *strabotomy;* an incision is made over the body of the muscle; when the latter is completely exposed, the hook is inserted and division made with the scissors. **Semiramidian Operation,** *castration;* a name proposed for castration on the belief that it was first performed by Semiramis. **Semon's** (*Felix*), for *adenoid vegetations of the naso-pharynx;*

scraping with Gottstein's curet while the patient's head is hanging over the edge of the table, to prevent the blood and fragments from entering the air-passages. **Senn's** (*N.*): 1. For *amputation at the hip-joint;* by means of a skewer as in *Myles' operation.* 2. For *gastro-enterostomy;* it is done with the use of perforated bone-plates, as in Senn's operation for intestinal anastomosis. 3. For *intestinal anastomosis;* the diseased tissue is excised and the ends of the bowel entirely and permanently closed, the continuity of the canal being restored by means of "intestinal anastomosis by lateral approximation" with the use of bone-plates. 4. For *pancreatic cyst;* two stages: (1) the bottom of the wound is packed over the cyst-wall with iodoform-gauze; (2) the cyst is opened after six or eight days. 5. For *suture of the intestine;* a modification of *Jobert's operation,* in which a soft, pliable rubber ring, made of a rubber band transformed into a ring by fastening the ends together with catgut sutures, is placed within the upper segment of the bowel; the sutures in transfixing the bowel pass through the upper portion of the ring. **Serres':** 1. For *blepharoplasty;* the same as *Knapp's operation.* 2. For *restoration of the angle of the mouth;* two triangles are so fashioned that their bases meet at the site of the new angle of the mouth. **Seton Operation,** any operation in which a seton is used to give rise to inflammatory adhesions. **Sexton's,** for *otorrhea;* it consists in the removal of any traces of the membrana flaccida, of the membrana vibrans and the malleus and incus, if present, and of the granulation and carious tissues. **Sharp's,** for *iridotomy;* the same as *Cheselden's operation,* except that the needle is introduced through the cornea. **Sharpe's,** a *method of performing amputations;* the same as *Soupart's operation.* **Sigault's,** for otherwise *impossible labor;* pubic symphysiotomy. **Signorini's,** for the *radical cure of hernia;* similar to *Gerdy's operation,* except that a female catheter takes the place of the finger, and three pins are used instead of sutures. **Simon's** (*J.*): 1. For *ectopia vesicæ;* communication between the bladder and the bowel is effected by means of threads passed from the ureters into the rectum. 2. For *elongation of the vaginal portion of the cervix;* it consists in the removal of a wedge-shaped section of the elongated cervix, the apex of which extends high up into the cervical wall, while the base is formed by the lower portion of the lips. 3. For *exploration of the rectum and adjacent parts;* it consists in introducing the hand or the hand and arm of the operator into the bowel. 4. For *laceration of the perineum;* the edges are freshened; then sutures are first passed so as to include all the denuded rectal mucous membrane; each suture commences and ends in the rectum, and is tied as soon as passed; the wound is then closed as usual. 5. For *uretero-vaginal fistula;* an opening is made into the bladder where the ureter empties into the vagina; through this opening a sound is passed from the bladder into the ureter; the uretero-vaginal wall is slit up from the bladder on the sound; the margins of the wound are daily separated by a sound until cicatrization has taken place; the vaginal fistula is closed at a second operation. 6. For *vesico-vaginal fistula;* adaptation of the pared margins, the mucous membrane of the bladder being included in the abrasion; the stationary catheter is not retained afterward. **Simpson's** (*Sir J.*): 1. For *oöpherectomy;* acupressure is applied to the pedicle inside of the abdominal wall. 2. For *stenosis of the cervix uteri;* bilateral incisions through the whole length of the cervical canal. **Sims'** (*Marion*): 1. For *anteflexion of the uterus;* incision of the posterior lip of the cervix in the median line up to the point of flexion, to permit of communication between the upper portion of the uterine canal and the posterior vaginal fornix, so that the discharges may escape the curve of flexure. 2. For *cholecystotomy;* the gall-bladder is stitched to the abdominal wound and a permanent fistula is established. 3. For *colporrhaphy;* denudation of a V-shaped surface on the anterior wall of the vagina and apposition of its arms by sutures. 4. For *lithotomy (in the female)*; the parts are exposed as for the operation for vesico-vaginal fistula; a curved director is passed through the urethra into the bladder, and made to project on the anterior vaginal wall; this is cut down upon, and the stone extracted; the opening is not to be closed. 5. For *supra-vaginal elongation of the cervix;* the cervix is amputated with scissors, and the mucous membrane is drawn over the stump and united with four stitches. 6. For *trachelotomy;* division of the cervix on either side up to the vaginal junction, and division of the cervical canal as high as the internal os; if the cervix is flexed, the lip on the convex side is divided, and the canal is enlarged as before. 7. For *vesico-vaginal fistula;* coaptation of the pared margins, the abrasion not including the vesical surface; retention of a catheter afterward. **Sinclair's,** for *diseased Fallopian tubes;* free incision *per vaginam,* and subsequent washing out of the empty tubes. **Skene's** (*A. J. C.*), for *anteflexion of the uterus with imperfect invagination of the cervix into the vagina;* transverse division of the anterior vaginal wall after the anterior column of the vagina has been put on the stretch by drawing the cervix backward toward the hollow of the sacrum; the upper and lower edges of the incision are drawn apart by stretching the incised portion, and sutures are introduced from the sides, transforming the transverse incision into a longitudinal incision. **Skewer Methods,** for *amputation through the hip-joint.* See *Myles', Spence's,* and *Wyeth's operations.* **Skey's:** 1. For *tarso-metatarsal amputation;* disarticulation through the outer three and inner joints, the base of the second metatarsal bone being sawn through. 2. For *rhinoplasty;* two lateral flaps made from the side of the nose upon the cheek are brought into the mesial line. **Skutsch's,** for *salpingostomy;* after ascertaining by aspiration the nature of the contents of a tube which has been converted into a serous cyst, an oval piece about half an inch wide is excised from the abdominal end, and the mucous and serous surfaces are united with silk sutures around the opening; the new ampulla should be sutured to the ovary. **Smith's** (*Greig*): 1. For *ectopia vesicæ;* a modification of *Wood's operation* in which the flaps are made larger. 2. For *extreme intestinal obstruction;* an artificial anus is made, and the intestine is patiently milked to squeeze out the feces. 3. For *removal of the uterine appendages;* it is done by abdominal incision. **Smith's** (*G. K.*), for *internal urethrotomy;* it is done with a special dilating urethrotome. **Smith's** (*H.*), for *hemorrhoids;* crushing by means of a clamp, and applying the Paquelin cautery to the stump after cutting away the projecting part. **Smith's** (*N.*): 1. For *amputation at the knee-joint;* it is done by a large anterior and a smaller posterior skin-flap. 2. A *method of performing ovariotomy;* the arteries of the pedicle are tied separately and the ligatures (strips cut from a kid-glove) are cut short, the pedicle being dropped inside. **Smith's** (*S.*): 1. For *amputation through the knee-joint;* it is done by "lateral hooded skin-flaps," the incision commencing in front about one inch below the tubercle of the tibia, and being carried up to the center of the articulation behind, the patella being preserved. 2. *Osteotomy;* two partial

sections of the femur are made just below the trochanter minor, one anteriorly, the other posteriorly; the bone is then fractured. **Smith's** (*T.*): 1. For *double hare-lip*, the outer segments are pared and the parings removed; the prolabial flaps are then turned down from the sides of the central tubercle. 2. For *uranoplasty;* the utilization of the mucous membrane covering the vomer as a means of bridging the cleft. **Smyth's,** for *ligation of the vertebral artery;* the incision is commenced at the clavicle, and is carried upward along the posterior border of the sterno-mastoid muscle for three inches; the process of the sixth cervical vertebra is sought for as a guide. **Snellen's:** 1. For *conjunctival ectropion;* traction is exerted on the contracted conjunctiva so that it becomes permanently inverted, the sutures being passed through the highest part of the everted mucous membrane. 2. For *ectropion;* two needles on the same thread are passed parallel to each other some distance apart, from the summit of the everted conjunctiva beneath the skin and out about the margin of the orbit; the two ends are then tied over a roll of gauze. 3. For *entropion;* a modification of *Streatfield's operation*, in which, after grooving the tarsus throughout its whole extent, sutures are used to effect the desired result. 4. For *strabotomy;* a horizontal incision is made in the conjunctiva over the middle of the tendon; the tendon is then seized with forceps, and a snip is made into it with the scissors; the upper portion of the tendon is divided first, then the lower portion. 5. For *trichiasis;* a loop of thread is passed, by means of a needle, in the free margin of the lid as near as possible to the offending hair; the hair is caught in the loop and drawn through the needle-tract. **Socin's:** 1. For the *radical cure of inguinal hernia;* ligature and excision of the sac. 2. For the *removal of tumors of the thyroid gland;* incision through the normal gland-structure and enucleation of the neoplasm. **Sonnenburg's:** 1. For *ectopia vesicæ;* the bladder is extirpated and the ureters united to the dorsal groove of the penis. 2. For *resection of the bladder;* a supra-pubic operation with removal of a tumor involving the anterior wall of the bladder; the bladder-wound is closed by stitching the peritoneum over it. **Sotteau's,** for the *radical cure of inguinal hernia;* a double invagination of the scrotum is made to fill the canal. **Soupart's,** for *amputation at the elbow-joint;* an elliptic amputation, with the highest point of the ellipse in front, the flap being taken from behind. **Spanton's:** 1. For *fixity of the lower jaw;* subcutaneous division of the adhesions between the condyle and the glenoid cavity. 2. For the *radical cure of inguinal hernia;* the *subcutaneous method;* after reduction of the rupture a small incision is made over the fundus of the sac and the pillars of the ring are closed with the screw-instrument. **Spence's:** 1. For *amputation at the shoulder-joint;* this resembles *Larrey's operation*, except that the longitudinal incision is made on the inner aspect of the arm. 2. For *amputation of the thigh;* it is done by long anterior and short posterior flaps, the latter being cut from without inward, and commenced two inches below the base of the anterior flap. **Sperino's,** for *cataract;* repeated paracentesis of the aqueous humor. **Spiegelberg's,** for *prolapse of the uterus, with marked cystocele;* the middle of the lower portion of the anterior vaginal wall is united to the middle of the upper portion of the posterior wall, after each has been denuded, in addition to the repair of the perineum. **Squire's,** for *port-wine marks;* multiple parallel incisions. **Stacke's,** for *middle-ear disease;* incision through the skin, circumscribing the auricle posteriorly; the membranous meatus is shelled out of the osseous canal; the median upper part of the bony meatus is cut away and the exposed malleus and incus removed; the superior wall is then chiseled to near the drum-insertion; then the posterior wall of the meatus is cut away; thus the attic, tympanum, antrum, and meatus are converted into one large cavity. **Star-operation,** for *transversely lacerated perineum;* after denudation of a transverse strip, a median triangular or bilateral figure is denuded across the transverse strip. **Stearns',** for *internal urethrotomy;* it is done with a special dilating urethrotome. **Steele's,** for *deviated nasal septum;* a modification of *Blandin's operation*, *q. v.* **Stellwag's:** 1. *Canthoplasty;* an oblique blepharotomy or sphincterotomy. 2. For *cataract-extraction;* a corneal flap-extraction. 3. For *trichiasis;* re-attaching the raw surface of the tarsus to the ablated zone of hair-follicles, so that the border that bears the cilia looks upward and that which has the raw surface looks downward. **Stevens',** for *ligation of the internal iliac artery;* an incision about five inches long is made parallel with the deep epigastric artery and nearly ½ inch on the outer side of it. **Stevens'** (*G. T.*), for *muscular asthenopia;* partial or graduated tenotomy of one of the ocular muscles. **Stilling's:** 1. *Ovariotomy;* the cautery is applied to the pedicle, which should be stitched in the parietal wound. 2. For *stricture of the nasal duct;* internal incision. **Stillman's,** for *hemorrhoids;* the patient is placed in the knee-chest position and each mass is reduced by manipulation as for hernia, after which a pile-bougie is introduced. **Stimson's,** for *fracture of the patella;* four small punctures are made deeply through the skin at the margin of the patella, at equal distances from it, :O: A half-curved Hagedorn needle armed with a heavy silk suture is carried in one lower incision, through the ligamentum patellæ, and out the opposite incision, reëntered at the point of exit and brought out at the upper incision on the same side, inserted again at the same point, made to transfix the quadriceps tendon and emerge at the other upper incision, introduced again at the same point and brought out at the place of starting. The fragments are held together by strong tenacula and the sutures tied tightly and the ends cut short; the incisions are then closed. **Stokes'** (*Sir W.*): 1. For *amputation above the knee;* the same as *Gritti's operation*, except that section of the femur is made above the condyles. 2. For *excision of the tongue;* a modification of *Jaeger's operation.* 3. For *flat-foot;* by removing a wedge-shaped piece of bone from the head and neck of the astragalus. 4. For *single hare-lip;* the prolabium is formed by tissue from both sides of the cleft by means of incisions skirting the red margin; the upper part of the cleft is incompletely pared and the partially dissected flaps turned back, while the edges of the skin are brought together and the prolabial flaps drawn downward and outward. **Stoltz's,** for *cystocele;* it is also called the *purse-string* and *tobacco-pouch* operation; denuding a circular patch on the anterior vaginal wall, and running a suture around the margin and tying. **Streatfeild's:** 1. For *atresia of the punctum lacrymale;* slitting of the canaliculus. 2. For *cataract-extraction;* it is made with a Sichel's knife without counter-puncture, the wound being enlarged by a sawing motion. 3. For *entropion;* removal of a wedge-shaped strip from the tarsal cartilage. 4. For *synechia;* the same as *Passavant's operation*, except that a cutting-hook is used in place of forceps. **Streatfeild-Snellen's,** for *entropion;* like *Streatfeild's operation*, except that the groove in the tarsus is made higher up. **Strohmeyer's,** for *strabotomy;* an incis-

ion is made with a cataract-knife in the line of the tendon; the probe is then passed beneath the muscle and the latter is divided with scissors or knife. **Sutton's** (*R. S.*), for *trachelorrhaphy;* the denudation removes a large amount of diseased tissue, and the patency of the canal is maintained. **Syme's** (*J.*): 1. A method of performing *amputations;* the oval tegumentary flap operation; a modification of the mixed amputation. 2. For *amputation at the ankle-joint;* a single plantar flap is made, from which the os calcis is dissected out, after disarticulation has been accomplished; the malleoli and lower end of the tibia are then removed. 3. For *amputation of the thigh;* a modification of the *circular amputation*, in which retraction of the skin is aided by two lateral cuts after the usual circular incision has been made. 4. For *excision of the elbow;* the same as *Moreau's operation.* 5. For *excision of the shoulder;* a large posterior flap is taken from the deltoid region. 6. For *excision of the tongue;* a modification of *Roux's operation, q. v.* 7. For *external urethrotomy;* the stricture is divided through the perineum upon a grooved director. 8. For *restoration of the lower lip;* two large lateral flaps are dissected from the chin and sides of the face and brought together in the middle line. 9. For *rhinoplasty;* two flaps from the cheeks, with a conjoint pedicle at the root of the nose, are united in the middle line. **Szokalski's,** for *pterygium;* it is removed by means of a thread, armed with two needles, so that the growth is strangulated at each end and *en masse* between. **Szymanowski's:** 1. For the *closure of an artificial anus;* it is done by means of a flap of integument without any sacrifice of the intestinal wall. 2. For *blepharoplasty;* a modification of the cantho-temporal and temporo-genal incisions, the former running obliquely upward and outward and the latter obliquely downward and inward. 3. For *ectropion of the lower lid;* excision of a triangular piece of skin at the external canthus, removal of a part of the ciliary margin, and suture of the lid in the proper position. 4. For *hypospadias;* a straight incision is made near one edge of the fistula, and the skin is dissected loose; on the opposite side of the fistula, a curved flap is raised, and after the epidermis is scraped off, the flap is turned under the first one and secured by sutures. 5. For *restoration of the upper lip;* lateral flaps of the full breadth of the lip are cut from the cheek on each side, and their inner extremities are brought together in the median line. 6. For *urethral fistula;* a flap is dissected up on either side of the fistula, and one is slid under the other, the under one having the epidermis removed, except at the point that will lie over the fistula. **Tagliacotian,** or **Italian Method,** for *restoration of the nose.* See *Tagliacozzi's operation.* **Tagliacozzi's,** for *rhinoplasty;* the forming of a new nose from a flap from the arm secured in place, and left attached to the arm until union has occurred. **Tait's** (*Lawson*): 1. For *hepatotomy* for *hydatid cyst;* it is performed in one stage and involves opening of the abdominal cavity, incision and evacuation of the cyst, and the suturing together of the margins of the hepatic and parietal wounds. 2. For *lacerated perineum;* the *flap-splitting operation;* the recto-vaginal septum is split transversely and from the extremities of this incision two lateral incisions are made, running up toward the lower terminus of each nympha and down to a little above the anal orifice; these two flaps are dissected up; the upper one is drawn toward the urethra, the lower one down toward the anus; sutures are passed laterally and the edges are brought together. 3. For *oöphorectomy;* the same as *Battey's operation*, with inclusion of the Fallopian tube. 4. For *oöphorectomy;* the pedicle is secured with a silk ligature and the "*Staffordshire knot.*" See *Knot.* **Tate's,** for *uterine inversion;* similar to *Watts' operation* except that one finger is also passed into the bladder to act in conjunction with the fingers in the rectum. **Tausini's,** for *hepatotomy;* the cyst is dissected out, and the wound in the liver is closed by a double series of catgut and silk ligatures. **Taylor's:** 1. For *cataract-extraction;* the incision is made with a broad needle, the capsule is lacerated and an artificial pupil is made, through which the lens is extracted. 2. For *genu valgum due to femoral curving;* section of the shaft of the femur on the outer side, a short distance above the joint. **Teale's:** 1. For *amputation of the arm;* the long flap is placed upon the antero-external aspect of the arm; the brachial artery and the median and ulnar nerves are divided with the posterior flap. 2. For *amputation of the leg;* a rectangular-flap operation, in which a long anterior and a short posterior flap are made, each consisting of both integument and muscle; the length of the anterior flap is equal to half the circumference of the limb, and the posterior flap is one-quarter of the length. 3. For *amputation of the thigh;* the same procedure as in Teale's *amputation* of the leg. 4. For *cataract-extraction;* removal of a soft cataract by suction. 5. For *lacrymal stricture;* slitting of the lower canaliculus and introduction of different sized olive-pointed probes. 6. For *symblepharon;* two flaps of the bulbar conjunctiva are taken from either side, one of which is used for covering the inner surface of the lid, while the other serves as a covering for the eye. **Teevan's,** for *internal urethrotomy;* it is done with a modification of *Maisonneuve's* urethrotome. **Terrillon's,** for *hepatotomy* for *hydatid cyst;* the portion of the liver containing the cysts is removed by means of an elastic ligature applied after the performance of celiotomy. **Textor's,** for *excision of the knee;* it is done by a curved transverse anterior incision, with its convexity downward. **Theobald's,** for *subconjunctival strabotomy;* it is performed after *Critchett's method*, a "crochet-hook" being used instead of the ordinary blunt one, to prevent the tendon slipping off. **Thiersch's:** 1. For *ectopia vesicæ;* closure by means of two large lateral flaps, one to cover the lower half of the defect, and the other the upper half. 2. For *rhinoplasty;* two lateral flaps from the cheeks are turned over to meet in the middle line, their raw surface being turned out; a flap from the forehead is then brought down and covers all. 3. For *skin-grafting;* the graft is made by a to-and-fro motion with a razor, shaving off as long and as broad a section of the upper layers of the skin as is desired. 4. For *epispadias;* the formation of a meatus and urethra by dissection of various flaps, the entire treatment covering a period of several months. 5. For *uranoplasty;* the alveolar process is chiseled away and a flap consisting of the whole thickness of the cheek is turned in to close the hole in the hard palate. **Thomas's** (*T. G.*): 1. For *hysterectomy;* celiotomy with the use of the clamp and the charring of the end of the pedicle with the galvano-cautery. 2. For *laparo-elytrotomy;* removal of the fetus through incisions in the abdominal wall and in the vagina, without opening the peritoneum or wounding the uterus. **Thompson's** (*Sir H.*): 1. For *cystitis due to hypertrophied prostate;* the establishment of a permanent vesical fistula over the pubes. 2. For *internal urethrotomy;* it is done with Thompson's modification of Civiale's urethrotome. 3. For *vesical tumor:* the removal by a median perineal cystotomy, with the use of Thompson's special forceps. **Thread-operation,** an operation proposed by von Graefe, for regulating the position of the eyeball after tenotomy; the thread is

passed through the stump of the tendon and is fastened to the skin near the eye. **Tiffany's,** for *union of tendon and flap;* in amputation of fingers at the joint between the first and second phalanges, the stitch that unites the skin is passed through the tendon and its sheath. **Tillaux's,** for *cholecystenterostomy;* it is performed in three stages: (1) the gall-bladder is fixed by sutures to a loop of the jejunum and a biliary fistula is established by uniting the margins of an opening made in the gall-bladder to the parietal wound; (2) after about nine days an artificial communication is established between the bowel and the gall-bladder through the fistula; (3) eighteen days later the biliary fistula is closed by a plastic operation. **Travers',** for *cataract-extraction;* the capsule is divided and the lens is displaced into the anterior chamber; it is then removed through a small corneal incision. **Travignot's,** for *amputation of the leg;* it is done by a large posterior flap and a short anterior one. **Trélat's:** 1. For *Dupuytren's contraction;* division of the attachments between the skin and fibrous bands, followed by division of the bands themselves. 2. For *internal urethrotomy;* a special urethrotome is used and the stricture is cut both ways. **Trendelenburg's:** 1. For *ectopia vesicæ;* narrowing of the defective area by approximating the two innominate bones, after division of the sacro-iliac synchondrosis on either side. 2. For *flat-foot;* supra-malleolar osteotomy. 3. For *staphyloplasty;* the same as *Schönbein's operation.* **Treves'** (*F.*): 1. for *spinal abscess;* a vertical incision, two and a half inches in length, is made in the loin, midway between the last rib and the crest of the ilium, the incision to be parallel with the vertebral side of the outer border of the erector spinæ muscle. 2. For *ununited fracture of short bones;* the fragments are held in position with a pair of modified *Malgaigne's* hooks. 3. For *varicocele;* exposure of the veins, the application of two ligatures and excision of the included portion. **Treves'** (*W. K.*), for *excision of the knee;* it is done by two vertical lateral incisions. **Triangular-flap operation,** for *lacerated perineum.* See *Duncan's operation.* **Tripier's:** 1. For *amputation through the foot;* a modification of *Chopart's operation* in which the os calcis is sawn through horizontally at the level of the sustentaculum tali and its lower portion is removed. 2. For *blepharoplasty;* a flap is taken from the upper lid to close a deficiency in the lower lid. **Valette's:** 1. For the *radical cure of hernia;* an attempt is made to close the canal by causing an eschar by means of Vienna paste. 2. For the *removal of a naso-pharyngeal tumor;* by an operation similar to those of *Berard* and *Hugier,* but of less extent; the anterior and inner wall of the maxillary sinus is removed, and the sinus is thus opened into the nasal cavity. **Van Best's,** for the *radical cure of hernia;* subcutaneous suturing of the inguinal rings. **Van Buren's,** for *prolapsus ani;* a linear cauterization of the mucosa with the Paquelin cautery. **Van Millingen's:** 1. For *entropion;* the mucosa is transplanted into the wound made by an incision at the lid-margin. 2. For *trichiasis;* the covering of the wound made in *Arlt's operation* by mucosa from the patient's lips or from the conjunctiva of a rabbit, instead of with skin. **Veit's:** 1. A method of performing *embryotomy;* evisceration followed by simultaneous traction on an arm and the breech, the fetus being delivered doubled up. 2. For otherwise *impossible labor;* the same as *Porro-Veit's operation.* **Veitch's,** for *amputation at the hip-joint;* the same as *Esmarch's operation.* **Velpeau's:** 1. For *excision of the upper jaw;* an incision is commenced at the angle of the mouth and is carried in a curved direction, through the cheek to end over the center of the malar bone. 2. For *excision of the wrist;* by raising a dorsal flap. 3. For *iridotomy;* a long double-edged knife transfixes the cornea, passes through the iris to the posterior chamber and back to the anterior chamber, through the cornea again, and a flap is cut; this leaves a triangular opening in the iris. 4. For *preternatural anus;* removal of the adventitious tissue around the preternatural anus, and suturing of the wound. **Vermale's:** 1. A method of *performing amputation;* the ordinary double-flap operation, the flaps being cut by transfixion whenever possible. 2. For *amputation of the arm;* by lateral flaps marked out by a skin-incision, the remaining soft parts being divided by transfixion; the inner flap is cut the longer. 3. For *amputation of the thigh;* by lateral flaps of the same size and including all the soft parts down to the bone; both flaps are cut by transfixion. **Verneuil's:** 1. For *amputation through the foot;* subastragaloid disarticulation, the incision commencing over the outer tuberosity of the os calcis and being carried forward to and over the dorsum of the foot, just behind the base of the metatarsal bones and finally sweeping across the sole to the point of commencement. 2. For *iliac colotomy;* a nearly vertical incision is made, and a knuckle of gut is transfixed and kept in place by two needles which lie on the parietes; the exposed bowel is then stitched to the margins of the parietal wound and the protruding knuckle is excised. 3. For *proctotomy;* the rectum is first divided into lateral halves with the écraseur, and the subsequent dissection is done with the galvano-cautery knife. 4. For *rhinoplasty;* two flaps from the cheeks and forehead are superimposed to secure elevation of the sunken nose. 5. For *stricture of the rectum;* the same as *Lenti's operation,* except that a posterior incision only is made. **Vidal's** (*de Cassis*): 1. For *gastrotomy,* the parietal incision is made in the middle line. 2. For *varicocele;* subcutaneous constriction of the veins by means of wire ligatures. **Der Villard's** (*Carron*): 1. For *ectropion;* shortening of the skin of the lid in a transverse direction. 2. For *iridotomy;* the same as *Maunoir's operation.* **Voillemiér's,** for *internal urethrotomy;* it is done with a modification of *Maisonneuve's* urethrotome. **Volkmann's:** 1. For *amputation at the hip-joint;* the same as *Esmarch's operation.* 2. For *excision of the rectum;* (*a*) *For a circumscribed growth;* dilate the anus; pull down the diseased portion; remove by incision; suture. (*b*) *For disease involving the circumference of the bowel, but not the anus;* divide the anus forward in the perineum and backward to the coccyx; remove the growth by a knife or scissors, and the fingers, and stitch the healthy mucosa together; deep drainage; suture. (*c*) *For disease involving the circumference of the bowel, and part or all of the anus;* make the anterior and posterior incisions as directed; then carry a circular incision around the sphincter, and dissect out the growth; the healthy mucosa is stitched to the skin-border; drainage; suture. 3. *Hepatotomy for hydatid cyst;* it is performed in two stages; in the first, adhesion is secured between the parietal peritoneum and the hepatic peritoneum over the seat of puncture; the second stage consists in incising the adherent cyst after some days. 4. For *hydrocele;* by a free incision in the tunica vaginalis and stitching the serous membrane to the skin. 5. For *lupus;* erasion with a curet. **Von Graefe's** (*Alfred*). See *Graefe's operations.* **Von Hippel's.** See *v. Hippel's operations.* **Von Walther's,** for *tarsorrhaphy;* paring of the borders of the upper and lower lids adjoining the external angle and securing the denuded surfaces together. **Waldau's,** for *cataract-extraction;* this differs from the linear

method of *v. Graefe* only in the smaller incision (less than ¼ of the circumference of the cornea) and in the use of a special scoop to remove the lens. **Walsham and Willett's,** for *talipes calcaneus;* oblique division of the tendo Achillis from above downward and from before backward, and slipping of the ends past each other and suturing. **Walton's,** for *lacrymal stricture;* slitting of the upper canaliculus into the sac, and the introduction of pure silver pins. **Wardrop's:** 1. For *aneurysm;* ligation of a main branch of the artery distal to the aneurysm, leaving a circulation, however, through another branch. 2. For *entropion;* ligation of a small portion of the skin by a suture passed beneath. **Warlomont's:** 1. For *cataract-extraction;* a modification of the *Graefe* incision. 2. For *trichiasis;* the portion of lid in which the cilia are implanted is detached, shifted upward, and fixed upon the tarsus. **Warren's** (*M.*): 1. For *excision of the upper jaw;* the same as *Velpeau's operation.* 2. For the *radical cure of hernia;* the tissues of the inguinal rings are injected, by means of a syringe, with a mixture composed of the fluid extract of white oak, reduced to a syrupy consistence, and sulphuric ether and morphin. 3. *Uranoplasty;* the mucous membrane is dissected up and the soft palate is freed by dividing the posterior pillars, and then sutured in the middle line. **Waterman's,** for removal of a *naso-pharyngeal tumor;* similar to *Cheever's operation,* except that the hard palate is not fractured, but acts as a hinge to the disarticulated superior maxilla, as in Cheever's double operation. **Watson's** (*E.*), for *amputation through the foot;* a modification of *Pirogoff's operation,* in which the posterior part of the os calcis is sawn off and the cut is extended up behind the ankle-joint; the tibia and fibula are then sawn through from before backward and downward. **Watson's** (*P. H.*): 1. For *tarsectomy;* the joints between the astragalus and scaphoid and the os calcis and cuboid are opened and the metatarsal bones are sawn through from below upward. 2. For *goiter;* extirpation of the goiter. 3. For *rhinoplasty;* a modification of *Fergusson's operation, q. v.* **Watson's** (*Spencer*): 1. For *entropion;* transplanting a bridge of skin from the eyelid through to the conjunctival surface. 2. For *trichiasis;* the wound is covered by a pedunculated flap. **Watts',** for *uterine inversion;* the same as *Courty's method,* except that the fingers passed into the rectum are used to dilate the inverted cervix. **Weber's:** 1. For *cataract-extraction;* the incision is made with a curved bistoury. 2. For *lacrymal stricture;* a modification of *Bowman's operation;* slitting of the upper canaliculus, subcutaneous division of the canthal ligament, and dilatation by a conic silver sound and elastic catgut bougies. 3. *Plastic;* the large elliptic gap is closed by displacing a curved flap; then a second curved flap is displaced into the gap thus made. 4. *Rhinoplasty;* an oval flap is taken from the center of the upper lip, consisting of only part of its thickness, and turned up and attached to the freshened edges of the defective ala. **De Wecker's:** 1. *Blepharoplasty;* a modification of *Reverdin's operation;* it consists in transplanting small pieces of epidermis covered with gold-beater's skin. 2. For *cataract-extraction;* a modification of the *Graefe incision* in cataract-extraction, and extraction without iridectomy. 3. For *corneal or lenticular opacities;* division of the sphincter of the iris by introducing forceps-scissors through the corneal incision. 4. For *evisceration;* a suture is run through the previously loosened conjunctival and subconjunctival tissue surrounding the cornea, and is carried entirely around by repeated punctures; the protrusion is then cut off and the two ends of continuous suture are drawn together, thus preventing the escape of the vitreous. 5. For *glaucoma;* trephining of the cornea. 6. For *iridectomy;* an incision is made with von Graefe's knife through the cornea and iris; the forceps-scissors is then introduced, and a V-shaped portion of iris is removed. 7. For *leukomata of the cornea;* tattooing the leukomata. 8. For *ptosis;* removal of an oval piece of skin from the lid, followed by suturing of the wound. 9. For *retinal detachment;* a very fine gold wire is introduced through the sclera and choroid and allowed to remain, as a drain. 10. For *sclerotomy;* the cataract-knife is entered into the sclera, without completing the incision; prolapse of the iris is thus prevented. 11. For *staphyloma;* excision and uniting of the conjunctiva over the wound. 12. For *strabismus;* advancement of Tenon's capsule, and thus of the insertion of the muscle. **Wehr's,** for *resection of the intestine;* the end of the narrower part of the bowel is divided obliquely, so that the oblong opening which results shall correspond to the lumen of the other end. **Weir's** (*R. F.*): 1. For *lumbar nephrectomy;* a vertical lumbar incision three inches from the spine, just below the twelfth rib, is joined at the top by a transverse incision running along the edge of the ribs. 2. *Rhinoplasty;* a transverse cut is made through the sunken nose, and the tip is drawn down to the desired position, the resulting wedge-shaped gap being filled by transplanting flaps from the cheeks. 3. For *varicocele;* subcutaneous ligation with carbolized or juniperized catgut. **Wells'** (*Sir S.*): 1. *Cholecystotomy;* a modification of *Sims' operation,* in which it is proposed to close the incision in the gall-bladder by a continuous suture and return it to the abdominal cavity. 2. *Splenectomy;* the incision is made through the linea semilunaris. **Wells':** 1. For *blepharoplasty of the upper lid;* dissection of the cicatrix, replacement of the lid to its normal position, and transplantation of a flap from the temple. 2. For *entropion;* splitting of the lid into anterior and posterior leaves, excision of a fold of skin, and removal of a wedge-shaped piece of the tarsus. 3. For *strabotomy;* division of the tendon, subconjunctivally, close to its insertion. **Wenzel's:** 1. For *cataract-extraction;* in cases of total posterior synechia, a curved incision is directed downward, passing through the iris, and opening the lens. 2. *Iridectomy;* the same as *Velpeau's operation,* except that the flap is removed. **West's,** for *excision of the wrist;* two dorsal incisions are made and the tendons of the thumb and fingers are not divided, but are drawn aside. **Westmoreland's,** for *internal urethrotomy;* it is done with a modification of *Maisonneuve's* urethrotome. **Wharton's,** for *amputation of the foot;* a modification of *Teale's operation* in which only one flap is made and the bone is sawn off at the level to which a short flap, made according to Teale's method, would reach. **Wheelhouse's,** for *external urethrotomy;* division of the stricture on a grooved probe passed through the stricture from an opening made into the urethra in front of it. **White's:** 1. For *excision of the hip-joint;* a semicircular incision is made above and behind the greater trochanter, the joint is exposed and disarticulated, and the section made. 2. For *uterine inversion;* it is replaced by pressure by means of a cup having at its base a short staff terminating in a steel spiral spring which rests against the operator, counter-pressure being made above. **White's** (*J. William*), for *hypertrophy of the prostate;* removal of the testicles. **White's** (*O.*), for the *radical cure of hernia;* invaginating the sac into the ring and plugging the latter with an instrument devised for the purpose. **Whitehead's:** 1. For *excision of hemorrhoids;* removal of a circular

strip of mucous membrane around the anus, including the tumors. 2. For *excision of the tongue;* removal through the mouth, using only scissors. 3. *Tracheotomy;* the incision is made in the usual situation, but of greater length than is common. **Wickerkiewicz's,** for *scleritis;* the removal by means of a small sharp spoon of the diseased tissue in stubborn cases. **Wickham's,** for *varicocele;* it is done by Heurteloup's modification of Henry's clamp, with removal of a large amount of scrotum. **Wilde's:** 1. For *mastoid or cerebral abscess;* the bone is exposed from the base to the apex of the mastoid process, ½ inch behind the auricle, and if necessary, the bone is opened with a drill, gouge, or trephine. 2. For *staphyloma;* very similar to *Critchett's operation, q. v.* 3. For *trichiasis;* an incision is made to the roots of the inverted cilia followed by cauterization with silver nitrate and removal of the cilia. **Willett's,** for *talipes calcaneus;* the tendo Achillis is divided obliquely and the cut ends are slid past each other until the proper shortening is obtained, when they are stitched in place. **Williams',** for *lacrymal stricture;* a modification of *Walton's operation;* dilatation by large silver probes. **Winckel's,** for *vaginal hysterectomy;* after securing the cervical portion of the uterus an incision is made in the anterior vaginal vault, and is carried spirally around the cervix, ligating the vessels when necessary, and exerting steady traction on the uterus; the peritoneal cavity is thus easily penetrated, and posteriorly the entire supracervical portions of the broad ligament can be plainly seen and ligated in position. **Winiwarter's,** *cholecystenterostomy;* it is performed in two stages; in the first the gall-bladder is united to the upper portion of the jejunum and the parts are fixed to the parietal peritoneum; in the second, after about five days, the bowel is incised and a communication is established between the latter and the gall-bladder. **Witzel's,** for *gastrotomy;* an incision is made, four inches long, beginning at the middle line and running to the left a finger's breadth below the border of the ribs; the fibers of the rectus muscle are separated by the fingers and not divided; the stomach is brought outside of the wound and opened toward the cardiac extremity, and a rubber tube introduced; the stomach is then returned and sutured to the margin of the abdominal opening. **Wladimiroff's,** for *tarsectomy;* the heel portion of the foot, consisting of the astragalus, the calcis, and the soft parts covering them, is removed; the articular surfaces of the tibia, fibula, cuboid, and scaphoid are sawn off and the foot is brought into a straight line with the leg. **Wladimiroff-Mikulicz's,** for *tarsectomy;* the same as *Mikulicz's operation.* **Woelfler's,** for *gastro-enterostomy;* the first part of the jejunum is united by sutures to the middle of the anterior surface of the stomach and a communication is established between the two. **Wolf's,** for *mastoid and middle-ear disease;* it consists in penetrating the bony partition between the antrum and the external auditory canal by successive layers, after removal of the soft parts. This operation is indicated for subperiosteal removal of exostoses and hyperostoses of the auditory canal, in caries in the upper and back part of the auditory canal, and when the transverse sinus is so far forward as to interfere with other operations. **Wolfe's:** 1. For *ectropion;* transplantation of a flap from a distance, without a pedicle. 2. For *retinal detachment;* a vertical incision is made in the conjunctiva and subconjunctival tissue, and an oblique incision into the sclera, followed by gentle pressure and suture. 3. For *symblepharon:* transplantation of the conjunctiva to a rabbit after division of the adhesions of the lid. 4. For *tympanic granulations;* scraping away of the proliferating granulations by small, sharp spoons of various shapes. **Wölfler's,** for *pyloric stenosis;* gastro-enterostomy in malignant disease of the pylorus. **Wood's** (*J.*): 1. For *rhinoplasty;* a new nose is formed from a broad flap taken from the upper lip. 2. For *ectopia vesicæ;* closure by means of three flaps, a reversed upper or umbilical, and two lateral transplanted flaps which are made to cover over the upper one. 3. For *hypospadias;* the anterior half of the urethra is formed from the prepuce (if redundant), and the remainder by means of a flap cut from the front of the scrotum. 4. For the *radical cure of hernia;* (1) the hernial canal is closed by subcutaneous sutures through the tendinous structures forming its boundaries; (2) for small herniæ and herniæ in children, a pair of rectangular pins are used instead of sutures. 5. For *varicocele;* a modification of *Ricora's operation;* it consists in the application of a single subcutaneous ligature of annealed iron wire, the ends of which are fastened to a light steel spring, the veins being divided by the constant tension. **Woolhouse's,** for the *formation of an artificial pupil;* division of the fibrous deposit binding the iris by means of a needle introduced through the sclerotica. **Wright's** (*G. A.*): 1. *Arthrectomy;* the interior of the knee-joint is exposed by an anterior transverse curved incision, and all of the diseased tissues, including the synovial membrane, ligament, cartilage, and bone, are removed by erasion. 2. For *cataract-extraction;* an incision is made with Beer's knife entirely within the cornea; puncture and counter-puncture are made at the sclero-corneal junction. **Wützer's,** for the *radical cure of inguinal hernia;* plugging of the hernial canal by an invagination of the scrotum, and its retention by a special instrument, thus exciting adhesive inflammation in the neck of the sac. **Wyeth's** (*J. A.*): 1. For *amputation at the hip-joint;* the "*bloodless*" *method;* two steel mattress-needles are inserted in the tissues and rubber tubing is passed several times around the limb above the needles. 2. For *internal urethrotomy;* it is done with a modification of *Otis's* urethrotome. **Wylie's,** for *retroflexion of the uterus;* shortening of the round ligaments after abdominal incision; the ligaments are folded upon themselves and sutured. **Zeller's,** for *webbed fingers;* a triangular flap is dissected up on the dorsal aspect of the root of the web, and the latter is divided, after which the apex of the flap is drawn down between the fingers and attached to a prepared raw surface on the palm.

Operative (*op'-er-a-tiv*) [*operari*, to labor]. Effective; pertaining to an operation. **O. Dentistry,** the department of dentistry that pertains to the surgical treatment of diseases of the teeth and surrounding parts.

Operator (*op'-er-a-tor*) [*operari*, to labor]. A surgeon.

Operatory (*op'-er-at-or-e*) [*operator*, a worker]. A laboratory.

Opercle (*o-per'-kl*) [*operculum*, a lid]. See *Operculum.*

Opercular (*o-per'-ku-lar*) [*operculum*, a lid]. Pertaining to an operculum. Designed for closing a cavity. Having an operculum.

Operculate (*o-per'-ku-lāt*) [*operculum*, a lid]. Possessing an operculum.

Operculiferous (*o-per-ku-lif'-er-us*) [*operculum*, a lid; *ferre*, to bear]. In biology, having an operculum.

Operculiform (*o-per'-ku-lif-orm*) [*operculum*, a lid; *forma*, form]. In biology, resembling an operculum.

Operculigenous (*o-per-ku-lij'-en-us*) [*operculum*, a lid; *gignere*, to produce]. In biology, having an operculum.

Operculigerous (*o-per-ku-lij'-er-us*) [*operculum*, a lid; *gerere*, to carry]. Having an operculum.

Operculum (*o-per'-ku-lum*) [L.: *pl.*, *Opercula*]. A lid or cover. In biology, a lid, cap, flap, or cover; applied to various occlusive apparatuses, structures, or organs, in plants and animals, as the cover of the capsule in mosses, the plate for closing the aperture of gasteropod shells, the feathered flaps of the ear of a bird, etc. In ichthyology, an osseous formation which, in part, closes the great opening of the gills. In anatomy, the convolutions covering the insula, consisting of the operculum proper, preoperculum, suboperculum, and postoperculum. **O., Burdach's**, the *O. insulæ*. **O. cutis**, the epidermis. **O. ilei**, the valve of Bauhin. **O. insulæ**, the gyri of the brain over the insula. They are the subfrontal, the precentral and postcentral, and the inferior central gyri. **O. laryngis**, the epiglottis. **O. oculi**, the eyelids. **O. sellæ**, the dura over the pituitary body.

Operimentum (*o-per-im-en'-tum*). Synonym of the *Membrana tympani*, *q. v.*

Opertorium (*o-per-to're-um*) [L., a cover]. Same as *Operculum*.

Ophelic Acid (*o-fel'-ik*), $C_{19}H_{20}O_{10}$. An amorphous sticky substance found in *Chiretta*. It is soluble in water, in ether, and in alcohol.

Ophiasis (*off-i'-as-is*) [ὀφίασις, serpentine baldness]. Alopecia areata in which the baldness progresses in a serpentine form. [Old.]

Ophicephalous (*off-is-ef'-al-us*) [ὄφις, a serpent; κεφαλή, the head]. Having a head like that of a serpent.

Ophidomonas sanguinea (*off-id-o'-mo-nas san-gwin'-e-ah*) [L.]. An old name for *Beggiatoa roseo-persicina*. See *Bacteria*, *Synonymatic Table of*.

Ophiography (*off-e-og'-ra-fe*) [ὄφις, a serpent; γράφειν, to write]. Descriptive ophiology.

Ophioid (*off'-e-oid*) [ὄφις, a serpent; εἶδος, like]. Resembling a serpent.

Ophiolatry (*off-e-ol'-at-re*) [ὄφις, a serpent; λατρεία, worship]. Serpent-worship.

Ophiology (*off-e-ol'-o-je*) [ὄφις, a serpent; λόγος, science]. The scientific study of serpents.

Ophiophagous (*off-e-off'-ag-us*) [ὄφις, a serpent; φαγεῖν, to eat]. Feeding upon serpents.

Ophiosis (*off-e-o'-sis*) [ὄφις, serpent]. Circumscribed baldness with scaliness.

Ophioxylin (*off-e-oks'-il-in*) [ὄφις, a serpent; ξύλον, wood], $C_{16}H_{13}O_6$. A yellow crystalline body obtained from *Ophioxylon serpentinum*, a purgative and anthelmintic; its solutions stain first yellow, then brown.

Ophioxylon, Ophioxylum (*off-e-oks'-il-on*, *off-e-oks'-il-um*) [ὄφις, a serpent; ξύλον, wood]. A genus of apocynaceous plants; serpent-wood. **O. serpentinum**, East Indian snake-root, used as an oxytocic and as a remedy for snake-bite. Unof.

Ophryitis (*off-re-i'-tis*) [ὀφρύς, brow; ιτις, inflammation]. Inflammation of the eyebrow.

Ophryocystis (*off-re-o-sis'-tis*) [ὀφρύς, eyebrow; κύστις, bladder]. A parasitic sporozoön.

Ophryo-iniac (*off'-re-o-in'-e-ak*) [ὀφρύς, eyebrow; ἰνίον, occiput]. Pertaining to the ophryon and the inion.

Ophryon (*off'-re-on*) [ὀφρύς, eyebrow]. In craniometry, the middle of a line drawn across the forehead at the level of the upper margin of the orbits. See *Craniometric Points*.

Ophryo-opisthiac (*off'-re-o-o-pis'-the-ak*) [ὀφρύς, eyebrow; ὀπίσθιος, hinder]. Pertaining to the ophryon and the opisthion.

Ophryoscolex (*off-re-o-sko'-leks*) [ὀφρύς, brow; σκώληξ, worm: *pl.*, *Ophryoscolices*]. A genus of endoparasitic peritrichous infusorians, representatives of which almost constantly inhabit the stomachs of cattle and sheep. See *Parasites* (*Animal*), *Table of*.

Ophryphtheiriasis (*off-rif-thi-ri'-as-is*) [ὀφρύς, eyebrow; φθειρίασις, pediculosis]. Pediculosis of t eyebrows and eyelashes.

Ophrys (*off'-ris*) [ὀφρύς, eyebrow]. The eyebrow.

Ophrytic (*off-rit'-ik*) [ὀφρύς, eyebrow]. Pertaining the eyebrow.

Ophthalmagra (*off-thal-ma'-grah*) [ὀφθαλμός, ey ἄγρα, a seizure]. Gouty or rheumatic pain in the ey

Ophthalmalgia (*off-thal-mal'-je-ah*) [ὀφθαλμός, ey ἄλγος, pain]. Neuralgia of the eye.

Ophthalmalgic (*off-thal-mal'-jik*) [ὀφθαλμός, eye; ἄλγο pain]. Pertaining to ophthalmalgia.

Ophthalmanthracosis (*off-thal-man-thrak-o'-si* [ὀφθαλμός, eye; ἀνθράκωσις, anthrax]. Anthrax i volving the eyelid.

Ophthalmatrophy (*off-thal-mat'-ro-fe*) [ὀφθαλμός, ey ἀτροφία, atrophy]. Atrophy of the eyeball.

Ophthalmecchymosis (*off-thal-mek-im-o'-si* [ὀφθαλμός, eye; ἐκχύμωσις, ecchymosis]. A conjun tival effusion of blood.

Ophthalmedema (*off-thal-me-de'-mah*) [ὀφθαλμός, ey οἴδημα, edema]. Conjunctival edema.

Ophthalmencephalon (*off-thal-men-sef'-al-on*) [ὀ θαλμός, eye; ἐγκέφαλος, in the skull]. The portio of the eye developed from the neural epiblast.

Ophthalmentozoön (*off-thal-men-to-zo'-on*) [ὀφθαλμό eye; ἐντός, within; ξῶον, animal]. An intraocul parasite.

Ophthalmia (*off-thal'-me-ah*) [ὀφθαλμός, eye]. An i flammation of the superficial tissues of the eye, a especially of the conjunctiva. **O. angularis.** T same as *Canthitis*. **O., Army**, purulent conjunctiviti **O. arthritica.** A synonym of *Glaucoma*. **O Asiatic.** See *Trachoma*. **O., Brazilian**, a for of xerophthalmia occurring in poorly-nourish children in Brazil; the cornea first dries a is finally destroyed. **O., Catarrhal**, a synonym simple conjunctivitis; a hyperemia of the conjunctiv with a catarrhal or muco-purulent secretion. **C Croupous**, a rare disease, characterized by a sever usually painless, swelling of the lids, a membrano exudation upon the surface of the conjunctiva, and scanty sero-purulent discharge. It occurs only children, but no distinct cause is known. **O., Dipl theric**, a contagious variety of ophthalmia, characte ized by a rigid and painful swelling of the lids, scanty sero-purulent or sanious discharge, and exudation within the layers of the conjunctiva whi leads to the death of the invaded tissues, and ten by spreading to the ocular conjunctiva and by pr sure, to destroy the cornea. The membrane is of a du grayish-red appearance and is intimately connect with the conjunctival tissues. **O., Dry**, a synony of *Xerophthalmia*. **O., Egyptian.** See *Tracho* **O., Electric**, an ophthalmia sometimes occurri in workmen exposed to the glare of electric ligh **O., Follicular**, an affection of the conjunctiva, as ciated with the presence of small pinkish prominen in the conjunctiva, chiefly located in the retrotar folds, and usually arranged in parallel rows. T disease is often due to poor hygienic surroundings a may become epidemic. **O., Gonorrheal**, an ac and severe form of purulent conjunctivitis, caused infection from urethral discharges containing the go coccus of Neisser. See *Bacteria*, *Synonymatic T of*. **O., Granular.** See *Trachoma*. **O., Ho pickers'**, a form of ophthalmia due to the imp tion in the cornea of the spinous hairs from bracts of the hop. **O. humida**, conjunctivitis w profuse discharge. **O., Lacrymal**, a form of chr conjunctivitis depending upon obstruction of the rymal passages. **O., Leukorrheal**, ophthalmia posed to be due to infection with leukorrhea

charges. **O., Malignant,** an acute form of ophthalmia, usually fatal from extension of the purulent process to the brain. **O., Menstrual,** a form associated with suppression of the menses, or with the menopause. **O., Migratory.** See *O., Sympathetic.* **O., Military.** See *Trachoma.* **O. neonatorum,** a gonorrheal or purulent ophthalmia of the new-born, the eyes having been infected by the mother's uterine or vaginal discharges. **O., Neuro-paralytic,** ocular disease from lesion of the Gasserian ganglion or of branches of the fifth nerve supplying the eyeball. **O., Periodic,** an ophthalmia seen in horses and leading to total destruction of vision. **O., Phlyctenular,** a disease in which phlyctenules or small vesicles are situated in the epithelial layer of the conjunctiva or cornea. **O., Plastic,** ophthalmia characterized chiefly by the deposition upon the conjunctiva of a false membrane; it is also called *Pseudo-membranous Ophthalmia.* **O., Pseudo-membranous.** See *O., Plastic.* **O., Puerperal,** a form occurring in the puerperal state. **O., Purulent,** conjunctivitis with a purulent discharge. **O., Pustular.** See *O., Phlyctenular.* **O. sicca.** The same as *Xerophthalmia.* **O., Spring, *Fruehjahrs-* or *Fruehlings-Catarrh; Phlyctæna pallida;*** a form of conjunctival disease, usually seen in children, characterized by photophobia, stinging pain, considerable mucous secretion, the formation of flat granulations on the conjunctiva, and hypertrophy of this tissue surrounding the limbus of the cornea. It is common in the spring of the year. **O., Sympathetic.** See *Sympathetic.* **O., Tarsal.** See *Blepharitis.* **O. taraxis,** a synonym of *Conjunctivitis.* **O., Varicose,** a form associated with a varicose condition of the veins of the conjunctiva.

Ophthalmiater (*off-thal-me-a'-ter*) [ὀφθαλμός, eye; ἰατρός, a physician]. An oculist or ophthalmologist.

Ophthalmiatric (*off-thal-me-at'-rik*) [ὀφθαλμός, eye; ἴασις, treatment]. Pertaining to the treatment of eye-diseases.

Ophthalmiatrics (*off-thal-me-at'-riks*) [ὀφθαλμός, eye; ἴασις, treatment]. The treatment of eye-diseases.

Ophthalmic (*off-thal'-mik*) [ὀφθαλμός, eye]. Pertaining to the eye. **O. Artery.** See *Arteries, Table of.* **O. Ganglion.** See *Ganglia, Table of.* **O. Migraine,** migraine due to diseased conditions of the eyes. **O. Nerve.** See *Nerves, Table of.* **O. Plexus,** a plexus of sympathetic nerves around the ophthalmic artery. **O. Vein,** the vein returning the blood from the eye; it empties into the sphenoidal sinus.

Ophthalmin (*off-thal'-min*) [ὀφθαλμός, eye]. The name given to the hypothetic contagium of purulent ophthalmia.

Ophthalmist (*off-thal'-mist*) [ὀφθαλμός, eye]. The same as *Ophthalmologist.*

Ophthalmite (*off-thal'-mīt*) [ὀφθαλμός, the eye]. In zoölogy, the eye-bearing stalk of a crustacean; an ommatophore.

Ophthalmitic (*off-thal-mit'-ik*) [ὀφθαλμός, eye; ῖτις, inflammation]. Pertaining to ophthalmitis. Also containing to an ophthalmite.

Ophthalmitis (*off-thal-mī'-tis*) [ὀφθαλμός, eye; ῖτις, inflammation]. Formerly synonymous with ophthalmia, but latterly used as indicating inflammation of some of the deeper tissues of the eye, or restricted to the form *Sympathetic Ophthalmia, q. v.* Consult also, *Panophthalmitis.*

Ophthalmo- (*off-thal'-mo-*) [ὀφθαλμός, eye]. A prefix signifying connection with or relation to the eye. **Ophthalmoblennorrhea.** See *Ophthalmia, Gonorrheal.* **Ophthalmoneuritis,** a peripheral neuritis of the ophthalmic branch of the fifth nerve. In part synonymous with *Herpes zoster ophthalmicus.*

Ophthalmobiotic (*off-thal-mo-bi-ot'-ik*) [ὀφθαλμός, eyeball; βίος, life]. Relating to the physiology and development of the eye.

Ophthalmobrachytes (*off-thal-mo-brak'-it-ēz*) [ὀφθαλμός, eye; βραχύτης, shortness]. Shortness of the ocular axis; also the shortened axis. [Old.]

Ophthalmocace (*off-thal-mok'-as-e*) [ὀφθαλμός, eye; κακός, evil]. Disease of the eye.

Ophthalmocarcinoma (*off-thal'-mo-kar-sin-o'-mah*) [ὀφθαλμός, eye; καρκίνωμα, carcinoma]. Carcinoma of the eye.

Ophthalmocele (*off-thal'-mo-sēl*). See *Staphyloma* and *Exophthalmus.*

Ophthalmocentesis (*off-thal'-mo-sen-tē'-sis*) [ὀφθαλμός, eye; κέντησις, puncture]. Surgical puncture of the eye.

Ophthalmocholosis (*off-thal'-mo-kol-o'-sis*) [ὀφθαλμός, eye; χόλος, bile]. Ophthalmia due to liver-disease. [Old.]

Ophthalmochroites (*off-thal'-mo-kro-ī'-tēz*) [ὀφθαλμός, eye; χρώς, color]. The black coloring-matter of the eye.

Ophthalmocopia (*off-thal'-mo-kō'-pe-ah*) [ὀφθαλμός, eye; κόπος, fatigue]. Fatigue of the visual powers.

Ophthalmodesmitis (*off-thal'-mo-dez-mī'-tis*). Synonym of *Conjunctivitis.*

Ophthalmodesmon (*off-thal'-mo-dez'-mon*) [ὀφθαλμός, eye; δεσμός, bond]. The conjunctiva.

Ophthalmodesmoxerosis (*off-thal'-mo-dez-mo-ze-ro'-sis*) [ὀφθαλμός, eye; δεσμός, bond; ξηρός, dry]. Xerophthalmia, *q. v.*

Ophthalmodiastimeter (*off-thal'-mo-di-as-tim'-et-er*) [ὀφθαλμός, eye; διάστημα, interval; μέτρον, measure]. An instrument for use in discovering the proper adjustment of lenses to the axes of the eyes.

Ophthalmodynamometer (*off-thal'-mo-di-nam-om'-et-er*) [ὀφθαλμός, eye; δύναμις, power; μέτρον, measure]. An instrument for measuring the power of convergence of the eyes.

Ophthalmodynia (*off-thal-mo-din'-e-ah*) [ὀφθαλμός, eye; ὀδύνη, pain]. Any violent pain in the eye not resulting from inflammation.

Ophthalmography (*off-thal-mog'-ra-fe*) [ὀφθαλμός, eye; γράφειν, to write]. Descriptive anatomy of the eye.

Ophthalmohydrorrhea (*off-thal'-mo-hi-dror-ē'-ah*). Synonym of *Ophthalmydrorrhea.*

Ophthalmokopia (*off-thal-mo-kop'-e-ah*). See *Ophthalmocopia.*

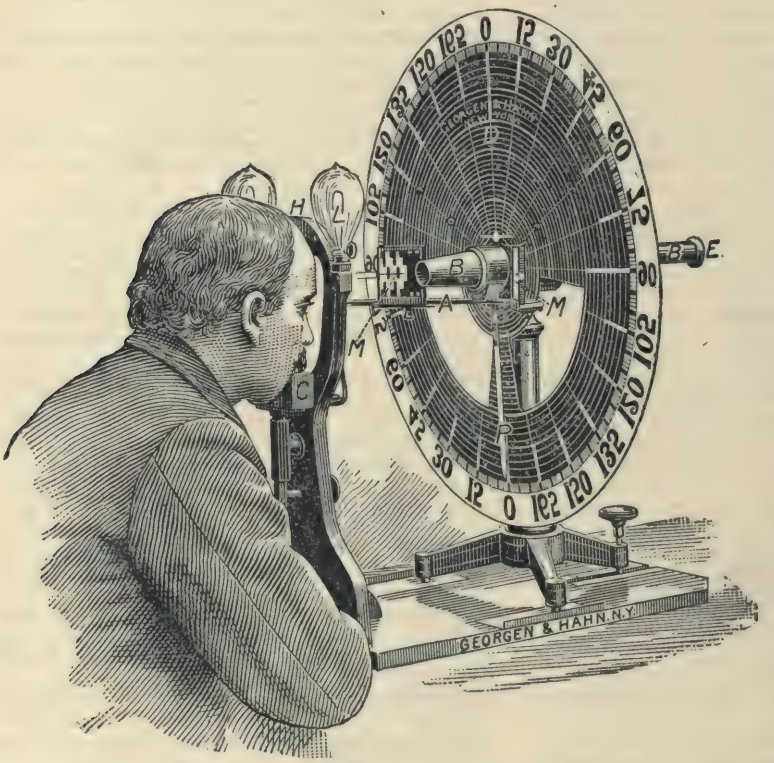
Ophthalmolith (*off-thal'-mo-lith*) [ὀφθαλμός, eye; λίθος, stone]. A calculus of the eye.

Ophthalmologic (*off-thal-mo-loj'-ik*) [ὀφθαλμός, eye; λόγος, science]. Pertaining to *Ophthalmology.*

Ophthalmologist (*off-thal-mol'-o-jist*) [ὀφθαλμός, eye; λόγος, science]. One versed in ophthalmology.

Ophthalmology (*off-thal-mol'-o-je*) [ὀφθαλμός, eye; λόγος, science]. The science of the anatomy and physiology and the diseases of the eye.

Ophthalmolyma (*off-thal'-mo-lī'-mah*) [ὀφθαλμός, eye; λύμη, destruction]. Destruction of the eye.



Ophthalmomacrosis (*off-thal'-mo-mak-ro'-sis*) [ὀφθαλμός, eye; μακρός, large]. Enlargement of the eye.

Ophthalmomalacia (*off-thal'-mo-mal-a'-se-ah*) [ὀφθαλμός, eye; μαλακία, softness]. Abnormal softness of the eye, revealing itself in a diminution of tension.

Ophthalmomelanoma (*off-thal'-mo-mel-an-o'-mah*) [ὀφθαλμός, eye; μέλας, black; ὄμα, tumor]. A melanotic tumor, usually sarcoma, of the eye.

Ophthalmomelanosis (*off-thal'-mo-mel-an-o'-sis*) [ὀφθαλμός, eye; μέλας, black; νόσος, disease]. The formation of an ophthalmomelanoma; also the growth itself.

Ophthalmometer (*off-thal-mom'-et-er*) [*ὀφθαλμός*, eye; *μέτρον*, measure]. 1. An instrument for measuring the capacity of the chambers of the eye. 2. An instrument for measuring refractive errors, especially astigmatism. 3. An instrument for measuring the eye as a whole.

THE OPHTHALMOMETER OF JAVAL AND SCHIÖTZ.

A. The perimeter-bar. B, B. Telescope. C. Chin-rest. D. Disc of radiating lines and concentric circles. E. Eye-piece, at which the observer sits. H. Head-rest. L. Lights. M, M. The mires, or targets. P. Pointer, indicating the axis by the degree numbers on the peripheral border of the disc.

MIRES EXACTLY APPROXIMATED.

MIRES OVERLAPPING ONE DIOPTER.

Ophthalmometry (*off-thal-mom'-et-re*) [*ὀφθαλμός*, eye; *μέτρον*, measure]. The use of the ophthalmometer; mensuration of the eyeball, or of the corneal curves.

Ophthalmomicroscope (*off-thal'-mo-mi'-kro-skōp*) [*ὀφθαλμός*, eye; *μίκρος*, small; *σκοπεῖν*, to view]. An instrument for examining the interior of the eye.

Ophthalmomyces (*off-thal'-mom'-is-ēz*) [*ὀφθαλμός*, eye; *μύκης*, fungus]. Fungous disease of the eye.

Ophthalmomyitis (*off-thal'-mo-mi-i'-tis*) [*ὀφθαλμός*, eye; *μῦς*, muscle; *ιτις*, inflammation]. Inflammation of the ocular muscles.

Ophthalmomyotomy (*off-thal-mo-mi-ot'-o-me*) [*ὀφθαλμός*, eye; *μῦς*, muscle; *τομή*, a cutting]. Division of the muscles of the eye.

Ophthalmoncus (*off-thal-mong'-kus*) [*ὀφθαλμός*, eye; *ὄγκος*, tumor]. A tumor or swelling of the eye.

Ophthalmoneuritis (*off-thal'-mo-nu-ri'-tis*) [*ὀφθαλμός* eye; *νεῦρον*, nerve; *ιτις* inflammation]. Inflammation of the ophthalmic nerve.

Ophthalmoneuromenin (*off-thal'-mo-nu-ro-men inks*). Synonym of *Retina*.

Ophthalmoneurymen (*off-thal'-mo-nu-ri'-men*) Synonym of *Retina*.

Ophthalmonosology (*off-thal'-mo-no-zol'-o-*) [*ὀφθαλμός*, eye; *νόσος*, disease; *λόγος*, science] The study of the diseases of the eye.

Ophthalmoparacentesis (*off-thal'-mo-par-as-en-te'-sis*). Synonym of *Ophthalmocentesis*.

Ophthalmoparalysis (*off-thal'-mo-par-al'-is-is*) Synonym of *Ophthalmoplegia*.

Ophthalmoperipheritis (*off-thal'-mo-per-if-er-i-tis*) [*ὀφθαλμός*, eye; *περιφέρεια*, the periphery; *ιτις* inflammation]. Inflammation of the tissue around the eyeball.

Ophthalmophantoma (*off-thal'-mo-fan-to'-mah*) [*ὀφθαλμός*, eye; *φάντασμα* phantom]. A model mask for practising operations on the eye.

Ophthalmophasmatoscopy (*off-thal'-mo-fas-mat-os'-ko-pe*) [*ὀφθαλμός* eye; *φαντάζειν*, to make to happen; *σκοπεῖν*, view]. Ophthalmoscopy and spectroscopic examination of the interior of an eye.

Ophthalmophleboton (*off-thal'-mo-fle-bot'-o-*) [*ὀφθαλμός*, eye; *φλέψ*, vein; *τέμνειν*, to cut] Blood-letting from a conjunctival vein.

Ophthalmophore (*off-thal'-mo-for*) [*ὀφθαλμός*, the eye; *φόρος*, bear]. In biology, the eye-stalk or peduncle of a gasteropod; an ommatophore.

Ophthalmophorium (*off-thal-mo-fo'-re-um*) [*ὀφθαλμός* eye; *φόρος*, bear: *pl.*, *Ophthalmophoria*]. Same as *Ophthalmophore*.

Ophthalmophorous (*off-thal-mof'-or-us*) [*ὀφθαλμός* eye; *φόρος*, bear]. In biology, supporting the eye.

Ophthalmophtharsis (*off-thal-mo-tars'-is*) [*ὀφθαλμός* eye; *φθάρσις*, corruption]. Destructive degeneration of the eye. [Old.]

Ophthalmophthisis (*off-thal-moff'-this-is*). See *Phthisis bulbi*; also *Ophthalmomalacia*.

Ophthalmophyma (*off-thal-mo-fi'-mah*) [*ὀφθαλμός* eye; *φῦμα*, growth]. Swelling of the eyeball.

Ophthalmoplastic (*off-thal-mo-plas'-tik*) [*ὀφθαλμός* *πλάσσειν*, to mold]. Pertaining to ophthalmoplasty

Ophthalmoplasty (*off-thal'-mo-plas-te*) [*ὀφθαλμός*, eye; *πλάσσειν*, to mold]. Plastic surgery of the eye or accessory parts.

Ophthalmoplegia (*off-thal-mo-ple'-je-ah*) [*ὀφθαλμός*, eye; *πληγή*, stroke]. Paralysis of the ocular muscles. **O. externa,** paralysis of the external muscles. **O. interna,** paralysis of the internal muscles, or combined iridoplegia and cycloplegia. **O., Nuclear,** ophthalmoplegia due to a lesion of the nuclei of origin of the motor nerves of the eyeball. **O., Partial,** a form in which only some of the muscles are paralyzed. **O., Progressive,** a form in which all of the muscles of both eyes gradually become paralyzed. **O., Total,** that form involving the iris and ciliary muscle as well as the external muscles of the eyeball.

Ophthalmoplegic (*off-thal-mo-ple'-jik*) [*ὀφθαλμός*, eye; *πλαγή*, stroke]. Pertaining to ophthalmoplegia.

Ophthalmoponia (*off-thal-mo-po'-ne-ah*) [*ὀφθαλμός*, eye; *πόνος*, pain]. Pain in the eye.

Ophthalmoprosopsis (*off-thal'-mo-pros-ops'-is*) [*ὀφθαλμός*, eye; *πρόσοψις*, appearance]. The power of accommodation.

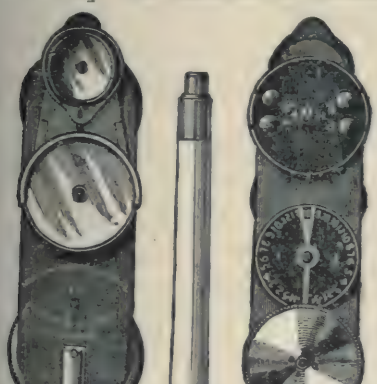
Ophthalmoprostatometer (*off-thal'-mo-pros-tat-om'-et-er*) [*ὀφθαλμός*, eye; *προιστάναι*, to stand before; *μέτρον*, measure]. An instrument for measuring the degree of protrusion of the eyes.

Ophthalmoptoma (*off-thal-mop-to'-mah*) [*ὀφθαλμός*, eye; *πτῶμα*, fall]. Exophthalmos; protrusion of the eyeball.

Ophthalmoptosis (*off-thal-mop-to'-sis*) [*ὀφθαλμός*, eye; *πτῶσις*, fall]. The same as *Ophthalmoptoma*.

Ophthalmopyorrhea (*off-thal'-mo-pi-or-e'-ah*) [*ὀφθαλμός*, eye; *πύον*, pus; *ῥοία*, a flow]. A discharge of pus from the eye.

Ophthalmopyra (*off-thal'-mo-pi'-rah*) [*ὀφθαλμός*, eye; *πῦρ*, fire]. An epidemic form of ophthalmia.



Ophthalmorrhagia (*off-thal-mor-a'-je-ah*) [*ὀφθαλμός*, eye; *ῥηγνύναι*, to burst forth]. A hemorrhage from the eye.

Ophthalmorrhea (*off-thal-mor-e'-ah*) [*ὀφθαλμός*, eye; *ῥοία*, a flow]. A watery or sanguineous discharge from the eye.

Ophthalmorrhexis (*off-thal-mor-eks'-is*) [*ὀφθαλμός*, eye; *ῥῆξις*, rupture]. Rupture of the eyeball.

Ophthalmos (*off'-thal-mos*) [*ὀφθαλμός*, eye]. The eye.

Ophthalmoscope (*off-thal'-mo-skōp*) [*ὀφθαλμός*, eye; *σκοπεῖν*, to see]. An instrument for examining the

MORTON'S OPHTHALMOSCOPE.

fundus or interior of the eye. It consists essentially of a mirror with a hole in it, through which the observer looks, the concavity of the eye being illuminated by light reflected from the mirror into the eye and seen by means of the rays reflected from the eye-ground back through the hole in the mirror. The ophthalmoscope is fitted with lenses of different powers that may be revolved in front of the observing eye, and these neutralize the ametropia of either eye, thus rendering the details of the fundus oculi clear. The **autophthalmoscope** is so constructed that one may observe the details of his own eye-ground.

Ophthalmoscopic (*off-thal-mo-skop'-ik*) [*ὀφθαλμός*, eye; *σκοπεῖν*, to view]. Pertaining to the ophthalmoscope, or its use.

Ophthalmoscopist (*off-thal-mos'-ko-pist*) [*ὀφθαλμός*, eye; *σκοπεῖν*, to view]. One versed in ophthalmoscopy.

Ophthalmoscopy (*of-thal-mos'-ko-pe*) [*ὀφθαλμός*, eye; *σκοπεῖν*, to observe]. The examination of the interior of the eye by means of the ophthalmoscope. **O., Direct,** the method of the erect or upright image, the observer's eye and the ophthalmoscope being brought close to the eye of the patient. **O., Indirect,** the method of the inverted image; the observer's eye is placed about 16 inches from that of the patient and a 20 D. biconvex lens is held about two inches in front of the observed eye, thereby forming an aërial inverted image of the fundus. **O., Medical,** ophthalmoscopy as an aid to internal medicine in the diagnosis of such diseases as manifest themselves in changes in the fundus of the eye; such diseases are brain-lesions, giving rise to pressure, Bright's disease, syphilis, and leukemia. **O., Metric,** ophthalmoscopy for purposes of measuring refraction.

Ophthalmospintherism (*off-thal-mo-spin'-ther-izm*) [*ὀφθαλμός*, eye; *σπινθήρ*, spark]. A condition of the eye in which luminous sparks are seen.

Ophthalmostasis (*off-thal-mos'-tas-is*) [*ὀφθαλμός*, eye; *στάσις*, a stopping]. The fixation of the eye in any position during a surgical operation upon it.

Ophthalmostat (*off-thal'-mo-stat*) [*ὀφθαλμός*, eye; *στατός*, fixed]. An instrument used in ophthalmostasis. See the preferable word, *Blepharostat*.

Ophthalmostatometer (*off-thal'-mo-stat-om'-et-er*) [*ὀφθαλμός*, eye; *ἱστάναι*, to cause to stand; *μέτρον*, measure]. An instrument for determining the position of the eyes.

Ophthalmostatometry (*off-thal'-mo-stat-om'-et-re*) [*ὀφθαλμός*, eye; *στα-*, root of *ἱστάναι*, to cause to stand; *μέτρον*, measure]. The measurement of the position of the eyes.

Ophthalmosteresis (*off-thal'-mo-ster-e'-sis*) [*ὀφθαλμός*, eye; *στέρησις*, deprival]. Deprival, or absence, of the eyes.

Ophthalmosynchysis (*off-thal'-mo-sin'-kis-is*) [*ὀφθαλμός*, eye; *σύγχυσις*, a mixing together]. Effusion into the interior of the eye.

Ophthalmotheca (*off-thal'-mo-the'-kah*) [*ὀφθαλμός*, the eye; *θήκη*, a case: *pl.*, *Ophthalmothecæ*]. In biology, that part of the integument of a pupa which covers the compound eye.

Ophthalmotherapeutics (*off-thal'-mo-ther-ap-u'-tiks*) [*ὀφθαλμός*, eye; *θεραπεία*, treatment]. Medical treatment of diseases of the eye.

Ophthalmotherapy (*off-thal-mo-ther'-ap-e*) [*ὀφθαλμός*, eye; *θεραπεία*, treatment]. The treatment of ophthalmic diseases.

Ophthalmotomy (*off-thal-mot'-o-me*) [*ὀφθαλμός*, eye; *τομή*, a cutting]. The dissection, or incision of the eye.

Ophthalmotonometer (*off-thal'-mo-ton-om'-et-er*) [*ὀφθαλμός*, eye; *τόνος*, tone; *μέτρον*, measure]. An instrument for measuring intraocular tension.

Ophthalmotonometry (*off-thal'-mo-ton-om'-et-re*) [*ὀφθαλμός*, eye; *τόνος*, tone; *μέτρον*, measure]. Measurement of the intraocular tension.

Ophthalmotrope (*off-thal'-mo-trōp*) [*ὀφθαλμός*, eye; *τρόπος*, a turn]. An instrument intended for the demonstration of the direction and the position that the eye takes under the influence of each of its muscles, and the position of the false image in the case of paralysis of a given muscle.

Ophthalmotropometer (*off-thal'-mo-trop-om'-et-er*) [*ὀφθαλμός*, eye; *τροπή*, turning; *μέτρον*, measure]. An instrument for measuring the movement of the eyeballs.

Ophthalmotropometry (*off-thal'-mo-tro-pom'-et-re*) [*ὀφθαλμός*, eye; *τροπή*, turning; *μέτρον*, measure]. The measurement of the movement of the eyeballs.

Ophthalmotyphus (*off-thal'-mo-ti'-fus*) [*ὀφθαλμός*, eye; *τῦφος*, stupor]. A virulent and epidemic form of ophthalmia.

Ophthalmoxerosis (*off-thal'-mo-ze-ro'-sis*). See *Xerophthalmia*.

Ophthalmoxysis (*off-thal'-moks-i'-sis*) [*ὀφθαλμός*, eye; *ξῦσις*, a scraping]. The treatment by scraping or scarification, sometimes employed in certain affections of the conjunctiva.

Ophthalmoxyster (*off-thal-moks-is'-ter*). The same as *Ophthalmoxystrum*.

Ophthalmoxystrum (*off-thal-moks-is'-trum*) [*ὀφθαλμός*, eye; *ξύστρα*, scraper]. An instrument for scraping or scarifying the conjunctiva.

Ophthalmozoa (*off-thal-mo-zo'-ah*) [*ὀφθαλμός*, eye; *ζῷον*, animal]. 1. Entozoa parasitic upon the eye or its appendages. 2. One of Oken's five zoölogic divisions.

Ophthalmula (*off-thal-mu'-lah*) [*ὀφθαλμός*, eye; *ὕλη*, matter]. A scar of the eye.

Ophthalmuria (*off-thal-mu'-re-ah*) [*ὀφθαλμός*, eye; *οὖρον*, urine]. A hypothetic metastasis of urine to the eyes.

Ophthalmus (*off-thal'-mus*). See *Ophthalmos*.

Ophthalmy (*off-thal'-me*). The same as *Ophthalmia*.

Ophthalmyalus (*off-thal-mi'-al-us*). Synonym of *Vitreous Humor*.

Ophthalmydrorrhea (*off-thal-mid-ror-e'-ah*) [*ὀφθαλμός*, eye; *ὑδωρ*, water; *ῥοία*, flow]. A watery discharge from the eyes.

Ophthymen (*off-thi'-men*) [*ὀφθαλμός*, eye; *ὑμήν*, membrane]. The retina.

-opia (*-o'-pe-ah*). See *-ops*.

Opiane (*o'-pe-ān*). Same as *Narcotin*.

Opianic (*o-pe-an'-ik*) [*ὄπιον*, opium]. Derived from opium. **O. Acid.** See *Acid*.

Opianin (*o-pe-an'-in*) [*ὄπιον*, opium], $C_{66}H_{72}N_3O_2$. An alkaloid obtained from opium by precipitation with ammonia, and extracting the precipitate with alcohol.

Opianyl (*o'-pe-an-il*) [*ὄπιον*, poppy-juice; *ὕλη*, matter], $C_{10}H_{10}O_4$. A synonym of *Meconin*.

Opiate (*o'-pe-āt*) [*ὄπιον*, poppy-juice]. A preparation of opium.

Opiokapnism (*o-pe-o-kap'-nizm*) [*ὄπιον*, opium; *καπνός*, smoke]. Opium-smoking.

Opiologia (*o-pe-ol-o'-je-ah*) [*ὄπιον*, opium; *λέγειν*, to gather]. The gathering of opium.

Opiology (*o-pe-ol'-o-je*) [*ὄπιον*, opium; *λόγος*, science]. The pharmacology of opium.

Opionin (*o-pe-o'-nin*) [*ὄπιον*, poppy-juice]. A non-nitrogenous crystalline substance extracted from Smyrna opium.

Opiophagia (*o-pe-off-a'-je-ah*). Synonym of *Opiophagism*.

Opiophagism (*o-pe-off'-aj-ism*), **Opiophagy** (*o-pe-off'-aj-e*) [*ὄπιον*, opium; *φαγεῖν*, to eat]. Opium-eating.

Opiophile (*o'-pe-o-fil*) [*ὄπιον*, opium; *φιλεῖν*, to love]. A lover, or eater, of opium; an opium-smoker.

Opisthantrus (*o-pis-than'-trus*) [*ὄπισθεν*, behind; *ἄντρον*, a cave: *pl.*, *Opisthantri*]. Lissauer's term for a skull in which the vertical line dropped from the most prominent part of the torus frontalis to the radius fixus is from 1 to 6 mm. behind the vertical line from the nasion to the radius fixus.

Opisthen (*o-pis'-then*) [*ὄπισθεν*, behind]. In biology, the hind part of the body of an animal.

Opisthenar (*o-pis'-the-nar*) [*ὀπισθέναρ*, from *ὄπισθεν*, behind; *θέναρ*, the palm]. The back of the hand. Cf. *Thenar*.

Opisthion (*o-pis'-the-on*) [*ὀπίσθιος*, hinder]. See *Craniometric Points*.

Opisthobregmus (*o-pis-tho-breg'-mus*) [*ὄπισθεν*, behind; *βρεγμός*, the bregma]. Lissauer's term for a skull in which the angle formed between the radius fixus and the line joining the hormion and the bregma is between 55.5° and 68°.

Opisthocelous (*o-pis-tho-se'-lus*) [*ὄπισθεν*, behind; *κοῖλος*, hollow]. Concave anteriorly and convex posteriorly, as the centrum of a vertebra.

Opisthocephalon (*o-pis-tho-sef'-al-on*) [*ὄπισθεν*, behind; *κεφαλή*, the head]. A synonym of *Occiput*.

Opisthochasmus (*o-pis-tho-kaz'-mus*) [*ὄπισθεν*, behind; *χάσμα*, chasm]. Lissauer's term for a skull in which the angle between the radius fixus and the line joining the basion and the staphylion is between 13° and 26°.

Opisthocranion (*o-pis-tho-kra'-ne-on*) [*ὄπισθεν*, behind; *κρανίον*, the skull]. A synonym of the occipital bone.

Opisthodont (*o-pis'-tho-dont*) [*ὄπισθεν*, behind; *ὀδούς*, tooth]. In biology, possessing back teeth only.

Opisthogastric (*o-pis-tho-gas'-trik*) [*ὄπισθεν*, behind; *γαστήρ*, the stomach]. Situated back of the stomach.

Opisthoglyphic (*o-pis-tho-glif'-ik*) [*ὄπισθεν*, behind; *γλύφειν*, to curve]. Grooved posteriorly, *e. g.*, certain teeth.

Opisthognathism (*o-pis-thog'-nāth-izm*) [*ὄπισθεν*, behind; *γνάθος*, jaw]. Recession of the lower jaw.

Opisthognathous (*op-is-thog'-na-thus*) [*ὄπισθεν*, behind; *γνάθος*, jaw]. In biology, having retracting jaws; the antonym of *Prognathous*.

Opisthokyphosis (*o-pis-tho-ki-fo'-sis*) [*ὄπισθεν*, backward; *κύφωσις*, bending]. Curvature of the spinal column, the convexity being forward.

Opisthomelophoros (*o-pis-tho-mel-off'-or-os*) [*ὀπισθεν*, hinder; *μέλος*, limb; *φορεῖν*, to bear]. A monstrosity with limbs projecting from the back.

Opisthophalacrosis (*o-pis-tho-fal-ak-ro'-sis*) [*ὄπισθεν*, behind; *φαλάκρωσις*, baldness]. Baldness of the back of the head.

Opisthoporia (*o-pis-tho-po-ri'-ah*) [*ὄπισθεν*, backward; *πορεία*, going]. Involuntary backward walking in an attempt to go forward.

Opisthorrhexis (*o-pis-thor-eks'-is*) [*ὄπισθεν*, behind; *ῥῆξις*, a rupture]. A tearing backward.

Opisthosynechia (*o-pis-tho-sin-ek'-e-ah*). Synonym of *Synechia, Posterior*.

Opisthothenar (*o-pis-thoth'-en-ar*). The *Erector spinæ* muscle. See *Muscles, Table of*.

Opisthotic (*op-is-thot'-ik*) [*ὄπισθεν*, behind; *οὖς*, ear]. In biology, applied to parts of the ear-apparatus, posterior in position.

Opisthotonic (*o-pis-tho-ton'-ik*) [*ὄπισθεν*, behind; *τόνος*, tone]. Pertaining to opisthotonos.

Opisthotonoid (*o-pis-thot'-on-oid*) [*ὄπισθεν*, behind; *τόνος*, tone; *εἶδος*, like]. Resembling opisthotonos.

Opisthotonos (*o-pis-thot'-on-os*) [*ὄπισθεν*, behind; *τόνος*, tone]. A tetanic condition of the muscles, especially of the back, whereby there is an arch-

backward of the trunk, which thus rests upon the head and heels. This condition is seen in tetanus, strychnin-poisoning, hydrophobia, hysteria, and other tetanic conditions.

Opisthural (*o-pis'-thu-ral*) [ὀπισθεν, behind; οὐρά, the tail]. Of, or pertaining to, the opisthure.

Opisthure (*o-pis'-thūr*) [ὀπισθεν, behind; οὐρά, tail]. In biology, the posterior termination of the caudal axis of certain fishes or their embryos.

Opium (*o'-pe um*) [ὀπιον, poppy-juice]. The inspissated juice of the unripe capsules of the *Papaver somniferum*, or poppy, obtained by incising the capsules and collecting the milky juice which is exuded. Most of the opium in the American market comes from Smyrna, Asia Minor. Opium is a very complex substance and contains, besides morphin and codein, a large number of less important alkaloids—narcein, narcotin, thebain, laudanin, papaverin, porphyroxin, cryptopin, meconin, opianin, paramorphin, and meconic, thebolactic, and sulphuric acids, in addition to a variety of extractives. Good opium should yield at least 9 per cent. of morphin. The dominant physiologic action of opium is the relief of pain. It also causes slowing of the respiration and pulse, contraction of the pupils, diaphoresis, constipation; more rarely nausea and vomiting, headache, itching of the skin, erythema; occasionally instead of sleep, wakefulness, delirium, even convulsions. In toxic doses it produces sleep followed by deep coma, with very slow respirations, and pin-point pupils; death is due to paralysis of the centers of respiration. Therapeutically, opium is a most useful drug; it induces sleep, allays excitement, relieves pain and irritation, checks vomiting and diarrhea, and is sudorific. Small doses stimulate; large doses depress. **O., Acetum,** vinegar of opium, "*black drop*," prepared with nutmeg, sugar, and dilute acetic acid. Opium-strength 10 per cent. Dose ♏v–xx **O., Confectio.** (*B. P.*) Dose gr. v–xx. **O. denarcotisatum,** powdered opium freed from substances soluble in ether; 14 per cent. of morphin and a varying per cent. of narcotin. Dose gr. ss–ij. **O., Emplastrum,** extract of opium 6, Burgundy pitch, 18, lead-plaster 76 parts. **O., Enema** (*B. P.*), contains ʒss of the tincture of opium and ℥ij of starch-mucilage. **O. et Glycyrrhizæ, Troch.,** each contains gr. $\frac{1}{15}$ of opium. Dose j–iv. **O. et Ipecacuanhæ, Pulv.,** Dover's powder, contains ipecac 10, opium 10, sugar of milk 80 parts. Dose gr. v–xv. **O. et Ipecacuanhæ, Tinct.,** contains deodorized tincture of opium 100 parts evaporated to 85, fl. ext. ipecac 10, dilute alcohol q. s. ad 100. Dose ♏v–xv. **O., Ext.,** an aqueous extract containing glycerin. Dose gr. ¼–j. **O., Liniment** (*B. P.*), contains tinct. opii and soap-liniment. **O., Ext., Liq.** (*B. P.*) Dose ♏iv–xx. **O., Liq., Comp.,** compound solution of opium, unof., strength 10 per cent. Dose ♏v–xx. **O., Pil.,** each contains 1 gr. opium with ¼ gr. soap. Dose j–iij. **O., Pulv.,** powdered opium; should contain 12–16 per cent. of morphin. Dose gr. ss–iij. **O., Pulv., Comp.** (*B. P.*) Dose gr. ij–v. **O., Tinct., Ammon.** (*B. P.*) Dose ʒss-j. **O., Tinct., Camph.** (*Tinct. camphor. comp., B. P.*), *camphorated tincture of opium, paregoric;* contains opium, benzoic acid, camphor, oil of anise āā 4, glycerin 40, dil. alcohol ad 1000 parts. Dose, for an infant, gtt. v–xx; for an adult, ʒj–iv. **O., Tinct., Comp.,** *Squibb's diarrhea-mixture,* contains laudanum, spt. of camphor, and tinct. capsicum, āā ℥j, pure chloroform ʒiij, stronger alcohol q. s. ad ℥v. Dose gtt. x–ʒj. **O., Tinct., Deodorata,** *McMunn's elixir,* an aqueous extract shaken with ether, the residue being dissolved in water and alcohol. Opium-strength 10 per cent. Dose ♏v–xx. **O., Tinct.,** *laudanum,* contains 10 per cent. of opium. Dose ♏v–xx. **O., Trochis.** (*B. P.*) Each contains gr. $\frac{1}{10}$ of opium. Dose j–iv. **O., Vinum,** *wine of opium, Sydenham's laudanum,* a vinous tincture, with cinnamon and cloves; opium-strength 10 per cent. Dose ♏v–xx. **O.-eater,** one addicted to the use of opium as a stimulant. **O.-eating,** the habitual use of opium as a stimulant and narcotic. **O.-habit.** See *Morphiomania.* **O.-liniment,** an anodyne liniment made of soap-liniment and laudanum. **O.-plaster,** the *Emplastrum opii* of the U. S. Pharmacopeia. **O.-smoking,** the inhalation of the fumes of burning opium for the purpose of experiencing the exhilarating effects so produced.

Opiumism (*o'-pe-um-izm*) [ὀπιον, poppy-juice]. The symptoms of chronic opium-poisoning.

Opobalsamum (*op-o-bawl-sam'-um*) [ὀπός, juice; βάλσαμον, balsam]. Balsam of Mecca, produced by the tree *Amyris gileadensis.*

Opocalpason, Opocalpasum (*op-o-kal'-pas-on, op-o-kal'-pas-um*) [ὀπός, juice; κάλπασος, a plant-name]. A variety of gum-arabic.

Opocephalus (*op-o-sef'-al-us*) [ὠψ, ὠπός, the eye; κεφαλή, head]. A variety of single autositic monsters, of the species otocephalus, in which there is synopsia, with the characteristics of otocephalus, but with the absence of both mouth and proboscis.

Opodeldoc (*op-o-del'-dok*) [origin obscure]. Soap-liniment. See *Sapo.*

Opodidymus (*op-o-did'-im-us*) [ὠψ, eye; δίδυμος, twin]. A monosomic dual monstrosity with the heads united behind, but with two faces; the eyes vary in number.

Opodymus (*o-pod'-im-us*) [ὠψ, eye; δίδυμος, twin]. A term for a monstrosity with a single body and skull, but with two distinct faces.

Opopanax (*o-pop'-an-aks*) [ὀπός, juice; πάναξ, an all-healing plant]. 1. A genus of umbelliferous plants. 2. The gum-resin afforded by *O. chironium,* a plant of the Mediterranean region; it is used like asafetida, but is inferior to it. Dose, 10–30 gr. Unof.

Opotomocatheter (*o-pot-o-mok-ath'-et-er*) [ὀπή, opening; τομή, a cutting; καθετήρ, catheter]. An elastic catheter with a stylet.

Oppilation (*op-il-a'-shun*) [*oppilatio,* closure]. Closure; constipation.

Oppilative (*op'-il-a-tiv*) [*oppilatis,* closure]. 1. Obstruction; closing the pores; causing constipation. 2. A constipating agent or remedy.

Opponens (*op-o'-nenz*) [*ob,* against; *ponere,* to place]. Opposing; a descriptive term applied to certain muscles that bring the thumb and fingers in juxtaposition.

Opposite (*op'-o-zit*) [*oppositus,* placed against]. 1. Opposed to. 2. As a noun, the similar part in the remaining half of the body; platytrope; lateral homologue; fellow of the remaining side; and in general, whether referring to the names of parts or to terms of position and direction, the opposite is either member of a symmetrically placed pair, as the right hand is the opposite of the left, the term ventral of dorsal, lateral of mesal, afferent of efferent, etc. **O. Standing,** in *massage,* leaning forward and resting the elbows or forearm on some object at about the level of the nipple.

Oppositifolius (*op-oz-it-if-o'-le-us*) [*oppositus,* opposite; *folium,* leaf]. In biology, situated opposite a leaf.

Oppositipetalous (*op-oz-it-ip-et'-al-us*) [*oppositus,* opposite; πέταλον, a leaf]. In biology, placed opposite a petal.

Oppositipinnate (*op-oz-it-ip-in'-āt*) [*oppositus,* opposite; *pinna,* a feather]. In biology, applied to a pinnate leaf in which the folioles are opposite to each other.

Oppositisepalous (*op-oz-it-is-ep'-al-us*) [*oppositus*, opposite; *sepalum*, a sepal]. In biology, placed opposite a sepal.

Oppression (*op-resh'-un*) [*oppressio; opprimere*, to bear against]. Any sensation of pressure or weight upon any part, especially the chest.

Oprescu and Babes, Bacillus of. See *Bacteria, Synonymatic Table of.*

-ops, -opsia, -optic (*-ops, -ops'-e-ah, -op'-tik*) [ὤψ, eye]. Variant forms of a suffix denoting connection with or relation to the eye.

Opsialgia (*op-se-al'-je-ah*) [ὤψ, face; ἄλγος, pain]. Neuralgia of the face.

Opsigonous (*op-sig'-on-us*) [ὀψέ, late; γίγνεσθαι, to be born]. Developing late.

Opsiodont (*op'-se-o-dont*) [ὄψις, eye; ὀδούς, tooth]. An eye-tooth.

Opsiometer (*op-se-om'-et-er*) [ὄψσις, sight; μέτρον, measure]. The same as *Optometer*.

Opsionosis (*op-se-on'-o-sis*) [ὄψις, sight; νόσος, disease]. A disease of the eye, or of vision.

Opsitocia (*op-sit-o'-ke-ah*) [ὀψέ, late; τόκος, birth]. Abnormally long pregnancy.

Opsomania (*op-so-ma'-ne-ah*) [ὄψον, dainty food; μανία, mania]. Insane desire for dainty food, or for some special food.

Opsomaniac (*op-so-ma'-ne-ak*) [ὄψον, dainty food; μανία, mania]. One affected with opsomania.

Opsophagia (*op-so-fa'-je-ah*) [ὄψον, dainty food; φαγεῖν, to eat]. Morbid daintiness in respect of food.

Optactin (*op-tak'-tin*) [ὀπτός, visible; ἀκτις, ray]. The visual axis.

Optasioscopy (*op-taz-e-os'-ko-pe*) [ὀπτασία, a vision; σκοπεῖν, to view]. The testing of retinal perception without the action of light, but by pressure or electricity, subjective sensations of light being produced.

Optic, Optical (*op'-tik, op'-tik-al*) [ὀπτικός, from ὀπᾶν, to see]. Pertaining to vision or its organ, or to the science of optics. **O. Angle.** See *Angles, Table of.* **O. Atrophy,** atrophy of the optic nerve. See *Atrophy.* **O. Axis,** the axis of the eye. **O. Center,** the point in the main axis of the crystalline lens at which the rays of light meet. Also applied to the nervous center concerned in the visual function. **O. Chiasm.** See *Commissure, Optic.* **O. Commissure.** See *Commissure.* **O. Cup,** the concave area formed by the involution of the distal extremity of the primary optic vesicle. **O. Disc.** See *Disc.* **O. Foramen.** See *Foramina, Table of.* **O. Groove,** the groove on the sphenoid bone for the optic chiasm. See *Groove.* **O. Lobes,** the corpora quadrigemina. **O. Nerve.** See *Nerves.* **O. Neuritis.** See *Papillitis.* **O. Papilla.** See *Disc, Optic.* **O. Radiations,** the term given by Gratiolet to the large fasciculus of nerve-fibers joining the corona radiata of the optic thalamus and the occipital lobe of the cerebrum. **O. Section.** See *Section.* **O. Stalk,** a soft process on the head of molluscs supporting an eye; an ommatophore. **O. Thalamus.** See *Thalamus.* **O. Tract.** See *Tract.* **O. Vesicle,** in embryology, a diverticulum from each side of the primary anterior vesicle, which forms the basis of the future eye.

Optically (*op'-tik-al-e*) [ὀπτικός, from ὀπᾶν, to see]. In accordance with the science of optics; by optic means. **O. Active,** a qualification applied to many carbon compounds, liquid and solid, capable of rotating the plane of polarized light.

Optician (*op-tish'-an*) [ὀπτικός, from ὀπᾶν, to see]. A maker of optic instruments.

Opticist (*op'-tis-ist*) [ὀπτικός, from ὀπᾶν, to see]. One skilled in optics.

Opticociliary (*op-tik-o-sil'-e-a-re*) [ὀπτικός, from ὀπᾶν, to see; *cilium*, hair]. Pertaining to the optic and ciliary nerves.

Opticocinerea (*op-tik-o-sin-e'-re-ah*) [ὀπτικός, from ὀπᾶν, to see; *cinereus*, resembling ashes]. The gray matter of the optic lobes.

Opticon (*op'-tik-on*) [ὀπτικός, seeing]. In biology, ganglionic swelling in optic nerve of insects. (*Hickson.*

Opticopupillary (*op-tik-o-pu'-pil-a-re*) [ὀπτικός, from ὀπαν, to see; *pupilla*, pupil]. Relating to the pupil and the optic nerve.

Optics (*op'-tiks*) [ὀπτικός, from ὀπᾶν, to see]. That branch of physics treating of the laws of light, its refraction and reflection, and of its relation to vision. See *Dioptrics.*

Optimism (*op'-tim-izm*) [*optimus*, best]. Delusional exaltation; delirium of grandeur; amenomania.

Optimum (*op'-tim-um*) [*optimus*, best]. In biology, that temperature at which vital processes are carried on with the greatest activity. Midway between the minimum, or lowest endurable, and maximum, or highest endurable, temperatures.

Optocele (*op'-to-sēl*). See *Paraqueduct.*

Optoeidometer (*op-to-i-dom'-et-er*) [ὀπτικός, seeing; εἶδος, like; μέτρον, a measure]. An instrument for testing the acuity of vision and the refraction of the eye.

Optogram (*op'-to-gram*) [ὀπτός, visible; γράφειν, to write]. A faint image stamped on the retina for a brief period after death, believed to be that of the last object seen before death.

Optograph (*op'-to-graf*). See *Optogram.*

Optomeninx (*op-to-men'-inks*). Synonym of *Retina.*

Optometer (*op-tom'-et-er*) [ὀπτός, visible; μέτρον, measure]. An instrument for facilitating the measurement of the refraction of the eye.

Optometry (*op-tom'-et-re*) [ὀπτός, visible; μέτρον, measure]. Measurement of the visual powers.

Optoscope (*op'-to-skōp*) [ὀπτός, seen; σκοπεῖν, to inspect]. An instrument for testing unilateral amblyopia.

Optostriate (*op-to-stri'-āt*) [ὀπτός, visible; *striatum*, striped]. Pertaining to the optic thalami and the corpora striata. **O. Body,** a thalamus and a striatum considered as forming a unit.

Optotype (*op'-to-tīp*) [ὀπτός, visible; τύπος, type]. A test-type used in testing the acuity of vision.

Opuntia (*o-pun'-te-ah*) [*opuntius*, relating to *Opus*, a town of Greece]. Prickly pear; a genus of cactaceous plants represented by numerous species, many of which, as *O. reticulata* and *O. tuna*, have slight medicinal properties, the former being anthelmintic, purgative, and locally sedative; the latter has been used for palpitation of the heart. Unof.

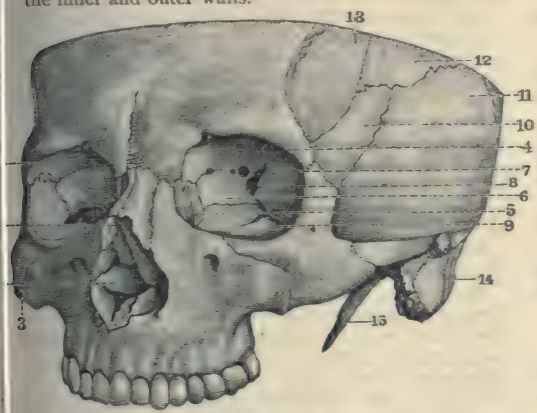
Ora (*o'-rah*) [L.]. Margin. **O. serrata,** the serrated endings of the zonule of Zinn, or ligament of the lens, and the retina.

Orad (*o'-rad*) [*os, oris*, mouth]. Toward the mouth, or the oral region.

Oral (*o'-ral*) [*os, oris*, the mouth]. In biology, situated on the same side as the mouth; actinal; opposed to aboral, abortinal, anal. **O. Catarrh.** Synonym of *Stomatitis catarrhalis.* **O. Whiff.** See *Whiff.*

Orange (*or'-anj*). See *Aurantium* and *Pigments, Conspectus of.* **O. Colors.** See *Pigments, Conspectus.* **O.-grass,** a small North American plant, *Hypericum sarothra;* pineweed; a popular remedy for colds and catarrhs. Unof. **O. Minium.** Same as *Minium.* **O. Ocher.** Same as *Ocher.* **O.-peas:** 1. The seed of the orange dried and used for issue-peas. 2. Small unripe dried oranges, used in the flavoring of liqueurs. **O. Sarcina.** See *Sarcina.* **O.-skin,** a yellowish tinge of the skin observed in newly-born infants.

Orangeade (*or-anj-ād'*) [ME., *orenge*, orange]. A drink made of orange-juice and sweetened water.



Orarians (*or-ar'-e-anz*) [*orarius*, of, or belonging to, the coast]. In ethnology, a collective term proposed by Dall for the *Aleuts* and people of *Innuit* stock, as indicative of their coastwise distribution and as designating a well-defined race.

Orbicular (*or-bik'-u-lar*) [*orbiculus*, dim. of *orbis*, circle]. Having a circular shape. A term applied to the circular muscles of the eyelids and the mouth. **O. Bone.** See *Bones, Table of.*

Orbicularis (*or-bik-u-la'-ris*). See *Muscles, Table of.*

Orbiculate (*or-bik'-u-lāt*). Same as *Orbicular.*

Orbit (*or'-bit*) [*orbita*, from *orbis*, circle]. The bony pyramidal cavity in which the eyeball is suspended. Seven bones enter into its formation, its somewhat indeterminate sides being called the roof, the floor, the inner and outer walls.

THE ORBITS.

1. Anterior orifice of nasal fossæ. 2. Anterior extremity of inferior turbinated bone. 3. Malar bone. 4. Orbital cavity. 5. Lacrymal fossa, at base of which may be seen the line of union of the ascending process of the superior maxilla with the os unguis. 6. Os planum, forming with this bone the internal wall of the orbit. 7. Optic foramen. 8. Sphenoid fissure. 9. Spheno-maxillary fissure, continuous posteriorly with the preceding. 10. Upper portion of the great wing of the sphenoid. 11. Squamous portion of temporal. 12. Antero-inferior angle of parietal. 13. Part of frontal which contributes to form the temporal fossa. 14. Mastoid process. 15. Styloid process.

Orbita (*or'-bit-ah*) [*orbis*, a circle, orbit: *pl.*, *Orbitæ*]. The same as *Orbit.*

Orbital (*or'-bit-al*) [*orbita*, from *orbis*, circle]. 1. Pertaining to the orbit. 2. The orbital portion of the orbicularis palpebrarum. **O. Arch**, the upper margin of the orbit. **O. Breadth**, in craniometry, the distance between the middle points of the inner borders of the orbits. **O. Fascia**, the capsule of Tenon. **O. Fissure.** See *Fissures, Table of.* **O. Fossa**, the cavity of the orbit. **O. Height**, in craniometry, the greatest vertical width of the external opening of the orbit. **O. Index.** See Index. **O. Plane.** See *Plane.* **O. Plate**: 1. That part of the frontal bone helping to form the roof of the orbit. 2. That part of the ethmoid bone helping to form the inner wall of the orbit. **O. Point**, the lowest point on the inferior margin of the orbit. **O. Process**: 1. The orbital portion of the malar bone. 2. The orbital portion of the palate bone. **O. Ridge**, the free edge of the nasal process of the superior maxilla. **O. Surface**, that portion of the superior maxilla that helps to form the floor of the orbit. **O. Vault**, the roof of the orbit.

Orbito- (*or'-bit-o-*) [*orbita*, orbit]. A prefix denoting relation to the orbit. **O.-basilar**, both orbital and basilar. **O.-b. Angle**, the angle formed between the line continuing the axis of the orbit and one tangent to the lower border of the inferior maxilla. **O.-malar**, pertaining to both the orbit and the malar bone. **O.-m. Index**, in craniometry, the ratio existing between the bizygomatic diameter of the face, and the superior facial diameter, the latter being taken as 100. **O.-nasal**, pertaining to both orbit and nose. **O.-occipital**, pertaining to both orbit and occipital bone. **O.-o. Angle**, in craniometry, the angle formed between the optic axis and the plane of the foramen magnum. **O.-ocular**, pertaining to both orbit and eye. **O.-palpebral**, pertaining both to the orbit and the eyelids. **O.-sphenoid**: 1. Pertaining both to the orbit and to the sphenoid bone. 2. The lesser wing of the sphenoid bone; in some animals, and in early human life, it is a separate bone.

Orbitocele (*or'-bit-o-sēl*) [*orbita*, orbit; *κήλη*, tumor]. 1. A tumor of the orbit. 2. The same as *Exophthalmos.*

Orceic Acid (*or'-se-ik*). Synonym of *Orcein.*

Orcein (*or'-se-in*) [*Orcus*, Pluto, from its dark color], $C_7H_7NO_3$. A dark-red substance derived from orcin.

Orcheitis (*or-ke-i'-tis*). Synonym of *Orchitis.*

Orchella (*or-kel'-ah*). See *Orchil.*

Orchellin (*or-kel'-in*) [after *Oricellari*, a chemist]. A purple dye found in *Roccella tinctoria.*

Orchemphraxis (*or-kem-fraks'-is*). Same as *Orchidemphraxis.*

Orcheocele (*or'-ke-o-sēl*). See *Orchiocele.*

Orcheodesmosarcoma (*or'-ke-o-dez'-mo-sar-ko'-mah*) [*ὄρχεα*, scrotum; *δέσμος*, bond; *σάρξ*, flesh; *ὄμα*, tumor]. Scrotal elephantiasis.

Orcheoplasty (*or'-ke-o-plas-te*). See *Orchioplasty.*

Orcheotomy (*or-ke-ot'-o-me*). See *Orchotomy.*

Orchestromania (*or-kes-tro-ma'-ne-ah*) [*ὀρχεῖσθαι*, to dance; *μανία*, madness]. Dancing mania; chorea, or St. Vitus' dance.

Orchi-, less correctly **Orchid-** (*or'-ke-*, *or'-kid-*) [*ὄρχις*, testicle]. A prefix signifying connection with, or relation to, the testicles.

Orchialgia (*or-ke-al'-je-ah*) [*ὄρχις*, testis; *ἄλγος*, pain). Neuralgic pain in the testicle.

Orchic (*or'-kik*) [*ὄρχις*, testicle]. Pertaining to the testicle.

Orchichorea (*or-kik-or-e'-ah*) [*ὄρχις*, testicle; *χορεία*, dance]. Irregular movements of the testicle due to contraction of the cremaster muscle.

Orchid (*or'-kid*) [*ὄρχις*, testicle]. Any orchidaceous plant; a plant of the orchis family or order. Orchids are of many species and genera, and are mostly tropical. Salep and vanilla are produced by plants of this order. Faham, cypripedium, and a few others are employed in medicine.

Orchidalgia (*or-kid-al'-je-ah*). Synonym of *Orchialgia.*

Orchidatonia (*or-kid-at-o'-ne-ah*) [*ὄρχις*, testicle; *ἀτονία*, atony]. Atony of the testicle; laxness of the testicle.

Orchidatrophia (*or-kid-at-ro'-fe-ah*) [*ὄρχις*, testicle; *ἀτροφία*, atrophy]. Atrophy of the testicle.

Orchidauxe (*or-kid-awks'-e*) [*ὄρχις*, testicle; *αὔξη*, growth]. Hypertrophy of the testicle.

Orchidectomy (*or-kid-ek'-to-me*) [*ὄρχις*, testis; *ἐκτομή*, excision]. Surgical removal of a testis; castration.

Orchidemphraxis (*or-kid-em-fraks'-is*) [*ὄρχις*, testicle; *ἐμφραξις*, stoppage]. Obstruction of the vessels of the testis.

Orchidion (*or-kid'-e-on*) [dim. of *ὄσχις*, testicle]. A small testicle.

Orchiditis (*or-kid-i'-tis*). Synonym of *Orchitis.*

Orchidocatabasis (*or-kid-o-kat-ab'-as-is*) [*ὄρχις*, testicle; *κατάβασις*, a going down]. Descent of the testicle into the scrotum.

Orchidocele (*or-kid'-o-sēl*). Synonym of *Orchiocele.*

Orchidodynia (*or-kid-o-din'-e-ah*). Synonym of *Orchiodynia.*

Orchido-meningitis (*or-kid'-o-men-in-ji'-tis*) [ὄρχις, testicle; μῆνιγξ, membrane; ιτις, inflammation]. Blasius' term for the ordinary form of hydrocele.

Orchidomyeloma (*or-kid'-o-mi-el-o'-mah*) [ὄρχις, testicle; μυελός, marrow; ὄμα, tumor: *pl.*, *Orchidomyelomata*]. Myeloid sarcoma of the testicle.

Orchidoncus (*or-kid-ong'-kus*) [ὄρχις, testicle; ὄγκος, tumor]. A tumor or tumefaction of the testicle.

Orchidopexia (*or-kid-o-peks'-e-ah*). See *Orchidopexy.*

Orchidopexy (*or'-kid-o-peks-e*) [ὄρχις, testis; πῆξις, a hardening]. 1. Hardening of the substance of the testicle. 2. Same as *Orchidorraphy.*

Orchidorrhaphy (*or-kid-or'-a-fe*) [ὄρχις, testicle; ῥάφη, suture]. Stitching of the testicle to the surrounding tissues.

Orchidoscheocele (*or-kid-os'-ke-o-sēl*) [ὄρχις, testicle; ὄσχη, scrotum; κήλη, tumor]. A scrotal hernia with enlargement of the testicle.

Orchidospongioma (*or-kid'-o-spun-je-o'-mah*) [ὄρχις, testicle; σπογγιά, sponge; ὄμα, tumor]. A tuberculous tumor of the testicle.

Orchidotomy (*or-kid-ot'-o-me*) [ὄρχις, testicle; τομή, a cutting]. Incision of the testicle.

Orchidotyloma (*or-kid'-o-ti-lo'-mah*) [ὄρχις, testicle; τύλος, callus; ὄμα, tumor]. A callous nodule of the testicle.

Orchiectomy (*or-ke-ek'-to-me*). Synonym of *Orchidectomy.*

Orchiepididymitis (*or'-ke-ep-id-id-im-i'-tis*) [ὄρχις, testicle; ἐπιδιδυμίς, epididymis; ιτις, inflammation]. Inflammation of both testis and epididymis.

Orchil (*or'-kil*). See *Archil.* **O.-purple.** See *Pigments, Conspectus of.*

Orchilla (*or-kil'-ah*). See *Archil.*

Orchiocele (*or'-ke-o-sēl*) [ὄρχις, testis; κήλη, tumor]. 1. A tumor of the testicle. 2. Scrotal hernia. 3. A name loosely applied to several different diseases of the testicles and their envelops.

Orchiococcus (*or-ke-o-kok'-us*). See *Diplococcus of Orchitis* under *Bacteria, Synonymatic Table of.*

Orchiodynia (*or-ke-o-din'-e-ah*) [ὄρχις, testis; ὀδύνη, pain]. Pain in the testicles.

Orchiomyeloma (*or'-ke-o-mi-el-o'-mah*). Synonym of *Orchidomyeloma.*

Orchioncus (*or-ke-ong'-kus*). Synonym of *Orchidoncus.*

Orchioneuralgia (*or-ke-o-nu-ral'-je-ah*). Synonym of *Orchialgia.*

Orchioplasty (*or'-ke-o-plas-te*) [ὄρχις, the testicle; πλάσσειν, to form]. The surgical repair following the loss of any part of the scrotum from disease, by supplying flaps of healthy tissue from an adjacent part.

Orchioscheocele (*or-ke-os'-ke-o-sēl*). Synonym of *Orchidoscheocele.*

Orchioscirrhus (*or-ke-os-kir'-us*) [ὄρχις, testis; σκιῤῥός, induration]. A hard carcinomatous tumor of the testicle.

Orchiotomy (*or-ke-ot'-o-me*). Synonym of *Orchidotomy.*

Orchirrhaphy (*or-kir'-af-e*). Synonym of *Orchidorrhaphy.*

Orchis (*or'-kis*) [ὄρχις, testis]. 1. The typical genus of the family of orchidaceous plants. 2. The testicle. See *Orchid.*

Orchitis (*or-ki'-tis*) [ὄρχις, testis; ιτις, inflammation]. Inflammation of the testicle.

Orchitomy (*or-kit'-o-me*). Synonym of *Orchotomy.*

Orchocele (*or'-ko-sēl*). Synonym of *Orchiocele.*

Orchos (*or'-kos*) [ὄρχος, tarsus]. The tarsal cartilage.

Orchotomy (*or-kot'-o-me*) [ὄρχις, testis; τομή, a cutting]. 1. Castration. 2. [ὄρχος, tarsus; τομή, a cutting]. Removal of the tarsal cartilages.

Orcin (*or'-sin*) [*Orcus*, Pluto, from its dark color], $C_7H_6(OH)_2$. *Orcinol;* a substance found in many lichens of the genera *Roccella* and *Leconora.* It crystallizes in colorless, six-sided prisms, containing one molecule of water; it is readily soluble in water, alcohol and ether, and has a sweet taste. It melts at 56° C., and boils at 290° C. It yields azo-coloring substances with diazo-compounds. See *Pigments, Conspectus of.*

Orcinol (*or'-sin-ol*). See *Orcin.*

Ord's Theory. A theory of the origin of gout. It is that there is a tendency, inherited or acquired, to a special form of tissue-degeneration.

Ordeal Bark (*or'-de-al bark*) [ME., *ordal*, a judgment]. See *Casca.* **O. Bean, O. Nut.** See *Physostigma.* **O.-tree.** See *Cerbera* (of Madagascar). Also, the *Erythrophlœum guinense.*

Order (*or'-der*) [*ordo*, a rule]. Systematic arrangement. In biology, the taxonomic group below a Class and above a Family.

Ordinary (*or'-din-a-re*) [*ordinarius*, regular]. Usual; regular. **O. Ray.** See *Ray.*

Ordinate (*or'-din-āt*) [*ordinare*, to order, ordain]. In biology, placed in regular rows or series.

Ordure (*or'-dūr*) [ME., *ordure*, filth]. Dung; excrement; feces.

Orectic (*or-ek'-tik*) [ὄρεξις, appetite]. Stimulating appetite.

Oregon Grape. See *Berberis.*

Orellin (*o-rel'-in*) [*orellina*]. A yellow coloring-matter found in *Annatto.* See *Pigments, Conspectus of.*

Orexegen (*o-reks'-ej-in*). See *Orexin.*

Orexin (*o-reks'-in*) [ὄρεξις, appetite], $C_{14}H_{12}N_2.HCl.2H_2O$. Hydrochlorate of phenyl-di-hydro-quinazolin; a chinolin-preparation, of some repute as a stomachic. It is useful in anorexia not dependent upon gastric disease proper. Dose gr. ij–v in wafer or pill. Unof.

Orexis (*o-reks'-is*) [ὄρεξις, appetite]. Appetite.

Organ (*or'-gan*) [ὄργανον, organ]. In biology, any part of the body having a determinate function; a complex of similar or dissimilar cells or tissues that perform in common one or more vital functions. **O., Accessory,** an organ that has a subordinate importance in the carrying on of a particular function, but which under certain conditions may act as a substitute for an important organ. **O.-albumin,** the albumin that constitutes a part of the solid tissues. **O. of Bojanus,** the renal organ of molluscs, found in the majority of lamellibranchs. **O. of Corti.** See *Corti.* **O., Cup-shaped,** one of the organs of taste in *Vermes;* widely scattered over them in the integument, but especially numerous at the edge of the mouth. **O's., Digestive,** the digestive tract and its glands. **O. of Eimer,** a tactile organ in the nose of the mole, consisting of a group of terminal nerve-fibrils. **O., Enamel,** a club-shaped process of epithelium growing from the dental ridge and forming a cap over the dental papilla. From it the enamel of the tooth is developed. **O. of Gegenbauer,** one of certain ciliated organs in the *Pteropoda* proved by

ORGAN OF EIMER, NOSE OF MOLE.

n. Nerve. *e* Epithelium. Gold chlorid. (*Stirling.*)

Spengel to have an olfactory function. **O. of Giraldès,** the paradidymis. **O., Goblet-shaped,** one of the large rod-shaped end-organs of nerves, observed in the skin of the teleostei and sturgeons. **O., Jacobson's,** a short cul-de-sac extending along Stensen's duct, lined by epithelium continuous with that of the nasal mucous membrane. It is well developed in some lower animals, in which it is believed to have an olfactory function. **O's., Lateral:** (*a*) Segmentally arranged, retractile sensory organs occurring among *Vermes* only in the *Chætopoda*. They carry sensory hairs connected on the one hand with transverse muscle-fibrillæ and on the other with a plexus of ganglion-cells joined by a special nerve to the ventral cord; their function is unknown. (*b*) A series of nerve end-organs in the "mucous canals" in the head and lateral line of fishes and amphibians. **O's., Mayer's,** a series of slit-like depressions on the side of the tongue of certain mammals, first discovered by C. Mayer in the African elephant; afterward found in the Uakari monkeys (*Pithekia satanis*); 15 slits in front of the palato-glossal fold. **O's., Pelvic,** those organs situated in the pelvis. **O's. of Reproduction,** the testicles and penis and its glands in the male, the uterus and its appendages and the vagina and its glands, in the female. **O's., Respiratory,** the nose, pharynx, larynx, trachea, lungs, and glands connected with these different parts. **O. of Rosenmüller.** See *Parovarium*. **O., Segmental,** a mesoblastic embryonic structure consisting of three parts—the pronephros, the mesonephros, or Wolffian body, and the metanephros. **O's. of Semper,** glandular structures found in gasteropods, well developed at the sides of the mouth in *Limax*. According to Sochaczewer, they are not olfactory in function. **O's. of Special Sense,** those parts of the body endowed with highly specialized functions and through which perceptive impressions are received: the eye, ear, skin, mucosa of the mouth and nose are the principal. **O. of Syrski,** the male organ of the eel discovered by Syrski in 1873.

Organa (*or'-gan-ah*) [L.]. Plural of *Organum*. **O. palpantia,** tactile organs. **O. urticantia,** the nematophores or nematillæ of *Cœlenterates*.

Organic (*or-gan'-ik*) [ὄργανον, an instrument]. Having, pertaining to, or characterized by, organs; pertaining to the animal and vegetable worlds; exhibiting animal or vegetable characteristics. **O. Cell,** the structural element which is regarded as the basis of the structure of all organized bodies. **O. Chemistry,** the chemistry of the carbon compounds. **O. Constituents.** See *Constituent*. **O. Disease,** disease of an organ attended with structural changes. **O. Molecules, Doctrine of,** Buffon's hypothesis that life is the indefeasible property of certain indestructible molecules of matter, which exist in all living things, and have inherent activities by which they are distinguished from non-living matter. Each individual living organism is formed by their temporary combination; they stand to it in the relation of the particles of water to a cascade, or a whirlpool; or to a mold into which the water is poured. The form of the organism is thus determined by the reaction between external conditions and the inherent activities of the organic molecules of which it is composed; and as the stoppage of a whirlpool destroys nothing but a form and leaves the molecules of the water with all their inherent activities intact, so what we call the death and putrefaction of an animal, or of a plant, are merely the breaking up of a form, or manner of association, of its constituent molecules, which are then set free as infusorial animalcules. It will be perceived that this doctrine is by no means identical with *Abiogenesis*, with which it is often confounded (Huxley). **O. Reflexes,** those pertaining to the acts of micturition, erection, ejaculation, defecation, digestion, respiration, etc.

Organicism (*or-gan'-is-izm*) [ὄργανον, organ]. The doctrine that all diseases are caused by material lesions of one or more organs.

Organisata (*or-gan-is-a'-tah*) [neut.: *pl.* of *Organisatus*, organized]. In biology, any or all organisms.

Organism (*or'-gan-izm*) [ὄργανον, organ]. A living being, animal or vegetable, simple or composed of many organs; also the assemblage of organs constituting a living being. **O., Micro-,** a minute or microscopic body or organism; a schizomycete; a bacterium.

Organite (*or'-gan-īt*) [ὄργανον, organ]. An elementary organ.

Organization (*or-gan-iz-a'-shun*) [ὄργανον, organ]. 1. The orderly arrangement of organs or parts; also an organism. 2. The conversion of something into, or its replacement by, living tissue—as the organization of a thrombus.

Organo-chemistry (*or'-gan-o-kem'-is-tre*). See *Organic Chemistry*.

Organogen (*or-gan'-o-jen*) [ὄργανον, an organ; γεννᾶν, to beget]. A compound containing carbon, hydrogen, oxygen, and nitrogen.

Organogenesis (*or-gan-o-jen'-es-is*) [ὄργανον, organ; γεννᾶν, to beget]. The process of the development and growth of an organ. The same as *Organogeny*.

Organogenetic (*or-gan-o-jen-et'-ik*) [ὄργανον, organ; γεννᾶν, to beget]. Pertaining to organogenesis.

Organogeny (*or-gan-oj'-en-e*) [ὄργανον, organ; γενής, producing]. In biology, the history of the development of organs.

Organographism (*or-gan-og'-raf-izm*) [ὄργανον, an organ; γράφειν, to write]. The demonstration of the successive increase in size of an organ, by tracing its outlines upon the skin.

Organography (*or-gan-og'-ra-fe*) [ὄργανον, organ; γράφειν, to write]. A descriptive treatise of the organs of an animal or plant.

Organoid (*or'-gan-oid*) [ὄργανον, an organ; εἶδος, like]. A term applied to tumors composed of several tissues and resembling an organ, as carcinoma, which somewhat resembles an epithelial gland.

Organoleptic (*or-gan-o-lep'-tik*) [ὄργανον, organ; λῆπτικός, taking]. 1. Making an impression upon some organ, chiefly of special sense. 2. Plastic; capable of receiving organization.

Organologic (*or-gan-o-loj'-ik*) [ὄργανον, organ; λόγος, science]. Pertaining to organology.

Organologist (*or-gan-ol'-o-jist*) [ὄργανον, organ; λόγος, science]. One versed in organology.

Organology (*or-gan-ol'-o-je*) [ὄργανον, an organ; λόγος, science]. The department of biology that treats of the organs of plants and animals.

Organon (*or'-gan-on*) [ὄργανον, an organ; instrument]. A code of principles.

Organonomy (*or-gan-on'-o-me*) [ὄργανον, organ; νόμος, law]. The totality of the natural laws of the conduct and functions of organic life.

Organonym (*or-gan'-o-nim*) [ὄργανον, an organ; ὄνυμα, name]. The name of an organ or part.

Organonymy (*or-gan-on'-im-e*) [ὄργανον, organ; ὄνυμα, name]. A system of nomenclature of the organs.

Organopathic (*or-gan-o-path'-ik*) [ὄργανον, an organ; πάθος, disease]. Pertaining to *Organopathism* and to *Organopathy*.

Organopathism (*or-gan-op'-ath-izm*) [ὄργανον, an or-

gan; *πάθος*, disease]. The doctrine of special study and investigation of the pathology of each and every organ by itself.

Organopathologism (*or-gan-o-path-ol'-o-jizm*) [*ὄργανον*, organ; *πάθος*, disease; *λόγος*, science]. The same as *Organopathy*.

Organopathology (*or-gan-o-path-ol'-o-je*) [*ὄργανον*, organ; *πάθος*, disease; *λόγος*, science]. The science of the diseases of organs.

Organopathy (*or-gan-op'-ath-e*) [*ὄργανον*, organ; *πάθος*, disease]. 1. The disease of an organ. 2. A term used by Sharp to express the local action of drugs. 3. The same as *Organopathism*.

Organophyly (*or-gan-off'-il-e*) [*ὄργανον*, an organ; *φύλη*, a tribe]. In biology, the phylogeny of organs.

Organoplastic (*or-gan-o-plas'-tik*) [*ὄργανον*, an organ; *πλάσσειν*, to form, to mold]. In biology, applied to cells or tissues from which organs are developed.

Organoplasty (*or'-gan-o-plas-te*) [*ὄργανον*, organ; *πλάσσειν*, to form, to mold]. In biology, the origin or development of plant and animal organs.

Organopoiesis (*or-gan-o-poi-e'-sis*) [*ὄργανον*, an organ; *ποίησις*, formation]. The same as *Organoplasty*.

Organopoietic (*or-gan-o-poi-et'-ik*) [*ὄργανον*, organ; *ποίησις*, formation]. Relating to organopoiesis.

Organoscope (*or'-gan-o-skōp*) [*ὄργανον*, an organ; *σκοπεῖν*, to view]. The same as *Endoscope*.

Organoscopy (*or-gan-os'-ko-pe*) [*ὄργανον*, an organ; *σκοπεῖν*, to view]. Cranioscopy or phrenology.

Organotherapy (*or-gan-o-ther'-ap-e*) [*ὄργανον*, organ; *θεραπέια*, treatment]. The treatment of diseases by the administration of animal organs, or extracts prepared from them. Although organotherapy has existed in some form since the most ancient times, the method as now practised, is of recent origin. Brown-Séquard, in 1889, suggested the employment of testicular juice in the treatment of the mental and physical deterioration incident to old age. Experiments which he had made upon himself had, he reported, yielded the most brilliant results. Physicians in different parts of France subsequently tested the properties of Brown-Séquard's extract and found its dynamogenic action beneficial in diseases attended with debility, especially in senile changes, in pulmonary tuberculosis, leprosy, locomotor ataxy, general paralysis and anemia. Paul, in 1892, under the name of *nervous transfusion*, advocated the hypodermatic use of an extract of sheeps' brain in conditions of neurasthenia. The method of preparation of the various extracts as employed in France is that suggested by d'Arsonval. The organ is removed with all possible antiseptic precautions, and is cut into small pieces of about one c.c. The segments are covered with pure glycerin and allowed to macerate for twenty-four hours. Before filtering, two or three parts of distilled water are added. Sterilization is accomplished by means of carbonic acid gas under pressure. The first step toward a rational application of the method of organotherapy was the subcutaneous transplantation of pieces of thyroid gland in cases of myxedema and cachexia strumipriva by Horsley and Kocher, and later the employment of extract of sheeps' thyroid in myxedema, the credit of which belongs to G. R. Murray, of Newcastle, England. Since Murray's announcement, in 1891, the method has been extensively tested in England and elsewhere; many cases of myxedema have been reported as improved, and not a few cured. Gratifying results have also been achieved in sporadic cretinism, and in psoriasis and other chronic affections of the skin. Various preparations of the thyroid gland have been employed, *e. g.*, glycerin extracts, dry extracts in powder, and finally the uncooked or partially cooked gland has been used. In the particular case of myxedema neither the kind of preparation nor the mode of administration seems to be of much importance. The results have been practically the same whether a liquid extract was given by hypodermatic injection, or whether a dry extract was administered by the mouth. The fresh gland, slightly fried and seasoned, has also been used, and at present is preferred by many. The success attending thyroid-therapy in myxedema has led to the employment of many other organic extracts in diseases of corresponding organs. Extracts have been prepared from nearly every organ in the animal body; thus there are on the market *cerebrin*, from the brain, *medullin* or *myelin*, from the cord, *cardin*, from the heart, *musculin*, from muscles, *ossin*, from bones, *renin*, from the kidneys, *gastrin*, from the stomach, *pancreatin*, from pancreas, *ovarin*, from the ovary, and *testin*, from the testis. Brain-extract has been reported as beneficial in various organic and functional diseases of the nervous system, such as locomotor ataxy, bulbar palsy, general paralysis of the insane; also in epilepsy, neurasthenia, migraine, hysteria, hebephrenia, and other conditions. Heart-extract is recommended for cases of nervous prostration. It is said to raise the blood-pressure, augment the quantity of urine, and increase the number of red blood-corpuscles. In diseases of the muscular system, muscle-extract is also reported as of value. Extract of pancreas, containing the active ferments of the gland has been administered with doubtful success, in certain cases of diabetes mellitus, which disease, as is well known, is sometimes dependent upon morbid changes in the pancreas. Of all the extracts, that from the thyroid gland is still the one most successfully employed. Its use is not confined to the two diseases mentioned, myxedema and cretinism; it has also proved useful in diseases of the skin, in leukemia, and affections of the nervous system, both organic and functional. In exophthalmic goiter the results have not been encouraging; the symptoms, were as a rule, not ameliorated, in some cases they were even intensified.

Organotrophic (*or-gan-o-tro'-fik*) [*ὄργανον*, organ; *τροφή*, nourishment]. Relating or belonging to the nourishment of organized tissue.

Organule (*or'-gan-ūl'*). The same as *Organite*.

Organum (*or'-gan-um*) [L.]. See *Organ*.

Orgasm (*or'-gasm*) [*ὀργάειν*, to swell]. Any eager desire or excitement. The crisis of venereal passion. See *Estrum*.

Orgastic (*or-gas'-tik*) [*ὀργάειν*, to swell]. Pertaining to, or characterized by, orgasm.

Orgeat (*or-zhah'*) [Fr. *orge*, Lat. *hordeum*, barley]. Pavy's recipe for a demulcent and nutritive drink: Blanch two ounces of sweet almonds and four of bitter almond-seeds; pound them into a paste with a little orange-flower water; rub this up with a pint of milk, diluted with a pint of water, until it forms an emulsion; strain and sweeten with sugar.

Orgosis (*or-go'-sis*). Synonym of *Orgasm*.

Oriental (*o-re-en'-tal*) [*oriens*, rising]. Pertaining to the Orient or east. **O. Boil.** See *Furunculus orientalis*. **O. Plague.** Synonym of the *Plague*, *q. v.* **O. Sore**, an endemic ulcer probably due to a specific microörganism, prevalent in the Orient. See *Furunculus orientalis*.

Orientation (*o-ri-en-ta'-shun*) [*oriri*, to rise (in the east)]. In biology: (*a*) The determination of the east point, and hence of the other points; the direction of a locality. The localization of oneself; the ascription of objects to the place in space where they actually belong, either with respect to each other (*objective* orienta

tion) or with reference to the observer (*subjective* orientation). *False* orientation is observed in some cases of monocular squinting paralysis, etc. (*b*) The homing instinct of animals. (*c*) The arrangement of tissues in the imbedding-mixture before sectioning.

Orifacial (*or-if-a'-shal*) [*os, oris*, mouth; *facies*, face]. Pertaining to the mouth and face. **O. Angle,** in craniometry, the angle formed by the junction of the plane passing through the masticating surface of the superior maxilla with the facial line.

Orifice (*or'-if-is*) [*orificium; os, oris*, mouth; *facere* to make]. A mouth or opening. **O., Abdominal,** the internal abdominal ring. **O., Anal,** the anus. **O., Cardiac.** The same as *Cardia.* **O., Esophageal,** the perforation in the diaphragm for the esophagus. **O., Pyloric.** The same as *Pylorus.* **O., Tympanic,** the oval opening of the atrium into which the tympanic membrane is inserted.

Orificial (*or-if-ish'-al*) [*orificium,* an orifice]. Pertaining to an orifice of the body. **O. Surgery,** the surgery of the orifices of the body.

Orificium (*or-if-ish'-e-um*) [L.]. Orifice. **O. epiploicum,** a synonym of *Foramen of Winslow.* **O. infundibuli,** a synonym of *Helicotrema.*

Oriform (*or'-if-orm*) [*os, oris,* mouth; *forma,* form]. Having the shape of a mouth.

Origanum (*o-rig'-an-um*) [ὀρίγανον, marjoram]. Wild marjoram. The leaves and stems of *O. vulgare,* with properties due mainly to a volatile oil. It is a tonic, stimulant, and carminative, and formerly was popularly used as an emmenagogue. Dose ʒj-ij in infusion. The oil is esteemed as an ingredient in liniments, especially in veterinary practice. Most of the commercial oil of origanum is in reality oil of thyme (*Oleum thymi*). The oil is also used in histology as a clearing-fluid for stained specimens.

Origin (*or'-ij-in*) [*origo, originis,* beginning]. The beginning or source of a muscle; its more fixed attachment, or that nearest the axis of the body. **O., Apparent.** See *Superficial.* **O., Deep,** or **Ental,** of a nerve, its origin in the cells of the nerve-center. **O., Superficial,** or **Ectal,** of a nerve, the point at which it emerges from the brain or cord.

Orinasal (*o-rin-a'-zal*) [*os, oris,* mouth; *nasus,* nose]. Pertaining to the mouth and nose.

Orist (*o'-rist*) [*os, oris,* mouth]. A specialist in oristry.

Oristry (*o'-ris-tre*) [*os, oris,* mouth]. A term proposed to designate the treatment, surgical, dental, or medical, of diseases of the mouth.

Orleans (*or-lenz'*). Same as *Annatto.*

Ormsby's Inhaler. See *Anesthetic.*

Ornis (*or'-nis*) [ὄρνις, a bird]. In biology, the avifauna of any region.

Ornithic (*or-nith'-ik*) [ὀρνιθικός, of, or belonging to, birds]. Avian; of, or pertaining to, birds.

Ornithin (*or'-nith-in*) [ὄρνις, a bird], $C_3A_{12}N_2O_2$. A base found in ornithuric acid.

Ornithobiography (*or-nith-o-bi-og'-ra-fe*) [ὄρνις, bird; βίος, life; γράφειν, to write]. The life-history of birds.

Ornithocephalous (*or-nith-o-sef'-al-us*) [ὄρνις, a bird; κεφαλή, head]. In biology, shaped like a bird's head.

Ornithocoprus (*or-nith-o-kop'-rus*) [ὄρνις, bird; κόπρος, dung]. Guano.

Ornithography (*or-nith-og'-ra-fe*) [ὄρνις, bird; γράφειν, to write]. A description of birds.

Ornithoid (*or'-nith-oid*) [ὄρνις, a bird; εἶδος, form]. In biology, bird-like.

Ornithologist (*or-nith-ol'-o-jist*) [ὄρνις, bird; λόγος, science]. One versed in ornithology.

Ornithology (*or-nith-ol'-o je*) [ὄρνις, bird; λόγος, a science]. The science of the nature and habits of birds.

Ornithomyzous (*or-nith-o-mi'-zus*) [ὄρνις, bird; μύξειν, to suck]. Parasitic on birds.

Ornithophilous (*or-nith-off'-il-us*) [ὄρνις, a bird; φίλος, loving]. In biology, fertilized through the agency of birds.

Ornithotomist (*or-nith-ot'-o-mist*) [ὄρνις, a bird; τομία, a cut]. One versed in the anatomy of birds.

Ornithotomy (*or-nith-ot'-o-me*) [ὄρνις, a bird; τέμνειν, to cut]. In biology, the dissection of birds.

Ornithuric (*or-nith-u'-rik*) [ὄρνις, a bird; οὖρον, urine]. Pertaining to the urine of birds. **O. Acid,** $C_{19}H_{20}N_2O_4$. An acid found in the dung of birds fed with benzoic acid.

Ornus (*or'-nus*) [L.]. See *Fraxinus.*

Oroanal (*o-ro-a'-nal*) [*os, oris,* mouth; *anus,* anus]. Extending from the mouth to the anus.

Orobechos (*o-ro-bek'-os*) [ὄροβος, a species of pulse; ἦχος, sound]. The crackling sound sometimes produced by pressure on the inner canthus of the eye.

Orography (*o-rog'-ra-fe*) [ὄρος, mountain; γράφειν, to write]. 1. A treatise on the distribution and physical geography of mountain-ranges. 2. The same as *Orology.*

Orohydrography (*or-o-hi-drog'-ra-fe*) [ὄρος, mountain; ὕδωρ, water; γράφειν, to write]. A treatise on the mutual relation of divides and drainage-basins.

Orolingual (*o-ro-lin'-gwal*) [*os, oris,* the mouth; *lingua,* the tongue]. Pertaining to the mouth and the tongue.

Oronasal (*o-ro-na'-zal*). See *Orinasal.*

Oronosus (*o-ron'-o-sus*) [ὄρος, mountain; νόσος, disease]. A disease prevalent in mountain regions. See *Mountain Sickness.*

Oropharyngeal (*o-ro-far-in'-je-al*) [*os, oris,* mouth; φάρυγξ, pharynx]. Pertaining to, or situated in, the orpharynx.

Oropharynx (*o-ro-far'-inks*) [*os, oris,* mouth; φάρυγξ, pharynx]. The pharynx proper, situated below the level of the lower border of the soft palate, as distinguished from the naso-pharynx.

Oros (*or'-os*) [ὄρος, a mountain]. 1. The upper part of the foot. 2. A mountain.

Orotherapy (*or-o-ther'-ap-e*) [ὀρός, whey; θεραπεία, treatment]. See *Orrhotherapy.*

Oroya Fever (*o-roi'-yah*) [S. Amer.]. The febrile stage of *Verrugas, q. v.*

Orpiment (*or'-pim-ent*) [*auri pigmentum,* golden pigment]. A common name for arsenious sulphid, As_2S_3, also known as *King's Yellow.* It is poisonous. See *Pigments, Conspectus of.*

Orrhagogus (*or-ag'-o-gus*) [ὀρρός, serum; ἀγειν, to lead]. Synonym of *Hydragogue.*

Orrhochezia (*or-o-ke'-ze-ah*) [ὀρρός, serum; χέζειν, to relieve oneself]. Serous diarrhea.

Orrhocyst (*or'-o-sist*) [ὀρρός, serum; κύστις, cyst]. A serous cyst.

Orrhoid (*or'-oid*). Synonym of *Serous.*

Orrhophallus (*or-o-fal'-us*) [ὄρρος, the end of the sacrum; φαλλός, the penis]. A monstrosity with a penis protruding from the sacral region.

Orrhoposia (*or-op-o'-ze-ah*) [ὀρρός, whey; πόσις, drinking]. Whey-drinking.

Orrhorrhagia (*or-or-a'-je-ah*). Synonym of *Orrhorrhea.*

Orrhorrhea (*or-or-e'-ah*) [ὀρρός, serum; ῥοία, a flow]. An abnormally great flow of serum. Also, a watery discharge; rice-water discharges.

Orrhos (*or'-ros*) [ὀρρός, serum]. Serum; whey.

Orrhosis (*or-o'-sis*) [ὀρρός, serum]. The production of serum.

Orrhosolen (*or-o-so'-len*) [ὀρρός, serum; σωλήν, a channel]. 1. A lymph-duct. 2. Sheath of a tendon.

Orrhosolenitis (*or-o-so-len-i'-tis*). See *Lymphangitis.*

Orrhymen (*or-i'-men*) [ὀρρός, serum; ὑμήν, membrane]. A serous membrane.

Orrhymenitis (*or-i-men-i'-tis*) [ὀρρός, serum; ὑμήν, membrane; ιτις, inflammation]. Inflammation of a serous surface.

Orrhymenoid (*or-i'-men-oid*) [ὀρρός, serum; ὑμήν, a membrane; εἶδος, like]. Resembling a serous membrane.

Orrhymenous (*or-i'-men-us*) [ὀρρός, serum; ὑμήν, a membrane]. Having a serous membrane.

Orris (*or'-is*) [origin obscure]. The plant yielding orris-root. **O.-pea.** See *Issue-pea.* **O.-root,** the rhizome of *Iris florentina,* containing a volatile oil and various extractive principles. It is aromatic and astringent, and is much used for flavoring and as a dentifrice. Unof.

Orrhotherapy (*or-o-ther'-ap-e*) [ὀρρός, serum; θεραπεία, therapy]. 1. Whey-cure. 2. The treatment of disease by the use of human or animal blood-serum containing antitoxins.

Orseillin (*or-sa'-lin*) [Fr., *orseille,* archil]. A coal-tar color used in dyeing; it is the sodium-sulphonate salt of beta-naphthol-azo-naphthalene. It yields a fast and full red, but is not bright red. It is also called *rocellin, rubidin, rauracienne.* See *Pigments, Conspectus of.*

Orsellinic Acid (*or-sel-in'-ik*). See *Acid.*

Orthacanthous (*orth-ak-an'-thus*) [ὀρθός, straight; ἀκανθα, a thorn]. In biology, having straight thorns.

Ortharthragra (*orth-arth-ra'-grah*) [ὀρθός, true, straight; ἀρθρον, joint; ἄγρα, seizure]. True gout.

Orthaxial (*orth-aks'-e-al*) [ὀρθός, straight; *axis,* axis]. In biology, having a straight vertebral axis.

Orthiauchenus (*orth-e-awk'-en-us*) [ὀρθιος, upright; αὐχήν, neck]. Lissauer's term for a skull in which the angle formed between the radius fixus and the line joining the basion and the inion is between 38° and 49°

Orthin (*orth'-in*) [ὀρθός, straight]. A substance prepared by combining hydrazin with paroxybenzoic acid. Its hydrochlorate has been found actively antipyretic; an overdose causes collapse and profuse sweating. Dose gr. v, twice daily, given with great caution. Unof. See also *Hydrazin.*

Orthiochordus (*orth-e-o-kord'-us*) [ὀρθιος, upright; χορδή, cord]. Lissauer's term for a skull in which the angle formed between the radius fixus and the line joining the hormion and the basion is between 33.2° and 52°.

Orthiocoryphus (*orth-e-o-kor'-if-us*) [ὀρθιος, upright; κορυφή, head]. Lissauer's term for a skull in which the angle formed between the radius fixus and the line joining the bregma and the lambda is between 29° and 41°.

Orthiodontus (*orth-e-o-don'-tus*) [ὀρθιος, upright; ὀδούς, a tooth]. Lissauer's term for a skull in which the angle between the radius fixus and the line joining the alveolar and subnasal points is between 88° and 121°.

Orthiometopus (*orth-e-o-met-o'-pus*) [ὀρθιος, upright; μέτωπον, forehead]. Lissauer's term for a skull in which the angle between the radius fixus and the line joining the bregma and the nasal point is between 47° and 60°.

Orthiopisthius (*orth-e-o-pis'-the-us*) [ὀρθιος, upright; ὀπισθεν, behind]. Lissauer's term for a skull in which the angle between the radius fixus and the line joining the lambda and the inion is between 84° and 95°.

Orthiopisthocranius (*orth-e-o-pis-tho-kra'-ne-us*) [ὀρθιος, upright; ὀπισθεν, behind; κρανίον, skull]. Lissauer's term for a skull in which the angle formed between the radius fixus and the line joining the lambda and the opisthion is between 107° and 119°.

Orthioprosopus (*orth-e-o-pros-o'-pus*) [ὀρθιος, upright; πρόσωπον, face]. Lissauer's term for a skull in which the angle formed between the radius fixus and the line joining the nasion and the alveolar point is between 89.4° and 100°.

Orthiopylus (*orth-e-op'-il-us*) [ὀρθιος, upright; πύλη, gate]. Lissauer's term for a skull in which the angle formed between the radius fixus and the line joining the middle point of the anterior margin of the foramen magnum and the middle point of the posterior margin of the foramen magnum is between 15.5° and 24°.

Orthiorrhinus (*orth-e-or-i'-nus*) [ὀρθιος, upright; ῥίς, nose]. Lissauer's term for a skull in which the angle formed between the radius fixus and the line joining the nasion and the subnasal point is between 87.5° and 98°.

Orthiuraniscus (*orth-e-u-ran-is'-kus*) [ὀρθιος, upright; οὐρανίσκος, canopy]. Lissauer's term for a skull in which the angle formed between the radius fixus and a line joining the posterior border of the incisor foramen and the alveolar point is between 40° and 60°.

Ortho- (*or'-tho-*) [ὀρθός, right. straight]. A prefix denoting right, straight, normal, or true. In chemistry the prefix indicates the normal compound; among derivatives of the benzol ring it refers to those formed by the substitution of two adjacent hydrogen atoms.

Orthocelic (*or-tho-se'-lik*) [ὀρθός, straight; κοιλία, belly]. In biology, applied to birds that have the eight intestinal folds close to and parallel with each other (*Tubinares, Steganopodes* and *Erodii*), as distinguished from the *Cyclocelic* (*Pelargi, Raptores* and *Laridæ.*)

Orthocelous (*or-tho-se'-lus*) [ὀρθός, straight; κοιλία, cavity]. Having the intestinal canal straight.

Orthocephalic (*or-tho-sef-al'-ik*) [ὀρθός, straight; κεφαλή, head]. Pertaining to orthocephaly.

Orthocephalism (*or-tho-sef'-al-izm*). Synonym of *Orthocephaly.*

Orthocephalous (*or-tho-sef'-al-us*) [ὀρθός, straight; κεφαλή, head]. Having a straight head or face.

Orthocephaly (*or-tho-sef'-al-e*) [ὀρθός, straight; κεφαλή, head]. The condition of having a skull with a vertical index of from 70.1° to 75°.

Orthochorea (*or-tho-ko-re'-ah*) [ὀρθός, straight; χορεία, dance]. Choreic movements in the erect posture.

Orthochromatic (*or-tho-kro-mat'-ik*) [ὀρθός, straight; χρῶμα, color]. A term used in photography to denote correctness in the rendering of colors.

Orthocolon (*or-tho-ko'-lon*) [ὀρθός, straight; κῶλον, limb]. Straightness of a limb from tonic muscular spasm.

Ortho-cresol (*or-tho-kre'-sol*) [ὀρθός, straight; κρέας, flesh; *oleum,* oil], C_7H_8O. One of the forms of cresol, *q. v.* It occurs in small amounts in urine.

Orthocyllosis (*or-tho-sil-o'-sis*) [ὀρθός, straight; κύλωσις, crippling]. Ankylosis of a limb in the straight position.

Orthodactylous (*or-tho-dak'-til-us*) [ὀρθός, straight; δάκτυλος, a finger]. In biology, having straight digits.

Orthodolichocephalous (*or-tho-do-lik-o-sef'-al-us*) [ὀρθός, straight; δολιχός, long; κεφαλή, head]. Having a long and straight head; having a vertical index between 70.1° and 75°, and a transverso-vertical index between 70° and 74.9°

Orthodontia (*or-tho-don'-she-ah*) [ὀρθός, straight; ὀδούς, tooth]. The correction of irregularities of the teeth.

Orthodontosy (*or-tho-don'-to-se*) [ὀρθός, straight;

ὀδούς, a tooth]. That division of dentistry concerned in the straightening of irregular teeth.

Orthogamy (*or-thog'-am-e*) [ὀρθός, straight; γάμος, marriage]. In biology, direct fertilization without any mediate agency.

Orthognampsia (*or-thog-namp'-se-ah*) [ὀρθός, straight; γναπτειν, to bend]. A bending of the body at the hips.

Orthognathic (*or-thog-na'-thik*). Same as *Orthognathous*.

Orthognathism (*or-thog'-na-thizm*) [ὀρθός, straight; γναθος, jaw]. The quality of being orthognathous, or of having jaws with little or no forward projection.

Orthognathous (*or-thog'-na-thus*) [ὀρθός, straight; γναθος, the jaw]. In biology, straight-jawed; a facial profile having a gnathic angle of from 83° to 90°; also called *Mesognathous*. See *Index*.

Orthognathy (*or-thog'-na-the*). See *Orthognathism*.

Orthogonial (*or-tho-go'-ne-al*) [ὀρθός, straight; γωνία, an angle]. Right-angled. **O. Cancelli,** those cancelli in bone-tissue in which there are two sets of bony structure applied at right angles to each other.

Orthomesocephalous (*or-tho-mez-o-sef'-al-us*) [ὀρθός, straight; μέσος, middle; κεφαλή, the head]. In craniometry, a term applied to a skull with a transverso-vertical index between 75.1° and 79.9°, and a vertical index between 70.1° and 75°.

Orthometer (*or-thom'-et-er*) [ὀρθός, straight; μέτρον, measure]. An instrument for measuring the relative degree of protrusion of the eyes.

Orthomorphia (*or-tho-mor'-fe-ah*) [ὀρθός, straight; μορφή, form]. The correction of abnormalism of shape or form by surgical procedure.

Orthomorphic (*or-tho-mor'-fik*). Same as *Orthopedic*.

Orthomorphosis (*or-tho-mor-fo'-sis*). Same as *Orthomorphia*.

Orthomorphotic (*or-tho-mor-fot'-ik*) [ὀρθός, straight; μορφή, form]. Pertaining to orthomorphosis.

Orthopedia (*or-tho-pe'-de-ah*) [ὀρθός, straight; παῖς, child]. The surgical and mechanical correction of the deformities of children, and of deformities in general; orthomorphia.

Orthopedic (*or-tho-pe'-dik*) [ὀρθός, straight; παῖς, child]. Pertaining to orthopedia; intended to correct deformities, congenital or acquired. **O. Surgery,** the branch of surgery devoted to orthopedia.

Orthopedics (*or-tho-pe'-diks*). See *Orthopedic Surgery*.

Orthopedist (*or-tho-pe'-dist*) [ὀρθός, straight; παῖς, child]. One who practises orthopedic surgery.

Orthopedy (*or'-tho-pe-de*). See *Orthopedia*.

Orthophonia (*or-tho-fo'-ne-ah*) [ὀρθός, straight; φωνή, voice]. Having a normal voice.

Orthophony (*or-thof'-o-ne*) [ὀρθός, straight; φωνή, voice]. The treatment and correction of defects of the voice.

Orthophoria (*or-tho-fo'-re-ah*) [ὀρθός, straight; φορός, a tending]. A tending of the visual lines in parallelism.

Orthophosphoric Acid (*or-tho-fos-for'-ik*). See *Acid*.

Orthophrenia (*or-tho-fre'-ne-ah*) [ὀρθός, straight; φρήν, mind]. Sanity; the correction or cure of insanity.

Orthophrenic (*or-tho-fren'-ik*) [ὀρθός, straight; φρήν, the mind]. Pertaining to *Orthophrenia*.

Orthophrenismus (*or-tho-fren-iz'-mus*). Same as *Orthophrenia*.

Orthophreny (*or'-tho-fren-e*). Synonym of *Orthophrenia*.

Orthophthalmic (*or-thoff-thal'-mik*) [ὀρθός, straight; ὀφθαλμός, the eye]. Relating to the correction of strabismus.

Orthopnea (*or-thop-ne'-ah*) [ὀρθός, straight; πνοή, breathing]. A condition marked by quick and labored breathing, in which the patient finds relief only by maintaining an upright position. **O. cardiaca.** Synonym of *Angina pectoris*. **O. clangosa.** Synonym of *Whooping-cough*. **O. cynanchica.** Synonym of *Croup*. **O. tussiculosa.** Synonym of *Whooping-cough*.

Orthopneic (*or-thop-ne'-ik*) [ὀρθός, straight; πνοή, breathing]. Characterized by orthopnea.

Orthopnic (*or-thop'-nik*) [ὀρθός, straight; πνεῖν, to breathe]. One affected with orthopnea.

Orthopraxis, Orthopraxy (*or-tho-praks'-is, or'-tho-praks-e*) [ὀρθός, straight; πρᾶξις, doing]. The correction of deformities of the body.

Orthopterous (*or-thop'-ter-us*) [ὀρθός, straight; πτερόν, wing]. In biology, straight-winged; having wings that lie straight when folded, *e. g.*, grasshoppers.

Orthoptic (*or-thop'-tik*) [ὀρθός, correct; ὀπτικός, seeing]. Pertaining to normal binocular vision. **O. Training,** a method of correcting the monocular or defective vision of those having strabismus or muscular insufficiency, by stereoscopic and other ocular exercises of a gymnastic kind. See *Dyerism*.

Orthopygium (*or-tho-pij'-e-um*) [ὀρθός, straight; πυγή, the rump]. Synonym of *Coccyx*.

Orthoscope (*or'-tho-skōp*) [ὀρθός, straight; σκοπεῖν, to see]. 1. An instrument for examination of the eye through a layer of water, whereby the curvature, and hence the refraction of the cornea is neutralized and the cornea acts as a plane medium. 2. An instrument for use in drawing the projections of skulls.

Orthoscopic (*or-tho-skop'-ik*) [ὀρθός, straight; σκοπεῖν, to see]. 1. Pertaining to an orthoscope or to orthoscopy. 2. Applied to lenses cut from the periphery of a large lens in such a manner as to act as if decentered. 3. Having normal vision. **O. Ocular.** See *Ocular*.

Orthoscopy (*or-thos'-ko-pe*) [ὀρθός, straight; σκοπεῖν, to see]. The examination of the eye by the orthoscope; also, the microscopic examination of objects in such a way that they appear as flat bodies without relief; the absence of spheric aberration in the appearance of an object seen through a lens or microscope.

Orthosiphon (*or-tho-si'-fon*) [ὀρθός, straight; σίφων, a tube]. A genus of cœimoideaceous plants. **O. stamineus,** Java tea; a labiate plant of the E. Indies. Its aqueous extract, an infusion of the plant, and a syrup have been employed. It is a safe and efficient remedy in diseases of the bladder. Unof.

Orthosis (*or-tho'-sis*) [ὀρθωσις, a making straight]. The process of straightening a distorted part.

Orthospermous (*or-tho-sper'-mus*) [ὀρθός, straight; σπέρμα, seed]. In biology, having straight seeds.

Orthostichy (*or'-tho-stik-e*) [ὀρθός, straight; στίχος, a row or line]. In biology, a vertical rank, as leaves on a stem.

Orthostomatous (*or-tho-sto'-mat-us*) [ὀρθός, straight; στόμα, a mouth]. In biology, having a straight mouth.

Orthosyne (*or-thos'-in-e*) [ὀρθοσύνη]. Erectility.

Orthotast (*or'-tho-tast*) [ὀρθός, straight; τάσσειν, to arrange]. An apparatus for straightening curvatures of long bones. It has also been used as a tourniquet.

Orthoter (*or-thot'-er*). Synonym of *Orthopedist*.

Orthoterion, Orthoterium (*or-tho-te'-re-on, or-tho-te'-re-um*) [ὀρθός, straight]. An apparatus for straightening curved limbs.

Orthotonos, Orthotonus (*or-thot'-o-nos, or-thot'-o-nus*) [ὀρθός, straight; τόνος, tension]. Tetanic cramp in which the body lies rigid and straight.

Orthotropal (*or-thot'-ro-pal*). Same as *Orthotropous*.

Orthotrophy (*or-thot'-ro-fe*) [ὀρθός, straight; τροφή, nourishment]. Correct or normal nourishment; the normal process of nutrition.

Orthotropic (*or-tho-trop′-ik*) [ὀρθός, straight; τρέπειν, to turn]. In biology, pertaining to, or exhibiting orthotropism.

Orthotropism (*or-thot′-ro-pizm*) [ὀρθός, straight; τρέπειν, to turn]. In biology, vertical, upward, or downward growth.

Orthotropous (*or-thot′-ro-pus*) [ὀρθός, straight; τρέπειν, to turn]. In biology, applied to straight, symmetric seeds in which the chalaza is at the base and the micropyle at the apex.

Orthysteroptoma (*or-this-ter-op′-to-mah*) [ὀρθός, straight; ὑστέρα, womb; πτῶμα, fall]. Prolapse of the uterus without inversion.

Orticaria (*or-tik-a′-re-ah*). Same as *Urticaria*.

Oryctographic (*or-ik-to-graf′-ik*) [ὀρυκτός, dug out; γράφειν, to write]. Pertaining to oryctography.

Oryctography (*or-ik-tog′-ra-fe*) [ὀρυκτός, dug out; γράφειν, to write]. A description of minerals or of fossils.

Oryctologic (*or-ik-to-loj′ ik*) [ὀρυκτός, dug out; λόγος, science]. Pertaining to oryctology.

Oryctologist (*or-ik-tol′-o-jist*) [ὀρυκτός, dug out; λόγος, science]. One versed in oryctology.

Oryctology (*or-ik-tol′-o-je*) [ὀρυκτός, dug out; λόγος, science]. The science of the nature and character of minerals and fossils.

Oryctozoölogic (*or-ik-to-zo-o-loj′-ik*) [ὀρυκτός, fossil; ζῷον, an animal]. Same as *Paleontologic*.

Oryctozoölogy (*or-ik-to-zo-ol′-o-je*) [ὀρυκτός, fossil; ζῷον, an animal; λόγος, science]. The same as *Paleontology*.

Oryza (*o-ri′-zah*) [ὄρυζα, rice]. The common rice-plant, *O. sativa*, belonging to the grass family. Its seed consists mainly of starch, and is one of the most nutritious of the various grains. Also, in pathology, the fecal discharges of cholera, which closely resemble rice-water.

Os [L.: gen., *Oris*; *pl.*, *Ora*]. The mouth. **O. externum**, the external opening or entrance to the womb. **O. internum**, the internal orifice of the womb. **O. tincæ** ("tench's mouth"), the os uteri, or mouth of the uterus. **O. uteri.** Same as *O. internum*.

Os [L.: gen., *Ossis*; *pl.*, *Ossa*]. A bone. See *Bone*. **O. innominatum.** See *Bones, Table of*. **O. magnum.** See *Bones, Table of*.

Osanore, or Ozanore, Teeth (*oz′-an-or*) [*os*, bone]. A name given by Mr. William Rogers to artificial teeth constructed from the ivory of the tooth of the hippopotamus, and, as he says, submitted to the action of some peculiar chemic agent, by which the pores of the ivory become filled with a siliceous substance.

Osazone (*o′-zah-zōn*) [*ose*, systematic termination for members of the starch and sugar-group; *az*, a syllable indicative of nitrogen; *one*, the systematic termination of certain derivatives of the sugar-group]. A compound formed when solutions of sugars are warmed for some time with a solution of phenylhydrazin ($C_6H_5NHNH_2$) and dilute acetic acid. They separate either in the amorphous or crystalline state. An intermediate product called a hydrazone is first formed. Each sugar forms a special osazone, lactose, for example, forming phenyl-lactosazone.

Oschea (*os′-ke-ah*). Synonym of *Scrotum*.

Oscheal (*os′-ke-al*) [ὄσχεον, scrotum]. Pertaining to the scrotum.

Oscheitis (*os-ke-i′-tis*) [ὄσχεον, scrotum; ιτις, inflammation]. Inflammation of the scrotum.

Oschelephantiasis (*osk-el-e-fan-ti′-as-is*) [ὄσχεον, scrotum; ἐλεφαντίασις, elephantiasis]. Elephantiasis of the scrotum.

Oschematedema, Oschemedema (*os-kem-at-e-de′-mah*, *os-kem-e-de′-mah*) [ὄσχεον, scrotum; αἷμα, blood; οἴδημα, edema]. Effusion of blood into the scrotum; hematoma of the scrotum.

Oscheocarcinoma (*os-ke-o-kar-sin-o′-mah*) [ὄσχεον, scrotum; καρκίνωμα, carcinoma: *pl.*, *Oscheocarcinomata*]. Carcinoma of the scrotum.

Oscheocele (*os′-ke-o-sēl*) [ὄσχεον, scrotum; κήλη, hernia]. Scrotal hernia.

Oscheochalasis (*os-ke-o-kal-a′-sis*) [ὄσχεον, scrotum; χάλασις, loosening]. Hypertrophy of the connective tissue of the scrotum; also, pendulous scrotum.

Oscheohydrocele (*os-ke-o-hi′-dro-sēl*) [ὄσχεον, scrotum; ὑδωρ, water; κήλη, tumor]. A hydrocele occupying an old hernial sac in the scrotum, after the cure of the hernia.

Oscheolith (*os′-ke-o-lith*) [ὄσχεον, scrotum; λίθος, stone]. Scrotal calculus.

Oscheon (*os′-ke-on*) [ὄσχεον, scrotum]. The scrotum.

Oscheoncus (*os-ke-ong′-kus*) [ὄσχεον, scrotum; ὄγκος, swelling]. A swelling or tumor of the scrotum.

Oscheonyssis (*os-ke-on-is′-is*) [ὄσχεον, scrotum; νύσσειν, to puncture]. Paracentesis of the scrotum.

Oscheophlogosis (*os-ke-o-flo-go′-sis*) [ὄσχεον, scrotum; φλόγωσις, inflammation]. Same as *Oscheitis*.

Oscheoplastic (*os-ke-o-plas′-tik*) [ὄσχεον, scrotum; πλάσσειν, to form]. Pertaining to plastic operations upon the scrotum.

Oscheoplasty (*os′-ke-o-plas-te*) [ὄσχεον, scrotum; πλάσσειν, to form]. Oscheoplastic surgery; plastic surgery of the scrotum.

Oscheopyedema (*os-ke-o-pi-e-de′-mah*) [ὄσχεον, scrotum; πύον, pus; οἴδημα, edema]. Purulent edema of the scrotum.

Oschitis (*os-ki′-tis*). See *Oscheitis*.

Oschocarcinoma (*os-ko-kar-sin-o′-mah*). Synonym of *Oscheocarcinoma*.

Oschuredema (*os-ku-re-de′-mah*) [ὄσχεον, scrotum; οὖρον, urine; οἴδημα, edema]. Extravasation of urine into the scrotum.

Oschydredema (*osk-hi-dre-de′-mah*) [ὄσχεον, scrotum; ὑδωρ, water; οἴδημα, edema]. Edema of the scrotum.

Oscillation (*os-il-a′-shun*) [*oscillatio; oscillare*, to sway to and fro]. A swinging or vibration. Also, any tremulous motion. See *Hippus*. **O., Consecutive.** Same as *Phenomena of Transfer*.

Oscitancy (*os′-it-an-se*) [*oscitare*, to yawn]. The disposition to yawn; drowsiness.

Oscitant (*os′-it-ant*) [*oscitare*, to yawn]. Yawning. **O. Fever,** fever accompanied by much yawning.

Oscitation (*os-it-a′-shun*) [*oscitatio; oscitare*, to yawn]. The act of yawning or gaping.

Osculant (*os′-ku-lant*) [*osculari*, to kiss]. In biology, closely connected.

Oscularis (*os-ku-la′-ris*) [*osculans*, kissing]. The kissing-muscle, or orbicularis oris. See *Muscles, Table of*.

Osculation (*os-ku-la′-shun*) [*osculatio; osculari*, to kiss]. The union or anastomosis of vessels or lymph-channels by their mouths. Also, the act of kissing.

Oscule (*os′-kūl*) [*osculum*, a little mouth, dim. of *os*, mouth]. Same as *Osculum*.

Osculum (*os′-ku-lum*) [a little mouth: *pl.*, *Oscula*]. A small aperture. In biology: (*a*) the mouth or exhalant aperture of a sponge, either "scattered," "excurrent" or "cloacal." Cf. *Pseudoproct*; (*b*) one of the bothria or fossettes of the head of a platode worm; (*c*) the opening into the pituitary body.

-ose (*-ōz*) [*-osus*]. A suffix signifying full of. Also, the systematic termination for the members of the starch and sugar group.

Oser's Oak-red. See *Oak-bark*.

-osis (*o′-sis*). A suffix signifying the progress or condition of.

Osite (*os′-it*) [*os*, a bone]. The name applied by Leidy

a form of guano made up largely of the altered ones of marine animals.

er's Method. A method of studying blood-plaques; drop of osmic acid is placed on the cleansed finger, hich is then pricked and the drop transferred to ide. **O.'s Phenomenon,** the aggregation of hemat- blasts occurring immediately in blood drawn from the dy.

mate (*oz'-māt*) [*ὀσμή*, smell]. A salt of osmic acid.

matic (*oz-mat'-ik*) [*ὀσμή*, smell]. Characterized by keen sense of smell; having a highly developed rhi- ncephalon.

mazome (*oz'-maz-ōm*) [*ὀσμή*, smell; *ζωμός*, soup]. brownish-yellow substance developed by heat in uscular fibers, and imparting to cooked meats their culiar flavor. [Old.]

mesis (*oz-me'-sis*) [*ὀσμησις*, a smelling]. The act smelling.

meterium (*oz-me-te'-re-um*) [*ὀσμή*, odor; *τήριον*, a ix: *pl.*, *Osmeteria*]. In zoölogy, an organ produc- scent or odor, especially in the larvæ of certain idoptera.

miamic Acid (*oz-me-am'-ik*) [*ὀσμή*, smell; *ammonia*], $Os_2N_2O_8$. A compound of ammonia and osmium roxid.

miate (*oz'-me-āt*). Synonym of *Osmate*.

mic (*oz'-mik*) [*ὀσμή*, smell]. Pertaining to or obtained m osmium. **O. Acid.** Osmic acid is used as a ing and staining agent; it stains fat black. See *id, and Stains, Table of.*

midrosis (*oz-mid-ro'-sis*) [*ὀσμή*, smell; *ἱδρωσις*, eat]. The secretion of a malodorous perspiration; midrosis, *q. v.*

mious (*oz'-me-us*) [*ὀσμή*, smell]. Containing osmium a dyad or tetrad element.

mium (*oz'-me-um*) [*ὀσμή*, smell]. The heaviest of known metals (symbol Os, sp. gr. 22.48., at. wt. 0.08); the basis of osmic acid. See *Elements, ble of.*

modysphoria (*oz-mo-dis-fo'-re-ah*) [*ὀσμή*, smell; , ill; *φέρειν*, to bear]. Intolerance of certain urs.

mogene (*oz'-mo-jēn*) [*ὠσμός*, pushing; *γενής*, pro- ing]. A laboratory apparatus employed in effect- osmosis.

mograph (*oz'-mo-graf*) [*ὠσμός*, an impulse; *γράφειν*, write]. An apparatus for registering the changes the level of the liquid in an endosmometer.

mology (*oz-mol'-o-je*). Synonym of *Osphresiology*.

mometer (*oz-mom'-et-er*) [*ὀσμή*, smell; *μέτρον*, asure]. An instrument for testing the sense of ell.

mometric (*oz-mo-met'-rik*) [*ὀσμή*, smell; *μέτρον*, easure]. Pertaining to osmometry.

mometry (*oz-mom'-et-re*) [*ὀσμή*, smell; *μέτρον*, asure]. The estimation of the acuteness of the se of smell.

monosology (*oz-mo-nos-ol'-o-je*) [*ὀσμή*, smell; *νόσος*, ease; *λόγος*, science]. The science of the diseases etting the sense of smell.

monosus (*oz-mon'-o-sus*) [*ὀσμή*, odor; *νόσος*, disease]. ease of the sense of smell.

mose (*oz'-mōz*), **Osmosis** (*oz-mo'-sis*) [*ὠσμός*, im- e]. That property by which liquids and crystal- substances in solution pass through porous septa; smosis and exosmosis.

motic (*oz-mot'-ik*) [*ὠσμός*, impulse]. Pertaining to osis. **O. Equivalent,** "that figure that indicates weight of water which replaces by osmosis one by weight of the substance subjected to the pro- " **O. Pressure,** the pressure exerted by the cles of compounds when dissolved, directly ex- pressed or shown by osmotic phenomena. It is equal to that which would be exerted by an equal amount of the substance if it were converted into gas and occupied the same volume at the same temperature as the solution.

Osmunda (*os-mun'-dah*) [L.]. A genus of ferns. **O. regalis** (osmund, royal-fern, flowering-fern, buck-horn) is tonic, astringent, and demulcent, and is vaunted as a cure for rickets. Unof.

Osphradium (*os-fra'-de-um*) [*ὀσφράδιον*, an olfactory; dim. of *ὀσφρα*, smell: *pl.*, *Osphradia*]. In biology, a special sense-organ in molluscs, supposed to be olfactory in function.

Osphrasia (*os-fra'-ze-ah*). Synonym of *Osphresis*.

Osphresiologic (*os-fre-ze-o-loj'-ik*) [*ὀσπρησις*, smell; *λόγος*, science]. Pertaining to osphresiology, or to smell.

Osphresiology (*os-fre-ze-ol'-o-je*) [*ὀσφρησις*, smell; *λόγος*, science]. The science of the sense of smell and its organs; also of odors and perfumes.

Osphresis (*os-fre'-sis*) [*ὀσφρησις*, smell]. The sense of smell; olfaction.

Osphretic (*os-fret'-ik*) [*ὀσφρητικός*, capable of smelling]. Same as *Olfactory*.

Osphristics (*os-fris'-tiks*) [*ὀσφρησις*, the sense of smell]. The science of the phenomena of olfaction.

Osphus (*os'-fus*) [*ὀσφύς*, loin]. Loin.

Osphyalgema (*os-fi-al-je'-mah*). Synonym of *Osphyalgia*.

Osphyalgia (*os-fi-al'-je-ah*) [*ὀσφύς*, loin; *ἄλγος*, pain]. Sciatica. Also, any pain in the hips or loins.

Osphyarthritis (*os-fi-arth-ri'-tis*). Synonym of *Coxitis*.

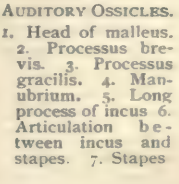
Osphyarthrocace (*os-fi-arth-rok'-as-e*) [*ὀσφύς*, the loin; *ἄρθρον*, a joint; *κακός*, evil]. Synonym of *Coxitis* or *Morbus coxarius*.

Osphyitis (*os-fi-i'-tis*) [*ὀσφύς*, loin; *ιτις*, inflammation]. Lumbar inflammation; coxitis.

Osphyomyelitis (*os-fi-o-mi-el-i'-tis*) [*ὀσφύς*, loin; *ινελός*, marrow; *ιτις*, inflammation]. Myelitis of the lumbar portion of the spinal cord. See *Ischiomyelitis*.

Osphyrrheuma (*os-fi-ru'-mah*) [*ὀσφύς*, loin; *ῥεῦμα*, rheum]. Rheumatism of the loins or the hip-joint.

Ossa (*os'-ah*) [L., *pl.* of *os*, a bone]. Bones. **O. innominata,** the irregular bones forming the sides and anterior wall of the pelvis. **O. lata,** the broad or flat bones composing the walls of cavities, as the bones of the cranium, in distinction from **O. longa,** the long bones, as those of the limbs. **O. triquetra.** See *Wormian Bones* and *Triquetrum*. **O. wormiana,** See *Wormian Bones*.



Ossature (*os'-at-ūr*) [*os*, a bone]. The arrangement of the bones of the body.

Ossein (*os'-e-in*) [*os*, a bone]. A combination of proteids, mainly collagen and an albuminoid, composing the organic structure of bone; it is called also *ostein* and *bone-cartilage*.

Osselet (*os'-el-et*) [dim. of *os*, a bone]. A small bone; also a hard nodule on the inner aspect of the horse's knee.

Osseous (*os'-e-us*) [*osseus*; *os*, bone]. Bony; composed of or resembling bone.

Ossicle (*os'-ik-l*) [*ossiculum*, dim. of *os*, a bone]. In biology, a small bone, or in invertebrates a calcareous, bone-like structure. **O., Auditory,** a chain of small bones found for the most part in the tympanic cavity of vertebrates.

AUDITORY OSSICLES.

1. Head of malleus. 2. Processus brevis. 3. Processus gracilis. 4. Manubrium. 5. Long process of incus 6. Articulation between incus and stapes. 7. Stapes

Ossicula (*os-ik'-u-lah*) [L.]. Plural of *Ossiculum*. **O. auditus.** See *Ossicle*.

Ossicular (*os-ik'-u-lar*) [*ossiculum*, a small bone]. Resembling small bones.

Ossiculate (*os-ik'-u-lāt*) [*ossiculum*, a small bone]. Provided with ossicles.

Ossicule (*os'-ik-ūl*). Same as *Ossicle*.

Ossiculum (*os-ik'-u-lum*). Synonym of *Ossicle*.

Ossiculus (*os-ik'-u-lus*) [masc. dim. of *os*, a bone]. Same as *Pyrene*.

Ossiferous (*os-if'-er-us*) [*os*, a bone; *ferre*, to bear]. Bearing or producing bone-tissue.

Ossific (*os-if'-ik*) [*os*, bone; *facere*, to make]. Producing bone.

Ossification (*os-if-ik-a'-shun*) [*os*, a bone; *facere*, to make]. The formation of bone; also a bony formation.

Ossified (*os'-if-īd*) [*os*, bone; *facere*, to make]. Transformed into bone.

Ossifluent (*os-if'-lu-ent*) [*os*, *ossis*, a bone; *fluere*, to flow]. Breaking down and softening the bony tissue; as an ossifluent abscess.

Ossiform (*os'-if-orm*) [*os*, a bone; *forma*, form]. Bone-like.

Ossifying (*os'-if-i-ing*) [*os*, bone; *facere*, to make]. Change into bone. **O. Chondroma,** a chondroma which is changing into hard tissue resembling bone. **O. Myositis,** inflammation of muscle, attended with, or followed by, the deposition of hard, bone-like masses.

Ossin (*os'-in*) [*os*, a bone]. An extract made from bone-tissue, and used in organotherapy, *q. v.*

Ossiterra (*os-it-er'-ah*) [*os*, bone; *terra*, earth]. The chalk-like substance, composing about two-thirds by weight of adult bone; it is called also bone-earth. The other third consists of bone-cartilage or ossein.

Ossivorous (*os-iv'-o-rus*) [*os*, a bone; *vorare*, to devour]. In biology, feeding upon bones.

Ostæmia (*os-te'-me-ah*). See *Ostemia*.

Ostagra (*os-ta'-grah*) [ὀστέον, bone; ἄγρα, seizure]. A bone-forceps.

Ostalgia (*os-tal'-je-ah*) [ὀστέον, bone; ἄλγος, pain]. Pain in a bone.

Ostarium (*os-ta'-re-um*). Synonym of *Ossicle*.

Ostarthritis (*ost-ar-thri'-tis*). See *Osteoarthritis*.

Osteal (*os'-te-al*) [ὀστέον, bone]. Osseous, bony; pertaining to bone.

Ostealgia (*os-te-al'-je-ah*). See *Ostalgia*.

Ostealleosis (*os-te-al-e'-o-sis*) [ὀστέον, bone; ἀλλοίωσις, alteration]. A metamorphosis of the substance of bone, as exemplified in osteosarcoma.

Osteameba (*os-te-am-e'-bah*) [ὀστέον, bone; *amœba*, a rhizopod, from ἀμοιβή, change]. In biology, a bone-cell or osteoblast regarded as an organism. Cf. *Neurameba*, *Myameba*.

Osteanagenesis (*os-te-an-aj-en'-es-is*) [ὀστέον, bone; ἀναγεννᾶν, to regenerate]. The regeneration of bone.

Osteanaphysis (*os-te-an-af'-is-is*) [ὀστέον, bone; ἀναφύειν, to reproduce]. The reproduction of bone-tissue. Synonym of *Osteanagenesis*.

Ostearthrocace (*os-te-ar-throk'-as-e*) [ὀστέον, bone; ἄρθρον, joint; κακός, bad]. Malignant caries of the bones of a joint.

Osteauxe (*os-te-awks'-e*) [ὀστέον, bone; αὔξη, growth]. Abnormal enlargement of a bone.

Osteche (*os-tek'-e*). Synonym of *Ostechema*.

Ostechema (*os-tek-e'-mah*) [ὀστέον, bone; ἦχημα, sound]. The sound produced on percussing the frontal bone.

Ostectopy (*os-tek'-to-pe*) [ὀστέον, bone; ἐκτοπός, displaced]. Displacement of bone.

Osteectomy (*os-te-ek'-to-me*) [ὀστέον, bone; ἐκτομή, excision]. Excision of a portion of bony tissue.

Osteide (*os'-te-id*) [ὀστέον, bone]. A small bony m sometimes found in the pulp-cavity of a tooth.

Osteïn (*os'-te-in*) [ὀστέον, bone]. 1. The organic con tuent of bone; ossein. 2. Less frequently, the m eral part of bony substance.

Osteitic (*os-te-it'-ik*) [ὀστέον, bone; ιτις, inflammatio Pertaining to osteitis.

Osteitis (*os-te-i'-tis*) [ὀστέον, bone; ιτις, inflammatio Inflammation of bone. **O. carnosa,** inflammati of bone, attended with the presence of an excess fungous granulations. **O., Condensing.** See *Os sclerosis*. **O. deformans,** the bones yielding to press and becoming distorted. **O., Gummatous,** a chro form due to syphilis and characterized by the formati of gummata in the cancellous tissue of the epiphys in the shaft of the bone, or in the periosteum. **O Ossifying.** Synonym of *Osteosclerosis*. **O., Oste plastic.** Synonym of *Osteosclerosis*. **O., Rarefyin** See *Osteoporosis*. **O., Suppurative,** inflammati of bone attended with suppuration.

Ostembryon (*os-tem'-bre-on*) [ὀστέον, bone; ἔμβρυ fetus]. Synonym of *Lithopedion*.

Ostemia (*os-te'-me-ah*) [ὀστέον, bone; αἷμα, blood]. morbid condition of bone, distinguished by its turg cence with blood.

Ostempyesis (*os-tem-pi-e'-sis*) [ὀστέον, bone; ἐμπύη suppuration]. Suppuration of a bone.

Osteo- (*os'-te-o-*) [ὀστέον, bone]. A prefix that signifi connection with or relation to bone.

Osteoanabrosis (*os'-te-o-an-ab-ro'-sis*) [ὀστέον, bon ἀνά, up; βρῶσις, eating]. The absorption of bo or its destruction, as by osteoclasts.

Osteo-aneurysm (*os'-te-o-an'-u-rizm*) [ὀστέον, bon ἀνεύρυσμα, aneurysm]. Aneurysm of the arteries a bone; a pulsating tumor of a bone.

Osteo-arthritis (*os'-te-o-ar-thri'-tis*) [ὀστέον, bon ἄρθρον, joint; ιτις, inflammation]. A chronic infla mation of the bones forming a joint.

Osteoarthropathy (*os'-te-o-ar-throp'-ath-e*) [ὀστέ bone; ἄρθρον, joint; πάθος, disease]. Any disea of bony articulations. **O., Hypertrophic Pulmo ary,** a disease first described by Marie, characteriz by a bulbous enlargement of the terminal phalang of the fingers and toes, a thickening of the articul ends of the bones, a peculiar curvation of the na and an enlargement of the lower jaw. According Marie the condition is usually associated with dis of the lungs or pleura, whence the name *osteoarth pathie pneumique hypertrophiante*, and results fr the absorption of toxic products from the diseased l The disease is not allied to akromegaly.

Osteo-arthrotomy (*os-te-o-ar-throt'-o-me*) [ὀστέον, bo ἄρθρον, joint; τομή, a cutting]. Inter-articular oste omy, as in cuneiform operations on the tarsus. S the various cuneiform operations in *Operations, Tabl*

Osteoblast (*os'-te-o-blast*) [ὀστέον, bone; βλαστ germ]. In biology, one of the formative cells of bo tissue: a name proposed by Gegenbauer (18 for the connective-tissue cells that proliferate one side of bone-substance, in the direction of supplanted cartilage. Their processes and finally cells themselves become imbedded in the cal matrix and become bone-cells. The intercell threads of protoplasm lead to the development of canaliculi, the cell-bodies producing the so-cal lacunæ.

Osteoblastic (*os-te-o-blas'-tik*) [ὀστέον, bone; βλαστ a germ]. Pertaining to osteoblasts, or to the form tion of bone.

Osteocampsia (*os-te-o-kamp'-se-ah*) [ὀστέον, bone; κ πτειν, to bend]. Curvature of a bone without ture, as in osteomalacia.

steocancer (*os-te-o-kan'-ser*). Synonym of *Osteocarcinoma.*

steocarcinoma (*os'-te-o-kar-sin-o'-mah*) [ὀστέον, bone; καρκίνωμα, carcinoma: *pl.*, *Osteocarcinomata*]. Carcinoma of bone; ossifying carcinoma.

steocele (*os'-te-o-sēl*) [ὀστέον, bone; κήλη, tumor]. A bone-like substance found in old hernial sacs; also marked hardening of the testicle.

steocephaloma (*os'-te-o-sef-al-o'-mah*) [ὀστέον, bone; κεφαλή, head; ὄμα, tumor: *pl.*, *Osteocephalomata*]. Encephaloma or encephaloid sarcoma of bone.

steochondritis (*os'-te-o-kon-dri'-tis*) [ὀστέον, bone; χόνδρος, cartilage; ιτις, inflammation]. Inflammation involving both bone and cartilage.

steochondroma (*os'-te-o-kon-dro'-mah*) [ὀστέον, bone; χόνδρος, cartilage; ὄμα, tumor: *pl.*, *Osteochondromata*]. A tumor that is in part bony, and in part cartilaginous.

teoclasia (*os-te-o-kla'-ze-ah*). See *Osteoclasis.*

teoclasis (*os-te-ok'-las-is*) [ὀστέον, bone; κλάειν, to break]. 1. Fracture of bones for purposes of remedying deformity. 2. The destruction of bony tissue by osteoclasts.

teoclast (*os'-te-o-klast*) [ὀστέον, bone; κλαστός, broken]. 1. An instrument for performing osteoclasis. 2. One of the large multinucleate cells, derived from mesenchymal cells, and frequently found against the surface of bone in little eroded depressions (*Howship's lacunæ*). They are concerned in the removal of bone. They are so called by Kölliker, and are named by Robin and other French histologists *Myeloplaxes* or *Myeloplaques.*

teoclastic (*os-te-o-klas'-tik*) [ὀστέον, bone; κλαστός, broken]. Of the nature of an osteoclast; concerned in the breaking down and absorption of bone.

teoclasy (*os'-te-o-kla-se*). See *Osteoclasis.*

teocolla (*os-te-o-kol'-ah*) [ὀστέον, bone; κόλλα, glue]. Bone-glue; inferior glue obtained from bones.

teocomma (*os-te-o-kom'-ah*) [ὀστέον, bone; κόμμα, segment: *pl.*, *Osteocommata*]. Any one of a series of bone-segments; in the adult skeleton, a vertebra is an example.

teocope (*os'-te-o-kōp*) [ὀστέον, bone; κόπος, pain]. Bone-ache; the pain in the bones, usually felt at night, when the body is warmly covered, that characterizes syphilis.

teocopic (*os-te-o-kop'-ik*) [ὀστέον, bone; κόπος, pain]. Resembling, or consisting of, an osteocope; like a bone-ache.

teocyst (*os'-te-o-sist*) [ὀστέον, bone; κύστις, cyst]. A cyst with hard, bone-like contents.

teocystoid (*os-te-o-sis'-toid*) [ὀστέον, bone; κύστις, cyst; εἶδος, like]. Resembling an osteocyst.

teocystoma (*os-te-o-sis-to'-mah*) [ὀστέον, bone; κύστις, cyst; ὄμα, tumor]. A cystic tumor of bone.

teocystosarcoma (*os'-te-o-sis'-to-sar-ko'-mah*) [ὀστέον, bone; κύστις, cyst; σάρξ, flesh; ὄμα, tumor]. A cystosarcoma of bone.

teodentinal (*os-te-o-den'-tin-al*) [ὀστέον, bone; *dens*, tooth]. Made up of osteodentine.

teodentine (*os-te-o-den'-tin*) [ὀστέον, bone; *dens*, tooth]. A tissue of the nature of, and intermediate in structure between, bone and dentine.

teodermatoplastic (*os'-te-o-der-mat-o-plas'-tik*) [ὀστέον, bone; δέρμα, skin; πλάσσειν, to mold]. Pertaining to the formation of osseous tissue in dermal structures.

teodermatous (*os-te-o-der'-mat-us*) [ὀστέον, bone; δέρμα, skin]. Having an ossified integument. Pertaining to osteodermia.

teodermia (*os-te-o-der'-me-ah*) [ὀστέον, bone; δέρμα, skin]. The existence of osseous formations in the skin or outer covering. It occurs normally in many animals, and occasionally abnormally in man.

Osteodermous (*os-te-o-der'-mus*). Same as *Osteodermatous.*

Osteodiastasis (*os-te-o-di-as'-tas-is*) [ὀστέον, bone; διάστασις, separation]. Separation of bone (as an epiphysis), without true fracture.

Osteodynia (*os-te-o-din'-e-ah*) [ὀστέον, bone; ὀδύνη, pain]. A chronic pain in the bone.

Osteoepiphysis (*os'-te-o-e-pif'-is-is*) [ὀστέον, bone; ἐπίφυσις, epiphysis]. A bony epiphysis.

Osteogangrene (*os'-te-o-gang'-grēn*) [ὀστέον, bone; γάγγραινα, gangrene]. Gangrene or necrosis of bone.

Osteogen (*os'-te-o-jen*) [ὀστέον, bone; γεννᾶν, to produce]. The substance of which osteogenic fibers are made up.

Osteogenesis (*os-te-o-jen'-es-is*) [ὀστέον, bone; γένεσις, genesis]. The development and formation of bone-tissue.

Osteogenesy (*os-te-o-jen'-es-e*). See *Osteogenesis.*

Osteogenetic (*os-te-o-jen-et'-ik*) [ὀστέον, bone; γεννᾶν, to beget]. Pertaining to, or concerned in, osteogenesis. **O. Cell,** an osteoblast. **O. Fibers,** Schäfer's name for the soft and pliant bundles of faintly fibrillated, transparent fibers running out from growing spicules of bone. **O. Layer,** the deep layer of periosteum from which bone is formed.

Osteogenic (*os-te-o-jen'-ik*). Synonym of *Osteogenetic.*

Osteogeny (*os-te-oj'-en-e*). See *Osteogenesis.*

Osteography (*os-te-og'-ra-fe*) [ὀστέον, bone; γράφειν, to write]. Descriptive anatomy of the bones and their articulations.

Osteohalisteresis (*os'-te-o-hal-is-ter-e'-sis*) [ὀστέον, bone; ἅλς, salt; στερέειν, to deprive]. A partial loss of the mineral constituents of bone, concomitant with curvature. See *Rachitis.*

Osteohelcosis (*os-te-o-hel-ko'-sis*) [ὀστέον, bone; ἕλκωσις, ulceration]. Caries of bone.

Osteoid (*os'-te-oid*) [ὀστέον, bone; εἶδος, like]. Resembling or having the nature of bone.

Osteolith (*os'-te-o-lith*) [ὀστέον, bone; λίθος, stone]. A petrified bone.

Osteologist (*os-te-ol'-o-jist*) [ὀστέον, bone; λόγος, science]. One versed in, or expert in, osteology.

Osteology (*os-te-ol'-o-je*) [ὀστέον, bone; λόγος, science]. The science of the nature and structure of the bones.

Osteolysis (*os-te-ol'-is-is*) [ὀστέον, bone; λύσις, dissolution]. Absorption and disappearance of bone.

Osteolytic (*os-te-o-lit'-ik*) [ὀστέον, bone; λύσις, dissolution]. Pertaining to, or concerned in, osteolysis.

Osteoma (*os-te-o'-mah*) [ὀστέον, bone; ὄμα, tumor: *pl.*, *Osteomata*]. A bony tumor; exostosis. **O., Dental,** dental exostosis or hypercementosis. **O. durum,** a tumor consisting of very hard, bone-like tissue. **O. eburneum.** Synonym of *O. durum.* **O. medullosum,** an osteoma formed chiefly of cancellated tissue. **O. spongiosum.** Synonym of *O. medullosum.*

Osteomalacia (*os-te-o-mal-a'-se-ah*) [ὀστέον, bone; μαλακία, softness]. Softening of bone from loss of its earthy constituents, occurring in adults, especially in females, and in the course of pregnancy. The true cause of the disease is not known; by some it is considered to be infectious, but this view is not proved. **O. infantum.** See *Rickets.*

Osteomalacial, Osteomalacic (*os-te-o-mal-a'-se-al, os-te-o-mal-a'-sik*) [ὀστέον, bone; μαλακία, softening]. Pertaining to, or affected with, osteomalacia.

Osteomalacosis (*os-te-o-mal-ak-o'-sis*). Synonym of *Osteomalacia.*

Osteomalactic (*os-te-o-mal-ak'-tik*) [ὀστέον, bone; μαλακτικός, emollient]. Pertaining to osteomalacia.

Osteomere (*os′-te-o-mēr*) [ὀστέον, bone; μέρος, part]. Same as *Osteocomma.*

Osteometry (*os-te-om′-et-re*) [ὀστέον, bone; μέτρον, measure]. The study of the proportions and measurements of the skeleton.

Osteomiosis (*os-te-o-mi-o′-sis*) [ὀστέον, bone; μείωσις, diminution]. Disintegration of bone.

Osteomyelitis (*os-te-o-mi-el-i′-tis*) [ὀστέον, bone; μυελός, marrow; ιτις, inflammation]. Inflammation of the marrow of bone. **O., Conchiolin,** *Mother-of-pearl Osteomyelitis;* a plastic form of inflammation of bone caused by the presence of pearl-dust in the capillary vessels of the epiphyseal extremities of the long bones in persons employed in the manufacture of articles of pearl. **O., Gummatous,** a form due to the development of gummata in the bone-marrow. **O. malleosa,** osteomyelitis due to the *Bacillus malleus,* or glanders-bacillus. See *Bacteria, Synonymatic Table of.* **O., Mother-of-pearl.** See *O., Conchiolin.* **O., Scrofulous,** probably a chronic inflammation of the bone-marrow of tuberculous character.

Osteomyelon, Osteomyelum (*os-te-o-mi′-el-on, os-te-o-mi′-el-um*) [ὀστέον, bone; μυελός, marrow]. The marrow of bone.

Osteonabrosis (*os-te-on-ab′-ro-sis*). See *Osteoanabrosis.*

Osteonagenesis (*os-te-on-aj-en′-es-is*). See *Osteogenesis.*

Osteoncosis, Osteoncus (*os-te-on-ko′-sis, os-te-ong′-kus*) [ὀστέον, bone; ὄγκος, tumor]. A tumor of a bone. An exostosis.

Osteonecrosis (*os-te-o-ne-kro′-sis*) [ὀστέον, bone; νέκρωσις, death]. Necrosis, or death of bone.

Osteoneuralgia (*os-te-o-nu-ral′-je-ah*) [ὀστέον, bone; νεῦρον, nerve; ἄλγος, pain]. Neuralgia of bone.

Osteonosus (*os-te-on′-o-sus*) [ὀστέον, bone; νόσος, disease]. Disease of bone.

Osteopalinclasis (*os-te-o-pal-in′-klas-is*) [οστέον, bone; πάλιν, again; κλάσις, a breaking]. Rebreaking of a bone for the correction of deformity.

Osteoparectania (*os-te-o-par-ek-ta′-ne-ah*). Synonym of *Osteoparectasis.*

Osteoparectasis (*os-te-o-par-ek′-tas-is*) [ὀστέον, bone; παρέκτασις, a stretching out]. Abnormal lengthening of a bone; over-extension in the treatment of a fracture.

Osteopathy (*os-te-op′-ath-e*). Disease of bone.

Osteopedion (*os-te-o-pe′-de-on*). See *Lithopedion.*

Osteoperiosteal (*os′-te-o-per-e-os′-te-al*) [ὀστέον, bone; περί, around; ὀστέον, bone]. Pertaining to bone and its overlying periosteum.

Osteoperiosteitis (*os′-te-o-per-e-os-te-i′-tis*). Same as *Osteoperiostitis.*

Osteoperiostitis (*os′-te-o-per-e-os-ti′-tis*) [ὀστέον, bone; περί, around; ὀστέον, bone; ιτις, inflammation]. Osteitis with periostitis.

Osteophage (*os′-te-o-fāj*) [ὀστέον, bone; φαγεῖν, to eat]. A myeloplax, or osteoclastic cell.

Osteophlebitis (*os-te-o-fle-bi′-tis*) [ὀστέον, bone; φλέψ, vein; ιτις, inflammation]. Inflammation of the veins of a bone.

Osteophone (*os′-te-o-fōn*) [ὀστέον, bone; φωνή, sound]. An apparatus for the transmission of sounds through the bones of the face; it is miscalled *audiphone.*

Osteophony (*os-te-off′-o-ne*) [ὀστέον, bone; φωνή, sound]. The transmission of sound through bone.

Osteophor (*os′-te-o-for*) [ὀστέον, bone; φέρειν, to bear]. A heavy tooth-forceps for crushing bone.

Osteophthisis (*os-te-off′-this-is*) [ὀστέον, bone; φθίσις, a wasting]. Wasting of the bones.

Osteophthoria (*os-te-off-tho′-re-ah*) [ὀστέον, bone; φθορά, decay]. An old name for tuberculous affections of bones and joints.

Osteophyma (*os-te-o-fi′-mah*) [ὀστέον, bone; φῦμα, swelling: *pl., Osteophymata*]. Any tumor or swelling of a bone.

Osteophyte (*os′-te-o-fīt*) [ὀστέον, bone; φυτόν, plant]. A bony outgrowth or nodosity.

Osteophytic (*os-te-o-fit′-ik*) [ὀστέον, bone; φυτόν, plant]. Of the nature of an osteophyte.

Osteophyton (*os-te-off′-et-on*) [ὀστέον, bone; φυτόν, a plant: *pl., Osteophyta*]. Same as *Osteophyte.*

Osteoplaque (*os′-te-o-plak*) [ὀστέον, bone; πλάξ, plate]. A layer of bone; a flat osteoma.

Osteoplast (*os′-te-o-plast*) [ὀστέον, bone; πλάσσειν, to form]. Same as *Osteoblast.*

Osteoplastic (*os-te-o-plas′-tik*) [ὀστέον, bone; πλάσσειν, to mold]. Pertaining to plastic operations upon bone; also to the natural or pathologic formation or development of bone. **O. Resection,** an operation in which a bone or portion of bone, cut loose from all but one of its attachments, is laid back, the underlying diseased structure removed, and the bone replaced.

Osteoplasty (*os′-te-o-plas-te*) [ὀστέον, bone; πλαστός, formed]. A plastic operation, as by grafting, etc., performed upon bone; plastic surgery of bone. See *Dieffenbach's, Fergusson's, Mason's,* and other operations, in *Operations, Table of.*

Osteoporoma (*os-te-o-por-o′-mah*) [ὀστέον, bone; πόρος, passage]. The changes produced by osteoporosis.

Osteoporosis (*os-te-o-por-o′-sis*) [ὀστέον, bone; πόρος, a pore]. A form of osteitis in which the bones become more vascular and are marked by an increase of the spaces filled with granulation-tissue or marrow-tissue, with corresponding decrease in their compactness. This is also called *Rarefying Osteitis.*

Osteopsathyrosis (*os-te-op-sath-ir-o′-sis*) [ὀστέον, bone; ψαθυρός, friable]. Fragility of bones.

Osteopyr (*os′-te-o-pīr*) [ὀστέον, bone; πῦρ, fever] Gangrene of bone.

Osteorrhagia (*os-te-or-a′-je-ah*) [ὀστέον, bone; ῥηγνύναι, to burst forth]. Hemorrhage from a bone.

Osteorrhaphy (*os-te-or′-a-fe*) [ὀστέον, bone; ῥαφή, suture]. The suturing of bones.

Osteosapria (*os-te-o-sa′-pre-ah*) [ὀστέον, bone; σαπρός, soften]. Caries of bone.

Osteosarcoma (*os-te-o-sar-ko′-mah*) [ὀστέον, bone; σάρξ, flesh; ὄμα, tumor: *pl., Osteosarcomata*]. A sarcoma of bone. **O., Central,** one arising in the interior of a bone. **O., Infiltrated,** one infiltrating the entire bone, which becomes softened. **O., Internal.** Synonym of *O., Central.* **O., Periosteal,** one springing from the periosteum. **O., Peripheral.** Synonym of *O., Periosteal.*

Osteosarcomatous (*os-te-o-sar-ko′-mat-us*) [ὀστέον, bone; σάρξ, flesh; ὄμα, tumor]. Of the nature of sarcoma.

Osteosarcosis (*os-te-o-sar-ko′-sis*) [ὀστέον, bone; σάρξ, flesh]. The conversion of bone into sarcomatous tissue.

Osteoscirrhus (*os-te-o-skir′-us*) [ὀστέον, bone; σκίρρος, a hardening]. A scirrhous carcinoma of bone.

Osteoscleroma (*os-te-o-skle-ro′-mah*). Synonym of *Osteosclerosis.*

Osteosclerosis (*os-te-o-skle-ro′-sis*) [ὀστέον, bone; σκλήρωσις, hardening]. A form of osteitis in which the bone increases in density at the expense of new formed or pre-existing marrow-cells. It is also called *Condensing Osteitis.*

Osteosis (*os-te-o′-sis*) [ὀστέον, bone]. The formation of bone.

Osteospongioma (*os-te-o-spun-je-o′-mah*) [ὀστέον, bone; σπόγγος, sponge; ὄμα, tumor: *pl., Osteospongiomata*]. A tumor consisting of a spongy or highly cancellous growth of bony tissue.

Osteospongiosis (*os-te-o-spun-je-o′-sis*). See *Osteophthoria* and *Osteospongioma*.

Osteosteatoma (*os-te-o-ste-at-o′-mah*) [ὀστέον, bone; στεαρ, fat; ὄμα, tumor: *pl.*, *Osteosteatomata*]. Fatty tumor, or growth, of bone.

Osteoteleangiectasis (*os′-te-o-tel-e-an-je-ek′-tas-is*) [ὀστεον, bone; τέλος, end; ἀγγεῖον, vessel; ἔκτασις, dilatation]. Dilatation of the blood-vessels of a bone; also a telangiectatic osteosarcoma.

Osteothrombosis (*os′-te-o-throm-bo′-sis*) [ὀστέον, bone; θρόμβωσις, thrombosis]. Thrombosis of the veins of a bone.

Osteotome (*os′-te-o-tōm*) [ὀστέον, bone; τομή, a cutting]. 1. A saw, or other instrument, for cutting bone. 2. An instrument used in cutting the bones of the fetal head in embryotomy.

Osteotomist (*os-te-ot′-o-mist*) [ὀστέον, bone; τομή, a cutting]. One who performs osteotomy.

Osteotomy (*os-te-ot′-o-me*) [ὀστέον, bone; τομή, a cutting]. The cutting or division of a bone. See *Adams'*, *Barwell's*, *Gant's*, and other operations, in *Operations, Table of.* **O., Complete,** one in which the bone is completely divided. **O., Cuneiform,** an osteotomy in which a wedge of bone is removed. **O., Extra-articular,** one not involving a joint. **O., Incomplete,** one in which the bone is not completely divided. **O., Linear,** a simple division of a bone, without removal of any part. **O., Partial.** Synonym of *O., Incomplete.* **O., Simple.** Synonym of *O., Linear.* **O., Supracondylar,** one done just above the condyles of the femur.

Osteotophus (*os-te-ot′-o-fus*) [ὀστέον, bone; *tophus*, sandstone]. A bony outgrowth or excrescence.

Osteotribe (*os′-te-o-trib*). Same as *Osteotrite.*

Osteotrite (*os′-te-o-trīt*) [ὀστέον, bone; τρίβειν, to rub]. A scraping-instrument for use in operations upon carious bones.

Osteotylus (*os-te-o-ti′-lus*) [ὀστέον, bone: τύλος, callus]. Bone-callus.

Osteulcus (*os-te-ul′-kus*) [ὀστεουλκός: ὀστέον, bone; ἕλκειν, to draw]. A bone-forceps.

Osthelcus (*ost-hel′-kus*) [ὀστέον, bone; ἕλκος, suppurating around]. Caries of bone.

Osthistos (*ost-his′-tos*) [ὀστέον, bone; ἱστός, tissue]. Osseous tissue.

Ostial (*os′-te-al*) [*ostium*, a door or mouth]. Pertaining to an opening or orifice.

Ostiole (*os′-te-ōl*) [*ostium*, a door, mouth]. In biology, a small ostium, as the orifices in plants for the discharge of spores, pollen-grains, etc., or in insects for the emission of irritant or foul-smelling fluids.

Ostiolum (*os-ti′-o-lum*) [dim. of *os*, mouth]. A valve.

Ostitis (*os-ti′-tis*). See *Osteitis.*

Ostium (*os′-te-um*) [L., a door: *pl.*, *Ostia*]. In biology, a mouth or mouth-like opening; specifically, one of the slits in the dorsal vessel of certain *Crustacea.* (*Branchippus*). **O. abdominale,** the orifice of the oviduct communicating with the peritoneal cavity. **O. œsophageum ventriculi,** the opening of the esophageal or cardiac orifice of the stomach. **O., Gastric,** the mouth by which a radial canal in sponges opens into the paragaster. **O. internum,** the orifice at the beginning of the oviduct in the uterus. **O. pharyngeum,** the pharyngeal opening of the Eustachian tube. **O. tympanicum,** the tympanic opening of the Eustachian tube. **O., Vaginal,** the external orifice of the vagina.

Ostology (*os-tol′-o-je*). Same as *Osteology.*

Ostoma (*os-to′-mah*). Synonym of *Osteoma.*

Ostosis (*os-to′-sis*). Same as *Osteosis.*

Ostracosis (*os-trak-o′-sis*) [ὄστρακον, oyster-shell; νόσος, disease]. The degenerative change that sometimes takes place in a portion of bone and causes it to resemble an oyster-shell.

Ostrea (*os′-tre-ah*) [ὄστρεον, oyster]. Oyster.

Ostrein (*os′-tre-in*) [ὄστρεον, oyster]. A nitrogenous body of uncertain composition found in the flesh of oysters.

Ostreios (*os-tre-i′-os*) [ὄστρεον, oyster; ἰός, poison]. The poison found in some oysters and mussels.

Ostreotoxicum (*os-tre-o-toks′-ik-um*). Synonym of *Ostreios.*

Otacoustian, Otacoustic (*o-tak-oos′-te-an, o-tak-oos′-tik*) [οὖς, gen, ὠτός, ear; ἀκουσις, hearing]. Pertaining to, or aiding, audition. 2. An ear-trumpet.

Otacousticon (*o-tak-oos′-tik-on*) [οὖς, ear; ἀκουσις, hearing]. An otacoustic, or ear-trumpet.

Otagra (*o-ta′-grah*). Synonym of *Otalgia.*

Otalgia (*o-tal′-je-ah*) [οὖς, ear; ἄλγος, pain]. Earache.

Otalgic (*o-tal′-jik*) [οὖς, ear; ἄλγος, pain]. Affected with, or pertaining to, otalgia.

Otalgy (*o-tal′-je*). Same as *Otalgia.*

Otaphone (*o′-taf-ōn*) [οὖς, ear; φωνή, sound]. A clamp so adjusted as to throw the external ears forward and outward, and thus assist the hearing.

Otechos, Otechus (*o′-tek-os, o′-tek-us*). Synonym of *Tinnitus aurium.*

Otemplastrum (*o-tem-plas′-trum*) [οὖς, ear; ἔμπλαστρον, plaster]. A plaster placed behind the ear. [Old.]

Otenchyte (*o′-ten-kīt*) [οὖς, ear; ἐγχύειν, to pour in]. An aural syringe.

Othelcosis (*o-thel-ko′-sis*) [οὖς, ear; ἕλκωσις, ulceration]. Ulceration of the ear.

Othematoma (*ōt-hem-at-o′-mah*) [οὖς, ear; αἷμα, blood; ὄμα, tumor: *pl.*, *Othematomata*]. Hematoma of the external ear, usually the pinna; hematoma auris. The condition is not rare in insane persons, whence its name "*insane ear.*" It is probably a trophic lesion.

Othemorrhea (*ōt-hem-or-e′-ah*) [οὖς, ear; αἷμα, blood; ῥοία, flow]. A sanguineous discharge from the ear.

Otheoscope (*o′-the-o-skōp*) [ὠθεῖν, to part; σκοπεῖν, to view]. An instrument somewhat like a radiometer.

Othydrops (*o-thi′-drops*) [οὖς, ear; ὑδρωψ, dropsy]. Dropsy of the tympanic cavity.

Othypersarcoma (*o-thi-per-sar-ko′-mah*) [οὖς, ear; ὑπέρ, above; σάρξ, flesh; ὄμα, tumor: *pl.*, *Othypersarcomata*]. A fleshy outgrowth from the ear.

Otiater (*o′-te-a-ter*) [οὖς, ear; ἰατήρ, surgeon]. An aural surgeon.

Otiatric (*o-te-at′-rik*) [οὖς, ear; ἰατήρ, surgeon]. Pertaining to the treatment of diseases of the ear.

Otiatrics (*o-te-at′-riks*) [οὖς, ear; ἰατήρ, surgeon]. The study of diseases of the ear and their treatment.

Otic (*o′-tik*) [ὠτικός, from οὖς, ear]. Pertaining to the ear. **O. Ganglion.** See *Ganglion.* **O. Vesicle.** See *Vesicle.*

Oticodinia (*o-tik-o-din′-e-ah*) [ὠτικός, otic; δῖνος, vertigo]. Vertigo from disease of the ear; Ménière's disease; also, labyrinthine vertigo, as a symptom of Ménière's disease.

Oticodinosis (*o-tik-o-din-o′-sis*). See *Oticodinia.*

Otidium (*o-tid′-e-um*) [οὖς, ear; *pl.*, *Otidia*]. In biology, the auditory organ or otocyst of the *Mollusca.*

Otitis (*o-ti′-tis*) [οὖς, ear; ιτις, inflammation]. Inflammation of the ear. **O., Catarrhal,** catarrhal inflammation of the middle ear. **O., Desquamative,** a proliferation and thickening of the epidermic layer of the external auditory canal and the tympanic membrane. The epithelium becomes desquamated and lies in the canal. **O., Diphtheric,** a pseudo-membranous inflammation of the middle ear, sometimes also of the external canal, due to extension of diphtheria from

the throat. **O. externa**; **O. interna**; **O. media**; inflammation of the external, internal, and middle ear, respectively. **O., Furuncular,** the formation of small furuncles in the external auditory canal. **O. labyrinthica,** inflammation of the labyrinth. Its symptoms resemble those of meningitis; it is not fatal, but leads to permanent deafness. **O. mycosa.** Synonym of *O. parasitica.* **O. parasitica,** inflammation of the external or middle ear from the presence of parasites, *Myiasis aurium.* **O. phlegmonosa,** acute otitis with suppuration. **O. purulenta chronica,** chronic inflammation of the middle ear, with persistent discharge. **O., Sclerotic,** chronic catarrhal otitis media, with thickening and hardening of the tissues.

Otiyindimba (*o-te′-e-in-dim′-bah*) [nat. African]. A pustular dermatitis prevalent in Damaraland.

Oto- (*o′-to-*) [οὖς, *gen.*, ὠτός, ear]. A prefix signifying connection with, or relation to, the ear.

Otoblenorrhea (*o′-to-blen-or-e′-ah*) [οὖς, ear; βλέννα, mucus; ῥοία, flow]. Any abnormal discharge of mucus from the ear.

Otocatarrh (*o′-to-kat-ar′*) [οὖς, ear; κατάρρος, catarrh]. Catarrh of the ear.

Otocell (*o′-to-sel′*) [οὖς(ὠτ-), ear; καλιά, a hut: *pl.*, *Otocelli*]. In biology, an auditory sac or cell, as in the *Hydro-medusæ.*

Otocephalus (*o-to-sef′-al-us*) [οὖς, ear; κεφαλή, head]. 1. A species of single autositic monsters characterized by an absence or a rudimentary condition of the lower jaw, with ill-development of the mouth, which may be merely a minute orifice, and an approach of the ears to each other, which may touch at their lower parts or even be united. It is a very rare condition in the human species, but is not infrequent among sheep. 2. A variety of the foregoing species in which there is some degree of synopsia, the maxillæ and mouth being distinct, and a proboscis wanting.

Otocerebritis (*o′-to-ser-e-bri′-tis*) [οὖς, ear; *cerebrum*, brain; ιτις, inflammation]. Inflammation of the brain from disease of the ear.

Otocleisis (*o-to-kli′-sis*) [οὖς, ear; κλεῖσις, closure]. Occlusion of the ear.

Otoconia (*o-to-ko′-ne-ah*). Plural of *Otoconium.*

Otoconial (*o-to-ko′-ne-al*) [οὖς, ear; κόνις, dust]. Pertaining to, or of the nature of, otoconia.

Otoconite (*o-tok′-o-mīt*). Synonym of *Otoconium.*

Otoconium (*o-to-ko′-ne-um*) [οὖς (ὠτ-), ear; κόνις, dust: *pl.*, *Otoconia*]. In biology, one of the gritty particles or minute otoliths from the membranous labyrinth of higher vertebrates.

Otocrane, Otocranium (*o′-to-krān, o-to-kra′-ne-um*) [οὖς, ear; κρανίον, skull]. The cavity of the skull holding the organ of hearing.

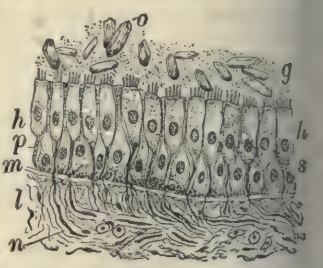
Otocranial, Otocranic (*o-to-kra′-ne-al, o-to-kra′-nik*) [οὖς, ear; κρανίον, skull]. Pertaining to the otocrane.

Otocyst (*o′-to-sist*) [οὖς, ear; κύστις, bladder]. In biology, an auditory vesicle, otocell, or otidium in invertebrates, or an otolithic sac in vertebrates.

Otocystic (*o-to-sis′-tik*) [οὖς, ear; κύστις, a cyst]. Pertaining to an otocyst.

Otodynia (*o-to-din′-e-ah*) [οὖς, ear; ὀδύνη, pain]. Pain in the ear.

Otoganglion (*o-to-gang′-gle-on*). See *Ganglion, Otic.*



Otoglyphis (*o-tog′-lif-is*) [οὖς, ear; γλύφειν, to scrape]. An ear-spoon.

Otography (*o-tog′-ra-fe*) [οὖς, ear; γράφειν, to write]. The descriptive anatomy of the ear.

Otoiatry (*o-to-ī′-at-re*). Synonym of *Otiatrics.*

Otolite (*o′-to-līt*) [οὖς, ear; λίθος, stone]. Same as *Otolith.*

Otolith (*o′-to-lith*) [οὖς, ear; λίθος, stone]. 1. A calcareous concretion within the membranous labyrinth of the ear of fishes, in fish-like vertebrates and in the auditory vesicles of invertebrates 2. One of the otic bones proper. An otostion.

SECTION OF WALL OF UTRICLE OF THE INTERNAL EAR, through macular region, from rabbit, showing otoliths (*o*), embedded within granular substance (*g*). *h* Ciliated-cells with processes (*p*), extending between sustentacular elements (*s*). *n* Nerve-fibers within fibrous tissue (*l*) passing toward hair-cells and becoming non-medullated at basement-membrane. (*After Piersol.*)

Otolithic, Otolitic (*o-to-lith′-ik, o-to-lit′-ik*) [οὖς, ear; λίθος, stone]. Pertaining to an otolith.

Otologist (*o-tol′-o-jist*) [οὖς, ear; λόγος, science]. One versed in otology; an aurist.

Otology (*o-tol′-o-je*) [οὖς, ear; λόγος, science]. The science of the ear, its anatomy, functions, diseases, and treatment.

Otomyces (*o-tom′-is-ēz*) [οὖς, ear; μύκης, fungus]. A fungous growth within the ear. **O. hageni,** a fungus, with green conidia, sometimes found in the external canal of the ear. **O. purpureus,** a dark-red fungous growth in the ear.

Otomycosis (*o′-to-mi-ko′-sis*) [οὖς, ear; μύκης, fungus]. The growth of fungi within the ear, or the diseased condition associated with such a condition.

Otoncus (*o-tong′-kus*) [οὖς, ear; ὄγκος, tumor]. A swelling or tumor of the ear.

Otonecronectomy (*o′-to-nek-ro-nek′-to-me*) [οὖς, ear; νεκρός, dead; ἐκτομή, excision]. Surgical removal of necrosed sound-conductors from the ear.

Otoneuralgia (*o-to-nu-ral′-je-ah*). Synonym of *Otalgia.*

Otopathema (*o-to-path-e′-mah*) [οὖς, ear; πάθημα, an attack of sickness]. A disease of the ear.

Otopathic (*o-to-path′-ik*) [οὖς, an ear; πάθος, disease]. Pertaining to ear-disease.

Otopathy (*o-top′-ath-e*) [οὖς, ear; πάθος, disease]. Any affection of the ear.

Otopharyngeal (*o-to-far-in′-je-al*) [οὖς, ear; φάρυγξ, pharynx]. Pertaining to the ear and the pharynx. **O. Tube,** the Eustachian tube.

Otophone (*o′-to-fōn*) [οὖς, ear; φωνή, voice]. 1. An ear-trumpet, or other device for gathering and intensifying sound-waves. 2. An auscultating tube used in ear-diseases.

Otophthalmic (*o-toff-thal′-mik*) [οὖς, ear; ὀφθαλμός, eye]. Pertaining to the ear and the eye.

Otopiesis (*o-to-pi′-es-is*) [οὖς, ear; πίεσις, pressure]. Excessive pressure upon the labyrinth, with consequent deafness. Depression of the tympanic membrane by atmospheric pressure, owing to the rarefaction of the air within the tympanic cavity.

Otoplasty (*o′-to-plas-te*) [οὖς, ear; πλάσσειν, to form]. The operation of repairing certain lesions of the external ear by the engrafting of healthy tissue from some other part of the body; plastic surgery of the ear.

Otoplexiometer (*o-to-pleks-e-om′-et-er*) [οὖς, ear; πλήξις, percussion; μέτρον, measure]. An instrument for examining the concealed portions of the ear by percussion.

Otoporpa (*o-to-por′-pah*) [οὖς, ear; πόρπη, a buckle: *pl.*, *Otoporpæ*]. In biology, one of the "auditory clasps" of *Medusæ.*

Otopyorrhea (*o-to-pi-or-e'-ah*) [*οὖς*, ear; *πίον*, pus; *ῥοια*, a flow]. A purulent discharge from the ear.

Otopyosis (*o-to-pi'-o-sis*) [*οὖς*, ear; *πίον*, pus]. Suppuration within the ear.

Otorrhagia (*o-tor-a'-je-ah*) [*οὖς*, ear; *ῥηγνύναι*, to burst forth]. A discharge of blood from the external auditory meatus.

Otorrhea (*o-tor-e'-ah*) [*οὖς*, ear; *ῥοία*, a flow]. A discharge from the external auditory meatus.

Otorrheumatismus (*o-tor-ru-mat-iz'-mus*) [*οὖς*, ear; *ῥεῦμα*, rheum]. Pain in the ear due to rheumatism.

Otosalpinx (*o-to-sal'-pinks*) [*οὖς*, ear; *σάλπιγξ*, tube]. The Eustachian tube.

Otoscleronectomy (*o-to-skle-ro-nek'-to-me*) [*οὖς*, ear; *σκληρός*, hard; *ἐκτομή*, excision]. The surgical removal of sclerosed and ankylosed conductors of sound in cases of chronic otitis media.

Otoscope (*o'-to-skōp*) [*οὖς*, ear; *σκοπεῖν*, to examine]. An instrument for examining the ear. What is ordinarily called and used as an otoscope is a rubber tube, one extremity of which is inserted into the ear of the subject, and the other extremity into the ear of the examiner, a current of air being passed by means of a Politzer bag and a Eustachian catheter through the middle ear. In case of tympanic perforation the rushing sound made by the passing air is audible to the examiner.

Otoscopic (*o-to-skop'-ik*) [*οὖς*, ear; *σκοπεῖν*, to view]. Pertaining to otoscopy.

Otoscopy (*o-tos'-ko-pe*) [*οὖς*, ear; *σκοπεῖν*, to examine]. The use of the otoscope; clinical examination of the ear.

Otosis (*o-to'-sis*) [*οὖς*, ear]. A mishearing; a false impression as to sounds or words heard.

Otosteal (*o-tos'-te-al*) [*οὖς*, ear; *ὀστέον*, bone]. Pertaining to the bones of the ear.

Otosteon (*o-tos'-te-on*) [*οὖς*, ear; *ὀστέον*, bone: *pl.*, *Otostea*]. 1. An ossicle, or ear-bone. 2. An otolith.

Otostylic (*o-to-sti'-lik*) [*οὖς*, ear; *στῦλος*, pillar]. Relating to the ear and to the styloid process.

Ototechnos (*o-to-tek'-nos*) [*οὖς*, ear; *τέχνη*, art]. A peculiar hammering sensation in the ear.

Ototomy (*o-tot'-o-me*) [*οὖς*, ear; *τομή*, a cutting]. Dissection of the ear.

Otto, Otto (*ot'-ar*, *ot'-o*). See *Attar*.

Otto's Restraining Band. A band used in diaphragmatic pleurisy to relieve the pain. It is applied low down to favor thoracic respiration and diminish the abdominal and diaphragmatic movements.

Ouabain (*oo-ah-ba'-in*) [*ouabaio*], $C_{31}H_{48}O_{12}$. A highly poisonous glucoside extracted from the wood of a species of *Apocynea*, the *Carissa schimperi*. It is a cardiac stimulant. Dose, gr. $\frac{1}{10000}$ to $\frac{1}{250}$, given as a per mille solution.

Ouabaio (*oo-ah-ba'-yo*) [native African]. A virulent arrow-poison used by certain African tribes.

Oudemann's Method. A method of estimating iron in organic substances, *e. g.*, hemoglobin. A weighed amount of the material is incinerated; the ash is dissolved in HCl, and to the dilute ferric solution, which should not contain more than 0.1 to 0.2 gram Fe in 200 c. c., nor much free HCl, are added 3 c. c. of one per cent. solution of cupric sulphate, 2 c. c. of concentrated HCl, and 1 c. c. of a one per cent. solution of potassium sulphocyanid. The mixture is slightly warmed, and a standard solution of sodium thiosulphate (1 c. c. of a decinormal solution of which corresponds to 0.0056 Fe) is run in from a buret, until the previously red mixture becomes as colorless as water.

Ouchon (*oo'-lak-on*). See *Eulachon*.

Otitis (*o-li'-tis*). See *Ulitis*.

Otoid (*oo'-loia*) [*οὐλή*, scar; *εἶδος*, like]. Resembling a scar. Also, a form of cicatrix characteristic of lupus, elephantiasis, and syphilis.

Oulorrhagia (*oo-lor-a'-je-ah*) [*οὖλον*, gum; *ῥηγνύναι*, to burst forth]. Hemorrhage from the gums.

Ounce (*owns*) [*uncia*, a contraction of *undecia*, a twelfth part]. A twelfth part of the Troy pound, or 480 grains; symbol, ℥. Also, a sixteenth part of the avoirdupois pound, or 437.5 grains. Symbol *oz.*

Ourari (*oo-rah'-re*). Same as *Curare*.

Ourology (*oo-rol'-o-je*) [*οὖρον*, urine; *λόγος*, science]. The science of the nature and secretion of urine.

Uroscopy (*oo-ros'-ko-pe*). See *Uroscopy*.

Out (*owt*) [ME., *out*, out]. Forth; from within to the exterior. **O.-cast Cell**, an apoblast; in the unimpregnated ovum, one of a group of cells that are finally cast off and disappear. See *Apoblast*. **O.-knee**, bow-leg; valgus.

Outlet. 1. The lower aperture of the pelvic canal. 2. The passage that removes the air from a room in ventilation. **O. of Pelvis.** See *Outlet*.

Ova (*o'-vah*) [L.]. Plural of *ovum*, an egg.

Oval (*o'-val*) [*ovum*, egg]. Elliptic; egg-shaped. **O. Amputation.** See *Malgaigne's* and *Scoutettin's Amputations*, in *Operations, Table of*.

Ovalbumin (*o-val'-bu-min*) [*ovum*, egg; *albumin*]. The albumin of the egg.

Ovalescent (*o-val-es'-ent*) [*ovalis*, oval]. Somewhat oval.

Ovaliform (*o-val'-if-orm*) [*ovalis*, oval; *forma*, form]. Oval-shaped.

Ovaloid (*o'-val-oid*) [*ovalis*, oval; *εἶδος*, like]. Resembling an oval.

Ovaralgia (*o-var-al'-je-ah*). See *Ovarialgia*.

Ovarial (*o-va'-re-al*). See *Ovarian*.

Ovarialgia (*o-va-re-al'-je-ah*) [*ovarium*, an ovary; *ἄλγος*, pain]. Pain in the ovaries.

Ovarialgic (*o-va-re-al'-jik*) [*ovarium*, ovary; *ἄλγος*, pain]. Pertaining to, or affected with, ovarialgia.

Ovarian (*o-va'-re-an*) [*ovarium*, an ovary]. Pertaining to the ovaries. **O. Center.** See *Dysmenorrhea*. **O. Cyst, O. Cystoma,** a cystic tumor of an ovary. **O. Dysmenorrhea.** See *Dysmenorrhea*. **O. Plexus,** the pampiniform plexus of the female. **O. Pregnancy,** extra-uterine pregnancy in which the ovum resides in the ovary. **O. Vesicle,** in biology, the gynophore or female gonophore of a polyp.

Ovaric (*o-va'-rik*). Synonym of *Ovarian*.

Ovariectomy (*o-va-re-ek'-to-me*) [*ovarium*, ovary; *ἐκτομή*, excision]. Excision of an ovary; oöphorectomy.

Ovariocele (*o-va'-re-o-sēl*) [*ovarium*, ovary; *κήλη*, tumor]. Tumor of the ovary; hernia of an ovary. **O., Vaginal,** invasion of the vaginal wall by one or both ovaries.

Ovariocentesis (*o-va-re-o-sen-te'-sis*) [*ovarium*, ovary; *κέντησις*, puncture]. Puncture of the ovary or of an ovarian cyst.

Ovarioclasis (*o-va-re-ok'-las-is*) [*ovarium*, ovary; *κλάσις*, a breaking]. The breaking up of an ovary.

Ovariocyesis (*o-va'-re-o-si-e'-sis*) [*ovarium*, ovary; *κύησις*, pregnancy]. Ovarian pregnancy.

Ovariodysneuria (*o-va'-re-o-dis-nu'-re-ah*) [*ovarium*, ovary; *δυς-*, painful; *νεῦρον*, nerve]. Ovarian neuralgia.

Ovario-hysterectomy (*o-va'-re-o-his-ter-ek'-to-me*) [*ovarium*, ovary; *ὑστέρα*, womb; *ἐκτομή*, excision]. Surgical removal of the ovaries and uterus.

Ovariole (*o-va'-re-ōl*) [*ovariolum*, a small ovary]. In biology, a small ovary, or one of the elements of a composite ovary.

Ovariomania (*o-va-re-o-ma'-ne-ah*). Synonym of *Oöphoromania*.

Ovarioncus (*o-va-re-ong'-kus*) [*ovarium*, ovary; ὄγκος, tumor]. An ovarian tumor.

Ovariorrhexis (*o-va-re-or-eks'-is*) [*ovarium*, ovary; ῥῆξις, rupture]. Rupture of an ovary.

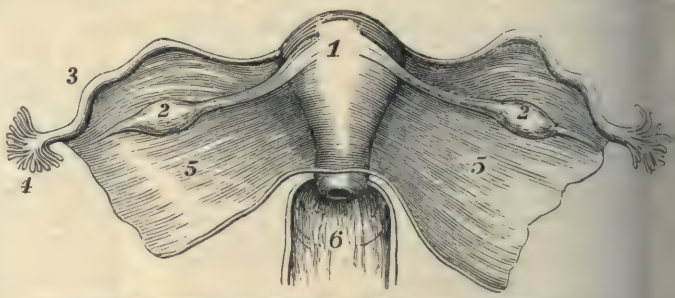
Ovariosteresis (*o-va-re-o-ster-e'-sis*) [*ovarium*, ovary; στέρησις, deprivation]. Extirpation of an ovary.

Ovariotomist (*o-va-re-ot'-o-mist*) [*ovarium*, ovary; τομή, a cutting]. One who performs ovariotomy and, by extension, also oöphorectomy.

Ovariotomy (*o-va-re-ot'-o-me*) [*ovarium*, ovary; τομή, a cutting]. Literally, incision of an ovary. Improperly, the surgical removal of an ovary; synonymous with oöphorectomy. **O., Abdominal,** ovariotomy through an abdominal incision. **O., Normal,** a term for Battey's operation, *q. v.* in *Operations, Table of.* **O., Vaginal,** removal of an ovary through an incision in the vault of the vagina.

Ovario-tubal (*o-va'-re-o-tu'-bal*) [*ovarium*, ovary; *tuba*, tube]. Pertaining to the ovary and the oviduct.

Ovarism (*o'-var-izm*) [*ovarium*, ovary]. The theory that every animal organism is developed from an ovum.

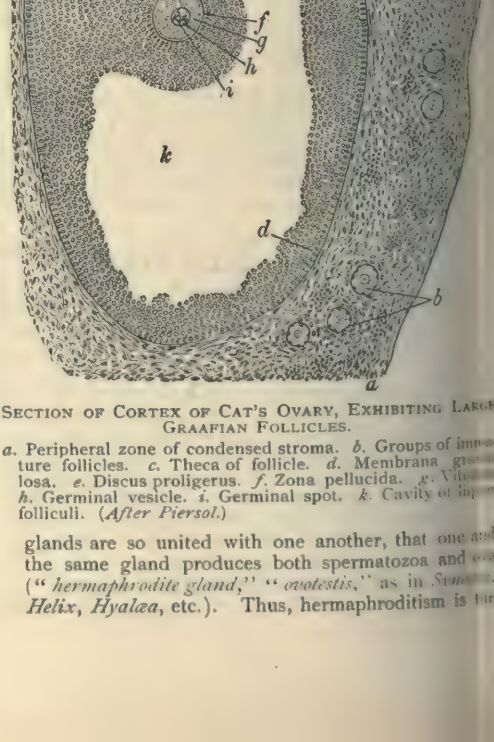


Ovarist (*o'-var-ist*) [*ovarium*, ovary]. One who believes in ovarism.

Ovaritis (*o-var-i'-tis*) [*ovarium*, ovary; ιτις, inflammation]. Inflammation of the substance of an ovary. It may be *Parenchymatous* or *Follicular*, or *Interstitial.* In the former, the contents of the ovarian follicles become turbid and then purulent. This occurs in the acute exanthemata and other diseases, and cannot be recognized clinically. *Interstitial ovaritis* is usually a sequel of parturition, when it is a part of a general septicemia. It occurs in three forms: (1) *serous*; (2) *suppurative* or *hemorrhagic*; and (3) *necrotic*, the organ being converted into a brown pulp with entire destruction of its tissue.

Ovarium (*o-va'-re-um*) [L., ovary: *pl.*, *Ovaria*]. In biology, an ovary or oöphoron.

Ovariypertrophy (*o-var-e-ip-er'-tro-fe*). Synonym of *Oöphorauxe.*



Ovary (*o'-var-e*) [*ovarius*, an egg-keeper; *ovarium*, an egg-producing organ; *ovum*, egg]. The most important part of the female reproductive apparatus. A glandular, secreting organ, giving rise to ova. In woman it is a paired organ projecting from the posterior surface of the broad ligament. Its weight is about 100 grains. The right is usually a little larger than the left. It consists of a *parenchyma* and a *capsule*, or tunica albuginea. In the cortex of the former are numbers of small vesicles called *ovisacs* or Graafian follicles in which the ova are developed. In biology, among the lowest organisms (*e. g.*, *Paramecium*) the nucleus gives rise to bodies analogous to ovules, while in animals a grade higher, the undifferentiated endoderm or mesoderm is the female germinal layer (*e. g.*, *Porifera*). Specialization follows localization of function, and the parts of the body set aside for the production of ova gradually take the form of glands (*germaria*, *ovaria*), the products of which may become detached from the spot where they are formed, and pass into the somatic or body-cavity, or into the digestive sac (*e. g.*, *Actinæ*, *Polyzoa*, *Brachyopoda*), or even directly to the exterior (*e. g.*, *Echinidea*, *Proctucha*, *Nemertea*). Gradually, as the animal scale is ascended, ducts of a complicated character are found to be added to the ovary proper. These ducts are not primitively connected with the germinal glands, but may be regarded as excretory organs which have entered into the service of the genital organ. These ducts (*oviducts*) become provided with appendages o

Posterior Aspect of Female Internal Genitalia.

1. Body of uterus. 2, 2. Ovaries. 3. Left oviduct. 4 Fimbriated extremity of Fallopian tube. 5, 5. Broad ligaments. 6. Anterior vaginal cul-de-sac.

dilatations from which the ova get special envelop ("*yelk gland*," "*shell gland*," "*oviducal gland*," "*nidamental gland*," "*accessory gland*"), are fer tilized (*spermatheca*, *appendicular gland*, *fertilizing pouch*), or further developed (*uterus*). The relation of the ovary to the testis varies greatly, and must also be considered from the standpoint of differentiation In the lower animals, male and female reproductive

Section of Cortex of Cat's Ovary, Exhibiting Large Graafian Follicles.

a. Peripheral zone of condensed stroma. *b*. Groups of imma ture follicles. *c*. Theca of follicle. *d*. Membrana gra losa. *e*. Discus proligerus. *f*. Zona pellucida. *g*. Vit *h*. Germinal vesicle. *i*. Germinal spot. *k*. Cavity of la folliculi. (*After Piersol.*)

glands are so united with one another, that one and the same gland produces both spermatozoa and ova ("*hermaphrodite gland*," "*ovotestis*," as in *Snail*, *Helix*, *Hyalæa*, etc.). Thus, hermaphroditism is

primitive condition of the sexual apparatus, the phylogenic and ontogenic precursor of sexual differentiation, which is effected by the abortion or reduction of one kind of sexual apparatus and function taking place at very different stages in the organism, and often when the sexual organs have attained a very high degree of specialization, the human ovary becoming histologically recognizable about the sixth week, and readily distinguished in a three-months embryo. 2. That part of the pistil of a flower which produces and contains the ovules and seeds. The *ovarium* or *germarium*. **O., Irritable,** an ovary the seat of intermittent neuralgic pain.

Ovate (*o'-vāt*) (*ovatus*, egg-shaped]. Egg-shaped.

Oven (*uv'-n*) [*oven*, an oven]. An apparatus used in bacteriologic laboratories for sterilizing culture-media, for maintaining the cultures, etc., at a constant temperature by an automatic mechanism. Those of Koch, Pasteur, d'Arsonval, and Babes are most used.

Over (*o'-ver*) [ME., *over*, over]. In a place higher than a given object. **O.-crowding,** the dwelling together of too many persons in a locality, house, or apartment, with the consequent failure in sanitary and hygienic arrangements, whence result conditions favorable to the development and spread of certain diseases. **O.-eat,** to surfeit with eating. **O.-feed,** to feed to excess. **O.-grown,** grown too large. **O.-laid,** said of a child suffocated by the parent lying on it. **O.-lying of Children,** a frequent cause of death in infants from suffocation from one of the parents lying upon the child while in an intoxicated condition or intentionally. **O.-maximal,** beyond the normal maximum, as the over-maximal contraction of a muscle. (Fick.) **O.-pressure,** applied chiefly to the school-system that forces too long and continuous periods of study upon the pupils, with consequent unhealthy conditions of mind and body. **O.-reach,** to strike the toe of the hind-foot against the heel or shoe of the fore-foot; said of a horse. **O.-riding,** overlapping of the broken ends of a fractured bone. **O.-sight.** See *Hypermetropia*. **O.-strain,** to strain to excess; a condition resulting from exhausting effort. **O.-toe,** a variety of *Hallux varus* in which the great toe overlies its fellows. **O.-tones,** the notes represented by the vibrating subdivisions of a string; harmonics. **O.-work, Mental.** See *Parathymia*.

Ovic (*o'-vik*) [ᾠόν, *ovum*, an egg]. Relating to an ovum. **O. Cell,** in biology, a primitive ovum (the *Urei* of German authors). Primitive ova exist in great numbers in cord-like ingrowths of the epithelium of the ovary (*Pflüger'schen Schläuche*) in which each ovic cell finally becomes surrounded by a separate envelop of epithelial cells, forming the *primordial follicle*.

Ovicapsule (*o-vik-ap'-sūl*) [ᾠόν, *ovum*, egg; *capsula*, capsule]. An egg-case, ovisac, or Graafian follicle.

Ovicell (*o'-vis-el*) [ᾠόν, *ovum*, an egg; *cella*, a cell]. 1. An unimpregnated ovum. 2. Same as *Ovicyst*.

Ovicyst (*o'-vis-ist*) [ᾠόν, *ovum*, an egg; κύστις, a pouch]. In biology, the incubatory pouch of an ascidian or polyzoan.

Ovicystic (*o-vis-is'-tik*) [ᾠόν, *ovum*, an egg; κύστις, a bladder]. Pertaining to an ovicyst.

Oviducal (*o-vid-u'-kal*), **Oviducent** (*o-ve-du'-sent*) [ᾠόν, *ovum*, egg; *ducere*, to lead]. Pertaining to the oviduct, or its functions. **O. Gland,** an enlargement of the oviduct in *Sepia*.

Oviduct (*o'-vid-ukt*) [ᾠόν, *ovum*, egg; *ductus*, a canal]. The Fallopian tube; a small tube upon either side of the uterus through which the ovule passes to the uterus. **O., Ampulla of, O., Pavilion of,** the expanded portion of the abdominal end of the oviduct, the fringed edge of which is called the fimbria.

Oviferous (*o-vif'-er-us*) [ᾠόν, *ovum*, an egg; *ferre*, to bear]. In biology, bearing eggs or ova.

Ovification (*o-vif-ik-a'-shun*) [ᾠόν, *ovum*, egg; *facere*, to make]. The production of ova.

Oviform (*o'-vif-orm*) [ᾠόν, *ovum*, egg; *forma*, form]. Egg-shaped; oval.

Ovigenous (*o-vij'-en-us*) [ᾠόν, *ovum*, egg; γενής, producing]. Producing ova, as an ovary. **O. Layer,** the outer layer of the ovary, in which the ovisacs containing the ova are situated.

Ovigerm (*o'-vij-erm*) [ᾠόν, *ovum*, an egg; *germen*, sprout, bud]. In biology, an ovum, or ovicell.

Ovigerous (*o-vij'-er-us*) [ᾠόν, *ovum*, egg; *gerere*, to carry]. Producing eggs or ova; oviferous, ovigenous, oviparous.

Ovination (*o-vin-a'-shun*) [*ovis*, a sheep]. Inoculation with the virus of sheep-pox. It has been employed like equination and Pasteurism, as a substitute for vaccination.

Oviparous (*o-vip'-ar-us*) [ᾠόν, *ovum*, egg; *parere*, to bring forth]. Producing, or laying, eggs; a term applied to those species of animals, the females of which bring forth their young in the egg-stage of development; incubated outside the body, as distinguished from *ovoviviparous*, or *viviparous*.

Oviposit (*o-vip-oz'-it*) [ᾠόν, *ovum*, an egg; *positus*, p.p. of *ponere*, lay]. In biology, to lay or deposit eggs, especially with an ovipositor, as an insect.

Oviposition (*o-vip-o-zish'-un*) [ᾠόν, *ovum*, egg; *ponere*, to place]. In biology, the act of laying or depositing eggs by the females of oviparous animals.

Ovipositor (*o-vip-oz'-it-or*) [ᾠόν, *ovum*, egg; *positor*, builder]. In biology, an organ, common among insects, composed of several modified rings or somites, forming the end of the abdomen, and employed in depositing the eggs in places fit for development.

Ovis (*o'-vis*) [L.]. Sheep.

Ovisac (*o'-vis-ak*) [ᾠόν, *ovum*, egg; *saccus*, sack]. In biology, the capsule, sac, cyst, case, cell, or pod of an individual ovum; a Graafian follicle, an ovicell, ovicyst, ovicapsule.

Oviscapt (*o'-vis-kapt*) [ᾠόν, *ovum*, an egg; σκαπτεῖν, to dig]. Same as *Ovipositor*.

Ovism (*o'-vizm*) [ᾠόν, *ovum*, egg]. The doctrine that the ovum encloses within itself in an undeveloped form all the organs of the future being; the doctrine of incasement, *q. v.*

Ovispermary (*o-vis-per'-mar-e*) [ᾠόν, *ovum*, an egg; *spermarium*, spermary]. In biology, an ovotestis or sexual organ producing both ova and spermatozoa.

Ovist (*o'-vist*) [ᾠόν, *ovum*, egg]. In biology, an adherent of the doctrine of *incasement*, *q. v.*; an ovulist.

Ovoblast (*o'-vo-blast*) [ᾠόν, *ovum*, ovum; βλαστός, germ]. The primordial ovum.

Ovococcus (*o-vo-kok'-us*) [ᾠόν, *ovum*, egg; κόκκος, berry: *pl.*, *Ovococci*]. In biology, the nucleus of the ovicell, or unimpregnated ovum.

Ovogenesis (*o-vo-jen'-es-is*) [ᾠόν, *ovum*, egg; γένεσις, genesis]. The process of the development or production of the ovum.

Ovogenetic (*o-vo-jen-et'-ik*) [ᾠόν, *ovum*, egg; γεννᾶν, to beget]. Pertaining to ovogenesis.

Ovogenous (*o-voj'-en-us*). Synonym of *Ovogenetic*.

Ovoid (*o'-void*) [ᾠόν, *ovum*, egg; εἶδος, like]. Egg-shaped. **O., Fetal,** the fetal ellipse, or the ellipse formed by the bending of the fetal body in utero.

Ovolemma (*o-vo-lem'-ah*) [ᾠόν, *ovum*, egg; λέμμα, bark]. The membrane surrounding the yolk of the human egg.

Ovology (*o-vol'-o-je*) [ᾠόν, *ovum*, egg; λόγος, science]. Same as *Oölogy*.

Ovoplasm (*o'-vo-plazm*) [ᾠόν, *ovum*, egg; πλάσμα,

plasm]. The protoplasm of the unimpregnated ovum or ovicell.

Ovotesticular (*o-vo-tes-tik'-u-lar*) [ᾠόν, *ovum*, egg; *testis*, testicle]. Pertaining to an *Ovotestis*.

Ovotestis (*o-vo-tes'-tis*) [ᾠόν, *ovum*, egg; *testis*, testicle: *pl.*, *Ovotestes*]. In biology, a generative organ producing both male and female products; an ovispermary, as seen in opisthobranchiate *Branchiogasteropoda*.

Ovoviviparity (*o-vo-vi-vip-ar'-it-e*) [ᾠόν, *ovum*, egg; *viviparus*, bringing forth alive]. The character of being ovoviviparous.

Ovoviviparous (*o-vo-vi-vip'-ar-us*) [ᾠόν, *ovum*, egg; *viviparus*, bringing forth alive]. In biology, reproducing by means of eggs incubated within the body, as distinguished from *oviparous* and *viviparous*.

Ovula (*o'-vu-lah*) [L.]. Plural of *Ovulum*. **O. of Naboth.** See *Ovule*.

Ovular, Ovulary (*o'-vu-lar*, *o'-vu-lar-e*) [ᾠόν, *ovum*, egg]. Relating to an ovule or ovum.

Ovulate (*o'-vu-lāt*) [*ovulum*, a little egg]. In biology, to produce ovules or discharge them from the ovary. Ovuliferous.

Ovulation (*o-vu-la'-shun*) [*ovulum*, dim. of *ovum*, egg]. The maturation and escape of the ovum.

Ovule (*o'-vūl*) [ᾠόν, *ovum*, egg]. In biology: (*a*) A small ovum or animal egg; (*b*) a young or rudimentary seed. **O., External Migration of,** the transfer of an ovule from the right ovary to the left oviduct, or from the left ovary to the right oviduct. **O., Membrana granulosa of,** the layer of stratified follicular epithelium lining the cavity of the ovisac. The prominence formed at one side is called the *cumulus ovigerus*, or *discus proligerus*. **O., Migration of,** the transfer of the ovule from the ovary to the oviduct. **O. of Naboth,** one of the small cysts resulting from obstruction of the ducts of the glands of the cervix of the uterus. **O., Polar Cells of,** certain cells thrown off upon the surface of the vitellus of the unimpregnated ovum. **O., or Cell, Primordial,** one of the primitive ovules in the substance of the ovary. **O., Tunica granulosa of,** the layer surrounding the ovum.

Ovuliferous (*o-vu-lif'-er-us*) [*ovulum*, a little egg; an ovule; *ferre*, to bear]. In biology, ovule-bearing.

Ovuligerous (*o-vu-lij'-er-us*). Same as *Ovuliferous*.

Ovulist (*o'-vu-list*) [ᾠόν, *ovum*, an egg]. In biology, an adherent of the doctrine of *incasement*, *q. v.*; an ovist.

Ovulum (*o'-vu-lum*) [L.: *pl.*, *Ovula*]. An ovule. See *Ovule*.

Ovum (*o'-vum*) [ᾠόν, *ovum*, an egg: *pl.*, *Ova*]. In biology, the female reproductive cell of an animal; the egg. It consists of *protoplasm* (the *yolk*), and a *nucleus* (the *germinal vesicle*) in the unfertilized ovum. It is either naked or covered by one or more *membranes* and *envelops*, which either originate from the egg itself, constituting real *primary yolk or egg-integuments*, or from the surrounding parietal tissues, constituting *secondary or accessory egg-envelops*. Ova arise in special organs of the metazoan body called *ovaria* or *germaria*. The *nucleus* or *germinal vesicle* (*vesicula germinativa*) is of relatively great size, and central or peripheral in situation. It consists of a distinct membrane and an enclosed *nuclear fluid*, in which lie one or more *solid nucleoli* or *germinal spots* (*maculæ germinativæ*), which may be connected by an intranuclear network of fine threads. The *protoplasm* consists of fine, firm particles, forming the threads and meshes of a fine network, the *spongioplasm*, within which is the more fluid *hyaloplasm*. This constitutes the *formative yolk*, besides which there is frequently present nutrient material in the form of drops of fat or oil, and small plates or spheres which form the *deuteroplasm*, or *nutritive yolk*. This is rarely absent; usually it is present in considerable quantity. Eggs are distinguished as (A) **Alecithal,** in which the food-yolk is entirely absent, or present only in very small quantity. (B) **Telolecithal,** in which the food-yolk and the formative yolk divide the egg into two hemispheres, called respectively the *vegetative* and the *animal*; or in which the quantity of the nutritive yolk is greatly in excess, the formative yolk being but a segment or mass at the animal pole, in which lies the germinal vesicle. In both cases a thin layer of protoplasm spreads over the entire surface of the ovum. (C) **Centrolecithal,** in which the formative yolk is arranged in a regular layer around the whole ovum, as well as in a mass at the center of the ovum in which lies the germinal vesicle. The region between the central and the peripheral formative yolk is more or less completely occupied by deuteroplasm. The distribution of formative yolk and food-yolk affects the germinative phenomena. When the food-yolk is scant and more or less thoroughly intermingled with the formative yolk, germination is accompanied by a practically uniform segmentation and the egg is called *holoblastic*, *e.g.*, as in all mammals except monotremes, and in some invertebrates, *e.g.*, spiders. When the formative yolk and the food-yolk are separated into more or less well-defined masses, the segmentation is less symmetric and uniform and is called *meroblastic*. The egg envelops are divided into: (1) *Primary envelops*, yolk-membranes; these are sometimes double, perforated by numerous pores (*zona radiata*) and occasionally there is a special opening, the *micropyle*. (2) *Secondary accessory envelops*, some of which are formed by the ovum itself. **O., Apoplectic,** one the seat of a hemorrhagic extravasation. **O., Blighted,** an impregnated ovum the development of which has been arrested by disease or by hemorrhage into the chorion or amniotic cavity. **O.-cycle,** an ovum-product. **O., Male,** certain cells found in diverticula of the seminiferous tubules, considered to be rudimentary or imperfect spermatozoa. **O., Meroblastic,** an ovum with a large amount of food-yolk which takes no active part in the development of the embryo. **O., Permanent,** the fully developed ovum capable of being fertilized. **O., Primordial.** See *Egg-cells*. **O.-product,** the whole product of an ovum.

Owen's Fissures. See *Fissures, Table of.* **O.'s Line.** See *Lines, Table of.*

Ox (*oks*) [ME., *oxe*, ox]. The adult male of the *Bos taurus*; a bull. **O.-acid.** Same as *Oxyacid*. **O.-bile.** Same as *O.-gall*. **O.-eyed,** having large, full eyes. **O.-fly,** the bot-fly (*Hypoderma bovis*), which infests cattle. **O.-foot,** in farriery, the hind foot of a horse when the horn cleaves just in the middle of the fore part of the hoof from the coronet to the shoe. **O.-gall.** See *Fel bovis*. **O.-warble,** a fly troublesome to cattle; also called heel-fly. See *Hypoderma bovis* under *Parasites* (*Animal*), *Table of.*

Oxalantin (*oks-al-an'-tin*) [ὀξύς, acid; Ger., *alant*, elecampane], $C_6H_6N_4O_6$. Leukoturic acid; an acid obtained by the action of zinc and HCl upon oxalyl urea. It occurs in crystalline crusts, sparingly soluble in water.

Oxalate (*oks'-al-āt*) [ὀξαλίς, sorrel]. Any salt of oxalic acid. In the plural, the term usually refers to calcium oxalate, which is found in the urine under certain conditions.

Oxalemia (*oks-al-e'-me-ah*) [ὀξαλίς, sorrel; αἷμα, blood]. Excess of the oxalates, or of oxalic acid, in the blood.

Oxalethylin (*oks-al-eth'-il-in*) [ὀξύς, acid; αἰθήρ, ether; ὕλη, matter], $C_6H_{10}N_2$. An oily liquid boiling at

213°C. It is soluble in water, in chloroform, and in alcohol, is poisonous, and stimulant to the cardiac centers.

Oxalic (*oks-al'-ik*) [ὀξαλίς, sorrel]. Pertaining to wood-sorrel. See *Acid, Oxalic.*

Oxalimid (*oks-al'-im-id*) [ὀξαλίς, sorrel; *amin*], $(CO)_2NH$. A substance obtained from oxamic acid. It dissolves with difficulty in cold water and crystallizes from hot water in shining needles.

Oxalis (*oks'-al-is*) [ὀξαλίς, sorrel]. A genus of plants, including the plant familiarly known as wood-sorrel (*O. acetosella*). Many of the species contain oxalic acid.

Oxalmethylin (*oks-al-meth'-il-in*) [ὀξαλίς, sorrel; μετά, with; ὕλη, matter], $C_4H_6N_2$. A substance identical with methyl glyoxalin; it is a strongly alkaline liquid, boiling at 195–199° C. It solidifies in the cold, and melts at 5° C.

Oxalpropylin (*oks-al-pro'-pil-in*) [ὀξαλίς, sorrel; πρῶτος, first; πίων, fat]. A compound from propyl and oxamid. It stimulates reflex activity.

Oxaluria (*oks-al-u'-re-ah*) [ὀξαλίς, sorrel; οὖρον, urine]. A term used to indicate the presence of calcium oxalate in the urine in an undue amount. There is a white deposit on standing. It occurs in the urine of hypochondriacal and depressed patients, and in that of gouty patients. Excessive venery and masturbation will produce it, as also will the ingestion of certain foods, as rhubarb.

Oxaluric (*oks-al-u'-rik*) [ὀξαλίς, sorrel; οὖρον, urine]. Derived from urea and oxalic acid. **O. Acid,** $C_3H_4N_2O_4$; an acid normally present in the urine; it occurs as a white or yellowish crystalline powder, having an acid taste.

Oxalyl (*oks'-al-il*) [ὀξαλίς, sorrel; ὕλη, matter], C_2O_2. The hypothetic radicle of oxalic acid.

Oxalyurea (*oks-al-e-u-re'-ah*) [ὀξαλίς, sorrel; οὖρον, urine]. Parabanic acid. An acid derived by oxidizing uric acid or alloxan with nitric acid.

Oxamate (*oks'-am-āt*) [ὀξαλίς, sorrel; *amin*]. Any salt of oxamic acid.

Oxamic Acid (*oks-am'-ik*). See *Acid.*

Oxamid (*oks-am'-id*) [ὀξαλίς, sorrel; *amid*], $C_2O_2(NH_2)_2$. A compound that separates as a white, crystalline powder when neutral oxalic acid is shaken with aqueous ammonia; it is insoluble in water and in alcohol.

Oxamidin (*oks-am-id'-in*) [ὀξαλίς, sorrel; *amia*]. Amidoxim; an amidin in which one H-atom of the amid-group or imid-group is replaced by hydroxyl; the oxamidins are crystalline, unstable bodies, which readily break up into hydroxylamin and acid amids or acids.

Oxamilic Acid (*oks-am-il'-ik*) [ὀξαλίς, sorrel], $C_8H_7NO_3$. A crystalline substance melting at 150° C.

Oxazotic (*oks-az-o'-tik*). Synonym of *Nitric.* [Old.]

Oxeronosus (*oks-er-on'-o-sus*) [ὀξύς, sharp; νόσος, disease]. A diseased state depending on an accumulation of acid in the body.

Oxid (*oks'-id*) [ὀξύς, sharp]. Any binary combination of oxygen and another element or radicle.

Oxidant (*oks'-id-ant*) [ὀξύς, acid]. An oxidizing agent.

Oxidate (*oks'-id-at*) [ὀξύς, acid]. To convert into an oxid.

Oxidation (*oks-id-a'-shun*) [ὀξύς, sharp]. In chemistry, the process of the atomic combination of oxygen with any other element.

Oxidize (*oks'-id-īz*) [ὀξύς, sharp]. In chemistry, to cause to combine with oxygen.

Oxidized (*oks'-id-īzd*) [ὀξύς, sharp]. Combined with oxygen.

Oximido-compounds (*oks-im-id'-o-kom'-powndz*). See *Isonitroso-compounds.*

Oxindol (*oks-in'-dol*) [ὀξύς, sharp; *indicum*, indigo], C_8H_7NO. A substance produced in the reduction of aceto-amido-mandelic acid with HCl. It crystallizes from hot water in colorless needles, and melts at 120° C.

Oxisalt (*oks'-e-sawlt*) [ὀξύς, sharp; ME., *salt*, salt]. A salt of an acid containing oxygen.

Oxonic Acid (*oks-on'-ik*) [ὀξύς, sharp]. A derivative of uric acid not yet obtained in the pure state.

Oxter (*oks'-ter*) [AS., *ōhsta*, the armpit]. The axilla, or armpit.

Oxy- (*oks'-e-*) [ὀξύς, sour or sharp]. A prefix denoting chemic combination with oxygen. **O. Acids,** acids containing oxygen. **O.-salt,** in chemistry, any salt containing oxygen in combination with both a base and an acid. **O.-sulphate,** a basic salt formed by a combination of a basic oxid and the sulphate of the same element or radicle.

Oxyacanthin (*oks-e-ak-an'-thin*) [ὀξύς, sharp; ἀκανθα, spine], $C_{32}H_{28}NO_{11}$ (?). An alkaloid of *Barberry*, occurring in small quantities.

Oxyacanthous (*oks-e-ak-an'-thus*) [ὀξύς, sharp; ἀκανθα, a spine]. In biology, possessing sharp thorns or prickles.

Oxyacetic Acid (*oks-e-as-e'-tik*). See *Acid, Glycollic.*

Oxyacoa (*oks-e-ak-o'-ah*). See *Oxyakoia.*

Oxyacusis (*oks-e-ak-u'-sis*). Synonym of *Hyperacusis.*

Oxyæsthesia (*oks-e-es-the'-ze-ah*). See *Oxyesthesia.*

Oxyakoia, Oxyacoa (*oks-e-ak-oi'-ah, oks-e-ak-o'-ah*) [ὀξύς, sharp; ἀκοή, hearing]. A state of the auditory sense in which there is an increased capacity for the detection of sounds of very low pitch. There may be also a subjective sensation of hearing an acute sound.

Oxyamygdalic Acid (*oks-e-am-ig'-dal-ik*) [ὀξύς, sharp; ἀμυγδάλη, almond], $C_8H_8O_4$. A crystalline body found in the urine in cases of acute yellow atrophy of the liver.

Oxyanthraquinone (*oks-e-an-thrak-win'-ōn*) [ὀξύς, acid; ἄνθραξ, coal; Sp., *quina*, bark]. Any one of the numerous hydroxyl compounds of anthraquinone. The various derivatives are distinguished by a prefix corresponding to the number of hydroxyl molecules present.

Oxyaphia (*oks-e-a'-fe-ah*) [ὀξύς, acute; ἁφή, touch]. Abnormal acuteness of the sense of touch.

Oxyarteritis (*oks-e-ar-ter i'-tis*) [ὀξύς, sharp; ἀρτερία, trachea; ιτις, inflammation]. An acute arteritis.

Oxyarthritis (*oks-e-ar-thri'-tis*) [ὀξύς, acute; ἄρθρον, a joint; ιτις, inflammation]. An acute arthritis.

Oxybase (*oks'-e-bās*) [ὀξύς, sharp; *basis*, base]. A basic oxid.

Oxyblepsia (*oks-e-blep'-se-ah*) [ὀξύς, sharp; βλέπειν, to see]. Acuteness of vision.

Oxybolia (*oks-e-bo'-le-ah*) [ὀξύς, quick; βολή, a throw]. Premature ejaculation of semen.

Oxybracteate (*oks-e-brak'-te-āt*) [ὀξύς, sharp; *bractea*, a thin plate]. In biology, having sharp bracts.

Oxybronchitis (*oks-e-brong-ki'-tis*) [ὀξύς, sharp; βρόγχος, bronchus; ιτις, inflammation]. An acute bronchitis.

Oxybutyric Acid (*oks-e-bu-ti'-rik*) [ὀξύς, acid; *butyrum*, butter], $C_4H_8O_3$. A fatty acid found in the urine in certain fevers, and especially in diabetes. Its presence in the body in diabetes, simultaneously with that of diacetic acid, is supposed to be the cause of diabetic coma. The oxybutyric acid of diabetic urine is levorotatory.

Oxycannabin (*oks-e-kan'-ab-in*) [ὀξύς, acid; *cannabis*, hemp], $C_{20}H_{20}N_2O_7$. A crystalline substance produced when cannabin is treated with nitric acid.

Oxycarpous (*oks-e-kar'-pus*) [ὀξύς, sharp; καρπός, fruit]. In biology, bearing sharp-pointed fruit.

Oxycaulorrhea (*oks-e-kawl-or-e'-ah*) [ὀξύς, sharp; καυ-

λός, the penis; ῥοία, a flow]. Acute blennorrhea in the male.

Oxycephalia (*oks-is-ef-a′-le-ah*) [ὀξύς, sharp; κεφαλή, head]. The character of a skull that is high and pointed; hypsicephaly.

Oxycephalus (*oks-is-ef′-al-us*). See *Oxycephalia.*

Oxycephaly (*oks-is-ef′-al-e*). See *Oxycephalia.*

Oxychilous, Oxycheilous (*oks-ik-i′-lus*) [ὀξύς, sharp; χεῖλος, the lip]. In biology, having sharp lips, *e. g.*, certain shells.

Oxychinaseptol (*oks-ik-in-as-ep′-tol*). See *Diaphtherin.*

Oxychlorid (*oks-ik-lo′-rid*) [ὀξύς, acid; χλωρός, green]. A salt of an element or radicle containing both oxygen and chlorin.

Oxycinchonin (*oks-is-in′-ko-nin*) [ὀξύς, acid; *cinchona*], $C_{20}H_{24}N_2O_2$. An isomer of quinin.

Oxycinesis (*oks-is-in-e′-sis*). Same as *Acrocinesis.*

Oxycitric Acid (*oks-is-it′-rik*). See *Acid.*

Oxycollidin (*oks-ik-ol′-id-in*) [ὀξύς, sharp; κόλλα glue], $C_8H_{11}NO$. One of the alkaloids of cod-liver oil. See *Morrhuolins.*

Oxycoumarin (*oks-ik-u′-mar-in*). See *Umbelliferon.*

Oxycyanid (*oks-is-i′-an-id*) [ὀξύς, sharp; κύανος, blue]. A product of the union of an aldehyd with hydrogen cyanid.

Oxyd (*oks′-id*). Synonym of *Oxid.*

Oxydactyl (*oks-id-ak′-til*) [ὀξύς, sharp; δάκτυλος, a finger or toe]. In biology, having slender digits.

Oxydant (*oks′-id-ant*) [ὀξύς, sharp]. An oxidating agent.

Oxyderces (*oks-id-er′-sēz*) [ὀξύς, sharp; δέρκεσθαι, to see clearly]. Sharp-sighted; producing keenness of vision.

Oxydercia (*oks-id-er′-se-ah*) [ὀξύς, sharp; δέρκεσθαι, to see clearly]. Keenness of vision.

Oxydiabrosis (*oks-id-i-ab-ro′-sis*) [ὀξύς, sharp; διάβρωσις, ulceration]. A rapidly progressing ulceration.

Oxydimorphin (*oks-id-im-or′-fin*) [ὀξύς, sharp; *Morpheus*, the god of sleep], $C_{34}H_{36}N_2O_6$. A finely crystalline derivative of morphin.

Oxydoid (*oks′-id-oid*) [ὀξύς, sharp; εἶδος, like]. Resembling an oxid.

Oxydulated (*oks-id′-u-la-ted*) [ὀξύς, sharp.] Partially or slightly oxidized.

Oxydum (*oks′-id-um*). See *Oxid.*

Oxyecoia (*oks-e-ek-oi′-ah*). Synonym of *Oxyakoia.*

Oxyencephalitis (*oks-e-en-sef-al-i′-tis*) [ὀξύς, acute; ἐγκέφαλος, brain; ιτις, inflammation]. Acute encephalitis.

Oxyendocarditis (*oks-e-en-do-kar-di′-tis*) [ὀξύς, sharp; ἔνδον, within; καρδία, the heart; ιτις, inflammation]. Acute endocarditis.

Oxyenteritis (*oks-e-en-ter-i′-tis*) [ὀξύς, sharp; ἔντερον, intestine; ιτις, inflammation]. Acute enteritis.

Oxyepatitis (*oks-e-ep-at-i′-tis*) [ὀξύς, sharp; ἧπαρ, liver; ιτις, inflammation]. Acute hepatitis.

Oxyesthesia (*oks-e-es-the′-ze-ah*) [ὀξύς, sharp; αἴθησις, sensation]. A condition of increased acuity of sensibility.

Oxyformobenzoilic Acid (*oks-if-or-mo-ben-zo-il′-ik*) [ὀξύς, acid; *formica*, an ant; *benzoin*], $C_8H_8O_4$. An acid said to be found in the body in acute yellow atrophy of the liver.

Oxygala (*oks-ig′-al-ah*) [ὀξύς, sour; γάλα, milk]. Sour milk.

Oxygastromenia (*oks-ig-as-tro-me′-ne-ah*) [ὀξύς, sharp; γαστήρ, the belly; μηνιαῖα, the menses]. Sudden, vicarious menstruation from the stomach.

Oxygen (*oks′-ij-en*) [ὀξύς, acid; γεννᾶν, to produce]. O = 15.96; quantivalence II. One of the elements. See *Elements, Table of.* It is a colorless, tasteless, odorless gas, constituting one-fifth of the atmosphere, eight-ninths of water, three-fourths of organized bodies, and about one-half the crust of the globe. It is characterized by its affinity for the other elements, with every one of which it unites, excepting fluorin. It is an active element in the oxy-acids, and in all the alkaline hydrates. In organic chemistry it unites with radicles and forms alcohols, ethers, and their derivatives. Oxygen is inhaled as a therapeutic agent in diseases of the respiratory organs and blood. It is essential to respiration; its combination with the tissues yields heat and other energy. Combustion is also dependent upon it, consisting of a rapid oxidation, with the evolution of heat and light. It exists also in an allotropic form known as ozone.

Oxygenated (*oks′-ij-en-a-ted*) [ὀξύς, acid; γεννᾶν, to produce]. Containing or provided with oxygen.

Oxygenation (*oks-ij-en-a′-shun*) [ὀξύς, acid; γεννᾶν, to produce]. The saturation of a substance with oxygen, either by chemic combination or by mixture.

Oxygenesis (*oks-ij-en′-es-is*) [ὀξύς, acid; γεννᾶν, to produce: *pl.*, *Oxygeneses*]. Baumes' name for any disease due to alteration of the normal quantity of oxygen in the blood.

Oxygenic (*oks-ij-en′-ik*) [ὀξύς, acid; γεννᾶν, to produce]. Producing acids.

Oxygenized (*oks′-ij-en-ızd*). Synonym of *Oxygenated.*

Oxygenometer (*oks-ij-en-om′-et-er*). Same as *Eudiometer.*

Oxygeusia (*oks-ig-u′-se-ah*) [ὀξύς, acute; γεῦσις, taste]. Marked acuteness of the sense of taste.

Oxyglossitis (*oks-ig-los-i′-tis*) [ὀξύς, acute; γλῶσσα, a tongue; ιτις, inflammation]. Acute glossitis.

Oxygnathous (*oks-ig′-na-thus*) [ὀξύς, sharp; γνάθος, jaw]. In biology, applied to molluscs in which the jaws are smooth or nearly so.

Oxyhaloid (*oks-e-hal′-oid*) [ὀξύς, acid; ἅλς, salt; εἶδος, like]. A compound of an element or radicle with oxygen and a halogen.

Oxyhematin (*oks-e-hem′-at-in*). Synonym of *Hematin.*

Oxyhemoglobin (*oks-e-hem-o-glo′-bin*) [ὀξύς, acid; αἷμα, blood; *globus*, a round body]. Hemoglobin united, molecule for molecule, with oxygen. It is the characteristic constituent of the red-corpuscles to which the scarlet color of arterial blood is due. It may be obtained in crystalline form, the crystals not being so pleochroic as are those of hemoglobin. Oxyhemoglobin forms from 86 to 94 per cent. of dry, red, human blood-corpuscles.

Oxyhydrogen (*oks-e-hi′-dro-jen*) [ὀξύς, acid; ὕδωρ, water; γεννᾶν, to produce]. A mixture, in gaseous form, of oxygen and hydrogen. **O. Blowpipe,** a blowpipe in which the heat is obtained by the combustion of a mixture of oxygen and hydrogen. The heat produced is intense.

Oxyhydroparacoumaric Acid (*oks-e-hi′-dro-par-ak-u-mar′-ik*) [ὀξύς, acid; ὕδωρ, water; παρά, beside; *coumarin*]. A complex substance believed to be formed in the body by the decomposition of tyrosin.

Oxyicterus (*oks-e-ik′-ter-us*) [ὀξύς, sharp; ἴκτερος, jaundice]. Intense acute jaundice.

Oxyiodid (*oks-e-i′-o-did*) [ὀξύς, acid; ἰώδης, like a violet]. A salt containing both oxygen and iodin united to an element or radicle.

Oxylaryngitis (*oks-il-ar-in-ji′-tis*) [ὀξύς, sharp; λάρυγξ, larynx; ιτις, inflammation]. Acute laryngitis.

Oxyleukotin (*oks-il-u′-ko-tin*) [ὀξύς, acid; λευκός, white], $C_{84}H_{32}O_{12}$. A substance found in *Paracoto bark.*

Oxylienitis (*oks-il-i-en-i′-tis*) [ὀξύς, sharp; *lien*, spleen; ιτις, inflammation]. Acute inflammation of the spleen.

xylinoleic Acid (*oks-il-in-o-le'-ik*) [ὀξύς, acid; *linum*, flax; *oleum*, oil], $C_{16}H_{28}O_3$. A compound derived from linoleic acid by oxidation.

xylizaric Acid (*oks-il-iz-ar'-ik*) [ὀξύς, acid; *lizari*, madder]. A synonym of purpurin; also a distinct compound found in madder.

xymastitis (*oks-im-as-ti'-tis*) [ὀξύς, sharp; μαστός, a breast; ιτις, inflammation]. Acute mastitis.

xymel (*oks'-im-el*) [ὀξύς, sharp; μέλι, honey]. Honey mixed with vinegar or dilute acetic acid. **O. of Squill**, the same, prepared with vinegar of squill.

xymeter (*oks-im'-et-er*). Same as *Eudiometer*.

xymetritis (*oks-im-et-ri'-tis*) [ὀξύς, sharp; μήτρα, womb; ιτις, inflammation]. Acute metritis.

xymetrorrhea (*oks-im-et-ror-e'-ah*) [ὀξύς, sharp; μήτρα, womb; ροία, a flow]. Acute metrorrhea.

xymorphin (*oks-im-or'-fin*). Same as *Pseudomorphin*.

xymyelitis (*oks-im-i-el-i'-tis*) [ὀξύς, sharp; μυελός, marrow; ιτις, inflammation]. Acute myelitis.

xymyitis (*oks-im-i-i'-tis*) [ὀξύς, sharp; μῦς, muscle; ιτις, inflammation]. Acute myitis.

xynaphthoic Acid (*oks-in-af-tho'-ik*). See *Acid, Alpha-oxynaphthoic*.

xynaphthol (*oks-in-af'-thol*) [ὀξύς, acid; νάφθα, asphaltum], $C_{10}H_8O_2$. A derivative of naphthol existing in two isomeric forms.

xynarcotin (*oks-in-ar'-kot-in*) [ὀξύς, acid; ναρκωτικός, narcotic], $C_{22}H_{23}NO_8$. A crystalline alkaloid derived from narcein.

xyneurin (*oks-in-u'-rin*). See *Betain*.

xynosema (*oks-in-o-se'-mah*) [ὀξύς, sharp; νόσημα, a sickness]. Any acute sickness.

xynosos (*oks-in-o'-sos*) [ὀξύς, sharp; νόσος, disease]. An acute disease.

xyntic (*oks-in'-tik*) [ὀξυντός (ὀξύνειν), to make sharp, to make acid]. Rendering acid. **O. Cells**, the acid-giving cells of Langley; cells of the fundus-glands of the stomach; see *Delomorphous Cells of Rollet*. **O. Gland**, any acid-secreting gland.

xynusos (*oks-in-u'-sos*) [ὀξύς, sharp; νοῦσος, disease]. Any acute disease.

xynvitic Acid (*oks-in-vit'-ik*). See *Acid*.

xyopia (*oks-e-o'-pe-ah*) [ὀξύς, sharp; ὤψ, eye]. More than ordinary acuity of vision.

xyopy (*oks'-e-o-pe*). Same as *Oxyopia*.

xyosphrasia (*oks-e-os-fra'-ze-ah*). Same as *Oxyosphresia*.

xyosphresia (*oks-e-os-fre'-ze-ah*) [ὀξύς, sharp; ὀσφρησις, smell]. Marked or abnormal acuteness of smell.

xyphenic Acid (*oks-if-en'-ik*). Synonym of *Pyrotartaric*.

xyphile (*oks'-if-il*) [ὀξύς, sharp; φύλλον, leaf]. In biology, Ehrlich's term for histologic elements that attract acid dyes, ordinarily called *eosinophilous*. The opposite of *basophile* or *basophilous* elements, which attract basic dyes.

xyphlegmasia (*oks-if-leg-ma'-ze-ah*) [ὀξύς, sharp; φλεγμασία, inflammation]. An acute inflammation.

xyphonia (*oks-if-o'-ne-ah*) [ὀξύς, sharp; φωνή, voice]. Shrillness of voice.

xyphyllous (*oks-if-il'-us*) [ὀξύς, sharp; φύλλον, a leaf]. In biology, having acuminated leaves.

xypyridin (*oks-ip-ir'-id-in*) [ὀξύς, acid; πῦρ, fire], C_5H_5NO. A derivative of pyridin existing in three isomeric forms.

xyquinin (*oks-ik-win'-in*) [ὀξύς, acid; S. Amer., *quina*, bark], $C_{20}H_{24}N_2O_3$. An alkaloid resulting when quinin sulphate is boiled with potassium nitrite.

xyquinizin (*oks-ik-win'-iz-in*) [ὀξύς, acid: S. Amer., *quina*, bark], $C_9H_8N_2O$. An oxidation-product of quinizin.

Oxyquinolin (*oks-ik-win'-o-lin*). See *Carbostyril*.

Oxyregmia (*oks-ir-eg'-me-ah*) [ὀξύς, acid; ἐρυγμός, eructation]. Acid eructation.

Oxyrhine (*oks'-ir-in*) [ὀξύς, sharp; ῥίς, nose]. In biology, possessing a sharp-pointed nose, or snout; having an acute olfactory sense.

Oxysaccharum (*oks-is-ak'-ar-um*) [ὀξύς, sharp; σάκχαρον, sugar]. A mixture of vinegar and sugar.

Oxysepsis (*oks-is-ep'-sis*) [ὀξύς, acid; σῆψις, putrefaction]. Putrefaction during which acids are developed; also, the decomposition following quickly after death.

Oxysitia (*oks-is-ish'-e-ah*) [ὀξύς, acid; σῖτος, food]. Acidity of the stomach.

Oxyspartein (*oks-e-spar'-te-in*) [ὀξύς, sharp; σπάρτον, Spanish broom]. A derivative of spartein; it is a cardiac stimulant.

Oxystrychnin (*oks-is-trik'-nin*) [ὀξύς, acid; στρύχνος, a plant of the nightshade family], $C_{21}H_{28}N_2O_7$. An alkaloid produced by boiling strychnin sulphate with potassium nitrite.

Oxytartarus (*oks-it-ar'-tar-us*). Synonym of *Potassium Acetate*.

Oxytes (*oks'-it-ēz*) [ὀξύς, acid]. Acidity.

Oxytocic (*oks-it-os'-ik*) [ὀξύς, sharp; τόκος, labor]. 1. Hastening parturition; ocytocic. 2. A drug that hastens childbirth by stimulating uterine contraction; an ocytocic.

Oxytocous (*oks-it-ok'-us*). See *Oxytocic*.

Oxytolyltropin (*oks-it-ol-il'-tro-pin*). Same as *Homatropin*.

Oxyuricide (*oks-e-u'-ris-īd*) [ὀξύς, sharp; οὐρά, tail; *cædere*, to kill]. Any anthelmintic that is destructive to worms of the genus *Oxyuris*, or pinworms.

Oxyuris (*oks-e-u'-ris*) [ὀξύς, sharp; οὐρά, tail]. A genus of nematode worms founded by Rudolphi in 1809; the pinworms. See *Parasites (Animal)*, *Table of*.

Ozena (*o-ze'-nah*) [ὄζαινα; ὄζη, a stench]. Chronic disease of the nose accompanied by a fetid discharge. See *Rhinitis, Chronic Atrophic*.

Ozenacoccus (*o-ze-nak-ok'-us*) [ὄζαινα, ozena; κόκκος, a grain]. The *Micrococcus loewenbergii*. See *Bacteria*, *Synonymatic Table of*.

Ozocerite (*o-zo-se'-rīt*). See *Ozokerite*.

Ozochrotous (*o-zok'-ro-tus*) [ὄζη, stench; χρώς, skin]. Having a bad-smelling skin.

Ozokerite (*o-zo-ke'-rīt*) [ὄζη, smell; κηρός, wax]. A solid paraffin found free in Galicia and Roumania. It is also called *mineral wax*. It is like resinous wax in consistence and translucency, of a brown or brownish-yellow color, and of a pleasantly aromatic odor.

Ozone (*o'-zōn*) [ὄζειν, to smell]. An allotropic form of oxygen, its molecule having the structure O_3. It is present in the atmosphere in small quantities, being produced constantly by the evaporation of water, by electric discharges, and in the growth of chlorophyl-containing plants. It is also formed during the slow oxidation of phosphorus, of turpentine and other essential oils. It is an active oxidizing agent, possessing bleaching and antiseptic properties.

Ozonization (*o-zo-niz-a'-shun*) [ὄζειν, to smell]. The act of ozonizing, or of impregnating with ozone.

Ozonized (*o'-zo-nīzd*) [ὄζειν, to smell]. Containing ozone.

Ozonometer (*o-zo-nom'-et-er*) [ὄζειν, to smell; μέτρον, measure]. A device for use in estimating the proportion of ozone in the atmosphere.

Ozostomia (*o-zos-to'-me-ah*) [ὄζη, stench; στόμα, mouth]. A foul odor from the mouth, or the breath.

Ozouf's Apparatus. An apparatus for charging water with CO_2 by the intermittent method.

P

P. Used in chemic nomenclature as the symbol of phosphorus.

Pabular (*pab'-u-lar*) [*pabulum*, food]. Of, pertaining to, or of the nature of, pabulum.

Pabulation (*pab-u-la'-shun*) [*pabulari*, to graze]. 1. The act of feeding. 2. Same as *Pabulum*.

Pabulin (*pab'-u-lin*) [*pabulum*, food]. An albuminous and fatty substance present in the blood immediately after the process of digestion.

Pabulous (*pab'-u-lus*). Same as *Pabular*.

Pabulum (*pab'-u-lum*) [L.]. Food. Anything nutritive.

Pacchionian Bodies, or **Pacchioni's Glands** (*pak-e-o'-ne-an*) [after *Pacchioni*, an Italian anatomist, 1665–1726]. A name given to certain granulations, produced by the increased growth of the villi of the arachnoid. See *Gland*. The bodies are found along the superior longitudinal sinus; along the margin of the fissure of Sylvius; on the surface of the pia; on the posterior and antero-inferior parts of the posterior lobe of the cerebrum; in the interior of the superior longitudinal sinus. They not infrequently contain small, hard, calcareous concretions, called "brain-sand." **P. Fossæ,** or **Depressions,** the pit-like depressions on the cerebral surface of the skull, produced by the pressure of the Pacchionian bodies. See *Depression*.

Pacchionius, Foramina of. See *Foramina, Table of.*

Pachemia (*pak-e'-me-ah*). Synonym of *Pachyemia*.

Pachismus (*pak-iz'-mus*) [παχύς, thick]. Thickening; induration.

Pachulosis (*pak-u-lo'-sis*). See *Pachylosis*.

Pachy- (*pak'-e-*) [παχύς, thick]. A prefix, denoting thick.

Pachyacria (*pak-e-ak'-re-ah*) [παχύς, thick; ἄκρος, extremity]. Synonym of *Akromegaly*.

Pachyæmia (*pak-e-e'-me-ah*). See *Pachyemia*.

Pachyblepharon (*pak-e-blef'-ar-on*) [παχύς, thick; βλέφαρον, the eyelid]. Thickening of the eyelids arising from the presence of tubercles or some inflammatory process.

Pachyblepharosis (*pak-e-blef-ar-o'-sis*) [παχύς, thick; βλέφαρον, eyelid]. Chronic thickening and induration of the eyelids.

Pachycarpous (*pak-e-kar'-pus*) [παχύς, thick; καρπός, fruit]. In biology, having a thick pericarp.

Pachycephalia (*pak-e-sef-a'-le-ah*). See *Pachycephaly*.

Pachycephalic (*pak-e-sef-al'-ik*) [παχύς, thick; κεφαλή, head]. Having unusual thickness of the skull.

Pachycephalous (*pak-e-sef'-al-us*). See *Pachycephalic*.

Pachycephaly (*pak-e-sef'-al-e*) [παχύς, thick; κεφαλή, head]. Abnormal thickness of the bones of the skull.
